The Synoptic Gospels put the Crucifixion on the day of the Jewish Passover festival. The Gospel of John, however, declares that Jesus was crucified during the last few hours before the Passover began. In other words, the Friday on which Jesus died, according to the Fourth Evangelist, was Nisan 14 rather than Nisan 15; the Day of Preparation rather than the Passover itself. While there is still much disagreement over the issue among NT scholars, it appears to this writer that in this instance the Johannine rather than the Synoptic tradition must be accepted. The Passover was one of the most sacred days in the Jewish calendar and was hedged about with the strictest regulations. It seems inconceivable that Jesus would have been arrested, tried, condemned, crucified, and buried on such a day. Even Mark reports that the Sanhedrin wished to encompass Jesus' destruction before the festival began, and we need not doubt that they were successful in their plans. 'It was now two days before the Passover. . . . And the chief priests and the scribes were seeking how to arrest him by stealth, and kill him; for they said, "Not during the feast, lest there be a tumult of the people"' (Mk 14^{1-2}).

If John rather than Mark is correct, viz. that Jesus died a few hours before the beginning of the Passover celebration, Jesus' last meal with His disciples could not have been the Passover meal that the Synoptists describe

and should not be interpreted in the light of Passover symbolism. It would have been an ordinary meal eaten twenty-four hours before Jews ate their unleavened bread, bitter herbs, and paschal lamb; and the memory of those who shared the meal with Jesus would go back to the occasion itself and the impression it made on them rather than to the meal as their last paschal observance with their Master.

While Paul's account differs in some details from the one in Mark–Matthew, it is apparent that both represent fundamentally the same tradition. Jesus took a loaf of bread, blessed it [Paul: 'when he had given thanks'], broke it, and said, 'This is my body' [Paul: 'which is broken for you']. Then Jesus gave His disciples a cup of wine [Mark–Matthew: 'when he had given thanks'] with the words: 'This [Paul: 'cup'] is my blood of the [Paul: 'new'] covenant.' Paul omits 'and gave it to them' in connexion with both the bread and the cup; 'which is poured out for many' [Matthew adds: 'for the forgiveness of sins'] in connexion with the cup; and also Jesus' prediction in Mk 14^{25} (Mt 26^{29}): 'I shall not drink again of the fruit of the vine until that day when I drink it new in the kingdom of God.' Paul's most significant additions to the account in Mark–Matthew are the clause 'which is broken for you,' appended to the statement 'This is my body,' and the command that the Supper should be repeated (1 Co 11^{25b-26}).

In Luke's account (22^{15-19a} [the short or 'Western' text]), (1) the cup comes before the bread; (2) the cup is not associated with the establishment of a new covenant; and (3) the main emphasis is on the Supper as an eschatological feast that anticipated God's triumph in the new age of His rule (vv.$^{17-18}$). Luke's representation of the Last Supper is supported by the account in the Didache (9^{1-3}) of the celebration of the Lord's Supper in at least parts of the Church in the early 2nd cent.; and it is also of importance to note that a passage in Acts that appears to refer to early Christian celebration of the Lord's Supper (2^{46}; cf $20^{7, 11}$) speaks of the celebrants as partaking of food 'with glad and generous hearts'—*i.e.* as a feast of joyous anticipation.

The place occupied in the Synoptics by the words of the institution of the Lord's Supper is taken in John by an account of Jesus' institution of the rite of footwashing (13^{2-11}). Apparently the Fourth Evangelist wished to associate the Church's sacrament of the Eucharist with Christ's life-giving power (cf the great 'Eucharistic chapter' in Jn 6) rather than with His death.

16. The Passion.—(1) *The Agony.*—Mark tells us (14^{26}) that Jesus and His disciples after partaking of the Supper departed to the Mount of Olives. If Luke's assertion is correct, that Jesus and His followers regularly spent the night on Olivet (21^{37}; we learn from Josephus that pilgrims to Jerusalem at the time of the great festivals often camped on the Mount of Olives due to overcrowded conditions in the city), then Judas, who did not accompany Jesus' party, would be familiar with their rendezvous. (According to Jn 18^{1-2}, Jesus 'often met there with His disciples.')

According to the Passion Story, Jesus now left the main body of His followers and went with Peter and James and John into Gethsemane (Mk 14^{32-33}||), a word that means 'oil press' and that John (who, like Luke, omits the Aramaic name) tells us was a garden or orchard (18^{1}).

The account of Jesus in Gethsemane is one of the most exquisite and moving of the incidents in the gospel story. Even a Jewish scholar could write of it: 'The whole story bears the hall-mark of human truth. . . . The sorrows and sufferings of the solitary Son of Man, profound as they are, leave on every sympathetic heart, be it the heart of the believer or unbeliever, such an impression as may never be wiped out' (Joseph Klausner). The Synoptic account, which is supported by another in He 5^{7-9}, must be based on some historical reminiscence. The Church would scarcely have invented the story that Jesus, at the very end of His ministry, was still uncertain about its course and had to wrestle in prayer with doubts and fears. It is significant that the Fourth Evangelist omits any reference to the ordeal. It was not in accordance with his idea of the way the Son of God would have behaved. At the same time, the differentiation of the inner circle of three from the larger group of Jesus' followers appears to have been imposed on an earlier form of the story, and the account as we now have it reads like an acted parable or narrative version of the Lord's Prayer.

(2) *The arrest.*—Mark and the other Synoptists represent those who apprehended Jesus as an unorganized rabble that had come from the Sanhedrin. The Fourth Evangelist has an interesting variant, viz. that the arrest was effected by Roman soldiers (18^{3}), but this can hardly have been the case. Roman soldiers would have taken Jesus directly to Pilate rather than to the Jewish authorities. Probably Mark used the term 'crowd' loosely (or even incorrectly) for Temple police who had been commissioned by the Sanhedrin to bring Jesus before them. Judas had prearranged with his employers that he would identify their victim by a kiss, the ordinary form of friendly salute, for some such signal was necessary in the semi-darkness of a moonlit night. (While some critics regard the whole story of Judas and his betrayal as a dramatic but unhistorical embellishment of the Passion Narrative, it seems incredible to this writer that the early Church would have created in Judas a problem that it later found so difficult to solve [see above, **11** (2)].)

Mark mentions an unnamed disciple who drew a sword, attacked one of the arresting party, and cut off his ear (14^{47}). In Luke this incident is the prelude to a miracle. 'Jesus said, "No more of this!" And he touched his ear and healed him' (22^{51}). In John the disciple becomes Simon Peter (18^{10}). Jesus Himself offered no resistance, uttering only a dignified protest against the clandestine character of the whole affair (Mk 14^{48-49}||), but His disciples were not cast in any heroic mould. 'They all forsook him and fled' (Mk 14^{50}).

(3) *The trials.*—(i) The examination before Annas.—The Gospel of John says that Jesus was taken immediately after His arrest to the house of Annas for a preliminary examination (18^{13}). Annas had been High Priest for a period some twenty years before the gospel story. According to Jewish practice he would have remained High Priest for life, but the Romans, who disliked to contemplate such great power in the hands of one man for any length of time, had insisted on a limited tenure of office. Nevertheless, the High Priesthood remained in Annas' family for decades, and Annas' son-in-law, Caiaphas, was in office at the time of Jesus' arrest. Some scholars believe it to be probable that Annas still exercised chief power in the Sanhedrin in all but name, that nothing would be done without consulting him, and that John is correct in saying that Jesus was taken to him before being tried by the Sanhedrin. But Annas is not mentioned in Mark or Matthew, and only incidentally and in another connexion in Luke (3^{12}), and John's added detail would put still another event into the already crowded sequence of Thursday evening.

(ii) The hearing before the Sanhedrin.—Brought before the Sanhedrin, the highest Jewish court, Jesus was charged by witnesses with having threatened to destroy the Temple (Mk 14^{58}). The evidence not being consistent (v.^{59}), the High Priest appealed directly to Jesus to say if He claimed to be the Christ (v.^{61}). When He answered 'I am,' the claim was forthwith declared to be blasphemy and 'all condemned him as deserving death' (v.^{64}).

By appealing to the Talmud scholars have pointed out numerous irregularities in the trial procedure, notably that capital trials might be begun only in the daytime, that the Sanhedrin was a judging, not a prosecuting, body, and that confession did not warrant conviction unless what had been admitted had also been attested by at least two witnesses. As a consequence various conclusions have been drawn: (1) Jesus had a fair and legal trial, but our records are so confused that we can no longer get an adequate picture of it from them;

(2) the trial was illegal from beginning to end but is reported with fair accuracy in the Gospels; (3) the proceedings before the Sanhedrin were not a formal trial, but a preliminary investigation held in order to frame a charge against Jesus to be laid before Pilate—a hearing comparable to grand jury procedure in American jurisprudence.

(iii) The trial before Pilate.—The hearing before the Sanhedrin ended late Thursday evening. Mk 15[1] tells us that the Council called a second meeting early the following morning to make arrangements to bring Jesus before Pilate. Luke knows of only one meeting, that on Friday morning (22[66–71]).

Pontius Pilate (q.v.) had been appointed Procurator of Judaea by Tiberius Caesar in A.D. 26 and held office until A.D. 36. Philo describes him as corrupt, obstinate, and merciless, but the fact that he was left in office for ten years—much longer than any of his predecessors or successors—is an indication that his superiors were satisfied with his administration. A volume of legendary 'Acts of Pilate' literature came into being in later centuries, but it is historically worthless. We know nothing of Pilate's earlier or later career.

According to Jn 18[28], the trial before Pilate took place in the portico outside the praetorium, the official residence of the procurator in Jerusalem and probably the former palace of Herod the Great. Pilate gathered from the charges that Jesus in some way had claimed to be a king. He turned to the prisoner and asked Him, 'Are you the King of the Jews?' (Mk 15[2]). Jesus answered, 'You have said so.' Some interpreters believe that these words were a recognized formula of affirmation. More probably, in Aramaic or Greek as in English, they were meant to be non-committal.

The story of Pilate's attempt to relieve himself of responsibility for the case by sending Jesus to Herod Antipas (23[6–16]) is a Lukan addition to the basic Markan account. Herod may well have been in the city for the festival. Pilate may well have thought him more competent than himself to deal with a Galilaean. But it is more probable that Luke's embellishment is unhistorical, for in Ac 4[26–27] the Evangelist represents the trial before Herod as well as that before Pilate as necessary for the fulfilment of Ps. 2[2].

Matthew's additions to Mark at this point are plainly legendary: 27[19, 24f] were added to intensify the guilt of the Jews in the condemnation of Jesus; and the story in 27[3–10] was believed to mitigate the enormity of Judas' crime (see above, **11** (2)).

The story that Pilate wished to release Jesus but that the Jews demanded instead the freeing of a notorious criminal was taken over by Matthew and Luke from Mk 15[6–15]. The record in the Gospels is our only authority for the fact that it was customary at the time for the Roman procurator to celebrate a Jewish festival by an act of clemency. The story serves the interest of the Evangelists in emphasizing Pilate's unwillingness to order Jesus' crucifixion (see above, **15** (3)), but that in itself is not enough to compel us to doubt its historicity. In the Sinaitic-Syriac text of Mt 27[17] we are told that Pilate's question was, 'Whom do you wish me to release to you? *Jesus* Barabbas, or *Jesus* whom men call the Christ?' and there are some scholars who believe that this reading of Matthew preserves the original form of the gospel tradition.

Mark says that Pilate finally delivered Jesus to be crucified because he wished 'to satisfy the crowd' (15[15]). The Fourth Evangelist adds that the Jewish mob intimidated the procurator with threats (19[12]).

(4) *The Crucifixion.*—After Pilate had condemned Jesus he handed Him over to a guard of Roman soldiers to be crucified. According to Mk 15[17–20] the soldiers then subjected their prisoner to a species of crude abuse and mockery. Luke omits the incident because he had already used the Markan details in a similar scene before Herod Antipas (23[11]). Mark's tradition is that Jesus was crucified at a place called Golgotha, an Aramaic word meaning 'skull.' (In the AV the Greek 'skull' of Lk 23[33] is translated by the Latin 'Calvary,' a word made familiar in Christian usage by the Vulgate.) Presumably the site of the Crucifixion was a skull-shaped mound or hill. According to He 13[12] it lay 'outside the gate'—*i.e.* outside the city limits as defined by its wall. It was customary for the condemned criminal to carry his cross to the place of execution. According to the Synoptic record, Jesus was unequal to the task and a passer-by, identified as Simon of Cyrene and presumably a Diaspora Jew in Jerusalem for the festival, was pressed into service. (He may later have become a convert to Christianity, for his sons were evidently well known to the community for which Mark was written [cf 15[21]]). The Fourth Evangelist deliberately corrected the Synoptic account at this point. Jesus, he says, 'went out, bearing his own cross' (19[17]). Apparently some form of the later gnostic myth that Simon of Cyrene had been crucified in Jesus' stead was already current in the circles for which John was writing.

Crucifixion, a form of execution by torture that had been borrowed by the Romans from Carthaginian practice, was reserved for slaves and rebels and combined the height of ignominy with the extremity of suffering. Mark declares that Jesus was crucified at the third hour and remained on the cross to the ninth hour (15[25, 34])—*i.e.* from 9 a.m. to 3 p.m. John says that Jesus was crucified about the sixth hour (19[14])—*i.e.* about 12 noon—but does not say when He died. (The Church custom of a three-hour vigil on Good Friday is a result of combining data from John and Mark. Perhaps John chose the sixth hour for the time of Jesus' crucifixion for symbolic reasons, to correlate it with the hour when the paschal lambs were slain.) Jesus' ordeal, we are to assume, was mercifully brief, for victims of crucifixion usually died from exhaustion and the tortures of thirst rather than from the loss of blood and could often linger alive on a cross for days.

Some details of the crucifixion story may have been suggested to early narrators by OT prophecy: that Jesus was crucified together with two thieves may have been derived from Is 53[12]; the mockery of Jesus on the Cross from Ps 22[7–8]; the scene of the soldiers casting lots for Jesus' garments from Ps 22[16–18]; and the incident in Mk 15[35–36] (Mt 27[47–48]) from Ps 69[19–21]. The deviations of Matthew and Luke from Mark's account do not appear to rest on any independent tradition. In particular Luke's story of the repentant thief (23[39–43]) was probably due only to the Evangelist's dramatic instinct.

According to Mk 15[23], Jesus on the Cross refused a proffered opiate, but according to Jn 19[29–30] He accepted it. According to Mk 15[26], the executioners inscribed the words 'The King of the Jews' over the Cross as the charge on which Jesus had been condemned. According to Jn 19[19–22], the Jews interpreted the inscription as an insult, and the Fourth Evangelist mentions that it was written in 'Hebrew, in Latin, and in Greek' in order to symbolize the universal Lordship of the crucified Christ.

Of the Seven Words on the Cross, three are recorded by John only (19[26–27, 28, 30]), three by Luke only (23[34, 43, 46]), and only one is quoted by Mark and Matthew. The saying in Lk 23[24], 'Father, forgive them; for they know not what they do,' is textually insecure, for it is missing in all the earliest Greek MSS. Lk 23[46], 'Father, into thy hands I commit my spirit!' is a quotation from Ps 31[5] and is substituted by the Third Evangelist for the bitter cry recorded in Mark.

What of the one saying of Jesus on the Cross that is in Mark and Matthew? Mark says that darkness came over the land from the sixth to the ninth hour (15[33]). (Luke is more explicit. He says that there was an eclipse—'the sun's light failed' [23[45]]—an interpretation that is astronomically impossible at the time of the full moon.) At the ninth hour Jesus uttered a loud cry, a cry which Mark reproduces in Aramaic and Matthew in Hebrew before translating, and which is a quotation from Ps 22[1]: 'My God, my God, why hast thou forsaken

me?' Some interpreters believe that this quotation became part of the Passion Story only after the Church had adopted a messianic interpretation of Ps 22 and point out that, according to Mark, none of Jesus' followers could have heard His words. All, except certain faithful women who stood 'looking on from afar' (15[40]), had forsaken Him and fled (14[50]). (The Fourth Evangelist, disturbed by the fact that Mark did not mention Mary the mother of Jesus among the women at the Cross, corrects the omission and adds that the enigmatic 'disciple whom [Jesus] loved' was also standing near [19[25-27]].) Others, who cannot believe that the later Church would have ascribed such a cry of despair to its Lord on the Cross, are convinced that the words must have been uttered by Jesus. One popular hypothesis, but one that does not seem to this writer to be tenable, is that Jesus intended to quote the entire psalm—a psalm that opens to be sure, with a prayer of desperation, but that ends on a note of triumph (vv.[27-28]).

Mk 15[38] cites a symbolic miracle that accompanied the death of Jesus Christ: 'The curtain of the temple was torn in two, from top to bottom.' Much as the author of the Letter to the Hebrews was later to maintain, Mark wishes to say that Christ's death broke down barriers that heretofore had separated man from God. In 27[51b-53] Matthew heaps miracle upon miracle. Mk 15[39] records that a Roman officer who had witneseed Christ's death declared: 'Truly this man was a son of God'—*i.e.* a divine hero. Luke, in the interest of his thesis that Rome should not regard Christianity as a subversive religion, changes the centurion's words to read: 'Certainly this man was innocent' (23[47]).

(5) *The burial.*—The Christian tradition is that the body of Jesus was given honourable burial by a certain Joseph of Arimathea. 'Arimathea' is probably a corruption of 'Ramathaim,' a village in Judaea near the Samaritan border. Mark says that Joseph was 'a respected member' of the Sanhedrin (15[43]). If this were the case, what part had he taken in the proceedings against Jesus? Both John and Luke appear to have been aware of a difficulty at this point. According to Jn 19[38], Joseph kept his devotion to Jesus a secret for fear of the Jews. According to Lk 23[51], he had not consented to the Sanhedrin's purpose and deed.

Joseph obtained permission from Pilate to bury Jesus' body in a rock-hewn tomb. Matthew says that the tomb was Joseph's own (27[60]); Luke that it was one in which 'no one had ever yet been laid' (23[53]). The only witnesses of the burial were two women who Mark implies were well known in the early Christian community, 'Mary Magdalene and Mary the mother of Joses' (15[47]). Because of the near approach of the sabbath, there was no time for the customary embalming of the body. It was simply wrapped in a linen shroud and left in Joseph's tomb.

17. The Resurrection.—Nothing is more certain than that the disciples of Jesus believed that, after being crucified, dead, and buried, He rose again from the dead on the third day, and that at intervals thereafter and in different places He appeared to them and made Himself known to them. The proof that they believed this is the existence of the Christian Church. It is inconceivable that the scattered and disheartened remnant of Jesus' former following could have found a rallying-point and a gospel in the memory of one who had been put to death as a criminal, if they had not believed that God had owned Him and had accredited His mission in raising Him from the dead. There are many difficulties connected with the subject, and the narratives, which are disappointingly meagre, also contain certain irreconciliable discrepancies; but the historian who follows the most exacting rules imposed by his scientific discipline finds the testimony sufficient to assure the fact.

(1) *The earliest testimony to the faith in the Resurrection.*—Much the earliest account of why the Church believed that Jesus Christ had risen from the dead is Paul's reminder to the Corinthian Christians of the gospel he had preached when first he had visited that turbulent community at the Achaean crossroads (1 Co 15[1-11]). This gospel, the apostle declared, was delivered to them 'as of first importance,' was what he himself had also 'received' [from the Church before him?], and was the burden of the gospel that the other apostles also preached. It was the good news that Christ, who had died for our sins in accordance with the scriptures and who had been buried, had been raised on the third day and had appeared to Cephas, to the twelve, to more than five hundred brethren at one time, to James, to all the apostles, and last of all, to Paul himself.

It is apparent from this basic testimony to the apostolic preaching that the early Christian faith in the Resurrection was grounded, not in any negative argument that a tomb was found empty, but on the positive proof of appearances of the Risen Christ. There is no indication in Paul's letters that the apostle had any familiarity with the doctrine of the empty tomb. Furthermore, even if he had known it, it is improbable that he would have accepted it, for it is clear from the argument in 1 Co 15 that he believed that the resurrection body was not the body of this flesh. In this chapter the apostle asserts (*a*) that Christ rose from the dead (vv.[3-11]); (*b*) that Christ's resurrection is the assurance that those who belong to Him will also be raised from the dead at His second coming (vv.[12-34]); and (*c*) that the resurrection body will not be the physical body that is laid in the grave, but a spiritual body that differs from it as the plant differs from the seed that is sown in the ground (vv.[35-50]). (In 2 Co 5[1-5] Paul describes this spiritual body as 'a building from God, a house not made with hands, eternal in the heavens.')

Paul's witness that Cephas was the first to become convinced of Christ's resurrection may account for the early designation of Simon as the 'rock' apostle (see above **11** (2)) and is supported by the very early tradition to which Luke refers in 24[33-34]. It is also reasonable to assume from 1 Co 15[8] that Paul regarded the appearance of the Risen Christ to himself as of the same sort and of the same validity as that to his predecessors in the faith. Since we know at least something of the nature of Paul's experience of the Risen Christ from references in his own letters to his conversion (Gal 1[15-16], 1 Co 9[1] 15[8], 2 Co 4[6]) as well as from the accounts of it in the book of Acts (9[3-6] 22[6-10] 26[13-19])—to the extent that the latter may be accepted as historical source material—we may also assume that the apperception of the Risen Christ by early believers rested in the first instance on the authority of ecstatic and visionary evidence.

While there are those who dismiss the resurrection faith as the product of individual and mass hallucination, more serious students of the beginnings of Christianity cannot believe that the Church, the NT, and almost two millennia of Christian history can be accounted for on such an hypothesis. They are grateful for the insights that psychological reflection on the origins of the Christian faith affords, but they also agree that description of some of the conditions under which the faith arose falls far short of its explanation, and that any explanation in the end becomes an article of faith.

The Matthaean tradition is that the first resurrection appearances were vouchsafed to erstwhile disciples after they had returned to Galilee, and this also appears to be the implication of at least one verse in Mark's Gospel (16[7]). There is support for the Galilaean locale of the resurrection appearances also in the appendix to the Gospel of John (21), and it may reasonably be assumed that Paul had Galilee in mind when he spoke of the appearances of the Risen Christ to 'more than five hundred brethren at one time' (1 Co 15[6]). The Gospel of Luke, on the other hand, locates all the resurrection appearances of Christ in or about the city of Jerusalem and in this respect it is followed by the tradition in Jn 20.

(2) *The doctrine of the empty tomb.*—If it be granted that the doctrine of the empty tomb is a secondary

argument for faith in the Resurrection and was apologetic rather than historical in origin, it must also be admitted that it had virtually displaced the primary argument in the areas and at the times in which the Gospels were written. The simplest form of the doctrine is in Mk 16^{1-8}. (It is not improbable that the statement in Mk 16^{8} that the women said nothing to any one about their discovery of the empty tomb 'for they were afraid' is the Evangelist's attempt to account for the late appearance of the doctrine in the life of the Church.) In 27^{62}–28^{20} Matthew elaborated Mark's account in a variety of ways. In order to combat an argument that had arisen that Christians had perpetrated a gigantic fraud by stealing away the body of Jesus, the First Evangelist prefixed 27^{62-6} to the Markan story: the Jews had thrown a guard about the tomb in addition to the stone that had been rolled in front of its entrance. Mt 28^{2-4} is a characteristic Matthaean embroidery on Mark's story; the 'young man . . . dressed in a white robe' of Mk 16^{5} becomes an angel (28^{5}); the women report to the disciples at once (v.^{8b}); the Risen Christ appears to the women (vv.$^{9-10}$); the Sanhedrin circulates the story that the disciples had stolen the body of Jesus while the soldiers slept on duty (vv.$^{11-15}$); and a rather vague account of an appearance of the Risen Christ to the eleven in Galilee and His missionary commission to them brings Matthew's Gospel to a close (vv.$^{16-20}$). Mark's story appears also to be basic to Luke's account (24). In 24^{4} we are told that there were 'two men [in the tomb] . . . in dazzling apparel' when the women arrived; in 24^{6b-7} the tradition in Mk 16^{7} is corrected; in 24^{7} we are told that the women reported their experiences to the eleven; in 24^{13-35} the Third Evangelist incorporates the story of the revelation of the Risen Christ to a certain Cleopas and his unnamed companion as they broke bread at Emmaus with an apparent stranger; and the first volume of Luke–Acts ends with an account of an appearance of Christ to the eleven and others in a room in Jerusalem (24^{36-49}) and of His parting from them at Bethany (vv.$^{50-53}$). The Fourth Evangelist records His special tradition in ch. 20, and an appearance of the Risen Christ to disciples by the Sea of Tiberias is recounted (in what appears to be an appendix to the Gospel) in ch. 21.

18. The Character of Jesus' Message.—The Greek verb 'to preach' is related to the Greek noun for 'herald,' and the early Church thought of Jesus' message as a proclamation rather than as a body of teaching. Jesus sought to summon His hearers to decision rather than to persuade or convince them of abstract truth. He appealed to their will rather than to their intellect.

Jesus began His public ministry in an inconspicuous fashion. His advent as the herald of good news had no dramatic prelude or frontispiece. He attempted no prophetic pose; on the contrary, He avoided even its suggestion. He did not dwell in the wasteland; He lived among the people. He did not clothe Himself in bizarre attire; He dressed as did ordinary men. He did not subsist on locusts and wild honey; He ate and drank as did the folk of His time. (On one occasion ill-wishers even accused Him of being a glutton and a drunkard, Mt 11^{19}=Lk 7^{34}.)

During the initial period of His ministry, Jesus gathered His circle of disciples, preached the good news of God's sovereignty, and exercised His gracious gift of healing. In the course of time it was inevitable that men should begin to ask questions about Him and His mission. Some appear to have hinted that He was in league with Beelzebul and that He performed His mighty works in collusion with the prince of demons. The Gospels tell us that this ugly and dangerous insinuation came to the ears of members of Jesus' immediate family and that they tried to compel Him to desist from His public ministry (Mk 3^{21}; see above, **11** (4)).

While some attributed Jesus' mission and message to demon possession, more serious folk tried to classify Him according to a familiar pattern. One of the first to suggest itself was the category of prophet. The great expositors of the will of God among the Israelites in early centuries had been the prophets. With the passage of time, however, the order had virtually died out. For almost three hundred years before the coming of Jesus Christ, no one had appeared in Judaea who seemed to the people to rank with the great of the past. There were some who thought that John the Baptist, when he preached and baptized in the barren wasteland E. of the Jordan, was standing in the prophetic succession. John's work, however, was soon interrupted by his arrest and imprisonment. Nevertheless, his ministry had quickened the life of many who had heard him, and it was natural that Jesus, when He undertook His mission and declared His message, should have been closely linked with His great predecessor. When Jesus is reported to have asked His disciples, 'Who do men say that I am?' their reply was, '"John the Baptist"; and others, "Elijah"; and others, "One of the prophets"' (Mk 8^{28}||). Matthew is our authority for the statement that Jesus, when He entered Jerusalem on His last visit to the capital city, was greeted by the crowds with the exclamation: 'This is the prophet Jesus from Nazareth of Galilee' (Mt 21^{11}).

In retrospect it is evident that 'prophet' was not an entirely inadequate description of Jesus. A study of His message soon demonstrates that much of it was a reiteration of the great insights of Amos, Hosea, Isaiah, Jeremiah, and the Prophet of the Exile. The God whom Jesus proclaimed—the God of absolute righteousness, of infinite patience, and of tender mercy—was the God whom the prophets had known and of whom they had spoken to the people of their times. The goal of history for Jesus was the realization of God's will upon earth as it is already realized in heaven. Jesus called this underlying purpose of God's holy design 'the kingdom of God.' The phrase was new or almost new but the idea was an ancient one and had been the burden of Isaiah's message as well as of Amos' and Micah's. There were fresh elements in Jesus' gospel, to be sure, and new emphases. The fatherhood of God, the joys of fellowship with God, the radical demands of the new righteousness—all this takes on a new urgency in the Gospels. Nevertheless, the gospel had its anticipation in the Hebrew prophetic tradition, and Jesus' spiritual ancestry was the great succession of men of God who had spoken to their people from the days of Moses and Elijah to those of the authors of the books of Ruth and Jonah.

Although Jesus is seldom called a 'teacher' in the Gospels, many of His sayings call to mind the words of the great 'Wisdom' teachers of Israel. As a rule Jesus did not deliver long discourses. He spoke tersely, vividly, and concretely. His utterances were illuminated, illustrated, and made memorable by figurative and poetic imagery—parables, proverbs, hyperboles, similes, and metaphors of every description. Both in form and content, His most familiar teachings leave us with impressions not unlike those conveyed by the finest passages in the books of Proverbs, Ecclesiasticus, the Wisdom of Solomon, and the Testaments of the Twelve Patriarchs.

For several hundred years before the Christian era, apocalyptic ideas had enjoyed wide popularity among the Jews. Their distant origins have been traced to Babylonian and Iranian mythology, but in post-exilic times they were naturalized within Judaism and served to comfort and encourage those who had lost faith in a God who would accomplish His purposes through the processes of history. The present age, dominated by Satan and his hosts, was about to be superseded by the new age of God's rule; the signs of the end were already in evidence; and God's intervention would come with dramatic and catastrophic suddenness.

Although Jesus' message had much in common with that of His apocalyptic contemporaries, He did not share their deep pessimism about the present, their absorbing interest in the signs of the end, or their avid curiosity concerning the nature of the new heaven and the new earth. It is noteworthy, furthermore, that the

one discourse in the Gospels that is modelled on the familiar apocalyptic pattern—Mark 13 and ||—gives every indication of being based on a Jewish prototype. The early Church was much more interested than Jesus had been in the spectacular paraphernalia of apocalypticism!

A word may be added in conclusion about Jesus' use of parables. From their employment in the OT and in Rabbinical literature, it is apparent that their purpose was to make truth clear and memorable. In light of this the extraordinary interpretation of the purpose of parables that is given in Mk 4^{10-12} || must be adjudged incredible. Furthermore, as distinguished from allegory, the parable had but one point. Since it is not a body of doctrine in code but an illustration of one transparent truth, the details have no significance other than to give vividness and verisimilitude to the story. Where allegory now seems to be inherent in a parable, as is frequently the case in the gospel tradition, we may suspect the influence on its present form of later Church interpretation.

19. The Content of Jesus' Gospel.—(1) *The Heavenly Father and His children.*—The God in whom Jesus believed and whose will He proclaimed is the God whom we know from His religious inheritance—the OT and the thought of ancient Judaism as it is reflected in the literature of the intertestamental period. As for the pre-exilic prophets, God for Jesus is a God of radical goodness. Our Lord argues from the goodness that is partial and incomplete in man to the perfect goodness that is manifest in God. 'If you then, who are evil, know how to give good gifts to your children, how much more will your Father who is in heaven give good things to those who ask him?' (Mt 7^{11}=Lk 11^{13}).

Because God is a God of uncompromising righteousness, He cannot tolerate iniquity. Speaking in vivid hyperbole, Jesus declared that it were better that a man should pluck out an offending eye or cut off an offending hand or foot than that 'the whole body be thrown into hell' (Mt 18^{8-9} ||). Employing a metaphor that was common in His day, He spoke of the two ways: 'Enter by the narrow gate; for the gate is wide and the way is easy, that leads to destruction, and those who enter it are many. For the gate is narrow and the way is hard, that leads to life, and those who find it are few' (Mt 7^{13-14}=Lk 13^{24}).

But the just and righteous God of Amos, Micah, and Isaiah is also, in Jesus' thought, the God of infinite love and tender mercy, the God whom He knew from the teaching of Hosea, Jeremiah, Second Isaiah, and the author of the little book of Jonah, as well as from many of the greatest psalmists of His people. God is like the shepherd who searches for a lost sheep until he finds it and then calls together his friends and neighbours to rejoice with him (Mt 18^{12-14}=Lk 15^{4-7}). God is like the housewife who has lost a silver coin, sweeps her house till she finds it, and then calls in her friends and neighbours to rejoice with her over its recovery (Lk 15^{8-10}). God is like the father who waits for the return of a prodigal son, goes out to meet and embrace him as he returns, and celebrates the restoration of the family circle with a feast and merrymaking (Lk 15^{11-32}).

The righteousness and the loving-kindness of God are summed up by Jesus in the name 'Father.' This title is frequently employed in the OT as a means of describing God's relationship to His people and occasionally in intertestamental literature as a way of suggesting His relationship also to the individual believer (Sir $23^{1,4}$, Wis 2^{16}); but it is only in the Gospels that its use becomes characteristic and distinctive of religious vocabulary. And from Jesus' usage the name passed over into the thought and everyday language of the early Church. It was Jesus who first taught men how to pray to God as Father, to think of Him as their Heavenly Father, and to regard themselves as His children. 'Blessed are the pure in heart, for they shall see God,' He said. 'Blessed are the peacemakers, for they shall be called sons of God' (Mt 5^{8-9}). 'When you pray, say: "Father"' (Lk 11^{2}).

(2) *The rule of God.*—At the beginning of his Gospel, Mark summarizes the burden of our Lord's proclamation with the words: 'The time is fulfilled, and the kingdom of God is at hand; repent, and believe in the gospel' (1^{15}). The Semitic phrase that lies back of the Greek for 'kingdom of God' could better be rendered in English as 'the rule of God,' and the best commentary on what Jesus meant by it is the addition that Matthew makes (6^{10}) to the form of the Lord's Prayer as it stands in Lk 11^{2}: 'The kingdom come, *Thy will be done, On earth as it is in heaven.*'

The more numerous and important 'kingdom' passages in the Synoptic Gospels (cf Mk 1^{14-15} 9^{1} 14^{25}, Mt 5^{3-10} 6^{10}) picture the kingdom of God as an *eschaton*, as an age that is to replace the present one at some point in the future. They indicate that Jesus believed its consummation would be sudden, catastrophic, and dramatic (cf Mt 24^{40-41}, Lk 12^{35-40}). Over against these are others that make it equally clear that Jesus thought of the kingdom of God as already in being. John the Baptist marked the end of the old age. Since John's time the kingdom has been a fact of present experience, manifesting itself in particular in Jesus' own ministry (Mt $11^{11,12-13}$ 12^{28}, Lk $10^{10-11,23-24}$). It is already working itself out in history as a mysterious process not evident to the ordinary understanding (Mk $4^{26-29,30-32}$, Mt 13^{33}=Lk 13^{20-21}).

Any true understanding of the kingdom of God in Jesus' thought and preaching must reckon with the fact that Jesus took over the categories of contemporary apocalyptic thought, but that He also introduced some radically new elements and emphases. When our Lord spoke of the kingdom of God, He meant by it what His hearers would inevitably understand Him to mean. He was not speaking in riddles or attempting to mystify those who listened to Him. The kingdom of God was the new age of God's rule which was shortly to supersede the present. In common with the thought of His day, Jesus looked for the coming of the kingdom 'with power' in the very near future, during the lifetime of those to whom He spoke. But, while the full and dramatic realization of the new age awaited the fulfilment of God's mysterious purposes, Jesus taught also that it had already begun. It was already breaking in upon the world. This was the 'new' that Jesus taught. The coming of the kingdom with power belonged to the future and would be effected in the future, but the kingdom was already among men. John the Baptist marked the dividing-point. Since John's day the kingdom of God had been a fact of present experience, evidenced particularly in Jesus' ministry. In Rudolf Otto's words: 'He does not bring the kingdom, but he himself, according to the most certain of his utterances, is in his actions the personal manifestation of the inbreaking divine power' (*The Kingdom of God and the Son of Man* [1938], p. 104). The kingdom had brought Jesus with it; He was the instrument of its *dynamis*. God had begun to reign as King upon earth as He is King in heaven. The full manifestation of His reign belonged to the future. Jesus believed, in common with His contemporaries, that it would be the very near future. But the significant fact that confronted men was that the reign of God had already begun; men were faced with the reality, not simply the hope. They were confronted with an immediate, not simply a future, crisis.

The other seeming paradox in our source material concerning Jesus' message of the kingdom must be resolved in similar fashion. The kingdom of God 'with power' will be realized suddenly and catastrophically. It will be manifested in its fullness according to the familiar apocalyptic scheme. But the rule of God is already in effect in our midst, if men will but recognize it and associate themselves with it. It is like a seed growing by itself which will, in due course, bear its abundant fruit. Men may, indeed must, associate themselves with it here and now. Here and now they are to identify their wills and purposes with the will and purpose of God. 'The kingdom of God is at hand,'

but also 'the kingdom of God has come upon you.' The new age will have its apocalypse, but it has already begun, in germ at least. God has already projected Himself and His purposes into history.

(3) *The ethic of radical obedience.*—The ethic of Jesus, like that of the Law and the Prophets, is a religious ethic. God is the only frame of reference Jesus considers. We are to love our enemies, not because that will turn them into friends, but because God showers His favours on the unjust as well as on the just. We are to refrain from resistance to evil, not because that is a clever and successful strategy, but because God demands it. We are to forgive a brother 'seventy times seven,' not because forgiveness will have any necessary effect on his attitude, but because God forgives us our trespasses. We are to give to everyone who begs from us, not because Jesus has considered the social consequences of such action, but because God has given us the injunction. We are to be merciful if we expect to obtain mercy from God. We are to be pure in heart if we wish to see God. We are to be peacemakers if we hope to be called sons of God.

Jesus gives His ethic its most radical phrasing as 'the imitation of God.' There is no special merit in conventional morality. Even Gentiles salute their brethren. It is God who sets us the supreme example to imitate. Just as He recognizes no limits to His bestowal of all that is good, so He requires us to be all-including in our good will. Just as He is whole and undivided in all His relationships with men, so we must be upright and sincere. 'You, therefore, must be perfect, as your heavenly Father is perfect' (Mt 5^{48}).

The ethic of Jesus is therefore an ethic of radical obedience to God. While man has no claims on God, God claims the whole loyalty of man, without question or qualification. Radical devotion to God tolerates no vacillation; no half-measures; no divided allegiance. It means to serve God without ceasing; to serve Him with one's whole being; and to serve Him alone. The obedience that God demands is complete and absolute. It requires freedom from all selfishness, from all desire for revenge, from all sensuality and covetousness. It forbids the very attitude of anger as well as the angry deed and the scurrilous word. It prohibits the lustful passion of which the adulterous act is but one evil consequence. It requires absolute truthfulness rather than the mere avoidance of perjury. It forbids retaliation in any form for injustice. It demands a purge of all selfish calculation from the whole of one's life, complete detachment from earthly treasures and anxieties, and unreserved commitment of one's whole self to the kingdom of God and His righteousness. It requires an attitude of love that includes God, one's neighbour, and one's enemy.

At a later time Paul was to take an 'either-or' attitude toward the Law of Moses: either attempt (in vain!) to fulfil its articulation of the will of God, or be 'justified' entirely apart from the Law by that response to the grace of God that the apostle called 'faith.' Jesus, on the other hand, was able to distinguish between the demands of the Law that were conditional and evanescent and those that were unconditional and permanent. He reverenced the Law of Moses as 'the commandment of God,' but challenged the validity of the scribal tradition (Mk 7^{1-13}). He confirmed the authority of the moral law (Mk 12^{29-31}), but questioned the sanctions of ceremonial legislation (Mt 23^{23}, Mk 12^{11-12} 2^{27}). He emphasized motive and attitude rather than precept and prescription—a set of the will rather than conformity to a pattern (Mt 5^{21-30}). He even described some commandments in the Law as faulty. He appealed from Moses' permission of divorce to a doctrine of the inviolability of the marriage bond implicit in the story of Creation (Mk 10^{2-9}). He declared that the law of 'an eye for an eye and a tooth for a tooth' was superseded by a higher principle of non-resistance to evil (Mt 5^{38-42}). He held that His own admonition to 'love your enemies' was just as mandatory as the Levitical counsel to 'love your neighbour' (Mt 5^{43-44}). And He went far beyond the strictest injunctions in the Law against false witness by forbidding the use of oaths for any purpose whatever (Mt 5^{27}).

In its scope, its emphasis, and its urgency, the new righteousness of the kingdom as Jesus proclaimed it exceeded anything demanded by the scribes or exemplified by the Pharisees. Nevertheless, in His ethics as in His theology, our Lord was deeply indebted to His Jewish heritage. Nowhere is this more evident than in His stress on sincerity, fidelity, humility, and the readiness to forgive, the qualities that fit a man for the kingdom of God. (i) *Sincerity.*—Jesus often emphasized the great importance of sincerity. He attacked evidences of externalism, pedantry, ostentation, and hypocrisy among His religious contemporaries. Those who will see God are the pure in heart. Men are to be so utterly truthful that their word will be their bond: 'Let what you say be simply "Yes" or "No"; anything more than this comes from evil' (Mt 5^{27}; cf Ja 5^{12}). (ii) *Fidelity.*—Jesus ranked fidelity high among the personal virtues. Again and again we are told that faithfulness is a prerequisite for discipleship: the parable of the doorkeeper on guard for his master's return (Mk 13^{34}); the parable of the watchful householder (Mt 24^{43}; cf Lk 12^{39}); the parable of the faithful and unfaithful servants (Lk 12^{41-48}; cf Mt 24^{45-51}); and the parable of the wise and the foolish maidens, five of them ready for the bridegroom, and five of them caught unprepared by his arrival (Mt 25^{1-13}). 'No one,' said Jesus on one occasion, 'who puts his hand to the plough and looks back is fit for the kingdom of God' (Lk 9^{62}). (iii) *Humility.*—Jesus frequently singled out the virtue of humility for special emphasis. He Himself, He said, was among His disciples as 'one who serves' (Lk 22^{27}). 'For even the Son of man came not to be ministered unto, but to minister, and to give his life a ransom for many' (Mk 10^{45} AV). When His disciples rebuked those who brought children to Him for His blessing, Jesus turned to them and said indignantly, 'Truly, I say to you, whoever does not receive the kingdom of God like a child shall not enter it' (Mk 10^{15}). When His disciples disputed among themselves as to who was the greatest, our Lord, according to Matthew's version of the incident, took a child and put him among them and said, 'Whoever humbles himself like this child, he is the greatest in the kingdom of heaven' (Mt 18^{4}). In Mark's more primitive account we are told that Jesus drove home the lesson of His acted parable with the words, 'If any man would be first, he must be last of all and servant of all' (Mk 9^{35}). This last must have been one of Jesus' most characteristic sayings, for the Gospels reproduce it on no less than five occasions (Mk 10^{43-44}, Lk 22^{26}, Mt 20^{26-27} 23^{11}). (iv) *The readiness to forgive.*—Jesus' teaching that a man should always be willing to forgive was also a virtue occasionally stressed and highly praised in the OT (Pr 25^{21-22}; cf Ro 12^{20}). Nevertheless, the emphasis on the forgiving spirit is distinctive of Jesus' message, as it was not of the teachings of the prophets, the psalmists, and the wise men. A man, Jesus said, cannot profit from participation in the Temple ritual if, through his own fault, he is on bad terms with any of his fellow men (Mt 5^{23-24}). A forgiving spirit toward his fellows on the part of a petitioner in prayer is a necessary condition of God's response to his plea (Mk 11^{25}; cf Mt 5^{14-15}). We are to expect God's forgiveness for our trespasses only to the extent that we ourselves are ready to forgive those who have done us ill (Mt 6^{12} || Lk 11^{4}). And there is to be no limit to our readiness to forgive (Lk 17^{3-4} || Mt 18^{21-22}).

(4) *The practice of piety.*—In Judaism almsgiving, prayer, and fasting had come to be recognized as typical expressions of piety. According to Matthew, Jesus did not question their importance, but He did insist that such righteous acts must be done without ostentation if they are to have any value in the sight of God. 'When you give alms, do not let your left hand know what your

right hand is doing, so that your alms may be in secret; and your Father who sees [that which is] in secret will reward you' (Mt 6^{3-4}). 'When you pray, go into your room and shut your door and pray to your Father who is in secret; and your Father who sees [that which is] in secret will reward you' (v.^{6}). 'When you fast, anoint your head and wash your face, that your fasting may not be seen by men but by your Father who is in secret; and your Father who sees [that which is] in secret will reward you' (vv.$^{17-18}$).

All the Evangelists have much to say about Jesus' preaching and practice of prayer, but it is Luke who laid most stress on this aspect of the gospel tradition. According to the Third Evangelist, Jesus engaged in prayer at every significant crisis in His ministry: at the time of His baptism (3^{21}); after healing a man afflicted with leprosy (5^{16}); before choosing the Twelve (6^{12}); before He asked His disciples the question, 'Who do the people say that I am?' (9^{18}); at the time of His transfiguration (9^{28-29}); before He taught His disciples what we call the Lord's Prayer (11^{1}); on the Mount of Olives at the time of the Agony (22^{41}); and as He died on the cross (24^{46}).

It is to Luke, moreover, that we owe the preservation of the three parables in the gospel tradition that deal with the proper practice of prayer. The parable of the Pharisee and the Tax Collector (18^{9-14}) teaches that prayer has value only as it is directed to God. There is no place in it for pride or pretension. The twin parables of the Friend at Midnight (11^{5-8}) and the Unjust Judge (18^{1-5}) teach the importance of persistence in prayer. If perseverance achieves its ends in everyday human relationships, how much more in our relationships with God! (At this point it might be well to remind the reader of what has been pointed out above [18], viz. that a parable, as distinguished from an allegory, has only one point. In the parables under discussion, the only moral is the importance of persistence in prayer. God is not compared to a reluctant friend or to an unjust judge!)

While emphasizing the importance of persistence in prayer, Jesus also warned against verbose and elaborate patterns (Mt 6^{7}). Prayer is not a flight in rhetoric. God is not compelled to listen by the petitioner's verbosity. He is aware of our needs before we can formulate them.

Most of Jesus' explicit teachings about prayer have to do with petitionary prayer, and He uses an analogical argument to support His faith that God will hear and answer us. No human father would give his son a stone when he asks for a loaf, or a serpent when he asks for a fish. 'If you then, who are evil, know how to give good gifts to your children, how much more will your Father who is in heaven give good things to those who ask him?' (Mt 7^{11} || Lk 11^{13}).

In the Sermon on the Mount, Jesus assumes that every prayer will be answered. 'Ask, and it will be given you; seek, and you will find; knock, and it will be opened to you' (Mt 7^{7-8} || Lk 11^{9-10}). The only hint of a qualification is in the phrases, 'good gifts' and 'good things.' If one has come by reflection, or as the result of bitter experience, to the conclusion that faith in the power of petitionary prayer requires some reservation, he cannot find much support for such a reservation in the Sermon on the Mount. But he can do so if he turns to the Synoptic account of Jesus at prayer in Gethsemane. The petitioner must acquiesce in the overriding purposes of God. 'Not what I will, but what thou wilt.' True petitionary prayer seeks to discover God's will and to submit to it. It is an act of exploration and an act of commitment.

20. The Relevance of Jesus' Ethic.—In discussing the relevance of Jesus' ethic, a careful distinction must be drawn between the functions of 'historical' and of 'theological' exegesis. The task of the former is to determine the original meaning of a text to the rigid exclusion of the interpreter's personal, apologetic, or polemical interests. Its related discipline is the history of Biblical religion. The task of the latter, on the other hand, is to relate the original content of a Biblical passage, as careful historical exegesis has determined it, to the religious needs of our time in the light of the faith, the history, and the experience of the Church. Its related discipline is Biblical theology.

Both historical and theological exegesis are legitimate and complementary activities, but too frequently their separate functions are confused. Occasionally the historian regards everything but his own findings with suspicion. Biblical studies are held to be an exercise in archaeology. Occasionally the theologian reinterprets and recasts his source material so as to force it into the service of the theological or philosophical position he represents.

Did Jesus substitute principle for precept in ethical behaviour? Did He teach attitude rather than proclaim legislation? Did He stress 'ethos' rather than 'ethics,' a 'set of the will' rather than a 'new commandment'? Such claims have been confidently put forward by a generation of handbooks, comforting the reader with the thought that Jesus anticipated the conclusions of modern liberal theology.

It is true that there are general principles enunciated in the Sermon on the Mount. Two striking instances are Mt 5^{48}: 'You, therefore, must be perfect, as your heavenly Father is perfect,' and 7^{12}: 'Whatever you wish that men would do to you, do so to them.' There are similar inclusive principles also in the Pentateuch, notably the *Shema'*. But most of the Sermon is made up of individual and specific precepts. The antitheses in the fifth chapter are frequently cited as typical of Jesus' emphasis on principle rather than on precept. Jesus goes back of the act to the attitude. The real sin is not the actual murder of a man but the spirit of anger that prompts it. The real sin is not the act of adultery but the lustful desires that occasion it. This insight is a true one, but it stops short of recognizing that Jesus substitutes new commandments for what had been 'said to the men of old.' His teaching continues to move in the sphere of legislation. Anger and insulting language and lustful looks are prohibited. The new law is more rigorous and far-reaching than the old. Modern ethical idealists deny that you can legislate for attitudes and thoughts and desires, but this is a nice distinction that never occurred to Jesus.

Orthodoxy is often ready to admit that Jesus meant what He said, but it is even more insistent than liberalism in asserting that Jesus' ethics are impossible for any individual or order of civilization. They lay bare man's ethical bankruptcy and postulate the Cross as his only way of salvation. They demonstrate that man needs a mediator and a saviour. This is good Paulinism and good Reformation theology, but there is little evidence that it has anything to do with the gospel Jesus preached. The Christology of the Sermon on the Mount represents Jesus as legislator, wisdom teacher, prophet, and messianic emissary with Divine authority, but not as Mediator or Saviour. In this sense it is distinctly pre-Pauline, and only violent *eisegesis* can equate its message with that, say, of the first chapter of the Epistle to the Colossians.

Much of Jesus' ethical teaching may seem impossible to us, but that does not justify the conclusion that Jesus intended it to be regarded in that light. All its radicalisms can be paralleled in some part of Hebrew-Jewish literature. And, while Jesus assumes that most men will find it impossible to do His words, He postulates a minority that will enter in by the narrow gate and that can be compared to a wise man who built his house upon the rock.

If it is modernization of Jesus to make His teaching approximate Kantian ethics or to regard it as prolegomena to Pauline soteriology, how can true theological exegesis proceed? The perfectionists have certainly the most consistent position, and to criticize them as utopian and fanatical is to criticize Jesus also. If we cannot follow Tolstoy and like-minded Christians, we must be prepared to recognize that we take factors into

account that Jesus did not, and make qualifications and applications and combinations of His sayings that never occurred either to Him or to the Evangelists.

(1) In the first place, theological exegesis will emphasize the fact that much of Jesus' ethical teaching is purified 'wisdom,' distilled and transparent truth that is not dependent for its validation on any theology or eschatology. Even a religious humanism can find some points of contact with it. (2) In the second place, theological exegesis can legitimately employ the ethical teaching of Jesus in conjunction with other parts of Scripture, both in the OT and in the New. Revelation has a wider base than Mt 5–7. It speaks to us in the OT with respect to issues that Jesus in His particular setting never considered or had occasion to consider, and it enables us to see Jesus' teaching in the perspective of the Cross and the resurrection faith. (3) In the third place, theological exegesis can supplement the imperatives of Jesus' ethic with faith in the Divine help that is given through the gracious inworking of the Holy Spirit, and with confident trust in the mercy and the forgiveness of God. Christian faith knows that the God who requires perfection and who passes judgment on every imperfection, is also the God who is ever ready to renew that fellowship with Himself that is broken by our sin. Theological exegesis will point out that the God of the Sermon on the Mount is also the God of the parables of the lost sheep and the lost son. And it will make its own that petition that in several Greek manuscripts is substituted for the second petition of Luke's version of the Lord's Prayer: 'May Thy holy spirit come upon us and cleanse us!' (4) In the fourth place, theological exegesis will not try to maintain that dogmatical and philosophical positions require Gospel validation at every point before they call themselves 'Christian.' Orthodoxy may be justified in its emphasis on the redemptive significance of Christ's death, even if in the light of historical exegesis it cannot claim that this found any place in Jesus' own message. The ethical idealist may be justified in maintaining the primacy of principle and attitude in Christian ethics, even if he must honestly admit that this is a modern insight for which there is no more than a suggestion in Jesus' teaching.

At a time when historical studies are often pressed uncritically into the service of dogma, and when some theologians are anxious to undergird their understanding of the Christian faith with Scripture, even if this has to be done at the expense of scientific objectivity, it is important to bear in mind that theological exegesis, while an imperative function of Biblical scholarship, must build upon the foundation laid by careful historical studies and be subject at all times to their criticism and correction.

21. Jesus' Interpretation of His Mission.—The various categories of thought employed by the early Church in its attempt to interpret the meaning of Jesus' mission in the light of God's purpose for mankind are discussed in another article in this dictionary (see CHRISTOLOGY): Suffering Servant, Davidic Messiah, Son of man, Son of God, Lord, Heavenly High Priest, Divine Logos, and still others. Since our sources for a study of the life and teaching of Jesus belong to strata of tradition deriving from the very earliest to almost the latest periods in the times covered by the NT, they reflect almost every form of primitive Christology, from the apparent 'adoptianist' thinking of Peter's speech at Pentecost (Ac 2^{22-36}) to the quasi-philosophical points of view in the Epistle to the Hebrews and in the prologue to the Gospel of John. And in this respect the honest interpreter must admit that it is virtually impossible to penetrate at many points beyond the interpretation of the preachers of the gospel to the original self-consciousness of our Lord.

As long as Christianity remained primarily a sect of Judaism, it was inevitable that it should draw upon the messianic concept to account for the fact that believers had found in Him who had lived and suffered and died and risen again from the dead, the revelation of God's redemptive purposes in human history. The hope of a messiah had emerged after the death of David among those who looked back on the glorious days that had gone and who longed for their return under the leadership of some descendant of the great king, 'a shoot from the stump of Jesse' whom God would 'anoint' as the instrument of their restoration. Several of the Hebrew prophets, notably Isaiah, purged the popular hope of its more materialistic and nationalistic elements and restated it in terms of the religious, ethical, and spiritual qualities of leadership the messiah would manifest. In post-exilic times the idea of the coming age came increasingly to take on the form of a theocracy in which God Himself would reign as King, but there still were sporadic revivals of the earlier prophetic expectation—Zechariah chs. 9–14 from the early Maccabaean period, the Testament of Levi from shortly before 106 B.C., and the 17th and 18th Psalms of Solomon from about the middle of the 1st cent. B.C. (The pre-Christian Qumrân sect seems to have anticipated *two* messiahs, one priestly and one royal.)

There are many who hold that the doctrine that Jesus was the Messiah did not arise until after the Resurrection. Early in the present century Wilhelm Wrede pointed out that Mark, the earliest Evangelist, makes much of the idea of a 'messianic secret.' Jesus was recognized as Messiah during His lifetime by the demons whom He had driven out of 'possessed' men and women (1^{24-25} 3^{11-12} etc.) and ultimately by the circle of the Twelve (8^{27-30}), but all this had not become common knowledge because Jesus had enjoined the strictest secrecy on both 'evil spirits' and disciples. By reading a secret claim into the records, Mark sought to account for the fact that Jesus was known to have made no public messianic declaration (the confession before the high priest, Mk 14^{61-62} ||, is subject to serious critical objections) and yet was proclaimed by the Church of the Evangelist's day as the Christ.

More conservative critics, including the writer of this article, are hesitant to conclude that the belief of the early Church that Jesus was the Messiah arose wholly without warrant in His own words. The incident at Caesarea Philippi (Mk 8^{27-30} ||) and the story of the inscription over the cross (15^{26} ||) appear to belong to the bedrock of early Christian tradition, and it is difficult to understand why Jesus was put to death by the Roman procurator if He had not been charged with revolutionary intent as a messianic claimant, and how such a charge could have been substantiated without some basis in His own words and deeds. (The Gospel accounts of the entry into Jerusalem and of the cleansing of the Temple certainly have messianic overtones, although these need not have been inherent in the incidents themselves.)

Nevertheless, the fact must be stressed that, if Jesus employed the messianic idea to interpret His understanding of the rôle He knew Himself called of God to fulfil, He must have revised the popular notion of what was involved in the Messiah's mission. One of the characteristic and distinctive ideas that Jesus emphasized was that true greatness consists in selfless service. 'And Jesus called them to him and said to them, "You know that those who are supposed to rule over the Gentiles lord it over them, and their great men exercise authority over them. But it shall not be so among you; but whoever would be great among you must be your servant, and whoever would be first among you must be slave of all"' (Mk 10^{42-44} ||; cf Mk 9^{35}, Mt 23^{11}, Lk 9^{48}). 'For which is the greater, one who sits at table, or one who serves? Is it not the one who sits at table? But I am among you as one who serves' (Lk 22^{27}). 'For the Son of man also came not to be served but to serve' (Mk 10^{45} || Mt 20^{28}). 'For every one who exalts himself will be humbled, and he who humbles himself will be exalted' (Lk 14^{11} || Mt 23^{12}; cf Lk 18^{14}).

It is clear that the Church at an early date saw the life and passion of Jesus Christ illuminated by the 'Servant of the Lord' poems in Second Isaiah. Paul appears to have been referring to the prophecy in Isaiah ch. 53

when he reminded his Corinthian readers that the gospel he had preached to them at the first and that he himself had 'received' was that 'Christ died for our sins in accordance with the scriptures' (1 Co 15$^{1-3}$). In Ac 8$^{26-35}$ we are told that the evangelist Philip, when he had encountered the Ethiopian eunuch on the road from Jerusalem to Gaza, preached Christ to him from a text in Is 53$^{7-8}$. When Luke elaborated the story of Jesus' rejection at Nazareth to serve as a dramatic frontispiece to his account in Luke–Acts of the rise and expansion of Christianity (4$^{16-30}$), he made Jesus comment on the purpose of His mission from a text in Is 61$^{1-2}$.

Whether Jesus Himself had anticipated this association cannot any longer be determined. The only direct quotation from Isaiah ch. 53 that is attributed in the Gospels to Jesus is a passage in Luke 22^{37}, and the likelihood that this quotation goes back to our Lord is remote. Nevertheless, there is an echo of the Isaianic chapter in Mk 10^{45}: 'For the Son of man also came not to be served but to serve, and *to give his life as a ransom for many*,' and the possibility that Jesus had reflected on the OT passages about the Servant of the Lord as He sought to understand the mission He Himself had undertaken, while it cannot be demonstrated, ought not by the same token to be ruled out of consideration.

Jesus knew Himself summoned to proclaim the new age of God's rule, and He believed that, in some measure, the kingdom of God was being effected in and through His ministry. Perhaps that is all we know. 'What person knows a man's thoughts,' St. Paul once asked his Corinthian converts, 'except the spirit of man which is in him?' When the man in question is He whom God has highly exalted and on whom He has bestowed the name that is above every name, it is absurd to think that we can plumb the depth in Him of the riches and wisdom and knowledge of God. And perhaps Jesus as the herald and the vehicle of the kingdom is all that we need to know, for the response of the Christian to Jesus Christ is not a historical judgment about Him but an act of faith and awe. Together with all who are in heaven and on earth and under the earth, we bow the knee and confess the inscrutable mystery 'that Jesus Christ is Lord, to the glory of God the Father.'

W. P. P.—S. M. G.

JETHER.—**1.** Father-in-law of Moses, Ex 4^{18} (AVm, RVm, following Hebrew), an error for **Jethro** (q.v.). **2.** Eldest son of Gideon, Jg 8^{20}. **3.** An Ishmaelite, father of Amasa, 1 K 2$^{5, 32}$, 1 Ch 2^{17}; called **Ithra** (q.v.) in 2 S 17^{25}. **4, 5.** Two men of Judah, 1 Ch 2^{32} 4^{17}. **6.** A man of Asher, 1 Ch 7^{38}; called in v.^{37} **Ithran,** the name of an Edomite clan (Gn 36^{26}).

JETHETH.—An Edomite clan, Gn 36^{40}, 1 Ch 1^{51}.

JETHLAH, Jos 19^{42} (AV).—See ITHLAH.

JETHRO (once, Ex 4^{18} [MT, followed by AVm, RVm] **Jether**).—An Arab sheikh and priest of the Sinaitic Peninsula, the father-in-law of Moses; referred to by this name in Ex 3^{1} 4^{18} and 18^{ff} (E), as **Reuel** in the present text of Ex 2^{18} (J), and as **Hobab** in Nu 10^{29} (also J). He welcomed Moses and received him into his family (Ex 2^{21}), and many years later visited him at Sinai (Ex 18^{ff}), heard with wonder and delight of the doings of Yahweh on behalf of Israel (v.^{9ff}), and gave advice about administration (vv.$^{17-26}$). Later still he probably acted as guide to the Israelites (Nu 10^{29ff}; cf the AV of Jg 1^{16} and 4^{11}). As to the two or three names, it may be noted that Arabic inscriptions (Minaean) repeatedly give a priest two names. The name *Jethro* may mean 'pre-eminence.' See HOBAB.

W. T. S.

JETUR.—A son of Ishmael, Gn 25^{15}, 1 Ch 1^{31} 5^{19}. See ITURAEA (which is perhaps derived from Jetur).

JEUEL.—**1.** A Judahite, 1 Ch 9^{6}. **2.** A Levitical family name, 2 Ch 29^{13} (AV **Jeiel**). **3.** A contemporary of Ezra, Ezr 8^{13} (AV **Jeiel**).

JEUSH.—**1.** A son of Esau by Oholibamah; also the eponym of a Horite clan, Gn 36$^{5, 14, 18}$, 1 Ch 1^{35}. **2.** A Benjamite chief, 7^{10}. **3.** A descendant of Saul, 8^{39} (AV **Jehush**). **4.** The name of a Levitical family, 23^{10f}. **5.** A son of Rehoboam, 2 Ch 11^{19}.

JEUZ.—The eponym of a Benjamite family, 1 Ch 8^{10}.

JEW.—The name by which the descendants of Israel have been known for many centuries. It is corrupted from *Judah*. After the division of the kingdom in 937 B.C., the southern portion was called by the name of the powerful tribe of Judah, which composed most of its inhabitants. It was in this kingdom that the Deuteronomic reform occurred, which was the first step in the creation of an organized religion sharply differentiated from the other religions of the world. This religion, developed during the Exile, bore the name of the kingdom of Judah. All Israelites who maintained their identity were its adherents, hence the name 'Jew' has absorbed the name 'Israel.' For history, see ISRAEL (I. **21–27**), DISPERSION; for religion, see ISRAEL (II. **5, 6**).

G. A. B.

JEWELRY.—Gn 24^{53} 'the servant brought forth jewelry (AV, RV 'jewels') of silver and of gold.' They were not jewels set in silver and in gold. Ornaments made of gold or silver were in older English called jewels. Now the word is confined to precious stones.

JEWELS AND PRECIOUS STONES.—Most of the precious stones in the Bible occur in three lists which may be tabulated at the outset. These are: (A) the stones in the high priest's breastplate (Ex 28$^{17-20}$ 39$^{10-13}$); (B) those in the 'covering' of the king of Tyre (Ezk 28^{13}); (C) those in the foundation of the New Jerusalem (Rev 21$^{19-20}$). The three lists are to some extent mutually connected: A contains twelve stones, B has nine, all taken from A, with traces of A's order in their arrangement; in the LXX the two lists are identical, and possibly the Hebrew text of B is corrupt; and C also has twelve stones and is evidently partly dependent on the LXX of A and B.

Reference to these tables will simplify the use of the following notes, which include other precious stones of the Bible besides those mentioned above. In endeavouring to identify the stones in List A, three things have to be kept in view. From the dimensions of the breastplate —a span (8 or 9 inches) each way (Ex 28^{16})—the twelve stones which composed it must, even after allowing

space for their settings, have been of considerable size, and therefore of only moderate rarity. Further, as they were engraved with the names of the tribes, they can have been of only moderate hardness. Lastly, preference should be given to the stones which archaeology shows to have been actually used for ornamental work in early Biblical times (see Flinders Petrie in Hastings' *DB* iv, 619–621) and Quiring in *Sudhoff's Archiv*, xxxviii, 193–213; cf Lucas' *Ancient Egyptian Materials and Industries*[2], 335–354, and Thompson's *Dictionary of Assyrian Chemistry and Geology*, 123–193).

A. The High Priest's Breastplate (Ex 28^{17-20} 39^{10-13}, P)

Hebrew Name	Translation in (i) LXX (ii) Vulgate	Translation in (i) AV (ii) RV (with margins)	Identification here proposed
1. *'ōdhem*	(i) *sardion* (ii) *sardius*	sardius (ruby)	brown sard
2. *piṭ^{e}dhāh*	(i) *topazion* (ii) *topazius*	topaz	greenish-yellow chrysolite
3. *bāreḳeth*	(i) *smaragdos* (ii) *smaragdus*	(i) carbuncle (ii) carbuncle (emerald)	green feldspar, amazonite
4. *nōphekh*	(i) *anthrax* (ii) *carbunculus*	(i) emerald (ii) emerald (carbuncle)	purple garnet, almandine
5. *sappîr*	(i) *sappheiros* (ii) *sapphirus*	sapphire	lapis lazuli
6. *yah^{a}lōm*	*iaspis*	(i) diamond (ii) diamond, sardonyx	nephrite, jade
7. *leshem*	(i) *ligurion* (ii) *ligurius*	(i) ligure (ii) jacinth (amber)	blue feldspar or turquoise
8. *sh^{e}bhô*	*achates*	agate	agate, onyx
9. *'aḥlāmāh*	(i) *amethustos* (ii) *amethystus*	amethyst	red or brown jasper
10. *tarshîsh*	(i) *chrusolithos* (ii) *chrysolithus*	(i) beryl (ii) beryl (chalcedony)	Spanish topaz
11. *shōham*	(i) *bērullion* (ii) *onychinus*	(i) onyx (ii) onyx (beryl)	red carnelian
12. *yāsh^{e}phēh*	(i) *onuchion* (ii) *beryllus*	jasper	green jasper

(RSV agrees with RV, but without margins)

B. The covering of the King of Tyre (Ezk 28^{13})

The Hebrew text has only nine of the twelve stones in the high priest's breastplate, which the Versions translate similarly except where a different translation is here given in brackets: they are in the Hebrew (which differs from the Greek and Latin) order: 1. *'ōdhem*, 2. *piṭ^{e}dhāh*, 3. *yah^{a}lōm* (LXX *smaragdos*), 4. *tarshîsh*, 5. *shōham* (LXX *sappheiros*), 6. *yāsh^{e}phēh* (LXX *iaspis*), 7. *sappîr* (LXX *ligurion*), 8. *nōphekh* (LXX *achates*), 9. *bāreḳath* (LXX *amethustos*). In the LXX 10. *chrusolithos*, 11. *bērullion*, 12. *onuchion* are added. Clearly the Hebrew text has fallen into disorder and the three missing stones must once have found a place in it.

Too much weight must not be attached to the ancient translations of technical terms, which are often very loosely used in popular speech; and all such words tend to change their meanings with the passing of the centuries. That many of the words, too, must have been foreign loan-words will have increased the confusion in the use of them. The Hebrews had no scientific sense and probably attached only a very vague meaning to the names of most precious stones, in which they were probably influenced as much by colour and hardness as by any other qualities. Lastly, the Greek and Latin translations, where they are not purely conjectural, are probably as much traditional as scientific and can be accepted only if they can be otherwise confirmed.

Adamant (Ezk 3^{9}, Zec 7^{12}): see **Diamond.**

Agate (A 8). The Assyrian (*aban*)*šubû*, corresponding to the Hebrew *sh^{e}bhô*, designates the base of all the vitriols (white, yellow, green, blue, red), and the corresponding stone in the foundation of the New Jerusalem, being beryl (C 11), suggests a green stone also in the high priest's breast-plate. Both LXX and Vulgate have 'agate,' of which one variety known as moss-agate has a green or greenish hue; and ancient agate (cf Pliny *NH* xxxvii. 54 [139–142]) probably included such opaque varieties. The modern agate is a form of silica occurring in nodules which, when cut across, show concentric bands of varying transparency and colour. The parallelism of colour, however, can hardly be pressed; and onyx, which differs from agate only in the width of the bands of colour and was regarded by the ancients as a form of agate, may be meant (Quiring).

C. The Foundations of the New Jerusalem (Rev 21^{19f})

Greek Word	Vulgate Translation	Translation in (i) AV (ii) RV (with margins)	Identification here proposed
1. *iaspis*	*iaspis*	jasper	jasper
2. *sappheiros*	*sapphirus*	(i) sapphire (ii) sapphire (lapis lazuli)	lapis lazuli
3. *chalkēdon*	*carcedonius*	chalcedony	green dioptase
4. *smaragdos*	*zmaragdus*	emerald	emerald or beryl or green feldspar, amazonite
5. *sardonux*	*sardonix*	sardonyx	sardonyx
6. *sardion*	*sardinus*	sardius	sard, carnelian
7. *chrusolithos*	*crysolithus*	(i) chrysolyte (ii) chrysolite	(Spanish) topaz
8. *bērullos*	*beryllus*	beryl	beryl or aquamarine
9. *topazion*	*topazius*	topaz	greenish-yellow chrysolite
10. *chrusoprasos*	*crysoprassus*	(i) chrysoprasus (ii) chrysoprase	golden-tinted green chalcedony
11. *huakinthos*	*iacinthus*	(i) jacinth (ii) jacinth (sapphire)	turquoise or dark amethyst
12. *amethustos*	*amethystus*	amethyst	amethyst

(RSV agrees with RV, but without margins, save for 3. agate, 5. onyx, 6. carnelian.)

Amethyst (A 9, C 12).—The LXX and Vulgate's 'amethyst' has caused the Hebrew *'aḥlāmāh* to be identified with that stone, though without philological support. The Hebrew word is probably identical with the Egyptian *ḥmn.t* designating a precious stone of a red colour obtained from Nubia and much used for scarabs and amulets, possibly red or brown jasper, of which a yellowish-brown variety is said to be found on the banks of the Nile in Egypt.

Beryl (A 10, B 4, C 8; also Ca 5^{14}, Ezk 1^{16} 10^{9} Dn 10^{4}). —The Hebrew *tarshîsh* is commonly rendered 'beryl' (AV, RV) or 'chrysolite' (RVm). The Targum's 'beryl' (Ex 28^{20} 39^{13}) cannot stand if the name means the 'stone of Tarshish' and Tarshish is Tartessus in Spain, since the beryl is not found there. The other versions have 'carbuncle' (LXX), 'chrysolite' (LXX, Quinta and Sexta, Aquila, Vulgate) and 'jacinth'

(Symmachus, Vulgate); of these Spain produces only 'chrysolith' (Pliny, *NH* xxxvii. 43 [127]), which may be accepted as the meaning of the Hebrew word (Quiring). The ancient 'chrysolith' or 'chrysolite' was 'Spanish' or 'false topaz,' a yellow rock-crystal or citrine quartz, not the modern chrysolite or topaz which comes from Brazil. The corresponding stone (C 10) is 'chrysoprase,' a golden-tinted variety of the leek-green chalcedony, which tends to support this identification.

The Assyrian (*aban*)*burallu* (a name uncertainly connected with the Sanskrit *vaidūrya-*, *vaidūrya-* 'cat's eye' or 'beryl'=Pahlavi *veluriya-* 'lapis lazuli'= Prakrit *veluria-* or usually *verulia-* 'jewel') was probably beryl, and the cylinder-seals of a bluish beryl are known (Thompson). The Greek *bērullos*, *bērullion* included ordinary beryl, deep green emerald and pale-bluish aquamarine, as well as other varieties known as 'precious beryls'; its colour might be sea-blue or sea-green, brown or rarely pink, golden, yellow, or whitish (Pliny, *NH* xxxvii. 20 [76]). Whether it is the same stone as that 'called *belus*, found at Arbela; this is about the size of a walnut and looks like glass' (Democritus *ap.* Pliny, *NH* xxxvii. 55 (149); Thompson) cannot be said. Egypt, the hills to the NW. of Assyria, and India, were the ancient sources of beryl.

Carbuncle (A 3, B 9).—The Assyrian (*aban*)*barraqtu* and *barraqtu*=Hebrew *bāreḳeth*, *bāreḳath* 'sparkler' is a foreign word perhaps connected with the late Sanskrit *marakata*=Prakrit *maragda*=Greek (*s*)*maragdos* but assimilated to the native *birḳu*, *bārāḳ* 'lightning' (which Symmachus' *keraunios* 'jasper' reflects). The classical *smaragdus* denoted a green stone, including emerald and beryl (which hardly differ except in hardness and depth of green colour) and also jasper, pseudo-smaragdus or malachite and prase. Since however emerald has a low refractive power and when cut little brilliancy or fire, it is unlikely to have been called 'sparkler'; and the rainbow cannot have been compared to such a stone (Rev 4^3) but only to some more or less colourless rock-crystal producing all the prismatic colours (Flinders Petrie). Further, Nero's eye-glass was a *smaragdus* (Pliny, *NH* xxxvii. 16 [64]), which could not have been an emerald. The 'shining *smaragdos*,' too, of which a *stele* is said to have been made (Herodotus, *Hist.* ii. 44 [2]); cf Theophrastus, *de lapid.* iv. 25), cannot have been a true emerald, since this is not found in columnar form, although large impure splinters are known; and true emerald is equally unsuitable for buildings (To 13^{16}, Rev 21^{19}), for which also its rarity and costliness is prohibitive. Finally, all the supposed emeralds and beryls of pre-Ptolemaic age from Egypt have been proved to be green feldspar (amazonite), also called 'mother of emerald' (although it has no connexion with emerald), or olivine (Lucas); some form, then, of feldspar (green, pink, gray, or white) seems to suit all the passages here cited.

Clearly *bērullos* and *smaragdos* were not always distinguished or identified by the ancients; both must therefore be translated according to the context.

The Hebrew *'eḳdāḥ*, of which the gates of the restored Zion would be made (Is 54^{12}), is also translated 'carbuncle' (AV, RV, RSV). The versions vary, having 'crystal' (LXX, Peshitta) and 'carbuncle' (Targum); the corresponding Arabic *qadâḥatu* means 'fire-stone,' *i.e.* stone from which fire is obtained by striking it. What is apparently meant is the precious garnet which may be colourless, yellow, green, brown, or black, but of which the typical variety has a deep red colour without any trace of violet in it and is called pyrope; in sunlight, and also in artificial light when it takes on a yellowish hue, it resembles a glowing coal (Theophrastus, *de lapid*, iii. 18–19 and Pliny, *NH* xxxvii. 25 [94]; cf Hebrew *ḳādaḥ* 'was kindled' and *ḳaddaḥath* 'jaundice'). Assyrian beads and rings of garnet are known, while rough garnets were apparently used by the Assyrians for thresholds and pavements (Thompson); translucent reddish brown and deep red garnets from Aswan and western Sinai were made into beads by the Egyptians (Lucas); and the Greeks had them in rings (Theophrastus).

Chalcedony (C 3).—The modern stone of this name is semi-opaque or milky silica, but the ancient one was probably the green 'dioptase' (silicate of copper). This at least seems to have been the *smaragdos* found in the copper-mines of Chalcedon (Pliny *NH* xxxvii. 18 [72–73]). There was some confusion, however, between the 'stone of Chalcedon' and the *carchedonia* (stone of Carthage), which was fiery red (Pliny, *ib.* xxxvii. 25 [92, 95–98] and 30 [104]); so *carchedon* occurs as a various reading for *chalcedon* in Rev 21^{19}.

Chrysolite (C 7).—In modern mineralogy this is the 'peridot' or 'peridote' (see **Topaz** below); but the ancient gem was some other golden-coloured stone, possibly yellow corundum or yellow quartz or topaz (Flinders Petrie) or Spanish topaz (Quiring).

Chrysoprase (RV, RSV; AV 'chrysoprasus') (C 10).—The *prasius* of Pliny (*NH* xxxvii. 34 [113–114]) was a leek-green 'chalcedony' (cf Gr. *prason* 'leek') of which there was a golden-tinted variety. The latter may be the chrysoprase of the NT. The modern chrysoprase is a slightly translucent silica, coloured a beautiful apple-green by oxide of nickel.

Coral (Job 28^{18}, Ezk 27^{16}).—The Hebrew *râmôth* is vocalized as though meaning 'high things,' as several translators interpreted it (Theodotion, Symmachus, Vulgate); but it ought to be read *rᵉ'āmôth* as shown by Ugaritic *r'emt*, which designates a jewel worn by the goddess 'Anat (Baal V. iii. 19). If it is rightly taken as 'coral' (cf Arab. *ra'ama* 'twisted'), it must be black coral (Gesenius), which comes from the Indian Ocean and is more valuable than red coral; for there is another word for red coral (see **Ruby** below). Both *râmôth* and *r'emt*, however, have been taken as the same as the Arabic *ra'matu* 'sea-shell,' which has suggested that it may originally have had this sense and, as including the 'oyster,' may have been extended to mean also 'pearls' (Hölscher), which are obtained from the Persian Gulf and Ceylon; but pearls do not seem to have been used before the Ptolemaic period (Lucas) or to be mentioned by Greek and Roman writers before the 1st cent. A.D. (Liddell and Scott). Mother of pearl, too, which perhaps cannot be entirely ruled out (unless this was *dar*), was used in Egypt from pre-dynastic times (Lucas).

Crystal (Job 28^{17}).—The Hebrew *zᵉkhôkhîth* 'clear stuff' is translated 'transparent rock-crystal' (colourless transparent quartz) by a Greek scholiast and 'glass' by Theodotion and in the other Greek versions; probably a vitreous paste (Koehler) or 'glass,' which was highly prized in antiquity, is meant. Babylonian prescriptions for making glass (Assyrian *aban zukāki* 'stone of clear stuff' and *zukû*, Neo-Babylonian *zakittu* 'clear stuff, glass') have been found and deciphered (Thompson).

The Hebrew *'elgābhîsh* is another word for 'crystal,' being almost certainly identical with the Egyptian *irqbś* 'rock-crystal'; it occurs only metaphorically in the phrase translated 'great hail-stones' (Ezk $13^{11, 13}$ 38^{22}; AV, RV, RSV), which therefore means literally 'stones of (*i.e.* hard as) crystal.' The ancient translators had lost the meaning of the word, rendering the phrase by 'sling-stones' (LXX), 'very great' or 'immense stones' (Vulgate) or 'stones of hardness' (Peshitta). Whether the Assyrian (*aban*)*algamišu* 'corundum, emery; amethyst' is connected with the Egyptian and Hebrew words is uncertain; all appear to be of non-Semitic origin.

The Hebrew *gābhîsh* 'gypsum' (Job 28^{18}), which all the ancient translators misunderstood and for which the English translators have 'pearls' (AV) and 'crystal' (RV), seems to be a shortened form of the same word, with which the Arabic *jibsu* 'crystal' and *jibsînu* 'gypsum' are evidently connected.

Diamond (A 6, B 3; also Ezk 28^{13}).—The Hebrew *yahᵃlōm*, of which the true meaning is quite uncertain, is rendered in the ancient versions *iaspis* and *smaragdos* (LXX) or *iaspis* (Vulgate) and translated in the English Bible 'diamond' (Luther; AV, RV, RSV) or 'sardonyx'

JEWELS AND PRECIOUS STONES

RVm); it has also been identified as 'onyx' (Flinders Petrie) or 'moonstone' (Quiring). The diamond is out of the question; it first appears as an eye in a Greek work of art *c* 480 B.C. and is not known to have been cut before Roman times (Pliny, *NH* xxxvii. 15 [59–60]), being too hard for ancient tools. The word seems to be derived from the root of the Ugaritic *hlm*=Hebrew *hālam* 'hammered,' which suggests nephrite (true jade) or jadeite. These, though of a totally different mineral composition, cannot certainly be distinguished except chemically or through the microscope; both have a green clouded colour and when polished acquire a brilliant lustre. Jadeite was used for hammers and axes also for vases, while nephrite served for axe-heads and signet-rings (Lucas); and the Ugaritic verb was used of crushing the skull with a mace (Baal III* A 11–26).

The Hebrew *shāmîr* is also translated 'diamond' (cf Arabic *sâmûr*, *šammûr* 'diamond,' which the divergent *s* and *š* prove to be loan-words); it is mentioned as material for the point of a graving pen (Jer 17^{1}) and as a symbol of hardness of heart (Ezk 3^{9}, Zec 7^{12}). It cannot be diamond, for the reason given above, but is almost certainly 'corundum' or 'emery,' a very hard mineral substance (aluminium oxide), as the Assyrian (*aban*) AŠ. MUR and perhaps also the Egyptian *yšmr*, *śmr* (if this is the same word or denotes the same substance)= Greek *smiris*, *smuris* 'emery' shows. The Greek translators' *adamantinos* (Jer 17^{1}) means 'steely,' since *adamas* 'steel' in the sense of 'diamond' is late (Theophrastus, *d. lapid*, iii. 19). The Hebrew *shāmîr* means also some kind of thorn-bush, possibly because of the hard sharp point of the thorn.

Emerald (A 4, B 8; also Sir 32^{6}).—The Hebrew *nōphekh* cannot mean 'emerald,' which is a green stone, since *nōphekh* 'of purple' is mentioned as a valuable article of trade (Ezk 27^{16}; cf Targum *ad locum*); the colour therefore rules out any comparison also with the Egyptian *mfk*^{3}*.t*, *mfk*^{3}*.t* 'green turquoise.' The LXX's *anthrax* 'carbuncle, garnet' and Vulgate's *carbunculus* must give approximately the right sense; it will then be the beautiful violet-coloured or amethystine garnet called 'almandine.' So the best garnets in Roman eyes were those described as *carbunculi vero amethystizontes* (Pliny, *NH* xxxvii. 25 [93]).

Jacinth (C 11; also Rev 9^{17}).—The breastplates of the visionary horsemen are compared to 'jacinth' (AV) or 'hyacinth' (RV; RSV 'sapphire'); but what stone is meant is not certain. It has been identified with aquamarine (Liddell and Scott), a bluish-green variety of beryl which, as compared with pure green beryl or emerald, has little value but which is a gem popular for its beauty (see **Ligure** below), and with dark amethyst (Pliny, *NH* xxxvii. 41 [125–126]), and also with purple corundum (Lewis and Short). The Assyrian (*aban*)*uqnû* as well as the Greek *kuanos* are perhaps the same word; the former is certainly lapis lazuli and probably also turquoise (which ranges from a sky-blue to a blue or bluish-green or green colour), ultramarine and azurite (Thompson), while the latter is lapis lazuli, dark-blue enamel and blue copper carbonate (Liddell and Scott), both thus supporting a blue or purplish-blue rather than a green stone. The modern 'jacinth' is quite different, being a rock which includes the yellow, orange-coloured, red and brown, zircons; these are found in parts of Europe, the Ural mountains, and Ceylon.

Jasper (A 12, B 6, C 3; also Ezk 28^{13}).—The Assyrian (*i*)*ašpû*, *ašpû*, and the Hebrew *yāsh*^{e}*phēh* have long been equated. The Babylonians had red or rose-coloured jasper, as shown by extant seals; but the usual jasper of antiquity was green and often transparent, while the Persian jasper was sky-blue (Pliny, *NH* xxxvii. 37 [115]). It was the first hard stone worked by the Babylonians, who called it the 'stone of royalty,' using it for amulets and seals, for the decoration of gates and for tablets in foundations (cf Rev 21^{19}). Further, the jasper of the NT was 'clear as crystal' and 'like unto clear glass' (Rev 21^{11}); the Biblical jasper, then, was the translucent green kind, which excludes jade or nephrite (Hess *ap.* Koehler; see **Diamond** above).

The Hebrew *kadhkōdh* 'agate' (AV, RSV) or 'ruby' (RV), of which the battlements of the restored Zion would be made (Is 54^{12}), was a red stone (cf Arabic *kadkadatu* 'bright redness'). Three of the versions take it to be 'jasper' (LXX, Vulgate, Peshitta), one thinks of 'carchedon' (Symmachus), the 'stone of Carthage' which too was red (Pliny, *NH* xxxvii. 25 [92–98] and 30 [104]), and Sa'adya suggests the same stone. Certainly then a red stone, and most probably red jasper, which the Assyrians too used in building work, is meant.

Ligure (A 7).—The Hebrew *leshem* is translated *ligurius* (LXX, Vulgate), an obscure term supposed to be the same word as *lyngcurion*, a yellow stone popularly thought to be the congealed urine of a lynx (Pliny, *NH* xxxvii. 13 [52]), possibly the modern 'jacinth' (RV, RSV) or 'amber' (RVm; cf Pliny, *NH* xxxvii. 11 [33–34]); the former is yellow 'jargoon' (silicate of zircon), the latter is so called because it was obtained from Liguria. Another suggestion is yellow agate (Flinders Petrie). Most probably, however, the Hebrew word ought to be equated with the Egyptian *nšm.t* 'opal' (Hommel) or 'white-blue feldspar' (Müller) or bluish feldspar (Harris) or 'greenish blue turquoise' (Quiring).

The Hebrew *ḥashmal* (Ezk $1^{4, 27}$ 8^{2}) is another word translated 'amber' (AV and RV, which has 'electrum' in the margin; RSV 'bronze'); but it almost certainly means 'brass' (see BRASS).

Onyx (A 11, B 5; also Gn 2^{12}, Ex 25^{7} 28^{9} $35^{9, 27}$ 39^{6}, 1 Ch 29^{2}, Job 28^{16}).—The Hebrew *shōham* is variously rendered in the ancient versions *sardius* (LXX), *onyx* (LXX, Aquila, Symmachus, Theodotion, Vulgate) or *sardonyx* (Vulgate), 'green stone' (LXX) or 'beryl' (LXX, Targum) or 'emerald' (LXX). The idea of a green stone is based on an absurd derivation from *shûm* 'garlic, leek' and has no independent value. The *sardius* was a transparent red stone (cf Peshitta at La 4^{7}), which *shōham* seems to have been, if its Hebrew name and the Assyrian (*aban*)*sântu*, *sându* (< *sâmtu*) 'red stone' (Assyrian *sâmu* 'red') may be identified (in spite of the equation of *sh* with *s*; cf Assyrian *siba*= Hebrew *shebha*^{c} 'seven'). This was red carnelian, which was used for ornaments and seals from the bronze age onwards; its principal sources in antiquity are named as the *māt Meluḫḫa* and the 'land of Havilah' (Gn 2^{12}), which have been hesitatingly identified, and in modern times Arabia and India.

Ruby (Job 28^{18}, Pr 3^{15} 8^{11} 20^{15} 31^{10}, La 4^{7}).—The Hebrew *p*^{e}*nînîm* is translated 'rubies' (AV, RV) with the alternative 'coral' or 'red coral' or 'pearls' (RVm). RSV has 'pearls' in Job, 'jewels' or 'costly stones' in Proverbs, and 'corals' in Lamentations. Pearls are impossible, although once supported by an ancient version (Targum at Job 28^{18}), because they do not seem to have been used at so early a date and because something red is required (La 4^{7}); and ruby is not only not supported by philology but has also hardly ever been recovered in excavations. The Arabic *fananu* 'branch' shows that the Hebrew *p*^{e}*nînîm* 'branches' must describe something branched, and this can only be coral, for the most part presumably red coral. Coral is the calcareous 'skeleton' which certain actinozoa secrete; in the living state the branching calcareous framework is covered by the coenosarc or common tissue of the organism, from which the individual polyps protrudes; in the coral of commerce the living tissue has disappeared, and only the solid 'skeleton' remains. Red coral (*corallium rubrum*) is found in the Mediterranean Sea, though now in diminishing quantities, and in the Indian Ocean.

Sardius (A 1, B 1, C 6; also Ezk 28^{13}, Rev 4^{3}).—No passage throws any light on the nature of the Hebrew *'ōdhem* (cf Ugaritic [*ú*]*dm*), which, however, must denote a red stone (cf *'ādhōm* 'red,' describing blood, a nomad's skin, a horse or cow, grape-juice and earth); and accordingly it is translated in the ancient versions

of the OT *sardius* (LXX, Vulgate, Peshitta) or 'ruby' (Sa'adya) or simply 'red stone' (Peshitta, Targum). The *sardius* was a reddish stone (cf Peshitta at La 4^{7}, where a man's ruddy skin is compared to a *sardôn*-stone), not red jasper (Flinders Petrie) but rather the transparent brown sard or sardine stone (Liddell and Scott), which probably is the stone meant in both OT and NT (Quiring).

Sapphire (A 6, C 5; also Ezk 1^{26}, La 4^{7}, Job 28^{16}).—The Hebrew *sappîr*, which is translated 'sapphire' in most versions (LXX, Vulgate, Peshitta, Targum Pseudo-Jonathan), is a blue stone, since the sky beneath God's throne is compared to a pavement of it (Ex 24^{10}); but it cannot be the precious stone called sapphire, which could not be found in blocks large enough for a foundation or pavement (Is 54^{11}) and had no 'dust of gold' in it (Job 28^{6}). It can only be *lapis lazuli* or 'Russian *lapis*,' a silicate of calcium, aluminium, and sodium, bright blue in colour but speckled with yellow iron pyrites, *i.e.* sulphide of iron (Theophrastus, *d. lapid.* iv. 23, and Pliny, *NH* xxxvii. 38 [119]). The Targum thinks of pieces of it large enough for the Tables of the Law (Pseudo-Jonathan at Ex 31^{18}, Dt 4^{13}), and a dedicatory stele of this substance has been found (Brit. Mus. 91013), and it was used, ground into paste, in mural decorations by the Babylonians (Koldewey, *Das wiedererstehende Babylon* [1925], 156, 166); and it was one of the most valued of ornamental gems in the 4th–2nd millennium B.C. The largest known piece is a carved globe of the world in the church of *il Gesù* at Rome. The name appears to be derived from the Sanskrit *śanipriya* 'slowly moving Saturn; sapphire,' whence it has passed into many languages as Assyrian (*aban*)*sipru*, *şipru*, and Aramaic *sampîrînâ*, *sampîrînôn*; cf Georgian *saperi* 'sky-blue'); the incorrect equation of *ş* with *s* is due to its being a foreign loan-word.

Topaz (A 12, B 2; also Job 28^{19}).—The Hebrew *piṭ^{e}dhah* is translated *topazius* in the earliest ancient versions (LXX, Vulgate); this is not the modern 'topaz' (silicate of aluminium, in which some of the oxygen is replaced by fluorine), usually honey-yellow but also sometimes pink or red (Epiphanius, *de xii lapidibus* 2) or grey or green in colour, but the 'peridot' or 'peridote' (transparent yellowish-green silicate of magnesium), which is the gem-form of olivine. Other ancient translators suggest a pink (Peshitta) or yellow-green (Targum) stone, while Sa'adya has 'emerald.' The Hebrew term seems to be an Indian loan-word meaning 'yellow' (cf Sanskrit *pīta-* 'yellow,' which is combined with *aśman-* 'stone' to yield *pītâsman-* 'topaz'); what is meant is maybe the saffron-yellow Indian topaz (Quiring) or perhaps the greenish-yellow transparent chrysolith or chrysolite, from which topaz is distinguished as a distinct stone (C 7, 9); this was obtained from the *Jazîrat Zabarjad* (Pliny's *Topazius insula*, now St. John's Island) in the Red Sea (Koehler), which was treated by ancient writers as a soft form of true topaz (Bolman). Hence it is inexactly described as coming from Cush (Job 28^{19}), the southern valley of the Nile.

If the stones above mentioned are classified according to their composition, it will appear that, in spite of the bewildering variety of names, the principal groups are comparatively few.

The largest number of stones come under *silica*, the crystallized form of which is distinguished as quartz; a second group is formed by the silicates (*silica* in combination with metallic oxides); and a third group consists of aluminium oxide (*alumina*).

The palace at Shushan is said to have been paved with four different stones (Est 1^{6}). The first (*bahaṭ*) has been identified with the Egyptian *ibhty*, *bht* an unknown stone from Nubia (from which the Arabic *bahtu* 'eagle-stone' may be a loan-word); the LXX translate it 'emerald-coloured stone,' possibly malachite or serpentine, while the Targum has 'crystal.' The second (*shēsh*) is almost certainly 'marble' which all the versions have (cf Syriac *šîšâ* 'marble; glass'). The third (*dar*) may be 'pearls,' which the Assyrians used to make a 'bed' in which they put foundation documents (Andrae, *Das wiedererstandene Assur* [1938], 144, 147, 150), or possibly 'mother-of-pearl' (LXX, followed by RSV in Est 1^{6}; cf Arabic *durru* 'pearls'), which was used with incrustations of marble to decorate the walls of churches (Van der Meer and Mohrmann, *Atlas of the Early Christian World*, 97), or perhaps 'shell-limestone, shell-marble,' a dark-brown stone with orange-coloured shells in it, found in Astrakhan (Harper). The fourth (*sōḥereth*), which the quite uncertain Assyrian (*aban*)*siḫru* has been invoked to explain (Meissner), may be red marble (cf Pahlavi *suḫr* 'red' and Persian *surḫ* 'red, purple') or perhaps **porphyry** (cf Pliny, *NH* xxxvi. 11 [57], where red porphyrites is mentioned).

Lastly, while the modern **alabaster** is calcium sulphate (gypsum), the ancient or Oriental alabaster like the Hebrew *shayish* was calcium carbonate; but Egyptian alabaster was geologically calcite (sometimes wrongly called aragonite), which is of the same composition but of different crystalline form and specific gravity. This was largely used for vases, being thought to be specially adapted for preserving unguents (Pliny, *NH* xiii. 3 [19]; cf Mt 26^{7}, Mk 14^{3}, Lk 7^{37}, where 'alabaster' means a 'box of alabaster'). J. Pk.—**G. R. D.**

JEWRY.—This old form occurs frequently in the older versions, but rarely in AV. In Dn 5^{13} it stands for *Judah*; in Lk 23^{5}, Jn 7^{1} and occasionally in the Apocrypha, *e.g.* 1 Es 1^{32} 4^{49}, Bel ^{33}, 2 Mac 10^{24}, for *Judaea*.

JEZANIAH, a shortened form of **JAAZANIAH.**—A Maacathite military commander, contemporary with Gedaliah (Jer 40^{8} = **Jaazaniah** 2 K 25^{23}); called **Azariah** in Jer 42^{1} (so RSV, with LXX; AV and RV 'Jezaniah') 43^{2}. Cf AZARIAH, **27.**

JEZEBEL (meaning uncertain; perhaps 'unexalted,' 'unhusbanded').—Daughter of Ethbaal, king of the Sidonians and previously priest of Astarte; wife of Ahab, king of Israel, of the dynasty of Omri (1 K 16^{31}). Jezebel's evil influence in the land of Israel, especially in combating the religion of Yahweh in the interests of Baal-worship, was exercised not only during the twenty-two years of Ahab's reign, but also during the thirteen years of the rule of her two sons, Ahaziah and Joram; moreover, this influence extended, though in a less degree, to the Southern Kingdom of Judah, where Athaliah, the daughter of Jezebel, seems to have followed in the footsteps of her mother (2 K 8^{18}). In her ruthlessness of character, her lust for power, her unshrinking and resolute activity, her remorseless brushing aside of anything and everything that interfered with the carrying out of her designs, she was the veritable prototype of Catherine de Medici.

In the OT the figure of Jezebel is presented in connexion with some dramatic episodes which are probably recorded as illustrations, rather than as exceptionally flagrant examples, of her normal mode of procedure. These are: the account of the trial of strength between the prophets of Baal and Elijah (1 K 18^{19}–19^{3}), the narrative about Naboth and his vineyard (1 K 21^{1-16}), and, as illustrating her obstinate, unbending character to the very end—note especially her words to Jehu in 2 K 9^{31}—the story of her death (2 K 9^{30-37}).

In Rev 2^{20} the name of Jezebel is applied to a woman of Thyatira, who called herself a prophetess, and tempted men to wickedness. In this connexion the name probably is symbolic and was given because of a resemblance between her and the wife of Ahab.

JEZELUS.—1. 1 Es 8^{32} (AV, RV); see JAHAZIEL, **5.** **2.** 1 Es 8^{35} (AV, RV); see JEHIEL, **7.**

JEZER.—The head of the **Jezerites,** Nu 26^{49}, 1 Ch 7^{13}.

JEZIAH, Ezr 10^{25} (AV).—See IZZIAH.

JEZIEL.—A Benjamite, 1 Ch 12^{3}.

JEZLIAH, 1 Ch 8^{18} (AV).—See IZLIAH.

JEZOAR, 1 Ch 4^{7} (AV).—See ZOHAR, 3.

JEZRAHIAH.—The leader of the singers at the dedication of the walls of Jerusalem, Neh 12[42]. The same name is rendered **Izrahiah** in 1 Ch 7[3bis].

JEZREEL.—The name (' God sows ') refers to fertile land and is applied to two localities.

1. The Plain of Jezreel (whence the Greek **Esdraelon**) is so called from the town of Jezreel, which stood at the foot of the NW. spur of the Gilboa ridge, near the scene of Gideon's exploit against the Midianites and Saul's encampment ' by the fountain of Jezreel,' possibly *'Ain Jâlûd*, before the disaster of Gilboa (1 S 29[1]). In the district of Issachar (Jos 19[18]), it is named as part of the land which remained loyal to the House of Saul after his death (2 S 2[9]). Under Solomon it was in the administrative district of Baana (1 K 4[12]). Commanding access from Bethshan to the main part of the Plain of Esdraelon it was occupied by Ahab, no doubt as a base of operations against Aram about Ramoth-gilead. It may also have served as a winter resort for the king (1 K 18[45] 21[1]), for whose amenity the vineyard of Naboth was confiscated (1 K 21). Jezreel may have been the home of the family of Omri, the father of Ahab. Here Joram, the son of Ahab, was slain by Jehu, with Jezebel and all the house of Ahab, on his withdrawal from Ramoth-gilead (2 K 8[29] 9, 10). Jezreel thereafter sank into insignificance. The place survives in the Arab village of *Zer'în*, an unimportant hamlet. No trace of its former significance remains, but potsherds indicate occupation in the Late Bronze Age (*c* 1500–1200 B.C.), the Iron Age, and the Roman period.

2. Another Jezreel, of which nothing is known, was in Judah, probably E. or SE. of Hebron (Jos 15[56]), and was the home of Abinoam, one of David's wives (1 S 25[43]). **3.** A Judahite, or perhaps a family of Judah (1 Ch 4[3]). **4.** Jezreel was the name given symbolically to one of his children by Hosea (1[4]), who condemned the bloody opportunism of the House of Jehu, who had effected his *coup d'état* at Jezreel. **5.** EV Jezreel in Hos 2[22] should possibly be translated literally ' God sows,' and treated as an exclamation.

JOAB (' Yahweh is Father ').—**1.** One of the sons of Zeruiah—the eldest according to 2 S 2[18], the second according to 1 Ch 2[16]—and thus the nephew of David. It is perhaps not too much to say that, humanly speaking, the Davidic dynasty would not have been established had it not been for the military genius and the loyalty of Joab. So consistently loyal was Joab to the royal house (see ADONIJAH), that one is tempted to question whether the passage 1 K 2[5f], which describes David's ingratitude, is genuine; Joab, however, though loyal, was a rugged conservative and individualist who could never forgive a past enmity, as witness the fate of Abner and Amasa. He could never have acquiesced in Solomon's kingship after siding with Adonijah; he was no cosmopolite, his virtues as well as his vices were those of the blood-feuding Bedouin.

Above all, Joab was a *skilled general*; this is seen by the number of victories he gained, namely, over the army of Ishbosheth under the leadership of Abner (2 S 2[12–32]); over the Jebusites (1 Ch 11[6–9]); over the Syrians and Ammonites (2 S 10[1–19] 11[1] 12[26–29]); over Absalom (18[5–17]); over Sheba (20[4–22]). These are specifically mentioned, but there must have been very many more, for those which are spoken of generally as David's victories were in all probability due to Joab, who is repeatedly spoken of as David's commander-in-chief (*e.g.* 2 S 8[16] 20[22] etc.).

Secondly, *his loyalty to the house of David* is illustrated by his whole life of devoted service, and especially by such conspicuous instances as his desire to make his victory over the Ammonites appear to have been gained by David (2 S 12[26ff]); his slaying of Abner [though other motives, *e.g.* the blood-feud, undoubtedly played a part in this act, it is certain that Joab regarded Abner as a real danger to the State (3[24f])]; the reconciliation which he brought about between David and Absalom (14[1ff]); his slaying of Absalom when he realized his treachery to David (18[14ff] 19[6]); and lastly, his words to David in 2 S 19[5–7]. How close was the tie between David and Joab may be seen, further, in the blind obedience of the latter, who was willing to be partaker in David's sin (2 S 11[6–26]).

The darker side of Joab's character is to be seen in *his vindictiveness and ruthless cruelty*; for although it is only fair to plead the spirit of the age, the exigencies of the State's weal, and the demand of blood-revenge, yet the treacherous and blood-thirsty acts of which Joab was guilty constitute a dark blot upon his character (see 2 S 3[22–27], 1 K 11[16]; cf 2 S 18[14] 20[9f]).

2. Son of Seraiah (1 Ch 4[14]; cf Neh 11[35]). **3.** A family which returned with Zerubbabel (Ezr 2[6] = Neh 7[11] = 1 Es 5[11]; cf Ezr 8[9] = 1 Es 8[35]).

JOADANUS, 1 Es 9[19] (AV, RV).—See JODAN.

JOAH.—**1.** Son of Asaph, and ' recorder ' at Hezekiah's court, 2 K 18[18, 26, 37], Is 36[3, 11, 22]. **2.** A Levitical family name, 1 Ch 6[21], 2 Ch 29[12]; apparently called **Ethan** in 1 Ch 6[42]. **3.** A Levite, 1 Ch 26[4]. **4.** Son of Joahaz, and ' recorder ' at Josiah's court, 2 Ch 34[8].

JOAHAZ.—**1.** Father of Joah the ' recorder,' 2 Ch 34[8]. **2.** See JEHOAHAZ, **1.** **3.** See JEHOAHAZ, **2.**

JOAKIM.—**1.** 1 Es 1[37–42], Bar 1[3] (RV); see JEHOIAKIM, **1.** **2.** 1 Es 1[43] (RV); see JEHOIACHIN. **3.** Bar 1[7] (RV); see JEHOIAKIM, **2.** **4.** A high priest in the days of Holofernes and Judith, Jth 4[6, 14] (AV **Joacim**). **5.** A son of Zerubbabel, 1 Es 5[5] (AV **Joacim**). **6.** The husband of Susanna, Sus [1, 4, 63] (AV **Joacim**).

JOANAN, 1 Es 9[1] (AV).—See JEHOHANAN, **3.**

JOANNA.—The wife of Chuza, the steward of Herod Antipas, one of certain ' women who had been healed of evil spirits and infirmities.' She ministered to Jesus out of her means, and after the crucifixion helped to anoint His body (Lk 8[3] 24[10]).

JOANNES.—**1.** 1 Es 8[38] (RV); see JOHANAN, **7.** **2.** 1 Es 9[29] (RV); see JEHOHANAN, **4.**

JOARIB.—The head of the priestly family from which the Maccabees were descended (1 Mac 2[1] 14[29]). According to 1 Ch 24[7] this family, there called that of **Jehoiarib,** was the first of the twenty-four courses of priests.

JOASH.—**1.** See JEHOASH. **2.** The father of Gideon (Jg 6[11] etc.). **3.** A son of Ahab (1 K 22[26]). **4.** A son of Shelah (1 Ch 4[22]). **5.** A Benjamite (1 Ch 12[3]). **6.** A son of Becher (1 Ch 7[8]). **7.** A servant of David (1 Ch 27[28]).

JOAZABDUS, 1 Es 9[48] (AV).—See JOZABAD, **8.**

JOB, Gn 46[13] (AV).—See JASHUB, **1.**

JOB, the centre of interest in the book bearing his name, is referred to also in Ezk 14[12–20] where he appears as a conspicuous example of righteousness; in Sir 49[9] (Hebrew text); in To 2[12] (in Vulgate); and in Ja 5[11], the last two passages alluding to his patience. Nothing is known of him beyond these sources. Another Job is mentioned in Gn 46[13] (AV), but since the Hebrew spelling is quite different RV, RSV give more correctly **Iob.** The account in the Book of Job builds up a quasi-patriarchal environment, apparently implying that he was a figure of the remote past; it makes him a sort

of rich sheikh living where the fertile lands of Palestine-Syria stretch out toward the desert. More definitely he is located in the land of Uz (1^1), and among 'the people of the east' (1^3) (better, the tribesmen of Kedem) seeming to indicate an area east of the Lebanons. Whether he was an Israelite is not made clear, though it is incredible that a Gentile would be represented as arguing such exalted conceptions of God. The name is known from the 14th cent. B.C. to its somewhat wide occurrence in Moslem lands in recent times. But obviously none of these individuals bears any relation to the Biblical Job. The Hebrew form of the name (*'iyyôbh*) resembles the verb 'to be an enemy'; but one must be very cautious of drawing any conclusion from this; the name is probably foreign and very old. On the other hand, the literature of the ancient East provides us with several references to, or accounts of, a righteous sufferer. In these and in other famous writings we have, it is clear, the background of our Book of Job; he is the Hebraic 'righteous sufferer.' Clearly the author found inspiration here for his immortal tragedy in the way familiar to us from the work of Shakespeare, for example.

The book divides on the basis of its contents into five distinct sections; 1. The Prologue, chs. 1–2, that tells of Job's ideal circumstances then of the succession of disasters which befell him, as a result of the argument in Heaven between Y″ and the Satan; he stripped him of property and children as well as his wife's sympathy; he afflicted him with a distressing disease; his three friends came to console him but were overcome with sadness for his condition. 2. The Dialogue, chs. 3–31, in which Job and the friends each in turn speak about Job's condition and religious attitude; this continues into a third cycle of speeches which, however, is for some reason incomplete, but the section is rounded out with a long speech, ostensibly Job's (29–31), and a poem about the source of wisdom (28). 3. The Speeches of Elihu, chs. 32–37, introducing a hitherto unmentioned character who says he is impelled to rebuke Job, which supposedly goes on through four successive speeches. 4. The Speeches of Y″ with brief rejoinders by Job, 38^1–42^6, which, in a superb survey of the wonders of nature, inanimate and animate, apparently reduce Job to a sense of his rashness and insignificance. 5. The Epilogue, 42^{7-17}, sketching Job's restoration and the happy sequel.

Whether these sections were all written by one author has for long been a matter of inquiry and disagreement among students of the book. Certainly the action, if we may call it such, moves on in ostensible continuity; the book is a unit, whether or not of united authorship. However, most scholars are agreed that the Elihu Speeches and ch. 28 were not in the original work. Some hold the same view of the Epilogue; there is more diversity of opinion as to the Speeches of Y″, some holding that the book originally concluded with the first speech (chs. 38–39). Actually doubts are expressed by a few as to the originality of the Prologue, indispensible as it may seem for the dramatic action.

Be this as it may, no one can dispute that the heart of the book is the Dialogue. In the interchanges between Job and the friends the author presented what he had to say about his theme; although it is logically possible to contend that this view, whatever it was, found some sort of amplification or qualification in the Speeches of Y″ and the Epilogue. Indeed it is *a priori* plausible, since these finish the book, and so presumably give its conclusion. But close study reveals subtle and cogent lines of thought, leading the Dialogue onward toward a notable culmination, which, however, are lacking from the subsequent sections, and indeed are in conflict with them.

Who the author or authors of any or all these sections may have been we have no means of knowing apart from what the book itself provides; and there the author, great artist that he was, has effectively concealed himself. The locale of the story out on the margin of the desert, apparently away from, or at most on the fringe of, the land of Israel, along with the very unusual Hebrew of the book and its considerable number of strange, possibly foreign, words have engendered theories that it is not really Hebraic at all, but Edomite (Eliphaz, the foremost of the friends, was from Teman in Edom), or even Arabic. Rebuttal of such views necessarily depends on evidence as inconclusive as theirs; but it is cogent to claim that in all the ancient East no one except a Hebrew could possibly have composed a work of such elevation. Yet his date is likewise indefinite, and guesses have been advanced from the Mosaic age to Persian times. The book contains no certain historic allusions; however, Job's curse on his day of birth (3^{3-10}) is so similar to one of Jeremiah's 'confessions' (Jer 20^{14-17}) as to indicate some relationship; we can afford to dismiss possible explanations other than that Jeremiah's words are original. Affinities between Job and Second Isaiah have also been pointed out, but here the direction of influence is more difficult to decide. Otherwise we are dependent, in ascribing a date, upon what we may deduce from the content and quality of the thought in the book, always a precarious venture though not devoid of worth. The book's exalted concepts of God and of human duty can have arisen only when Judaism had attained the stature by which it was to be known through the centuries. Vague as the result is, we shall probably not be far wrong if we assign a date a little after 400 B.C.

It will surprise no one possessing even a slight knowledge of the transmission of the OT to learn that with an uncertain origin such as this, the Book has many passages where the Hebrew text is quite doubtful and apparently corrupted beyond recovery, numerous others where the original poem has almost certainly been expanded by someone other than the author. It has also a high proportion of rare, perhaps foreign, words, and its full quota of passages that reveal the difficulty of interpretation which sometimes attaches to profound literature—and all this in addition to the tantalizing, fragmentary termination of the Dialogue just at the point where one comes to believe he can almost lay his hand on a great concept which the author was in process of delineating.

The theme of the book, it is usual to assert, is the suffering of the righteous: in a world created and ruled by a God of goodness and justice, why do ethical and religious character and conduct bear such a slight correspondence with what commonly passes for well-being? The wicked 'have more than heart can wish,' while the righteous endure all sorts of disadvantages.

This interpretation is not to be ignored, for certainly the problem finds emphatic expression (*e.g.* chs. 18, 20–22). Nonetheless, closer study shows this to be only a subsidiary theme; the real intent of the Dialogue goes much deeper. We shall make a fruitful approach to the book only when we realize that it deals with human suffering as a whole: not why do the righteous suffer, but why is suffering an inescapable part of our human estate? Pain, loss, bereavement, frustration, sorrow, injustice, and eventually, for every one of us, death—that is what it is to be human! But why, if God is good, or, in more modern terms, if the universe is rational? The book thus takes its place in the great succession of tragic literature which from the time of the author of the Egyptian Song of the Harper, at latest, down to the best writing of our own days, has engaged the thought and art of the most profound minds. Side by side with the works of Aeschylus, Euripides, and Sophocles, the Book of Job must come into consideration in the total of the tragic literature of the ancient world. Whether or not it was influenced by the remarkable brilliance of the brief period of Greek tragedy has not been adequately investigated (cf Kallen: *The Book of Job as a Greek Tragedy*, 1918) although the time suggested above for its composition leaves this entirely possible. If such influence was actual, it merely discloses further the independence and stature of the Hebrew poet; for certainly his work, while more penetrating (as it is hoped will presently appear) than the best Greek tragic thought,

yet in form and structure is very different. It seems to observe the three classic unities of form, it is true, but this is incidental and perhaps accidental; but there is little if any action, that is, *drama* in the etymological sense; and in every aspect, the poem goes strictly its own way. It is the Hebraic tragedy, of which, alas, we have no other example; probably none ever existed.

It is relevant to the question of the original unity of our book, that some scholars ascribe a different theme to the Prologue; they claim it deals with the question of disinterested piety. That may be so; certainly if we are to hold that it is concerned with the high problem apparent in the Dialogue, its answer is negligible. It would in that case merely fall back on the shallow solution provided by polytheisms, of denying that God is responsible for human woe. But it would then be necessary to point out that the writer had made out a poor case, for it was by Y″'s permission that the Satan was able to afflict Job. Similarly slight is the answer provided by the Epilogue; it seems to say that if the sufferer will only endure patiently, all will come out right in the end, a claim that is patently false to the facts of life. The Speeches of Y″, it is usual to assert, teach that God's justice is beyond the grasp of the human mind, and we must have faith where we cannot understand. Valuable as such insight is for the religious life, it remains very doubtful that the chapters really say anything of the sort. On the contrary the panorama of physical wonders presented, frequently with magnificent literary power, as the works of God, with their almost complete indifference to His ethical attributes and His love and concern for man, implies rather that the author, whoever he may have been, was only saying that the might and transcendence of God are so far beyond man that there is no right or recourse other than to submit, whatever may happen. It is an answer of despair, perhaps of fatalism, but not of faith.

We turn to the Dialogue. Understanding the high theme and purpose of the great poet, we recognize immediately the literary skill of a master, such as will become more and more apparent as one accompanies him. For setting out to pursue 'things unattempted yet in prose or rhyme,' he introduces us, not to a ponderous theological dissertation, but to a very sick man and his querulous complaining. Job curses the day of his birth. Why must one live when life means only bitterness? For this thing that has overtaken him is completely irrational; he was not even guilty of too great happiness, 'I was not at ease . . . but trouble came' (3^{26}). And that is all! Who might dream such to be the opening of a high theological quest? Yet as one's study advances, he realizes that already hints and themes have been introduced, with the delicacy that characterizes this author, which are to provide the foci around which Job's pilgrimage of faith revolves.

Apparently **Eliphaz** of Teman is presented as the eldest, hence the dominating one of the friends. He sets out (4^{2ff}) evidently to encourage Job, but soon it becomes apparent that his 'comfort' is first of all a rebuke of unconfessed sin, which for the orient lacks nothing of directness by virtue of being presented in mere allusions or innuendo. God is exalted far beyond man's furthest possibilities; Job has been guilty, *inter alia*, of vexation (5^{2}), surely a reference to the dull feeling of injustice with which his complaint had closed; he should 'seek God' (5^{8})—apparently confess the sins he will not admit, and accept patiently the Divine chastening. If so, there is a prospect of restoration and great happiness for him. **Bildad** and **Zophar** follow in turn, after intervening replies by Job. But while they are sketched as diverse individuals—Bildad blustering but kind, Zophar somewhat scholarly yet cutting—and although they add their differing emphases—Bildad the justice of God, Zophar His inscrutability—yet they contribute little beyond Eliphaz's views to the advance of the thought. In the second and third cycles of their speeches they provide mainly vociferous reaffirmation of their position and increasing abuse of Job through charges which have no validation elsewhere. It becomes evident that they function primarily as a foil and provocation for Job's thinking. Interest shifts to his speeches and to the groping evolution of a solution towards which the author with magnificent skill leads him onward. It is this progress of Job's thought which constitutes the core and meaning of the book. The plan of the writer early reveals itself. The friends are the voice of orthodoxy; the best thinking of the time relevant to the human predicament is cogently argued by them in turn. Against it Job is in open revolt; not at first, for he is too numbed by suffering to have any clear view, and presumably such attitude as he entertains is essentially theirs. But under the sting and disappointment of the friends' misunderstanding and their unfeeling application of their dogmas, he moves into a sense of the enormity of the issue and of its irrationality. He charges that the friends substitute pietistic phrases for honest thought, and that such is not piety at all (13$^{7-12}$). Yet we now are not ready to dismiss them so cursorily; there is much of high value in their emphases, in Eliphaz's belief in the transcendence of God, in Bildad's certainty of divine justice and of God's care of the just. Zophar's sense of the mystery of the transcendent divine wisdom, also, is well presented in the words of AV, even if they are a wrong translation, 'Canst thou by searching find out God' (11^{7}).

Nor is it clear that the author would entirely disparage the current orthodoxy, which he has the friends present. Rather he criticizes it for its inadequacy. Its great emphasis is that God is great and exalted—would any thoughtful individual of that time or the present question it? But if that is all, then the human tragedy has no answer beyond what the friends quite consistently reiterate: submit! A genuine religious faith and life can scarcely be built on such stern compulsion. We must know, in some way, that God is good and that He is touched with the feeling of our infirmities (He 4^{15}). Such is the quest on which the author launches the sick and groping Job—can one hold a faith of this sort? For equally it is apparent that the obverse of his plan is to use Job to voice his own convictions and have him work on through his dull suffering and sense of wrong to the answer which it is the poet's purpose to offer for this deepest of human questionings.

His literary artistry is a joy to witness—much of it unfortunately lost in translation, as is inevitable: the truth with which he handles the sick and hopeless Job, leading him on to steadily enlarging apprehensions of the problem which at first is only a personal obsession but presently is recognized as a typical bit of human woe; the deep understanding of human experience and human nature, perhaps most notably presented in the complaints of the despairing Job in words that to this day seem the instinctive voice of those most sick in body and mind; the charming vignettes of ancient life; the delicacy of allusion and innuendo; the heat of debate carried forward in what seems on casual reading not debate at all but a series of unrelated dissertations, but on closer study becomes a close-knit fabric of expostulation and reply; the light touch that has the sufferer stumble on a new apprehension only to drop it suddenly through the inability of his fevered mind to follow any consistent course of thought except obsession with its own misery; the thought, however, is not lost, but becomes, after vague gropings, the ground of a fresh advance, so that step by step from one moment's insight to a next somewhat higher, Job moves onward into faith and hope. Yet one further feature of the poet's skill becomes apparent only through close and informed study. Like every great writer, then or now, he is fully conversant with contemporary literature, not least the already classic treatments of the theme with which he is engrossed. A light touch and apt allusion—meaningful for the informed—weaves it into his enlarging tapestry of Job's pilgrimage.

In his reply to Eliphaz Job voiced first his pained incredulity that his friends had so grossly failed to

understand and help. Perhaps this too is an important phase of the author's presentation; perhaps he is saying that orthodoxy is so engrossed in its impersonal postulates that it loses sight of the realities of personal need. Reiteration of his suffering brings Job then to the realization of its universal quality, and so to the full force of the problem; for how and why can God endure —how can He seemingly enjoy the pain of creatures so much less than Himself, which indeed He had called into being? This line of thought leads him very naturally, in his reply to Bildad, to an idea that is to be basic throughout the entirety of his further utterances, the wish for a cosmic hearing in which he could argue the injustice of the pains he suffers. The gradual development of this defiance into a very different mood is one of the subtle motifs of the Dialogue. But equally naturally he seizes upon another thought that is to be of far-reaching implication. What would be the use of such a meeting? God is immensely bigger than he, and 'there is no umpire between us who might lay his hand on us both' (9^{33})—the mysterious figure of the intermediary; he comes in twice more under different names and in quite different function, in 16^{19}, and in the famous passage, 19^{25}. Who is he? And just what is his function in this high quest? It is a most alluring, and yet baffling problem. But before we attempt it there is much that must be sketched as preliminary.

It is in his near blasphemous expostulations against God's unfeeling treatment of His finite creature that Job stumbles, almost to his surprise, it would seem, upon an admission that proves to be a turning point in his despair. Listing what God has done for a creature He now persecutes, Job tells in the quaint imagery of the ancient world, of God's shaping his prenatal development, then as though through an inadvertence he continues: 'Thou hast granted me life and steadfast love; and thy care has preserved my spirit' (10^{12}).

It is all so simply introduced that one can easily overlook its crucial importance in the poem. For the fact is that in his next speech Job has left behind his bitterness and set forth toward faith and hope which though only incipient, yet are the thread to guide his faltering steps toward recovery.

Still it is a transformation handled with the rare skill and insight of the author. Job falls back again and again into his despairing gloom, but his lucid moments become more pronounced and his wistful hope more certain. Every reader knows the preoccupation of ch. 14 with thoughts of death and the hereafter: 'Man that is born of woman is of few days and full of trouble. . . . Oh, that thou wouldst hide me in Sheol. . . . If a man die (and) live again . . .' and so on. But this is the thought that had obsessed Job in his very first speech; more than that, it had recurred in varying expression, in every one of them. Clearly there is here some vital thread in the author's evolving thought. Our long tradition of a faith in life beyond death naturally prompts the question whether he means this; and while the Hebraic concept of Sheol is very different from anything we hold, yet it becomes certain that such solution is part of his answer. The words of 19^{26}, beyond a doubt correctly translated in RSV, render this indisputable, notwithstanding the seemingly final denial in ch. 14, which, however, is but an expression of the author's methods in leading Job on from despair to dawning hope and ultimate certainty. However, the reiterated theme of death and the underworld has still more profound significance in the working out of the author's design.

Pervasive through the ancient world for millennia was a myth and liturgy of the god who died and rose again. Famous bodies of literature dealt with this phase of ancient faith, and still others carried greater or less allusions to it. In its simplest origins it was merely a personification of the annual fluctuations of the life process. In the springtime life bursts throbbing and triumphant; its zest slowly moderates into the maturity of early summer; soon blighting heat sears the landscape into long months of life's arrest, until once more the miracle of the new year again calls for life and hope and increase. Yet the religious implications, and resultant faith, went far beyond such crass cult of nature. In Egypt, for example, Osiris became the symbol and ground of belief in a glorious life beyond death. In Mesopotamia Tammuz was a healing god; Ishtar, his spouse, may be described, though none too accurately, as deified motherhood; an illuminating glimpse of the function of Nergal, one of the terrifying gods of the underworld, is given in a personal name, Nergal-mitu-uballit (Nergal makes the dead live). However, a striking feature of the myth was that the restoration of the dead god did not come about spontaneously through natural force, but a messenger from the high gods descended into the gloomy reaches of the underworld and by persuasion secured his release.

Allusions to this aspect of the thought of his contemporary world pervade the work of the author of the Dialogue. It is doubtful that all have been identified, for like any good poet his touch is frequently very light.

In some way the poet's answer to the riddle of human suffering is clearly interwoven with all this aspect of the thinking of his time. That he was too great a thinker merely to have adopted these pagan ideas needs no argument; he is employing them to lead Job onward from his black despair and rebellion, and doubtless at the same time is sketching their service in his own progress toward a faith and hope that can transform our woe into a thing of brightness and promise. We have noted that he reaches for a certainty of persistence beyond death; but clearly this is no more than part of his conclusion. The mysterious figure of Job's intermediary plays some vital rôle in his progress. This is attested by 33^{23}, which, though no part of the Dialogue, must be regarded as a use of it by some one who gave us this testimony to its conclusion subsequently lost. The three appearances of the intermediary in the Dialogue leave his function very uncertain except that he is a 'witness in the heavens' (16^{19}) and a 'redeemer' who will ensure that Job will see God as one not estranged from Him (19^{25ff}). We are led to see him as parallel to the messenger from the gods, in the pagan literature. And although the immediate sequel of his work is Job's grasp of what we may not inaccurately describe as a redeeming faith (23$^{6-10}$), yet the work of the intermediary in creating this is not clarified. There are many very important questions we would like to ask the poet. However, it is probable in the light of all we can adduce, that his meaning is approximately of this sort. As death and revival are an inextricable part of the natural world, we must see suffering as rooted in the nature of things. Probably we shall not exaggerate his thought if we say that it reaches right up to God Himself; He too suffers. Our human woe, then, is not an infliction by an arbitrary and indifferent Ruler of All; it is rather a part of being. To be is to suffer. Yet this does not lead to a doctrine of Nirvana, of escape through not-being. The poet is too great an optimist for this. He had the beginning of Job's recovery coincide with his startled realization that life is not entirely a vale of woe; its pain is balanced by 'steadfast love and care' that preserves one's spirit (10^{12}). Yet this, even along with his belief in some sort of survival of death, is not a final answer for the poet; neither would it be for us. He seems to say, as Paul did centuries later, that 'the whole creation has been groaning in travail until now' (Ro 8^{22}), and that it is our painful privilege to share in that universal agony. We all shrink from suffering; that is natural, it is its biological function. But if we can rise to a higher level, we may seize some, more or less adequate, understanding of its working in things of the spirit: its discipline, its refining fire, and its fellowship in the creative and redemptive pain that is universal up to God Himself.

Doubtless if the Dialogue were preserved complete, the precise formulation of the thought would be clearer than it is now; but its movement and the culmination at

which our defective copy arrives, indicate that this sketch, even if dependent in some part on aspects of our Christian thinking, is yet not false to the answer the poet evolved with such superb skill. Its depth and height beyond other answers is apparent, and its remoteness from the superficiality which unfortunately afflicts most of the popular writers of our time who confidently elect themselves arbiters of the most difficult question which has engrossed and baffled all the ages.

Very little study will reveal that the rest of the Book of Job (except ch. 33, which gives a résumé of the Dialogue) is oblivious of the movement of thought that is the essential element of the Dialogue; likewise they lack the distinctive themes which it employs. They are not without value, some of it very high, but they contribute nothing to the insights which it has been the great worth of the Dialogue to open before us. The magnificent flights of poetic imagination found in the Speeches of Y" have always constituted an attractive feature of the book. The stress in some of the Elihu speeches upon the disciplinary worth of suffering also merits mention. But attention will inevitably revert to the Dialogue as that part which most of all has created the enduring greatness of the book of Job. W. A. I.

JOBAB.—**1.** A son of Joktan in the genealogies, Gn 10^{29}, 1 Ch 1^{23}, and therefore probably an Arabian geographical name. Glaser identifies Jobab with YHYBB (probably *Yuhaybab*), a tribe mentioned in the Sabaean inscriptions. Sprenger through the LXX form *Iobor* relates it to *Wabār*, a considerable region in S. Arabia. **2.** A king of Edom, Gn 36^{33f}, 1 Ch 1^{44f}, confused, in the apocryphal appendix to the LXX version of Job, with Job (q.v.). **3.** A king of Madon, ally of Jabin of Hazor against Joshua, Jos 11^{1}. **4. 5.** Name of two Benjamites, 1 Ch $8^{9, 18}$. W. M. N.

JOCHEBED.—A daughter of Levi, born after the descent into Egypt (Nu 26^{59}), and sister of Kohath, who married her nephew Amram and became the mother of Aaron and Moses (Ex 6^{20}) and Miriam (Nu 26^{59}). Her name is not mentioned in Ex 2^{1}, which records the birth of Moses. The name Jochebed appears to be compounded with the divine name Yahweh, but Noth (*Die israelitischen Personennamen*, 1928, 111) says this is uncertain, and the name may be of foreign origin.

JOD or YODH.—Tenth letter of Hebrew alphabet, and so used to introduce the tenth part of Ps 119, every verse of which begins with this letter.

JODA.—**1.** A Levite, 1 Es 5^{58}; called **Judah** (q.v.) in Ezr 3^{9}, **Hodaviah** in Ezr 2^{40}, **Hodevah** in Neh 7^{43}, and **Sudias** in 1 Es 5^{26}. **2.** An ancestor of Jesus, Lk 3^{26}.

JODAN.—One of the sons of Jeshua, the son of Jozadak, 1 Es 9^{19} (AV, RV **Joadanus**), called **Gedaliah** in Ezr 10^{18}.

JOED.—A Benjamite, Neh 11^{7}.

JOEL.—**1.** The prophet (see next article). Regarding his personal history we know nothing. **2.** A son of Samuel, 1 S 8^{2}, 1 Ch 6^{28} (RV, RSV; AV, following Hebrew, omits) ^{33}. **3.** An ancestor of Samuel, 1 Ch 6^{36}; called **Shaul** in v.^{24}. **4.** A Simeonite prince, 1 Ch 4^{35}. **5.** A Reubenite, 1 Ch $5^{4, 8}$. **6.** A Gadite chief, 1 Ch 5^{12}. **7.** A chief of Issachar, 1 Ch 7^{3}. **8.** One of David's heroes, 1 Ch 11^{38}; see IGAL, **2. 9. 10. 11.** Levites, 1 Ch $15^{7, 11, 17}$; 23^{8} 26^{22}; 2 Ch 29^{12}. **12.** A Manassite chief, 1 Ch 27^{20}. **13.** One of those who married a foreign wife, Ezr 10^{43}, 1 Es 9^{35} (AV, RV **Juel**). **14.** A Benjamite overseer after the Exile, Neh 11^{9}. **15.** One of those who married a foreign wife, 1 Es 9^{35} (AV, RV **Juel**); called **Uel** in Ezr 10^{34}.

JOEL, BOOK OF.—**1. Analysis.**—The Book of Joel clearly falls into two parts: (1) a call to repentance in view of present judgment and the approaching Day of Yahweh, with a prayer for deliverance, and the Divine answer promising relief (1–2^{27}); (2) the spiritual blessing, judgment on the Gentile world, and material prosperity for Judah and Jerusalem (2^{28}–3^{21} [Heb. 3^{1}–4^{21}]).

(1) The immediate occasion of the call to repentance is a plague of locusts of exceptional severity (1^{2f}), extending over several years (2^{25}), and followed by drought and famine so severe as to necessitate the discontinuance of the meal- and drink-offering (1^{9}), *i.e.* probably the daily sacrifice (cf Ex 29^{41}, where the same Hebrew words are used of the daily meal-offering and drink-offering). This fearful calamity, which is distinctly represented as present (' before our eyes ' 1^{16}), heralds ' the great and very terrible day of Yahweh ' (2^{11}), which will be ushered in by yet more fearful distress of the same kind (2^{1-11}). The reason of all this suffering actual and prospective is national sin, which, however, is not specified. Yahweh's people have turned away from Him (implied in 2^{12}). Let them turn back, giving expression to their penitent sorrow in tears, mourning garb, general fasting, and prayer offered by priests in the Temple (2^{12-17}).

' Then the Lord became jealous for his land and had pity on his people ' (2^{18}). It seems to be implied that the people had repented and fasted, and that the priests had prayed on their behalf. This Divine pity, proceeds the prophet, speaking in Yahweh's name, will express itself in the removal of the locusts (2^{20}), and in the cessation of the drought, which will restore to the land its normal fertility, and so replace famine by plenty (2^{22-27}).

(2) Higher blessings yet are in store for the people of Yahweh. His Spirit shall afterwards be poured out on all, inclusive even of slaves (2^{28f} [Heb. 3^{1f}]). And when the Day of Yahweh comes in all its terror, it will be terrible only to the Gentile world which has oppressed Israel. The gathered hosts of the former, among whom Phoenicians and Philistines are singled out for special condemnation (3 [Heb. 4] $^{4-8}$), shall be destroyed by Yahweh and His angels in the Valley of Jehoshaphat (3 [Heb. 4] ^{11b}), and then Jerusalem shall be a holy city, no longer haunted by unclean aliens (3 [Heb. 4] ^{17}), and Judah, unlike Egypt and Edom, will be a happy nation dwelling in a happy, because well-watered, land, and Yahweh will ever abide in its midst (3 [Heb. 4] $^{18-21}$).

2. Integrity.—Eissfeldt states the problem of Joel to be whether the first section, defined above, is prophecy or narrative description of past or present events. If it is prophecy, the book is a unity; but if it is narrative, its unity is open to question. The common view to-day is that it is narrative, although the reference to the Day of the Lord must have future reference. Most scholars affirm the unity of the two sections, but some (*e.g.* Oesterley and Robinson, *Introduction to the Books of the Old Testament*) argue for a later date for the apocalyptic sections than for the rest, and in consequence do not regard the book as a unity.

3. Date.—There is no external evidence. The place of the book in the Canon is not conclusive, for the Book of Jonah, which was manifestly written after the fall of Nineveh, is also found in the former part of the collection of the Twelve, and comes before Micah, the earliest portions of which are beyond doubt much older. Hence the question can be answered, in so far as an answer is possible, only from the book itself.

The facts bearing upon it may be briefly stated as follows: (1) The people addressed are the inhabitants of Judah (3 [Heb. 4] $^{1, 6, 8, 18ff}$), and Jerusalem (2^{32} [Heb. 3^{5}] 3 [Heb. 4] $^{6, 16f, 20}$). Zion is mentioned in $2^{1, 15, 23, 32}$ [Heb. 3^{5}] 3 [Heb. 4] $^{16, 17, 21}$. There is no trace of the kingdom of Samaria. The name ' Israel ' is indeed used (2^{27} 3 [Heb. 4] $^{2, 16}$), but, as the first and last of these passages clearly show, it is not the kingdom of Israel that is meant, but the people of God, dwelling mainly about Jerusalem. (2) There is no mention of royalty or aristocracy. (3) The Temple is repeatedly referred to ($1^{9, 13f, 16}$ 2^{17} 3 [Heb. 4] ^{5}), and by implication in the phrase ' my holy mountain ' (2^{1} 3 [Heb. 4] ^{17}: its ritual is regarded as of high importance ($1^{9, 13}$ 2^{14}), and its ministers stand between the people and their God, giving expression to their penitence and prayer ($1^{9, 13}$ 2^{17}). (4) The people are called on to repent of

sin (2^{12f}), but in general terms. No mention is made of idolatry or formalism, or sensuality, or oppression—the sins so sternly denounced by Amos and Isaiah. (5) The foreign nations denounced as hostile to Israel are the Phoenicians (3 [Heb. 4] ^{4}), the Philistines (ib.), Egypt and Edom (3 [Heb. 4] ^{19}). Reference is also made to the Grecians ('sons of the Ionians,' 3 [Heb. 4] ^{6}), and the Sabaeans or S. Arabians (3 [Heb. 4] ^{8}) as slave-dealers. Assyria, Babylonia, and Aram are neither named nor alluded to. (6) The history of Judah and Jerusalem includes a national catastrophe when the people of Yahweh were scattered among the nations and the land of Yahweh was divided amongst new settlers (3 [Heb. 4] ^{2}). (7) This book of seventy-three verses contains twenty-seven expressions or clauses to which parallels, more or less close, can be adduced from other OT writings, mainly prophetic. In twelve passages there is verbal or almost verbal correspondence: cf 1^{15b} and Ezk 30^{2f}; 1^{15c} and Is 13^{6}; 2^{2} and Zeph 1^{15}; 2^{6} and Nah 2^{10} [Heb. 11]; 2^{13} and Ex 34^{6}; 2^{14} and 2 S 12^{22}; 2^{27b} and Ezk 36^{11} etc.; 2^{27c} and Is 45$^{5f, 18}$; 2^{31b} [Heb. 3^{4}] and Mal 4^{5} [Heb. 3^{23}]; 2^{32} [Heb. 3^{5}] and Ob ^{17}; 3 [Heb. 4] ^{16} and Am 1^{2}; 3 [Heb. 4] ^{1} and Jer 33^{15} etc. In two other places there is contrast as well as parallelism, 2^{28} [Heb. 3^{1}] answers to Ezk 39^{29}, but the latter has 'on the house of Israel,' the former 'on all flesh,' and 3 [Heb. 4] ^{10} is the reverse of Is 2^{4} and Mic 4^{3}. The last clause of 2^{13} is found also in Jon 4^{2} in the same connexion, and nowhere else. (8) The Hebrew exhibits some features which are more common in late than in the earlier literature. There are a few Aramaisms: *'ālāh* 'lament' (1^{8}); *sōph* 'hinder part' (2^{20}) for *qēṣ*: the Hiph'il of *nāḥath* (3 [Heb. 4] ^{11}), and *rōmaḥ* (3 [Heb. 4] ^{10}—a word of Aramaic affinities; and several expressions often met with in late writers. Still, it is not advisable to lay much stress on this point.

With these facts before them critics have concluded that the book must either be very early or late. Many, led by Credner, found evidence of pre-exilic date, and most of these, after him, selected the minority of Joash of Judah (*c* 737 B.C.). König prefers the latter part of the reign of Josiah (640–609 B.C.). Recent critics, with a few exceptions (Orelli, Kirkpatrick, Volck, and to some extent Baudissin) regard the book as post-exilic: *c* 500 B.C. (so Driver, but not without hesitation); after the reforms of Ezra and Nehemiah (E. Kautzsch, W. R. Smith, G. A. Smith on the whole, Marti, the school of Kuenen, Nowack, Cornill, and Horton). Several points seem to favour strongly post-exilic origin: the religious atmosphere, the political situation in so far as it can be discerned, reference to the Greeks, and the literary parallelisms, most of which are more intelligible on the assumption of borrowing by Joel than vice versa. While most scholars maintain the unity of the Book of Joel, some as mentioned above, separate the apocalyptic sections (especially 3$^{1-21}$) and attribute these to a later date (*c* 200 B.C.) than the rest (*c* 350 B.C.).

4. Interpretation.—The ancient Jews, as represented by the Targum, and the Fathers, who have been followed by Pusey, Hengstenberg, and others, to some extent even by Merx, regarded the locusts of the Book of Joel as not literal but symbolic. That view, however, is now generally abandoned. The seemingly extravagant descriptions of the locust-swarms, and the havoc wrought by them, have been confirmed in almost every point by modern observers. What is said about their number (1^{6}), the darkness they cause (2^{10}), their resemblance to horses (2^{4}), the noise they make in flight and when feeding (2^{5}), their irresistible advance (2^{7ff}), their amazing destructiveness (1$^{7, 10ff}$ 2^{3}), and the burnt appearance of a region which they have ravaged (2^{3ab})—can hardly be pronounced exaggerated in view of the evidence collected by Pusey, Driver, G. A. Smith, and other commentators. The description of the locusts as 'the northern *army*' (2^{20}) is indeed still unexplained, but is insufficient of itself to overthrow the literal interpretation. On the apocalyptic character of the latter portion of the book there is general agreement. Kapelrud (*Joel Studies*) has given a liturgical interpretation of the book and relates it on the one hand to Yahweh's enthronement festival and on the other brings it into close association with the ancient Canaanite fertility cult.

5. Doctrine.—As compared with some of the other prophetic writings, say with Deutero-Isaiah and Jonah, the Book of Joel as a whole is particularistic. The writer's hopes of a glorious future seem limited to Judah and Jerusalem, and perhaps the Dispersion (2^{32} [Heb 3^{5}]). On the other hand, it is remarkable that the outpouring of the Spirit is promised to 'all flesh,' not merely to 'the house of Israel'—a general way of stating the promise which made the NT application possible (Ac 2^{16ff}). So the book may be said to contain a germ of universalism. Its other most striking characteristic, from the doctrinal standpoint, is the importance attached to ritual and the priesthood, and the comparatively slight stress laid on conduct. Still, it is here that we find the caustic words: 'Rend your heart and not your garments' (2^{13}).

6. Style.—In style the Book of Joel takes a very high place in Hebrew literature. It is throughout clearly, elegantly, and forcefully written. Skilful use is made of parallelism—note the five short clauses in 1^{10}; of Oriental hyperbole (2^{30f} [Heb. 3^{3f}]) and of word-play, *e.g. shuddadh śādheh* 'the field is wasted' (1^{10}), *yābhēshû . . . hōbhîsh* 'are withered . . . is ashamed' (1^{12}), *shōdh mish-shaddai* 'destruction from the Almighty' (1^{15}), and the play on the verb *shāphaṭ* and the name Jehoshaphat in 3 [Heb. 4] $^{2, 12}$.

W. T. S.—J. Ma.

JOELAH.—A warrior who joined David at Ziklag, 1 Ch 12^{6}.

JOEZER.—One of David's followers at Ziklag, 1 Ch 12^{6}.

JOGBEHAH.—A town of Gad in Gilead, Nu 32^{35}, mentioned in connexion with Gideon's pursuit of the Midianites, Jg 8^{11}. It is the modern *Kh. Jubeihât* (or *Ajbeihât*), NW. of *'Ammân*.

JOGLI.—Father of the Danite chief who took part in the division of the land, Nu 34^{22}.

JOHA.—**1.** A Benjamite, 1 Ch 8^{16}. **2.** One of David's heroes, 1 Ch 11^{45}.

JOHANAN.—**1.** Son of Kareah, one of the military captains who, after the fall of Jerusalem, joined Gedaliah at Mizpah, 2 K 25^{23}, Jer 40^{8}–43^{7}. After the murder of Gedaliah he pursued Ishmael and the other conspirators, recovered the captives, and, in spite of the protest of Jeremiah, carried them to Egypt. **2.** A son of Josiah, 1 Ch 3^{15}. **3.** A post-exilic descendant of the line of David, 1 Ch 3^{24}. **4.** A high priest, 1 Ch 6^{9f}. **5. 6.** Two warriors who came to David to Ziklag, a Benjamite and a Gadite respectively, 1 Ch 12$^{4, 12}$. **7.** One of those who returned with Ezra, Ezr 8^{12}, 1 Es 8^{38} (AV **Johannes**, RV **Joannes**). **8.** An Ephraimite, 2 Ch 28^{12}. **9.** See JONATHAN, **7** and JEHOHANAN, **3.**

JOHANNES.—1 Es 9^{29} (AV); see JEHOHANAN, **4.** **2.** 1 Es 8^{38} (AV); see JOHANAN, **7.**

JOHN.—**1.** The father of Mattathias, and grandfather of the five Maccabaean brothers (1 Mac 2^{1}). **2.** The eldest son of Mattathias (1 Mac 2^{2}). In 161 B.C. he was slain by the 'sons of Jambri' (1 Mac 9$^{35-42}$). In 2 Mac 8^{22}, and perhaps again 10^{19}, he is by mistake called **Joseph.** **3.** The father of Eupolemus (1 Mac 8^{17}, 2 Mac 4^{11}), who was sent by Judas Maccabaeus as an ambassador to Rome. **4.** An envoy sent by the Jews to treat with Lysias (2 Mac 11^{17}). **5.** One of the sons of Simon the Maccabee (1 Mac 16^{2}), commonly known as John Hyrcanus, and described as a grown man in (1 Mac 13^{53}). See MACCABEES, **5.** **6.** The father of Simon Peter (Jn 1^{42} 21$^{15-17}$ RV, RSV; AV **Jonas**), who is called in Mt 16^{17} **Bar-Jonah** (AV **Bar-Jona**). In the latter passage the form *Jōnās* may be a contraction for *Jōanēs*, or possibly Peter's father had two names, as in the case of *Saul—Paul.* **7.** One of the high-priestly family (Ac 4^{6}). **8.** John Mark (see MARK). **9. 10.** For the Baptist and the Apostle see the following two articles.

JOHN THE APOSTLE

JOHN THE APOSTLE.—The material for a life of St. John may be divided into three parts: (1) The specific information given in the canonical Scriptures; (2) early tradition; (3) later legends, which cannot be accepted as history but possess an interest and significance of their own. But when all the evidence is gathered, it is impossible to give more than fragmentary details of the life of one of the most important figures in the apostolic age.

1. The Scripture data.—John was a son of Zebedee, a fisherman in one of the towns on the Lake of Galilee, possibly Bethsaida. It is probable that his mother was Salome, one of the women who 'ministered' to Jesus in Galilee (Mk 15^{41}), a sister of Mary the mother of Jesus. This may be inferred from a comparison of Mt 27^{56} and Mk 15^{40f} 16^{1} with Jn 19^{25}. His family was in a position to engage hired help (Mk 1^{20}), and to support Jesus' work (Lk 8^{1-3}).

The passage in John is best understood as naming *four* women who stood by the Cross of Jesus—His mother, His mother's sister Salome, Mary wife of Clopas who was also mother of James and Joses, and Mary Magdalene. The interpretation which would find only three persons in the list, and identify Mary 'of Clopas' with the sister of Jesus' mother, is open to the objection that two sisters would have the same name, and it involves other serious difficulties. (See MARY.)

In Jn 1^{40} two disciples are mentioned as having heard the testimony of John the Baptist to Jesus and having accompanied the new Teacher to His home. One of these was Andrew, and it has been surmised that the other was John himself. If this was so, the incident must be understood as constituting the very beginning of John's discipleship.

In Mt 4^{18-22}, Mk 1^{16-20} an account is given in almost the same words of the call of four fishermen to follow Jesus. Two of these were John and his elder brother James, who were with their father in a boat on the Lake of Galilee, mending their nets. In Lk 5^{1-11} a different account of the call is given. Nothing is said of Andrew; Peter is the principal figure in the scene of the miraculous draught of fishes, while James and John are mentioned only incidentally as 'partners with Simon.' Presumably Luke has omitted the Marcan account in favour of his own (possibly derived from his special source, L), but has added to it the details which identify the other disciples who were called at the same time. His narrative has by some scholars been identified with the nucleus of the tradition in Jn 21^{1-14}. Directly or indirectly, however, we are told that to John, whilst engaged in his craft, the summons was given to leave his occupation and become a 'fisher of men.' The call was immediately obeyed, and constitutes an intermediate link between the initial stage of discipleship and the appointment to be one of twelve 'apostles.' In the lists of the Twelve (Mt 10^{2}, Mk 3^{14}, Lk 6^{13}, Ac 1^{13}), John is always named as one of the first four, and in the course of Christ's ministry he was one of an inner circle of three, who were honoured with special marks of confidence. These alone were permitted to be present on three occasions—the raising of Jairus' daughter, narrated in Mk 5^{37}, Lk 8^{51}; the Transfiguration, described in three accounts (Mt 17^{1}, Mk 9^{2}, Lk 9^{28}); and the Agony in the Garden of Gethsemane (Mt 26^{37}, Mk 14^{33}, Lk 22^{24}). On one or perhaps two occasions Andrew was associated with these three—possibly at the healing of Peter's wife's mother (Mk 1^{29}), and certainly at the interview described in Mk 13^{3}, when Jesus sat on the Mount of Olives and was 'asked privately' concerning His prediction of the overthrow of the Temple.

On two notable occasions the brothers James and John were associated together. They appear to have been alike in natural temperament. It is in this light that the statement of Mk 3^{17} is generally understood—'whom he surnamed **Boanerges**, that is, sons of thunder.' Some uncertainty attaches to the derivation of the word, and the note added by the Evangelist is not perfectly clear. But no better explanation has been given than that the title alluded to the zeal and vehemence of character which both the Apostles exhibited on the occasions when they appear together. In Lk 9^{54} they wish to call down fire from heaven and consume the Samaritan village which had refused hospitality to their Master. In Mk 10^{35} they come to Him with an eager request that to them might be allotted the two highest places in His Kingdom, and they profess their complete readiness to share with Him whatever suffering He may be called to pass through. According to Mt 20^{20}, their mother accompanied them and made the request, but v.^{24} shows that indignation was roused 'at the two brothers,' and that the petition was really their own. Once in the Gospels John is described as associated with Peter, the two being sent by Jesus to make ready the Passover (Lk 22^{8}). Once he figures by himself alone, as making inquiry concerning a man who cast out demons in the name of Jesus, though he did not belong to the company of the disciples (Mk 9^{38}, Lk 9^{49}). As an indication of character this is to be understood as evincing zealous, if mistaken, loyalty. Jesus' reply was, 'Do not forbid him'; evidently John was disposed to manifest on this occasion the fiery intolerant zeal which he and his brother together displayed in Samaria. Though the words 'You do not know what manner of spirit you are of' do not form part of the best attested text in Lk 9^{55}, they doubtless describe the kind of rebuke with which on both occasions the Master found it necessary to check the eagerness of a disciple who loved his Master well, but not wisely.

In the early part of the Acts, John is associated by name with Peter on three occasions. One was the healing of the lame man by the Temple gate (3^{4}). The next was their appearance before the Sanhedrin in ch. 4, when they were found to be men untrained in scribal teaching, 'uneducated, common men' (v.^{13}), and were also recognized by some present as having been personal followers of Jesus, and seen in His immediate company. In 8^{14ff} we read that the two were sent by their brother-Apostles to Samaria, after Philip had exercised his evangelistic ministry there. Many of the Samaritans had been baptized, and the two 'prayed for them that they might receive the Holy Spirit,' and laid their hands on them. These typical instances show that at the outset of the history of the Church Peter and John acted jointly as leaders, though they were very different in personal character, and Peter appears always to have been the spokesman. This note of personal leadership is confirmed by the incidental reference of Paul in Gal 2^{9}, where James (not the son of Zebedee), Cephas, and John are 'reputed to be pillars' in the Church at Jerusalem.

Our knowledge of John's life and character is largely increased, and the interest in his personality is greatly deepened, if he is identified with '*the disciple whom Jesus loved*,' the author of the Fourth Gospel, and the John of the Apocalypse. All three of these identifications are strongly contested in modern times. In Jn 13^{23} the disciple whom Jesus loved 'was lying close to the breast of Jesus' at the Last Supper. The phrase implies that on the chief couch at the meal, holding three persons, Jesus was in the middle and John on His right hand, thus being brought more directly face to face with the Master than Peter, who occupied the left-hand place. This explains the action in v.^{25} as well as Peter's 'beckoning' mentioned in v.^{24}. John has been also identified with the 'other disciple' mentioned in Jn 18^{15f} as known to the high priest and having a right of entrance into the court which was denied to Peter. Again, the disciple whom Jesus loved is described in Jn 19^{26} as standing by the cross of Jesus with His mother, as receiving the sacred charge implied by the words, 'Woman, behold your son!' and 'Behold your mother!' and as thenceforth providing a home for her—who was probably already one of his near kindred as well as the mother of his Lord. In 20^{3} he accompanies Peter to the tomb of Jesus; and while he reached the sepulchre first, Peter was the first to enter in, but John was apparently the

first to 'believe' (v.[8]). In ch. 21 the two sons of Zebedee are among the group of seven disciples to whom our Lord appeared at the Sea of Tiberias, and again the disciple whom Jesus loved and Peter are distinguished; the one as the first to discern the risen Lord upon the shore, the other as the first to plunge into the water to go to Him. The Gospel closes with an account of Peter's inquiry concerning the future of his friend and companion on so many occasions; and in 19[35] as well as in 21[24] it is noted that the disciple 'who has written these things' bore witness of that which he himself had seen, and that his witness is true. But among scholars the probability has steadily grown, during the past fifty years, that the beloved disciple is an idealized figure, not a merely historical one. John is taken to represent the ideal Christian disciple, who responds to Jesus' teaching and signs, and attests the reality of the Incarnation as against the current Docetism and Gnosticism. (See JOHN, GOSPEL OF.)

It is only necessary to add that the John mentioned in Rev 1[4, 9] as writing to the Seven Churches in Asia from the island of Patmos was identified by early tradition with the son of Zebedee. If this be correct, much additional light is cast upon the later life of the Apostle John (see REVELATION, BOOK OF). But again the probability is that the Apocalypse of John is a pseudonymous work, like the Apocalypse of Peter and many other apocalypses in circulation in the early church.

2. Early tradition.—Outside the NT only vague tradition enables us to fill up the gap left by Christ's answer to Peter's question, 'Lord, what about this man?' It has been inferred that he spent several years in Jerusalem. After an indefinite interval he is understood to have settled in Ephesus. Eusebius states (*HE* iii. 18, 20) that during the persecution of Domitian 'the apostle and evangelist John' was banished to Patmos, and that on the accession of Nerva (A.D. 96) he returned from the island and took up his abode in Ephesus, according to 'an ancient Christian tradition' (literally 'the word of the ancients among us'). Tertullian mentions a miraculous deliverance from a cauldron of boiling oil to which John had been condemned during a persecution in Rome, presumably under Domitian. Eusebius further states that John was living in Asia and governing the churches there as late as the reign of Trajan. He bases this assertion upon the evidence of Irenaeus and Clement of Alexandria. The former says that 'all the elders associated with John the disciple of the Lord in Asia bear witness,' and that he remained in Ephesus until the time of Trajan. Clement recites at length the well-known touching incident concerning St. John and the young disciple who fell into evil ways and became the chief of a band of robbers, as having occurred when 'after the tyrant's death he returned from the isle of Patmos to Ephesus.' Tertullian confirms the tradition of a residence in Ephesus by quoting the evidence of the Church of Smyrna that their bishop Polycarp was appointed by John (*de Pr. Haer.* 32). Polycrates, bishop of Ephesus towards the end of the 2nd cent., in a letter to Victor, bishop of Rome, speaks of one among the 'great lights' in Asia—'John, who was both a witness and a teacher, who reclined upon the bosom of the Lord, and, being a priest, wore the sacerdotal plate,' as having fallen asleep at Ephesus. The Muratorian Fragment, which dates about A.D. 180, records an account of the origin of the Fourth Gospel, to the effect that John wrote it in obedience to a special revelation made to himself and Andrew. This story is not elsewhere confirmed, but it shows the early prevalence of the belief in the Apostolic origin of the Gospel. Irenaeus states that the Gospel was written specially to confute unbelievers like the Gnostic Cerinthus, and tells, on the authority of those who had heard it from Polycarp, the familiar story that St. John refused to remain under the same roof with the arch-heretic, lest the building should fall down upon him. Ephesus is said to have been the scene of this incident. All traditions agree that he lived to a great age, and it is Jerome (*in Gal.* vi. 10) who tells of his being carried into the church when unable to walk or preach, and simply repeating the words, 'Little children, love one another'—the language and theme of 1 John. Christ's enigmatical answer to Peter, 'If it is my will that he remain until I come, what is that to you?' led, as Jn 21[23] indicates, to the belief that John would not die, but would be translated.

Still, in spite of the record, the legend lingered for a long time (it is mentioned by Augustine), that though apparently dead, the beloved Apostle was only asleep, and that the dust upon his tomb rose and fell with his breathing. The poet Browning, in his *Death in the Desert*, adopts the ancient tradition concerning the Apostle's great age and lingering death and imagines him recalled from a deep trance and the very borderland of the grave to deliver a last inspired message.

But the belief of the early Church that St. John maintained a prolonged ministry in Ephesus has been widely challenged in modern times. The chief argument against it is the silence of writers who might well be expected to make some reference to it. Polycarp in his letter to the Philippians, and Ignatius in writing to the Ephesians, refer to Paul and his writings, but not to John or his ministry. Clement of Rome, writing about A.D. 96–98 concerning the Apostles and their successors, makes no reference to John as an eminent survivor, but speaks of the Apostolic age as if completely past. If John worked in the province of Asia for a generation, and was still living in the reign of Trajan, it is not unnatural to expect that fuller reference to the fact would be found in the writings of the sub-Apostolic Fathers. This is of course an argument from silence, and the Christian documentary evidence for the later years of the first and the early years of the 2nd cent. is extremely scanty.

Nevertheless, it may be said that the tradition has strong positive attestation. Irenaeus, in a letter to Florinus preserved for us by Eusebius, describes how as a boy he had listened to 'the blessed Polycarp,' and had heard 'the accounts which he gave of his intercourse with John and with the others who had seen the Lord.' And lest his memory should be discredited, he tells his correspondent that he remembers the events of that early time more clearly than those of recent years; 'for what boys learn, growing with their mind, becomes joined with it.' It is incredible that a writer brought so near to the very person of John, and having heard his words through only one intermediary, should have been entirely in error concerning his ministry in Asia. Polycrates, again, a bishop of the city in which St. John had long resided and laboured, wrote of his ministry there after an interval of only two or three generations (to *c* A.D. 190). His testimony obviously is not that of himself alone, but must represent that of the whole Ephesian Church; and what Irenaeus remembered as a boy others of the same generation must have remembered according to their opportunities of knowledge. The explicit testimony of three writers like Polycrates, Irenaeus, and Clement of Alexandria carries with it the implicit testimony of a whole generation of Christians extending over a very wide geographical area. The silence of others notwithstanding, it is hardly credible that these should have been mistaken on a matter of so much importance. It must be noted however that this evidence does not carry with it the Johannine authorship of the Fourth Gospel, the three epistles, or the Apocalypse. The once-popular theory that confusion had arisen between John the Apostle and a certain 'John the Elder' was sufficiently refuted in 1901 by Theodor Zahn in his famous article in the *Realencyklopädie für Protestantische Theologie und Kirche*, ix, especially pp. 282–284.

3. Later traditions.—It is only, however, as regards the main facts of history that the testimony of the 2nd cent. may be thus confidently relied on. Stories of doubtful authenticity would gather round an honoured name in a far shorter period than seventy or eighty years. Some of these legends may well be true, others

probably contain an element of truth, whilst others are the result of mistake or the product of pious imagination. They are valuable chiefly as showing the directions in which tradition travelled and we need not draw on any of the interesting tales of later days in order to form a judgment on the person and character of John the Apostle.

The paucity of historical and biographical information about the Apostle John is not greater than that about many another religious leader in the ancient world and in the early church. In fact, the data for the life of John are far more numerous than for most of the other apostles. It was characteristic of early Christianity that it was not a literary, political, or philosophical movement, and, in view of its strong eschatological expectation, made little effort to preserve the records of its earliest leaders. But enough information survives to enable us to characterize John as an ardent, devoted disciple, rash and excitable in youth but becoming more calm and firm in later years, and a constant preacher of that gospel of love which he had learned from Jesus.

W. T. D.—F. C. G.

JOHN THE BAPTIST.—The narrative of John's birth and circumcision (Lk 1) probably originated in the circle of his followers, independently of the narratives of the birth of Jesus in relation to which it now stands. Like Isaac, he was born to aged parents (v.[7]) as the child of promise (v.[13]). His name, John ('the Lord is gracious'), and his designation as a charismatic (vv.[15–17]), comparable to Nazirites such as Samson and Samuel in early Israel, show that the redeeming action of God for which faithful Israelites longed was felt to have begun in him. He was of priestly stock (v.[5]), and while apparently still a boy, he went into the Judaean wilderness facing the Dead Sea (v.[80]), the *ʿărābhāh* of Is 40[3]. As a preacher of repentance he came out of the desert wearing a camel's hair mantle with 'leather girdle' and eating 'locusts and wild honey' (Mk 1[6]). As an Elijah-like prophet he practised the simplicities of the desert (Lk 1[17]) perhaps as signs of his separation and of his message.

The publication and interpretation of the Dead Sea Scrolls (q.v.) and the excavation of the sites at Qumrân have resulted in a growing consensus that there were close relationships between the sect of the Scrolls, probably Essenes, and John the Baptist. The affinities of the sect were with the Temple cultus and the priesthood. Its members dwelt apart in the Judaean wilderness, considering Israel under the Jerusalem priesthood as the realm of Belial; and in such epithets as 'sea serpents' and 'dust crawlers' (1 *QH* v. 27) matched John's description of the multitude as the 'brood of vipers' (Lk 3[7]). The community at Qumrân was a community of preparation, and, like John, defined the will of God in ethical terms. However, the Baptist's ministry of repentance was for the preparation of all Israel, and there is no evidence that he lived in a community. Ritual ablutions with water, symbolizing moral cleansing, were on the increase in the Temple at the beginning of the Christian era; the evidence indicates that this tendency was even farther advanced at Qumrân. But aside from these reported washings there may also have been a baptism for initiants which was, like John's, a once-for-all rite of admission (1 *QS* v. 13 f). The Dead Sea group practised the 'adoption' of youths for instruction, and the closeness of the similarities has led some scholars to believe that John was one of these, and that he may have spent his youth as a novice of the community, later separating from it. But this is of course only a hypothesis.

In the wilderness 'the word of God came to John' (Lk 3[2]). John was the last of the prophets; he prepared the way for the final coming of God. In the Synoptics one can perceive a tendency to equate him with the expected Elijah (Mt 11[14] 17[10–12], Lk 1[17]). In the Fourth Gospel (1[19–22]) he is simply the 'voice' of Is 40[3] and denies identity with either Elijah or the Messiah.

John's preaching was prophetic in its pronouncement of judgment against the Jewish community because of its moral delinquency. The Synoptic Gospels (Mt 3[1–12], Mk 1[1–8], Lk 3[1–20]) tell of the stirring effects of his preaching in ever-widening circles (Mt 3[15]), and give a summary of his message. It is probable that, in the course of his successful six months' ministry, John moved northwards along the then more thickly populated valley of the Jordan, proclaiming the coming of the Kingdom to the crowds that flocked to hear him from 'all the region about the Jordan' (Lk 3[3]); once at least (Jn 10[40]) he crossed the river (cf G. Dalman, *Sacred Sites and Ways* (1935), pp. 87–93; and see BETHANY, SALIM). Like the great prophets, John insisted that sincere repentance was the only adequate preparation for the imminent advent. Descent from Abraham by itself was meaningless (Lk 3[8]). Responsibility for the poor, honesty, and humaneness (Lk 3[10–14]) were among the ways in which sincerity of repentance might be expressed. The axe was already 'laid to the root of the trees' (Lk 3[9]); but those bringing forth the fruits of repentance would be spared. Whereas the 'trees of the forest' are often a simile for the Gentiles, fruit trees, as here, refer to the children of Israel; the imminent judgment will separate the complacent from the penitent. The 'threshing floor' (Lk 3[17]) scene, with its separation of wheat from chaff, which has a long history of development as a metaphor for the last judgment (Is 41[15], Jer 51[33], 2 Es 4[30, 38–39]), is also employed of a Divine sifting in the house of Israel. The burning of the chaff, not an agricultural practice in the holy land, further strikes the eschatological note (Lk 3[15–18]) in the Baptist's message.

The baptism of John, administered to all who responded to his preaching, was 'a baptism of repentance for the forgiveness of sins' (Mk 1[4]). It was the initiation rite of a gathering messianic community awaiting the baptism 'with the Holy Spirit' (Lk 3[16]). The antecedents for John's baptism can all be found in Jewish religious practice. Like the 'proselyte baptism' for converts to Judaism, it admitted its recipients to a new community, a fellowship of repentance announcing and awaiting the coming of God. Like the rites of the scapegoat and the sprinkling of blood on the Jewish Day of Atonement (Lv 16; cf the Tractate *Yoma* in the Mishnah), its purpose was the forgiveness of sins. However, as in the rites of Atonement, this forgiveness is conditional upon true repentance, and, for John, would be made effective by the messianic advent. It was neither a rite of individual regeneration of the type found among the later Mandaeans or other Gnostic sects (cf C. H. Kraeling, *John the Baptist*, pp. 106 ff), nor one that simply marked a certain degree of individual moral and ethical achievement in those who received it, as Josephus implies (*Ant.* XVIII. v. 2 [117]). John's baptism, like his preaching, was preparatory. It was communal rather than individual and its context was eschatological. In the OT the metaphor of washing with water was symbolic both of man's repentance and reformation and of the divine cleansing in forgiveness (Is 1[15f], Ezk 36[25], Jer 2[22] 4[14], Zec 13[1]).

Jesus also was baptized by John (Mt 3[13ff], Mk 1[9ff], Lk 3[21f]), though He did not come confessing sin as did all other men (Mt 3[6]). The Baptist intimates that, as a sign of repentance, His baptism was superfluous for Jesus (Lk 3[14]); but in insisting upon it Jesus endorses the ministry and community of John as the true form of eschatological preparation. The act marked Jesus' consecration to His messianic work and His identification of Himself with sinners. At His baptism Jesus received the Holy Spirit as a sign that in Him the community of realization suspended John's community of preparation. Jesus was the one 'mightier' (Mk 1[7]) who would baptize with the Holy Spirit and with fire (Lk 3[16]). Whereas John's baptism was a sign of moral cleansing, the waters of Christ's baptism would be a vivifying flood bearing God's redemption (cf Is 44[3], Ezk 47[7ff]).

The Synoptic narrative of the imprisonment and murder of John yields incidental evidence of his greatness as a prophet. There were some who accounted for the

mighty works of Jesus by saying, 'John the baptizer has been raised from the dead' (Mk 6[14]).

Josephus (*Ant. loc. cit.*) makes the preaching of John the cause of his execution and says nothing of his reproof of Antipas for his adultery with his brother's wife (Mk 6[18]). But he may well have deleted the matter for prudential reasons, just as he seeks to avoid adding to the reputation of the Jews for tumultuousness by presenting the Baptist as a preacher of ethical reform rather than of eschatological preparation. While Herod's fear of political trouble was a real factor in his imprisonment of John, as Josephus intimates, it is not at all unlikely that, as the evangelists report, the Baptist had incurred the personal resentment of Herod and, especially, of Herodias, his brother Philip's wife.

The last mention of John in the Gospels (Mt 21[26], Mk 11[32], Lk 20[6]) shows that Herod had good cause to fear the popular temper. John's influence must have been permanent as well as widespread when the chief priests were afraid of being stoned if they slighted him. After the transfiguration our Lord alluded to the sufferings of John, as He endeavoured to teach His disciples the lesson of His cross: 'I tell you that Elijah has come, and they did to him whatever they pleased' (Mk 9[13]).

J. C. R.

JOHN, EPISTLES OF.—The three Epistles known by this name have usually, and certainly from the 2nd cent., been attributed to the Apostle John, and were recognized as canonical in the 3rd cent. Their obvious similarity in style and diction indicates a close relation between them, but their internal character and the external evidence in their favour are so different that it will be better to deal with them separately.

I. First Epistle.—**1. Authorship.**—The Epistle ranked from the first among the *Homologoumena*, and the testimony in favour of its authenticity is early, varied, and explicit. Its great similarity to the Fourth Gospel in phraseology and general characteristics made it natural to attribute the two documents to the same author; and few questions, or none, were raised upon the subject in the early Church.

(1) So far as *external evidence* is concerned, Polycarp, writing about A.D. 115 to the Philippians, quotes the words, 'For whosoever does not confess that Jesus Christ is come in the flesh is antichrist,' with evident allusion to 1 Jn 4[3], though the author is not named. Polycarp was a disciple of John, as his own disciple Irenaeus informs us. Eusebius several times refers to this Epistle, saying (*HE* v. 20) that Papias used it and (v. 8) that Irenaeus made free use of it. The passages 1 Jn 2[18] and 5[1] are expressly attributed by Irenaeus to the Apostle. According to the Muratorian Canon (lines 26–34), Epistle and Gospel were closely associated: 'What wonder that John makes so many references to the Fourth Gospel in his Epistle, saying of himself'—and then follows a quotation of 1 Jn 1[1]. Clement of Alexandria at the close of the 2nd cent. quotes 5[16] as the words of 'John in his larger Epistle.' Tertullian quotes the language of 1[1] as that of the Apostle John, and Origen definitely refers the words of 3[8] to 'John in his catholic Epistle.' All the ancient versions include the Epistle among those canonically recognized, including the Peshitta and the Old Latin. The only exceptions to this practically universal recognition of its genuineness and authenticity are the group in Asia Minor, *c* A.D. 170, vaguely called *Alogi*, because they rejected the doctrine of the Logos, and Marcion, who accepted no books of NT except the Gospel of Luke, drastically revised, and the Epistles of Paul.

(2) The *similarity of diction and ideas* between Gospel and Epistle is so close that it cannot be accidental, and it cannot escape the notice of the most superficial reader.

(*a*) The repeated use, in a characteristic way, of such cardinal words as Life, Love, Truth, Light, and Darkness; the recurrence of phrases which in both documents figure as watchwords—'to be of the truth,' 'of the devil,' 'of the world'; 'the only begotten Son,' 'the Word,' 'knowing God,' 'walking in the light,' 'overcoming the world,' and the special use of the word 'believe,' speak for themselves. The use of literary parallels always requires care; but in this case the similarity is so close as incontestably to establish a connexion between the two documents, whilst the handling of the same vocabulary is so free as irresistibly to suggest, not that the writer of the Gospel borrowed from the Epistle, or vice versa, but that the two writings proceed from the same hand or circle, though which came first is uncertain.

(*b*) Moreover, the theological ideas are much the same, with only slight shades of difference, for example the eternal relation subsisting between the Father and the Son, the sending of the Son into the world by the Father, and His Incarnation and complete identification with human nature ('flesh'); the symbolic or mystical significance of the Water and the Blood (of Christ); Christ the Revealer of God and of Himself as the Son of God, one with the Father, not only Divine but 'God,' the Saviour of the world; also the Spirit of Truth, the Paraclete, the Counsellor or Helper; the great triad of concepts, viewed almost as hypostases, viz. Life, Light, and Love; the sharp, almost dualistic, distinction between God and the world, and the quasi-gnostic view of the latter; the judgment upon the world; the overcoming of the world; the conflict between God and the devil, 'the evil one'; the further dualism—or at least strong contrast—between love and hate, light and darkness, life and death, truth and lies (contrasts often emphasized in ancient religious literature); the devil portrayed as a liar and a murderer.

Turning from these theological and cosmological conceptions there are the more purely religious: believers are *born of God*, or are *from God*, or from or of *the Truth*; they dwell or abide or remain in God, either the Father or the Son; at the same time God dwells in them, *i.e. in us*; they (*i.e.* we) possess the knowledge of God—a point of great importance in view of the growing Gnostic crisis with its newly advanced view of salvation by supernatural knowledge in lieu of either simple obedience to the will of God or by means of divine grace, as in the earlier *kērygma*; the conception of 'doing' the truth; the new commandment which is at the same time the old and original one, 'from the beginning'; the idea of keeping or obeying the commandments or 'walking' in the truth, *i.e.* following the example of Christ. Still other common ideas could be listed; these are enough to show the vast area of agreement.

At the same time there are differences. The style of the Epistle is heavier, more repetitive, less varied, and as a rule more authoritative and dogmatic than that of the Gospel. Moreover, the Epistle contains a number of ideas that are lacking in the Gospel: that of *koinōnia*, fellowship, the close relation between love for God and love for the brethren, and the connexion of knowledge of God with obedience to God; the stronger emphasis on moral conduct; the stress upon expiation and purification through Christ or His blood; the forgiveness of sins, and the limitation set on forgiveness; the attitude of Christians to sins, and the spirit of boldness; the concepts of the Parousia and the Antichrist, and the firm opposition to false teachers. These may be accounted for by the practical aim of the Epistle; the actual milieu may be the same as that in which the Gospel was written or appeared.

At the same time there are ideas fundamental to the Gospel which are lacking in the Epistle: the idea of the Logos (though see 1[1]); the Resurrection (in the full sense of the *Anastasis*); and the Glory (Doxa) of a heavenly being or a heavenly existence. Moreover, there are certain words common to the gospel tradition which do not appear in the Johannine epistles: be raised, rise again, Kingdom (of God), destroy, save, judge, Judgment, minister, Son of Man—words and concepts which are characteristic of the evangelic style and of the traditional *kērygma* of the Christian faith. Equally striking is the absence from the epistles of any

JOHN, EPISTLES OF

quotation from the OT—though there are echoes (*e.g.* the extraordinary one in 2^{14} from Pr 20^{29}).

The opening words of the First Epistle inescapably remind the reader of the opening of the Gospel with its 'hymn' celebrating the Logos. One may view it as likewise poetry, interpolated or supplemented with comments:

> 'That which was from the beginning,
> Which we have heard,
> Which we have seen with our eyes,
> Which we have looked upon—

and [even] touched with our hands!—[it is] concerning the Word of Life [that we are writing you, for] the life was made manifest, and we saw it, and testify to it, and proclaim to you the eternal life which was with the Father and was made manifest to us—that which we have seen and heard we proclaim also to you, so that you may have fellowship with us; and our fellowship is with the Father and His Son Jesus Christ' (1^{1-3}). This is more than an echo of Jn 1^{1-14}; it is coin of the same mintage and standard.

As in the case of the Gospel, much of the exegesis and interpretation since the 18th cent. has been devoted to argumentation over questions of date, locality, and authorship. But the most important questions have to do with the character and purpose of the Epistle. The author's handling of Gnosticism, Docetism, and his identification of the heretics with Antichrist (2^{18}) make it very unlikely that John the son of Zebedee could have been the author. His self-designation as 'the elder' in Epistles 2 and 3 seems to many modern scholars wholly incompatible with apostleship.

The chief ground of the objections raised against the Johannine authorship of the First Epistle has been the alleged references to heretical modes of thought which belong to a later age. Docetism, Gnosticism, and even Montanism are, it is said, directly or indirectly rebuked, and these forms of error do not belong to the Apostolic period. The reply was threefold. (*a*) Those who ascribe the Epistle to John the Apostle do not date it before the last decade of the 1st cent., when the Apostolic age was passing into the sub-Apostolic. (*b*) No references to full-grown Gnosticism and other errors as they were known in the middle of the 2nd cent. can here be found. But (*c*) it can be shown from other sources that the germs of these heresies, the general tendencies which resulted afterwards in fully developed systems, existed in the Church for at least a generation before the period in question, and at the time named were both rife and mischievous.

The main points at issue are: the doctrine of the Logos; the form of the rebuke given to the antichrists; the references to 'knowledge' and 'anointing'; the insistence upon the coming of Christ in the flesh, in condemnation of Docetic error; the distinction between mortal and venial sins; and some minor objections. But none of these is definite or explicit enough to require a date very much later than A.D. 100. The Epistle is indeed indirectly polemic in its character. While constructive in thought, the passing references made in it to opponents of the truth are strong enough to make it clear that the opposition was active and dangerous. But there is nothing to show that any of those condemned as enemies of Christ had more fully developed tendencies than, for example, Cerinthus is known to have manifested in his Christology at the end of the 1st cent. Jewish or at least Judaizing Gnosticism had appeared much earlier than this, as is evidenced by the Epistles to the Colossians and the Pastoral Epistles. In fact the Jewish origin of Gnosticism is now stressed by interpreters—as it was by the Church Fathers. The use of the words 'Paraclete' (2^{1}) and 'expiation' (2^{2}), and the way in which the coming of Christ is mentioned in 2^{28}, have also been brought forward as proofs of divergence from the teaching of the Gospel, on very slender and unconvincing grounds.

2. Place and Date.—Whilst very little evidence is forthcoming to enable us to fix exactly either of these, the general consensus of ancient testimony points very decidedly to Ephesus during the last few years of the 1st cent. Irenaeus (*adv. Haer.* iii. 1) testifies to the production of the Gospel by St. John during his residence in Asia; presumably the author of the Epistles, even if he was not identical with the author of the Gospel, lived there also. But we have no positive evidence as to the place of writing. Some scholars now suspect that the Gospel and the Epistles were all written in Egypt (see JOHN, GOSPEL OF).

3. Form and Destination.—This document has some of the characteristics of a letter, and in some respects it is more like a theological treatise or homiletical essay. It may perhaps best be described as an Encyclical or Pastoral Epistle. It was addressed to a circle of readers, as is shown by the words, 'I am writing to you,' 'beloved,' and 'little children,' but it was not restricted to any particular church, nor does it contain any specific personal messages. The term 'catholic epistle' was used from very early times to indicate this form of composition, but in all probability the author had specific churches in mind. A reference in Augustine to 3^{2} as taken from John's 'Epistle to the Parthians' has given rise to much conjecture, but the title has seldom been taken seriously in its literal meaning. It is quite possible that there is some mistake in the text of the passage (*Quaest. Evang.* ii. 39).

4. Outline and Contents.—Whether Gospel or Epistle was written first, the relation between the two is perfectly clear. The author of the Gospel aims to show that the foundations of Christian faith and doctrine have a historical foundation, in the life of Jesus; the author of the First Epistle traces the consequences of Christian belief in Christian practice. In both writings the same great central truths are exhibited, in the same form and almost in the same words; but in the Gospel they are traced to their fount and origin; in the Epistle they are followed out to their necessary results in the spirit and conduct of Christians in the world. 'The substance of the Gospel is a commentary on the Epistle; the Epistle is (so to speak) the condensed moral and practical application of the Gospel' (Bp. Westcott).

The style is simple, but baffling in its very simpilcity. The sentences are easy for a child to read, their meaning is difficult for a wise man fully to analyse. So with the sequence of thought. Each statement follows very naturally upon the preceding, but when the relation of paragraphs is to be explained, and the plan or structure of the whole composition is to be described, systematization becomes difficult, if not impossible. Logical analysis is not, however, always the best mode of exposition, and if the writer has not consciously mapped out into exact subdivisions the ground he covers, he follows out to their issues two or three leading thoughts which he keeps consistently in view throughout. The theme is fellowship with the Father and the Son, realised in love of the brethren.

The Epistle may be outlined as follows:—

Theme and purpose of the Epistle (1^{1-4}).

I. The true faith contrasted with the false (1^{5}–2^{27}).

(*a*) The true Christian faith and its evidences (1^{5}–2^{17}). First criterion: the state of forgiveness (1^{5}–2^{2}). Second criterion: obedience (2^{3-6}). Third criterion: love (2^{7-11}).

A rhapsody on forgiveness (2^{12-14}).

'Love not the world'—which is passing away (2^{15-17}).

(*b*) The false teaching which threatens the church (2^{18-27}). The prediction of the Antichrist is being fulfilled (2^{18-20}). The Truth versus the Lie (2^{21-27}).

II. The life of the Church during the interval before the Judgment (2^{28}–4^{21}). Loyalty to Christ, who is about to appear (2^{28}–3^{3}).

(*a*) The test of true righteousness, and the safeguard against sin (3^{4-12}). The Christian brotherhood in a malevolent world (3^{13-18}). Christian certainty in evil times (3^{19-24}).

(*b*) The test of true inspiration (4$^{1-6}$).
(*c*) The test of brotherly love (4$^{7-21}$).

III. The assurance of victory (5$^{1-21}$). The mutual support of faith and love (5$^{1-13}$). The assurance of answer to prayer (5$^{14-17}$). The ultimate basis of certainty (5$^{18-21}$).

The writer does not, as has been asserted, 'ramble without method,' nor is the Epistle a 'shapeless mass.' The Epistle—or homily—is not rigidly analytical in arrangement, nor does it move forward: as in many sermons, including the discourses in the Fourth Gospel, the principle of arrangement is that of 'concentric circles' or rather a continuous spiral, returning upon itself and repeatedly echoing, reconsidering, or re-emphasizing the same truths. The author is no dreamer; more practical instruction is not to be found anywhere in the NT. But his exhortations are not detailed: he is concerned with principles of conduct, the minute application of which he leaves to the individual conscience. The enunciation of principles, however, is uncompromising and very searching. His standpoint is that of the ideal Christian life, not of the effort to attain it. One who is born of God 'cannot sin'; the 'love of God is perfected' in the believer, and perfect love casts out fear. The assured tone of the Epistle allows no room for doubt or hesitation or conflict; one who is guided by its teaching has no need to pray, 'Help thou my unbelief.' The spirit of truth and the spirit of error are in sharp antagonism, and the touchstone which distinguishes them must be resolutely applied. The 'world,' the 'evil one,' and 'antichrist' are to be repelled absolutely and to the uttermost: the writer and those whom he represents can say, 'We know that we are of God, and the whole world in the power of the evil one' (5^{19}). Bright light casts deep shadows, and the true Christian of the Epistle walks in the blaze of gospel day. One who knows the true God and has eternal life cannot but 'guard himself from idols.' This is the key to his 'perfectionism.'

The writer of such an Epistle is appropriately called the Apostle of love. Yet the title taken by itself is misleading. He is the Apostle equally of righteousness and of faith. He 'loved well because he hated—hated the wickedness which hinders loving.' There is a stern ring, implying however no harshness, about the very exhortations to love, which shows how indissolubly it is to be identified with immutable and inviolable righteousness. If to this Epistle we owe the great utterance, 'God is Love'—here twice repeated (4$^{8, 16}$), but found nowhere else in Scripture—to it we owe also the sublime declaration, 'God is Light and in him is no darkness at all' (1^{5}). The Epistle, like the Gospel, makes it abundantly clear that the spring of Christian love and the secret of Christian victory over evil are alike to be found in 'believing': in the immovable and ineradicable faith that Jesus Christ, the Son of God, has come in the flesh, and that in Him the love of God to man is so manifested and assured that those who trust Him already possess eternal life, together with all that it implies of strength and joy, and all that flows from it of obedience and loving service.

Textual questions can hardly be touched upon in this article. But it is perhaps worth pointing out that whilst the corrected text restores the latter half of 2^{23}, which in AV is printed in italics as doubtful, there can now be no question that the passage (5^{7f}) referring to the three witnesses in heaven, as read in AV, does not form part of the Epistle. The words are wanting in all Greek MSS except a few of exceedingly late date; nor are they found in the majority of the Greek Fathers, or in any ancient version except the Latin. They undoubtedly form a gloss which found its way into the text from Latin sources, presumably introduced by 4th cent. Spanish Priscillianists; and the insertion really breaks the connexion of thought in the paragraph.

II. The Second Epistle.—The Second and Third Epistles of St. John are distinguished from the First by their brevity, the absence of dogmatic teaching, and their private and personal character. They are found among the *Antilegomena* of the early Church in their relation to the Canon; apparently not because they were unknown, or because their authorship was questioned, but because their nature made them unsuitable for use in the public worship of the Church. The Muratorian Canon (A.D. 180) refers to two Epistles of John as received in the Catholic Church, and Irenaeus about the same date specifically quotes 2 Jn 10^{f} as coming from 'John the disciple of the Lord.' He also quotes v.^{7} apparently as occurring in the First Epistle. Clement of Alexandria by a mention of John's 'larger Epistle' shows that he was acquainted with at least one other shorter letter. Origen states that the two shorter letters were not accepted by all as genuine, but he adds that 'both together do not contain a hundred lines.' Dionysius of Alexandria appeals to them, adding that John's name was not affixed to them, but that they were signed 'the presbyter.' They are omitted from the Peshitta Version, and Eusebius describes them as disputed by some, but in the later 4th cent. they were fully acknowledged and received into the Canon. The Second Epistle, therefore, though not universally accepted from the first came in time to be widely recognized as apostolic in date and—presumably—in origin. The similarity in style to the First Epistle is very marked. Jerome among the Fathers, Erasmus at the time of the Reformation, and many modern critics, have ascribed the Epistle to 'John the Presbyter' of Ephesus, but there is no early reference to such a person except the statement of Papias quoted by Eusebius and referred to in a previous article (see John, Gospel of).

Much discussion has arisen concerning the person addressed. The two leading opinions are (1) that the words 'elect lady and her children' are to be understood literally of a Christian matron in Ephesus and her family; and (2) that a church personified, with its constituent members, was intended. Jerome in ancient times took the latter view, and in modern times it has been supported by most scholars. The exhortations given are more suited to a community; 'the children of your elect sister' can be understood only of a sister church; this mode of describing a church personified is not unusual (cf 1 P 5^{13}). On the other hand, it is urged that this mystical interpretation destroys the simplicity and natural meaning of the letter (see especially vv.$^{5, 10}$), that the church being constituted of members, the distinction between the 'lady' and her 'children' would disappear, and that if the lady be a private person of influence the parallel with the form of salutation to another private person in the Third Epistle is complete. This hypothesis still leaves difficulty in the exact interpretation of the words *Eklektē Kyria*. Some would take both these as the proper names of the person addressed; others take the former as her name, so that she would be 'the lady Eklektē,' others would render 'to the elect Kyria,' whilst the majority accept, in spite of its indefiniteness, the translation of AV, RV, and RSV. On the whole, this course is to be preferred, though the view that a church is intended not only is tenable but has much in its favour. The fact that the early churches so often gathered in a house, and that there was so strong a personal and individual element in their community-life, makes the analogy between a primitive church and a large and influential family to be very close (*e.g.* the household of Domitilla at Rome).

It remains only to say that, as in style, so in spirit, the similarity to 1 John is very noticeable. The same emphasis is laid on love, on obedience, on fellowship with the Father and the Son, and the inestimable importance of maintaining and abiding in the truth. The same strong resentment is manifested against deceivers and the Antichrist, and the same intensity of feeling against unbelievers or false teachers (the Docetists, v.^{7}), who are not to be received into the house of a believer, or to have any kindly greeting accorded them. Whether the Epistle was actually addressed to a private person or to a Christian community, it furnishes a most interesting

picture of the life, the faith, and the dangers and temptations of the primitive Christians (presumably in Asia Minor), and it contains wholesome and uncompromising, not harsh and intolerant, exhortation, such as Christian Churches in all ages may well lay to heart.

III. THIRD EPISTLE.—The two shorter Epistles of St. John were called by Jerome 'twin sisters.' They appear to have been recognized together at least from the time of Dionysius of Alexandria, and they are mentioned together by Eusebius (*HE* iii. 25), who refers to the Epistles 'called the second and third of John, whether they belong to the Evangelist or to another person of the same name.' They are found together in the Old Latin Version, are both omitted from the Peshitta, and were included together in the lists of canonical books at the end of the 4th cent. by the Council of Laodicea and the Third Council of Carthage. References to the Third Epistle and quotations from it are naturally very few. It is short, it was written to a private person, it does not discuss doctrine, and its counsels and messages are almost entirely personal. But its close relationship to the Second Epistle is very obvious, and the two form companion pictures of value from the point of view of history; and St. John's Third Epistle, like St. Paul's personal letter to Philemon, is not without use for general edification.

The person to whom it is addressed is quite unknown. The name **Gaius** (Lat. *Caius*) is very common, and three other persons so called are mentioned in NT, viz. Gaius of Corinth (1 Co 1^{14}; cf Ro 16^{23}); Gaius of Derbe (Ac 20^{4}); and Gaius of Macedonia (Ac 19^{29}) (see GAIUS). A bishop of Pergamum, appointed by the Apostle John and mentioned in the *Apostolic Consitutions*, was also called Gaius, and some critics have identified him with the elder's correspondent. This is, however, a mere conjecture, and the letter is addressed, not to a church official, but to a private layman, apparently of some wealth and influence. It is written in a free and natural style, and deals with the case of some of those travelling evangelists who figured so prominently in the primitive Church, and to whom reference is made in the *Didache* and elsewhere. Some of these, perhaps commissioned by the author himself, had visited the church to which Gaius belonged, had been hospitably entertained by him, and helped forward on their journey, probably with material assistance. But **Diotrephes** (q.v.)—an official of the church, perhaps its bishop or a leading elder—who loved power, asserted himself arrogantly, and was disposed to resist the author's authority—perhaps the authority behind the two other epistles. He declined to receive these worthy men who at their own charges were preaching the gospel in the district. He also stirred up feeling against them, and at least threatened to excommunicate any members of the church who entertained them. The evil example of Diotrephes is held up for condemnation, whilst in contrast to him, a certain **Demetrius** (q.v.) is praised, whose reputation in the Church was excellent, who had won the confidence of the elder, and—higher commendation still—had 'testimony from the truth itself' (v.^{12}; cf the language of Jn 21^{24}). Tried by the strictest and most searching test of all, the sterling metal of Demetrius' character rang true. Full information is not given us as to all the circumstances of the case. Perhaps Diotrephes was not wholly to be blamed. It was quite necessary, as the *Didache* shows us, to inquire carefully into the character of these itinerant preachers. Some of them were mercenary in their aims, and the conflict of opinion in this instance may have had some connexion with the current controversies between Jewish and Gentile Christians or between Gnostics or Docetists and the simple Christian believers. But it is the spirit of Diotrephes that is blameworthy, and the little picture here drawn of primitive ecclesiastical communities with their flaws and their excellences, their worthy members and ambitious officers, their generous hosts and kindly helpers, and the absent elder who bears the care of all the churches and is about to pay to this one a visit of fatherly and friendly inspection, is full of interest and instruction.

W. T. D.—F. C. G.

JOHN, GOSPEL OF.—*Introductory.*—The Fourth Gospel is unique among the books of the NT. In its combination of minute historical detail with lofty spiritual teaching, in its testimony to the Person and work of the Lord Jesus Christ, and in the preparation it makes for the foundation of Christian doctrine, it stands alone. Its influence upon the thought and life of the Christian Church has been proportionately deep and far-reaching. It is no disparagement of other inspired Scriptures to say that no other book of the Bible has left such a mark at the same time upon the profoundest Christian thinkers, and upon simple-minded believers at large. At the same time we must recognize that we are not dependent on the Fourth Gospel for the basic historical facts upon which Christianity rests, or for the fundamental doctrines of the Person and work of Christ. The Synoptic Gospels and the Epistles of Paul are more than sufficient to establish the basis of the Christian faith, which on any hypothesis must have spread over a large part of the Roman Empire before this book was written. On any theory of authorship, the document in question is of great significance and value in the history of the Church. Those who do not accept it as historical have still to reckon with the fact of its composition, and to take account of its presence in and influence upon the Church of the 2nd cent.

Hence it is a matter of the very first importance to determine its character and purpose, and the historicity of its underlying traditions. It is rarely maintained, by scholars to-day, that it was the work of an eye-witness, belonging to the innermost circle of Jesus' disciples, who after a long interval wrote a trustworthy record—indeed the most trustworthy record—of what he had heard and seen, superior to the record of any other evangelist, and interpreted through the mellowing medium of half a century of Christian experience and service; nor, on the other hand, is it now viewed as a treatise in speculative theology, cast in the form of an imaginative biography of Jesus, dating from the second or third decade of the 2nd cent., and testifying only to the form which the new religion was then taking under the widely altered circumstances of the developing Church. Instead, it is now more commonly held that although John is the latest of the Gospels, probably coming from a date very late in the 1st or early in the 2nd cent., its value and importance are not to be determined by considerations of date and authorship, but by its total character. There are passages in this Gospel which read like the recollections of an eye-witness, and others which seem impossible to accept as historically credible, 'both because of their inherent improbability, and because they bear the marks of long reflection and meditation upon the earlier tradition' (C. K. Barrett). The only safe affirmations about the Gospel are those made on 'the objective but impersonal ground of its contents.'

Too much of the criticism and exegesis of the Fourth Gospel in the past has been limited to the defence of an early date, or the Johannine authorship, or the 'authenticity' of its historical tradition. Modern criticism now centres in the exposition of the character of the book, its place in ancient religious literature and specifically in early Christian literature, the central purpose of its author, and the type of religious mind or thought which he represents, whether mystical or theological or poetic—and whoever he was, wherever he lived.

According to the generally accepted tradition, extending from the third quarter of the 2nd cent. to the beginning of the 19th, John the Apostle, the son of Zebedee, was held to be the author of the Gospel, the three Epistles that went by his name, and the Apocalypse. This tradition, so far as the Gospel was concerned, was unbroken and almost unchallenged, the one exception being formed by an obscure and doubtful sect, or class

of unbelievers, called Alogi by Epiphanius, who attributed the Gospel and the Apocalypse to Cerinthus ! From the beginning of the 19th cent., however, and especially after the publication of Bretschneider's *Probabilia* in 1820, the traditional belief has often been given up in favour of various hypotheses, *e.g.* that which attributes the Gospel to an Ephesian elder or an Alexandrian Christian philosopher belonging to the first half of the 2nd cent. F. C. Baur of Tübingen, in whose theories of doctrinal development this document held an important place, fixed its date about A.D. 170, but this view has long been given up as untenable. Theodore Keim, who argued strongly against the Johannine authorship, at first adopted the date A.D. 100–115, but afterwards regarded A.D. 130 as more probable.

Since about 1910 the view has steadily gained ground in English-speaking countries that the Gospel belongs not only to a later date than the generation of the Apostles, but to a later milieu. Its whole outlook, and the problems with which it deals, are those of the late 1st or 2nd cent., chiefly the struggle with Docetic Gnosticism. Moreover, its range of thought is far wider than that of the Synoptics, and its affinities are found not only in Judaism but also in Hellenism, in Philo and the Hermetica, in Gnosticism, and even in Mandaism, whose documents are far later in date but contain very old religious language and ideas. Finally, the very structure of the Gospel reflects the thought, discussion, and debate of the Church in a new and different environment (see the Outline, below under 3). For a long time it was held that John supplemented, corrected, or to some extent even supplanted the Synoptic tradition, with which he was of course familiar. But it now appears that his knowledge of the Synoptics was either very slight or unimportant. As P. Gardner-Smith demonstrated in *St John and the Synoptic Gospels* (1938), the author's use of the earlier Gospels was usually confined to incidental or peripheral terms—those which would be used in any telling of the story ; while the thought of the Gospel, *i.e.* its interpretation of the narratives, is wholly different.

1. External Evidence.—It is not questioned that considerably before the close of the 2nd cent. the four Gospels, substantially as we have them, were accepted as authoritative in the Christian Church. This is proved by the testimony of Irenaeus, bishop of Lyons, in Gaul, writing about A.D. 180 ; Theophilus, bishop of Antioch, about A.D. 170 ; Clement, head of the catechetical school in Alexandria, about A.D. 190 ; and Tertullian, the eloquent African Father, who wrote at the end of the century, and who quotes freely from all the Gospels by name. The full and explicit evidence of the Muratorian Canon may also be dated about A.D. 180. Irenaeus assumes the Johannine authorship of the Fourth Gospel as generally accepted and unquestioned. He expressly states that after the publication of the other three Gospels, ' John the disciple of the Lord, who also leaned upon His breast, himself also published the Gospel, while he was dwelling at Ephesus in Asia.' He tells us that he himself when a boy had heard from the lips of Polycarp his reminiscences of ' his familiar intercourse with John and the rest of those that had seen the Lord.' He dwells in mystical fashion upon the significance of the number four, and characterizes the Fourth Gospel as corresponding to the ' flying eagle ' among the living creatures of Ezk 1^{10} and 10^{14}. (The order of these identifications, it may be noted, is that of the writing of the Gospels, as many now hold, viz. Mark, Luke, Matthew, John. John was always recognized as the latest of the four.) Theophilus of Antioch quotes it as follows : ' John says, In the beginning was the Word, and the Word was with God ' (*Aut.* 22). The Muratorian Fragment, which gives a list of the canonical books recognized in the Western Church of the period, ascribes the Fourth Gospel to ' John, one of the disciples,' and whilst recognizing that ' in the single books of the Gospels different principles are taught,' the writer adds that they all alike confirm the faith of believers by their agreement in their teaching about Christ's birth, passion, death, resurrection, and twofold advent. Clement of Alexandria, in handing down ' the tradition of the Elders from the first,' says that ' John, last of all, having observed that the bodily things had been exhibited in the Gospels, exhorted by his friends and inspired by the Spirit, produced a spiritual [=allegorical ?] Gospel ' (Euseb. *HE* vi. 14). Tertullian, among other testimonies, shows his opinion of the authorship and his discrimination of the character of the Gospels by saying, ' Among the Apostles, John and Matthew form the faith within us ; among the companions of the Apostles, Luke and Mark renovate it ' (*adv. Marc.* iv. 2). These views cannot be taken as the considered judgment of later critics and historians ; they represent only the popular homiletical and apologetic use of current Church tradition—as tradition, its value is not inconsiderable. And for some reason, obviously, the Gospel and three Epistles were attributed to the Apostle John, from an early date.

But was this clearly expressed and widespread belief of the Church well based ? First of all it must be said that the personal link supplied by Irenaeus is of itself so important as to be almost conclusive, unless very strong counter-reasons can be alleged. It was impossible that he should be mistaken as to the general drift of Polycarp's teaching, and Polycarp had learned directly from John himself. On the broad issue of John's ministry in Asia and his composition of a Gospel, this testimony is of the first importance. (See the article JOHN THE APOSTLE.) The suggestion that confusion had arisen in his mind between the Apostle and a certain ' Presbyter John ' of Asia is exceedingly unlikely. As Theodor Zahn held, it is only a modern hypothesis for escaping attribution of the Gospel to the Apostle John. At the same time, it cannot be said that Irenaeus's views are infallible. The NT has nothing to say of John's residence in Asia, and the very earliest evidence, in the *Acts of John*, *c* A.D. 150–160, is Gnostic. Evidently the Gnostics were not slow to claim John as one of themselves. The earliest commentary on the Gospel was by Heracleon, a Gnostic.

It is quite true that in the first half of the 2nd cent. the references to the Gospel are neither so direct nor so abundant as might have been expected. The question whether Justin Martyr knew, and recognized, our Gospels as such has been much debated. His references to the Gospel narrative are very numerous, and the coincidences between the form of the records which he quotes and our Gospels are often close and striking, but he mentions no authors' names. In his first *Apol.* ch. 61 (A.D. 155), however, we read, ' For Christ also said, Unless you are born again, you will not enter the kingdom of heaven,' which would appear to imply, though it does not prove, an acquaintance with the Fourth Gospel. Other references to Christ as ' only begotten Son ' and the ' Word ' are suggestive. The modern recovery of Tatian's *Diatessaron* (*c* A.D. 170) makes it certain that that ' harmony ' of the Gospels began with the words, ' In the beginning was the Word,' and that the whole of the Fourth Gospel was interwoven into its substance. The Epistle of Polycarp to the Philippians (before A.D. 120) apparently quotes 1 John in the words, ' For every one who does not acknowledge that Jesus Christ has come in the flesh is antichrist,' but no express citation is made. The Epistles of Ignatius (*c* A.D. 110) apparently show traces of the Fourth Gospel in their references to ' living water,' ' children of light,' Christ as ' the Word ' and as ' the door,' but these are not conclusive. Papias may have known and used this Gospel, as Irenaeus seems to imply (*adv. Haer.* 36) ; and Eusebius distinctly says that he ' used testimonies from the First Epistle of John ' (*HE* iii. 39).

Some of the most noteworthy testimonies to the use of the Gospel in the former part of the 2nd cent. are drawn from heretical writings. It is certain that Heracleon of the Valentinian school of Gnostics knew and quoted the Gospel as a recognized authority, and it would even appear that he wrote an elaborate commentary

on the whole Gospel. Origen quotes him as misapprehending the text, 'No one has seen God at any time.' Hippolytus in his *Refutation of all Heresies* (vi. 30) proves that Valentinus (*c* A.D. 140) quoted Jn 10^{8}, 'The Saviour says, All who came before me are thieves and robbers,' and that Basilides a little earlier made distinct reference to Jn 1^{9}: 'As it is said in the Gospels, The true light that enlightens every man was coming into the world.' Slighter and more doubtful references are found in the *Clementine Homilies* and other heretical writings, and these go at least some way to show that the peculiar phraseology of the Fourth Gospel was known and appealed to as authoritative in the middle of the 2nd cent. Thus it is clear that between A.D. 150–180 four Gospels were recognized in the Church as inspired writings, read in the assemblies, and generally accepted as authoritative. Also that the fourth of these was with practical unanimity—so far as our evidence permits us to say—ascribed to St. John, as written by him in Asia at the very end of the 1st cent. This acceptance included districts as far apart as Syria and Gaul, Alexandria, Carthage, and Rome. The *prima facie* external evidence is undubitably in favour of Johannine authorship.

But does this carry us all the way back to John the Apostle? And by whom was the claim of Johannine authorship asserted? The silence of the rest of the NT, and the vagueness of the attestation at the end of the Appendix (21^{24}), greatly weaken the force of the early patristic testimony. Too many religious books have been written *ad mentem* some revered religious leader or teacher, confident that were he still living this would be what he would say, for us to close our eyes to the possibility of such pseudonymous authorship—which is nevertheless not really pseudonymous, since the author never plainly states that he is John. It is not a case of 'conscious fraud,' as polemical writers used to say. It was a perfectly legitimate and in ancient times a widely practised art of pseudepigraphy—or of anonymity—especially in religious circles; the Bible itself, from the Book of Deuteronomy onward, supplies many examples.

2. Internal Evidence.—There can be no doubt that the Gospel itself claims to have the authority of an eye-witness for many of its statements, and for its general presentation, at least in narrative. The phrase 'We have beheld his glory' (1^{14}) is not decisive, though, taken in connexion with 1 Jn 1^{1-4}, it appears to appeal to first-hand knowledge. There can be no question concerning the general meaning of 19^{35}, though its detailed exegesis presents difficulties. Surely the author is not claiming himself to have been present, but to be quoting the testimony of one who had been present, at the crucifixion of Jesus. In 21^{34} further assurance is given of the accuracy of the disciple who had been an eye-witness of the events. Depending upon the authorship of this verse, either John was the disciple intended, or this was the interpretation placed upon the reference from an early date, presumably from a date almost as early as the Gospel itself. It appears to have been added to the Gospel by others. '*We* know that his witness is true' is probably intended as an endorsement on the part of certain church leaders or others, while the 'I suppose' of v.^{25} may indicate still another hand. In addition to these more or less explicit testimonies, notes are freely introduced throughout the Gospel which come, presumably, from a member of the inner circle of Jesus' disciples, though the writer never mentions his own name—or that of his authority. Instead, he alludes to 'the disciple whom Jesus loved' in such a way that by a process of elimination it may be inferred (from chs. 20–21) that John was intended. It is often assumed that the writer thus delicately but unmistakably claims to be that disciple himself. An ordinary pseudonymous writer does not, as a rule, proceed in this fashion. The authority of an honoured name is sometimes claimed by an unknown author, as in the *Ascension of Isaiah* and the *Apocalypse of Baruch*, not fraudulently but as a literary device to give character to his theme. In this case, however, the indirect suggestion either indicates that the Apostle was the authority upon whom the author of the book relied, or else it points to a claim made by some later writer, who threw his own ideas into the form of a (largely imaginary) narrative. This later writer is supposed, by some interpreters, to have been one of the Apostle's own disciples. Thus viewed, there were three stages in the composition of the Gospel: the oral tradition of the Witness, the writing down of this tradition by the author, the identification of the Witness (or, later, of the author) with the Apostle John.

But even this modified view is difficult to maintain. The character of the work, its divergence from the Synoptic tradition and from that presupposed by St. Paul and other apostolic writers, and the problem of fitting such a representation of Christ's life and teaching into the course of development of early Christian thought, make it almost impossible to maintain to-day. There is no question that the book displays a minute knowledge of details which it would seem must have come from an eye-witness who was intimately acquainted, not only with the places and scenes, but with the persons concerned, their characters and motives. No artistic imagination could have enabled a Christian of the 2nd cent. either to insert the minute topographical and other touches which bespeak the eye-witness, or to invent incidents like those recorded in chs. 4 and 9. On the other hand, there is so much in the Gospel which implies a point of view entirely different from that of Christ's immediate contemporaries, and there are so many divergences from the Synoptics in the description of our Lord's ministry—as regards time, place, the manner of Christ's teaching, and particular incidents recorded—as to make it impossible to ascribe it to the son of Zebedee without a full explanation of serious difficulties and discrepancies. But for these two diverse aspects of the same document, there would be no 'Johannine problem.'

It has been usual, following Bishop Westcott, to arrange the evidence in narrowing circles; to show that the author must have been a Jew, a Palestinian, an eye-witness, one of the Twelve, and lastly the Apostle John. It is impossible, however, to array here all the proofs available. It must suffice to say that a close familiarity with Jewish customs and observances, such as could scarcely have been possessed by anyone in A.D. 120, is shown in the account of the Feast of Tabernacles (ch. 7), the Dedication (10^{22}), the Jews and Samaritans (4^{19f}), conversation with women in public (4^{27}), ceremonial pollution (18^{28}), and other minute touches, each slight in itself, but taken together of great weight. The numerous references to the Messianic hope in chs. 1, 4, 7, 8, and indeed throughout the Gospel, indicate one who was thoroughly acquainted with Jewish views and expectations from within (but cf Justin Martyr, *c* A.D. 150). Familiarity with the Jewish Scriptures and a free but reverent use of them are apparent throughout. The places mentioned are not such as a stranger would or could have introduced into an imaginary narrative. As examples we may mention Bethany beyond Jordan (1^{28}), Aenon (3^{23}), Ephraim (11^{54}), the treasury (8^{20}), the pool of Siloam (9^{7}), Solomon's porch (10^{23}), the Kidron (18^{1}). It is true that difficulties have been raised with regard to some of these, *e.g.* Sychar (4^{5}); but modern exploration has in several instances confirmed the writer's accuracy. Still further verisimilitude is now lent by the contacts in the Dead Sea Scrolls (q.v.) which were discovered in 1947. Again, the habit of the writer is to specify details of time, place, and number which must either indicate exceptional first-hand knowledge, or have been gratuitously inserted by one who wished to convey an impression of 'local colour.' The very hour of the day at which events happened is noted in 1^{39} $4^{6, 52}$ 19^{14}; or 'the early morning' is mentioned, as in 18^{28} 20^{1} 21^{4}; or the night, as in 3^{2} 13^{30}. The exact specification of six water-pots (2^{6}), five husbands (4^{18}), five and twenty furlongs (6^{19}), two hundred cubits

JOHN, GOSPEL OF

(21[8]), and the hundred and fifty-three fishes (21[11]), has been claimed as a further illustration either of an old man's exact reminiscences of events long past or of a later writer's pretended acquaintance with precise details. But, once more, these figures are probably all allegorical, as the commentators have pointed out.

The portraiture of persons and incidents characteristic of the Gospel is noteworthy. The picture is so graphic and the effect is produced by so few strokes, often unexpected, that it must be ascribed either to an eye-witness or to a writer of altogether exceptional genius. The conversations recorded, the scene of the feet-washing, the representation of the Samaritan woman, of the man born blind, the portraiture of Peter, of Pilate, of the priests and the multitude, the questionings of the disciples, the revelation of secret motives and fears, the interpretations of Christ's hidden meanings and difficult sayings—*may*, as an abstract possibility, have been invented. But, again, these are examples of the great literary skill of the writer, who shows Jesus moving about in a world filled with various 'types' of human beings, in fact with 'all sorts and conditions of men'—from the urgent and importunate king's officer to the sceptical Nicodemus, and from the incredulous Pharisees to the cowardly Roman governor. We do not need to inquire, how could the writer have known all these persons. For as in a drama these are the *kinds* of persons of which the world—his world—was full, and who are still with us, everywhere. This fact explains the universalism of John and its undying religious appeal, especially to literary minds. Many writers, *e.g.* Barrett Wendell, have declared John to be their favourite gospel; and so have multitudes of ordinary, non-literary Christians. The author's genius lay in the realm of interpretation; his Christ is the exalted Christ of the Church's faith and worship, not the Galilean prophet of the third decade of the 1st cent. This is what distinguishes the Gospel of John from all apocryphal gospels, ancient and modern, and from all apocryphal additions to the canonical Gospels, whose character is purely fanciful, pedestrian, and unreal.

This characteristic of the author of John is especially evident in his profoundly and sensitively spiritual understanding of the Church's Divine Lord, here pictured as 'walking in Galilee.' His portrayal of Christ might well fill a volume—has in fact filled many volumes, some of them written by mystics and saints. Even the superficial reader will not fail to notice the remarkable combination of lowliness with sublimity, of superhuman dignity with human infirmities and limitations, which characterizes the Fourth Gospel. It is in it that we read of the Saviour's weariness by the well and His thirst upon the Cross, of the personal affection of Jesus for the family at Bethany, and His tender care of His mother in the very hour of His last agony. But it is in the same record that the characteristic 'glory' of His miracles is most fully brought out; in it the loftiest claims are made not only for the Master by a disciple, but by the Lord for Himself—as the Light of the World, the Bread from Heaven, the only true Shepherd of men, Himself the Resurrection and the Life. He is saluted not only by Mary as Rabboni, but by Thomas as 'my Lord and my God.' The writer claims an exceptional and intimate knowledge of Christ. He tells us what He felt, as in 11[33] and 13[21]; the reasons for His actions, as in 6[6]; and he is bold to describe the Lord's secret thoughts and purposes (6[61, 64] 18[4] 19[28]). More than this, in the Prologue to a Gospel which describes the humanity of the Son of Man, He is set forth as the 'only' Son of God, the Word made flesh, the Word who in the beginning was with God and was God, Creator and Sustainer of all that is. This marked characteristic of the Gospel has indeed been made a ground of objection to it. We cannot conceive, it is said, that one who had moved in the circle of the immediate companions of Jesus of Nazareth could have spoken of Him in this fashion. The reply is obvious. What kind of a portrait is actually presented? If it be an entirely incredible picture, an extravagant attempt to portray a moral and spiritual prodigy or monstrosity, an impossible combination of the human and the Divine, then we may well suppose that only a clever imagination has been at work. But if a uniquely impressive Image is set forth in these pages, which has commanded the homage of saints and scholars for centuries, and won the hearts of millions of those simple souls to whom the highest spiritual truths are so often revealed, then it must be recognized that, since 'spiritual things are spiritually discerned,' this author was one who lived so close to the living Lord of the Church that he did not hesitate to project backward upon the screen of past history the grace and power familiar to him from his daily walk with Christ. As B. H. Streeter insisted, the 'I am' sayings probably ought to be reformulated, as the Church's testimony, to read, 'He is . . .', *i.e.* the Bread of Life, the Door of the Sheepfold, the Good Shepherd, the Son who is eternally one with the Father. The author of our Gospel was not a historian, but more a dramatist; and more than a religious dramatist a mystic, who saw no necessity for distinguishing between the actual historical utterances of Jesus of Nazareth and the eternal truths about His Divine person, His revelation of the Father, His voluntary and self-chosen death 'for his own,' and His resurrection and return to heavenly glory.

3. Scope of the Gospel and its Relation to the Synoptics.—It cannot be denied that there are grave difficulties confronting every one of the alternative views which have been described above, including the last. Some of these difficulties were felt as early as the 2nd and 3rd cents., when the simple identification of the author of John with the Apostle, the son of Zebedee, was probably held by all but a very small minority of readers, and they have always been more or less present to the minds of Christians. Others have been more clearly brought out by the debates over the Gospel during the past two centuries. In this section it will be convenient to try to answer the questions, How does this Gospel, if written by the Apostle John, stand related to the other three?, how can the obvious discrepancies be reconciled?, and how far do the writer's object and method and point of view account for the unique character of the narrative he has presented?

It is clear, to begin with, that the plan of the Fourth Gospel differs essentially from that of the Synoptics. This seems to be recognized in the Gospel itself: the author did not undertake to write a biography of Christ, even in the limited sense in which that may be said of Matthew, Mark, and Luke; he selected certain significant parts and aspects of Christ's work, for the purpose of winning or conserving faith in Him, presumably under special difficulties or dangers. We are therefore prepared for a difference in the very framework and structure of the book, and this we assuredly find.

The Fourth Gospel opens with an introduction to which there is no parallel in the NT. The circumstances of Christ's birth and childhood, His baptism and temptation, are entirely passed by. His relation to John the Baptist is dealt with from a later, doctrinal point of view, rather than from that of the chronicler describing events in their historical development. Only typical incidents from the ministry are selected, and only such aspects of these as lend themselves to didactic treatment. It will be convenient here to give a brief outline of the plan and contents of the Gospel.

OUTLINE OF THE GOSPEL OF JOHN

PROLOGUE: The Incarnation of the Word, 1[1–18].

I. Jesus, the Heavenly Messenger: His work in the world, 1[19]–12[50].

A. The testimony of John, the Forerunner, 1[19–34].

B. The call of the first disciples, 1[35–51].

C. The Book of the Seven Signs, chs. 2–12.

Sign I. The marriage feast at Cana, 2[1–12].

The cleansing of the Temple, 2[13–22].

The visit of Nicodemus, 2^{23}–3^{21}.
Jesus and the Baptist, 3^{22-36}.
Jesus and the Samaritans, 4^{1-42}.
Sign II. Healing the nobleman's son, 4^{43-54}.
Sign III. The healing at the Pool of Bethzatha, 5^{1-16}.
The Christological Discourse, 5^{17-47}.
Sign IV. The feeding of the five thousand, 6^{1-13}.
Sign V. Jesus walks on the water, 6^{14-21}.
The Discourse on the Bread of Life, 6^{22-71}.
Jesus at the Feast of Tabernacles, 7^{1}–8^{59}.
Sign VI. Jesus restores a man born blind, 9^{1-41}.
The Shepherd Discourse, 10^{1-21}.
Jesus at the Feast of Dedication, 10^{22-42}.
Sign VII. The raising of Lazarus, 11^{1-46}.
The authorities decide to put Jesus to death, 11^{47-57}.
The anointing at Bethany, 12^{1-11}.
The triumphal entry, 12^{12-19}.
Jesus and the Gentiles, 12^{20-36}.
Conclusion of the Book of the Seven Signs, 12^{37-50}.

II. Jesus, the Heavenly Messenger: His return to the Father, 13^{1}–20^{29}.
A. The Last Supper, 13^{1-30}.
B. Farewell Discourse I, 13^{31}–14^{31}.
Farewell Discourse II, 15^{1}–16^{33}.
The High Priestly Prayer, 17^{1-26}.
C. The death of Jesus, 18^{1}–19^{42}.
D. The resurrection of Jesus, 20^{1-29}.
Conclusion of the Gospel, $20^{30f.}$
An appendix, 21^{1-25}.

The following are some detailed differences of importance. The exact duration of Christ's ministry cannot be determined either by the Synoptic narratives or by St. John's; but it would appear that in the former it might be compressed within the compass of one year, whilst the latter in its mention of Passovers and Festivals would require more than three—though, as Charles Hedrick pointed out, the three Passovers turn out to be a timeless symbol, and are really one. Again, the Synoptic Gospels describe a ministry exercised almost entirely in Galilee up to the closing scenes in Jerusalem; St. John has little to say of Galilee, but he does mention an important visit to Samaria, and narrates at length events and controversies in Jerusalem of which the other Evangelists say nothing. On these points it has been argued that none of the Gospels professes to be complete; that an exact chronological outline can with difficulty be constructed from any of them; and that each gives passing hints of events of which the writer had cognisance, though it does not come within his purpose to describe them. But this is not a satisfactory solution. The whole purpose and ethos of Jesus' ministry is different in John. For example in John He proclaims Himself, and advances the claims made for Him by the early Church; but in the Synoptics His message is the coming Reign of God, and the necessary preparation men must make if they are to enter it.

Minute difficulties of detail cannot be discussed here. But the difference between the Synoptists and St. John with regard to the date of the Last Supper and Christ's death has a special importance of its own. The first three Gospels represent Jesus as partaking of the regular Passover with His disciples, and as being crucified on the 15th of Nisan; St. John describes the Last Supper as on the day of 'preparation,' and the crucifixion as taking place on the 14th Nisan, the great day of the Passover. Various modes of reconciliation have been proposed, turning upon the meaning of the phrase 'eating the Passover' and on the Jewish mode of reckoning days from sunset to sunset. It has been further suggested that the term 'Passover' was applied to the eating of the sacrifice called Chagigah, which was offered on the first Paschal day immediately after the morning service. Others have found a divergent chronology in the Torah, in some of the apocryphal and pseudepigraphical books, and in later traditions; or in the Galilean and Judaean calendars. The explanations offered of the discrepancy are ingenious, and one or other of them may be correct. But it can hardly be said that any has commanded general acceptance among critics, and meanwhile the difference remains. It must not be supposed, however, that this necessarily implies an error on the part of the Fourth Gospel. Many critics contend earnestly that St. John gives the more consistent and intelligible account of the Last Supper, the trial and the death of Jesus in relation to the Jewish festival, and that the phraseology of the Synoptists may be more easily and satisfactorily explained in terms of St. John's narrative than vice versa. One secular historian, A. T. Olmstead, unhesitatingly preferred the whole Johannine Passion Narrative to that in the Synoptics (*i.e.* the Marcan, which is its basis). The objection that the writer of the Fourth Gospel had a dogmatic reason for changing the day and representing Christ as the true Passover Sacrifice offered for the sins of the world, is not borne out by facts. The writer nowhere speaks of Christ as the Paschal Lamb, not even in 19^{36}, 'not a bone of him shall be broken'; and his allusion to the date is too slight and casual to warrant the supposition that he wishes to press home the teaching of 1 Co 5^{7}. Further, if the Synoptic tradition of the date had already been established, it is most unlikely that the writer would have set himself in opposition to it. The dating must therefore have been still open, and not decided in the general tradition, when John was written. It may be said in passing that the argument drawn from the Quartodeciman controversy—whether Christians ought to keep the Passover (*i.e.* Easter) at the same time as the Jews, *i.e.* always on 14th Nisan, whatever day of the week it might be, or always on Sunday as the first day of the week, on whatever day of the month it might fall—cannot legitimately be made to tell against the historicity of the Fourth Gospel. The controversy concerned the relation between Christians and Jews as such, rather than the exact date of Christ's death and its meaning as a Passover sacrifice. But it shows the indecisive state of the tradition even in the middle of the 2nd cent.

We reach the centre of difficulty, however, when we try to understand the marked difference between the body of the Synoptic narrative on the one hand and St. John's on the other. St. John's omissions are striking. He never refers to the miraculous birth of Christ; he gives no account of the Transfiguration, the institution of the Eucharist, or the Agony in the Garden; a large number of miracles are not described, nor is their occurrence hinted at; no parables are recorded, though the Synoptics make them a chief feature of Christ's teaching, and the very word for 'parable' in its strict sense does not occur in the book. On the other hand, his additions are notable. How is it that the Synoptists have nothing to say of the changing of Water into Wine, of the Feet-washing, and especially of the Raising of Lazarus? Is it conceivable that if such a miracle was actually worked it could have had no place in any of the great traditional accounts of His ministry? Certainly if it had led to Jesus' crucifixion ($11^{53, 57}$), it could not have been omitted by the Synoptics! Are we to understand that the Synoptists are correct when they place the Cleansing of the Temple at the end of Christ's ministry, or St. John when he describes it at the beginning? Other apparent discrepancies are of less importance. They concern the Anointing of Jn 12 as compared with the narratives of Mt 26, Mk 14, and Lk 7; the accounts of the trial of Jesus given in the Synoptics in their relation to that of John; and the appearances of the Lord after His Resurrection as recorded by St. John in the 20th and 21st chapters.

Further, even the superficial reader must be struck by the different representations of Christ's ministry in its main features. The Synoptic Gospels do not contain the long discourses which are reported in St. John,

always couched in a peculiar and characteristic diction, nor do they mention the frequent controversies with '**the Jews,**' who are represented in the Fourth Gospel as frequently interrupting Christ's addresses with questions and objections to which the Synoptists present no parallel. The very mention of 'the Jews,' so often and so unfavourably referred to, is, it is said, a sign of a later hand. The writer of the Fourth Gospel uses the same somewhat peculiar style, whether he is reporting Christ's words or adding his own comments, and it is sometimes difficult to distinguish between the two. In doctrine also, it is contended, there are irreconcilable differences between the first three Evangelists and the Fourth. Judgment is viewed by the Synoptists as a great eschatological event in the future, but by St. John as a present spiritual fact accomplished even whilst Christ was on earth. It is said, further, that Gnostic and other heresies of various kinds belonging to the 2nd cent. are alluded to in the Gospel, and that the Johannine authorship is therefore untenable. Last, but by no means least, the use of the word *Logos* to describe the Eternal Word, and the doctrines associated with the name that are found in the Prologue, point, it is said, conclusively to an Alexandrian origin, and are practically irreconcilable with the authorship of the son of Zebedee.

4. Purpose and Structure of the Gospel.—It is now much more generally recognized than in 1909 (the date of the first edition of this *Dictionary*) that these difficulties cannot be solved by comparing John and the Synoptics in detail and then by a forced 'harmonization' of the one with the other. John clearly was not revising the Synoptic narrative, nor even the Synoptic tradition, as a whole (some parts overlapped). Instead of the miracles, the 'mighty works' (*dynameis*) described in the earlier gospels, by which Jesus had rolled back the powers of darkness and opened the way for the coming of God's Reign (Lk 11^{20}), John describes the 'signs' of heavenly power and glory which shone through the veil of His human career—chiefly the seven great signs noted in the Outline above. John was not interested in history, or in biography, save as it symbolized, exemplified, or foreshadowed the invisible realities which are eternal. Christ not only healed—He heals. He not only revealed the Father—He reveals Him. He not only reconciled men to God—He reconciles. It is this constant and unending realization and fulfilment of the Incarnation that interests John far more than the events in Galilee and Jerusalem. The inner meaning of Christ's life completely dominates the narrative. This is a spiritual interpretation—or reinterpretation—of earlier tradition. Those for whom spiritual realities are as real as external events, or even 'more' real (as they say), will understand this; the rest of us are merely puzzled.

One theory which has recurred, in one form or another, for several generations, is that John is a composite work, and may be divided into two or three 'strands.' But the style, vocabulary, thought, and point of view are uniform throughout. Another and more promising distinction has been made between the discourses and the narratives. Rudolf Bultmann, in his *Meyer* Commentary (1941), distinguished the 'discourse source' (*Redequelle*, RQ), to which he attributed a Semitic (Aramaic or Syriac) and quasi-Gnostic origin. This source he did not undertake to reconstruct; but B. S. Easton worked it out, on the basis of the Commentary, in the *Journal of Biblical Literature*, lxv (1946), pp. 143–156. It begins with the Prologue ($1^{1-5, 9-12, 14, 16}$) and reaches its climax in the great passages in chs. 17, 15, 16, 14. But the view sometimes advanced, viz. that the narrative element in John was 'early,' and therefore came first, and that into this the discourses were inserted, is not supported by the phenomena of style, grammar, and vocabulary. One might argue—indeed Bultmann suggests—that the discourse material (RQ) came first, and the narrative was (or the narratives were) adapted to support it.

There is a continuity of theme (or themes) in the discourse material which goes quite beyond the limits of the several episodes, a fact which strongly supports the unity of the discourse material, whether or not one accepts Bultmann's view of it. The Prologue (omitting the narrative interpolations in vv.$^{6-8, 15}$) stands by itself, yet its thought is integral to the whole Gospel; it is no afterthought, as some late 19th cent. scholars supposed. Then begins the series of great themes, here given in the order of the Gospel (Bultmann rearranges the order): The Heavenly Witness (3^{11-12}), Redemption and Judgment (3^{16-21}), with a characteristic return to the former theme in 3^{31-36}); the Christological Discourse (5^{19-47}), where the Resurrection and Judgment theme (vv.$^{19-30}$) harks back to 3^{13-21}; the Witness *to* Christ of John the Baptist, Jesus' own works, and Moses (5^{31-47}, attaching to 3^{31-36}); the Bread of Life (6^{26-59})—three themes in one: Christ *gives* the Bread of Life, He *is* the Bread of Life, His *flesh* is the Bread of Life; He is also the Water of Life (6^{27-39}); the Witness theme again (7^{15-24} 8^{12-20}); the Shepherd discourse ($10^{1-18, 26-29}$); the final dialogue in 12^{20-36a}. Still more striking is the thematic arrangement—announcement followed by elaboration—in chs. 13–17, which follow the 'Book of the Seven Signs.' The Table Talk in 13^{31-35} introduces both of the Last Discourses in chs. 14–16 and also the great prayer in ch. 17.

Discourse I (ch. 14) elaborates the theme of 13^{33}.

Discourse II (chs. 15–16) elaborates (*a*) the idea of the *wine* (which is derived from the true *vine*) at the supper, especially 15^{1-8}, and (*b*) 13^{34-35}, especially 15^{9}–16^{33}.

The High Priestly Prayer (ch. 17) elaborates the theme of 13^{31b-32}. On this analysis, Bacon's theory that Discourses I and II were alternates cannot be maintained. Both were anticipated in the programmatic announcement of 13^{31-35}. In view of the closely knit structure of the discourse material, it is impossible to ignore the hypothesis that this really existed independently of the Gospel, either as a *Redequelle* or at least as a series of discourses —*i.e.* homilies, as Bacon thought, appropriate to the great festivals of the Christian Jewish religious year: Passover, Pentecost, Tabernacles, Rosh ha-Shanah and Yom Kippur, Hanukkah, Passover again. Until this question is settled, viz. the probable origin and the nature of this material, there is little likelihood of solving the riddle of the Fourth Gospel—the 'keystone,' as C. H. Dodd described it in his Inaugural at Cambridge (1938), to the whole arch of the literature and theology of the N.T.

The greatest advance in Johannine research during the past fifty years is probably in the area of the purpose and presuppositions of the author, whoever he was, wherever he lived, and whenever. His deepest aim was to set forth, in the language of his own and his readers' deepest spiritual needs and aspirations, the meaning which Christ had for His disciples, for the Church, and for the world. Christ was the Logos, the Divine Word, the eternal Reason, Power, Wisdom, and Voice of God the Creator of the Universe, who had become incarnate, lived on earth, was rejected by His own people, but gave to all who believed in Him the grace and power to become 'the children of God.' This is set forth in the Prologue (ch. 1).

1. In the beginning was the Word,
   And the Word was with God,
   And the Word was God.
2. He was in the beginning with God.
3. All things were made through Him,
   And without Him was not anything made
   [the rest of this line is a textual gloss].
4. In Him was life,
   And the life was the light of men.
5. The light shines in the darkness,
   And the darkness has not overcome it.
9. The true light that enlightens every man
   Was coming into the world.

10. He was in the world,
And the world was made through Him,
Yet the world knew Him not.
11. He came to His own [people],
And His own [people] received Him not.
12. But to all who received Him
[*i.e.* who believed in His name],
He gave power to become children of God,
13. Who were born, not of blood
Nor of the will of the flesh
Nor of the will of man,
But of God.
14. And the Word became flesh
And dwelt among us, full of grace and truth.
We have beheld His glory,
Glory as of the Only Son from the Father.
16. And from His fullness have we all received,
And grace upon grace.
17. For the Law was given through Moses,
But grace and truth came through Jesus Christ.
18. No one has ever seen God;
The Only Son, who is in the bosom of the Father,
He has made Him known.

This poem, sometimes inaccurately called a 'Hymn to the Logos,' sounds quasi-Gnostic, but if so it is Gnosticism with a difference. *Gnōsis* was not yet a Christian heresy, though it bore within itself the seeds of the later Gnostic sects. Its Jewish origin, affirmed by the Church fathers, is fairly clear—as the great opening tractate of the Hermetic *corpus*, the Poimandres, which sets forth the pagan parallel to the Gnostic writings, makes abundantly clear; its references to Gn 1 in the LXX are unmistakable. There were doubtless different types of nascent Gnosticism in the late 1st and early 2nd cents., but they doubtless shared a more or less common point of view. This was a fundamental dualism, at least a dualism *pro tempore*, until the affairs of the cosmos are finally terminated; matter and spirit are in total opposition, and as in Orphism the *sōma* (body) is viewed as the *sēma* (tomb) of the soul. As in the Hymn of the Soul (*Acts of Thomas*, 108–113) and other Gnostic writings, the soul, drugged and drowsy and lying in the dark dungeon at the bottom of the material universe, must be roused and wakened by some messenger, witness, or redeemer. (It is doubtful if the 'Gnostic Redeemer' appears anywhere outside Christian Gnosticism.) At last the soul may bestir itself and say, 'I will arise and go to my Father.' Elements of the world-wide popular astrology of the time were included, with its iron mechanism of inevitable fate; the malign or perverse reign of the 'governors,' the wicked archons who rule the heavenly spheres, and are in revolt against the one supreme God (cf 1 Jn 5^{19b}); the passion of wicked spirits, aeons, *stoicheia* (the 'elemental spirits of the universe,' cf Gal 4^{9}) for the lower levels of existence, especially for sexual gratification; the consequent evil of 'generation' or birth into the physical world—these are among the characteristic features of various schools of Gnostic thought, against which the author of John and the First Epistle of John firmly set his face. Salvation is by knowledge, *i.e.* by the acquisition of secret information about the origin and structure of the universe, the nature and destiny of the soul—this is the 'knowledge' which the vaunted teachers of this alien metaphysic set in opposition to, or offered in lieu of, the Christian tradition of the life, death, and resurrection of Christ and His ethical and religious teaching. The Grace and Truth which 'came through Jesus Christ' (1^{17}) are not the Law of Moses, but something superior to that ancient code; they are also superior to the new would-be revelation contained in the secret lore of metaphysical doctrine which, had it prevailed, would have completely stifled and destroyed the Christian gospel with its fundamental emphasis upon history, upon the reality and significance of man's life in this physical world, and upon the meaning of Christ's victory over sin and death, which was achieved as man, in man, and for man. The Christian salvation was something very different from that offered by *Gnōsis*. Among NT writers, no one saw this more clearly than John. And the purpose of his Gospel and of the cognate First Epistle, perhaps also his writing, is quite clear. It was to declare and proclaim the Christian message of salvation, and the new life in Christ, as something very different from both Judaism and Gnosticism.

The finished Gospel, as we have it—not begging the question of its finality, since many hold that it was never finished—presents a number of inconsistencies, such as the statement in 6^{1}, where Jesus crosses the Lake of Galilee from Jerusalem (5^{1}); or 14^{31} ('Rise, let us go hence'), after which He continues speaking for three chapters (to 18^{1}); or 5^{18}, which implies a prior claim to equality with God, as in 10^{30a}. Various theories have been advanced to account for these discrepancies. Several of them presuppose a disarrangement of the text when a brittle papyrus codex fell apart and was put together again in the wrong order; the disarranged sections being of equal length, and even, on one theory, corresponding closely to the printed pages of Westcott and Hort's Greek Testament! Other theories assume that an older document was used by John (either a *Grundschrift* of the whole Gospel or a *Redequelle* underlying the discourses) and was rearranged to suit his conception of the topography, or the sequence of Jesus' ministry, or the seasons in the Christian Jewish calendar. Others, with more probability, assume that the Gospel was never finished, and its tentative drafts of various sections were edited by a person or persons (the 'we' and the 'I' of 21^{24f}) who were unfamiliar with the geography of Palestine, and who did not venture to smooth out other inconsistencies. But it is a question if such inconsistencies troubled—or would have troubled—the author of John. His very style of writing is the intuitive, non-logical style of the mystic and devotee. Parallels may be found not only in ancient works like the *Odes of Solomon* or the *Ginza Rabbah* or the *Corpus Hermeticum*, but in more modern works like the *Imitation of Christ* or the older Dutch manual of devotion of the Brethren of the Common Life upon which it is based. The writer's thought moves in a circle, not a straight line; or in a spiral, returning to reconsider thoughts, truths, principles, expressions already used or stated, but now from a slightly different angle or point of view, or in the light of intervening conversations or events. What is true on the smaller scale of the discourses (*e.g.* the Bread of Life in ch. 6) is writ large in the composition of the Gospel as a whole. Consequently the rearrangement of chapters (*e.g.* of ch. 6 to precede ch. 5, or 15–16 to precede 14) or of sections or verses or parts of verses (as in Bultmann's RQ) still leaves unresolved problems, *aporien*, which call for further solution. It is probably better to leave the text as it stands, noting the difficulties but not attempting to solve them by any process of rearrangement. For it may well be that the author himself could not have solved them—except by omission. But his was a type of mind for which such difficulties were unimportant, and he preferred to leave his work without revision.

W. T. D.—F. C. G.

JOHN, THEOLOGY OF.—It is the object of this article to give a brief account of St. John's teaching as contained in his Gospel and Epistles. When we speak of the 'theology' of John we are using the word in a special sense—as also when we speak of the 'theology' of Paul, or the Synoptics, or Hebrews—or even of the NT as a whole. No fully articulated theological system is either set forth or presupposed in the Fourth Gospel, but a consistent body of intense and firmly held religious thought, with certain basic presuppositions, a characteristic vocabulary, and a vital, living contact with the convictions, hopes, and practices of the early church.

1. Some general characteristics of the teaching of St. John.—(1) It was appropriate that the later church fathers described John as the 'theologian' or the

JOHN, THEOLOGY OF

'divine'; even some of the NT MSS so refer to him. For it was the evangelist's habit to consider every event in history and the religious teaching of Jesus *sub specie aeternitatis* and from the point of view of God. Not only is God to him the most real of all beings—that should be true of every religious man—but all the details of his very practical teaching are traced up to their origin in the nature and will of God. The opening of the Gospel is characteristic. History is viewed from the standpoint of eternity, the life of Jesus is to be narrated not from the point of view of mere human observation, but as a temporal manifestation of eternal realities.

(2) But *it must not for a moment be understood that the treatment of human affairs is vague, abstract, unreal.* John has a firm hold upon the concrete, and his insight into the actual life and needs of men is penetrating and profound. He is not analytical as Paul is, nor does he deal with individual virtues and vices as does James; nor does he deal with the history of salvation, the end of the ancient Levitical system, or the Atonement in Christ's blood, as the author of Hebrews does. But in the unity and simplicity of a few great principles he reaches to the very heart of things. His method is often described as intuitive, contemplative, mystical. The use of these epithets may be justified, but it would be misleading to suppose that a teacher who views life from so high a vantage ground sees less than others. The higher you climb up the mountain the farther you can see. Those who contrast the spiritual with the practical create a false antithesis. The spiritual teacher, and he alone, can perceive and deal with human nature, not according to its superficial appearances, but as it really is at its very core.

(3) Only it must not be forgotten that *the view thus taken of nature and conduct is ideal, absolute, uncompromising.* The moral dualism which is characteristic of John is in accordance with the sentence from the great Judgment-seat. Light and darkness—good and evil—truth and falsehood—life and death—these are brought into sharp and relentless contrast. Half-tones, delicate distinctions, the subtle and gradual fining down of principles in the complex working of motives in human life, disappear in the blaze of light which John causes to stream in from another world. 'No one born of God commits sin; for God's nature abides in him, and he cannot sin because he is born of God' (1 Jn 3^9); 'No one who denies the Son has the Father. He who confesses the Son has the Father also' (2^{23}); 'We know that we are of God, and the whole world is in the power of the evil one' (5^{19}). Such a mode of regarding life is not unreal, if only its point of view be borne in mind. In the drama of human society the sudden introduction of these absolute and irreconcilable principles of judgment would be destructive of distinctions which have an importance of their own, but the forces, as John describes them, are actually at work, and one day their fundamental and inalienable character will be made plain.

(4) Another feature of John's style and method which arrests attention at once is *his characteristic use of certain words and phrases*—'witness,' 'truth,' 'signs,' 'world,' 'eternal life,' 'know,' 'believe,' 'glory,' 'judgment,' are but specimens of many. They indicate a unity of thought in the writer which finds no precise parallel elsewhere in Scripture, the nearest approach, perhaps, being in the characteristic phraseology of Deuteronomy in the OT. John is not systematic in the sense of presenting his readers with carefully ordered reasoning—a progressive argument compacted by links of logical demonstration. He sees life whole, and presents it as a whole. But all that belongs to human life falls within categories which, from the outset, are very clear and definite to his own mind. The Gospel is carefully constructed as an artistic whole, the First Epistle is not. (See the OUTLINES OF CONTENTS in these articles.) But all the thoughts in both are presented in a setting prepared by the definite ideas of the writer. The molten metal of Christian thought and feeling has taken shape in the mould of a strikingly individual mind: the crystallization of the ideas is his work, and there is consequently a unity and system about his presentation of them which may be described as distinctly Johannine.

2. The doctrine of God which underlies these books is as sublime in its lofty monotheism as it is distinctively 'Christian' in its manifestation and unfolding. No writer of Scripture insists more strongly upon the unity and absoluteness of the only God (Jn 5^{41}), 'the only true God' (17^3), whom 'no one has ever seen' (1^{18}); yet no one more completely recognizes the eternal Sonship of the Son, the fulness of the Godhead seen in Christ, the personality and Divine offices of the Holy Spirit. It is to John that we owe the three great utterances, 'God is Spirit' (Jn 4^{24}), 'God is Light' (1 Jn 1^5), 'God is Love' (1 Jn $4^{8,16}$).

The inferences drawn from the doctrine of the spirituality of God show the importance of its practical aspects. God as Spirit is not remote from men, but this conception of His essence brings Him, though invisible, nearer to men than ever. God as Light exhibits Himself to us as truth, holiness, and righteousness. Some interpreters understand the phrase as designating the metaphysical being of God, others His self-revelation and self-impartation. The context, however, points rather to the ineffable purity of His nature and the need of holiness in those who profess to hold fellowship with Him. That God is loving to every man, or at least to Israel, was no new doctrine when John taught; but up to that time no one had ever pronounced the words in their profound simplicity—'God is Love.' Love is not so much an attribute of God as a name for Him in the intimate and changeless essence of His being. That there is the slightest inconsistency between the Divine love and the Divine righteousness is incredible; but if God is love, no manifestation of God's justice can ever contradict this quintessential principle of His inmost nature. Again, the words that follow the statement show that in the Apostle's mind the practical aspects of the doctrine were prominent. Contemplation with him does not mean speculation. Abstract *a priori* deductions from a theological conception are not in St. John's thought: his conclusions are 'He who does not love does not know God' (1 Jn 4^8), 'We also ought to love one another' (v.^{11}). Nor does this high teaching exclude careful discrimination. The love of the Father for the Son, His love of the world as the basis of all salvation, the closer sympathy and fellowship which He grants to believers as His own children, are not confused with one another. But the statement that God is love goes behind all these and teaches that the principle of self-impartation is essential, energetic, and ever operating in the Divine nature, and that it is in itself the source of all life, all purifying energy, and all that love which constitutes at the same time the binding and the motive power of the whole universe.

3. The Logos.—The object for which the Gospel was written, we are told, was that men might believe that Jesus was not only the Christ, but also the Son of God (20^{31}). The former belief would not necessarily change their views of the Godhead; the latter, if intelligently held and interpreted in the light of Thomas' confession (v.^{28}), would undoubtedly affect in some direction the intense monotheism of one who was born and bred a Jew. Was it possible to believe that in Jesus God Himself was incarnate, and at the same time to believe completely and ardently in the unity of God? The answer of the writer is given substantially in the Prologue, in the doctrine of the Eternal Word. It is unnecessary to discuss in detail whence John derived the word *Logos*: the doctrine was practically his own. The derivation of the term from ancient philosophy, *e.g.* Stoicism, throws little light upon its meaning for John: in fact it is the Gospel of John which throws light on the Logos doctrine, as held by the Early Church, rather than the reverse. There can be little question that the *Memra* of the Targums, based on the usage of such

passages as Ps 33[6] 147[15], and Is 55[11], had some connexion with the Johannine usage—though the written Targums are much later. Philo's conception of the Logos is very different from that of John. Hence it is most unlikely that John derived his conception from either the Aramaic paraphrasts or the Alexandrian Jewish philosopher. The sense is far closer, as Rudolf Bultmann has maintained, to the popular idea of a Mediator found in various Near Eastern religious cults and philosophies than it is to Philo, the Stoics, or Heraclitus. Taking a word which his hearers and readers obviously understood, he put his own stamp upon it. Philo and John both drew from Hebrew sources (*e.g.* Pr 8[22–36], Wis 7[25f] 9[9] etc.), where we find the doctrine of the divine Wisdom, the Agent of God in the creation of the universe. But Philo employed an expression which suited his philosophy because of its meaning ' reason,' and it was employed by him mainly in a metaphysical sense. By contrast, John availed himself of another meaning of the Greek word *Logos*, and he emphasizes the Divine ' utterance,' which reveals the mind and will of God Himself, giving a personal and historical interpretation to the phrase. The Word, according to the teaching of the Prologue, is Eternal, Divine, the Mediator of creation, the Light of mankind throughout its history; in the latter days the Word made flesh, tabernacling among men, is the Only-begotten from the Father full of grace and truth. This cardinal doctrine once laid down, there is no further reference to it in the Gospel, and in the only other places in NT where a similar expression is used (1 Jn 1[1] and Rev 19[13]) it is employed with a difference. Even in the Prologue the conception of the Word is not abstract and philosophical, but when the introduction to the Gospel is finished, the idea never appears again; the narrative of the only Son, revealing for the first time the Father in all His fulness, proceeds as if no account of the Logos had been given. (See JOHN, GOSPEL OF.) The Christology of John would be quite incomplete without his doctrine of the Logos, but it is not dependent on this. Christ's unique Personality as Son of God may be fully known from His life on earth, but the Prologue gives to the narrative of His ministry in the flesh a background of history and of eternity. In all ages the Logos was the medium of Divine revelation, as He had been of creation itself, and of the Godhead before the world was. Pre-temporal existence and pre-incarnate operation having been described with sublime brevity, the Evangelist proceeds calmly with the story to which this forms an august introduction. See also article LOGOS.

4. The Fatherhood of God, and the doctrine of the Holy Spirit.—It is unnecessary to point out how influential the Prologue has been in the history of Christian thought, but it is well to remember also that to the author of John more than to any other writer we owe the development of the Christian doctrine of the Godhead, as modified by the above cardinal conceptions. The doctrines of the Fatherhood of God and of the Holy Spirit as a Divine Person do not indeed depend upon the witness of John. The Synoptists and Paul, not to speak of other NT writers, would furnish a perfectly adequate basis for these vital truths of Christian faith. But neither would have influenced Christian thought so profoundly, and neither would have been so clearly understood, without John's teaching and the words of the Incarnate Lord as reported by him. The meaning of the term ' Son of God ' as applied to Jesus is brought to light by the Fourth Gospel. Without it we might well have failed to gain an adequate conception of Fatherhood and Sonship as eternal elements in the Divine nature, and the unique relationship between the Father and the Son Incarnate is brought out in the fifth and other chapters of the Gospel as nowhere else. So with the Christian doctrine of the Holy Spirit. The whole of Scripture bears its testimony. Even in the OT more is said of the Spirit of God than is often recognized, and the teaching of Paul and Luke is full of instruction. But without the farewell discourses of Christ to His Apostles as recorded in Jn 14–16, our ideas of His Person and office would be comparatively meagre. The very term ' Paraclete,' not found outside the Gospel and the 1st Epistle, is itself a revelation. The personality of the Spirit and His distinctness from the Father and the Son, while Himself one with them, are elucidated with great clearness in these chapters. On the other hand, in his Epistle, John has much less to say than Paul of the Spirit in relation to the life of the believer.

5. On the subjects of **sin and salvation,** John's teaching harmonizes fully with that of the NT generally, while he maintains an individual note of his own, and brings out certain aspects of Christ's teaching as none of the Synoptists does. The language is that of the Church, but the thought goes back to Jesus. To John we owe the definition, ' sin is lawlessness ' (1 Jn 3[4]). He describes sin in the singular as a principle, rather than actual sins in the concrete. No dark lists enumerating the protean forms of sin, such as are found in Paul, occur in John, but he emphasizes with tremendous power the contrast between flesh and spirit, between light and darkness. The perennial conflict between these is hinted in the Prologue, and it is terribly manifest alike in the ministry of the Saviour and in the life of the Christian in the world. To John's writings chiefly we owe the idea of ' the world as a dark and dire enemy,' vague and shadowy in outline, but most formidable in its opposition to the love of the Father and the light of the life of sonship. The shades of meaning in which ' world ' is employed vary (see 8[23] 12[31] 17[14, 25] 18[36] and 1 Jn 2[15f]). The existence of evil spirits and their connexion with the sin of man are dwelt on by John in his own way. He does not dwell on the phenomena of demonic possession, but he has much to say of ' the devil ' or ' the evil one ' as a personal embodiment of the principle and power of evil. For his conception of Antichrist and of ' mortal sin,' see the articles ANTICHRIST and SIN, and the commentaries.

Potent as are the forces of evil, perfect conquest over them may be gained. The victory has already been virtually won by Christ as the all-sufficient Saviour, who as Son of God was manifested that He might undo or annul the works of the devil (1 Jn 3[8]). His object was not to condemn the world, but to save it (3[17]). That the Cross of Christ was the centre of His work, and His death the means through which eternal life was obtained for men, is made abundantly clear from several different points of view. John the Baptist points to the Lamb of God, who ' takes away the sin of the world ' (1[29]). The Son of Man is to be ' lifted up ' like the serpent in the wilderness (3[14]), and will draw all men to Himself (12[32]). He gives His flesh for the life of the world (6[51]). Only those who ' eat his flesh ' and ' drink his blood ' have eternal life (6[53–56]). He is the expiation for the sins of the world (1 Jn 2[2] 4[10]), and it is His blood that cleanses from all sin those who walk in the light and have fellowship with the Father and the Son (1 Jn 1[7]). John dwells but little on the legal aspects of sin and atonement; his doctrine on these matters is characteristic, confirming, whilst it supplements, the doctrines of Paul concerning justification and sanctification. What Paul describes as entire sanctification John eulogizes as perfect love—two names for the same full salvation, two paths to the same consummate goal.

It is most instructive to compare Paul and John in their references to faith and love. No student of these two great brethren in Christ could decide which of them deserves to be called the Apostle of faith, or which the Apostle of love. John uses the word ' faith ' only once (1 Jn 5[4]), but the verb ' believe ' occurs nearly 200 times in his writings, and his usage of it is more plastic and versatile than that of Paul or the writer of Hebrews. Again, if the word ' love ' occurs much more frequently in John, he has composed no such hymn in its honour as is found in 1 Co 13. The light he exhibits as a simple white ray Paul disperses into all the colours of the rainbow. The shades of meaning in John's use of the word ' believe ' and his use of the two Greek words for ' love ' deserve careful study.

JOHN, THEOLOGY OF

6. The true believer in Christ enters upon **a new life.** The nature of this life is fully unfolded in John's writings, in terms which show an essential agreement with other parts of NT, but which are at the same time distinctly his own. The doctrine of the New Birth is one example of this. The Gospel gives a full statement of this in the discourse of Christ with Nicodemus (ch. 3), but both Gospel and Epistle contain many of the Apostle's own statements, which show no slavish imitation on his part either of the words of the Master or of Paul, but present his own views as a Christian teacher consistently worked out. In the Prologue the contrast between natural birth 'of blood, of the will of the flesh, of the will of man,' and the being spiritually 'born of God,' is very marked. Those whose life has been thus renewed are described as 'having the power [or right] to become children of God,' and the condition is the 'receiving' or 'believing in the name' of Him who, as Word of God, had come into the world. The phrase used for the most part in Jn 3 and in 1 Jn is 'born again' or 'anew' or 'from above.' The word 'born,' not employed thus by other NT writers, lays stress on the primary origin of the new life, not so much on its changed character. Two participles are employed in Greek, one of which emphasizes the initial act, the other the resulting state. But all the passages, including especially 1 Jn 2^{29} 3^{9} $5^{1,18}$, draw a very sharp contrast between the new life which the believer in Christ enjoys and the natural life of the ordinary man. He to whom the new life has been imparted is a new being. He 'does righteousness,' he 'does not commit sin,' he 'cannot sin,' because he has been born of God and 'his seed abideth in him' (AV). Love and knowledge are marks of this new birth, and the new life is given to 'everyone who believes that Jesus is the Christ.' Some difficulty attaches to the interpretation of one clause in 1 Jn 5^{18}, but it is clear from that verse that he who enjoys the new life 'does not sin,' and that 'the evil one does not touch him.' The change is mysterious, but very real, and the term used by John to indicate this relation—'children,' instead of 'sons' as is usual with Paul—lays stress upon the close and intimate personal bond thus created, rather than upon the status and privileges of sonship. John, as we might expect, emphasizes the vital, not the legal element; believers are not merely *called* children, but 'so we are' (1 Jn 3^{1}) and cannot be otherwise. When new life has actually been infused, it must manifest its characteristic qualities.

The nature of the Christian's vital union with God in Christ is illustrated from different points of view. The allegory—not a parable—of the Vine and the Branches (Jn 15^{1-11}) is full of instruction, but no analogy drawn from vegetable life suffices adequately to describe the fellowship between Christ and His disciples; this is rather to be moulded after the pattern of the spiritual fellowship between the Father and the Son (Jn 15^{9} 17^{21-23}); and the terms 'communion' and 'abiding' are strongly characteristic of the First Epistle (1 Jn 1^{3} $2^{6,27}$ 3^{24} 4^{12} etc.). The strong phrases of Jn 6 'eating the flesh' and 'drinking the blood' of Christ, are employed, partly to express the extreme closeness of the appropriation of Christ Himself by the believer, partly to emphasize the benefits of His sacrificial work, as the faithful receive in the Lord's Supper the symbols of His broken body and blood poured out for men. The description of this teaching as 'sacramental' depends upon the significance attached to that term.

Lest, however, what might be called the mystical element in John's theology should be exaggerated, it is well to note that the balance is redressed by the stress laid upon *love* in its most practical forms. Love of the world—that is, the bestowal of supreme regard upon the passing attractions of things outward and visible—is absolutely inconsistent with real love to the Father and real life in Christ (1 Jn 2^{15-17}). Similarly strong language is used as regards social relationships and the love of others; for the word 'brother' must not be narrowed down to mean exclusively those who belong to the Christian communion. No man whose life in relation to men is not actuated by love can be said to walk in the light (1 Jn 2^{9}); hatred is murder ($3^{12,15}$); willingness to help another in need is a test of true love, nominal and professed affection will not suffice (3^{17}); a man who professes to love God and does not manifest a spirit of loving helpfulness adds falsehood to his other sins—'he is a liar' (4^{20}). The frequent repetition of some of these phrases and their interchange with others, such as 'doing righteousness,' 'walking in the truth,' 'being in the light,' 'abiding in him,' 'God abiding in us,' and the like, show that John is dealing with the very central core of spiritual life, and that for him as for Paul, it is true that 'he who loves his neighbour has fulfilled the law . . . for love is the fulfilling of the law' (cf Ro 13^{10}).

No more comprehensive phrase, however, to describe in brief the blessings of the gospel is to be found in St. John's theology than **'eternal life.'** It occurs seventeen times in the Gospel and six times in the First Epistle, while 'life' with substantially the same meaning is found much more frequently. 'Life' means for John that fulness of possession and enjoyment which alone realizes the great ends for which existence has been given to men, and it is to be realized only in the fulfilment of the highest human ideals through union with God in Christ. 'Eternal life' means this rich existence in perpetuity; sometimes it includes immortality, sometimes it distinctly refers to that which may be enjoyed here and now. In the latter case it is not unlike what is called in 1 Ti 6^{19} 'the life which is life indeed.' It is defined in Jn 17^{3} as consisting in the knowledge of God and Christ, where knowledge must certainly imply not a mere intellectual acquaintance, like the theoretical or speculative *gnōsis* of the false teachers, but a practical attainment in experience, including a state of heart and will as well as of mind, which makes God in Christ a true possession of the soul—that fellowship with God which constitutes the supreme possession for man upon the earth. But a contrast is drawn, *e.g.* in 3^{16} and 10^{28}, between 'eternal life' and 'perishing' or 'moral ruin'; and in one of John's sharp and startling contrasts, the choice open to man is described as including only these two solemn alternatives—'He who believes in the Son has eternal life; but he who does not obey the Son shall not see life, but the wrath of God rests on him' (3^{36}). The idea thus broached carries on beyond the boundaries of earthly existence; according to Christ's teaching, whoever keeps His word 'will never taste death' (8^{52}), and 'though he die, yet shall he live' (11^{25}). Knowledge of God and union with Christ impart to the believer a type of being which is not subject to the changes and chances of temporal existence, but is in itself unending, imperishable, so that in comparison with it no other kind of life deserves the name.

7. This opens up naturally the question of **John's Eschatology.** Some critics have found an inherent contradiction between John's view of judgment and that set forth by the Synoptists, and it may be pointed out in reply that he recognizes 'judgment' not merely as taking place here and now in history, but as still to be anticipated in its final form in the life beyond the grave. Similar statements have been made in reference to Christ's 'coming' and the 'resurrection.' That each of these three events is recognized as still in the future, to be anticipated as coming to pass at the end of the world, or at 'the last day,' is clear from such passages as the following: 'judgment' in Jn 12^{48} and 1 Jn 4^{17}; 'coming' in Jn 14^{3} and 1 Jn $2^{18,28}$; 'resurrection' in Jn 5^{28f} 6^{39f} 11^{24} etc. But it cannot be questioned that John, much more than Paul or the Synoptists, uses these words in a spiritual sense to indicate a spiritual visitation which may be called a 'coming' of Christ (Jn $14^{18,23,28}$), as well as a judgment which was virtually pronounced in Christ's lifetime (12^{31} etc.). Similarly, in 5^{21} it is said that 'the Son gives life to whom he will,' where the reference cannot be to life beyond the grave—a view which is confirmed by vv.^{22f}, where we are told

that he who hears Christ's word has passed from death to life, does not come into judgment, and that 'the hour now is' in which the dead shall hear His voice and live (v.25). There is nothing in these descriptions of present spiritual blessing to interfere with the explicit statement that after death there shall be a resurrection of life and a resurrection of judgment (5^{29}), any more than the Saviour intended to deny Martha's statement concerning the resurrection at the last day, when He said to her, 'I am the resurrection and the life' (11^{25}).

It may perhaps be fairly said that John in the Gospel and Epistles lays emphasis upon the present spiritual blessings of salvation rather than upon future eschatological events described by means of the sensuous and material symbolism characteristic of apocalyptic. But the two ideas, so far from being inconsistent, confirm one another. The man who believes in the present moral government of God in the world is assured that there must be a great day of consummation hereafter; while he who is assured that God will vindicate Himself by some Great Assize in the future life cannot surely imagine that meantime He has left the history of the world in moral confusion. The spiritual man knows that the future lies hid in the hints and suggestions of the present; he is certain also that such hints and suggestions must find their perfect realization and issues in a consummation yet to come. No Christian teacher has understood the deep-lying unity between the material and the spiritual, the present and the future, the temporal and the eternal, more completely than John 'the divine.'

To sum up, we may say that the 'theology' of John is worked out in a milieu very different from that of Paul, the Synoptists, or the author of Hebrews. The *Gnōsis* which had appeared upon the horizon of Paul's later epistles has now become more fully developed, though it is a question if it yet deserves the name (which is really modern) of 'Gnosticism.' Clearly it was not the specific Gnosticism of Basilides, Valentinus, and others, but only the world-wide theory of the degradation of the soul through its contact with matter, salvation as release from the prison-house of the flesh, 'salvation by knowledge,' the ethics of ascetical renunciation—in a word 'Hellenistic spirituality,' or what Paul Wendland called 'the theology of Syncretism.'

The eschatological emphasis of the early kerygma is still apparent; in fact, as in Rudolf Bultmann's definition, for John faith is 'eschatological existence.' For Paul, faith had been a means to an end, Justification; for John, it is the new life itself (*Theology of the NT*, § 50). This does not really involve a dualistic world-view, since the world, which is now in the power of evil, is soon to pass away. 'The world passes away, and the lust of it; but he who does the will of God abides for ever' (1 Jn 2^{17}). This great text combines OT prophecy (cf Is 40^{8}) with evangelical teaching (cf Mt 7^{21}), in the spirit of both Christian cosmology and Christian eschatology. Here lies the great contrast with Gnosticism: salvation indeed consists in 'knowledge,' but this is not some esoteric metaphysic; it is a moral and religious life in obedience to the commands of God, not merely hearing or holding the truth, but 'doing' it.

There has been an effort to make John dependent upon a kind of esoteric Judaism, *e.g.* the doctrines of the sect at Qumrân, as some scholars have interpreted their documents; but the whole orientation and emphasis of the Fourth Evangelist is in another direction. Nor is his teaching compatible with that of Philo (q.v.), for whom the Logos is only one of the many 'Powers' of God, albeit the first and highest; for John, the Logos is the one and only 'Son of God,' whom to know is eternal life (17^{3}). Qumrân, Philo, the Gnostics, the Hermetists, the later Mandaeans and Manichees, even the later Jewish Cabbalists (theosophical rabbis) have some light to cast upon John's thought, but not much. In its fully orbed splendour it has light enough of its own, and to spare; not derived, but original; and shedding light upon both Jewish and Hellenistic types of spirituality, both of which really led, for their full satisfaction, nowhere else than to the One who came as Light into the world, that men might see and live. See two preceding articles. W. T. D.—F. C. G.

JOIADA.—1. One of the two who repaired the 'old gate,' Neh 3^{6} (AV **Jehoiada**). **2.** High priest, son of Eliashib, Neh 12$^{10f, 22}$. One of his sons married the daughter of Sanballat the Horonite, Neh 13^{28} (RV, AV RSV **Jehoiada**).

JOIAKIM.—A high priest, son of Jeshua, Neh 12$^{10, 12, 26}$.

JOIARIB.—1. One of the two teachers sent by Ezra to Iddo to ask for ministers for the Temple, Ezr 8^{16}. **2.** One of 'the chiefs of the province who lived in Jerusalem,' Neh 11^{5}. **3.** See JEHOIARIB.

JOKDEAM.—A city of Judah, Jos 15^{56}; called **Jorkeam** (q.v.) in 1 Ch 2^{44}. It is possibly *Kh. Raqa^{c}*, S. of Hebron.

JOKIM.—A Judahite, 1 Ch 4^{22}.

JOKMEAM.—1. A town in Ephraim given to the Levites, near Beth-horon, 1 Ch 6^{68}; called **Kibzaim** in Jos 21^{22}. The site is unknown. **2.** A town in Solomon's fifth district, 1 K 4^{12} (AV **Jokneam**); probably to be equated with **Jokneam** (q.v.).

JOKNEAM.—A royal Canaanite city 'in Carmel,' Jos 12^{22}; on the boundary of Zebulun, 19^{11}, 'the brook' before it being the Kishon. It was assigned to the Merarite Levites, Jos 21^{34}. It is probably identical with **Cyamon** of Jth 7^{3}. The *Onomasticon* places 'Cimona' six Roman miles N. of Legio, on the road to Ptolemais. This points definitely to *Tell Qeimûn*, a striking mound SE. of Mount Carmel, with remains of ancient buildings. W. E.

JOKSHAN.—Son of Abraham and Keturah, and father of Sheba (Saba) and Dedan, Gn 25^{2}, 1 Ch 1^{32}. The name seems quite unknown, and the suggestion that it is identical with **Joktan** (q.v.) seems the most plausible.

JOKTAN, according to the genealogical tables in Genesis and 1 Chronicles, was one of the two sons of Eber, and the father of thirteen sons or races, Gn 10$^{25-30}$, 1 Ch 1$^{19-23}$; in the first table it is added that his descendants dwelt from Mesha to Sephar. Though the names of the majority of his sons have not been satisfactorily identified, it is clear that he is represented as the ancestor of the older Arabian tribes. The list of his sons is probably not to be taken as a scientific or geographical classification of the tribes or districts of Arabia, but rather as an attempt on the part of the writer to incorporate in the tables such names of Arabian races as were familiar to him and to his readers. It will be noted that Seba and Havilah occur also as the sons of Cush, Gn 10^{7}, the peculiar interest attaching to them having doubtless given rise to a variety of traditions with regard to their origin and racial affinities. The name of Joktan himself, like the names of many of his sons, has not yet been identified or explained. Its identification by the native Arab genealogists with *Kahtân*, the name of an Arabian tribe or district, is without foundation; there appears to have been no real connexion between the names, their slight similarity in sound having probably suggested their identification. The supposition that Joktan was a purely artificial name devised for the younger son of Eber, in order to serve as a link between the Hebrew and the Arab stocks, amounts to little more than a confession that the origin of the name is unknown. L. W. K.

JOKTHEEL.—1. A town of Judah in the lowland, Jos 15^{38}. Its site is unknown. **2.** The name given to Sela, the ancient capital of the Edomites, after its capture by Amaziah, king of Judah, 2 K 14^{7}.

JONADAB.—1. Son of Shimeah, David's brother, and the friend of Ammon the son of David. He is described as 'a very crafty man.' He aided Ammon to carry out his intrigue against his half-sister Tamar,

3 S 13^{3ff}, and after the assassination of Ammon was the first to grasp the true state of affairs, and to allay the king's distress by his prompt report of the safety of the royal princes, 2 S 13^{30ff}. **2.** Son of Rechab, of the clan of the Kenites, 1 Ch 2^{55}, and formulator of the rules imposed upon descendants, the Rechabites (Jer 35; see RECHABITES). He is called **Jehonadab** in 2 K $10^{15, 23}$, where we learn that he was thoroughly in sympathy with the measures adopted by Jehu for the vindication of the religion of Y".

JONAH.—1. The man Jonah.—*Jonah* ('dove') is found in the Bible as the name of only one person, the Israelite prophet of 2 K 14^{25} and of the Book of Jonah According to both, he was the son of Amittai (LXX and Vulgate *Amathi*), and the former connects him with Gath-hepher, a place named in Jos 19^{13}, in the territory of Zebulun, now probably represented by *Khirbet ez-Zurrâ'*, not far from Kefr Kenna and Nazareth, in the neighbourhood of which is a grave of *Nebi Yûnus* or *Yûnis*. If this identification is right, Jonah was not only Israelite in the narrower sense, but Galilaean. His one prediction, recorded in Kings, of the extension of the kingdom of Samaria from Lebo-hamath (RSV 'the entrance of Hamath') as far as the Sea of the Arabah or Dead Sea, is said to have been fulfilled in the reign of Jeroboam II. (787/786–747/746 B.C.), and though it has generally been inferred that the prediction was also uttered in that reign it may have been delivered earlier. There is no mention in Kings of any connexion of Jonah with Assyria, and although it is possible that the memory of a visit to Nineveh was preserved by tradition or in some lost historical work no trace of such a story now exists, nor need its existence be postulated.

2. Book of Jonah.—(1) *Analysis.*—Jonah, the son of Amittai, is commanded by Yahweh to go to Nineveh and announce there impending judgment (1^{1f}). For a reason not mentioned until near the end of the book (4^{2f})—the fear that Yahweh will repent of His purpose, and spare the Ninevites—he refuses to obey, and in order to escape from Yahweh's immediate jurisdiction goes down to Joppa, and books himself a passage in a ship manned by heathen, almost certainly Phoenicians, and bound for Tarshish (1^{3f}). (This used to be identified with Tartessus in Spain, near the mouth of the River Guadalquivir, and Jonah was represented as going as far west as he could; but on linguistic grounds the identification is doubtful, and as the root meaning of the word is connected with smelting or refining the place is probably some Phoenician colony where metal was worked, but whether this was in Sardinia or Tunis or even Spain cannot be decided.) When a violent storm comes on, and the prayers of the mariners to their gods of no avail, they conclude that there is someone on board who has offended some deity, and cast lots to discover the culprit. The lot falls on Jonah (1^{4-7}),who acknowledges his guilt and advises them to cast him overboard (1^{8-12}). After making futile efforts to bring the vessel to land (1^{13}), the sailors reluctantly cast him into the sea, with the result that the storm at once subsides and the wondering heathen adore the God of the Hebrews (1^{14-16}). Jonah is swallowed by a fish appointed for the purpose by Yahweh, and remains in its belly three days and three nights (1^{17}), during which time he prays (2^{1}). His prayer, which fills the greater part of the chapter, is rather a psalm of praise (2^{2-9}). He is then cast by the fish on the land at a place not specified (2^{10}), is commanded to discharge the neglected duty, goes to Nineveh and delivers his message over a third of the city (3^{1-4}). King and people repent, and show their repentance in a public fast (which includes even the domestic animals), and pray (3^{5-9}). Their penitence and prayer are accepted, to the prophet's disgust (3^{10}–4^{4}). As he sulks in a booth outside the city, waiting to see the issue, a remarkable series of experiences is arranged for his instruction (4^{5-8}): the shooting up of a plant (RSVm: probably the castor oil plant; AV **gourd**; RVm **Palma Christi**) appointed by Yahweh, which delights him by its welcome shade; the killing of the plant by a worm, also appointed by Yahweh; and the springing up of a hot wind which also blows by Divine appointment, so that the now unshaded prophet is so tormented by the heat, that, like Elijah (1 K 19^{4}), he longs for death. When he still sulks, it is pointed out to him that if he, a man, cares for the plant which sprang up and perished so quickly, and which was in no way the product of his toil, how much more must God care for the great city, which has in it so many thousands of little children and much cattle (4^{9-11}).

(2) *Integrity.*—Although theories of composite authorship, interpolation, and transposition have been adduced to account for the difficulties in the way of accepting the unity of the book, most scholars now ascribe 1, $2^{1, 10}$ 3 and 4, with the exception of a few glosses, to one writer. About the hymn or psalm in 2^{2-9} there are three main views: (*a*) that it is by the writer of the rest of the book; (*b*) that it was used by him but not written by him; (*c*) that it was inserted by an editor who read that Jonah prayed to God and thought that the text of the prayer should be given. The last view is the likeliest. The poetic figures are drawn from the experience of sailors and the psalm fits in with the experience of a shipwrecked mariner who has reached the shore, rather than with the situation ascribed to Jonah (2^{3-6}). How far it is from being a description of Jonah's plight may be gathered from v.^{5}: 'weeds were wrapped about my head.' As Wellhausen remarked: 'Weeds do not grow in a whale's belly.' Further the psalm consists of quotations from or echoes of the Psalter, passages from Ps 3, 18, 30, 31, 42, 50, 116, 120, 142, which implies that the writer had a considerable part of our present Psalter before him, and so points to the study rather than the belly of a fish. Luther says: 'He was not so comfortably placed as to be able to indite so fine a poem.'

(3) *Date and Authorship.*—There is no claim in the book that it was composed by Jonah and there is no means of knowing the identity of the author. Since Nineveh is clearly referred to as no longer standing: 'Now Nineveh *was* an exceedingly great city' (3^{3}), the *terminus a quo* cannot be placed earlier than about 600 B.C. (fall of Nineveh, 612 B.C.). The *terminus ad quem* is fixed by the mention of the Twelve Prophets in Sirach (49^{10}), *c* 180 B.C. The anonymous reference to the Assyrian king and the description of him as 'king of Nineveh' (3^{6}), a title not otherwise found applied to Assyrian monarchs, suggest a considerable interval between Assyrian times and the composition of the book. This is confirmed by the grossly exaggerated dimensions of Nineveh, which is described as so large that it would take three days to traverse (3^{3}), whereas its area was less than three square miles, and by the related and also inflated estimate of its population (4^{11}). If the writer was acquainted with the Book of Joel (compare 3^{5} with Jl 1^{13f}, 3^{9} with Jl 2^{14}, 4^{2} with Jl 2^{13}), which is probably to be referred to the latter half of the 5th cent. B.C., then Jonah would have to be placed in the 4th cent. In agreement with this is the linguistic evidence, words and forms showing Aramaic influence or found only in later Hebrew: *s^{e}phînāh* 'ship,' *hith'ashshēth* in the sense of 'think,' *ṭa'am* 'decree,' *minnāh* 'prepare' are examples. This evidence is supported by the thought and teaching of the book and makes probable a date between 400 and 200 B.C.

(4) *Interpretation.*—The ancient Jews seem to have regarded the book as historical (3 Mac 6^{8}, To $14^{4, 8}$; Jos. *Ant.* IX. x. 2 [208 ff]), and were followed by Christian interpreters, and, though this view has had defenders in more modern times, it is now largely given up. Some treat the book as an allegory of the fortunes of the people. Jonah, 'the dove,' represents Israel which was to prophesy amongst the nations. Because it shirked this task, it was swallowed by Babylon, represented by the great fish; during the Exile it turned to Yahweh and was restored to freedom. The plausibility of this view is increased if it is considered alongside Jer $51^{34, 44}$;

it decreases the more consistency is sought in the interpretation of details. Cheyne, accepting this view, pointed out the mythical element in the story, the fish being the destroying dragon of the original myth and the link between the Jonah story and the myth being Jer $51^{34, 44}$. But it may be noted that in a 21st cent. B.C. cuneiform text Nineveh is represented ideogrammatically by a fish, the emblem of the goddess Nina, in the middle of a city. The book of Jonah has also been regarded as a Midrash on 2 K 14^{25}, but probably it fits best into the category of parable. Though the author may have drawn on historical incidents, myth and folklore, it is essentially the author's creation, a tale, fiction, but a story with a moral and it aims at instruction.

(5) *Teaching.*—The prominence given by Christian expositors to the incident of the fish has tended to obscure the chief aim of the writing—to protest against the narrowness of thought and sympathy which prevailed among the Jews of the time, and was daily growing in intensity. Whoever the author was, he had higher thoughts about God than most of his contemporaries, perhaps it may even be said than any other of the writers of the OT, and entertained more charitable feelings towards the Gentile world than most of his people. The God of Israel, he believed, cared for all men. Penitent Gentiles—and many in Gentile circles were ready to repent if only they were taught—could obtain pardon as readily as penitent Jews. Nay, Yahweh sought their repentance. Nowhere in pre-Christian literature can be found a broader, purer, loftier, tenderer conception of God than in this little anonymous Hebrew tract. Cornill describes it as 'one of the deepest and grandest things ever written.' 'I should like,' he adds, 'to exclaim to any one who approaches it: "Put thy shoes from off thy feet, for the place whereon thou standest is holy ground."' How high the teaching of the book rose above later Judaism, say the Judaism of the time of Christ, and the following generation, is strikingly shown by the way in which it is summarized by Josephus (*loc. cit.*). There is not a word there about the penitence of the Ninevites, or God's remonstrance with Jonah. The main lesson of the book is absolutely ignored by the proud Pharisaic priest. Another leading thought of the book is the duty of Israel to make its God known to the Gentiles.

(6) *The book in the Synagogue and the Church.*—It is said in the Mishnah (*Ta'anith*, ii. 1) that the ritual of a public fast in time of drought included reference by the leader of the congregation to the Book of Jonah, and it has been used from ancient times to the present day in the ceremonial of the Day of Atonement. Christians were early attracted to it by the remarkable allusions in the Gospels: Mt 12^{39ff} 16^{4}, Lk $11^{29f, 32}$. The reference to the entombment in the fish is in Matthew only. The allusion to the repentance of the Ninevites is in both Matthew and Luke. The significance of the former has been much debated, and some have regarded it as a proof of the historicity of the OT narrative. That in no way follows. Our Lord found the story in the Scriptures, and appealed to it as something generally known to His hearers. His use of it fastened on the imagination of the early Christians, and led them to take great interest in the whole Book of Jonah. The remains of early Christian art in catacomb paintings, on sarcophagi, lamps, glasses, etc., include a very large number of pictures which have some part of the story of Jonah for their theme.

(7) *Parallels to Jonah.*—The fish episode, so far from being a unique and unparalleled adventure, is actually part of the mythological background not only of Palestine but of many parts of the world. Attention has often been called to the classical myths of Andromeda and Hesione, the scene of the former of which is laid in the neighbourhood of Joppa. From India there is a tale of a certain Mittavindaka who went to sea in defiance of his mother's objection. While the ship was on the sea it was seized by an unknown power and could not proceed until the offender was three times selected by lot and then cast overboard. From Egypt comes an account of a shipwrecked traveller being swallowed by a serpent and thus carried to land. That was the kind of story which was to be found in many parts of the ancient world, and the author of Jonah may have called one such story into use. But whatever mythical element there was in the original tale—and some see in the swallowing and disgorging of Jonah a reference to the disappearance and subsequent reappearance of the sun during an eclipse—this element has disappeared from our book, and the fish is used merely as a means of transport for the prophet, a way of getting Jonah back to land. What has been used as a test of orthodoxy is seen to be no more than a literary convention.

W. T. S.—**W. D. McH.**

JONAH (1 Es 9^{23}).—See ELIEZER, **8.**

JONAM.—An ancestor of Jesus (Lk 3^{30}).

JONAS.—**1.** 1 Es 9^{1} (RV); see JEHOHANAN, **3.** **2.** 1 Es 9^{23} (AV, RV); see ELIEZER, **8.** **3.** 2 Es 1^{39} AV the prophet Jonah. **4.** See JOHN, **6.**

JONATHAN ('Y" hath given').—**1.** A Levite, the 'son' of Gershom (q.v.); according to Jg 18^{30} he and his sons were priests to the tribe of Dan up to the Captivity. Jonathan was taken into the service of Micah as 'father and priest' (Jg 17^{10}); but, not long after he had taken up his abode there, six hundred Danites came that way and induced Jonathan to leave Micah and join them as their priest (18^{11-31}). **2.** The eldest son of Saul; he appears, in the first instance, as a brave and successful leader in battle. 1 S 13, 14 contain a graphic account of the way in which the Israelites threw off the Philistine yoke; in this campaign Jonathan took a leading part. He first of all, at the head of a thousand men, smote the Philistine garrison in Geba; this was the signal for the outbreak of war. The Philistine army gathered together and encamped in Michmash. Jonathan, accompanied only by his armour-bearer, at great risk surprised an advanced post of the Philistines, and slew about twenty men; the suddenness and success of this *coup* so terrified the Philistines that the whole host of them fled in panic. The popularity of Jonathan is well illustrated by the fact that the people prevented Saul from carrying out a vow which would have cost Jonathan his life (1 S 14^{24-46}). The implicit trust which Saul placed in Jonathan is seen in the words of the latter in 1 S 20^{2}: 'Behold, my father does nothing either great or small without disclosing it to me.' The faithfulness and trustworthiness of Jonathan as here shown gives an insight into what must have been that friendship for David which has become proverbial. All the characteristics of truest friendship are seen in Jonathan in their full beauty—love (1 S 18^{1}), faithfulness (20^{2ff}), disinterestedness (20^{42}), and self-sacrifice (20^{24-34}). The last we hear of Jonathan is his death upon the battlefield, fighting the foes of his country. In David's lament the spirit of the departed hero speaks in unison with his friend: 'Your love to me was wonderful, passing the love of women' (2 S 1^{26}).

3. The son of the priest Mattathias; the youngest of the four Maccabaean brothers (2 Mac 8^{22}), who played an important part during the Maccabaean revolt (see MACCABEES, **3**). **4.** A nephew of David (2 S 21^{21}; called his 'uncle' in 1 Ch 27^{32}). **5.** A son of Abiathar the priest (2 S 15^{27ff} $17^{17, 20}$, 1 K 1^{42}). **6.** A scribe in whose house Jeremiah was imprisoned (Jer $37^{15, 20}$ 38^{26}). **7.** A high priest (Neh 12^{11}); called **Johanan** in v.^{22f} and **Jehohanan** in Ezr 10^{6}. **8.** One of David's heroes (2 S 23^{32}, 1 Ch 11^{34}). **9.** A Levite (Neh 12^{35}). **10.** Son of Kareah (Jer 40^{8}). His name is omitted in RSV, with some Hebrew MSS, LXX; it does not stand in 2 K 25^{23}. **11.** The father of Peleth and Zaza (1 Ch 2^{32f}). **12.** One of David's treasurers (1 Ch 27^{25}). **13.** Father of Ebed (Ezr 8^{6}). **14.** One of those who opposed (RV, RSV) or assisted (AV) Ezra in the matter of the foreign marriages (Ezr 10^{15}). **15.** A priest (Neh 12^{14}). **16.** Son of Absalom, in the time of Simon the Maccabee

(1 Mac 13[11]). **17.** A priest who led the prayer at the first sacrifice after the Return in the time of Nehemiah (2 Mac 1[23]). W. O. E. O.—H. H. R.

JONATH ELEM RECHOKIM, Ps 56 (AV).—See PSALMS, 2.

JONATH ELEM REHOKIM.—See PSALMS, 2.

JOPPA.—The principal seaport of S. Palestine: a place of high antiquity, being mentioned in the tribute lists of Thothmes III., but never before the Exile in Israelite hands, being in Philistine territory. It was theoretically assigned to the tribe of Dan (Jos 19[46]), and is spoken of as a seaport in 2 Ch 2[16] and Ezr 3[7] (where read with RSV 'to the sea, to Joppa' [cf RV], in place of AV 'to the sea of Joppa'): these, and its well-known connexion with the story of Jonah (1[3]) are the only reference to the city to be found in the OT. The Maccabees wrested it more than once from the hands of their Syrian oppressors (1 Mac 10[75] 12[33] 13[11]); it was restored to the latter by Pompey (Jos. *Ant.* XIV. iv. 4 [76]), but again given back to the Jews (*ib.* XIV. x. 6 [205]) some years later. Here St. Peter for a while lodged, restored Tabitha to life, and had his famous vision of the sheet (Ac 9[36]–10[48]). The traditional sites of Tabitha's tomb and Simon the tanner's house are shown to tourists and to pilgrims, but are of course without authority. The city was destroyed by Vespasian (A.D. 68). In the Crusader period the city passed from the Saracens to the Franks and back more than once: it was captured first in 1126, retaken by Saladin 1187, again conquered by Richard Coeur de Lion in 1191, and lost finally in 1196. In more recent times it is remarkable for Napoleon's successful storming of its walls in 1799. Its modern name is *Jaffa*, and it is now a flourishing seaport. A railway connects it with Jerusalem. It is also one of the chief centres of the fruit-growing industry in Palestine, and its orange gardens are world-famed. Tradition places here the story of Andromeda and the sea-monster. R. A. S. M.

JORAH.—The head of a family of which one hundred and twelve members returned with Zerubbabel, Ezr 2[18], 1 Es 5[16] (AV **Azephurith**, RV **Arsiphurith**); called **Hariph** in Neh 7[24].

JORAI.—A Gadite chief, 1 Ch 5[13].

JORAM.—**1. 2.** See JEHORAM, **1** and **2.** **3.** Son of Tou, who was sent to congratulate David on his victory over Hadadezer, 2 S 8[10]; called **Hadoram** in 1 Ch 18[10]. **4.** A Levite, 1 Ch 26[25]. **5.** A captain in the time of Josiah, 1 Es 1[9]; called **Jozabad** in 2 Ch 35[9].

JORDAN.—The longest and most important river in Palestine. **1. Name.**—The name 'Jordan' is best derived from Hebrew *yāradh* 'to descend,' the noun *Yardēn* formed from it signifying 'the descender'; it is used almost invariably with the article. In Arabic the name is *esh-Sheri'ah*, or 'the watering-place,' though Arabic writers before the Crusades called it *el-Urdun*. Quite fanciful is Jerome's derivation of the name from *Jor* and *Dan*, the two main sources of the river, as no source by the name of Jor is known.

2. Geology.—The geology of the Jordan is unique. Rising high up among the foothills of Mount Hermon, it flows almost due south by a most tortuous course, through the two lakes of Huleh and Galilee, following the bottom of a rapidly descending and most remarkable geological fissure, and finally emptying itself into the Dead Sea, which is 1292 feet below the level of the Mediterranean. In its short course of a little more than 100 miles it falls about 3000 feet, and for the greater portion of the journey runs below the level of the ocean. No other part of the earth's surface, uncovered by water, sinks to a depth of even 300 feet below sea-level, except the great Sahara. Professor Hull, the eminent Irish geologist, accounts for this great natural cleft by supposing that towards the end of the Eocene period a great 'fault' or fracture was caused by the contraction from east to west of the limestone crust of the earth. Later, during the Pliocene period, the whole Jordan valley probably formed an inland lake more than 200 miles long, but at the close of the Glacial period the waters decreased until they reached their present state. Traces of water, at heights 1180 feet above the Dead Sea's present level, are found on the lateral slopes of the Jordan valley.

3. Sources.—The principal sources of the Jordan are three: (1) the river *Ḥaṣbānī*, which rises in a large fountain on the western slopes of Mount Hermon, near *Ḥāṣbeiyah*, at an altitude of 1700 feet; (2) the *Leddan*, which gushes forth from the celebrated fountain under *Tell el-Qâḍī*, or Dan, at an altitude of 500 feet—the most copious source of the Jordan; and (3) the river *Bâniyâs*, which issues from an immense cavern below *Bâniyâs* or Caesarea Philippi, having an altitude of 1200 feet. These last two meet about five miles below their fountain-heads at an altitude of 148 feet, and are joined about a half-mile farther on by the Ḥaṣbānī. Their commingled waters flow on across a dismal marsh of papyrus, and, after seven miles, empty into Lake Huleh, which is identified by some with 'the waters of Merom' (Jos 11[5, 7]). The lake is four miles long, its surface being but 7 feet above sea-level.

4. The **Upper Jordan** is a convenient designation for that portion of the river between Lake Huleh and the Sea of Galilee. Emerging from Lake Huleh, the river flows placidly for a space of two miles, and then dashes down over a rocky and tortuous bed until it enters the Sea of Galilee, whose altitude is 682 feet below the level of the Mediterranean. It falls, in this short stretch of 10½ miles, 689 feet. At certain seasons its turbid waters can be traced for quite a considerable distance into the sea, which is 12½ miles long.

5. The **Lower Jordan** is an appropriate designation for that portion of the river between the Sea of Galilee and the Dead Sea. The distance in a straight line between these two seas is but 65 miles, yet it is estimated that the river's actual course covers not less than 200, due to its sinuosity. In this stretch it falls 610 feet, the rate at first being 40 feet per mile. Its width varies from 90 to 200 feet. Along its banks grow thickets of tamarisks, poplars, oleanders, and bushes of different varieties, which are described by the prophets of the OT as 'the **pride** [RSV '**jungle**'] **of Jordan**' (Jer 12[5] 49[19] 50[44], Zec 11[3]). Numerous rapids, whirlpools and islets characterize this portion of the Jordan. The river's entire length from *Bâniyâs* to the Dead Sea is 104 miles, measured in a straight line.

6. Tributaries.—Its most important tributaries flow into the Lower Jordan and from the East. The largest is the *Yarmuk* of the Rabbis, the *Hieromax* of the Greeks, and the *Sherî'at el-Menâḍireh* of the Arabs, which drains Gilead and Bashan in part. It enters the Jordan 5 miles south of the Sea of Galilee. The Bible never mentions it. The only other tributary of considerable importance is the Jabbok of the OT, called by the natives *Nahr ez-Zerkā* or *Wâdī el-'Arab*. It rises near *'Ammân* (Philadelphia), describes a semicircle, and flows into the Jordan at a point about equidistant from the two seas. On the west are the *Nahr el-Jālûd*, which rises in the spring of Harod at the base of Mount Gilboa and drains the valley of Jezreel; *Wâdī Fār'ah*, which rises near Mount Ebal and drains the district east of Shechem; and the *Wâdī el-Qelt*, by Jericho, which is sometimes identified with the brook Cherith.

7. Fords.—The fords of the Jordan are numerous. The most celebrated is that opposite Jericho known as *Makhāḍet el-Ḥajlah*, where modern pilgrims are accustomed to bathe. There is another called *el-Ghôrāniyeh* near the mouth of *Wâdī Nimrin*. North of the Jabbok there are at least a score. In ancient times the Jordan seems to have been crossed almost exclusively by fords (1 S 13[7], 2 S 10[17]); but David and his household were possibly conveyed across in a 'ferry-boat' (2 S 19[18] RV; the rendering is doubtful, cf RSV 'ford').

8. Bridges are not mentioned in the Bible. Those which once spanned the Jordan were built by the Romans, or by their successors. The ruins of one, with a single arch, may be seen at *Jisr ed-Dâmiyeh*, about seven miles south of the Sea of Galilee. Another, built of black basalt and having three arches, is known as the *Jisr Benât-Ya'qûb*, or 'bridge of the daughters of Jacob,' situated about two miles south of Lake Huleh on the direct caravan route from Acre to Damascus. The river is now crossed by bridges at *Jisr ed-Dâmiyeh*, by the Hussein (formerly Allenby) bridge, on the main road from Jericho via es-Salṭ to *'Ammân*, and by a bridge a little north of the Dead Sea, on the new road from *'Ammân* to Jerusalem opened in 1958.

9. The Jordan valley.—The broad and ever-descending valley through which the Jordan flows is called by the Arabs the *Ghôr* or 'bottom'; to the Hebrews it was known as the *'Arâbhâh*. It is a long plain, sloping uniformly at the rate of 9 feet to the mile, being at the northern end 3, and at the southern end 12 miles broad. For the most part the valley is fertile, especially in the vicinity of *Beisân*, where the grass and grain grow freely. Near the Dead Sea, however, the soil is saline and barren. The ruins of ancient acqueducts here and there all over the plain give evidence of its having been at one time highly cultivated. To-day new aqueducts and the boring of wells is bringing large areas, particularly in the neighbourhood of Jericho, once more under cultivation. Grain crops and a large variety of excellent vegetables are grown. Cultivation is also carried out in the comparatively narrow floor bed of the river, known as the *Zôr*, varying from a quarter to two miles in width, and from 20 to 200 feet in depth below the *Ghôr* proper. This is the area which was overflowed every year 'all the time of harvest' (Jos 3^{15}). It has been formed, doubtless, by the changing of the river bed from one side of the valley to the other.

10. The **climate** of the Jordan valley is hot. The Lower Jordan in particular, being shut in by two great walls of mountain, the one in the east, and the other on the west, is decidedly tropical. Between October and March, the days are often pleasantly warm, with occasional cold and rainy spells; the nights are however usually cool or cold. In summer both days and nights are torrid, especially at Jericho, where the thermometer has been known to register 130° Fahr. by day, and 100° after sunset. In spite of this, there was a considerable population in the Lower Jordan valley in ancient times. To-day this population is once more growing.

11. Flora and fauna.—The trees and shrubs of the Jordan valley are both numerous and varied. The *retem* or broom plant, thorns, oleanders, flowering bamboos, castor-oil plants, tamarisks, poplars, acacias, Dead Sea 'apples of Sodom,' and many other species of bush, all grow in the valley. The papyrus is especially luxuriant about Lake Huleh.

The only wild animals found in the valley to-day are the jackal, hyaena, and fox. The leopard, boar, and ibex were still found at the beginning of the 20th cent., but the lion disappeared during the 19th cent. The river abounds in fish of numerous species, many of them resembling those found in the Nile, and the lakes of tropical Africa. Of the thirty-five species, however, known to exist, sixteen are peculiar to the Jordan.

12. The Jordan as a boundary.—In view of what has been said, it is obvious that the Jordan forms a natural boundary to Palestine proper. In the earlier books of the OT we frequently meet with the expression 'on this side of the Jordan,' and 'on the other side of the Jordan,' which suggest that the Jordan was a dividing line and a natural boundary. In Nu 34^{12}, indeed, it is treated as the original eastern boundary of the Promised Land (cf Jos 22^{35}). Yet, as Lucien Gautier suggests (article 'Jordan' in Hastings' *DCG*), it was not so much the Jordan that constituted the boundary as the depressed *Ghôr* valley as a whole.

During the British Mandate, the river formed the boundary between Palestine and Transjordan. It ceased to serve this function when the Hashemite Kindom of the Jordan was established.

13. Scripture references.—The Jordan is frequently mentioned in both the OT and the NT. Lot, for example, is said to have chosen 'all the circle of the Jordan' because 'it was well watered everywhere' (Gn 13^{10}); Joshua and all Israel crossed over the Jordan on dry ground (Jos 3^{17}); Ehud seized the fords of the Jordan against the Moabites, cutting off their retreat (Jg 3^{28}); Gideon, Jephthah, David, Elijah, and Elisha were all well acquainted with the Jordan; Naaman the Syrian was directed to go and wash in the Jordan seven times, that his leprosy might depart from him (2 K 5^{10}). And it was at the Jordan that John the Baptist preached and baptized, our Lord being among those who were here sacramentally consecrated (Mt 3 and parallels). To-day thousands of pilgrims from all parts of the civilized world visit the Jordan; so that, as G. A. Smith (*HGHL*, p. 496) reminds us, 'what was never a great Jewish river has become a very great Christian one.'

JOSECH (AV **Joseph**).—An ancestor of Jesus (Lk 3^{26}).

JOSEDEC.—AV form of **Jehozadak** (q.v.) in Apocrypha.

JOSEDECH.—AV form of **Jehozadak** (q.v.) in Haggai and Zechariah.

JOSEDEK.—RV form of **Jehozadak** (q.v.) in Apocrypha.

JOSEPH (in OT and Apocrypha).—**1.** The patriarch. See next article. **2.** A man of Issachar (Nu 13^{7}). **3.** A son of Asaph (1 Ch $25^{2, 9}$). **4.** One of the sons of Bani who had married a foreign wife, Ezr 10^{42}, 1 Es 9^{14} (AV, RV **Josephus**). **5.** A priest (Neh 12^{14}). **6.** An ancestor of Judith (Jth 8^{1}). **7.** An officer of Judas Maccabaeus (1 Mac $5^{18, 56, 60}$). **8.** In 2 Mac 8^{22}, and probably also 10^{19}, Joseph is read by mistake for **John,** one of the brothers of Judas Maccabaeus.

JOSEPH.—Jacob's eleventh son, the older of the two sons of Rachel; born in Haran. According to Gn 30^{24} the name means 'may he (God) add,' but 30^{23} apparently connects it with the root 'to take away' (the reproach of barrenness). Joseph is the hero of the stories in Gn 37–50. The occasional differences in the stories are evidence of original independence, and their imperfect harmonization favours their substantial historicity. In contrast with the earlier patriarchal stories they have less to do with Joseph, the tribe, and more with Joseph, the man.

The date of Joseph cannot be fixed with absolute certainty, but there are a number of considerations that point to the time of the Hyksos, who ruled Egypt *c* 1720–1550 B.C. The Pharaoh of the oppression is now generally taken to be Rameses II. of the 19th Dynasty (*c* 1290–1224 B.C.); and if this is correct, the addition of the years of residence in Egypt (430 years according to Ex 12^{40f}, or in round numbers, 400 years according to Gn 15^{13}) would bring Joseph's term of office into the time of the later Hyksos kings. One of these bore the name of Jacob-har, indicating that Jacob was a good Hyksos name, and suggesting, too, that the Hebrews participated in the Hyksos regime, as does the Joseph story in general. Both the Hebrews and the Hyksos

were predominately Semitic, and the Jewish historian, Josephus, definitely connects the two. The references in the OT account to horses and chariots indicate a period not earlier than the Hyksos when these were first introduced into Egypt, and the change in land tenure from a landed nobility before the Hyksos to a bureaucracy of governmental officials after the Hyksos seems to be reflected in Gn 47[19-26]. The OT locates the land of Goshen (probably the *Wâdī Ṭumilât*) in the eastern Delta in close proximity to the Egyptian capital, and the Hyksos period, when Zoan (*i.e.* Tanis or Avaris) was the capital, fits that situation as no other period does. The only other time when distant Thebes was not the capital was after 1300 B.C., but that is much too late for Joseph. It is also significant that in Ps 78[12] the region where the Hebrews lived in Egypt is called 'the fields of Zoan.' Finally, the note in Nu 13[22], stating that Hebron was built seven years before Zoan in Egypt, can only refer to the founding of the Hyksos capital there (*c* 1720 B.C.), and it suggests that Hebrews must have been connected with the Hyksos, and used that date as a reference point for calculating other dates. It is true that the Egyptian names which appear in the story, Potiphar (Gn 37[36]), Potiphera, Joseph's father-in-law, Asenath, his Egyptian wife, and his own Egyptian name, Zaphenath-paneah (41[45]), are not known in Egypt before 1000 B.C., but that simply shows that our story came to us from the late period, and the Egyptian names were made to agree with those current at the time. With the return of Jacob to Hebron (Gn 35[27]) he ceases to be the central figure in the story of the Hebrews, and Joseph takes his place. Of his life to the age of seventeen (Gn 37[2]) we are told simply that he was his father's favourite, and rather too free in carrying tales about his brothers and recounting his boyish dreams. Sent to Shechem, he found that his brothers had taken their flocks northward to Dothan. As soon as he came within sight, they planned to get rid of him and his dreams, but the traditions differ as to how this was accomplished. According to Gn 37[27f] he was sold to a passing caravan of Ishmaelites, but according to 40[15] he was kidnapped, apparently by a band of Midianites (37[28]). In any case he was carried off to Egypt, and the brothers manufactured the evidence of the blood-stained cloak to account for his disappearance (37[31ff]).

In Egypt Joseph was bought by Potiphar, a court official, and the alertness and trustworthiness of the slave led quickly to his appointment as *major domo*. Everything prospered under Joseph's management, but his comeliness and courtesy attracted the notice of his master's wife, whose advances, being repelled, were transformed into a resentment that knew no scruples. By means of an entirely false charge she secured the removal of Joseph to the state prison, which was in charge of Potiphar (40[3]), and where again he was soon raised to the position of overseer. In due course there came under his charge two of Pharaoh's officers, the chief butler and the chief baker, who had offended their lord. Both were perplexed with dreams, which Joseph interpreted for them. Two years later the Pharaoh himself had a dream of fat and lean cows and in another form, of plump and thin ears of grain; and so much significance was attached in Egypt to dreams that the king was distressed by his inability to find an interpreter. Thereupon the chief butler recalled Joseph's skill and mentioned him to the Pharaoh, who sent for him, and was so impressed by his sagacity that he made him Prime Minister or Vizier, with a degree of authority second only to that of the throne. The Egyptian name of **Zaphenath-paneah** was conferred on him, and he married **Asenath**, daughter of one of the most important dignitaries of the realm, the priest of the great national temple of the sun at On or Heliopolis, seven miles NE. of modern Cairo.

As Vizier Joseph's policy was to store the surplus grain during the years of plenty, and afterwards so to dispose of it as to change the system of land tenure. Famine in ancient Egypt, before the Nile was controlled, was due to failure or deficiency in the annual inundation, and several famines have been recorded in the inscriptions. One, written in the 2nd or early 1st cent. B.C., actually preserves the tradition of a famine of seven years in the reign of Djoser of the 3rd Dynasty (*c* 2700 B.C.). Joseph's procedure was to sell grain first for money (bars of gold whose weight was certified by special officials), and when all this was exhausted, grain was given in exchange for live stock, and finally for the land.

The peculiarity of the famine was that it extended over the neighbouring countries (41[56f]), and amongst others to Canaan, and the narrative in consequence resumes contact with Joseph's family there. The severity of the famine in Canaan led Jacob to send all his sons except Benjamin (42[4]) to buy grain in Egypt. On their arrival they secure an interview with Joseph (42[6]); but in the grown man, with his shaven face and Egyptian dress, they entirely failed to recognize their long-lost brother. The rough accusation that they were spies aroused their fears, and they defended themselves by giving a full account of their family, from which Joseph learned that their youngest brother, Benjamin, had not accompanied them. After further adding to the apprehension of his brothers, Joseph retains one as a hostage for the delivery of Benjamin, and he sends the rest home. On their return home, according to 42[35], or at the first camping-place, according to 42[27], the discovery by the brothers of their money in their sacks increased their anxiety. For a time their father positively refused to consent to further dealings with Egypt, but at length his resolution broke down under the pressure of the famine (43[11ff]), and the brothers went again to Egypt for food, accompanied this time by their brother Benjamin. In Egypt they were invited to a feast in Joseph's house, where they were seated according to age, much to their surprise (43[33]), and Benjamin was singled out for a special portion (43[34]). They set out for home in high spirits, unaware that Joseph had directed that each man's money should be placed in his sack and his own divining-cup in the sack of Benjamin (44[12]). Overtaken by Joseph's messenger, they were charged with theft, and returned in a body to Joseph's house. His reproaches elicited a frank and pathetic speech from Judah, after which Joseph could no longer maintain his *incognito*. He allayed the fears of his conscience-stricken brothers by the assurance that they had been the agents of Providence 'to preserve life' (45[5]; cf Ps 105[17ff]); and in the name of the Pharaoh he invited them with their father and households to settle in Egypt, with the promise of support during the five years of famine that remained.

Goshen, a pastoral district in the eastern Delta, was selected as the new home of Jacob and his family (46[34]), and here they settled and prospered (47[27f]). Before Jacob died, he blessed Joseph's two sons, Ephraim and Manasseh, giving preference to the younger in view of the greatness of the tribe to be derived from him, and leaving Joseph himself one portion above his brothers, viz. Shechem (48[22] RVm). After Jacob's death his body was embalmed according to Egyptian custom, he was mourned for the royal period of seventy days (50[3]) and buried with great pomp in the cave of Machpelah. Presently Joseph himself died at the age of 110 (50[22]), which in Egypt was considered the length of a prosperous life. The body was embalmed and placed in a coffin to await its transfer to Canaan. In due course it was taken over by Moses (Ex 13[19]) and eventually buried at Shechem (Jos 24[32]).

Of the general historicity of the story of Joseph there need be no doubt, but all the details are not necessarily correct. There are such striking likenesses between the Egyptian Tale of the Two Brothers and the story of Potiphar's wife (39[7-20]) that there must be some borrowing here. Allowance must also be made for the play of imagination in the long period that elapsed before the traditions were reduced to writing in their present form, and for the tendency to project the characteristics of a tribe backwards on some legendary hero. But the

incidents as a whole are too natural and too closely related to be entirely a product of fiction. The Egyptian background is remarkably true to fact. The titles of the various officials are such as are found in Egyptian inscriptions. The embalming of Jacob and Joseph (Gn 50[2, 26]) was common Egyptian practice in the case of a personage of importance. The birthday of the Pharaoh is known to have been an occasion for feasting (cf 40[20]). The Pharaoh's gifts to Joseph upon the latter's induction into the office of Vizier and the special robe of office (41[42]) are quite in keeping with Egyptian customs as we know them. Also shepherds were an abomination to the Egyptians (46[34]; cf 43[32]) because they were foreigners from the desert.

The story of Joseph is remarkably well told. Its plot is unexcelled, and the interest is maintained to the very end. Joseph's own character as depicted is singularly attractive. Dutifulness (1 Mac 2[53]) is perhaps its keynote, manifested alike in the resistance of temptation, in uncomplaining patience amid misfortune, and in the modesty with which he bore his elevation to rank and power. Instead of using that power for resentment he forgives his brothers and showers gifts upon them. On the other hand, there are blemishes which surprisingly are duly recorded. In his youth there was a degree of vanity that made him unpleasant. When invested with authority he treated the people in a way that would now be pronounced tyrannical, enriching and strengthening the throne at the expense of a people in distress. On the whole, however, he must be considered one of the great men of Israel, and in strength of right purpose he was second to none. R. W. M.—T. J. M.

JOSEPH (in NT).—**1. 2.** Two ancestors of our Lord, Lk 3[24, 30].

3. The husband of Mary and 'father' of Jesus.—Every Jew kept a record of his lineage, and was proud if he could claim royal or priestly descent; Joseph was 'a son of David' (Mt 1[20], Lk 2[4]). His family belonged to Bethlehem, David's city, but he had migrated to Nazareth (Lk 2[4]), where he followed the trade of carpenter (Mt 13[55]). To him was betrothed Mary, a maiden of Nazareth. It is usually assumed that he was much her senior, though the tradition of the apocryphal *History of Joseph* that he was in his ninety-third year and she in her fifteenth is a mere fable. The tradition that he was a widower and had children by his former wife probably arose in the interest of the dogma of Mary's perpetual virginity. The Evangelists tell us little about him, but what they do tell redounds to his credit. (1) He was a pious Israelite, faithful in his observance of the Jewish ordinances (Lk 2[21–24]) and feasts (Lk 2[41f]). (2) He was a kindly man (Mt 1[19]). When he discovered the condition of his betrothed, he drew the natural inference and decided to disown her, but he would do it as quietly as possible, and, so far as he might, spare her disgrace. And, when he was apprised of the truth, he was very kind to Mary. On being summoned to Bethlehem by the requirements of the census, he would not leave her at home to suffer the slanders of misjudging neighbours, but took her with him and treated her very gently in her time of need (Lk 2[1–7]). (3) He exhibited this disposition also in the nurture of the Child so wondrously entrusted to his care, taking Him to his heart and well deserving to be called His 'father' (Lk 2[33, 41, 48], Mt 13[55], Jn 1[45] 6[42]). Joseph never appears in the Gospel story after the visit to Jerusalem when Jesus had attained the age of twelve years and become 'a son of the Law' (Lk 2[41–51]); and since Mary always appears alone in the narratives of the public ministry, it is a reasonable inference that he had died during the interval. Legend says that he died at the age of one hundred and eleven years, when Jesus was eighteen; but this belongs with the 'fable' described above.

4. One of the brothers of Jesus, Mt 13[55], where AV reads **Joses**, the Greek form of the name. Cf Mk 6[3].

5. Joseph of Arimathaea.—A wealthy and devout Israelite and a member of the Sanhedrin. He was a disciple of Jesus, but, dreading the hostility of his colleagues, he kept his faith secret. He took no part in the condemnation of Jesus, but neither did he protest against it; and the likelihood is that he prudently absented himself from the meeting. When all was over, he realized how cowardly a part he had played, and, stricken with shame and remorse, plucked up courage and 'went to Pilate, and asked for the body of Jesus' (Mk 15[43]). It was common for friends of the crucified to purchase their bodies, which would else have been cast out as refuse, a prey to carrion birds and beasts, and give them decent burial; and Joseph would offer Pilate his price; in any case he obtained the body (Mk 15[45]). Joseph had a garden close to Calvary, where he had hewn a sepulchre in the rock for his own last resting-place; and there aided by Nicodemus, he laid the body swathed in clean linen (Mt 27[57–61] = Mk 15[42–47] = Lk 23[50–56] = Jn 19[38–42]).

6. Joseph Barsabbas, the disciple who was nominated against Matthias as successor to Judas in the Apostolate. He was surnamed, like James the Lord's brother, *Justus* (Ac 1[23]). Tradition says that he was one of the Seventy (Lk 10[1]). **7.** See BARNABAS. **8.** Lk 3[26] (AV); see JOSECH.

D. S.—F. C. G.

JOSEPHUS, 1 Es 9[34] (AV, RV).—See JOSEPH (in OT), **4.**

JOSEPHUS, FLAVIUS.—Jewish historian and general, born about A.D. 37 or 38, and died in the first years of the 2nd cent.

1. Life.—According to his *Life*, Josephus was descended from a Maccabaean house, and was thus of both royal and priestly lineage. He states that he showed great precocity, and that the learned men of his race used to consult him when he was fourteen years of age. At the age of sixteen he decided to investigate the teachings and practices of the Pharisees, Sadducees, and Essenes. His purpose was to choose the best sect after a thorough acquaintance with all three. These initial investigations, undertaken in Jerusalem, lasted only a few months and were inconclusive. They were followed by a three-year period of study and discipline as a disciple of a certain Banus who lived a very austere and pure life in the wilderness of Judaea. At the age of nineteen, having completed his investigations, he returned to Jerusalem and joined the Pharisees. At the age of twenty-six he went to Rome to bring about the acquittal of certain priests who had been arrested and sent to Rome for trial by Felix. In this he was successful, and even gained the favour of the Empress Poppaea.

Not long after his return from Rome the revolution of A.D. 66 broke out, and he was at once swept into its current. Of the events which follow he has given us two accounts, the earlier in the *Jewish War* [*BJ*], the later in his *Life*, written shortly before his death. These accounts are not always consistent, the latter showing more subservience to the Romans. In particular, he attempts to justify himself, and the Pharisees with whom he was associated, for participation in the revolt, by declaring that they judged it better for moderate men than for radicals to direct the course of events. The *BJ*, however, does not suggest this questionable proceeding on the part of the Jewish authorities.

The course of the war in Galilee, and particularly his own relations therewith, are minutely narrated by Josephus. His position was one of great difficulty. The Galilaeans were grouped in various parties, ranging from those who opposed war with Rome to radicals like those who followed John of Gischala. The plans of Josephus and his fellow-commissioners from Jerusalem were further complicated by jealousies between the various cities, particularly Sepphoris, Tiberias, and Tarichaeae. None the less, Josephus seems to have gone about the work of organizing the revolution energetically. He fortified the cities as well as he could, and attempted to introduce Roman military methods among the troops he was gathering. Whether he was, as he claims, too strict in the matter of booty, or, as his enemies claimed, too lukewarm in the cause of

the revolution, complaints were lodged against him at Jerusalem, and an investigating committee was sent into Galilee. Various adventures then followed, but in the end Josephus seems to have been acquitted and to have gained a complete ascendancy over his local enemies. John of Gischala, however, subsequently went to Jerusalem, and proved a persistent enemy, while the Zealot party as a whole seems never to have been satisfied with the attitude of Josephus.

The approach of Vespasian from the north at once showed how half-hearted had been the revolutionary sympathies of many of the Galilaean cities. Several of them surrendered without serious fighting, and Vespasian, after one or two desperate battles, was soon in possession of all Galilee excepting Jotapata in the central section of Galilee, where Josephus and his surviving troops were entrenched. Reinforcements the Sanhedrin could not send, and for forty-seven days the Romans besieged the city. During that time Josephus, if his own account is to be believed, performed marvellous deeds of strategy and valour. But all to no purpose. The city fell, and was razed to the ground. Josephus was taken prisoner, after having by a trick escaped being killed by his own soldiers. On being brought to Vespasian he claimed prophetic ability, and saluted the general as Emperor. For this and other reasons he won favour with Vespasian, was given his freedom, and took his benefactor's family name, *Flavius*.

When Titus undertook the siege of Jerusalem, Josephus accompanied him as interpreter or herald. By this time, however, he had become hateful to the Jews, and could accomplish nothing in the way of inducing them to make terms with the Romans. When the city was captured, he was able to render some service to the unfortunate Jews because of the favour in which he stood with Titus. He was subsequently given estates in Judaea, and was thus enabled to live during the remainder of his long life as a gentleman of leisure, devoted to the pursuit of literature. He enjoyed the friendship of Titus and of king Agrippa II. He was several times married, and left several children.

2. Writings.—The chief importance of Josephus lies not in his career as a leader of the Jewish revolution, but in the works which have come down to us. Generally speaking, his writings are intended to disabuse his Greek and Roman contemporaries of some of the misconceptions that then existed concerning the Jews. To that end he does not hesitate to employ various ingenious interpretations of historical events, as well as legends, and even to hint that the Jewish records which he quotes have certain allegorical meanings to be disclosed in a subsequent work, which, however, he never wrote.

(1) The earliest of these writings is that *Concerning the Jewish War*, a work in seven books. It covers briefly the period from the time of Antiochus Epiphanes to the outbreak of the war of A.D. 66–70, and then narrates the events of the war in detail. It was originally written in Aramaic, but was rewritten by Josephus in Greek. It was probably issued before A.D. 79, as it was presented to Vespasian. Because of the reference to the Temple of Peace as finished (*BJ* VII. v. 7 [158]), it must have been written after A.D. 75. The work is basically an apology for the Romans. However, it is also an apology for the Jews, in that it pictures the extremist elements which favoured war with Rome as misguided, selfish, and cruel men who were in no way motivated by traditional Jewish religion. Allowing for this *Tendenz* the work is of inestimable value so far as its record of facts is concerned, and particularly for the light it throws on the state of society in the midst of which Jesus laboured. The book found favour with Vespasian and Titus and Agrippa II.

(2) *The Antiquities of the Jews.*—This great work in twenty books is one of the most important monuments which have come down to us from antiquity. It was published in the year A.D. 93. It covers the history of the Jews from the earliest Biblical times to the outbreak of the revolution of A.D. 66. It is particularly interesting as an illustration of the method by which the facts of Hebrew history could be rewritten for the edification of the Greeks and Romans. It abounds in legends and curious interpretations. Josephus was by no means dependent upon the OT exclusively. He constantly refers to non-Biblical writers, mentioning by name most of the Greek and Roman historians. He used constantly the works of Alexander Polyhistor, Nicolaus of Damascus, and Strabo. He probably also used Herodotus. The work abounds in collections of decrees and inscriptions which make it of great value to secular as well as to Biblical historians. The later books give very full accounts of the life of Herod I., for which Josephus is largely dependent upon Nicolaus of Damascus, the historiographer of Herod. In his treatment of the Maccabees he is largely dependent upon First Maccabees. His account of the successors of Herod is hardly more than a sketch, but that of the events leading up to the revolution is more complete.

(3) The *Life.*—This work was written in reply to Justus of Tiberias, in which Josephus was accused of causing the revolt. In his *Life* Josephus represents himself as a friend of the Romans, but many statements are disproved by his earlier work, the *BJ*. This *Life* appeared after the death of Agrippa II., that is, in the beginning of the 2nd cent.

(4) *Against Apion.*—This is a defence of the Jewish people against the attacks of their enemies and calumniators, chief among whom was Apion, a grammarian of Alexandria, who wrote during the first half of the 1st. cent. A.D. It was written probably about the same time as the *Life*, and is particularly valuable as a narrative of the charges brought against the Jewish religion by the Greeks. It also serves as an exposition of the customs and views of the Jews of the 1st cent., not only in Judaea but throughout the Dispersion.

3. The importance of Josephus to the Biblical student.—As a contemporary of the NT writers, Josephus describes the Jewish background of Christian history as does no other writer of antiquity. The Book of Acts is particularly illuminated by his writings, while the chronology of the Apostolic period is given its fixed dates by his references to Jewish and Roman rulers. Josephus, it is true, does not add to our knowledge of the life of Christ. While his reference to John the Baptist is possibly authentic, and while it is not impossible that he mentions Jesus, the entire passage (*Ant.* XVIII. iii. 3 [63 f]) can hardly have come from Josephus in its present form. At the same time, his narrative of the events of the Gospel period and his description of the character of the various rulers of Judaea serve to corroborate the accuracy of both the Gospels and Acts. As furnishing data for our knowledge of Jewish legends, parties, practices, and literature, his importance is exceptional. Even if we did not have the Mishnah, it would be possible from his passages to reconstruct a satisfactory picture of the Jewish life of NT times. His few references to the current Messianic expectations of his day are particularly valuable. On the other hand, his comments upon and explanations of the OT are of comparatively small value. S. M.—**W. R. F.**

JOSES.—1. One of the ' brethren of the Lord ' (Mk 6^{3} $15^{40, 47}$, Mt 27^{56}). In Mt 13^{55} AV has **Joses**, but RV, RSV correctly **Joseph.** **2.** The natal name (Ac 4^{36}AV) of **Barnabas**; RV, RSV correctly **Joseph.**

JOSHAH.—A Simeonite chief, 1 Ch 4^{34}.

JOSHAPHAT.—1. One of David's heroes, 1 Ch 11^{43}. **2.** A priest in David's time, 1 Ch 15^{24} (AV **Jehoshaphat**).

JOSHAVIAH.—One of David's heroes, 1 Ch 11^{46}.

JOSHBEKASHAH.—A son of Heman, 1 Ch $25^{4, 24}$. There is reason to believe that this and five of the names associated with it are really a fragment of a hymn or prayer.

JOSHEB-BASSHEBETH.—Name found in 2 S 23^{8} (RV, RSV) in place of the meaningless ' that sat in the seat ' of AV. The text is corrupt, and the name **Jashobeam** should be restored from the parallel 2 Ch 11^{11},

though this in turn is probably a corruption of **Ishbaal.** Cf JASHOBEAM.

JOSHIBIAH.—A Simeonite chief, 1 Ch 4[35] (AV **Josibiah**).

JOSHUA (on forms and meaning of the name see next article).—**1.** The successor of Moses. See next article. **2.** The Bethshemite in whose field was the stone on which the Ark was set, on its return from the land of the Philistines, 1 S 6[14, 18]. **3.** The governor of Jerusalem in the time of Josiah, 2 K 23[8]. **4.** The high priest who along with Zerubbabel directed affairs at Jerusalem after the restoration, Hag 1[1, 12, 14] etc., Zec 3[1, 3, 6] etc. In the books of Haggai and Zechariah he is called **Joshua,** in Ezra and Nehemiah **Jeshua** (q.v.). See also JESUS, **4.**

JOSHUA (cf JESUS, **1**).—The son of Nun, and divinely appointed successor to Moses as leader of Israel (Nu 27[18ff], Dt 34[9], Jos 1[1ff]). He is called **Hoshea** in Nu 13[8], and in 13[16] this is represented as his original name, the name Joshua (*Y*e*hôshūa*ʿ) having been given him by Moses. The intent of this would seem to be to account for the fact that one already grown up before the Divine name Yahweh was revealed (Ex 6[2]) nevertheless bore a name of which Yeho (=Yahweh) was a component. Hoshea appears again in Dt 32[44], probably by a scribal error; Samaritan and the versions read Joshua. The most likely rendering of the name is 'Yahweh is salvation.'

He commanded the army in the battle with Amalek (Ex 17[8–16]), attended on Moses at the Mount of God (24[13] 32[17]) and at the Tent of Meeting (33[11], Nu 11[28]); all these passages are from the northern tradition, E. He was one of the twelve spies (Nu 13[8, 16] 14[6], P), and he and Caleb were the only adults who were not involved in the revolt against Moses following the mission of the spies and alone were spared to enter Palestine (14[30, 38], P). He was the leader in the conquest of Palestine, and the division of the land among the tribes was carried through under his auspices (see following article). He was buried in Timnath-serah (Jos 19[50] 24[30] =Timnath-heres, Jg 2[9]) in the hill country of Ephraim. This explicit mention of his burying-place may be taken as an indication that there was when the story was written a grave at Timnath-serah known as the grave of Joshua, and this in turn points to Joshua's historical reality as a person, and tells against the view that he is simply a personification of a clan in Ephraim, and that his leadership in Israel represents, and puts back into the period of the conquest, the commanding position which that tribe had come to hold in the Israelite confederation. Nevertheless the question as to what part he actually played in Israel's history is a difficult one. The designation of him as an Ephraimite in Nu 13[8] is supported by the location of his grave in the territory of that tribe. This being the case, he will have been the successor of Moses only if Ephraim or some of its clans were among those which escaped from Egypt. If, however, as has been argued by a number of scholars, the experience of the Exodus was limited to certain southern clans, which alone came under the influence of Moses, Joshua can scarcely have been his attendant or his successor, but will have been an independent figure who came to be associated with Moses when the traditions of the north and the south were unified. Again, the tradition makes Joshua a military leader. It might have been expected that it would tell of his conquest of the territory historically possessed by his own tribe; yet, except for Hazor in the north (Jos 11[1–9]) and Makkedah in the south (10[16ff]), all the exploits recounted in Jos 1–12 occurred within the territory of Benjamin. And here there is a further difficulty: the taking of Jericho and the destruction of Ai cannot have been accomplished by the same man. There is as yet no agreement among archaeologists as to the date of the fall of Jericho, but on any reckoning it must have occurred more than 500 years after the destruction of Ai in 2000 B.C. There are, moreover, indications in the OT itself that the Israelite settlement in Palestine was not by conquest but by a slow process of infiltration. Thus the fighting described in the book of Joshua must have occurred not when the Israelites were coming in from the desert, but years later when they were gradually extending their control over the land. But this fighting in course of time may well have given rise to the tradition of a conquest rather than of infiltration, and have led to the fitting together of various legends of diverse origin to make a continuous narrative, of which the Ephraimite Joshua was made the hero, possibly because he was historically a military leader. On the other hand, his rôle may actually have been that of an administrator or statesman, such as Jos 12–14 represents him to have been. However that may be, the subsequent growth of the legend concerning him can scarcely have occurred if he had not in fact played an important part in the history of the northern tribes.

A. C. W.—C. A. Si.

JOSHUA, BOOK OF.—1. Place in the Canon.—The book was placed by the Jews among the Early Prophets, *i.e.* Joshua, Judges, Samuel, Kings. It might have been expected that since Genesis, which recounts the origins of the nation to which the Torah was delivered, was included in the Torah—the first division of the Canon—Joshua, which relates the conquest of the land in which the Torah was to be practised, would also be included. But this assumes that Deuteronomy was already regarded as the fifth book of the Torah when Joshua assumed its present form. The literary evidence, however, suggests that the book of Deuteronomy, as distinguished from the code, once formed part of a history of Israel which continued through Joshua, Judges, Samuel, and Kings. Later it was separated from this and made part of the Torah, both because of its legal content and because the growth of the legend of Moses had made him a key figure, not only in the tradition of the tribes of the Exodus, but in the national tradition as a whole, so that his death was held to mark the end of an era.

Modern criticism has at times tended to reverse this judgment and to connect Joshua more closely with the Pentateuch, on the ground that, since all the pentateuchal documents look forward to the fulfilment of Yahweh's promise of Palestine, Joshua, which relates the conquest, is a necessary sequel. It must be remembered, however, that the earlier histories upon which the pentateuchal narrative is based did not end with the conquest; they continued the story to the disruption of the kingdom. Furthermore, Deuteronomy looks forward beyond the conquest to the establishment of a national sanctuary, for which Joshua provides the foundation. The connexion of Joshua with the Pentateuch is no closer than its connexion with Judges, Samuel, and Kings.

2. Structure and contents.—The book falls into three parts: (*a*) the conquest, chs. 1–12; (*b*) the division of the land, chs. 13–21; (*c*) a conclusion, chs. 22–24. It is convenient to discuss these separately.

(*a*) The foundation of chs. 1–12 is a narrative which is clearly a conflation of two accounts of the conquest, one of which is derived from the so-called J tradition, the other from that of E, whether or not they were compiled by the same authors as the corresponding material in the Pentateuch. It relates the mission of the spies to Jericho (2[1–9, 12–23]), and the consequent passage of Jordan (3[1–6, 8b, 13–16] 4[4a, 5, 8, 10f, 18]). It recounts the circumcision at Gilgal, which it views as a novelty ('the second time' of 5[2] is absent from the LXX), since by this means the reproach of the circumcised Egyptians is removed from the people (5[2f, 8f]). The story of the capture of Jericho and of Ai follows, with the trespass of Achan (5[13]–8[29]). Joshua then makes a compact with the Gibeonites (9[3–9a, 11–15a, 16, 22f, 26, 27a]), and advances to the victory at Beth-horon (10[1–7, 9–14]), to the execution at Makkedah (10[15–24, 26f]), and to the victory at the Waters of Merom (11[1–9]).

All the incidents in this narrative, with the exception of the Makkedah episode (10[15ff]) and the campaign against Hazor (11[1–9]), occurred within a very limited area, practically co-terminous with the territory of Benjamin. This suggests that the author who first

undertook to write an account of the conquest of central Palestine built it up round various local traditions of diverse origin—those of Gilgal, Jericho, Ai, Achan, and Gibeon—which, it has been cogently argued, had been preserved at the sanctuary of Gilgal. These he put together into a connected story, supplementing them with the Makkedah legend (to which that of Hazor was later added), and attaching them to the name of the Ephraimite hero Joshua (see preceding article). The conquest of the south had already been described by an earlier author, who utilized the traditions of the tribes concerned, together with a legend of the capture of Bethel (Jg 1^{3-26}). This the author of the earliest Joshua story left substantially intact, placing the events after the death of Joshua (Jg 1^{1f}). He said nothing, however, of the conquest of the land north of Benjamin, presumably because there was no tradition about this available to him. He must have closed his account with some statement to the effect that Joshua subdued the whole land (cf 11^{23a}), before passing on to his description of its division among the several tribes in section (*b*); see below. The second document underlying the present story in chs. 1–12 included the Hazor campaign (11^{1-9}) and the Shechem legend (8^{30ff} 24^{1-28}, in part; see below). But even when this material was conflated with the earlier work the resultant narrative still lacked any reference to a conquest of Ephraim and Manasseh.

This account has been thoroughly revised by an editor who is closely akin in spirit and language to the author of the framework of Deuteronomy. He added an introduction into which he has fused earlier material (ch. 1). He emphasized the activity of Yahweh in the events narrated (2^{24} 3^{9-11} $4^{1-3, 6f, 20-24}$ 9^{9b-10} $10^{8, 25}$), His exaltation of Joshua (3^{7} 4^{14}) and the fear inspired in the Canaanites (2^{10f} 5^{1} 9^{24f}); and further embellished the story with some minor details (3^{17} $4^{9, 12}$ $7^{7, 12}$ 9^{1f} 11^{10-15}). But it was the addition of the lists in 10^{28ff} 11^{16ff} and ch. 12 which completely changed the pattern of the narrative; for they not only extend the range of Joshua's conquests in the north (11^{16b} 12^{16b-24}) but also represent him as the conqueror of the south (10^{28-43} $11^{16a, 21f}$ $12^{8, 11-16b}$), thus rejecting Jg 1^{3-20} (cf Jos 14^{12} 15^{15ff}). Obviously the concern of this author was to reaffirm in concrete terms the faith of Israel that Yahweh had given them the land, and he did this by ascribing to one representative figure, and assigning to a relatively brief period, operations which had covered a considerable time and engaged many leaders. It was, it may reasonably be assumed, this editor who omitted Jg 1^{1}–2^{5} from the Joshua-Judges narrative (to which it was later restored), and inserted such parts of it as were not covered by Jos 10^{28-43} at the appropriate points in chs. 13–19: 15^{13-19} (=Jg $1^{10, 20, 11-15}$), 15^{63} (=Jg 1^{21}), 16^{10} (=Jg 1^{29}), 17^{11-13} (=Jg 1^{27f}). He may also be responsible for the present position of 17^{1b} and 13^{13}, derived from an earlier account of the conquest of Gilead by Machir (cf Nu $32^{39, 41f}$); and for 19^{47}, which was added when the story of the migration of the Danites (Jg 17 f) was omitted.

This deuteronomic narrative was subsequently edited by a redactor of the P school, who added $4^{13, 19}$ $5^{4-7, 10-12}$ $9^{15b, 17-21}$. Whether or not he was dependent upon a P account of the conquest, it is impossible to say.

(*b*) Chs. 13–21, more complex in structure than chs. 1–12, are a conflation of two accounts of the division of the land. The first, that of JE, told how Joshua first assigned their territory to Judah and the Joseph tribes (13^{1-8} 14^{6-15} 17^{14-18}), and then sent a commission through the country to divide the rest of the land into seven portions to be assigned to the remaining tribes by lot (18^{2-10}), Reuben and Gad having already received their territory, while Levi was to have no tribal possession. This was followed by an account of the actual assignment, each portion being described in terms of the cities it contained. It has been argued with considerable cogency that the lists of the cities of Judah (15^{21-62}), Benjamin (18^{21-28a}), Simeon (19^{2-8a}), and Dan (19^{41b-45}), were taken from an official record of the kingdom of Judah, prepared in the reign of Josiah, which had later been incorporated into the J document. The names of the cities in the territory of the other tribes ($19^{15, 18b-22a, 25b-28a, 29b}$ in part, $30a, 33$ in part, $35-38a$) may have been derived from similar lists; with them belong the several references to 'the cities with their villages' in 19^{16ff}. 19^{49b-50} closes the account. It is impossible to determine the extent to which this JE material has been revised by the Deuteronomic editor; $13^{9-12, 14}$ certainly comes from his hand, as does 21^{43-45}.

The second account, with which the first is now conflated, gives the boundaries of the territory assigned to each of the tribes. This appears to be dependent upon an already existing document which, according to some scholars, was drawn up before the foundation of the State, and described not only the land actually possessed by the several tribes at that time, but also the land to which they laid claim. The fact that this material is in most cases here introduced by formulae in the style of P suggests that its inclusion is due to the activity of a redactor of the P school; and the further fact that it places the proceedings at Shiloh (18^{1}), not at Gilgal as is implied by 18^{5b} (JE), may point to some dependence upon the tradition of the pre-monarchical inter-tribal federation. The beginning of this account is now contained in 18^{1}, its present position being due to the exigencies of conflation. To it belong 13^{15}–14^{5} 5^{1-12a} 16^{1-9} 17^{1-10} $18^{11-20, 28b}$ $19^{1, 8b-9, 10-14, 16-18a, 22a\beta}$ $23-25a, 28b-29, 31-34, 39-41a, 46, 48a, 49a, 51$. From the same priestly redactor come $20^{1-3, 6a, 7-9}$, the law and list of the cities of refuge (to which vv.$^{4f, 6b}$, missing from LXX, were later added), and 21^{1-42}, the list of Levitical cities.

(*c*) Underlying 22^{9-34} is the JE account of the return of the two and a half east-Jordan tribes to their own territory, for which the Deuteronomic editor provided an introduction, vv.$^{1-8}$. The original story has been heavily edited by the priestly redactor in the light of the tradition of the pre-monarchical federation. 24^{1-28} is the JE account of the renewal of the covenant at Shechem, to which the deuteronomic author of the book has made a number of minor additions (*e.g.* vv.$^{8b, 10a, 11b, 13, 16-18a}$). More important than these, however, is his substitution of vv.$^{22-24, 25b, 26a}$ for the account of the erection of the altar commanded in Dt 27^{5ff}. This he placed in its present position in ch. 8^{30-35} changing the original Gerizim in v.^{30} to Ebal, and by implication locating it near Gilgal (cf Dt 11^{30}) so as to counter the Samaritan claim that the sanctuary of Gerizim near Shechem was the central sanctuary referred to in Dt 12. To the account thus revised he prefixed Joshua's final counsels (ch. 23). The account of the death and burial of Joshua, the burial of Joseph's bones, the death and burial of Eleazar, he derived from JE, adding v.^{31} looking forward to the continuation of the story in Judges.

A. C. W.—C. A. Si.

JOSIAH.—1. King of Judah, who succeeded his father Amon when only eight years old (2 K 22^{1}). The religious condition of the people, which was bad under Amon, continued without essential improvement, so far as we know, until the eighteenth year of Josiah. The sudden change then made resulted from the finding of the Book of the Law in the Temple (v.^{8ff}); but it is possible that the minds of king and people were prepared for it by the Scythian invasion. The demand of the book for a thorough reformation powerfully affected the king and his officers. The book was read publicly, and king and people entered into a solemn covenant to act according to its injunctions. Its central demand was the removal of all altars in the country except the one at Jerusalem. This was henceforth to be the only sanctuary in Judah. The carrying out of this programme is related in detail, and we learn that the conclusion of the work was marked by the celebration of the Passover in a new manner and with unusual solemnity (23^{21ff}).

Josiah's reign was characterized by justice, as we learn from Jeremiah, but we know no more of it until the end of the king's life. The Assyrian empire was tottering to its fall, and Pharaoh Neco (see NECO), who

marched to the aid of Assyria, thought to seize the provinces nearest him and attach them to Egypt. Josiah was ill-advised enough to attempt to resist him. In the battle which ensued he was slain (23^{29}). His motive in undertaking this expedition has been much discussed. Probably he hoped to restore the real independence of Judah. That he was beloved by his people is indicated by their deep and long-continued mourning. **2.** Son of Zephaniah (Zec 6^{10}). H. P. S.

JOSIAS.—**1.** AV and RV spelling of **Josiah**, King of Judah, in 1 Es 1$^{1, 7, 18, 21-23, 25, 28f, 32-34}$, Bar 1^{8}. **2.** 1 Es 8^{33} (AV). See JESHAIAH, **4.**

JOSIBIAH, 1 Ch 4^{35} (AV).—See JOSHIBIAH.

JOSIPHIAH.—The father of one of Ezra's companions, Ezr 8^{10}, 1 Es 8^{36} (AV, RV **Josaphias**).

JOT AND TITTLE.—In Mt 5^{18} AV Jesus says, 'Till heaven and earth pass, one jot or one tittle shall in no wise pass from the law, till all be fulfilled' (|| Lk 16^{17}). The Greek words *iōta* and *keraia* (WH *kerea*) were translated by Tyndale 'iott' and 'tytle,' and these forms were retained in all the versions. The 1611 edition of AV has 'iote' (one syllable) and 'title,' but modern printers have turned 'iote' into 'jot,' and 'title' into 'tittle.' The *iota* is the smallest letter of the Greek alphabet, as is the *yod* in the later Hebrew. The *keraia* (literally 'little horn') is any small mark distinguishing one letter from another, like the stroke of a *t*. RSV reads, 'not an iota, not a dot.'

JOTBAH.—Home of the mother of King Amon, 2 K 21^{19}, possibly *Kh. Jefât* in Galilee, known as Jotapata in Roman times.

JOTBATH, Dt 10^{7} (AV).—See JOTBATHAH.

JOTBATHAH.—A station in the journeyings of the Israelites, Nu 33^{33f}, Dt 10^{7} (AV **Jotbath**). It is described as 'a land with brooks of water.' It is possibly modern *'Ain Ṭābah*, N. of the Gulf of 'Aqaba.

JOTHAM.—The youngest son of Jerubbaal, who, by hiding himself, escaped the massacre of his brethren by **Abimelech,** Jg 9^{5}. When Abimelech had been proclaimed king by the Shechemites, Jotham appeared, close to where they were assembled, on Mt. Gerizim, and addressed to them the 'Parable of the Trees' (9$^{8-20}$). The parable, which is somewhat incongruous in parts, is intended as an appeal to the conscience of the Shechemites; in case the appeal should turn out to be fruitless (which indeed proved to be the case), Jotham utters a curse (v.^{20}) against both Abimelech and the Shechemites. This curse is shortly afterwards fulfilled. After his address, Jotham flies to Beer (v.^{21}), and we hear of him no more. W. O. E. O.

JOTHAM.—**1.** A king of Judah in the time of Isaiah. His father was afflicted with leprosy, and Jotham had some sort of regency before becoming sole ruler, 2 K 15^{5}. We know nothing of him except that he rebuilt or ornamented one of the gates of the Temple (v.^{35}), and that the hostilities which later culminated in the invasion of Judah began before his death (vv.^{37f}). **2.** A Calebite, 1 Ch 2^{47}. H. P. S.

JOY.—Verbs and nouns expressive of joy are characteristic of Biblical religion, and are a notable feature of the cultus in the OT. There are, of course, the normal human occasions for rejoicing, as at a bountiful harvest or a military victory (Is 9^{3}), a happy marriage (Pr 5^{18}), the pleasures of food and comfort (Ec 8^{15}, Pr 27^{9}) and of health and strength (Ec 11^{9}). In general, it may be said that joy is the product of a healthy relationship between God and man, a fact that is expressed in the first psalm ('Blessed' in v.^{1} means 'O the happiness of'). Yahweh Himself rejoices in His creative work (Ps 104^{31}) in the maintenance of His people's life (Dt 30^{9}), or at the restoration of His people from distress (Is 62^{5}). In Zeph 3^{17}, the whole vocabulary of joy is used of God in His saving work for His people. This thought is reflected in Lk 15$^{7, 10}$ in relation to the repentance and salvation of the sinner, and is expressed in the Fourth Gospel at the heart of the Passion (Jo 15^{11} 17^{13}; cf He 12^{2}). The Nativity is therefore a word of great joy (Lk 2^{10}).

The OT terminology expresses the emotion of joy (*śimḥāh, māśôś*), or joy as an aspect of ritual activity (*gîl, rinnāh*), though these are not sharply distinguished. The fullness of life experienced by the people of God produces joy, cf Ps 36$^{5-9}$ 63$^{1-7}$; it is known to those who live by God's constant love, faithfulness, righteousness, and salvation. It is not, however, merely an emotion; it leads to the fulfilment of God's will in moral and ritual activity (Dt 12$^{7, 10-12}$, Ps 19$^{7-10}$ 27^{6} 119). It is a notable feature of the deuteronomic legislation and of the Psalter. The cultic terms for joy suggest that in origin the religious joy was of an uninhibited and ecstatic character, and even in the post-exilic religion the sound of rejoicing could be considerable (Neh 12^{43}).

The expectation of the fulfilment of the Divine sovereignty in the Day of the Lord is associated with the joy of His people (Is 12$^{1-3}$ 65$^{17-19}$). So the expressions of gladness and mirth at the festivals of coronation come to full expression when the whole world of men rejoices that Yahweh is King (Ps 96$^{7-13}$); for the complete manifestation of His sovereignty is the fulfilment of the created order (cf also Is 35$^{3-10}$ 49^{13} 55^{12f}, Zec 9^{9} etc.).

It is in these terms that the announcement of the birth of Jesus is associated with joy, and whatever be the origin of the hymns in Luke, it is appropriate that the Magnificat should be uttered by His Mother. Those who hear and recognize the proclamation of Jesus are described as supremely happy (Mt 13^{16}), as is Peter at the moment of revelation (Mt 16^{17}). The deep joy of Jesus as the signs of the New Age are manifested in the work of His disciples, is described in Lk 10^{21f}. This quality characterized the life of the early Church (Ac 2^{46}), and is especially apparent as the Gospel is effectively proclaimed among Samaritans (8^{8}) and Gentiles (13$^{48, 52}$ 15^{3} 16^{34}). One of the notable features of the Pauline epistles is the note of rejoicing. It is part of the harvest of the Spirit (Gal 5^{22}; cf Ro 14^{17}), and is most manifest in adversity (Ph 1$^{4, 18}$ 4^{4}); the Christian is to 'rejoice always' (1 Th 5^{16}). Not only are the afflictions that beset the faithful servant of Christ unable to quench his joy, they may even be the occasion for rejoicing (Ro 5$^{3-11}$, Col 1^{24}; cf 1 P 1$^{6-12}$), since they are evidence that the fulfilment of all things is at hand. It is in these terms that the persecuted Church is called to rejoice (Rev 19^{7}), and it is noteworthy that the Apocalypse has preserved, more than any other part of the NT, the hymns of the early Church (Rev 5^{9f} 12^{13} 7^{12} 15^{3f} etc.). A. S. H.

JOZABAD ('Y" has bestowed').—**1. 2. 3.** Three of David's heroes, 1 Ch 12^{4} (AV **Josabad**) $^{20, 20}$. **4.** A Levite in the time of Hezekiah, 2 Ch 31^{13}. **5.** A Levite in the time of Josiah, 2 Ch 35^{9}; called **Joram** in 1 Es 1^{9}. **6.** A priest who had married a foreign wife, Ezr 10^{22}; in 1 Es 9^{22} called **Gedaliah** (AV, RV **Ocidelus**). **7.** A Levite, Ezr 8^{33} 10^{23}, 1 Es 8^{63} (AV **Josabad,** RV **Josabdus**), 9^{23} (RV **Jozabdus**). **8.** A Levite who expounded the Law, Neh 8^{7}, 1 Es 9^{48} (AV **Joazabdus,** RV **Jozabdus**). **9.** A Levite of Jerusalem, Neh 11^{16}. Possibly **7, 8, 9,** are the same man. See also JEHOZABAD.

JOZABDUS.—**1.** 1 Es 9^{23} (RV); see JOZABAD, **7.** **2.** 1 Es 9^{29} (RV); see ZABBAI, **1.** **3.** 1 Es 9^{48} (RV); see JOZABAD, **8.**

JOZACAR.—In 2 K 12^{21} it is said that Jozacar (AV **Jozachar**) the son of Shimeath and Jehozabad the son of Shomer murdered Joash. In 2 Ch 24^{26} he is called **Zabad.** See SHIMEATH.

JOZACHAR, 2 K 12^{21} (AV).—See JOZACAR.

JOZADAK.—See JEHOZADAK.

JUBAL.—A son of Lamech by Adah, and inventor of musical instruments, Gn 4^{21}. The name probably contains an allusion to *yōbhēl*, 'ram's horn.'

JUBILEE.—See SABBATICAL YEAR.

JUBILEES, BOOK OF.—See PSEUDEPIGRAPHA, **2.**

JUCAL.—See JEHUCAL.

JUDAEA.—The Graeco-Latin name of Judah, but derived from the Aramaic gentilic *yᵉhûdhā'î*. In Persian times it was called *Yᵉhûdh* (so on coins), and the term was restricted to the district round Jerusalem. The oldest instance of the form Judaea is found in a fragment of *c* 320 B.C. (Jos., *c. Ap.* i. 22 [179]). It is regularly used in 2 Maccabees, but in 1 Maccabees both Judah and Judaea are employed. In the latter work the concept does not include the northern districts that were acquired under Jonathan in 147 B.C. (1 Mac 11[28, 34]). In the NT it can include these districts. Idumaea, which began south of Beth-zur (q.v.), was sometimes considered separate (Mk 3[7]), though Josephus makes it one of the eleven districts of Judaea (*BJ* III. iii. 5 [55]). Samaria and Galilee were separate geographical concepts. However, the expansion of Judaea under the Maccabees, until the kingdom embraced all Palestine (except some Hellenistic cities), and the realm of Herod, which was governed from Jerusalem, gave the term Judaea a more comprehensive use, alongside of the narrower one. This can be seen in numerous passages of Josephus. In the NT we also find it employed broadly (cf Lk 1[5] 4[44] 7[17] 23[5], Ac 10[37] 11[1, 29] 26[20]). It can even be used of Transjordan (Mt 19[1]). Its mention in the enumeration of Acts 2[9] is uncertain as to dependability or application. The broad use once established continued even after Augustus ousted Archelaus (A.D. 6) and took Judaea proper as well as Samaria under Roman administration, with the governor residing at Caesarea, while Galilee and Peraea were left to the tetrarch Herod Antipas. A temporary restoration of Herodian Judaea took place under the kingship of Herod Agrippa (A.D. 41–44), but thereafter Roman governors held sway until the Jewish revolt broke out in A.D. 66.

A part of Judaea proper is the *wilderness of Judaea* (in the OT the wilderness of Judah, Jg 1[16], Ps 63[1]), the bad-lands country of rocky gorges descending from the high plateau to the Jordan and the Dead Sea. John the Baptist was in the wilderness until he began his ministry (Lk 1[80]). This suggests—as many believe—that he may have been a member of the Essene community at Qumrân, the Dead Sea Scrolls community made famous by modern discoveries. His preaching in the wilderness (Mk 1[4] etc.) may, however, be an echo of prophecy (Is 40[3]). Actually he preached at the Jordan fords. E. G. K.

JUDAH.—Popular etymologies regard the name as a semi-Aramaic Hoph'al imperfect of *yādhāh* 'to praise' (Gn 29[35] 49[8]). He is represented as the fourth son of Leah by Jacob (Gn 29[35] [J] 35[23] [P]), and in the Judaean tradition (J) he is given precedence over Reuben, the first-born, who is favoured by the northern Ephraimite tradition (E). According to J, it was Judah who proposed to sell Joseph in order to avert the danger which threatened him at the hands of his brethren (Gn 37[26ff]). Similarly, when they return to Joseph's house with the silver cup, J gives the pre-eminence to Judah, and makes him spokesman for all in his pathetic appeal to Joseph (44[14–34]). The Blessing of Jacob (Gn 49) makes Judah the ruler, with Reuben displaced because of his lust towards Bilhah and his general instability (Gn 49[4]), whilst the next two sons of Leah are scattered because of their barbarous conduct towards Shechem (Gn 34) and fall into disfavour with their brethren. Gn 49 probably reflects the situations of the tribes in the time of David. On the other hand the Blessing of Moses (Dt 33) reflects the time of the two monarchies with the northern kingdom much more powerful than Judah, the southern kingdom.

A tradition is preserved in Gn 38 which is generally supposed to be of great value as bearing upon the early development of the tribe. Judah is there said to have withdrawn himself from his brethren and to have gone down to meet a certain Adullamite whose name was Hirah. There he met with Bath-shua, a Canaanitess, whom he took to wife. She bore him three sons, Er, Onan, and Shelah. Er and Onan were slain by Yahweh for their wickedness. Er's widow, Tamar, a Canaanitess also it seems, posing by the wayside as a hierodule, enticed Judah to intercourse with her, and of her the twin sons Perez and Zerah were born to Judah. This story is usually held to be based upon facts of tribal history, and to show that, though we have here a personal narrative, Judah is certainly the eponymous head of the tribe. The story points to the settlement of Judah in the region of Adullam and equally clearly to the tribe's union with foreign stock. Hirah is a Canaanite clan; Shelah, Perez, and Zerah continued as elements in Judah. Besides these, in the time of David the Calebites and the Jerahmeelites, mentioned in 1 Ch 2 as descendants of Perez, were incorporated into the tribe of Judah. In 1 S 27[10] 30[14] they still appear to be independent, though the Chronicler makes both of them to be descendants of Judah through Perez and Hezron, to whom also he traces David. In Nu 13 (P) Caleb belongs to Judah; but in Nu 32[12], Jos 14[6, 14], Jg 3 etc., he is a Kenizzite, the son of Kenaz. From the last passage we see that Othniel, whose chief centre was Kiriath-sepher (Debir), was another closely related tribe, and both appear from Gn 36[16, 42] to have been Edomites. Kenites, commonly supposed to be of Midianite origin, we are told in Jg 1[16], also went up from Jericho with Judah into the southern Wilderness of Judah.

Of all these foreign elements by which the tribe of Judah was increased, the Calebite was the most important. It was the Calebite capital, Hebron, that under David became the capital of Judah in the days before David captured Jebus (Jerusalem). After this time the history of the tribe becomes the history of the Southern Kingdom. The territory of the tribe is described in Jos 15[1ff] (P), but this is late and an ideal apportionment.

The 10th-cent. tribe of Judah was the creation of David, and was composed of the original Hebrew nucleus with the addition of all 'his friends' mentioned in 1 S 30[26–31], those with whom he shared the spoil of his freebooting days. All the places here mentioned were S. of Hebron. See also TRIBES OF ISRAEL.

There were four men named Judah in Ezra's time: a Levite (Ezr 10[23]), an overseer (Ne 11[9]), a musician (Neh 12[8]) and a priest (Neh 12[36]). N. H. S.

JUDAH.—**1.** See preceding article. **2.** A Levite mentioned Ezr 3[9] (cf Neh 12[8]); called **Joda** (q.v.) in 1 Es 5[58]. **3.** A Levite, Ezr 10[23], 1 Es 9[23] (AV, RV **Judas**). **4.** An overseer, Neh 11[9]. **5.** A priest's son, Neh 12[36]. **6.** Lk 1[39]; see JUTTAH. **7.** See next article.

JUDAH.—According to Jos 19[34] a town of Naphtali. The site is unknown, and the text is generally believed to be corrupt.

JUDAISM (Gr. *Judaismos*), a term coined by the Greek-speaking Jews to designate their religious way of life in contrast to that of their neighbours, known as Hellenism (2 Mac 2[21] 8[1] 14[38], 4 Mac 4[26]). Paul similarly uses it in the sense of the Jewish religion and contrasts it with his new religion of Christianity (Gal 1[13f]). Its Hebrew equivalent *Yahᵃdhûth*, appearing neither in the Bible nor in the Talmud, dates from the Middle Ages (Rashi to Yebamot 23b. Esther Rabba 7 uses *Yahᵃdhûth*).

While the name is late, the phenomenon to which it refers goes back to the beginnings of Jewish spiritual life, and represents the historical religious experience of the Jewish people. The distinction often made between the religion of Israel and Judaism, identifying the first with pre-exilic and the latter with post-exilic development, is purely artificial. The basic elements of post-exilic Judaism—ethical monotheism, the consciousness of Israel's mission as the servant of God, living under the divine law, angelology, and eschatology—have their roots in the earlier period.

The Babylonian exile broke up the geographic unity of the Jewish people and initiated their ever-widening diaspora. The Davidic dynasty disappeared only to grow into an object of Messianic hope. (See MESSIAH.) What was left of political independence took the form of a theocracy, headed by a high priest of the line of Zadok. The actual sovereignty passed into the power of

the Persians, then of the Greeks and later of the Romans. The spiritual life centred in the Second Temple and to a lesser degree in the new democratic institution of the Synagogue (q.v.), which was nourished by the Reformation of Ezra and Nehemiah and by the adoption of the Torah (Pentateuch) as the supreme source of authority in Judaism. The post-exilic period was marked by the development of the three-fold canon (q.v.) of Scripture, by the growth of the extra-canonical books (see APOCRYPHA) and by the beginnings of the Oral Law. It witnessed the Samaritan (q.v.) secession, the resistance by the pietists or *Ḥasidim* of the tidal wave of Hellenism, the rise of the Essenes (q.v.) and of the Pharisees (q.v.) in opposition to the Zadokite priesthood (see SADDUCEES) as the leading force in Judaism, and the emergence of the new world religion of Christianity.

With the fall of the State and the destruction of the Temple (A.D. 70), Palestine came completely into foreign control and the Jews were driven into *Gālûth*, exile, as homeless wanderers among the nations, carrying with them the Written and the Oral Torah as their imperishable, spiritual fatherland. The synagogue now replaced the Temple as the centre of Jewish life. The sacrificial worship gave way to the service of prayer, study of Torah, and practice of charity. The leadership of the priests passed into the hands of the rabbis (q.v.), whose main function consisted in interpreting Scripture in the light of the ever new conditions that emerged. Out of their efforts grew the *Halachah* (law) and the *Haggadah* (lore), which are embodied in the *Mishnah* (3rd cent.) and in its interpretations, the Palestinian (4th cent.) and Babylonian (end of 5th cent.) *Gemaras* (see TALMUD) and in the *Midrashim*.

The growth of rabbinic Judaism roused the Karaitic opposition (8th cent.) which called for a return to Scripture. The rabbinic response to this challenge translated itself into a renewed study of the text of Scripture (see TEXT OF THE OT, **Massorah**), in the cultivation of Hebrew grammar, philology and exegesis, the systematization of the Halachah, and the development of theology, philosophy, and *Cabbalah*. The undying Messianic hope, while offering anodyne to suffering Jewry, at times degenerated into vulgar imposture on the part of pseudo-messiahs, as in the case of Sabbetai Zevi and Jacob Frank (17th and 18th cent.). Its tragic aberrations were relieved by the deeply spiritual popular movement of *Ḥasidism* in 18th-cent. Poland. Its emotional mysticism evoked the opposition of rabbinic Judaism.

The modern era began with the Enlightenment movement in Germany, whence it spread to other lands, and was followed by the struggle for political emancipation and religious reform. In reaction to mounting anti-semitism, Jewish nationalism came to renewed life in the form of Zionism, which reached its climax in the restoration of the State of Israel in 1947. Contemporary Judaism contains variations from strictest Orthodoxy to Conservatism and Reform. S. S. C.

JUDAS (in Apocrypha), the Greek equivalent of the Hebrew name *Judah*. **1.** The third son of Mattathias, called Maccabaeus (1 Mac 2^4 etc.). See MACCABEES, **2.** **2.** One of two captains who stood by Jonathan at Hazor (1 Mac 11^{70}). **3.** A Jew holding some important position at Jerusalem; he is named in the title of a letter sent from the Jews of Jerusalem and Judaea and the Jewish Senate to their brethren in Egypt, and to a certain Aristobulus (2 Mac 1^{10}). **4.** A son, probably the eldest, of Simon the Maccabee (1 Mac 16^2). In 135 B.C., he, with his father and another brother named Mattathias, was murdered at Dok by Ptolemy, the son of Abubus (16^{11-17}). **5.** 1 Es 9^{23} (AV, RV); see JUDAH, **3.**

JUDAS (in NT).—**1. Judas Iscariot.**—See following article.

2. Judas, the son of James (see JAMES, **4**), one of the twelve Apostles (Lk 6^{16}, Ac 1^{13}), perhaps identical with the Thaddaeus (q.v.) named by Mark (3^{18}) and Matthew (10^3); some MSS read Lebbaeus (q.v.). The only thing recorded of him is that, when Jesus promised in the Upper Room to manifest Himself to the one who loved Him, he asked, 'Lord, how is it that you will manifest yourself to us, and not to the world?' (Jn 14^{22}) —showing that he did not understand that Jesus' Kingdom is not of this world and therefore cannot be manifested to the world. Judas evidently still thought in terms of a visible and material messianic Kingdom.

3. Judas, the Lord's brother (Mt 13^{55} = Mk 6^3).—See BRETHREN OF THE LORD. He was presumably the author of the short Epistle of Jude (*i.e.* Judas), where he styles himself 'a servant of Jesus Christ and brother of James' ($v.^1$), and, like James, exhibits a stern zeal for morality.

4. Judas, the Galilaean.—He is so called both in the NT (Ac 5^{37}) and in Josephus, though he belonged to Gamala in Gaulanitis on the eastern side of the Lake of Galilee; perhaps because Galilee was the scene of his patriotic enterprise. At the enrolment or census under Quirinius in A.D. 7, Judas raised an insurrection. He perished, and his followers were scattered, but their spirit did not die. They banded themselves into a religious and patriotic society under the significant name of the **Zealots**, pledged to undying hostility against the Roman tyranny and ever eager for an opportunity to throw off its yoke. Their motto was 'No king but God.' Their activity was one of the chief causes which led to the outbreak of the Jewish War against Rome in A.D. 66.

5. Judas, a Jew of Damascus (Ac 9^{11}).—His house was in the Straight Street, and Saul of Tarsus lodged there after his conversion.

6. Judas Barsabbas, one of two deputies—Silas being the other—who were chosen by the rulers of the Church at Jerusalem to accompany Paul and Barnabas to Antioch, and report to the believers there the Council's decision on the question on what terms the Gentiles should be admitted into the Christian Church (Ac 15^{22-33}). Judas and Silas are described as 'leading men among the brethren' ($v.^{22}$) and 'prophets' ($v.^{32}$). Since they bore the same patronymic, Judas may have been a brother of Joseph Barsabbas (Ac 1^{23}). **7.** An ancestor of Jesus (Lk 3^{30}). D. S.—W. F.

JUDAS ISCARIOT.—One of the twelve disciples, son of Simon Iscariot (Jn 6^{71} 13^{26}), the betrayer of Jesus. Little is known about Judas outside of his being the betrayer of Jesus and his being listed as one of the Twelve (Mk 3^{19} $14^{10, 43-46}$, Mt 10^4 $26^{14-25, 47-49}$ 27^{3-10}, Lk 6^{16} $22^{3-6, 47-48}$, Jn 6^{70-71} 12^{1-6} $13^{2, 21-30}$ 14^{22}, Ac $1^{16-20, 25}$). He is the only Judaean disciple, and it is inferred that he was a person of promising leadership, perhaps with the rather common hope of sharing a place of importance in the coming kingdom. Though Judas seems to be an important member of the Twelve, as indicated by his being treasurer of the group (Jn 12^6 13^{29}) and the possibility of his reclining by Jesus at the Last Supper (Jn 13^{21-26}), his name in the NT is always placed last in the list of the disciples. This listing was due to his betrayal of Jesus, though in some lists of the Eastern Church Judas' name appears as third or sixth. Because of Judas' betrayal of Jesus the early Christians in penitence fasted on Wednesdays.

Judas is the Greek form of Judah, a name honoured by one of the twelve tribes of Israel and by the stalwart warrior of the Maccabees. Some have inferred that Judas was a brother of Lazarus, Mary, and Martha (Jn 12^{4-6}). The term Iscariot has had diverse interpretations. It has been translated as 'the man of Issachar,' 'the man from Sychar' (which would make Judas a Samaritan), the carrier of the *scortea* (leather bag of the treasurer?). Codex Sinaiticus (in Jn 6^{71}) dissects the term into *ish Kariot* ('man from Kerioth'). The location of Kerioth (q.v.) is uncertain (Jos 15^{25}, Am 2^2, Jer 4^{24}), though it has been associated with modern Qaryaten in southern Palestine. The name may be derived from the early Aramaic root of 'liar' or 'hypocrite,' a term applied by the Aramaic-speaking Christians to Judas the betrayer. Iscariot may also be a Semitic transliteration of the Latin term *sicarius*, meaning a dagger-man [Codex

Bezae and the Itala infer the term *skarioth* to have this meaning]. As a *sicarius* or dagger-man of the Zealots, and as one who is paired with Simon the Zealot, the interpretation of Judas' betrayal of the non-Zealotic Jesus is more clearly understood.

After Jesus openly accepts anointment (as Messiah?) at Bethany, Judas leaves to betray Him (Mk 14^{3-11}). Though it is not clear as to what Judas betrayed, it is assumed that Jesus believed Himself to be Messiah. Our gospel narrators do not make it clear that, after Judas left the scene of the anointing, he partook of the Last Supper before his betrayal of Jesus in the garden of Gethsemane. The writer of the Gospel of John alone mentions Judas' departure from the Last Supper, and since this Gospel does not record the institution of the supper, it is open to question as to whether Judas went out before or after the institution. From Lk 22^{17-21} it is argued that he was present, but Luke's arrangement is different from that of Mark and Matthew, who place the institution after the announcement of the betrayal (Mt 26^{21-29}, Mk 14^{18-25}). According to the Gospel of John, Judas seems to have gone out immediately after the announcement (13^{30}), the institution then following, and ch. 14 being the address at the Last Supper.

Various motives have been suggested for Judas' betrayal of Jesus: (1) An early Gnostic sect, known as the Cainites, believed that Judas had attained a higher degree of spiritual insight than his fellows, and had hastened the death of Jesus because he knew that it would break the power of the evil spirits, the rulers of this world. (2) Judas as a greedy person, who desired thirty pieces of silver (Mt 26^{15}; cf Zec 11^{12}), had assumed that Jesus through His power or the help of His friends would escape His enemies. When Judas realized the awfulness of his error of faith, he cast the money into the Temple, and in remorse hanged himself. (3) Judas felt that Jesus was procrastinating in bringing in the kingdom through His leadership, and by His betrayal he hoped to force Jesus into bringing the kingdom to fruition in Jerusalem, where the masses would follow Jesus in their victory over His enemies. Through the conquest of His antagonists, Jesus' kingdom would result. (4) Judas' faith in Jesus' Messiahship was wavering. So Judas betrayed Him to test Jesus' real leadership. If Jesus were the Messiah, He would escape harm. If He were not the Messiah, He would perish. (5) God predestined Satan to enter the person of Judas, in order that His gospel of salvation might take its true course in Jesus' death and resurrection (Jn 13^{27}).

All of these theories about Judas' betrayal of Jesus seem unsatisfactory. The early Church interpreters were uncertain in their understanding of Judas, as evidenced by the diverse NT reports; and we are not certain to-day. But a realistic interpretation of Judas' betrayal as related to the historical scene at the time seems to get closer to an understanding. The atmosphere of the time called for a Messianic leader who would have Zealot tendencies, and with such abilities he would use the God-empowered sword in a holy war against Rome; in such a way God's kingdom would come into history. Zealots by the names of Judas of Gamala and Theudas, almost contemporaries of Jesus, had led bloody revolutions against Rome (Jos. *Ant.* XVIII. i. 1 [4 ff], XX. v. 2 ff [102 ff]; *BJ* II. viii. 1 [118], xvii. 8 [433 ff], VII. viii. 1 [253 ff]). Gamaliel lists Jesus with these Zealot leaders in the account in Acts (5^{34-39}); the Roman tribune associates Paul as a follower of a Zealot movement (Ac 21^{38}; cf Jos. *Ant.* XX. vii. 6 [169 ff]; *BJ* II. xiii. 5 [261 ff]). That Christianity was a Zealot movement by reputation was the result of some of Jesus' disciples being associated with the Zealots: James and John, the sons of Zebedee, were called *Boanerges* (Aramaic, 'sons of thunder'), and wished as Zealots to sit at the right and left hand of Jesus when He should be enthroned as the king of the world (Mk 10^{37}). Simon the Zealot (*kananaios*, better translated as 'Zealot' than 'Canaanite,' as is done in Lk 6^{15} and Ac 1^{13}), shows him to have been a member of the Zealots. Simon bar Jonah, according to G. Dalman, has been better understood by some as *barjonah*, an Akkadian word meaning 'terrorist,' a label for a member of the Zealot party. To accord with this, the Gospel of John (18^{10f}) indicates that Peter carried a sword; which indicates that he might have been a *sicarius* (dagger-man) of the Zealots. Judas as a *sicarius* or dagger-man of this group thus shared the initial hopes of this group that Jesus would use forceful, revolutionary means against Rome. In the later days at Jerusalem, when Judas came to realize that Jesus would not use these means against Rome, and that He even recommended paying taxes to Rome (Mk 12^{17} and parallels), Judas betrayed Jesus to the Jewish opposition.

The gospel accounts make it clear that Judas did not realize his betrayal of Jesus would result in Jesus' death. After the verdict of the Sanhedrin condemning Jesus to death, Judas cried out, 'I have sinned in betraying innocent blood' (Mt 27^{14}), threw the pieces of silver into the Temple, and hanged himself. Luke's account of Judas' death in Acts (1^{18f}) preserves the early Church legend that Judas bought a field with the money, whereupon he fell headlong with his bowels bursting open, giving the name of *Akeldama* (Field of Blood) to the field. These stories of Judas' death are similar to the deaths of other sinful men, such as the LXX account of Ahithophel (2 S 17^{23}); of Nadan (in the Story of Ahikar) whose bowels burst open; of Antiochus Epiphanes (2 Mac 9^{5-13}). Tradition has located the 'Field of Blood' where the valleys of Kidron, Tyropoeon, and Hinnom meet, though historians do not know the locality. Similarly much of the material about Judas rests on the interpretation of the early Church. He remains one of the most enigmatic figures of the NT.

T. S. K.

JUDE, EPISTLE OF.—This short epistle is addressed to a Church or a circle of churches, which have become exposed to a mischievous attack of false teachers. It rebukes in vigorous terms the immoral behaviour of these opponents and briefly admonishes the reader to hold fast to the received faith.

1. Contents.—(1) *Text.*—For its length Jude offers an unusual number of textual problems, the two most important being those in v.^{5} and vv.^{22f}. Though the RV is probably right in translating 'the Lord' in v.^{5} (despite the fact that the Greek has no article), several ancient authorities, including B, A, Vulgate, and Origen, read 'Jesus'; others read 'God'; the RSV has 'he.' Also, the position of 'once' is doubtful, some manuscripts and authorities placing it in the following clause. In vv.^{22f} editors differ as to whether there are two clauses or three. But there is much to be said for a two-clause sentence beginning with either 'have mercy' or 'refute.'

(2) *Outline of the letter.*—(*a*) In vv.$^{1-2}$ 'Jude, brother of James,' begins with a greeting in good Semitic style: 'Mercy, peace and love [*i.e.* from God] be multiplied upon you.' The place to which the letter is sent is not indicated. The readers are simply addressed as 'those who are called, beloved in God the Father and kept for Jesus Christ.'

(*b*) The occasion for the epistle is presented in vv.^{3f}: the Christian community has been secretly invested by those who 'pervert the grace of our God into licentiousness,' thereby denying in practice the Lordship of Jesus Christ. Hence Jude wishes to admonish his readers to 'contend for the faith which was once for all delivered to the saints.'

(*c*) Warnings from the history of the OT are cited in vv.$^{5-7}$. The examples of the Israelites in the wilderness, the angels of Gn 6^{1ff}, and Sodom and Gomorrah should warn the readers against the teaching and the way of life of these false teachers and arm them to resist their approaches.

(*d*) These intruders are described in vv.$^{8-16}$. (i) They claim to receive visions, they abandon themselves to sensuality, they infringe upon Divine sovereignty and blaspheme the 'powers' of the supernatural world, a thing which even Michael dared not do when he contended with the devil. But these persons do not hesitate to do this, acting as if they knew something about the matter,

when in reality they know only the lusts of the senses and are bound for perdition (vv.8-10). (ii) They are sinners like Cain, they are avaricious like Balaam and seize holy offices like Korah. They fearlessly partake of the love-feast of the community but are like clouds which bring no rain, like trees which in autumn are without fruit and like the fallen angels of the heavenly bodies who await the judgment (vv.11-13). (iii) Enoch long ago prophesied their condemnation. They complain of their lot, they boast loudly and they flatter people for their own advantage (vv.14-16).

(*e*) The readers are exhorted, in vv.17-23, to remember how the apostles foretold that scoffers would appear in the last days. These are the intruders who, though they do not have the Spirit, assert that they do. The readers, however, are to edify themselves with their most holy faith, pray in the Holy Spirit, keep themselves in the love of God and await the mercy of Jesus Christ. They are to have compassion on their opponents who may perhaps be snatched from the fire at the last moment. For others, however, they are to feel fear as well as compassion and hence must hold themselves aloof from them.

(*f*) Vv.24-25 contain the doxology: God alone can protect the readers; to Him be glory forever and ever through Jesus Christ.

2. The Heretics.—The heretics in Jude remind one in many ways of the movement with which Paul dealt in his letters to Corinth. Its most significant characteristic is its sexual libertinism (vv.7f: they defile the flesh, vv.10, 16; cf 1 Co 5^{1ff} 6^{12ff} 10^{8}, 2 Co 12^{21}). In addition, however, these people have visions (v.8: dreamers), a thing boasted of also by the opponents of Paul in Corinth (2 Co 12^{1ff}). They take money for their revelations like Balaam who according to the rabbis did the same (vv.11, 16); so also Paul's opponents claimed that they were justified in accepting the support of the congregation and reproached Paul for refusing it (1 Co 9, 2 Co 12$^{13-16}$). Their insolent language (v.16) finds its parallel in the 'boasting' against which Paul also directs his attack (1 Co 4^{7}, 2 Co 5^{12} 10^{13} 11$^{12, 18}$). They claim to be 'spiritual' as may be deduced from the polemic in Jd 19 (cf 1 Co 7^{40b}, 2 Co 11^{4}); therefore they separate themselves (v.19), *i.e.* they consider themselves to be Christians of a superior kind just as Paul's opponents exalted themselves above him. Fear is missing in their way of life (v.12), as was also the case in Corinth, judging from what Paul tells us (1 Co 10^{22}). Therefore they regard the love-feasts as opportunities for carousing (v.12) as did some of the Corinthians (1 Co 11^{20ff}). In short they pervert the grace of God into licentiousness (v.4). Such men have worked their way into the congregations and have brought in new teachings (v.4f) as did Paul's opponents in Corinth (2 Co 11^{4}). In face of this danger the readers are exhorted to hold firmly to the faith that was delivered once and for all (v.3).

Now the significance of the first verses with which Jude exhorts his readers (vv.5-7) can be seen: Jude refers to precisely the same example of the generation which wandered in the wilderness as did Paul in 1 Co 10^{1ff}. In both cases the point is made that the deliverance from Egypt, like the miracles which accompanied the Exodus, did not give a charter to the children of Israel for indulging in sin, but rather that their disobedience in the wilderness led to their destruction. This is directed against the idea of those opposed by both Paul and Jude that nothing can any longer harm them once they have become 'spiritual' men. The fallen angels are to remind the readers of Jude that even such exalted beings are not safe from condemnation brought on by disobedience. Thus the first Biblical examples in Jude deal with the basic issue. The reference to Korah's rebellious band (v.11) contains the further condemnation of the heretics for usurping a position in the Church which does not belong to them. Apparently they claimed to be the prophetic leaders of the congregation.

But the intruders described in Jude show certain characteristics that we do not meet in the Corinthian correspondence: they 'revile the glorious ones' (v.8). By that is meant the exalted beings of the created world which Paul calls powers, authorities, etc. Moreover, the opponents in Jude are called malcontents (v.16), literally, those who complain of fate. Both concepts belong together, for the 'glorious ones' are the astral beings who determine fate. Later Gnosticism saw in them the embodiment of the power of the world hostile to God. The attitude taken up towards them is described by Jude in the verb 'to revile,' *i.e.* to quarrel with fate. Though no full-blown Gnostic system can be detected in Jude, these intruders (like Paul's opponents in Corinth) have taken a big step in that direction. Perhaps the puzzling expression 'to reject authority' (literally 'lordship') in v.8 already refers to contempt for the God of creation.

In addition to appealing to the OT and describing the heretics' sinful way of life, Jude opposes their activity in several other ways. (*a*) He reminds his readers of the faith handed on once and for all (vv.3, 20); the heretics are newcomers. (*b*) He urges the faithful to pray in the Holy Spirit; the heretics have visions and do not need to pray. (*c*) He exhorts his readers to remain in the love of God; the heretics need no such exhortation since they have no fear of losing the love of God. (*d*) He encourages them to wait for the mercy of Jesus Christ; such advice is not given to the heretics since they think that there is nothing that they may not do. (*e*) He reminds them that God can protect them (vv.17-21). Hereby we are introduced, quite briefly to be sure, to the most important points which enable us to understand the situation. Jude urges his readers to feel compassion for their opponents, but a compassion mixed with fear. More exact information cannot be drawn from the difficult verses 22 and 23.

3. Author, destination, date, and place of composition.—These four problems cannot be dealt with separately. The author claims to be the brother of James. That this is the James mentioned in Mk 6^{3} is certain, since no other James was so well known that Jude could without a word of explanation introduce himself as his brother. The date is determined by the fact that v.17 can make reference to the words of the apostles of our Lord Jesus Christ. These words are known to the readers and they remind us of Mt 24^{11f}, 2 Th 2^{3}, 1 Ti 4^{1}, 2 Ti 3^{1f} 4^{3} in our NT. In any event that points to the time after the fall of Jerusalem and after the death of the majority of the apostles. In the preceding section we have seen that the heresy has gone a step beyond what it was at the time of Paul. Jude is peculiar because of the explicit quotation from the book of Enoch (v.14f = 1 En 1^{9}) and because of its use of apocryphal tradition in v.9 which, according to the Church fathers, stems from the Ascension of Moses. Note too that the reference to Balaam's greed in v.11 goes beyond the OT and rests upon Jewish tradition. Thus one must at least consider the author a Jewish Christian.

The determination of the letter's date and destination is dependent on the question as to whether it could have been written by Jude the brother of James and of the Lord. If so, then one will have to look for the readers of the letter also among Jewish Christians, as a matter of fact, among those who lived in Palestine or Syria. It cannot be disputed that the influence of libertinism could have spread among Jewish Christians too. The use of extra-biblical Jewish tradition also speaks for such a circle of readers. The genuiness of the letter is supported by the fact that it is difficult to understand how a forger would have hit upon the idea of passing off the little known figure of Jude as the author, and further by the fact that Jude speaks of himself with a complete lack of undue emphasis. Chronologically there is no difficulty; he could have lived to see the destruction of Jerusalem and written the letter between say A.D. 70 and 80. What makes the situation puzzling is the indefiniteness of the salutation and the lack of any concrete remark that would bind the author and his readers together. The external witness to the letter

does not help us: the Muratorian Canon mentions it, it is commented upon by Clement of Alexandria, and it is accepted by Origen and Tertullian. Eusebius places it among the 'disputed' books, saying that it had little early recognition. It is absent from the Peshitta version.

In any event one must reckon seriously with the possibility of the letter's genuineness. Absolute certainty cannot be reached. W. F.

JUDGES.—The Hebrew word for 'judge' is used in two senses in the OT: it denotes (1) those who administered the law in the courts, and (2) certain heroes under whose leadership the Israelites successfully resisted external aggression. This latter use of the word is confined to the book of Judges, and it is significant that it never occurs in the tribal legends which form the literary foundation of the book, but only in the Deuteronomic framework to those legends. The word is used in Judges in its other sense as well, in the lists of the so-called minor judges (10^{1-5} 12^{7-15}). It may safely be assumed that these minor judges were officials of the pre-monarchical federation of the tribes of Israel. It is because the hero, Jephthah, was historically one of the 'judges' of Israel (Jg 12^{7}) that the title 'judge' was given by the Deuteronomists to the heroes of the other legends despite the fact that, so far as the extant evidence goes, none of them, with the possible exception of Jerubbaal, secondarily identified with Gideon, and Abimelech, who however is not called a 'judge,' ever functioned as 'judges' in the primary sense of the word.

Ex 18 tells of the appointment of judges by Moses on the advice of his Midianite father-in-law. Whatever its historicity in detail, the story throws considerable light upon the origins of the judiciary. In effect it affirms that the tribal administration of justice went back to Israel's nomad days and that the courts were ultimately of Midianite, that is of lay, origin. Further, it claims that this system was authenticated and regularized by Moses, whose decisions in the cases which came before him formed the basis of the law administered in the courts. The authority of the judges was a final authority derived from Moses; it was however of another order than that of Moses which was unique because of the uniqueness of his relationship to Yahweh (cf Ex 33^{11}, Nu 12^{7ff}). The story would seem to reflect the conflict between the priesthood, the custodians of the sacred oracle, who traced their authority to Moses, the priest and judge *par excellence*, and the secular judiciary (both the judges of the several tribes and those of the federation) as that had developed among the tribes which had not shared in the experience of the exodus. In claiming Mosaic authority for the judiciary it resolves the conflict in their favour without abrogating the judicial functions of the priesthood.

With the rise of the monarchy the king came to be regarded as the person in whom the fulness of judicial authority was vested. Furthermore, he himself acted as judge (cf 2 S 15^{1-6}, 1 K 3^{9}, 2 K 15^{5}, Ps 72; also Hos 7^{7}, Ps 2^{10} reflecting the close relationship between kings and judges). We need not suppose that the king actually appointed the judges throughout the country; but their authority will nevertheless have been a delegated authority in which the king was involved. The administrative system of Deuteronomy ignores the king except for 17^{14ff}. It does however represent the judiciary as independent of the priesthood, 16^{18ff}, thus reaffirming the pre-monarchical theory. The confusion in 17^{8ff} is in all probability due to a conflation of two laws, one defining certain powers of the priests and the other certain duties of the judges; if so, the section implicitly confirms the independent origin of the judiciary.

C. A. Si.

JUDGES (BOOK OF).—1. Place in the Canon.—The book belongs to the first section of the second division of the Hebrew canon, being reckoned among the 'Former Prophets' (Joshua, Judges, 1 and 2 Samuel, 1 and 2 Kings). Some MSS of the LXX include the Book of Ruth in Judges, while others treat the Pentateuch and Joshua, Judges, Ruth as one whole.

2. Text.—Generally speaking, the Hebrew text has come down to us in a good state, better preserved than any other of the historical books. A number of errors there certainly are, but these can in many cases be rectified by means of the versions and especially of the LXX. Only in the Song of Deborah (ch. 5) are there serious textual defects, and here there are some passages in which the original cannot with certainty be recovered.

3. Title.—The Hebrew title *Shōphᵉṭîm* ('Judges') is parallel to *Mᵉlākhîm* ('Kings'). Just as the title 'Kings' denotes that the book contains an account of the doings of various kings who ruled over Israel and Judah, so the title 'Judges' is given to the book because it describes the exploits of a number of champions during the period between the entry of Israel into Canaan and the rise of the monarchy. Five of these were judges of all Israel (10^{1-5} 12^{8-15}), while the others, though also represented as national leaders, were in fact tribal chieftains. These latter figures are by implication referred to as 'judges' in 2^{16ff}, and Samson is explicitly so designated in 15^{20} 16^{31b}, despite the fact that of none of them is it recorded that he functioned in an administrative capacity, with the exception of Jephthah. It appears, however, from 12^{7} that the tribal chieftain Jephthah, whose exploits are recounted in 11^{1}–12^{6}, was included in the list of 'judges' of Israel from which 10^{1-5} 12^{8-15} were taken; and this is doubtless the reason for the designation of the other regional heroes as judges of all Israel (see JUDGES).

4. Contents.—The book opens with an account of the conquest of the south by the tribes of Judah and Simeon (1^{1-21}), Caleb, the conqueror of Hebron (v.^{20}), and Othniel, who later defeated Cushan-rishathaim (3^{7-11}), appearing as leaders of the former tribe. The capture of Bethel by the house of Joseph is then recorded (vv.$^{22-26}$), and this is followed by an enumeration of the districts which the northern tribes were unable to conquer (vv.$^{27-36}$). The reason for this is revealed by the angel of Yahweh: they had not obeyed the command of Yahweh but had made covenants with the inhabitants of the land and had refrained from breaking down their altars. The people hearing this wept (whence the name of the place *Bochim*), and sacrificed to Yahweh (2^{1-5}).

At this point the narrative is interrupted by an introductory outline of the period to be dealt with in chs. 3 ff. It begins with the notice of Joshua's death and of the passing of the generation to which he belonged (2^{6-10}; on the relation of this to Jos 24^{29-31} see below). Up till that time Israel remained faithful to Yahweh, but then they forsook Him and worshipped the Baals and the Ashtaroth; as a consequence they were oppressed by the surrounding nations, until they cried to Yahweh, who raised up a judge to deliver them. But as soon as the judge was dead they again lapsed into idolatry, and the process of oppression, etc., was repeated (2^{11-19}). This highly schematized summary of events still to be presented in detail passes somewhat awkwardly into an account of Yahweh's decision not to drive out the nations left unconquered by Joshua but to use them to test Israel, leading up to a list of the nations so left (2^{20-3}^{6}).

Of the twelve Judges dealt with in 3^{7}–16^{31}, seven are given little more than a bare mention: Othniel (3^{7-11}; cf 1^{13}), Shamgar (3^{31}), and the five 'judges of Israel' referred to above, Tola (10^{1f}), Jair (10^{3-5}), Ibzan (12^{8-10}), Elon (12^{11f}), and Abdon (12^{13-15}). The accounts of the other five Judges are in the best manner of Hebrew story-telling: (1) 3^{12-30}, the story of Ehud, the left-handed warrior, who killed Eglon, king of Moab, and delivered his people from Moabite domination. This is a conflation of two slightly variant traditions of the same event. (2) The story of Barak (chs. 4–5), on the other hand, is a conflation of traditions of two different events: (*a*) The defeat of the forces of Jabin, king of Hazor, by Barak, leader of the tribes of Zebulun and Naphtali; and (*b*) the defeat of Sisera of Harosheth-ha-goiim by Barak commanding the armies of six tribes which had been

summoned by the prophetess Deborah (5$^{12-15a, 18}$). In addition to the name of the hero these traditions had this in common, that the enemy leader in each case was disposed of by a woman—Jabin by the wife of Heber the Kenite, and Sisera by Jael. To unify the traditions the conflator represented Sisera as the commander of Jabin's army (4^{2}), and identified Jael with the wife of Heber the Kenite (4^{17} 5^{24}). The poem in ch. 5, possibly the most ancient piece of Hebrew literature which has come down to us, celebrates the victory over Sisera, and is generally held to have been composed immediately after the event.

(3) The story of Gideon (6^{1}–8$^{29, 35}$) begins with an account of the Midianite oppression of Israel (6$^{1-6}$) because of their apostasy (6$^{7-10}$). The call of Gideon is described in vv.$^{11-24}$. This is followed by a satirical cult narrative (vv.$^{25-32}$) telling how a certain sanctuary at which the Baal had been worshipped had been taken over by Yahwism. The purpose of the tale in its present context, breaking the connexion between v.^{24} and v.^{33}, is to identify Gideon with Jerubbaal, the father of Abimelech. The invasion of the Midianites and Gideon's preparations to resist them are recounted in vv.$^{33-35}$. The sign of the fleece (vv.$^{36-40}$) may be an independent legend which was later incorporated into the Gideon cycle; at any rate it breaks the connexion between vv.$^{33-35}$ and the detailed account of the battle in which Gideon defeated the Midianites (7$^{1-24}$). The execution of 'the two princes of Midian, Oreb and Zeeb' is recorded in 7^{25}, and in 8$^{1-3}$ Gideon's skilful handling of the Ephraimites' complaint that he had slighted them in not summoning them to help him. 8$^{4-21}$ tells of Gideon's pursuit, capture, and execution of 'the two kings of Midian, Zebah, and Zalmunna' (v.^{12}), E. of the Jordan. Following his victory he was offered the rule over Israel for himself and his descendants, which he refused (8^{22f}); but he asked for the golden earrings which had been taken as spoil, and of them he made an ephod which he placed in his city Ophrah (vv.$^{24-27}$). The fact that there are two accounts of the execution of the Midianite leaders, together with other duplications in the narrative, indicates that it is a conflation of two slightly variant traditions. Both of these were of gradual growth. The Jerubbaal story and the story of the fleece (6$^{25-32, 36-40}$) illustrate the way in which the second tradition was expanded from time to time, in accordance with the usual pattern. The development of the first tradition is more significant. The nucleus of this is contained in 8$^{4-21}$, and the clear implication of vv.$^{18-21}$ is that Gideon's purpose in pursuing the Midianite chieftains was a personal one—to avenge, as was his duty, the death of his brothers who had been killed by a marauding band of Midianites in a raid on Tabor. At one stage in the growth of the cycle, 8$^{4-21}$ must have been preceded by an account of this raid. This incident may have been the beginning of Gideon's career as a warrior; but he was also known as the military leader who by a clever ruse had defeated the Midianite attempt to settle in Palestine. The account of this (6$^{33-35}$ 7$^{16-23}$, in part) was in course of time prefixed to the earlier narrative (6^{33ff} displacing the original story of the raid), together with the story of his call, giving expression to Israel's faith in Yahweh and His saving activity on their behalf. Other details such as that in 7$^{4-7}$ were also added.

(4) The story of Jephthah (11^{1}–12^{6}) tells how he was driven from Gilead by his brothers and became the leader of a gang of freebooters in the land of Tob (11$^{1-3}$). When Ammon made war on Israel the elders of Gilead persuaded him to return home as leader of the army (11$^{4-11}$). There follows an account of his protest to the king of Ammon who was laying claim to the land between the Arnon and the Jabbok which Jephthah maintained belonged to Israel for the reason that it had been given to them by Yahweh when he dispossessed the former inhabitants (11$^{12-27}$). The king of Ammon rejected this protest; Jephthah therefore moved against him and defeated him, having first vowed that he would sacrifice to Yahweh 'whoever comes forth from the door of my house to meet me, when I return victorious from the Ammonites' (11$^{28-33}$). On his return it was his only daughter who met him, and his fulfilment of his vow is described in a moving passage (11$^{34-40}$). He was then attacked by the Ephraimites because he had not called on them for assistance (cf 8$^{1-3}$). He defeated them also, and the fugitives from the battle were massacred as they tried to re-cross the Jordan, being detected because of their inability to say 'shibboleth' (12$^{1-6}$). The god of the Ammonites was Milcom, while Chemosh was the god of Moab (1 K 11^{33}, 2 K 23^{13}); the reference to the latter as 'your god' in 11^{34} therefore indicates that the original context of some part of the material in 11$^{12-28}$ was a dispute not with Ammon but with Moab, and so that the Jephthah story, like those preceding, is a conflation of two traditions, one of which represented Moab as the enemy. The Ammonite tradition is the earlier. It has furthermore been pointed out that the grave oath made by Jephthah demands as its setting a personal feud rather than an ordinary war between Israel and a neighbouring nation, as is further suggested by v.^{36b}, 'now that the Lord has avenged you on your enemies'—'on the Ammonites' being an addition. It would thus seem that the development of the Jephthah story is similar to that of the story of Gideon.

(5) The history of Samson and his doings is recorded in chs. 13–16. Ch. 13 tells how an angel foretold his birth, and commanded that he should be a life-long Nazirite. Ch. 14 gives an account of his marriage with a Philistine woman, who played him false during the wedding festivities by extracting from him the answer to a riddle he had set and passing it on to the guests. Samson went back to his home in a rage, and his wife was given to his best man. Ch. 15 tells how he discovered this when he returned to Timnah to see his wife. In revenge he set fire to the standing grain of the Philistines and they retaliated by burning his wife and her father. He in return killed a large number of them and withdrew to Judah. The Philistines compelled the Judahites to hand him over to them, but he slew a thousand of them with the jaw-bone of an ass, and escaped. Ch. 16 tells how he carried off the gates of Gaza, and then describes his relationship with Delilah, who, having found out that his strength was in his hair, had his head shaved while he was asleep, and handed him over to the lords of the Philistines. They gouged out his eyes and put him in prison, where his strength returned as his hair grew again. On the occasion of a festival he was brought to the temple of Dagon to provide entertainment for the crowd. There he took hold of the two pillars by which he was standing and pulled the building down, killing himself and all who were in it. There are no signs of conflation in the Samson story; any inconsistencies there may be in the narrative are due to the gradual growth of the legend.

Between the stories of Gideon and Jephthah comes the story of Abimelech, son of Jerubbaal (ch. 9), who became king of Shechem after slaying all his brothers, seventy in number, except Jotham (vv.$^{1-6}$), who fled after predicting in a parable Abimelech's downfall (vv.$^{7-21}$). Trouble broke out between Abimelech and the Shechemites which one Gaal fanned into open revolt. Abimelech, however, defeated him, razed the city to the ground and destroyed the survivors who had taken refuge in the Tower (vv.$^{22-49}$). He met his death when he was attacking the city of Thebez (vv.$^{50-57}$). This narrative is a conflation of two recensions of the story of Abimelech, the first of which treated him as a hero who subdued Shechem and died bravely in an attack on Thebez. The second represented him as a ruthless adventurer who eventually met his just deserts. The conflator of the two recensions adopted the latter representation. In its present context the story is intended as an illustration of the kind of thing that happened during the periods of apostasy referred to in 2^{19} 3^{12a}, etc., when 'every man did what was right in his own eyes' (17^{6}).

This is also the reason for the inclusion of the stories in chs. 17 f and 19–21. The former tells of one Micah, an Ephraimite, who made for himself an image and put

it in a shrine (literally god-house), along with an ephod and teraphim, and employed as his priest a Levite who happened to turn up on the scene. All went well until the tribe of Dan passed through the village on their migration northward, and persuaded the Levite to take Micah's image, with its paraphernalia, and come with them as their priest. Having captured the city of Laish, they renamed it Dan and set up the image there, with the Levite, now identified as a grandson of Moses, as priest of the new sanctuary. This narrative is a conflation of two stories of the origin of the famous sanctuary of Dan. The earlier of these was quite objective. It knew nothing of an image; the cult object was an ephod, and the Levite was a reputable character in no way to be blamed for going with the Danites as their priest. The second recension treated the affair with contemptuous scorn. Not only was the chief cult object an image, forbidden by the law (cf Ex $20^{4, 23}$ 34^{17}), but an image of most dubious origin (Jg 17^{2-4}); and the priest a self-seeking adventurer. This scorn has been somewhat softened by the conflator of the two recensions, but the general impression remains that the less said about the founding of the sanctuary of Dan the better.

Chs. 19–21 offer another instance of the moral chaos which, the implication is, characterized the periods of apostasy. They tell the story of how the concubine of a certain Levite left him and returned to her father. The Levite went after her to bring her back. On their way home they stopped for the night in Gibeah, a city of Benjamin. The men of the city attempting an indecent assault on him, the Levite turned his concubine over to them and they so maltreated her that she died on the threshold of the house in which her master was staying. There he found her in the morning, brought her dead body home, cut it in pieces and sent them throughout all the territory of Israel as a call to avenge the outrage. The Israelites assembled and demanded that Benjamin hand over 'the base fellows in Gibeah' that they might be put to death. The Benjamites refused, and in the war that followed were annihilated except for six hundred men. But since the other Israelites had sworn that they would not allow their daughters to marry into Benjamin, the end of the tribe appeared to be inevitable. This disaster was averted, however, when it was found that there had been no one from Jabesh-gilead present when the oath was taken. So four hundred maidens were procured from there, and the remaining two hundred by abduction from those dancing in the vineyards at the annual festival at Shiloh.

It may be taken for granted that the stories of the heroes took their rise among the tribes to which they respectively belonged. That of Abimelech is of a slightly different character, containing less popular legendary material; in its primary form it may have been preserved in the archives of Shechem, and the primary form of the story in chs. 17 f in Dan. The story of the outrage at Gibeah is more difficult to place. It reflects some kind of an alliance between Gibeah and Jabesh-gilead even before the time of Saul; and it has been suggested that in its representation that the people of Jabesh-gilead took no part in the reprisals on Gibeah and subsequently provided wives for the surviving Benjamites the tale is a subtle piece of polemic against the memory of Saul, implying that it was this morally questionable relationship between the two cities which prompted his intervention on behalf of Jabesh-gilead (1 S 11). If this suggestion has any validity the story may have been preserved at the centre of the anti-Saul propaganda—possibly Bethlehem where David was born, which it represents as the home of the Levite's concubine.

Eventually a collection was made of these stories either by the author of the J narrative in the Pentateuch, or as a supplement to that narrative, to carry the history of Israel down to the time of the monarchy. This reduction of the stories to writing did not, however, prevent their further development and adaptation in the continued process of oral transmission. In the course of time another collection was made of them in their new form, and these two recensions were ultimately conflated to produce a unified history of the period.

The fact that both the phraseology of 2^{6-22} and the basic thesis of the passage, that disaster is the sign of Divine displeasure, are characteristic of the author(s) of the framework to the code of Deuteronomy indicates that in the course of its literary history the collection of hero-stories was worked over and schematized by an editor or editors of the deuteronomic school. From their hand come also the several introductions and concluding notices to the stories in chs. 3–12, which impose upon them the pattern of apostasy, oppression, repentance, deliverance through a judge raised up by Yahweh, and, after an interval, apostasy again (cf $3^{12-15a, 30}$ 4^{1-4} 5^{31b} $6^{1, 6b}$ 8^{28} 10^{6ff}). The work of these editors was, however, more extensive than this. The facts that the notice of the death of Joshua (Jg 2^{6-10}) occurs also in Jos 24^{29-31}, and that much of the material in Jg 1 is now found at different points in Joshua suggest that at one stage in the history of the book Jg 1^{1}–2^{5} was omitted, such information as the redactor desired to preserve being placed at appropriate points in Joshua (cf Jos $15^{13-19, 63}$ 16^{10} $17^{11-13, 16}$; see JOSHUA, BOOK OF); and the notice of Joshua's death (Jg 2^{6-10}) was placed after Jos 24^{32f}. The conjecture is not unreasonable that this operation was the work of the author of the deuteronomist history of Israel (running through Deuteronomy, Joshua, Judges, 1 and 2 Samuel, 1 and 2 Kings; see DEUTERONOMY and JOSHUA, BOOK OF) in its original form. From his hand comes also the basic material in Jg 2^{11-12} (limited possibly to vv.$^{12a, 14a, 20b-21}$), catching up the pre-deuteronomic narrative in 2^{23}–3^{5} to which he added 3^{6} and continued with 3^{12b}, 'and the Lord strengthened the hand of Eglon the king of Moab against Israel,' the implication being that the Moabite oppression was the divinely ordained punishment for the apostasy noted in 3^{6}. The story of Ehud was then told, the deuteronomist historian being careful to state explicitly that he was the deliverer whom the Lord raised up (3^{15a}). We thus have the first instance of the characteristic deuteronomist pattern of apostasy, oppression, and deliverance. This editor provided a similar framework for the stories of Deborah and Barak and of Gideon (4^{1}–$8^{29, 33}$). The stylistic affinities of the introduction (8^{30-32}) to the story of Abimelech are with P rather than with the deuteronomist, indicating that the story was not included in the original deuteronomist history. Deuteronomist phraseology and ideas again appear in 10^{6-18}, a passage generally recognized as coming from more than one hand. The statement in v.^{7} that the Lord 'sold them into the hand of the Philistines' has, with its continuation, 'and into the hand of the Ammonites,' been taken by some as a combined introduction to the stories of Samson and Jephthah. Against this it has been pointed out that the Jephthah story comes before that of Samson; that the Samson story has its own deuteronomist introduction in 13^{1}; and that Samson is nowhere represented as a deliverer of Israel from oppression and no attempt is made to fit him into the deuteronomist pattern. But if the mention of Philistine oppression in 10^{7} does not point ahead to the Samson story it can only refer to the Philistine domination recorded in the opening chapters of 1 Samuel. This suggests the possibility that in its primary form the deuteronomist history of Israel passed from the story of Gideon to that of Eli. (The statement in 1 S 4^{18} that Eli had judged Israel for forty years indicates that at some stage he was included among the Judges.) If the first deuteronomist editor did indeed omit the stories in chs. 9–21 his reason is not far to seek. From his point of view those concerning Dan and Gibeah (chs. 17–21) were singularly unedifying; so too was that of Jephthah because it represented human sacrifice as permissible; and the figures of Abimelech and Samson could not be fitted into his scheme.

Subsequent deuteronomist editors restored Jg 1^{1}–2^{5}, without however disturbing the fragments therefrom which had been inserted in Joshua. The opening words

of 1^1, 'after the death of Joshua,' required the replacement of the notice of Joshua's death in Jos 24^{29-31}, but Jg 2^{6-10} was retained as the necessary introduction to the schematic material following, which was gradually expanded into its present form. The story of Othniel (3^{7-11}) was added, presumably to supply a 'judge' from Judah. The story of Jephthah was restored, and the basic material in 10^{6ff} adapted as an introduction to it. The fact that it is twice recorded that Samson judged Israel for twenty years (15^{20}, 16^{31b}) suggests that the tales in chs. 13–15 were first restored to the narrative and ch. 16, with its explicit representation that Samson's strength was in his hair (contrast $14^{5, 19}$ 15^{14} where it is a manifestation of the power of the Spirit of Yahweh), only later.

There is no trace of deuteronomist editing in chs. 9 and 17–21. This suggests that these stories were restored by a later redactor who provided 8^{30-32} as an introduction to the Abimelech story. He also added the lists of judges in 10^{1-5} and 12^{8-15}, to which 12^{7}, naming Jephthah, belongs (see above). Of each of them we are told where he lived, for how many years he 'judged Israel,' where he was buried, and in three cases the number of his children, never less than thirty. The fact that Jerubbaal (secondarily identified with Gideon, cf 6^{25-32} 7^{1} 8^{29-35}) had seventy sons (8^{30}) suggests that his name may have been included in the record from which these lists were derived. Abimelech may also have been of their number, for if the implication of the phraseology of 10^{1} is that he was one of the deliverers of Israel it points to a tradition other than the story in ch. 9 which treats him as a ruthless and unprincipled oppressor. It has been argued by some scholars that both the names of these Judges and one of the component narratives of the story in chs. 19–21 have been derived from the tradition of the pre-monarchical federation of the tribes of Israel. If this view is sound, then the inclusion of this material in the book alongside the stories of the tribal heroes points to a survival of this tradition through the centuries of the monarchy into the post-exilic period. With the addition of the lists in 10^{1-5} 12^{8-15} the number of Judges, including Eli, was brought to twelve. When the story of Eli was separated from the others and placed in 1 Samuel, the name of Shamgar (3^{31}) was added, to prevent Abimelech being reckoned as a Judge.

5. Historical value.—1^{1}–2^{5} is, as a whole, a valuable source of information concerning the conquest and settlement of some of the Israelite tribes west of the Jordan; for the period of which it treats it is one of the most valuable records we possess.

2^{6}–3^{6}, which forms the introduction to the hero-stories is, with the exception of isolated notes such as 2^{9} 3^{5}, of little historical value. The statement that each oppression is due to Israel's apostasy from Yahweh is altogether out of harmony with the spirit of the book as a whole; nor can the theory on which it is based have been evolved until long after the period of the Judges.

3^{7-11} is nothing more than an illustration of the deuteronomist theory of apostasy, oppression, deliverance. Whether or not Othniel was an historical person, the passage cannot be regarded as an authentic record of events. In general, the other hero-stories reflect the crisis character of the religion of Yahweh in the period of the Judges and the energizing experience of seizure by His Spirit. The story of Ehud may well preserve a genuine memory of successful resistance to an attempt of the Moabites to establish themselves in Benjamin. The poem in ch. 5, commemorating Barak's defeat of Sisera, is one of the most important sources we have for the early history of Israel in Palestine. The prose narrative in ch. 4, being a conflation of two distinct stories, is of less value, though both the traditions preserved in it may have an historical foundation.

In the story of Gideon (6^{1}–8^{27}) the account of his capture and execution of the two raiding Midianite chiefs is a folk-tale based upon an authentic event; similarly the representation of him as a military leader may well be historical, whether or not the details of the ruse he adopted to defeat his enemies are anything more than popular legend. The accounts of his call, of his destruction of the Baal altar and of the sign of the fleece bear marks of their legendary character. The story of Abimelech (ch. 9) certainly contains historical information, though it is impossible to say whether Abimelech was a hero or a ruffian. The names of the Judges in 10^{1-5} and 12^{8-15} may be authentic even though there is some exaggeration in the number of children ascribed to them.

10^{6-18} is of the same character as 2^{6}–3^{6}. The representation of Jephthah (11^{1}–12^{7}) as the leader of a gang of freebooters who offered his daughter in sacrifice in payment of a vow is probably historical, as is the annual lamentation in Gilead, though it is unlikely that this had in origin anything to do with Jephthah's daughter. The shibboleth incident may also have an historical kernel. If there is any factual basis to the adventures of Samson (chs. 13–16) it is very slight; and it has been so overlaid with legend, some of it dependent upon the sun-god myth, as to be quite irrecoverable. Ch. 13 represents an attempt to give religious meaning to the tales which follow.

The trek of the Danites in chs. 17–18 is authentic, and the Levitical origin of the priesthood at Dan is scarcely an invention, though the details of the story are at least open to question. The representation of Micah first making his son his priest and then putting a Levite in his place is doubtless true to life. The story of the outrage at Gibeah (chs. 19–21) may be based on fact. Whether or not it was actually the reason for a war between the other tribes and Benjamin, which may itself be historical, the representation that this kind of thing was the concern of the inter-tribal federation is significant.

Finally, from the literary history of the material we can trace the process by which local traditions were given a wider significance and related to each other; we can detect the rivalries which threatened the underlying unity of the tribes; we can discern the emergence of new ideas as to the meaning of history, first in the exclusion from the record of anything deemed unedifying, and then in the reversal of this policy to produce a book which reflects the life of the period in all its aspects. C. A. Si.

JUDGING (Ethical).—In both OT and NT, 'ethical' judging is understood as judging in terms of God's righteousness, since God's will and not human excellence is the standard of judgment. **1. In the OT,** ethical judgment as a reflection of God's righteousness is seen especially in the prophets (*e.g.* Is 10^{1-4}, Jer 5^{1-5}), who also believe that a man may be called to pronounce God's judgments (Jer 19^{f}). The wisdom literature holds that common-sense knowledge of right and wrong reflects God's justice and can serve as the basis for ethical judgment of one's fellow men (*e.g.* Pr 26^{-15}).

2. The NT writers are concerned principally with ethical judgments made by Christians. The redeeming presence of God made known in Christ and the expectation of God's final judgment have two different results for the Christian's ethical judgments. (1) As a believer, his obligation and his power to make such judgments are intensified. The Spirit gives him a freedom in which he 'judges all things' (1 Co 2^{15}), and his human discernment is also involved when he must 'test everything' (1 Th 5^{21}, cf 1 Co 11^{13}). His guide in judgment is the 'mind of Christ' (1 Co 2^{16}), or the 'law of Christ' (Gal 6^{2}). The privilege and responsibility of making judgments which reflect God's judgment are most clearly shown in the faith that Christians will take part in the last Judgment; they will 'sit on thrones judging the twelve tribes of Israel' (Lk 22^{30} ||, cf 1 Co 6^{2f}). (2) On the other hand, the goodness of God as known in Christ and the expectation of the last Judgment lead also to a withholding of ethical judgment ('Judge not . . .', Mt 7^{1}). Withholding of judgment rests on several

bases. (*a*) A keen sense of each man's responsibility to God requires concentration on one's own task rather than judgment of another's. 'Who are you to pass judgment on the servant of another? It is before his own master that he stands or falls' (Ro 14^{4}, cf 14^{1-23}). (*b*) Men are warned not to undertake a task of judgment that is God's (Ja 4^{11f}). The obscurity and difficulty of human judgments, made in so much ignorance, are contrasted with God's knowledge. 'Therefore do not pronounce judgment before the time, before the Lord comes, who will bring to light the things now hidden in darkness' (1 Co 4^{5}). (*c*) The self-destructive effect of censorious judgment is seen; it results in self-deception ('hypocrisy') about one's own failings. 'Why do you see the speck that is in your brother's eye, but do not notice the log that is in your own eye?' (Mt 7^{3}, cf Ro 2^{1}). (*d*) Many NT passages commanding the withholding of judgment stress the freedom and variety of belief and practice which Christians should accord to one another in things not central to the faith. 'Therefore let no one pass judgment on you in questions of food and drink or with regard to a festival or a new moon or a sabbath. These are only a shadow of what is to come' (Col 2^{16f}; cf Ro 14). The need for respecting the views of 'weak' or immature believers is emphasized (Ro 14^{13}, 1 Co 10^{28f}), as well as the importance of not insisting on one's own way (1 Co 6^{7}, cf 1 Co 13^{5}). (*e*) Most important of all, the overwhelming sense of God's goodness in overruling a just judgment against the believer demands that he forgive other sinners (Mt 6^{14f} 18^{21-35}, Eph 4^{32}). Thus Jesus' warning: 'Judge not, that you be not judged' (Mt 7^{1}) is not only a warning against harsh judgments of others. It finds its setting in a faith in the immeasurable love of God which seeks the lost (Lk 15, cf Ro 5^{1-11}), and challenges men to rise above the standard of measured justice. Jesus' saying in Mt 7^{1} finds an illustration in the story about the woman taken in adultery which has been added to the Gospel of John (Jn 8^{1-11}).

3. Interpreters of the NT have not found it easy to unite the spiritual freedom to judge all things with the admonition to 'judge not.' Some have made a distinction between *actions and qualities*, which are to be judged, and *persons*, who are not. While this distinction rightly points toward forgiveness and acceptance of the sinner, it is not a distinction made in the NT itself, which understands actions and qualities as inseparably bound to persons. The tension between Christian faith as making possible truer judgments, and Christian faith as requiring one not to judge, springs from the fact that through faith Christians find themselves closer to God, and therefore better able to judge as He judges, and yet at the same time because close to God, humble and thankful before His majesty and goodness. Thus withholding of judgment does not mean withholding a just ethical decision, but holding the way open for a higher righteousness than that of retaliatory justice. In this sense the NT does not forbid judgment of others. It forbids judgments that are narrow, prejudiced, and censorious (Mt 7^{1ff}, Ja 4^{11f}); and requires that a man judge himself first (Mt 7^{3ff}), and not judge by appearances (Jn 7^{24}, cf 8^{15}), respect the freedom of another's conscience (Ro 14, 1 Co 10^{28f}), recognize the limitations of his knowledge, and not put himself in the place of the final Judge (Ro 14^{10}, 1 Co 4^{5}), and above all, show himself ready to accept into fellowship and forgiveness one who does wrong (Mt 18^{21f}, Gal 6^{1}). W. A. B.

JUDGMENT.—Biblical eschatology centres in the Divine Last Judgment of all mankind at the end of the present 'age.' In most NT books it is viewed as the beginning of the New or Messianic Age and will therefore take place at a specific time in the future, the 'day' of Judgment. Even St. Paul, though he denies any righteousness of man before God, does not weaken the thought of man's responsibility and Divine judgment upon human sin. As in late Jewish conceptions (1 En 61^{8ff}), the early Christians looked forward to the Judgment to be conducted by the Son of Man as God's representative, assisted by the angels (Mt $13^{41-43, 49f}$ 25^{31-46}). Nevertheless it continues to be thought of as the Judgment of God (Mt 10^{32f}, Ro 2^{16}, He 12^{23}). St. John points out that the Judgment begins on earth, since either to accept or to reject Christ is to determine one's eternal state (Jn 5^{23} 9^{39}). Those who accept Christ as their Lord need no longer fear the Judgment; hence by way of anticipation it may be said that they 'will not come into judgment' (Jn 5^{24}; cf 3^{18}). In Lk 22^{30}, 1 Co 6^{2} Christians are also said to be judges. But in ancient oriental society there was a close connexion between the functions of ruling and judging (cf Lk 22^{30}, Mt 19^{28}): *teste* the early 'judges' of Israel. Hence judging is a part of reigning with Christ (1 Co 4^{8}).

The idea of the Judgment may be traced back to the conception of the Day of Yahweh held by the early Hebrews. But in the NT it is used in a strictly eschatological sense: it is the last and total Judgment of God upon His fallen creatures. Weeping and gnashing of teeth are mentioned (*e.g.* Mt 8^{12}; cf Ps 111^{10}). But the heart and substance of all the penalties inflicted is to be denied by Christ, to suffer 'everlasting destruction' away from the presence of the Lord and from the glory of His power (Mt 10^{32}, 2 Th 1^{9}). Still more reserved are the statements about the destiny of the blessed: they shall 'see face to face,' they shall 'see Him as He is' (1 Co 13^{12}, 1 Jn 3^{2}). See ABYSS, DAY OF THE LORD, BOOK OF LIFE, GEHENNA. For 'judgment' in the sense of justice, see JUSTICE. H. G.

JUDGMENT HALL.—See PRAETORIUM.

JUDGMENT-SEAT.—Of the two terms employed in NT, *bēma* denoted the raised dais from which a judge passed judgment (Mt 27^{19}, Jn 19^{13}, Ac $18^{12, 16f}$ $25^{6, 10, 17}$, Ro 14^{10}, 2 Co 5^{10}) and *kritērion* the court (Ja 2^{6}) or the judgment itself (1 Co $6^{2, 4}$). See GABBATHA. J. S. K.

JUDITH.—1. A wife of Esau, daughter of Beeri the Hittite (Gn 26^{34}; cf 36^{2}). **2.** Daughter of Merari, of the tribe of Simeon (Jth 8^{1} [cf Nu 16^{1}] 9^{2}); widow of Manasseh of the same tribe. For the book of which she is the heroine see article APOCRYPHA, **4.**

JUEL.—1. 1 Es 9^{34} (AV, RV); see JOEL, **15.** **2.** 1 Es 9^{35} (AV, RV); see JOEL, **13.**

JULIA.—A Christian greeted by St. Paul in Ro 16^{15}, perhaps the wife or sister of Philologus. If Ro 16 was originally a letter to the Ephesian community, Julia must have lived at Ephesus. E. H.

JULIUS.—For the voyage to Rome St. Paul was committed with other prisoners to the charge of a centurion named Julius of the *cohors Augusta*. Sir W. Ramsay suggested that the ship was a government vessel, of which Julius had supreme command. But although Ac 27^{11} can be interpreted in this way, the suggestion must be abandoned: inscriptions have proved that v.^{11} speaks of the skipper and the owner of the ship. It was a private vessel, and Julius had the status of a passenger and not of a commander. The story of the voyage and shipwreck of St. Paul has lost its original form. Probably Paul was accused of the crime of sedition (Ac 24^{5}) and was being held as a highly suspicious character. E. H.

JUNIA, Ro 16^{7} (AV, RVm).—See JUNIAS.

JUNIAS.—A Christian greeted by St. Paul in Ro 16^{7}. The Greek form of the name could be the female name Junia too, but the context is against this interpretation. Papyrus 46 reads Julia; cf v.^{15}. Andronicus (q.v.) and Junias were Jews and 'of note among the apostles,' *i.e.* missionaries like Paul himself. But they had become Christians before him. E. H.

JUNGLE.—See JORDAN, **5.**

JUNIPER.—See BROOM.

JUPITER.—See ZEUS.

JUSHAB-HESED.—A son of Zerubbabel, 1 Ch 3^{20}.

JUSTICE (I.).—Time after time it is said in the OT that God is righteous. That cannot mean that God is

blameless before the law, because God, being God, cannot be said to be subject to a law; otherwise the law would be made greater than God Himself. It does mean that He acts at all times consistently with His own nature and His own good and gracious purposes, so that there is in Him no variation or shadow due to change (Ja 1[17]). God's justice is that side of the Divine righteousness which reveals it as absolute fairness. This is what finds expression, for instance, in Abraham's question (Gn 18[25]): 'Shall not the Judge of all the earth do right?' It is then for man to be righteous and just in all his ways that he may be accepted of God (Is 1[17, 26], Am 5[24], Ps 146[8] etc.); it is by his righteousness that a man shall live (Ezk 18[9] 33[13] etc.); and it is by the practice of righteousness and justice that the human community is established. Thus it is said: 'Behold, I am laying in Zion for a foundation a stone, a tested stone . . . and I will make justice the line and righteousness the plummet' (Is 28[16f]). Man can be righteous and just as he is guided and empowered by the Spirit of God. Thus Yahweh is the source of Israelite law; it was He who gave it to Moses on Sinai (Ex 20[1ff] etc.); and every later codification of that law and every later decision in any particular case was made under the guidance of the self-same Spirit, that the will of Yahweh might be the more fully known and done and that His community of Israel might be maintained in a way acceptable to Him. It is for this reason that the Hebrew word *mishpāṭ* means not only judgment but justice, and in many passages it is the latter word that should be used in translation (*e.g.* Dt 32[4], Is 30[18] 42[1], Am 5[24] etc.). Indeed, *mishpāṭ* must even be translated ordinance in some contexts, *i.e.* the ordinance or law of God (*e.g.* Is 42[4] 51[4], Jer 8[7], Ezr 7[10] etc.) J. Ma.

JUSTICE (II.).—Its Administration.—1. In early Israel.—(*a*) The earliest form of the administration of justice was that exercised by the head of the family. He was not only the final authority to whom the members of a family appealed when questions of right and wrong had to be decided, and to whose sentence they had to submit, but he also had the power of pronouncing even the death penalty (cf Gn 38[24]). On the other hand, the maintenance of family strength and solidarity was of paramount importance; therefore, the rights of each member of the family were jealously guarded by all the rest. If injury was done to any member by a member of any other family, the relatives of the injured man made common cause to see that proper amends were made; if the injury resulted in death, a state of blood feud ensued between the two families, until vengeance was exacted by the injured family by their slaying a member of the murderer's family, preferably, but not necessarily, the murderer himself.

(*b*) The next stage was that in which a number of families, united by ties of kinship, became a clan or tribe, which was commonly a unity as closely knit together as the family itself. In this stage of the organization of society the procedure in deciding questions of right and wrong was doubtless much the same as that which obtains even up to the present day among Bedouin Arabs. Any matter in dispute which cannot be settled amicably by the disputants themselves but has to be referred to arbitration comes before the sheikh for decision. He hears both parties and, in coming to his decision, seeks at once an equitable decision for the sake of the disputants and one that will be for the good of the clan as a whole, since the interests of the individual must be kept subject to the welfare of the whole. Even if such a decision by a sheikh has not formal binding force, the consensus of the clan and the moral pressure that can be exerted towards the acceptance of the judgment that is given effectively give it such force. In Ex 18[13-27] it is recorded how Moses took measures for the administration of justice in Israel by the elders of clans, thus supplying the system we have just described to the larger community which was knit together at Sinai and which had now to be organized as a social unity. Moses himself continued to act as a **court of appeal.** Closely allied with the clan or tribal administration of justice was the system which was operative in the cities, with their daughter villages, in which the Israelites settled after their entry into Palestine. The elders sat in the city gate and all occasions of dispute were referred to them there. Dt 21[18-21] tells of the father of a rebellious son, who, finding his authority set at nought, appeals to the elders of the city; in the case of the son's being found guilty, the death sentence is pronounced against him and the sentence is carried out by representatives of the community. This seems to illustrate a case in which, in an earlier form of social organization, the father himself would have carried out the sentence after giving judgment; now he must bring the matter before the elders. It is to be noted in addition that, in the period of Israel's history which is described in the Book of Judges, the leader who emerges in a crisis is judge, priest, and leader in battle; that is to say, the life of the community is unified under him and, during the emergency at least, he has the obedience of the whole people.

It seems justifiable to assume that the elders and the judges in the gate dealt with all civil cases and with criminal ones in which the aid of precedents was available. But in particularly difficult cases, in which no precedent was available or the circumstantial evidence was not clear and statements had to be taken from the material witnesses on oath, a further procedure had to be followed. In Ex 22[8f] it is described as 'coming before God,' which probably means that the contending parties had to appear at a sanctuary that under solemn oath they might give their testimony and that the priests thereafter might seek God's guidance towards a decision. See also in this connexion Dt 21[1-9].

(*c*) *The king.*—The possibility that the unified pattern of community rule which is exemplified in the Book of Judges might be disturbed was laid open when there arose in Israel the demand for a king (1 S 8[4ff]). But a king was appointed in Israel and the practice developed that appeal might be made from the local judges to him (cf 1 S 8[20], 2 S 14[4ff] 15[2-6], 1 K 3[9], 2 K 15[5]). According to 1 K 7[7] Solomon had a throne room where he sat in judgment; it was very close to the royal palace. The king was supreme judge in the land; but it must very soon have become impossible for him to try personally all the cases which were referred to him, so that representatives must have been appointed to administer justice in his name. Now the local judges who gave judgment in the city gate knew the people of the community which they served and they were aware of the solidarity of the local social group. The king's representatives who administered justice in his name often had no personal knowledge of the litigants who came before them and the cases were decided out of their social context. That might result in an administration of justice which was uninfluenced by personal considerations whose relevance and fairness might be called in question, and was based on purely objective considerations; but it also opened the way to perversions of justice on the part of judges who were not subject to effective social controls and the power of public opinion. There is abundant evidence to show that the administration of justice was done more for the purpose of private gain than in the interests of equity. It is an ever-recurring theme in the prophetical books that justice is thwarted through **bribery**: 'Every one loves a bribe and runs after a gift' (Is 1[23]; cf 5[7, 20, 23], Mic 3[11] 7[3], Ezk 18[8] 22[12], etc.).

(*d*) *The priesthood.*—The greater the place which the priesthood came to hold in the community and the more socially developed Israel became, the greater must have become the rôle which the priests played in the administration of justice; and the Temple located beside the royal palace must have added to priestly prestige. This is illustrated very pointedly in Dt 19[15-21], where the outlines of a regular, formulated, judicial system seem to be referred to, in which the final authority is vested in

the priesthood. What contributed to this development more than anything else must have been the old-established practice whereby the elders in the city gate, when they were confronted by a case which defied a satisfactory solution in the light of the available evidence, referred to the priests at a sanctuary. The priests sought an answer from God and announced that answer to those who came for judgment (cf Ex 22^{8f} and Dt 33^{8ff}). But the prophetical books tell how the priests themselves corrupted their office and acted falsely (cf Is 24^{2} 28^{7}, Jer 6^{13} 23^{11}, Hos 4^{9}); they ought to have been teachers of the people, but they led them astray. The prophets also, who were associated with them at the sanctuaries, played false and prophesied for personal gain, proclaiming peace where there was no peace (cf Jer 5$^{13, 31}$ 14^{13f} 23^{21ff} 29^{8}, Mic 3^{11}).

2. Post-exilic period.—In the time of Ezra we find that the administration of justice by the elders of the city, which had continued throughout the period of the monarchy, is still in vogue (cf Ezr 7^{25} 10^{14}); they presided over the **local courts** in the smaller provincial towns. These smaller courts consisted of seven members; in the larger towns the corresponding courts consisted of twenty-three members. In the event of these lower courts not being able to come to a decision regarding any matter brought before them, the case was carried to the superior court at Jerusalem, the Sanhedrin (q.v.). The procedure in these courts was of the simplest character; the injured person brought his complaint before the judges, previous notice having been given, and publicly gave his version of the matter. The accused in turn defended himself; if we may judge from Job 31^{35}, a written statement was sometimes read out. The testimony of **two witnesses** at least was required to substantiate an accusation; according to the Talmud, these witnesses had to be males and of age, but the testimony of a slave was not regarded as valid. Before witnesses gave their testimony they were adjured to speak the truth, and the *whole* truth. False witnesses—and these were evidently not unknown—had to suffer the same punishment as the victim of their false testimony would have had to undergo, or had undergone. If no witnesses were forthcoming, the truth of a matter had, as far as possible, to be obtained by the cross-questioning and acumen of the judges.

3. In the NT.—In NT times in Palestine the domestic administration of justice remained as it had been before the land became part of the Roman Empire. The elders functioned as usual, and when Jesus Christ was haled before the Sanhedrin we are informed that the scribes and the elders were there (Mt 26^{57ff}, Mk 14^{53ff}, Lk 22^{54ff}, Jn 18). The fact that the Sanhedrin had not the power to carry out the death sentence on their own authority is shown by the fact that the sentence upon Jesus Christ had to be confirmed by Pilate, the Roman governor (Mt 27^{1f} etc.). Likewise the case of the high priest Ananias against St. Paul had to be referred to the Roman governor Felix (Ac 23^{1f} 25^{5}). The legal procedure which was adopted against St. Paul gives a clear indication of the course of the administration of justice, especially in the case of a Roman citizen. According to Roman law, when a Roman citizen was accused of anything, the magistrate could fix any time that suited him for the trial; however long the trial might be postponed, the accused was nevertheless imprisoned for the whole time. But there were different kinds of imprisonment recognized by Roman law, and it lay within the magistrate's power to decide which kind should be applied in any particular case. These different grades of custody were: the public gaol where the prisoner was bound in chains (Ac 12^{6} 21^{33}); in the custody of a soldier, who was responsible for the prisoner, and to whom the prisoner was chained; and an altogether milder form, according to which the accused was in custody only so far that he was under the supervision of a magistrate, who stood surety for him; it was only those of high rank to whom this indulgence was accorded. In the case of St. Paul it was the second of these which was put into force on the journey to Rome (Ac 27^{1}) and during his time in Rome itself (Ac 28^{16}).

With regard to **appeals** to the Emperor (Ac 25^{11f}), the following conditions applied when one claimed this right. In the Roman provinces the supreme criminal jurisdiction was exercised by the governor of the province, whether proconsul, propraetor, or procurator; no appeal was permitted to provincials from a governor's judgment. But Roman citizens had the right of appealing to the tribunes, who had the power of ordering the case to be transferred to the ordinary tribunals at Rome. But from the time of Augustus the power of the tribunes was centred in the person of the Emperor; and with him alone, therefore, lay the power of hearing appeals. The form of such an appeal was the simple pronunciation of the word 'Appello'; there was no need to make a written appeal, the mere utterance of the word in court suspended all further proceedings there. Cf GOVERNMENT, ROMAN PUBLIC LAW. W. O. E. O.—J. Ma.

JUSTIFICATION, JUSTIFY.—Justification has been an important word in Christian theology primarily because of St. Paul's use of it. It was he who gave it what has become its characteristic meaning. It is found also, however, in the OT, and there are occasional uses of it in the Gospels and in the Epistle of St. James.

1. In the Biblical languages the word is derived from the same verbal root as 'righteousness.' The Greek for 'justify' is *dikaioō*, for 'justification' *dikaiōsis*, and for 'righteousness' *dikaiosynē*. The study of 'justification' in the Bible, therefore, must be supplemented by reference to the word 'righteousness' (q.v.).

The Vulgate translated the Greek word *dikaioō* by the Latin 'justificare,' which by derivation means 'to make righteous.' This was probably largely responsible for the mistaken belief that this is the meaning of 'justify' in the Bible. This, however, is a serious error. In the Bible it means 'to declare righteous,' 'pronounce innocent,' or 'treat as righteous,' but not 'to make righteous.' It describes a personal relationship rather than an ethical quality of character. It is a word said to be drawn from the vocabulary of the law courts, where a judge 'justified' an accused prisoner when he declared him innocent and acquitted him. It had come, however, to have a currency far wider than the law courts.

2. In the *Old Testament* occasionally it is God who is said to be 'justified.' This means that His actions and judgments are proved by events to be just, though men had felt doubt about their fairness (Ps 51^{4}, Lk 7^{29}). It is Job's sin, in the eyes of Elihu, that he seeks to 'justify himself rather than God' (Job 32^{2}). More usually, however, God is the subject rather than the object of 'justify.'

The word is applied also to men. For instance, it is the mark of an honourable man that he 'justifies' only those who are in fact 'just'; and it is a sign of gross wickedness in a judge if he 'justifies' one who is in fact guilty, especially if he does it in return for a bribe (Is 5^{23}). In a less official way this is true of all men (Pr 17^{15}). God too passes His judgment on human lives. Since He, as opposed to corrupt man, is perfectly righteous, His verdicts are always scrupulously just. Man's judgments may be unjust, whether through wickedness or ignorance, but God can be relied on never to 'justify the wicked' (Ex 23^{7}). The upright man, therefore, though he may be wrongfully condemned by his fellows or even by unjust judges, can find comfort in the knowledge that God by His final verdict will at the last 'justify' him (Is 50^{8}).

God's verdict can be trusted always to be fair. But this may be a cause of misgiving rather than comfort to a man of sensitive conscience, who knows that even his best is far short of God's perfect will for him. For 'how can a man be righteous (AV '**justified**') before God'? (Job 25^{4}). 'In thy sight shall no living man be justified' (Ps 143^{2} RV). It is true that He will never condemn unfairly, but how can He who knows the innermost secrets of every heart pronounce any man wholly innocent and guiltless? A man must hold a very superficial view

of sin who can find complete comfort in the thought that God's dealings with him will be based on strict justice (Ps 130[2]).

There remains an unresolved dilemma in the OT. Some passages such as Ps 15 declare unequivocally that the only way for a man to be justified before God is for him to be actually innocent. Other passages, however, humbly recognize that mortal man is never truly innocent in the light of God's perfect holiness. A beginning of a solution is made by the recognition that in certain circumstances there is forgiveness with God, and that He is willing to accept a 'broken and a contrite heart,' when man has no actual righteousness to offer (Ps 51[17]); thus God provides 'justification' even when man himself has failed to provide justice. In Is 53[11] there is also mention of one, God's Servant, who will gain justification for those who cannot claim it on their own account: 'My righteous servant shall justify many' (RV).

3. In the *Gospels* the word 'justify' is infrequent. God (or the Wisdom of God) is said to be justified by His actions (Mt 11[19], Lk 7[29, 35]). Men are spoken of as 'justifying themselves,' *i.e.* representing their conduct as free from blame (Lk 10[29] 16[15]). The importance of what we say, as well as what we do, for our justification (right standing) with God is stressed in Mt 12[37]. The utter inadequacy in this connexion of a complacent fulfilment of external duties is clearly shown in the parable of the Pharisee and the Publican. The Publican, who has nothing to commend him but his penitence and his plea for mercy, is 'justified' rather than the Pharisee who has been punctilious in observing all the requirements of his religion (Lk 18[14]). This same emphasis is prominent elsewhere in our Lord's teaching, especially in the parables of the Prodigal Son and the Workers of the Vineyard, even though the word 'justify' is not used. In these three parables we find clearly presented the same truth which Paul later was to express in terms of 'justification' by grace through faith.

In *Acts* the only use of the word occurs in an account of an address by Paul (13[39], where RSV has 'freed'), and this faithfully reflects the teaching we find in his letters.

4. It is in the *Pauline Epistles* that the word is found most frequently. It is not, however, evenly distributed among them, but is largely confined to the two letters usually associated with the Judaistic controversy, Romans and Galatians. Of the twenty-nine uses of the word (and its derivatives) in Paul's letters, twenty-five occur in these two. For this reason it has been argued that the word is not one that Paul chose spontaneously as a metaphor suitable in itself for declaring the message of the Christian Gospel, but rather one which was forced upon him by his opponents in the controversy. The Judaizers sincerely believed that Paul was undermining the very foundations of morality and justice when he spoke of God's free forgiveness and acceptance of sinful men on the basis merely of their faith in Christ. They insisted that the only man who can be justified by God is one who has proved himself in his conduct to be a right-living man. Had not God explicitly said, 'I will not justify the wicked'? (Ex 23[7]).

In Romans 7 Paul reveals how keenly he had realized the hopelessness of sinful man if these stern words contained the whole truth about God's dealings with men. If man's acceptance by Him was dependent on his own poor attempts at goodness, then he must be for ever excluded from God's presence. Paul, however, had had made known to him another way by which he might find acceptance with God. It was through Christ. When a man committed his whole life in trust and obedience to Christ, he found himself forgiven by God, accepted by Him, and delivered from the weight of guilt. Through faith in Christ he was justified, without having to wait until he had made himself a righteous man.

Judaism, besides insisting that a man was justified only by his actual obedience to the commands of God, usually thought of God's verdict being declared at the end of life in the final judgment. Man's justification was therefore a matter of pious hope for the future, not of confident assurance in the present. 'The doers of the law *will* be justified,' was the way Paul represented the teaching of Judaism (Ro 2[13]).

Paul's Gospel was quite contrary to this. Through what God had done in Christ, man's justification did not depend any longer on his own moral achievements, but on his *faith* in Christ. It was not granted by God as a reward which man could earn by his good deeds, but was an act of God's *grace*, His free unmerited mercy, offered to man in his need as a free gift. Nor was it merely a hope for the future, but rather a *present* privilege.

It was a *present* privilege. Paul often used of it the present tense. All who believe in Christ 'are justified by his grace as a gift' (Ro 3[24]). 'A man is justified by faith apart from works of law' (Ro 3[28]). The matter is made even clearer by the use of past tenses in some cases. 'Now that we *have been* justified' is the literal translation of the tense in Ro 5[1] and 5[9].

It is an act of *grace*, God's free unmerited gift. 'We are justified by grace as a gift' (Ro 3[24]). Twice in Romans (5[16, 18]) justification is described as 'a free gift.' Since, however, the grace of God is nowhere so fully and vividly present as in the self-giving of Christ on the Cross, justification is often related to His death. It is mediated 'by his blood' (Ro 5[9] 3[25]). It is not, however, derived exclusively from the death of Christ, since Paul also declares: 'He was raised for our justification' (Ro 4[25]).

The response in man which appropriates this gift of God, made available to him in Christ, is called *faith* (Ro 3[28] 5[1]). Paul, however, gives his own fullness of meaning to this word. It is nothing less than the full acceptance of Christ into our lives, as the One on whom we depend, and whom we are pledged to obey. We take Him and all He has done for us, and put our lives at His disposal for whatever He sees we need, whether chastisement, rebuke, cleansing, healing, or command. That is faith. It is man's acceptance of God as He draws near in Christ.

The consequence in human life of this readjusted relationship with God is 'peace' (Ro 5[1]).

In this way Paul helped to resolve the dilemma of OT writers. No man can make himself righteous before the holiness of God, yet he is required to be righteous if he is to be justified. There is, however, forgiveness with God. Paul combined these truths in his Gospel. Christ was the 'righteous servant' who would 'justify many' (Is 53[11]). Through Christ God declared to be righteous those who had faith in Him. What the Law could not do, Christ had done.

While it is true that hopes expressed in the OT thus find their fulfilment in Paul's Gospel, it is also true that Paul's words ran counter to other OT affirmations. It is stated unmistakably in Pr 17[15] that 'he who justifies the wicked is an abomination to the Lord'; yet Paul declared that God Himself 'justifies the ungodly' (Ro 4[5]). This must have sounded like sheer blasphemy to those who claimed to be loyal Jews, even though they were also Christians. It was by such startling words that Paul sought to make clear beyond any doubt the astonishing newness of the Gospel of Christ. He refused to allow it to be imprisoned in the strait-jacket of Judaism. For this reason justification by grace through faith has rightly come to represent the very core of the Gospel.

Sometimes the attempt is made to distinguish sharply what Paul meant by justification from such other great words as reconciliation, redemption, adoption, and salvation. All of them are brave attempts to find metaphors to declare what God has done for man through Christ. The word describing the remedy varies with the word describing the illness. If man's ailment is his estrangement from God, then reconciliation is the blessing which Christ brings; if it is bondage to evil, then Christ has brought redemption; if it is that religion seemed like a weary task laid on a reluctant slave, Christ was declared to have brought the privilege of sonship (adoption); if man was thought of as lost and doomed,

Christ's work for him was salvation. Similarly, if man's plight was that he was a guilty wrongdoer, worthy to be condemned to dreadful punishment, his forgiveness and release can be described as justification. It is not so much that these great words are sharply different from each other. Rather it is that taken all together they serve to describe the fullness of the benefits which God bestows through Christ.

5. The teaching of *St. James* on justification seems on the surface to be in plain contradiction to St. Paul. He writes: 'Abraham was justified by works,' not by faith (2^{21}), and 'By works a man is justified and not by faith alone' (2^{24}). It may be that James represented a form of Christianity which was sympathetic to the Jewish emphasis on good works as a prerequisite to acceptance with God, and felt uneasy about Paul's almost imprudent emphasis on the free grace of God in Christ. It is, however, not necessary to take this point of view. The contradiction may well be more apparent than real. It is, for instance, quite clear that the word 'faith' in this epistle bears a very different significance from that which Paul gave to it. For James it is merely an intellectual assent to certain articles of belief, which a demon knows to be true no less than an angel, but his life is unaffected by it (2^{19}). For Paul, on the other hand, it meant the total commitment of life, in trust and obedience, to Christ. Paul himself would have denounced as vehemently as James any false confidence in such a travesty of true faith. The faith he recognized and pleaded for was the 'faith which works through love' (Gal 5^{6}), and James too is pleading for the kind of faith which expresses itself in love. It is possible also that by justification James was thinking of God's final verdict on human life, which undoubtedly takes into account conduct as well as professed belief, as the parable of the Sheep and Goats makes clear (Mt 25$^{31-46}$). Paul, however, uses justification to describe, not the final verdict, but God's acceptance of man here and now. He, too, no less than James, assumes that at the Last Judgment, 'God will render to every man according to his works' (Ro 2^{6}). Probably, too, Paul primarily meant by 'works' a somewhat soulless observance of prescribed regulations, with the selfish motive of imposing on God an obligation to dispense the appropriate reward, whereas James meant humble love towards one's neighbour, as God commanded, and practised in the common ways of life. It is unlikely that James was contradicting Paul in what he wrote, though he may have been protesting against some distortion of Paul's teaching by people who found in it an excuse for avoiding the humble duties of Christian love.

Paul's exposition of this doctrine is of the very essence of the Gospel of Jesus Christ. Justification by grace through faith does not, however, make the humble duty of obedience to God unnecessary. Rather it is a gift from God to man's need, bestowed in order that from the healed relationship with God which it creates, man may find new power to obey God and also new joy in that obedience (Ro 8^{4}). C. L. M.

JUSTUS.—This surname is given to three persons in NT. **1. Joseph Barsabbas** (Ac 1^{23}). **2. Titus** or Titius, host of St. Paul at Corinth (Ac 18^{7} RV; the MSS vary between these two forms, and some omit the first name altogether; RSV, **Titius**), apparently a Roman citizen who was a 'God-fearer,' converted to Christianity by the Apostle. **3.** A Jew named **Jesus** or Joshua, who apparently was with St. Paul during his imprisonment (Col 4^{11}). A. J. M.—F. C. G.

JUTAH, Jos 15^{55} (RV).—See JUTTAH.

JUTTAH.—A town of Judah, Jos 15^{55} (RV **Jutah**); given to the priests as a city of refuge for the manslayer, Jos 21^{16}. It is omitted from the list of cities of refuge in 1 Ch 6^{59}. It has been suggested that Juttah was the residence of Zechariah and Elizabeth, and the birthplace of John the Baptist (Lk 1^{39} 'a city of Judah'). Juttah is probably modern *Yaṭṭā*, standing high on a ridge 16 miles from *Beit Jibrîn* (Eleutheropolis).

K

KAB.—See WEIGHTS AND MEASURES.

KABUL, Jos 19^{27} (RSV).—See CABUL.

KABZEEL.—A town in the extreme S. of Judah, on the border of Edom, Jos 15^{21}, 2 S 23^{20}, 1 Ch 11^{22}; called **Jekabzeel** in Neh 11^{25}. It is possibly modern *Kh. Hōrah*.

KADESH or **KADESH-BARNEA.**—This was an important oasis in the North Sinai desert. It is mentioned incidentally in Gn 14^{7} 16^{7}, and played a significant rôle in the desert wandering of the Israelites, being the scene of the striking of the rock by Moses (Nu 20^{2}). For long it was the centre of the tribes (Nu 20^{1}, Dt 1^{46}), the scene of Korah's rebellion (Nu 16) and of the death of Miriam (Nu 20^{1}). The spies were sent hence into Palestine (Nu 32^{8}, Dt 1^{20ff}), and returned hither (Nu 13^{26}), and from here a delegation was dispatched to the king of Edom (Nu 20^{14ff}, Jg 11^{16}).

Kadesh-barnea lay on the south boundary of the Amorite highlands (Dt 1^{19}) and on the confines of Edom (Nu 20^{6}). The conquest of Joshua is depicted as reaching thus far (Jos 10^{41}). Thus a location is visualized on a line, running from the Ascent of Akrabbim on the east to the Brook of Egypt on the west, which conventionally marked the southern boundary of Canaan (Nu 34^{4}, Jos 15^{3}). In Gn 20^{1} it is placed E. of Gerar but, as the latter place was located WNW. of Beersheba, the direction is only vague. In Ezk 47^{19} 48^{28} it is located between Tamar and the Brook of Egypt, again a rather vague location. These notices, however, do not exclude H. Clay Trumbull's location at a group of springs in the tribal territory of the *'Azāzimîn* Arabs, about fifty miles S. of Beersheba. One of these springs, *'Ain Qedeis*, probably preserves the Biblical name, but the most important settlement has been located at *'Ain Qedeirāt*, where the remains of an ancient fort were recognized by Woolley and Lawrence and later dated by Glueck to the early Hebrew monarchy. It is plausibly argued by Mowinckel that this place, a shrine three days' journey from Egypt, was the immediate objective of the Israelites at the Exodus, and that the desert wandering was rather a gravitation about this centre. He suggests further that as an important entrepôt of caravan trade it was the cause of the war between Amalek and Israel (Ex 17^{8ff}). The locality is still a much frequented oasis, and *'Ain Qedeirāt* has been successfully developed to the limit of its possibilities as an experimental farm by the Egyptian Government.

Tribal disputes and trials by ordeal were doubtless conducted here, as suggested by the names **En Mishpat**, 'Well of Judgment' (Gn 14^{7}), Waters of Meribah, 'Suit at Law,' Massah, 'Trial' (Ex 17$^{1-7}$), and Kadesh, 'Holy,' itself. The well as the abode of a *numen* is a common conception in ancient Semitic animism and modern Arab superstition. W. E.—J. Gr.

KADMIEL.—The name of a Levitical family which returned with Zerubbabel, Ezr 2^{40}, Neh 7^{43}, 1 Es 5^{26} (AV **Cadmiel**). In Ezr 3^{9} (cf 1 Es 5^{58} [AV **Cadmiel**]), in connexion with the laying of the foundation of the

Temple, as well as in Neh 9^{4f} (the day of humiliation) and 10^{9} (the sealing of the covenant), Kadmiel appears to be an individual. The name occurs further in Neh $12^{8, 24}$.

KADMONITES.—One of the nations whose land was promised to Abram's seed, Gn 15^{19}. Their *habitat* was probably in the region of the Dead Sea. The fact that *Kedemah* is said to be a son of Ishmael (Gn 25^{15}, 1 Ch 1^{31}) renders it likely that they were Ishmaelite Arabs. Ewald, however, regarded *Ḳadhmōnî* as equivalent to *Bᵉnê Ḳedhem*.

KAIN.—1. A city in the uplands of Judah, Jos 15^{57} AV **Cain**); probably to be identified with the modern *Kh. Yaqîn*, on a hill SW. of Hebron, with tombs, cisterns, and other traces of an ancient town. A neighbouring sanctuary is pointed out as the tomb of Cain. **2.** A clan name=the **Kenites** (q.v.), Nu 24^{22} (RV, RSV; AV 'the Kenite'), Jg 4^{11} (RVm; AV, RV, RSV 'the Kenites').

KAIWAN.—The name of a star-god, Am 5^{26} (AV, RV **Chiun**); commonly identified with Akkadian *Kaiwānu*, the planet Saturn (=Ninib, war-god), whose temple, Bit Ninib, in the province of Jerusalem is mentioned by the Egyptian governors of this city as early as 1450 B.C. The vowels in MT were probably substituted from the word *shiḳḳuṣ* ('abomination'). But see STARS; also REPHAN, SAKKUTH. N. K.

KALLAI.—The head of a priestly family, Neh 12^{20}.

KAMON.—The burial-place of Jair, Jg 10^{5} (AV **Camon**). The site is uncertain; possibly modern *Qamm*, SE. of the Sea of Galilee.

KANAH.—1. A 'brook' or *wady* in the borders of Ephraim, Jos 16^{8} 17^{9}. It is commonly identified with *Wâdī Qânah* near Shechem. **2.** A town in the northern boundary of Asher, Jos 19^{28}, probably to be identified with the modern *Qânah*, a short distance SE. of Tyre.

KAPH.—See CAPH.

KAREAH ('bald').—Father of Johanan, **1.**

KAREM.—A city of Judah, in the lowland, mentioned in Jos 15^{59} in LXX, but not in the Hebrew; probably modern *ʿAin Karîm*.

KARIATHIARIUS, 1 Es 5^{19} (RV).—See KIRIATH-ARIM.

KARKA.—An unknown place in the S. of Judah, Jos 15^{3} (AV **Karkaa**).

KARKAA, Jos 15^{3} (AV).—See KARKA.

KARKOR.—A place apparently in Gilead, Jg 8^{10}. The site is unknown.

KARNAIM.—A city mentioned in Am 6^{13} (RSV; AV, RV 'horns'); probably the same as **Ashteroth-Karnaim** (q.v.).

KARTAH.—A city of Zebulun, Jos 21^{34}; not mentioned in the parallel passage, 1 Ch 6^{77}. The site is unknown.

KARTAN.—A city of Naphtali, Jos 21^{32}. The parallel passage, 1 Ch 6^{76}, has **Kiriathaim.** It is perhaps *Kh. el-Qureiyeh*.

KATTATH.—A city of Zebulun, Jos 19^{15}; possibly modern *Kh. Quṭeineh*. It is perhaps to be identified with **Kitron.**

KEDAR.—The name of a nomadic people living to the E. of Palestine, whom P (Gn 25^{13}) regards as a division of the Ishmaelites. Jeremiah (49^{28}) counts them among the 'sons of the East,' and in 2^{10} refers to them as symbolic of the East, as he does to Citium in Cyprus as symbolic of the West. In Isaiah (21^{7}) they are said to produce skilful archers, to live in villages (42^{11}), and (60^{7}) to be devoted to sheepbreeding. The last passage associates them also with the **Nebaioth** (possibly Nabataeans). Jeremiah alludes also to their nomadic life, their sheep, camels, and tents (49^{29}). Ezekiel (27^{21}) couples them with 'Arab,' and speaks of their trade with Tyre in sheep and goats. In Ps 120^{5} Kedar denotes the type of barbarous unfeeling people and in Ca 1^{5} their tents are as a symbol of blackness. The Assyrian king Ashurbanipal (668–626 B.C.) in his account of his Arabian campaign mentions the Kedarites in connexion with the *Aribi* (Arabs) and the Nebaioth, mentioning asses, camels, and sheep as booty. More recently Kedar is mentioned in Aramaic inscriptions on two silver bowls from a shrine at *Tell el-Maskhûṭah* (possibly Succoth) east of the Nile Delta, which were given by 'Qaynu (Cain) the son of Gashmu, King of Kedar' in the Persian period. Gashmu is no doubt the adversary of Nehemiah, in which case Kedar could coincide with the Persian province of 'Arabia' in the south of Palestine to the Egyptian border. This region had been occupied after the Exile by Edomites and Arabs from E. of the *Wâdī ʿArabah*, so that, in agreement with earlier Assyrian inscriptions Kedar of Qaynu's inscriptions may refer to land here as well as the Persian province of Arabia west of the Arabah. G. A. B.—**J. Gr.**

KEDEMAH.—A son of Ishmael, Gn 25^{15}, 1 Ch 1^{31}. The clan of which he is the eponymous head has not been identified. See also KADMONITES.

KEDEMOTH.—A place apparently on the upper course of the Arnon, assigned to Reuben, Jos 13^{18}; a Levitical city, 21^{37}, 1 Ch 6^{79}. From 'the wilderness of Kedemoth' messengers were sent by Moses to Sihon, Dt 2^{26}. It is possibly modern *Qaṣr ez-Zaʿferân*.

KEDESH.—1. A city in the south of Judah, Jos 15^{23}. See KADESH. **2.** A Levitical city of Issachar, 1 Ch 6^{72}; called **Kishion** in the parallel list in Jos 21^{28} (AV **Kishon**). It is perhaps *Tell Abū Qedeis*. **3.** See KEDESH IN NAPHTALI.

KEDESH IN GALILEE.—See KEDESH IN NAPHTALI.

KEDESH IN NAPHTALI.—A city of Naphtali, Jg 4^{6} (AV, RV **Kadesh-naphtali**); called **Kedesh** in Jos 12^{22} 19^{37}, Jg 4^{9-11}, 2 K 15^{29}, and **Kedesh in Galilee** in Jos 20^{7} 21^{32}, 1 Ch 6^{76}. Evidently, from the name ('holy'), a sacred site from ancient times. A Canaanite royal city, Jos 12^{22}; and later a city of refuge (20^{7}) and a Levitical city (21^{32}). It was the home of Barak, Jg 4^{6}. In the reign of Pekah it was captured by Tiglath-pileser, 2 K 15^{29}.

The site is modern *Tell Qades*, one of the most picturesque spots in Galilee; to the E. of the village the ground is strewn with ancient remains. There are several fine sarcophagi and the ruins of a large building, possibly once a Roman temple. E. W. G. M.

KEDESH-NAPHTALI, Jg 4^{6} (AV, RV).—See KEDESH IN NAPHTALI.

KEDRON.—A place fortified by Cendebeus (1 Mac $15^{39, 41}$ RSV; AV **Cedron**, RV **Kidron**), and the point to which he was pursued after his defeat by the sons of Simon the Maccabee (16^{9}). It may be the modern *Qaṭra* near *Yebnā*, and is possibly identical with Gederoth of Jos 15^{41}, 2 Ch 28^{18} (but cf J. Simons, *The Geographical and Topographical Texts of the OT*, p. 147).

KEHELATHAH.—One of the stopping places in the wanderings, Nu 33^{22f}. The site is unknown.

KEILAH.—A city of Judah in the lowland, named with Nezib and Achzib, Jos 15^{44}. David delivered it from the marauding Philistines, and it became his residence for a time. Becoming aware of the treachery of its inhabitants, he left it, 1 S 23^{1ff}. It was reoccupied after the Exile, Neh 3^{17f}. In 1 Ch 4^{19} it has the epithet 'Garmite' (q.v.). It is commonly identified with *Kh. Qîlā*, about seven miles E. of *Beit Jibrîn*. It lies very high, however, for a city in the Shephelah, being over 1,500 feet above the level of the sea. W. E.

KELAIAH.—A Levite who had married a foreign wife, Ezr 10^{23}, 1 Es 9^{23} (AV, RV **Colius**). He was also called **Kelita** (in AV, RV in 1 Es 9^{23} **Calitas**). Kelita appears in Neh 8^{7}, 1 Es 9^{48} (AV, RV **Calitas**) as one of the Levites who assisted Ezra in expounding the Law, and his name occurs amongst the signatories to the covenant, Neh 10^{10}. It does not follow, however, that because Kelaiah was also called Kelita he is to be identified with *this* Kelita.

KELITA.—See KELAIAH.

KEMUEL.—**1.** The son of Nahor and father of Aram, Gn 22[31] (contrast 10[22], where Aram is son of Shem). **2.** Son of Shiphtan and prince of the tribe of Ephraim, one of the twelve commissioners for the dividing of the land, Nu 34[24]. **3.** The father of Hashabiah, the ruler of the Levites, 1 Ch 27[17].

KENAN.—Son of Enoch and father of Mahalelel, Gn 5[9, 12] (AV **Cainan**), 1 Ch 1[2]. The name is a variant of *Cain*.

KENATH.—A city to the E. of the Jordan, taken by **Nobah**, whose name for a time it bore, Nu 32[42]. Geshur and Aram reconquered it, 1 Ch 2[23]. It was later called *Kanata*, one of the towns of the Decapolis. It is usually identified with *Qanawât*, fully 16 miles N. of Bozrah. It occupies a commanding position on either bank of the *Wâdī Qanawât*, which here forms a picturesque waterfall. There are tall, graceful columns, and massive walls, together with other impressive remains of buildings from Graeco-Roman times. The modern village, lower down the slope, is now occupied by Druzes. W. E.

KENAZ.—See KENIZZITES.

KENEZITE, Nu 32[12], Jos 14[6, 14] (AV).—See KENIZZITES.

KENITES.—A nomadic people, closely connected with the Amalekites (q.v.), but having friendly relations with Israel, and ultimately, it seems, at least in the main, absorbed in Judah. **Hobab,** Moses' father-in-law (Jg 1[16] 4[11] RSV), who had been invited by Moses—and had doubtless accepted the invitation—to be a guide to Israel in the wilderness (Nu 10[29–32]), was a Kenite; and his descendants came up from Jericho with the tribe of Judah into the S. part of their territory (Arad is mentioned here, about 17 miles S. of Hebron), though afterwards, true to their nomad instincts, they roamed beyond the border and are found among the Amalekites in N. Sinai (Jg 1[16]; read here with MSS of LXX 'the Amalekite' for 'the people'—the last three letters having dropped out in the Hebrew). When Saul, many years later, attacked the Amalekites, he gave the Kenites timely warning on the grounds of ancient friendship (1 S 15[6], alluding doubtless to Hobab's guidance, Nu 10[29–32]). In Jg 4[11] Heber the Kenite is mentioned as having separated himself from the main body of his people, and wandered northwards as far as the neighbourhood of Kedesh in Galilee (*Tell Abû Qedeis*, SW. of the Sea of Galilee), where his wife Jael dispatched Sisera after his defeat by Barak (Jg 4[17f]). From 1 S 27[10] 30[29] we learn that in the time of David there was a district in the S. of Judah inhabited by Kenites; it is possible that **Kinah** in the Negeb of Judah (Jos 15[22]) and **Kain** in the hill-country (v.[57]) were Kenite settlements. The **Rechabites,** with whom the nomadic life had become a religious institution (Jer 35), were said to be Kenites (1 Ch 2[55]). In Gn 15[9] (J) the Kenites are mentioned among the ten nations whose land was to be taken possession of by the Israelites, a reference, no doubt, to the absorption of the Kenites in Judah. The folk-oracle in Nu 24[21f] plays on the resemblance of the name to the Hebrew *ḳēn*, 'nest,' and declares that though their 'nest' is among the rocky crags (namely in the S. of Judah), they would in the end be carried away captive by the Assyrians ('**Kain**' in v.[22] is the proper name of the people of which 'Kenite' is the gentilic adjective; cf Jg 4[11] RVm. Note that the oracle on the Kenites follows closely upon that on the Amalekites).

The word *kain* means in Hebrew 'spear' (2 S 21[16]), and in Arabic *qayyān* means an 'iron-smith'; the Aramaic cognate also denotes a metal-worker; hence it has been conjectured (Sayce) that the Kenites were a nomad tribe of smiths. This is supported by their association with Midian (Ex 3[1]) and the Negeb in the vicinity of the copper mines of the Arabah. The condemnation of Cain to perpetual wandering and the prohibition of any violence to him (Gn 4[12–15]) probably reflects the nomad habits of the itinerant smith-caste, the Kenites, and the immunity which they enjoyed. It is also feasibly suggested that Yahweh was originally the god of the Kenites, though in what character is quite uncertain. S. R. D.—J. Gr.

KENIZZITES.—A clan named from an eponymous ancestor, **Kenaz.** According to Jos 15[17], Jg 1[13], **Caleb** and **Othniel** were descended from him. (The inference sometimes made, that Kenaz was a brother of Caleb, arose from a misunderstanding of these passages.) In Jos 14[6, 14] Caleb is called a Kenizzite (AV **Kenezite**), and so in Nu 32[12] (AV **Kenezite**). In Gn 15[19–21] the Kenizzites are counted among the pre-Israelitish inhabitants of Palestine. P in Gn 36[42] enrols Kenaz among the 'dukes' of Edom, while in vv.[11, 15] he is counted both as a 'duke' and as a grandson of Esau. The Chronicler names Kenaz as a grandson of Esau (1 Ch 1[36]), and also as a descendant of Judah (1 Ch 4[13–15]). The probable meaning of all these passages is that the Kenizzites overspread a part of Edom and southern Judah before the Israelite conquest and continued to abide there, a part of them being absorbed by the Edomites, and a part by the tribe of Judah. This latter portion embraced the clans of Caleb and Othniel. G. A. B.

KENOSIS.—The word means 'emptying.' As a noun, it is not found in NT, but the correlative verb occurs in Ph 2[7], 'emptied himself,' in which it is said that Christ 'though he was in the form of God, did not count equality with God a thing to be grasped, but emptied himself, taking the form of a servant, being born in the likeness of men.' In the context in which this occurs, Paul is urging the Philippians to emulate their Lord in His humility and concern for others; the Apostle does not appear to be making a theological point so much as an ethical one.

However, this passage, along with such others as 2 Co 8[9], has been used by theologians in the last two centuries to suggest a view of the Incarnation in which the Eternal Word 'emptied himself,' giving up or leaving behind His metaphysical attributes, when He became man. The notion of *kenōsis*, so employed, has had special reference to the limitations both in knowledge and in action which attached to the Lord as He is portrayed for us in the Gospels; *kenōsis*, therefore, has been a NT concept upon which such theologians have sought to hang a doctrinal affirmation.

However, it appears that despite the use which Paul has made elsewhere of notions of a pre-existent Redeemer or Saviour who 'gave up' His heavenly place to enter history for man's salvation, this passage has its primary intention for the Apostle in its insistence that the 'mind' of Christ is to be reproduced in the life of the believer. The incidental references which may be made to a redeemer-god in terms of which the life of Jesus is explained are not central to the passage. On the other hand, the writer plainly wishes to assert that it was by the humility and obedience of the Lord that He was given the exalted place noted in Ph 2[9] and won the privilege of being called 'Lord.' W. N. P.

KERAS, 1 Es 5[29] (RV).—See KEROS.

KERCHIEFS (from the French *couvrechef*, a covering for the head) are mentioned only in Ezr 13[18, 21] (AV, RV; RSV **veils**), a somewhat obscure passage having reference to certain forms of divination or sorcery, which required the head to be covered. They evidently varied in length with the height of the wearer (v.[18]), and perhaps resembled the long veils worn by the female captives from Lachish represented on an Assyrian sculpture; see DRESS, 5 (*b*). A. R. S. K.

KERÊ or QERÊ.—See TEXT OF OT.

KEREN-HAPPUCH (literally 'horn of antimony').—The youngest daughter born to Job in his second estate of prosperity, Job 42[14]. The name is indicative of beautiful eyes, from the dye made of antimony, used to paint the edges of the eyelids, 2 K 9[30], Jer 4[30].

KERIOTH.—**1.** A city of Moab, named in Jer 48[24, 41], Am 2[2] (AV **Kirioth**), and in line 13 of the Moabite Stone

(see MESHA). Some have suggested the identification with Ar, the capital of Moab, but this is doubtful. Equally doubtful is the identification with **Kir-heres** (q.v.). The site is unknown. **2.** Jos 15^{25} (AV); for 'Kerioth and Hezron' read **Kerioth-hezron** (q.v.).

KERIOTH-HEZRON.—A town in the Negeb, Jos 15^{25}, identical with **Hazor, 3** (q.v.).

KEROS.—Name of a family of Nethinim (q.v.) who returned with Zerubbabel, Ezr 2^{44}, Neh 7^{47}, 1 Es 5^{29} (AV **Ceras**, RV **Keras**).

KESITAH.—See QESITA.

KESTREL.—See HAWK.

KETAB (1 Es 5^{30}).—Head of a family of Temple servants who returned with Zerubbabel (AV **Cetab**). There is no corresponding name in the lists of Ezra and Nehemiah.

KETHÎBH.—See TEXT OF OT.

KETTLE.—In AV and RV in 1 S 2^{14} only. In RSV also in Mic 3^{3} (AV, RV 'pot'). See HOUSE, **9.**

KETURAH.—Abraham's wife (Gn 25$^{1-4}$), or concubine (1 Ch 1^{32f}; cf Gn 25^{6}) after the death of Sarah; named only by J and the Chronicler in the passages referred to; said to be the ancestress of sixteen tribes, several of which are distinctly Arabian—Midian, Sheba, Dedan. Some Arabic writers mention an Arabian tribe near Mecca called *Qaṭûrā*. The ancient Israelites evidently regarded some Arabs as distant relatives (see ABRAHAM, ESAU, HAGAR). The name *Ḳᵉṭûrāh* = 'incense,' is a perfume-name like *Ḳᵉṣiʿāh* (Job 42^{14}; see KEZIAH). W. T. S.

KEY.—See HOUSE, **6.** Of the passages where this word is used in a figurative sense the most important are Is 22^{22} (cf Rev 3^{7}), where the key is the symbol of authority and rule; Lk 11^{52} 'the key of knowledge'; and the *crux interpretum*, Mt 16^{19}, for which see next article. A. R. S. K.

KEYS, POWER OF THE.—In ecclesiastical history the phrase is associated primarily with the so-called 'Privilege of Peter,' upon which the dogma of papal supremacy has been built, but also with the delegated authority of an official priesthood to pronounce sentence of the absolution or the retention of sins.

1. The fundamental passage is Mt 16^{18f}. When St. Peter at Caesarea Philippi had made his great confession of Jesus as the Christ, Jesus blessed him and announced that upon this rock (*i.e.* either Peter or the Divine revelation he had received) He would build His Church. Then He added, 'I will give you **the keys of the kingdom of heaven**: and whatever you bind on earth shall be bound in heaven; and whatever you loose on earth shall be loosed in heaven.' That this double promise, like the one in the preceding verse, was made to St. Peter personally can hardly be doubted. The question is as to what it means. Evidently Jesus is carrying out the figure He has already used of a building founded upon **a rock**—the rock, viz., of believing confession, based upon a divine revelation (v.^{17}); and He now declares that as the reward of this confession he should have the privilege of wielding the keys of the Kingdom of heaven. There are some who think that by this gift of the keys St. Peter was appointed to the position of a steward in charge of his Lord's treasures, entrusted with the duty of feeding the household (Lk 12^{42}, cf Mt 13^{52}). But from the use of the word 'key' by Jesus Himself in Lk 11^{52}, and from the analogy of Is 22^{22}, Rev 3^{7}, it is probable that the keys are those not of the storehouse but of the mansion itself, and that the gift of them points to the privilege of admitting others into the Kingdom. The promise was fulfilled, accordingly, on the day of Pentecost, when St. Peter opened the doors of the Christian Church to the Jewish world (Ac 2^{41}); and again at Caesarea, when he, first of the Apostles, opened that same door to the Gentiles (Ac 10$^{34-38}$ 15^{7}). But, as the two incidents show, there was nothing arbitrary, official, or mysterious about St. Peter's exercise of the power of the keys on these occasions. It was his believing confession of Christ that had gained him the privilege, and both in Jerusalem and at Caesarea it was by a renewed confession of Christ, accompanied by a testimony to the truth regarding Him as that had been made known in the experience of faith (Ac 2$^{32-36}$ 10$^{36-43}$), that he opened the doors of the Kingdom alike to Jews and to Gentiles.

With regard to the second part of the verse, 'Whatever you bind on earth shall be bound in heaven; and whatever you loose on earth shall be loosed in heaven,' some scholars have regarded it as merely explaining what is meant by the keys of the Kingdom, while others hold that it confers an additional privilege. The latter view is the more probable. In Rabbinic language to '**bind**' and to '**loose**' were the regular terms for forbidding and permitting. Hence these words confer upon the Apostle a power of legislation in the Christian Church—*i.e.* of interpreting the Christian *halachah* and deciding questions of Christian duty—a power which we see him exercising by and by, along with the other Apostles and the elders, at the Jerusalem Conference (Ac 15$^{6-11, 22-29}$).

But now comes the question, Was this twofold promise, which was given to St. Peter personally, given him in any exclusive sense? As regards the second part of it, clearly not; for on a later occasion in this same Gospel we find Jesus bestowing precisely the same privilege on His disciples generally (18^{18}; cf v.^{1} and also vv.^{19f}). Moreover, the later NT history shows that St. Peter had no supreme position as a legislator in the Church (see Ac 15$^{13, 19}$, Gal 2^{11ff}). And if the power of binding and loosing was not given to him exclusively, the presumption is that the same thing holds of the parallel power of the keys. As a matter of fact, we find it to be so. Though St. Peter had the privilege of first opening the doors of the Kingdom to both Jews and Gentiles, the same privilege was soon exercised by others (Ac 8^{4} 11^{19ff} 13^{2ff}). By and by Peter falls into the background, and we find Paul and Barnabas rehearsing to the Church how God through their preaching had 'opened a door of faith to the Gentiles' (14^{27}). But this does not mean that the privilege was withdrawn from St. Peter; it means only that it was extended to others on their fulfilment of those same conditions of faith and testimony on which Peter had first received it.

2. In Mt 18^{18} there appears to be no reference whatever to the remission and retention of sins. As in 16^{18}, 'whatever' not 'whomever' is the word employed, and here as there the binding and loosing must be taken to refer to the enactment of ordinances for regulating the affairs of the Church, not to the discharge of such a purely spiritual function as the forgiveness of sins. In any case, the promise is made not to the Apostles, much less to an official priesthood deriving authority from them by an Apostolic succession, but to 'the Church' (v.^{17}).

3. In Jn 20^{23} we find the assurance definitely given of **a power to remit or retain sins.** But the gift is bestowed upon the whole company present (cf Lk 24^{33}) as representing the Christian society generally. That society, through its possession of the Holy Spirit (v.^{22}), is thus empowered to declare the forgiveness or the retention of sins (cf 1 Jn 2^{20}, Gal 6^{1}). As a matter of fact, this is the way penitential discipline and restoration were administered in the early church.

J. C. L.—F. C. G.

KEZIA, Job 42^{14} (AV).—See KEZIAH.

KEZIAH ('cassia').—The name of the second daughter born to Job after his restoration to prosperity, Job 42^{14} (AV **Kezia**).

KEZIZ, Jos 18^{21} (AV).—See EMEK-KEZIZ.

KIBROTH-HATTAAVAH ('graves of lust').—A station in the wanderings, Nu 11^{34f} 33^{16f}, Dt 9^{22}. The march from Taberah (Nu 11^{3}) is not mentioned in Nu 33, but Kibroth-hattaavah was one day's journey from the wilderness of Sinai. It is perhaps to be located at *el-Ebeirig*, NE of Sinai.

KIBZAIM.—See JOKMEAM, **1.**

KID.—See GOAT and (for Ex 23^{19}) MAGIC.

KIDNAPPING.—See CRIMES, etc., **7.**

KIDNEYS.—1. Literal.—(1) The choice portions of animals sacrificed to Y^{n} included the kidneys (Ex 29$^{13, 22}$, Lv 3$^{4, 10, 15}$ 4^{9} 7^{4} 8$^{16, 25}$ 9$^{10, 19}$; cf Is 34^{6}). The term is even transferred to wheat (Dt 32^{14} AV, RV; RSV 'the finest of the wheat'). (2) Limited to poetry is the use of this term in regard to human beings, and the rendering in AV and RV is always 'reins' (see below). They are formed by Y^{n} (Ps 139^{13}; RSV 'inward parts'), and are, metaphorically, wounded by Y^{n}'s arrows (Job 16^{13}; RSV 'kidneys,' cf La 3^{13}, where RSV has 'heart'). They may be 'consumed' (Job 19^{27}; RSV 'my heart faints'). (3) AVm of Lv 15^{2} 22^{4} ('running of the reins') is incorrect; there is no mention of 'reins.'

2. Figurative.—Here the AV and RV rendering is always '**reins**' Latin *renes*, plural (the Greek equivalent being *nephroi*, whence 'nephritis,' etc.). The avoidance of the word 'kidneys' is desirable, because we do not regard them as the seat of emotion. But the Biblical writers did so regard them. It was as natural for them to say 'This gladdens my reins' as it is natural—and incorrect—for us to say 'This gladdens my heart.' And, in fact, in the passages now cited the terms 'reins' and 'heart' are often parallel: Ps 7^{9} 16^{7} 26^{2} 73^{21}, Pr 23^{16}, Jer 11^{20} 12^{2} 17^{10} 20^{12}, Wis 1^{6}, 1 Mac 2^{24}, Rev 2^{23} (RSV 'heart' in all these passages except Pr 23^{16} ['soul'], Wis 1^{6} ['inmost feelings'], Rev 2^{23} ['mind']). H. F. B. C.—**H. H. R.**

KIDRON, 1 Mac 15$^{39, 41}$ (AV).—See KEDRON.

KIDRON, THE BROOK.—The name of a valley (*naḥal*, 'torrent valley,' 'wady,' 2 S 15^{23}, 1 K 2^{37}, 2 Ch 30^{14}, Neh 2^{15} etc.; Greek *cheimarrous*, Jn 18^{1}, where AV has **Cedron**), nearly 3 miles in length, which bounds the plateau of Jerusalem on the E. It is always dry except during and immediately after heavy rain; it is the same valley that is referred to as the **Valley of Jehoshaphat** (q.v.). It commences about 1¼ miles N. of the NW. corner of the city walls, as a wide, open, shallow valley. At first it runs SE., receiving tributaries from the W. and N., but where it is now crossed by the modern carriage road to the Mt. of Olives, it turns S. Near this spot (as well as higher up) there are a number of ancient tombs; among them on the W. side of the valley are the so-called 'Tombs of the Kings,' and on the E. the reputed tomb of 'Simon the Just,' much venerated by the Jews. The whole of this first open section of the valley is to-day known as *Wâdī el-Jawz* ('Valley of the Nuts'); it is full of fertile soil, and in a great part of its extent is sown with corn or planted with olives or almonds. As the valley approaches the E. wall of the city it rapidly deepens, and rocky scarps appear on each side; it now receives the name *Wâdī Sitti Maryam, i.e.* 'Valley of the Lady Mary.' Opposite the Temple area the bottom of the valley, now 40 feet below the present surface, is about 400 feet below the Temple platform. S. of this it continues to narrow and deepen, running between the village of *Silwân* (see SILOAM) on the E. and the hill Ophel on the W. Here lies the 'Virgin's Fount,' ancient **Gihon** (q.v.), whose waters to-day rise deep under the surface, though once they ran down the valley itself. A little farther on the valley again expands into a considerable open area, where vegetables are now cultivated, and which perhaps was once the '**King's Garden**' (q.v.). The Tyropoeon Valley, known now as *el-Wâd*, joins the Kidron Valley from the N., and farther on the *Wâdī er-Rabâbi*, traditionally **Hinnom** (q.v.), runs in from the W. The area again narrows at *Bîr Ayyûb*, the ancient **En-rogel** (q.v.), and the valley continues a long winding course under the name of *Wâdī en-Nâr* ('Valley of Fire') till it reaches the Dead Sea.

There is no doubt whatever that this is the Kidron of the OT and NT. It is interesting that the custom of burying Israelites there, which continued to modern times (see JEHOSHAPHAT [VALLEY OF]), is referred to in 2 K 23$^{4, 6, 12}$ and 2 Ch 34^{5}. It is probable that the place of the 'graves of the common people' (Jer 26^{23}) was also here, and it has been suggested, from a comparison with Jer 31^{40}, with less plausibility, that this may have been the scene of Ezekiel's vision of the dry bones (Ezk 37). The 'fields of Kidron' (2 K 23^{4}), though generally identified with the open part of the valley when it is joined by the Tyropoeon Valley, are more likely to have been the upper reaches of the valley referred to above as *Wâdī el-Jawz*, which were on the way to Bethel.

The Valley of the Kidron is mentioned first and last in the Bible at two momentous historical crises—when David crossed it (2 S 15^{23}) amid the lamentations of his people as he fled before Absalom, and when Jesus 'went forth with His disciples over the brook Kidron' (Jn 18^{1}) for His great and terrible agony before His crucifixion.

E. W. G. M.—**P. W.-M.**

KILAN.—Sixty-seven sons of Kilan and Azetas who returned with Zerubbabel, 1 Es 5^{15} (AV **Ceilan**); in the lists of Ezr 2 and Neh 7 the names are omitted.

KILN.—See FURNACE.

KIN (NEXT OF), KINSMAN, AVENGER OF BLOOD, GO'EL.—1. 'Next of kin' is the nearest equivalent in modern jurisprudence of the Hebrew *gō'ēl*, itself the participle of a verb originally signifying 'to claim' (*vindicare*), then 'to buy back,' or, according to A. R. Johnson, 'to cover.' The duties devolving on the *gō'ēl* belonged to the domain both of civil and of criminal law. If a Hebrew, for example, were reduced to selling a part, or the whole, of his property, it was the duty of his next of kin to purchase the property, if it was in his power to do so. The classical instance of the exercise of this 'right of redemption' is the case of the prophet Jeremiah, who purchased the property of his cousin Hanamel in Anathoth, on being asked to do so in virtue of his relationship (Jer 32^{8ff}). Similarly, should a sale have actually taken place, the right of redemption fell to the next of kin (Lv 25^{25}). The case of Naomi and the 'parcel of land' belonging to her deceased husband was complicated by the presence of Ruth, who went with the property. Ru 4^{5} reads, 'The day you buy the field from the hand of Naomi, you are also buying Ruth the Moabitess, the widow of the dead.' The true *gō'ēl* accordingly transferred his rights to Boaz, who came next to him in the degree of relationship. In all these cases the underlying idea is that the land is the inalienable property of the clan or 'family' (Ru 2^{1}) in the wider sense.

Boaz acted the part of the *gō'ēl* in keeping the land in the family; he also fulfilled another duty of the next of kin in raising an heir to the dead by marrying Ruth. In the duty of marrying a widow left childless, ideally the next of kin was the brother of the deceased husband (Dt 25$^{5-10}$), but in early days, as Gn 38 and the Book of Ruth show, he could be any kinsman. See MARRIAGE, **4.**

The duties of the *gō'ēl*, however, extended not merely to property and to the childless widow, but also to the person of a relative. Should the latter have been compelled by misfortune to sell himself as a slave, it fell to his next of kin to redeem him (Lv 25^{47ff}). Hence arose an extensive use of the verb and its participle in a figurative sense, by which Y^{n} is represented as a *gō'ēl* (RSV **redeemer**), and Israel as His redeemed (so especially in Is 41^{14} 43^{14} and often).

2. The most serious of all the duties incumbent on the *gō'ēl*, in earlier times more particularly, was that of avenging the murder of a relative. In this capacity he was known as the **avenger of blood** (*gō'ēl had-dām*). The practice of blood-revenge is one of the most widely spread customs of human society, and is by no means confined to the Semitic races, although it is still found in full vigour among the modern Arabs. By the Bedouin of the Sinaitic peninsula, for instance, the hereditary vendetta is kept up to the fifth generation (see interesting details given in Lord Cromer's *Report* on Egypt, 1906, 13 ff, and W. H. Storm, *Whither Arabia?* 1938, 17 ff).

In primitive times, therefore, if a Hebrew was slain, it was the sacred duty of his next of kin to avenge his

blood by procuring the death of his slayer. This, it must be emphasized, was in no sense a matter of private vengeance. It was the affair of the whole clan, and even tribe, of the murdered man (2 S 14[7]), the former, as it were, delegating its rights to the nearest relatives. OT legislation sought to limit the application, and generally to regulate the exercise, of this principle of a life for a life. Thus the Book of the Covenant removes from its application the case of the accidental homicide (Ex 21[13]; Dt 19[1-7], Nu 35[9-34]), the legislation of Deuteronomy further restricts the sphere of the vendetta to the actual criminal (Dt 24[16]), while in Dt 19[6, 12] and Nu 35[19, 24] references to 'the avenger of blood' suggest that one person only is thought of as having the duty of blood-revenge, he being the next of kin. In the older legislation the local high places appear as **asylums** for the man-slayer, until his case should be proved to be one of wilful murder, when he was handed over to the relatives of the man he had slain (Ex 21[13, 14]). With the abolition of the local sanctuaries by the reforms of Josiah it was necessary to appoint certain special sanctuaries, which are known as cities of refuge (Dt 19[1-7]) (see REFUGE [Cities of]).

An interesting feature of the regulations concerning blood-revenge among the Hebrews is the almost total absence of any legal provision for compounding with the relatives of the murdered man by means of a money payment (Nu 35[31], but see Ex 21[30]). Blood-revenge *must* be taken, for murder is not merely an offence against man, which the avenger of blood might be willing to settle with a fine: it is an offence against God which demands retaliation. See also AVENGER OF BLOOD.

A. R. S. K.—A. G. McL.

KINAH.—A town in the extreme south of Judah, Jos 15[22]. The site is unknown. Cf KENITES.

KINDNESS —The pattern of all kindness is set before us in the Bible in the attitude of God to men. He gives the sunshine and the rain, and fruitful seasons and glad hearts, food and all the good they have to the just and the unjust alike (Mt 5[45] 7[11], Ac 14[17]). But the exceeding wealth of His grace is shown to us in kindness towards us in Christ Jesus (Eph 2[7]). God's glory no man can look upon and live. It is a light that no man can approach. It is inconceivably great, incomprehensibly grand, unimaginably exalted above the grasp of man's mind. But the kindness of God is God's glory stooping to man's need. It is God's power brought within man's reach. It is God's mercy and love and grace, as broad as the race, as deep as man's need, as enduring as man's immortality. The Bible reveals it. Jesus manifested it. In His life the kindness of God found its supreme manifestation (Tit 3[4-7]). All the children of God are to be like the Father in this regard (Mt 5[48], Ro 12[10], Col 3[12-14]). The philanthropy of God (Tit 3[4]) is to be reproduced in the philanthropy of men (2 P 1[7]).

D. A. H.

KING (IN THE OT).—1. Etymology and use of the Hebrew term.—The Hebrew word for 'king' (*melekh*) is derived from a root which in Assyrian and Aramaic implies the giving of counsel or advice, so that in origin it appears to have signified 'counsellor' and so 'ruler.' In the patriarchal narratives and in the stories of the Hebrew conquest, for example, the title is applied to the rulers of small city-states in Canaan and its neighbourhood; but the term is also used of rulers over wider territories such as those of Egypt, Moab, Syria, and, in later times, Assyria, Babylonia, and Persia. The root also supplies the motif for the names of several Semitic deities, *e.g. Milcom*, the god of the Ammonites (1 K 11[5], 2 K 23[13]), and the Phoenician *Melkart*. For its use with reference to Yahweh, see KINGDOM OF GOD (OR HEAVEN), **2**, and PSALMS, **3** (A), **6** (1).

2. The office of king in Israel.—(1) *Institution.* The settlement of the people of Israel in Canaan, and the change from a nomadic to an agricultural life, laid the incomers open to ever fresh attacks from new adventurers. Thus in the time of the Judges we find Israel ever liable to hostile invasion. In order to preserve the nation from extermination, it became necessary that a closer connexion and a more intimate bond of union should exist between the different tribes. The Judges in the period subsequent to the settlement seem, with the possible exception of Gideon (Jg 8[22]), to have been little more than local or tribal heroes, carrying on guerilla warfare against their neighbours. The successes of the warlike Philistines made it clear to patriotic minds that the tribes must be more closely connected, and that a permanent leader in war was a necessity. Accordingly Saul the Benjamite was anointed by Samuel (1 S 10[1]), and appointed by popular acclamation (10[24] 11[14]). The exploits of Saul and his sons against the Ammonites (11[11ff]), against the Amalekites (15[7]), and against the Philistines (14[1ff]) showed the value of the kingly office; and when Saul and his sons fell on Mount Gilboa, it was not long till David the outlaw chief of Judah was invited to fill his place (2 S 2[1ff] 5[1ff]).

(2) *The duties of the king.* These are partly indicated by the history of the rise of the kingship. The king was (*a*) leader in war. He acted as general, and sometimes led the troops to battle in person (cf Saul on Mount Gilboa, 1 S 31[2]; Ahab at Ramoth-gilead, 1 K 22[29ff]). Under Solomon the standing army was developed, and fortifications were built at strategic points throughout the country (1 K 9[15ff] 10[26ff]). (*b*) Besides being leader of the army in war, the king was the supreme judge, to whom final appeal might be made from the findings of the local elders or professional judges (cf 2 S 14[1-20] 15[1-6], 1 K 3[16-28], 2 K 8[1-6], 2 Ch 19[5-11]). (*c*) Further, the king was also the chief person from a cultic point of view. Thus David and Solomon, like Saul before them (1 S 14[31ff]; cf 13[8ff]), offer sacrifice (2 S 6[13, 17] 24[25], 1 K 3[4]), and each blesses the people (2 S 6[18], 1 K 8[14]). Jeroboam sacrifices in person before the altar in Bethel (1 K 12[32f]), and Ahaz orders a special altar to be made, and offers in person on it (2 K 16[10ff]). In fact throughout the period of the monarchy the king takes the lead in organizing the nation's worship (cf 2 S 6, 1 K 5–8 12[26-32] 15[12-15], 2 K 12[4-16] 16[10-18] 22[3]–23[23], 1 Ch 22[2-19] 25).

(3) *The king as Yahweh's vicegerent.* The foregoing duties of the king should be seen in the light of what is now known as sacral kingship; for he held office as Yahweh's 'Anointed' (see MESSIAH), *i.e.* one who had been set aside by Yahweh for this purpose, and therefore should be regarded as sacrosanct (cf 1 S 24[10] 26[9], 2 S 1[14, 16]). So far as the House of David was concerned, the king's authority rested upon a special covenant between Yahweh and the founder of the dynasty (2 S 23[5], Ps 89[19ff] 132[11f]; cf 2 K 11[12]); and, in association with this, there was preserved in the worship of the Temple, which from the first was a royal sanctuary, an ideal of kingship which gave rise to the hope that from this line would issue a ruler whose loyalty to the obligations of the Davidic covenant would bring him world-wide dominion as the true 'Son' of Yahweh. (See PSALMS, **3** (F), **4** (*ad init.*), **5** (*ad fin.*), **6** (3).)

(4) *The kingship hereditary.* As is indicated in the preceding paragraph, it was a fixed idea in ancient Israel that the office of the kingship passed from father to son, as the judgeship passed from Gideon to his sons (Jg 9[2]), or from Samuel to his sons (1 S 8[1]). Although Saul was chosen by the people and David invited by the elders of Judah to be king, yet Saul himself regarded it as the natural thing that Jonathan should succeed him (1 S 20[30ff]). Adonijah assumed that, as David's son, he had a right to the throne (1 K 2[15]), and even the succession of his younger half-brother Solomon was secured without any popular election. The succession in Judah remained all along in the house of David, and in the kingdom of the Ten Tribes father always succeeded son, unless violence and revolution destroyed the royal house and brought a new adventurer to the throne.

(5) *Power of the king.* While the monarchy in Israel differed considerably from other Oriental despotisms, it could not be called a limited monarchy in our sense

of the term. The king's power was limited by the fact that, to begin with, the royal house differed little from other chief houses of the nation. Saul, even after his election, resided on his ancestral estate, and came forth only as necessity called him (cf 1 S 11^{4ff}). On the one hand, law and ancient custom exercised considerable restraint on the kings; while, on the other hand, acts of despotic violence were allowed to pass unquestioned. A powerful ruler like David or Solomon was able to do much that would have been impossible for a weakling like Rehoboam. Solomon was practically an Oriental despot, who ground down the people by taxation and forced labour. David had the power to compass the death of Uriah and take his wife, but public opinion, as expressed by the prophets, exerted a considerable influence on the kings (cf Nathan and David, Elijah and Ahab). The idea was never lost sight of that the office was instituted for the good of the nation, and that it ought to be a help, not a burden, to the people at large. Law and ancient custom were, in the people's minds, placed before the kingly authority. Naboth can refuse to sell his vineyard to Ahab, and the king is unable to compel him, or to appropriate it till Naboth has been regularly condemned before a judicial tribunal (1 K 21^{1ff}). Thus the king himself was under law (cf Dt 17$^{14-20}$), and he does not seem to have had the power to promulgate new enactments. Josiah bases his reform not on a new law, but on the newly found Book of the Law (2 K 23$^{1-3}$), to which he and the elders swear allegiance.

(6) *Royal income.* The early kings, Saul and David, do not seem to have subjected the people to heavy taxation. Saul's primitive court would be supported by his ancestral estate and by the booty taken from the enemy, perhaps along with presents, more or less compulsory, from his friends or subjects (1 S 10^{27} 16^{20}). The census taken by David (2 S 24^{1}) was probably intended as a basis for taxation, as was also Solomon's division of the land into twelve districts (1 K 4^{7}). Ezekiel (45^{1f} 48^{21}) speaks of crown lands, and such seem to have been held by David (1 Ch 27^{25ff}). The kings in the days of Amos laid claim to the first cutting of grass for the royal horses (Am 7^{1}). Caravans passing from Egypt to Damascus paid toll (1 K 10^{15}), and in the days of Solomon foreign trade by sea seems to have been a royal monopoly (1 K 10^{15}). It is not quite certain whether anything of the nature of a land tax or property tax existed, though something of this kind may be referred to in the reward promised by Saul to the slayer of Goliath (1 S 17^{25}); and it may have been the tenth mentioned in 1 S 8$^{15, 17}$. Special taxes seem to have been imposed to meet special emergencies (cf 2 K 23^{35}), and the kings of Judah made free use of the Temple treasures.

(7) *Royal officials.* In Hebrew these have the general title *śārîm* (*e.g.* 1 K 4^{2}: AV, RV 'princes'; RSV 'high officials'); and of the following list the first three appear to have been the leading administrative figures throughout the monarchy. (*a*) The official who is described as 'governor of the palace' (literally 'over the household') enjoyed wide powers, and was evidently the chief officer of state, *i.e.* the vizier or prime-minister (*e.g.* 1 K 4^{6} 18^{3}, 2 K 18$^{18, 37}$; cf Is 22$^{15-25}$). (*b*) The 'scribe' (RSV 'secretary') apparently acted both as private secretary to the king and as secretary of state (*e.g.* 2 S 8^{17} 20^{25}, 2 K 12^{10} 18^{18} 22^{3}, Jer 36^{12}). His office was clearly inferior to that of 'governor of the palace' (cf Is 22$^{15-22}$ 36^{22}). (*c*) The 'recorder' (EV) or better, perhaps, 'herald' (literally 'one who calls to remembrance') is to be found grouped with both the foregoing. He seems to have been the king's personal agent or intermediary (*e.g.* 2 S 8^{16} 20^{24}, 2 K 18$^{18, 37}$). (*d*) Other officials to whom reference is made are the commander-in-chief, who in the absence of the king led the royal forces (2 S 8^{16} 20^{23}; cf 12^{26ff}), the commander of the royal bodyguard (in David's time the Cherethites and Pelethites, 2 S 8^{18} 20^{23}), the officials in charge of forced labour (2 S 20^{24} RSV), and the commissariat (1 K 4$^{5, 7ff}$), the 'king's servant' (2 K 22^{12}), the 'king's friend' (1 K 4^{5}; cf 1 Ch 27^{33}), the 'king's counsellor' (1 Ch 27^{33}), the 'keeper of the wardrobe' (2 K 22^{14}), and the 'governor of the city' (1 K 22^{26}).

W. F. B.—A. R. J.

KINGDOM OF GOD (or HEAVEN).—1. Title.—The exact phrase does not, strangely enough, appear in either the OT or in apocalyptic literature before the time of Jesus. In St. Matthew's Gospel 'Kingdom of Heaven' occurs thirty-two times, 'Kingdom of God' only four times. In the other Gospels and the rest of the NT 'Kingdom of God' is frequent, while 'Kingdom of Heaven' never occurs. Jewish reverence for the name of God led to the substitution of other words for the word 'God'; of these 'heaven' was the commonest (cf Lk 15^{18}, 'I have sinned against heaven and before you'). No difference of meaning is therefore to be sought in the two phrases 'Kingdom of God' and 'Kingdom of Heaven'; and Jesus no doubt used both—perhaps the latter more frequently, since it was presumably more often used by ordinary Jewish people. 'St. Matthew' is the Gospel of Jewish Christianity, and its writer would naturally prefer the Jewish paraphrase; most of the other authors of the NT were writing for Gentiles, and would not be inclined to use it.

2. In the Old Testament.—The thought of the OT is theocratic in the general sense that the Jews looked to Yahweh as both God and King; but this kind of thought was associated with a considerable variety of ideas as time went on. The Jewish equivalent of the NT 'Kingdom of God' or 'Kingdom of Heaven' means the 'sovereignty' or 'kingly rule' of God; it is abstract rather than concrete, pointing to the status of God Himself rather than to the people ruled or the place they inhabit. Cf 'The Lord will reign for ever and ever' (Ex 15^{18}), 'The Lord has established his throne in the heavens, and his kingdom rules over all' (Ps 103^{19}), 'His dominion is an everlasting dominion, and his kingdom endures from generation to generation' (Dn 4^{34}).

The first stage is the expectation of the 'Day of the Lord'—the day, that is, when God will vindicate Himself against His enemies and bring triumph to His own people. In the earliest period, down to about the 8th cent. B.C., the future was thought of as a time of material prosperity achieved through the overthrow of Israel's enemies—a conception which proceeded naturally enough from the very limited view of Yahweh as Israel's national God and no more. It is non-ethical; the coming of the Day of the Lord depends on due performance of ritual and sacrifice rather than on national morality. There is not here any idea of a Messiah; expectation centres on the rule of Yahweh Himself.

The great prophets of the 8th cent., Amos, Hosea, Isaiah, and Micah, with their idea of Yahweh as a moral ruler, gave the Day of the Lord a new meaning. It is to be a day of judgment, for Israel as well as for other nations—and for Israel with special severity in virtue of her privileged position. 'You only have I known of all the families of the earth; therefore I will punish you for all your iniquities' (Am 3^{2}). At this stage other nations are to be judged only in relation to Yahweh's own people—not, so to speak, in their own right. In Zephaniah (7th cent.) monotheism has gone further and the judgment seems to be universal; Yahweh challenges all nations Himself. 'Yea, at that time I will change the speech of the peoples to a pure speech, that all of them may call on the name of the Lord and serve him with one accord' (Zeph 3^{9}). There is still no mention of a Messianic king.

During and after the Exile thought changes considerably. Jeremiah and Ezekiel, as was natural when the Jewish state had practically ceased to exist, made the judgment individual rather than national. The Day of the Lord will mete out individual retribution, and as a result a new and better Israel will emerge—the kingdom of the Messiah. 'Behold, the days are coming, says the Lord, when I will raise up for David a righteous Branch, and he shall reign as king and deal wisely, and shall

execute justice and righteousness in the land. In his days Judah will be saved, and Israel will dwell securely. And this is the name by which he will be called; "The Lord is our righteousness"' (Jer 23^{5-6}). 'This is the covenant which I will make with the house of Israel after those days, says the Lord; I will put my law within them, and I will write it in their hearts; and I will be their God, and they shall be my people. And no longer shall each man teach his neighbour and each his brother, saying "Know the Lord," for they shall all know me, from the least of them to the greatest, says the Lord; for I will forgive their iniquity, and I will remember their sin no more' (Jer 31^{33-34}). In Jeremiah the other nations will be converted and enter the kingdom; in Ezekiel they are doomed.

Two types of thought run side by side after the Exile, one in line with Jeremiah, the other with Ezekiel. In the 'Servant Songs' which are found among the writings of the Second Isaiah (42^{1-4} 49^{1-6} 50^{4-9} 52^{13}–53^{12}), if, as is probable, the 'Servant of Yahweh' is the righteous remnant of Israel, the writer thinks of the nation's duty as essentially a missionary one. Yahweh has laid a special commission on His people, to bring all men to worship in His Kingdom. This shall be the fruit of the nation's suffering through the Exile. The same thought appears in many of the Psalms (*e.g.* Ps 87, with its picture of Jerusalem as the mother city of many nations); and in the remarkable prophecy of Is 19^{18-25} (probably 3rd cent. B.C.), which pictures Egypt and Assyria as no less Yahweh's own people than Israel herself. In most of the later prophets, however, such as Haggai and Zechariah, the Day of the Lord will bring a Messianic kingdom for Israel alone, with the Gentiles either vassals or destroyed. The Jews were hard put to it to maintain themselves in Palestine; the rebuilding of the Temple was but sluggishly undertaken and spasmodically carried on, and Judaism became rigid and exclusive in its efforts to avoid contamination and hand on its system to posterity.

3. Between the Testaments.—The book of Daniel (168–167 B.C.) forms the link between OT ideas and apocalyptic thought. Apocalyptic is the fruit of pessimism; and its chief difference from OT thought on the subject we are considering is that in it a sudden intervention by God, and not the moral reformation of the nation, will bring the Kingdom into being. 'Prophecy still believes that this world is God's world,' says Dr. Charles, 'and that in this world His goodness and truth will yet be justified. The apocalyptic writer, on the other hand, almost wholly despairs of the present; his main interests are supermundane' (*Eschatology*, 1st ed., p. 174). Apocalyptic does not, like prophecy, see the future as arising naturally from the present; there is to be a complete break—in fact it is only after the darkest hour that the dawn will come. Subject as she had been for centuries to the sway of one or other of the great world-powers, the present world had no hope for Israel; God alone could save by breaking into history and bringing the world order to an end. At the same time the doctrine of personal immortality, almost wholly absent from pre-exilic writings, begins to appear. So the writer of Daniel looks forward to the sudden coming of the Kingdom at the moment when evil in the world has reached its climax. The throne of judgment will be set up, the world powers overthrown, the faithful will receive the Kingdom and the righteous dead will rise to share it with them.

In the numerous apocalyptic writings of the 2nd and 1st cents. B.C. the Kingdom on earth is at first regarded as temporary, and later on as to be established on a transformed, a 'new,' earth. The Messiah is to be the chief figure in the Kingdom, but two different ideas of him are found. Some writers picture him as a supernatural being, applying to him such titles as 'the Righteous One,' 'He in whom wisdom dwells,' 'the Elect One,' 'the Anointed' (=Christ), and, especially, 'the Son of Man.' Others speak of him as a Davidic king, who will destroy the ungodly nations, and 'rule a mighty people and a holy.'

4. In the Synoptic Gospels.—In Jesus' time both these ideas of Messiah were current, and with them different ideas of the Kingdom itself. In the popular mind national and political hopes were no doubt prominent, hopes based on belief in the restoration of national independence under a Davidic prince, and fed by hatred of Rome. After the fall of Jerusalem and the destruction of the Temple in A.D. 70 such hopes became dominant—the restoration of Jerusalem and of worship in its Temple, and the liberation of the Jews from a foreign yoke through the complete destruction of the empire of Rome. Before A.D. 70, however, what the Jewish rabbis believed and taught was much more spiritual than this; they bade men look forward to the universal reign of God, when His sovereignty would be acknowledged by all men, and a new era of righteousness and peace begin. The way to bring the Kingdom nearer, they taught, was not rebellion, but greater righteousness according to God's will as revealed in the Law.

Much injustice may be, and indeed often has been, done to Jewish thought by identifying the whole of belief and hope about the Kingdom at Jesus' time with the narrowly political ideas of it current after Jerusalem had fallen; or by suggesting that since Jesus' idea of the Kingdom had a strongly spiritual element in it, it was therefore quite un-Jewish. As in other matters, no doubt here also Jesus rejected some and accepted other elements in the thought of His people, and added something of His own. In His teaching about the Kingdom the spiritual element no doubt predominated to a greater degree than was the case in contemporary thought; but this is not to say that contemporary thought on the subject was wholly unspiritual, or that because it was wholly unspiritual Jesus would have nothing to do with it. Jesus cannot have believed, for example, that when the Kingdom came, it would be a Roman one. He would not encourage Jewish desire for rebellion against Rome; yet He must have expected that Rome's overthrow would come to pass when God established His Kingdom. Jesus did not feel the dominion of Rome to be as burdensome as the yoke of priests and scribes and Pharisees; yet the coming of the Kingdom would certainly put an end to both.

In the Synoptic Gospels some passages about the Kingdom regard it as future, others as present already, if incomplete; and others seem to identify it with the Christian Church. Here is a selection of each kind:

(1) 'The kingdom of God is at hand; repent and believe in the Gospel' (Mk 1^{15}). 'Truly, I say to you, there are some standing here who will not taste death before they see the kingdom of God come with power' (Mk 9^{1}). 'Truly, I say to you, I shall not drink again of the fruit of the vine until that day when I drink it new in the kingdom of God' (Mk 14^{25}). 'Not everyone who says to me "Lord, Lord," shall enter the kingdom of heaven, but he who does the will of my Father who is in heaven. On that day many will say to me . . .' (Mt 7^{21-22}), 'I tell you, many will come from east and west and sit at table with Abraham, Isaac and Jacob in the kingdom of heaven' (Mt 8^{11}). 'Command that these two sons of mine may sit one at your right hand and one at your left, in your kingdom' (Mt 20^{21}). Something over half of the passages in the Synoptic Gospels in which the Kingdom is mentioned appear to regard it as future.

(2) 'To you has been given the secret of the kingdom of God' (Mk 4^{11}). 'With what can we compare the kingdom of God, or what parable shall we use for it? It is like a grain of mustard seed, which, when sown upon the ground, is the smallest of all the seeds on earth; yet when it is sown it grows up and becomes the greatest of all shrubs' (Mk 4^{30-32}). 'Let the children come to me, do not hinder them; for to such belongs the kingdom of God. Truly, I say to you, whoever does not receive the kingdom of God like a child shall not enter it' (Mk 10^{14-15}). 'You are not far from the kingdom of God' (Mk 12^{34}). 'But seek first his kingdom and his righteousness, and all these things

shall be yours as well' (Mt 6[33]). 'But if it is by the Spirit of God that I cast out demons, then the kingdom of God has come upon you' (Mt 12[28]). 'The kingdom of heaven is like treasure hidden in a field, which a man found and covered up; then in his joy he goes and sells all that he has and buys that field. Again, the kingdom of heaven is like a merchant in search of fine pearls, who, on finding one pearl of great value, went and sold all that he had and bought it' (Mt 13[44-45]).

(3) 'Truly, I say to you, among those born of women there has risen no one greater than John the Baptist; yet he who is least in the kingdom of heaven is greater than he' (Mt 11[11]). 'The kingdom of heaven may be compared to a man who sowed good seed in his field; but while men were sleeping his enemy came and sowed weeds among the wheat' (Mt 13[24-25]). 'The kingdom of heaven is like leaven which a woman took and hid in three measures of meal, till it was all leavened' (Mt 13[33]). 'The kingdom of heaven is like a net which was thrown into the sea and gathered fish of every kind; when it was full, men drew it ashore and sat down and sorted the good into vessels but threw away the bad. So it will be at the close of the age' (Mt 13[47-49]). 'Therefore every scribe who has been trained for the kingdom of heaven is like a householder who brings out of his treasure what is new and what is old' (Mt 13[52]). 'I will give you the keys of the kingdom of heaven' (Mt 16[19]). It will be noticed that all these come from St. Matthew, which is the most 'ecclesiastical' of the Gospels. (It is the only Gospel in which the word 'church' occurs.) It represents Jewish Christianity, and one of its main themes is that Christianity is the new Law and the Christian Church the true Israel. So its writer naturally thinks of the Church as the Kingdom of Heaven. Some of the sayings quoted above may have been spoken by Jesus without this identification; others are no doubt the product of later Christian thought in a community such as that in which the author of the First Gospel wrote.

The implications of the first two groups above seem contradictory, and some critics have tried to eliminate one of them. It has been suggested either that Jesus always spoke of the kingdom as future, and the idea that He had also spoken of it as present was the product of developing Christian thought; or that He always spoke of it as present and spiritual, and the idea that He had also spoken of it as future and material was taken over by Christians from Jewish apocalyptic thought. Such attempts are not likely to be successful, since although a good many individual sayings and parables can be pressed towards either conception, the implications of the two groups as a whole are sufficiently decisive to compel the conclusion that both are genuine elements in Jesus' teaching about the kingdom.

An interesting example of a passage which can be interpreted in either sense is Lk 17[20-21]; 'Being asked by the Pharisees when the kingdom of God was coming he answered them, "The kingdom of God is not coming with signs to be observed; nor will they say, 'Lo here it is!' or 'There!' for behold, the kingdom of God is in the midst of you (marginal reading 'within you')."' The natural meaning of the Greek is 'within you,' and the sense will then be that the Kingdom is a spiritual one, which grows unseen in men's hearts. There are no outward signs of its coming. But the Greek may mean 'among you,' in which case two interpretations of the sentence are possible:—(*a*) 'The kingdom is present among you, growing already though you cannot see it.' The Kingdom is already beginning to be realized in Jesus' presence and work among men. This is similar to the thought of Mt 12[28] quoted in group (2) above—'If it is by the Spirit of God that I cast out demons, then the kingdom of God has come upon you.' (*b*) 'You cannot see the kingdom coming; it is there, among you, in a flash'—*i.e.* when it comes, it will come suddenly, without any warning. This refers to the Kingdom simply as future, and is similar to the thought of a later verse in the same chapter, 'For as the lightning flashes and lights up the sky from one side to the other, so will the Son of Man be in his day' (Lk 17[24]). The use of the Greek word with the meaning 'among' is uncommon; and if the sentence represents an Aramaic saying of Jesus, it seems doubtful whether this word would have been used to translate an Aramaic 'among' when the saying was turned into Greek. If that view is accepted, the passage should be included in group (2) above.

It may seem ironical that so much uncertainty should attach to the teaching of Jesus on a subject which must have been so prominent in His message, and is so often mentioned in the Gospels. The fact that this is so suggests that His teaching about the Kingdom was varied in conception and emphasis; and this is indeed what we should expect in view of the variety of Jewish ideas on the subject. It was entirely natural that Jesus should urge men to recognize God's sovereignty as a present reality, to be acknowledged by a spiritual response; and at the same time lead them to hope for a new age in which human hardness of heart should no longer prevent His sovereignty from being universal and complete.

It need not surprise us, moreover, that Jesus should have believed that the Kingdom would be set up by a sudden intervention of God in the future; in this He was a child of His age, His vision limited by the horizons of His time. The ideas which lay behind this belief were indeed fundamental in Jesus' own religious and moral outlook—faith in God in spite of appearances, and the inevitability of judgment by the standards which God Himself had set; what more natural than that He should accept without question the belief that when once the chosen people showed themselves spiritually prepared, God would declare the victory of goodness by such a judgment? This is not to say, of course, that Jesus accepted all the other ideas of the apocalyptic writers. There is much that He must have rejected in their views of God's character, as well as in their pictures of heaven and hell and the destiny of mankind.

5. In the rest of the New Testament.—The writer of the Fourth Gospel, at the end of the 1st cent. A.D. or later, finds the equivalent of the Kingdom in the gift of 'eternal life,' the coming of the 'Comforter,' and the life of the Christian community to which he belongs. The only two verses in which he uses the phrase 'Kingdom of God' regard it as present and spiritual; 'Truly, truly, I say to you, unless one is born anew, he cannot see the kingdom of God' (3[3]), and 'Truly, truly, I say to you, unless one is born of water and the Spirit, he cannot enter the kingdom of God' (3[5]). In the Acts and in St. Paul's earlier letters, as also in Revelation, the coming of the Kingdom is regarded as imminent. This belief led to the 'voluntary communism' of the early Church (Ac 4[32f]); and its vividness can be seen from St. Paul's first letter to the Thessalonians, written in A.D. 51, in which he tries to allay their fear that their friends who have died will be deprived of their share in the glory of the Kingdom (1 Th 4[13f]). As time goes on, St. Paul's ideas on this subject change in emphasis; in his later letters the imminence of the Kingdom has receded, and his thoughts dwell more on its moral and spiritual demands, and on God's plan for all mankind through the Church. H. K. L.

KINGS, BOOKS OF.—1. Title.—This is the name of two well-known narrative books of the OT. In Hebrew MSS and early printed editions they appear as one book, and the Massoretic note appears only at the end of the second book. In the Hebrew canon the Book of Kings constitutes the fourth book of the Former Prophets. Logically it is a continuation of the Book of Samuel without clearly marked literary distinction. The Books of Samuel and Kings are about of the same length, and for convenience the Greek scribes divided each of these books into two parts and numbered them consecutively as four books. Accordingly in the LXX there are four books of 'The Kingdoms' (or 'The Reigns'). This division into four books was followed by all the ancient

versions of the OT; in the Latin Bible these divisions are known as the four books of 'Kings.'

2. Method and sources.—What has just been said does not imply that the Books of Kings are exactly like the other historical books. They differ in their methods, and in the way in which the narrative is presented. The most striking feature is the attempt to date the events recorded, and to keep two parallel lines of history before the reader. The period of time they cover is something over 400 years, and when it is remembered that these books give us almost the only knowledge we have of events in Israel for this period, their historical value will be evident. At the same time, the light they throw on the method by which the Biblical authors worked is almost equally great. To estimate the historical value, it will be necessary to look at the literary method. The phenomenon which first strikes the reader's attention is the unevenness of the narrative. In some cases there is an extended and detailed story; in others a long period of time is dismissed in a few words. The reign of Solomon occupies almost eleven chapters—about a fourth part of the work; while the longer reign of Manasseh is disposed of in sixteen verses.

Still closer examination shows that there are well-marked characteristics of style in certain sections which are replaced by equally marked but totally different ones in other sections. Moreover, there are seemingly contradictory assertions which can hardly have come from the same pen, though they might have occurred in different documents. Thus the account of Solomon's levy of forced labour 'out of all Israel' seems inconsistent with the other declaration that Solomon made no bond-servants of Israel (1 K 5^{13ff}; cf 11^{28} and 9^{20-22}). In this connexion cf 2 Ch 2^{17-18}, where only aliens were drafted. The motive in this presentation was to free native Israelites from the stigma of serf-like labour. One passage (1 K 14^{30}) says without qualification that there was war between Rehoboam and Jeroboam all their days, and this is presumably true history, even though it may be a literary deduction from 1 K 15^{16}. Another (1 K 12^{21-24}) tells how Rehoboam gathered an army, but dismissed it at the word of a prophet without making war, thus saving national pride.

The editor of the Books of Kings acknowledges in many cases the sources from which he derived his information. A unique development of Hebrew history lies in the transition from annals and the purely archival form to the historical story with an interpretation of events. Official records were kept in the archives at the capital. In David's court were a scribe (secretary) and a recorder (2 S 8^{16f} 20^{24f}), while in the case of Solomon mention is made of two scribes and a recorder (1 K 4^{3}). The same offices also existed in the Southern Kingdom (2 K $18^{18, 37}$, 2 Ch 34^{8}), and in accordance with the custom of the times it may be inferred that similar appointments were made in the Northern Kingdom. It was the recorder's duty to keep the current records of the reign in official journals or chronicles. From such archival material were derived the facts used in compiling two well-known sources which were used by the editors of Kings: 'the book of the chronicles of the kings of Israel' (1 K 14^{19}) and 'the book of the chronicles of the kings of Judah' (1 K 14^{29}). These works must not be confused with the two Books of Chronicles in the OT. It is not known in what form these royal 'chronicles' were when they came into the hands of the editors of the Books of Kings. The original records of the North probably were destroyed in the Assyrian conquest, but scribes apparently had made copies, at least in abbreviated edition, which were in circulation. It was doubtless such a work that preserved the Northern chronicles for the Judaean editor of Kings. For the reign of Solomon (1 K 3–11) the editor quotes a source (1 K 11^{41}), 'the book of the acts of Solomon'; this, too, must have been based on official documents.

Beginning with Rehoboam and Jeroboam there is a fixed formula or framework for the commencement and end of each reign. For the Southern kings this includes an introductory synchronism with the Northern reign, the age of the king, length of reign, place of rule (in Jerusalem), the name of the mother. In conclusion there is a reference to the source, the burial of the king, and the name of the successor; cf 1 K $14^{21, 29-31}$ $15^{1, 7f, 23f}$ $22^{41f, 45}$, 2 K $12^{1-19, 21}$ $14^{1f, 17f}$ $15^{1f, 32f, 36}$ $16^{1f, 19f}$ 18^{1f} 21^{1f}. In the Northern Kingdom similar formulas, including synchronisms, are given, but with fewer particulars; cf 1 K 14^{19f} $15^{25, 31}$ $16^{8, 14f, 20, 23}$ (in Tirzah), 1 K 16^{27-29} (in Samaria), 2 K 10^{34-36} (in Samaria) $14^{23, 28f}$ (in Samaria). To the historian the information of greatest importance is the chronology, which contains a double system of dates: the synchronisms and the regnal periods. There are difficulties involved in the dates, but in spite of certain inaccuracies the chronology is not artificial, but is based on archival sources.

Much of the archival material contains interesting personal notes and brief references which arouse in the reader a desire to know more of the details; cf 1 K 15^{23} 16^{27} $22^{45, 47-50}$, 2 K 10^{34} 13^{7f} $14^{21, 28}$ 21^{17}. It is apparent that much historical material was abbreviated in the regal period.

Notice should also be taken of the direct citation of archival material; cf 1 K 9^{25} 'So he finished the house'; 22^{48} 'Jehoshaphat made ships of Tarshish'; 2 K 1^{1} 'And Moab rebelled against Israel'; 2 K 15^{19} 'Pul the king of Assyria came.' Exact dates may be given: cf 1 K 6^{37f} 14^{25}. In 2 K 24–25 are a number of exact datings by year, month, and day, which suggest that the writer is a contemporary of the events.

Sometimes there is used the adverb 'then' (1 K 9^{24}, 2 K 16^{5}), or parallel expressions of time, as 'in that day' [the same day] (1 K 8^{64}), 'in those days' (2 K 10^{32}), 'in his days' (1 K 16^{34}), 'at that time' (2 K 16^{6}). Such expressions have parallels in Akkadian annals, and accordingly they are of archival origin.

The plan of the Temple and the accounts of its furnishing and its dedication (1 K 6, 7, $8^{1-13, 62-64}$) may properly be assigned to a Temple source. The construction of the Temple was entirely a royal undertaking, and the narrative does not reflect any priestly composition. While the Hebrews were not skilled in recording architectural details, the plan of the Temple may represent the architect's specifications, and the document may well have been deposited in the Temple. The account of the uprising against Athaliah (2 K 11) has no specific priestly tinge; in fact, according to 2 K 12^{5ff} the priests had been guilty of mismanagement of sacred funds. In 2 K 16^{10ff} a priest is implicated in copying a foreign altar. In 2 K 22–23 King Josiah is the reformer, and the priests are his servants; in ch. 22 the high priest Hilkiah has recourse to a prophetess to interpret the Book of the Law found in the Temple. It is noteworthy that the Books of Kings do not have priestly literary sources.

The Books of Kings also contain political narratives. 1 K 1–2 continues the history of the reign of David recorded in 2 Samuel with all the intrigues of the court. The story, apparently written by a member of the court who shared in the popular enthusiasm for David, is by no means a royal encomium. It is not known who the author of these chapters is, but some have conjectured that he was Abiathar. At any rate, it is objective history written in classical style. The account of the negotiations with Hiram of Tyre (1 K 5) is founded upon authentic details. The narratives of the revolt of the North under Jeroboam (1 K 11^{26}–12^{24}), the revolt against Athaliah (2 K 11), and the reformation under Josiah (2 K 22–23) bear the earmarks of contemporary history. 2 K 18^{13}–20 has a duplicate in Is 36–39, and is derived from contemporary memoirs.

Reference should also be made to stories of the prophets. The longest example of this literary development is found in the Elijah cycle (1 K 17–19, 21, 2 K 2); that of Elisha, entwined with that of Elijah, begins at 1 K 19^{19} and continues to 2 K 9: there is also a post-script (2 K 13^{14-21}). Within these sagas are inserted two narratives: the rout of Ben-hadad (1 K 20) and the dramatic career of the lone prophet Micaiah (1 K 22).

Thus there is a continuous series of prophetical documents (1 K 17–2 K 10) interrupted only by annalistic items; interspersed within these chapters are also stories which may be called *midrash* (for the word cf Hebrew text, 2 Ch 13^{22} 24^{27}): 1 K 11$^{29-39}$, 1 K 13 and 2 K 23$^{15-20}$, 1 K 16$^{1-4, 7, 12}$.

While the longer quotations from his sources usually show the compiler's religious intent, yet he often presents us with brief notices for which he is probably indebted to 'the books of the Chronicles,' but which have no very direct bearing on his main object. Thus in the case of Jehoshaphat he inserts in his framework a brief notice to the effect that this king made peace with Israel (1 K 22^{44}). In the three-membered contest between Zimri, Tibni, and Omri (1 K 16$^{15-22}$) he compresses the story of a prolonged civil war into a few lines. In the case of Omri we find a brief notice to the effect that this king built the city of Samaria, having bought the land from a man named Shemer (1 K 16^{24}). Such a notice probably compresses a detailed account in which Omri was glorified as the founder of the capital.

From such a variety of sources the Books of Kings were compiled. The work falls into three divisions: (1) a continuation of the story of David (1 K 1–2); (2) the history of Solomon; (3) the history of the Divided Kingdoms (1 K 12–2 K 17) and of the surviving Southern Kingdom (2 K 18–25).

3. Purpose.—In this connexion it should be noted that the OT has given us the first presentation of a philosophy of history. In the Books of Kings we do not find annals or a mere recital of events as in a chronicle, but the facts of history with their interpretation. Such a work constitutes genuine history. In these two books history is written under a religious theory and with a practical aim to show how God directs the affairs of His people and of other nations and how He achieves His purposes in history. Moreover in these narratives one finds honest self-judgment. The schism of Israel from the God-ordained Davidic kingdom had its origin in Solomon's sin, and the fall of the North was due to the continual defiance of the true religion. On the other hand, the destruction of Jerusalem and the collapse of the Southern Kingdom was a fate deserved by Manasseh's sin. In this we see that the editor of the books belonged to the school of the Deuteronomists.

It has been noted above that a fixed formula is employed to denote the beginning and end of each reign with a synchronism of the kings of the North and of the South. In this connexion it is important to observe the judgment that is passed upon various kings. The standard expression used in condemning a king of the North contains, with a slight variation of phraseology, a reference to 'the way of Jeroboam, the son of Nebat, and the sin which he made Israel to sin.' Cf 1 K 15$^{26, 34}$ 16^{25f} 22^{52}, 2 K 3^{3} 10$^{29-31}$ 13$^{2, 11}$ 14^{24} 15$^{9, 18, 24, 28}$. A judgment with a mitigating comparison, however, may be passed on a king: 2 K 3^{2} 17^{2}. The worship of the golden calves at Bethel and Dan, in the mind of the author, was distinct rebellion against God, whose legitimate sanctuary was at Jerusalem. Judgment is also passed on southern kings for idolatry; in the case of Rehoboam, the kingdom of Judah is condemned (1 K 14$^{22-24}$). The following passages also show that heathenism was the reason for condemning certain Judaean kings: 1 K 15^{3}, 2 K 8$^{18, 27}$ 16$^{2-4}$ 21$^{2-9, 20-22}$ 23$^{32, 37}$ 24^{9}. On the other hand, the praise of some good kings is restrained, because the high places were not removed: Asa (1 K 15$^{11-14}$), Jehoshaphat (1 K 22^{43}), Jehoash (2 K 12^{2f}), Amaziah (2 K 14^{3f}), Azariah or Uzziah (2 K 15^{3f}), and Jotham (2 K 15^{34f}). The high places were regarded as illegitimate places of worship, and accordingly the foregoing good kings did not receive unqualified commendation. David, the ideal monarch, received high praise (1 K 11$^{32-38}$), but a notable reservation is made (1 K 15$^{3-5}$). Two kings in their zeal for righteousness and religious reform are put in the same class with David: Hezekiah (2 K 18$^{3-7}$) and Josiah (2 K 22^{2} 23^{25}). According to the Book of Deuteronomy there was to be only one centre of worship, and the author who writes history with this religious conviction is called the Deuteronomist. The judgment passed on various kings and the evaluation of their influence plainly reflect the point of view of Deuteronomy. If various hands worked on the books or if later additions were made, the writers all belonged to the Deuteronomistic school. The attitude taken toward the high places is distinctly Deuteronomistic, for the demand that these sanctuaries should be abolished was first formulated by Deuteronomy. Josiah's reforms were the direct result of finding this book in the Temple. Hence the strong commendation of this king.

Moreover, it was laid down by Deuteronomy that obedience to the law will be followed by temporal well-being, and that disobedience will be punished by calamity. Now, one object of the writer or compiler of the Books of Kings is to show how this had proved true in the past. He is less thorough in the application of this theory than the author of the Books of Chronicles, but that he has it at heart will be evident on examination. The Northern Kingdom had perished because kings and people had from the first been disobedient to Yahweh, revolting from His legitimate sanctuary at Jerusalem, and provoking His wrath by the bulls of Bethel. In Judah the same lesson is taught. David, who laid the foundations of the kingdom, was of unusual piety, and was favoured by unusual prosperity. Solomon was the builder of the Temple, and to this extent an example of piety; his prosperity was in proportion. But there were shadows in the picture of Solomon which our author was too honest to ignore. It had not been forgotten that this king built altars to foreign gods. History also told that he had suffered by the revolt of Edom and Damascus (1 K 11). It was easy to see in this the punishment for the king's sins. The size of Solomon's harem, which seems to be exaggerated, was accepted by the editor to explain the king's defection from God. Both the defection and the revolt are dated late in the king's reign, at a time when senile weakness would excuse the wise man for yielding to his wives.

The most distinct instance in which the author teaches his lesson is the prayer of Solomon at the dedication of the Temple (1 K 8$^{14-61}$). It was the custom with ancient historians to compose speeches for their heroes which tell us what ought to have been said rather than what was actually said. Our author makes use of this perfectly legitimate literary device. A reading of the prayer shows that it is Deuteronomistic in word and thought throughout. More than one hand has been concerned in it, but the tone is that of the Deuteronomistic school. It confirms what has been said about the purpose of the book. It follows that the historical value of the work must be estimated with due allowance for this main purpose.

4. Date.—The date of the Books of Kings in their present form cannot be earlier than the Babylonian exile. The latest event which it mentions is the release of king Jehoiachin from confinement, which took place in the year 561 B.C.; and as the author speaks of the allowance made to the king all his life (2 K 25^{30}), we conclude that he wrote after his death. It will not be far out of the way, therefore, to say that the work was completed about 550 B.C. Some minor insertions may have been made later. While this is so, there are some things which point to an earlier date for the greater part of the work. The purpose of the author to keep his people from the mistakes of the past is intelligible only at a time when the avoidance of the mistakes was still possible—that is, before the fall of Jerusalem. We find also some phrases which seem to indicate that the final catastrophe had not yet come. The recurrence of the phrase 'to this day' (1 K 8^{8}; cf 9^{21} 12^{19}, 2 K 2^{22} 8^{22} 16^{6}) is one of these indications. On the other hand, the expression 'to this day' (2 K 17$^{34-41}$) appears to have been inserted after the Samaritan schism had been completed. It is now generally held that the substance of the book was compiled about 600 B.C., by a writer

who was anxious to enforce the lesson of Deuteronomic reform while there was yet hope. This first edition may have extended to 2 K 23[28], but this is uncertain. About fifty years later an editor living in the Exile, and who sympathized with the main purpose of the book, probably completed it in substantially its present form.

5. Text.—Against the commonly held assumption of a fixed *textus receptus* there have been preserved a number of Hebrew variants in the text, as can be seen in the lists collated by Kennicott (1776–1780) and de Rossi (1784–1788); in addition to the Kittel text of *Biblia Hebraica*[3] (1929–1937) there may be consulted the editions of Baer (1895) and Ginsburg (1894, 1926). The LXX does not always agree with the Massoretic text; there is a good deal of rearrangement in 1 K 5–7. There are also Greek supplements (1 K 2[35a–35a, 46a–46l]; 1 K 12[24a–24z]). In the Old Greek 1 K 9[15–25] and 1 K 14[1–20] are missing, but they were added in the Hexapla of Origen. In some cases obviously the Old Greek is based on a text which differs from the present Massoretic text. The meaning of the books, however, is not essentially affected. For a discussion of textual matters reference should be made to J. A. Montgomery, *A Critical and Exegetical Commentary on the Books of Kings*, *I.C.C.* (1951).

H. P. S.—H. S. G.

KING'S DALE.—See KING'S VALLEY.

KING'S GARDEN.—Mentioned in 2 K 25[4], Jer 39[4] 52[7], Neh 3[15]. This garden was clearly near the 'gate of the two walls' which was near the Pool of Siloam, and it was in all probability just outside the walls, being irrigated by over-flow water from the Siloam tunnel and pool, just as the land in this situation is treated to-day. Indeed, the garden may have covered much the same area as is now cultivated as irrigated vegetable garden by the women of *Silwân*. See KIDRON [THE BROOK], SILOAM. E. W. G. M.

KING'S POOL.—Neh 2[14], probably identical with the Pool of Siloam. See SILOAM.

KING'S VALLEY.—Gn 14[17] (AV **King's dale**, RV **King's vale**), 2 S 18[18] (AV, RV **King's dale**). See SHAVEH, VALLEY OF.

KIR.—An unidentified place, subject in the 8th and 7th cents. to Assyria. Amos predicted that the Aramaeans would be carried captive to Kir, 1[5]. In 9[7] he declares that Yahweh brought them from Kir. It is said in 2 K 16[9] that Tiglath-pileser carried the people of Damascus captive to Kir, while in Is 22[6] Kir is mentioned in connexion with Elam as furnishing soldiers to the Assyrian army which fought against Israel. Many conjectures as to its identification have been made, but in reality nothing certain is known of its location.

KIRAMA, 1 Es 5[20] (RV).—See RAMAH, **3.**

KIR-HARASETH, 2 K 3[25] (AV).—See KIR-HARESETH.

KIR-HARESETH.—A place of great strength and importance in Moab, 2 K 3[25] (AV **Kir-haraseth**), Is 16[7]; called **Kir-heres** in Is 16[11] (AV **Kir-haresh**), Jer 48[31–36], and **Kir** in Is 15[1]. See KERIOTH, KIR OF MOAB.

KIR-HARESH, Is 16[11] (AV).—See KIR-HARESETH.

KIR-HERES.—See KIR-HARESETH.

KIRIATH, Jos 18[28] (AV **Kirjath**) is the construct state of *Kiriah*, the complement of which, *-jearim*, seems to have fallen out, from its resemblance to the word for 'cities' which follows. Therefore we ought probably to read *Kiriath-jearim* (so RSV), a reading supported by the LXX.

KIRIATHAIM.—1. A town E. of the Jordan, in the disputed territory between Moab and Reuben, Nu 32[37], Jos 13[19] (AV **Kirjathaim**); later it became Moabite, Jer 48[1, 23], Ezr 25[9]. It is mentioned on the Moabite Stone. See MESHA. The *Onomasticon* locates it 10 Roman miles W. of Madeba. It is perhaps *Kh. el-Qureiyât*. See SHAVEH-KIRIATHAIM. **2.** A town in Naphtali, 1 Ch 6[76] (AV **Kirjathaim**); called **Kartan** (q.v.) in Jos 21[32].

KIRIATH-ARBA is used as a name for **Hebron** (q.v.) in Gn 23[2] etc. (AV **Kirjath-arba** [**city of Arba** in Jos 15[13] 21[11]]). Only in Gn 35[27] (AV **city of Arbah**) and Neh 11[25] is *Arba'* written with the article. The city may have been so called as the seat of a confederacy between four men or tribes, or the name may be = *Tetrapolis*, 'the city of four quarters.' The Hebrew text explains it as 'the city of Arba,' 'the greatest man among the Anakim' (Jos 14[15] RV), or 'the father of Anak' (15[13] 21[11]). In the first passage LXX reads 'the city Argob, the metropolis of the Anakim': in the second 'the city Arbok, metropolis,' etc. Perhaps in the last two, therefore, we should read *'ēm*, 'mother,' *i.e.* 'mother-city,' instead of *'abhî*. W. E.

KIRIATH-ARIM.—The form of the name **Kiriath-jearim** (q.v.) found in Ezr 2[25], 1 Es 5[19] (AV **Kiriathiarius.** RV **Kariathiarius**).

KIRIATH-BAAL.—The older name of **Kiriath-jearim** (q.v.), Jos 15[60].

KIRIATH-HUZOTH.—An unidentified spot apparently between Ar-moab and Bamoth-baal, Nu 22[39] (AV **Kirjath-huzoth**); cf vv.[36–41].

KIRIATHIARIUS, 1 Es 5[19] (AV).—See KIRIATH-ARIM.

KIRIATH-JEARIM ('town of woods').—One of the towns of the Gibeonites (Jos 9[17]), occupied by the Danites (Jg 18[12]), on the border between Judah and Benjamin (Jos 15[9] 18[14]), but reckoned in the territory of Judah (Jos 15[60]). From there David brought up the Ark (2 S 6[2], 1 Ch 13[5], 2 Ch 1[4]). Its older names were **Kiriath-baal** (Jos 15[60]) and **Baalah** (Jos 15[9f], 1 Ch 13[6]). It is also mentioned as **Baale-judah** (2 S 6[2]), and through a textual error as **Kiriath-arim** (Ezr 2[25]; cf Neh 7[29]). It was probably, like Kedesh, Gezer, etc., an old Canaanite 'high place.' In Jer 26[20] it is mentioned as the home of Uriah the prophet, the son of Shemaiah. Other residents of the town are also referred to in 1 Ch 2[50, 53] and 1 Es 5[19], the latter naming the place **Kiriath-arim** (AV **Kiriathiarius**, RV **Kariathiarius**).

An early attempt to locate the town suggested *Khirbet 'Erma*, on the S. of the valley of Sorek, where the narrow valley opens into the plain. The supposed similarity of *'ārîm* (Ezr 2[25]) and *'erma*, and the nearness of the site to Zorah and Eshtaol seemed to recommend it. However, its distance from the other Gibeonite towns (Jos 9[17]) raised some doubt. Later scholarship has identified Kiriath-jearim with *Deir el-Azhar*, a hill located W. of *Qaryet el-'Enab* (also called *Abū Ghôsh*), about nine miles from Jerusalem on the Jaffa-Jerusalem road. Although the excavators found chiefly medieval Arabic and Crusader remains at *Abū Ghôsh*, the pottery on the slopes of *Deir el-Azhar* indicated that it was occupied in OT times (cf F. T. Cooke, 'The Site of Kirjath-jearim,' *AASOR*, v (1925), 105–120; R. de Vaux and A. M. Steve, *Fouilles à Qaryet El-'Enab, Abū Gôsh* [1950], 10–14). E. W. G. M.—W. L. R.

KIRIATH-SANNAH, KIRIATH-SEPHER.—See DEBIR, **1.**

KIRIOTH, Am 2[2] (AV).—See KERIOTH.

KIRJATH.—The AV form of names beginning with **Kiriath-** (q.v.). In Jos 18[28] AV has **Kirjath** as a complete name, and RV **Kiriath**, but RSV reads **Kiriath-jearim.**

KIRJATHAIM.—See KIRIATHAIM.

KIRJATH-ARBA.—AV form of **Kiriath-arba** (q.v.).

KIRJATH-HUZOTH, Nu 22[39] (AV).—See KIRIATH HUZOTH.

KIR OF MOAB.—Coupled with **Ar** of Moab, Is 15[1], possibly identical with it. Following the Targum, Kir of Moab has long been identified with the modern *el-Kerak* a place of great importance in the times of the Crusades. Kerak is situated on a lofty spur about 4000 feet above the Dead Sea level. The hills behind rise much higher, so that it is commanded on every side by higher ground, which explains 2 K 3[25–27]. It was surrounded by a wall of great thickness, and there are

remains of ancient rock-hewn cisterns. The gates were to be reached only through long tunnels in the solid rock. C. H. W. J.

KISEUS, Ad. Est 11[2] (RV).—See KISH, 4.

KISH.—**1.** The father of Saul the first king of Israel, 1 S 9[1] 10[21] 14[51], Ac 13[21] (AV **Cis**). His home was at Gilbeah (rendered 'the hill of God' in both AV and RV of 1 S 10[5] [RSV **Gibeath-elohim**] and 'the hill' in 10[10] RSV [**Gibeah**]). **2.** The uncle of the foregoing, 1 Ch 8[30] 9[36]. **3.** The eponym of a family of Merarite Levites, 1 Ch 23[21f] 24[29], 2 Ch 29[12]. **4.** A Benjamite ancestor of Mordecai, Est 2[5], Ad. Est 11[2] (AV **Cisai**, RV **Kiseus**).

KISHI.—A Merarite Levite, ancestor of Ethan, 1 Ch 6[44]; called **Kushaiah** in 15[17]. The latter is probably the correct form.

KISHION.—A town allotted to Issachar, Jos 19[20]; assigned to the Levites, 21[28] (AV **Kishon**); called **Kedesh** in 1 Ch 6[72]. See KEDESH, 2.

KISHON, Jos 21[28] (AV).—See KISHION.

KISHON (Jg 4[7] 5[21], 1 K 18[40], Ps 83[9]).—The ancient name of the stream now called *Nahr el-Mukaṭṭa'*, which drains almost the whole area of the great Plain of Esdraelon. The main channel may be considered as rising near the W. foot of Mount Tabor, and running W. through the centre of the plain until it enters the narrow valley between the S. extension of the Galilaean hills and the E. end of Carmel. After emerging from this it enters the Plain of *'Akkā*, running a little N. of the whole length of Carmel, and enters the sea about a mile E. of Haifa. The total length is about twenty-three miles. In the first part of its course it is in winter a sluggish stream with a bottom of deep mud, and in summer but a chain of small marshes; from just below where the channel is crossed by the Nazareth road near Carmel it usually has a certain amount of water all the year round, and in parts the water, which is brackish, is 10 or 12 feet deep. At its mouth, however, it is almost always fordable. Numerous small watercourses from the Galilaean hills on the N. and more important tributaries from 'Little Hermon,' the Mountains of Gilboa and the whole southern range of Samaria and Carmel on the E. and S., contribute their waters to the main stream. The greater number of these channels, in places 10 or 15 feet deep with precipitous sides, are perfectly dry two-thirds of the year, but during the winter's rains are filled with raging torrents. A number of copious springs arise along the edge of the hills to the S. of the plain. At *Jenîn* there are plentiful fountains, but they are, during the summer, entirely used up in irrigation; at *Ta'annak*, at *Lejjūn*, near *Tell el-Kasīs*, at the E. end of Carmel, and at the *'Ayūn el-Sa'di*, perennial fountains pour their water into the main stream. Those who have seen the stream only in late spring or summer can hardly picture how treacherous and dangerous it may become when the winter's rain fills every channel with a tumultuous flood of chocolate-brown water over a bottom of sticky mud often itself several feet deep. Both animals and baggage have not infrequently been lost at such times. Under such conditions the Kishon, with its steep, uncertain banks, its extremely crooked course, and its treacherous fords, must have been very dangerous to a flying army of horses and chariots (Jg 5[21f]). Of all parts the section of the river from Megiddo (q.v.) to 'Harosheth of the Gentiles' (now *el-Ḥārithiyeh*), where the fiercest part of the battle against Sisera was fought (cf Jg 5[19] and 4[16]), must have been the most dangerous. The other OT incident connected with the river is the slaughter there of the prophets of Baal after Elijah's vindication of Yahweh on the heights of Carmel (1 K 18[40]).

E. W. G. M.

KISON.—This form is found once in AV (Ps 83[9]) for **Kishon** (q.v.).

KISS (Heb. *n^eshîḳāh*, Gr. *philēma*).—Kissing is a mark of affection between parents and children (Gn 27[26f], Ru 1[9], 1 K 19[20] etc.), members of a family, or near connexions (Gn 29[13] 45[15]), and equals in rank (2 S 20[9], Ac 20[37]). Guests are received with a kiss (Lk 7[45]). A kiss from a superior marks condescension (2 S 15[5] 19[39]). These kisses may be on the lips, but are usually on the cheek or neck. The kiss was a token of love (Ca 1[2] 8[1]), of homage and submission (Job 31[27], Ps 2[12]), and was also an act of idolatrous worship (1 K 19[18], Hos 13[2]). The Moslems kiss the black stone at Mecca. Juniors and inferiors kiss the hands of seniors and superiors. A wife kisses the hand or beard of her husband. The hand, garments, even the feet of one appealed to may be kissed. Probably Judas presumed to salute with the kiss of an equal (Mt 26[49] etc.). A kiss on the hand would have been natural. The 'holy kiss,' or 'kiss of love' (1 Co 16[20], 1 P 5[14]), marked the tie that united Christians in a holy brotherhood. W. E.

KITCHEN.—Mentioned only in Ezk 46[24] RSV, where AV has 'places of them that boil,' and RV 'boiling places.'

KITE.—Two words are translated 'kite'; these are *'ayyāh* (AV 'kite' and 'vulture,' RV 'falcon,' RSV 'falcon' and 'kite') and *dayyāh* (or *dā'āh*) (AV 'vulture,' RV 'kite,' RSV 'buzzard' and 'kite'). I. The Hebrew *'ayyāh* and the Arabic *yu'ya'u* have long been identified; but the identity of the Arabic bird is quite uncertain, being variously translated 'buzzard,' 'falcon,' and 'sparrow-hawk.' The words are clearly onomatopoeic and may represent the cry of any of these birds. Its position in the list of unclean birds (Lv 11[14], Dt 14[13]) shows that it is a *raptor* between the vulture and raven in size (thus excluding the sparrow-hawk, which is too small). The buzzard, by reason of its great size naturally follows eagles and vultures, while harriers and some falcons do not fall far short: three kinds of buzzards (the red, large as a small eagle, the common, and the long-legged) are all well known in Palestine, as are several harriers (especially the marsh-harrier). There are also three falcons, of which the lanner is the commonest; it frequents the rocky gorges of the Dead Sea and the Jordan, is a permanent resident and finds no place too desolate. The reference to the *'ayyāh's* keen sight (Job 28[7]) favours the '**falcon**' (so RV, RSV; AV 'vulture'), whose acuity of vision is well known; but the term may include the 'buzzard' and the 'harrier,' which are not distinguished by the Arabs. II. The *dayyāh* or *dā'āh* is also a *raptor*, put between the vulture and the falcon in the list of unclean birds (Lv 11[14] [AV '**vulture**,' RV and RSV '**kite**'], Dt 14[13] [AV and RV '**glede**,' RSV '**buzzard**']; and the Ugaritic *dêy*, which is obviously the same word, denotes a bird mentioned beside the *nṣ* (Hebrew *nēṣ*) 'hawk.' Further *dā'āh* 'swooped,' which is a verb derived from the same root, is commonly applied to the vulture (Dt 28[49], Jer 48[10] 49[22]) and so suggests a bird of similar habits; this may be the 'kite.' The black kite is probably meant; for the red kite is only a visitor to Palestine and, flying at a great height, is not easily seen and therefore is not likely to have had a special name. Both birds will therefore have been designated by the same term. The black kite nests in trees or on ledges of buildings in cities and does not specifically haunt ruins; but it feeds on carrion and will therefore be present as a scavenger feeding on corpses and carcases when Edom is destroyed (Is 34[15] [AV '**vulture**,' RV and RSV '**kite**']). G. R. D.

KITHLISH, Jos 15[40] (AV).—See CHITLISH.

KITRON.—A Canaanite town in the territory of Zebulun, Jg 1[30]. Unless it is to be identified with **Kattath**, it cannot be located.

KITTIM.—This name designates properly the island of Cyprus, and is to be so understood in the geographical list of the descendants of **Javan** (q.v.), that is, the Ionians, in Gn 10[4]. The name is based on that of the settlement on the south-east of the island, called Kition by the Greeks, the modern *Larnaka*. This was the first trading post of the Phoenicians on the Mediterranean, hence it is vaguely used in Ezk 27[6] (AV **Chittim**, RSV **Cyprus**)

as the mother-city of all the maritime settlements westward. The connexion with the Ionians or Greeks is not quite clear, since these were not the first settlers on the island. There were, however, undoubtedly Greek colonists there in the 8th cent. B.C., as we learn from the inscription of the Assyrian Sargon of 720 B.C., pointing to a settlement of Ionian Cyprians in Ashdod. A use of the word, still more vague, is found in Dn 11^{30} (AV **Chittim**), where it refers to the Romans, while in Nu 24^{24} (AV **Chittim**) it is applied apparently to the Macedonians; similarly in 1 Mac 1^{1} (AV **Chettiim**, RV **Chittim**), 8^{5} (AV **Citims**, RV **Chittim**, RSV **Macedonians**). The word also occurs in the Dead Sea Scrolls (q.v.), but whether it is applied there to the Romans or the Greeks (or to both) is a question on which scholars are not agreed. J. F. McC.—P. W.-M.

KNEADING-TROUGH.—In AV and RV in Ex 8^{3} 12^{34} (RSV 'kneading bowls') and in RV and RSV in Dt 28$^{5, 17}$ (AV 'store'). See BREAD, HOUSE, 9.

KNEE, KNEEL.—The knees are often referred to in Scripture as the place where weakness of the body, from whatever cause, readily manifests itself; *e.g.* from terror (Job 4^{4}, Dn 5^{6}), or fasting (Ps 109^{24}). The reference in Dt 28^{35} seems to be to 'joint leprosy,' in which, after the toes and fingers, the joints of the larger limbs are attacked (Driver, *Deut. in loc.*). The laying of children on the knees of father or grandfather seems to have involved recognition of them as legitimate members of the family (Gn 30^{3} 50^{23}). In many passages of Scripture kneeling is spoken of as the attitude assumed in prayer (1 K 8^{54}, Ps 95^{6}, Dn 6^{10}, Ac 20^{36} etc.). To 'bow the knee' is equivalent to 'worship' (Is 45^{23}, Ro 14^{11} etc.; in 1 K 19^{18} 'bow the knee to Baal' may be a reference to a ritual dance with bent knees). To fall upon the knees before a superior is an act at once of reverence and entreaty (2 K 1^{13}, Mt 17^{14}, Lk 5^{8} etc.). W. E.

KNIFE.—Of the various sorts of knives noticed in the OT mention may be made of the flint knives used for the rite of circumcision (Jos 5^{2f}; cf Ex 4^{25})—an instance of conservatism in ritual, to which parallels may be found in all religions. The knives for ordinary purposes under the monarchy were mostly of bronze, of which, as of the earlier flint knives, excavations have furnished many varieties. We also read of sacrificial knives (Gn 22$^{6, 10}$; in Ezr 1^{9} RSV has 'censers' for the word of uncertain meaning rendered 'knives' in AV, RV). See also PENKNIFE, RAZOR. A. R. S. K.

KNOP.—Another form of 'knob,' is used to render two different words in EV. **1.** The knops of the stem arms of the golden candlestick, or rather lampstand, of the Tabernacle, Ex 25^{31} (AV, RV; RSV **capitals**) were the spheroidal ornaments still recognizable in the representation on the Arch of Titus. **2.** Knops also denote certain ornaments, probably egg- or gourd-shaped, carved on the cedar lining of the walls of Solomon's Temple (K 6^{18} AV, RV; RVm, RSV **gourds**), and similar ornaments on the 'brazen sea' (7^{24}; RSV **gourds**). See GOURD. A. R. S. K.

KNOWLEDGE.—I. HUMAN KNOWLEDGE.—**1. In the OT.**—Knowledge, so far as it has a theological use, is moral rather than intellectual. It is assumed that a knowledge of God is possible, but this is the result of a revelation of Himself by God, and not a speculative knowledge achieved by man. So knowledge becomes practically equivalent to religion (Ps 25^{14}, Is 11^{2}), and ignorance to irreligion (1 S 2^{12}, Hos 4^{1} 6^{6}). The Messianic age is to bring knowledge, but this will be taught of God (Is 54^{13}). This knowledge of God is therefore quite consistent with speculative ignorance about the universe (Job 38, 39). Perhaps some expressions in the NT which seem to refer to Gnostic ideas may be explained by this view of knowledge.

2. In the NT.—(*a*) *In the Gospels* knowledge is spoken of in the same sense as in the OT. Christ alone possesses the knowledge of God (Mt 11$^{25-27}$). This knowledge gives a new relation to God, and without it man is still in darkness (Mt 5^{8}, Jn 7^{17} 17^{3}). (*b*) *In St. Paul's Epistles.*—In the earlier Epistles knowledge is spoken of as a gift of the Spirit (1 Co 1^{30} 2, 12^{8}), although God can to a certain extent be known through nature (Ac 14^{7}, Ro 1$^{19, 20}$). 1 Corinthians especially urges the subordination of knowledge to love. In Col 2 and 1 Ti 6^{20} a wrong kind of knowledge is spoken of—perhaps an early form of Gnosticism. True knowledge, however, centres in Christ, who is the mystery of God (Col 2^{2}). In Him all questions find their answer, and this knowledge is not, like Gnosticism, the property of a few, but is intended for all men (Col 1^{28}). In the Pastoral Epistles knowledge is spoken of with reference to a definite body of accepted teaching, which is repeatedly alluded to; it is, however, not merely intellectual but moral (Tit 1^{1}). (*c*) *In the other NT books* knowledge is not prominent, except in 2 Peter, where, however, there is nothing specially characteristic. In Hebrews the ordinary word for 'knowledge' does not occur at all, but the main object of the Epistle is to create and confirm a certain kind of Christian knowledge. Although knowledge in both OT and NT is almost always moral, there is no trace of the Socratic doctrine that virtue is knowledge.

II. DIVINE KNOWLEDGE.—It is not necessary to show that perfect knowledge is ascribed to God throughout the Scriptures. In some OT books—Job and some Psalms—the ignorance of man is emphasized in order to bring God's omniscience into relief (cf also the personification of the Divine Wisdom in the Books of Proverbs and Wisdom).

III. DIVINE AND HUMAN KNOWLEDGE IN CHRIST.—The question has been much debated how Divine and human knowledge could coexist in Christ, and whether in His human nature He was capable of **ignorance.** It is a question that has often been argued on *a priori* grounds, but it should rather be considered with reference to the evidence in the records of His life. The Gospels certainly attribute to Christ an extraordinary and apparently a supernatural knowledge. But even supernatural illumination is not necessarily Divine consciousness, and the Gospel records also seem to attribute to our Lord such limitations of knowledge as may be supposed to make possible a really human experience. **1.** There are direct indications of ordinary limitations. He advanced in wisdom (Lk 2^{52}); He asked for information (Mk 6^{38} 8^{5} 9^{21}, Lk 8^{30}, Jn 11^{34}); He expressed surprise (Mk 6^{38} 8^{5} 9^{21}, Jn 11^{34}). His use of prayer, and especially the prayer in the garden (Mt 26^{39}) and the words upon the cross (Mk 15^{34}), point in the same direction. **2.** With regard to one point our Lord expressly disclaimed Divine knowledge (Mk 13^{32}). **3.** In the Fourth Gospel, while claiming unity with the Father, He speaks of His teaching as derived from the Father under the limitations of a human state (Jn 3^{34} 5^{19f} 8^{28} 12^{49f}). **4.** While speaking with authority, and in a way which precludes the possibility of fallibility in the deliverance of the Divine message, He never enlarged our store of natural knowledge, physical or historical. If it be true that Christ lived under limitations in respect of the use of His Divine omniscience, this is a part of the self-emptying which He undertook for us men and for our salvation (see KENOSIS). J. H. M.

KOA.—A people associated with Pekod and Shoa (Ezk 23^{23}), probably, therefore, a by-form of *Kutū* (also *Gutium*), often mentioned in Assyrian inscriptions in the same company. Their seat lay NE. of Babylonia, in the mountains between the upper *'Adhem* and the *Diyâlā*.

KOHATH, KOHATHITES.—The name *Kohath* is found nowhere except in P and Chronicles. The three main divisions of Levites bore the names of Gershon, Kohath, and Merari, and these are accordingly given as the names of the 'sons' of Levi (Gn 46^{11}, Ex 6^{16}, Nu 3^{17}, 1 Ch 6$^{1, 16}$ 23^{6}). The second division is described either as 'the Kohathites' (Nu 3$^{27, 30}$ 4$^{18, 34, 37}$ 10^{21} 26^{57}, Jos 21$^{4, 11}$, 1 Ch 6$^{33, 54}$ 9^{32}, 2 Ch 20^{19} 29^{12}) or '**the sons of Kohath**' (Ex 6^{18}, Nu 3$^{19, 29}$ 4$^{2, 4, 15}$ 7^{9}, Jos 21$^{5, 20, 26}$, 1 Ch 6$^{2, 18, 22, 61, 66, 70}$ 15^{5} 23^{12}). These were subdivided into four groups, the Amramites, the Izharites,

the Hebronites, and the Uzzielites (Nu 3[27]), each being traced to a son of Kohath (Ex 6[18], Nu 3[19], 1 Ch 6[2, 18] 23[12]). From these families fragments of genealogies remain. Amram is of peculiar importance, because his children were Aaron and Moses (Ex 6[20], 1 Ch 23[13–17]); and Korah, a son of Izhar, was notorious in priestly tradition (Nu 16). See KORAH, DATHAN, ABIRAM.

After the Exile every member of the Levitical or 'priestly' caste traced his descent through one line or another to Levi, and these genealogies were of the utmost importance. All the Levites occupied minor positions in the Second Temple, except those Kohathites who could trace their descent from Aaron. Some Kohathites are named as appointed to humble offices (1 Ch 9[19, 31f], Ezr 2[42], Neh 12[25]). But the tendency of the period to idealize ancient history led the Priestly writers, including the Chronicler, to construct narratives in which the eponymous ancestors of the Levitical families played a prominent part; see 1 Ch 9[19]. (1) During the desert wanderings the Kohathites were on the south side of the Tent (Nu 3[30]), and they carried the screen of the sanctuary and its furniture, after it had been prepared for travel by the greatest of all the descendants of Kohath—Aaron and his sons (3[31] 4[4–15] 10[21]); they were privileged to carry their burdens upon their shoulders (7[9]), instead of in wagons, as the Gershonites and Merarites; they were superintended by Eleazar, Aaron's son (4[16]). (2) After the settlement in Palestine, twenty-three cities were assigned to them (Jos 21[4f, 13–26] = 1 Ch 6[57–61, 67–70]). (3) In David's reign the Chronicler relates that the Temple music was managed partly by Heman, a Kohathite, and his family (1 Ch 6[31–38] 16[41f] 25[1, 4–6, 13, 16, 18, 20, 22f, 25–31]; and see 15[5, 8–10, 17, 19]). David divided the Levites into courses 'according to the sons of Levi' (23[6]; Kohathites vv.[12–20] 24[20–25]); and particular offices of Kohathites are stated in 26[1–9, 12–13, 17–19, 23–31]. (4) Under Jehoshaphat they led the song of praise at the battle of En-gedi (2 Ch 20[19]). (5) Under Hezekiah they took part in the cleansing of the Temple (29[12, 14]). A. H. McN.—N. H. S.

KOHELETH.—See ECCLESIASTES.

KOLA.—An unknown locality mentioned in Jth 15[4] (AV **Cola**, RV **Chola**).

KOLAIAH.—**1.** The father of the false prophet Ahab, Jer 29[21]. **2.** The name of a Benjamite family which settled in Jerusalem after the Captivity, Neh 11[7].

KONA (Jth 4[4]).—An unknown town of Palestine (AV, following a different reading, 'the villages'; RV **Konae**).

KONAE, Jth 4[4] (RV).—See KONA.

KOPH.—Nineteenth letter of Hebrew alphabet, and so used to introduce the nineteenth part of Ps 119, every verse of which begins with this letter.

KORAH, KORAHITES.—**1.** Korah is the name of one of the 'dukes' of Edom, a son of Esau and Oholibamah, Gn 36[5, 14, 18]. **2.** There was also a Korah who was a 'son' of Hebron and was descended from Caleb the Kenizzite, 1 Ch 2[43]. **3.** Korah son of Izhar, a Kohathite Levite, led a revolt against Moses (Nu 16) and perished 'with all his company.' The descendants of this Korah were probably at one time a guild of Temple singers: Ps 42–49 and 84 f, 87 f bear the superscription '. . . of the Sons of Korah.' Possibly these Korahites were of Edomite extraction and were reckoned as Levites in the post-exilic days when all the Temple personnel had to be able to prove their descent from Levi. Later they were down-graded and became 'door-keepers of the thresholds of the tent' (1 Ch 9[19]). See also next article. N. H. S.

KORAH, DATHAN, ABIRAM.—The story of the rebellion of Korah, as contained in Nu 16, 17, is now combined with what was originally an entirely different narrative—that of the resistance of **Dathan** and **Abiram**, who were *laymen*, to the *civil* authority of Moses. Refusing to obey Moses' summons to appear before him, Dathan and Abiram, along with their households, were swallowed up by the earth (Nu 16[1b, 2a, 12–15, 25f, 27b–34] [JE]). The story of Korah proper contains two strata, the work of Priestly writers of different ages. The first of these (Nu 16[1a, 2b–7a, 18–24, 27a, 32b, 35, 41–50] ch. 17) describes a revolt of Korah, at the head of 250 princes of the congregation, against Moses *and Aaron*, in the interests of *the people at large* as against *the tribe of Levi*. The matter is decided by the test of the censers, the rebels being consumed by fire from the Lord. The sequel is found in ch. 17—the blossoming of Aaron's rod. The latest narrative (Nu 16[7b–11, 16f, 36–40]) represents Korah at the head of 250 *Levites*, opposing, in the interests of the tribe of Levi, the monopoly of the *priesthood* claimed by Aaron. These last two narratives are memorials of the struggles that took place, and the various stages that were passed through, before the prerogatives of Levi were admitted by the other tribes, and those of the house of Aaron by the other Levitical families.

KORE.—**1.** The eponym of a Korahite guild of door-keepers, 1 Ch 9[19] 26[1] (also 26[19] AV; RV, RSV 'Korahites'). **2.** Son of Imnah, a Levite in the time of Hezekiah, 2 Ch 31[14].

KOZ (? 'thorn').—**1.** A Judahite, 1 Ch 4[8] (AV **Coz**, RV **Hakkoz**). **2.** In Ezr 2[61], Neh 3[4, 21] 7[63] AV has **Koz**, where RV, RSV have **Hakkoz**. See HAKKOZ, **1.**

KUE.—The ancient name of a country in the eastern part of Cilicia, famed for its export of horses. It is found in Assyrian texts as *Ḳu-e*, and in an 8th-cent. Aramaic inscription of Zakir, king of Hamath. It is mentioned in 1 K 10[28], 2 Ch 1[16] (so RSV; AV 'linen yarn,' RV 'droves'). The spelling differs slightly in the two passages, and that in 1 K 10[28] agrees with the spelling of the Zakir inscription, RSV rendering follows Vulgate (*de Coa*), and has other ancient support.

KUSHAIAH.—See KISHI.

L

LAADAH.—A Judahite, father of Mareshah, 1 Ch 4[21].

LAADAN.—See LADAN, **1, 2.**

LABAN.—**1.** Son of Bethuel (Gn 25[19] 28[5]), and grandson of Nahor (Gn 29[5], where 'son of' is to be understood as 'grandson of'). He was the brother of Rebekah (Gn 24[29]), father of Leah and Rachel (Gn 29). Though they are not named, it is stated that he had sons also (Gn 30[35] 31[1]). He was father-in-law and uncle of Jacob. He appears first in Scripture as engaged in betrothing his sister Rebekah to Isaac (Gn 24[29–60]). We meet him next at Haran entertaining Jacob (Gn 29[13f]), who had escaped from his brother Esau. The details of the transactions between Laban and Jacob for the fourteen years while the nephew served his uncle for his two daughters are described in Gn 29–31. At the end of this period Jacob was not only husband to Leah and Rachel and father of eleven sons, but also the owner of very many flocks and herds. As Laban was reluctant to part with Jacob, the departure took place secretly, while Laban was absent shearing his sheep. Jacob removed his property across the Euphrates,

while Rachel took with her the *t^erāphîm* or household gods of the family. Laban pursued them and overtook them at Mount Gilead (Gn 31[32]).

The Nuzi Tablets have helped in the correct understanding of these stories in Gn 29–31, and the practice of 'adoption' which is mentioned in these tablets, has thrown a great deal of light on the relationship between Laban and Jacob. When Jacob came to Laban, it would appear that Laban had no son, and so he adopted Jacob, and thus he became the rightful heir to the inheritance of Laban his father-in-law. But according to the Nuzi Tablets, should a son be born to the adopter, then the son was to share in the inheritance, and in addition was to have possession of the *t^erāphîm*, the household gods. It is to be assumed that a son was born to Laban, and Jacob now conscious of the new situation and of his own wealth and strength, decided to leave and go back to the land of Canaan. Before the flight we read that his wife Rachel stole the *t^erāphîm*, and obviously her main intention was to put forward her husband's claim to the family inheritance. Now we can understand Laban's concern about the 'gods,' and his indignation that they had been stolen (Gn 31[30]).

Laban's home was Haran, which was in Paddan-aram, a district from which we are told that the patriarchs migrated to the land of Canaan, and these stories are important in that they demonstrate the contact which still existed between the Hebrew patriarchs and their ancestors in the land between the rivers.

2. A place name, apparently one of the stopping places on the route of the Exodus, mentioned in Dt 1[1], but site still unknown. T. A. M.—E. R. R.

LABANA, 1 Es 5[29] (AV, RV).—See LEBANA.

LABOUR.—See WORK.

LACCUNUS, 1 Es 9[31] (AV **Lacunus**) = Ezr 10[30] **Chelal** (q.v.).

LACE.—The English word 'lace' comes from Latin *laqueus*, a 'snare,' and is used in that sense in Old English. It is then employed for any cord or band, and that is its meaning in Ex 28[28, 37] 39[21, 31]. In Sir 6[30] for AV 'lace,' RV has 'riband' and RSV 'cord.'

LACEDAEMONIANS.—In 2 Mac 5[9] we read that Jason fled for refuge to the Lacedaemonians 'because of their kinship.' This claim is further set forth in 1 Mac 12[2ff]; cf 14[16, 20f] 15[23], where we read of **Sparta** (q.v.) and an alliance with the **Spartans.** It was, of course, entirely fanciful, the Hellenes and the Jews belonging respectively to the Indo-European and Semitic branches of the human race. A. E. H.

LACHISH.—A town in the south country of Judah referred to several times in the Tell el-Amarna tablets. In the Biblical records it first appears as joining the coalition headed by the king of Jerusalem against the Gibeonites (Jos 10[3]), and as being in consequence reduced by Joshua (v.[31]) in spite of the assistance given to it by the king of Gezer (v.[33]). It is enumerated among the cities of the tribe of Judah, 15[39]. Rehoboam fortified it, 2 Ch 11[9]. Hither Amaziah, king of Judah, fled from conspirators, and here he was murdered, 2 K 14[19], 2 Ch 25[27]. In the reign of Hezekiah, Sennacherib took Lachish, and while he was quartered there Hezekiah sent messengers to him to make terms (18[13–17]). Sennacherib's Lachish campaign is commemorated by a sculpture from Nineveh, now in the British Museum. Lachish and Azekah were the last cities to stand against the king of Babylon (Jer 34[7]). Lachish was one of the towns settled by the children of Judah after the Exile (Neh 11[30]). Micah's denunciation of Lachish as 'the beginning of sin to the daughter of Zion' (1[13]) doubtless refers to incidents of which we are quite ignorant.

Lachish is modern *Tell ed-Duweir*, which has been excavated and which has yielded important finds, including the Lachish ostraca, which date from shortly before the fall of Jerusalem to Nebuchadrezzar, from the time when only Lachish and Azekah held out, besides Jerusalem. These ostraca bear the text of letters exchanged between the military commanders. R. A. S. M.

LACUNUS, 1 Es 9[31] (AV).—See LACCUNUS.

LADAN.—1. A name occurring in the genealogy of Joshua, 1 Ch 7[26] (AV **Laadan**). **2.** A Gershonite family name, 1 Ch 23[7–9] 26[21] (all AV **Laadan**); elsewhere called **Libni** (q.v.). **3.** 1 Es 5[37] (AV); see DELAIAH, 5.

LADANUM.—See MYRRH.

LADDER.—In ancient times ladders were used chiefly for scaling the walls of a besieged city, as frequently shown on the Egyptian and Assyrian monuments (Wilkinson, *Anc. Egyp.* i, 243; Layard, *Nineveh*, ii, 372). Although this use of them is probably implied in Pr 21[22], scaling-ladders are first expressly mentioned in the time of the Maccabees (1 Mac 5[30]). See FORTIFICATION.

Jacob's 'ladder' (Gn 28[12], Heb. *sullām*, only here) seems to have been rather a 'flight of stone steps, rising up to heaven' (S. R. Driver, *The Book of Genesis*, 1904, 264, cf KB), and *inter alia* may have reference to the physical features of the locality, but cf J. Skinner, *Genesis*, 1910, 376 ff). A. R. S. K.—E. T. R.

LADY.—This renders three different words in AV. **1.** Hebrew *g^ebhereth*, Is 47[5, 7] (so RV; RSV 'mistress'). **2.** Hebrew *śārāh*, literally 'princess,' Jg 5[29] (so RV, RSV), Est 1[18] (so RSV; RV 'princess'). **3.** Greek *kyria*, 2 Jn [1, 5] (so RV, RSV). For 'elect lady' see JOHN [EPISTLES OF], II.

LAEL.—A Gershonite Levite, Nu 3[24].

LAHAD.—A Judahite family name, 1 Ch 4[2].

LAHAI-ROI.—See BEER-LAHAI-ROI.

LAHMAM.—A town of Judah, Jos 15[40] (RVm **Lahmas**); possibly modern *Kh. el-Laḥm*, near *Beit Jibrîn.*

LAHMAS, Jos 15[40] (RVm).—See LAHMAM.

LAHMI.—The brother of Goliath, according to 1 Ch 20[5], but in the parallel 2 S 21[19] his name is replaced by 'the Bethlehemite' as a description of Elhanan (q.v.).

LAIR.—In RSV 'lair' replaces AV 'den,' RV 'dwelling place' in Jer 9[11] 10[22]; AV and RV 'place' in Zeph 2[15]; and AV 'den,' RV 'covert' in Job 37[8].

LAISH.—1. The original name of the town of Dan, Jg 18[7, 14, 27, 29]. The variation **Leshem** occurs in Jos 19[47bis]. See DAN. The father of Palti or Paltiel, to whom Michal, David's wife, was given by Saul, 1 S 25[44], 2 S 3[15]. **3.** Is 10[30] (AV); see LAISHAH.

LAISHAH.—A place connected with Gallim, and mentioned along with other localities in Benjamin and Judah, Is 10[30] (AV **Laish**). It is possibly modern *el-Isāwiyeh*, NE. of Jerusalem.

LAKKUM.—A town of Naphtali, Jos 19[33] (AV **Lakum**). It is possibly *Kh. el-Manṣûrah.*

LAKUM, Jos 19[33] (AV).—See LAKKUM.

LAMA.—See ELOI, ELOI, LAMA SABACHTHANI.

LAMB.—See SHEEP, and next article.

LAMB OF GOD.—The lamb was the most common victim in the Jewish sacrifices, and the most familiar type to a Jew of an offering to God. The title 'the lamb of God' (*i.e.* the lamb given or provided by God; cf Gn 22[8]) is applied by John the Baptist to Jesus in Jn 1[29, 36]. The symbolism intended can be inferred from the symbolic allusions to the lamb in the OT. Thus in Jer 11[19] the prophet compares himself to a lamb, as the type of guilelessness and innocence. Again in Is 53[7] (cf Ac 8[32]) the lamb is used as the type of vicarious suffering, but the sense in John is clearly the *removal* of sin, not the mere 'bearing' of a penalty. It is also possible to see in the phrase a reference to the lamb which formed part of the daily sacrifice in the Temple, cf 1 P 1[19]; and also, perhaps, an allusion to the Paschal lamb which would soon be offered at the approaching Passover (Jn 2[13]), and which was the symbol of God's deliverance—though the sacrificial value of the Paschal

lamb is not entirely certain. In Jn 19[36] the identification with the Paschal lamb seems to be implied.

The lamb is used twenty-seven times in the Apocalypse as the symbol of Christ, and on the first introduction of the term in Rev 5[6] the writer speaks specifically of 'a lamb as though it had been slain.' The term used in the Apocalypse (*arnion*) is not the same as that found in the Gospel (*amnos*), and the connotations are probably different. In Revelation the term is a mystic, apocalyptic designation (or title) of the glorified Christ, enthroned with God and destined to be victorious over all the opposing forces in the universe, both human and demonic. It may be that the term had been specially chosen (in the Province of Asia) to designate the One who 'through weakness was made strong'—since *arnion* was traditionally the symbol of innocence and weakness (cf Lk 10[3]; *Iliad* xxii. 263; Kaibel, *Epigrammata Graeca*, 1038, 38). The meaning of this for the persecuted churches of Asia was obvious—to them, but not to their persecutors. It does not seem to have been a Jewish messianic title. *Arnion* may even have been a cryptogram for Christ's coming victory; see RSV Commentary.

LAME, LAMENESS.—See MEDICINE.

LAMECH.—The name appears in Gn 4[18-24] (J) as the son of Methusael a descendant of Cain; and in Gn 5[25-31] (P) as the son of Methuselah, a descendant of Seth, and the father of Noah. It is this second tradition that is followed in 1 Ch 1[3] and Lk 3[36]. An examination of the genealogies would suggest that they are variants of the same tradition. It is evident that Lamech played a prominent part in popular tradition, although little use is made of that in the Bible. We are given the names of his two wives (Adah and Zillah), three sons (Jabal, Jubal, and Tubalcain) and a daughter (Naamah). The taunt song associated with him is the only fact recorded of him, and may have been originally intended to demonstrate the antiquity of the custom of blood-feud, deriving from the nomadic life. It is possible that the context of the song (Lamech in descent from Cain) may suggest a growing repugnance of the early worshippers of Yahweh to this custom. Jesus appears to be alluding to this passage in Mt 18[22], replacing unlimited revenge with unlimited forgiveness.

It may be noted that the *Genesis Apocryphon* discovered at Qumrân preserves an account of the conception and birth of Noah to Lamech and his wife Bath-enosh.

A. S. H.

LAMENTATIONS, BOOK OF.—1. Names.—The Hebrew name of Lamentations is *'Êkhāh* ('How!'), the first word of the book. It is also called *Ḳînôth* or 'Laments.' The LXX *Threnoi* (*Ieremiou*) and the Vulgate *Threni, id est lamentationes Jeremiae prophetae* have given rise to the English title 'The Lamentations of Jeremiah.'

2. Position in the Canon.—In the Hebrew Bible Lamentations is placed in the third division of the OT canon. Its place is generally in the middle of the five *Megilloth*, between Ruth and Ecclesiastes. The Jews recite the book on the Ninth of Ab—the anniversary of the destruction of Jerusalem. In the Greek OT and the other versions Lamentations is attached to the prophecies of Jeremiah, in accordance with the then current belief that he was the author.

3. Occasion.—The immediate background of the book is the capture and destruction of Jerusalem in 586 B.C. by Nebuchadnezzar. The more distant background is the continued Palestinian 'exile' with its political and spiritual despair. The precise occasion of the compositions was doubtless the annual fast days in recollection of the fall of Jerusalem (cf Jer 41[4-5], Zec 7[1-5]). A liturgical origin best accounts for several features of the poems: the acrostic form, the transfer of individual lament imagery to the nation, and the stark juxtaposition of grief and despair on the one side, and faith and hope on the other. It also accounts for the repetitious character of the successive poems which, composed separately, were eventually compiled as a lectionary.

4. Date.—The five poems belong to the Palestinian 'exile,' 586–538 B.C. They are not the work of a rabbinic versifier after Nehemiah's time. It is unnecessary to explain the greater vividness of the second and fourth poems by attributing them to eye-witnesses while the other three poems are credited to later generations or centuries. The abrupt fusion of literary types, especially in the third poem, is no proof of post-exilic origin. The duress of exile and the liturgical origin of the poems easily account for their literary unevenness.

5. Form.—Of the five poems, the first four are acrostics. The twenty-two strophes of chs. 1, 2, and 4 are introduced by the twenty-two letters of the Hebrew alphabet. Chs. 2–4 place the letter *Pê* before the letter *'Ayin*. The acrostic of ch. 3 is intensified with three lines beginning aaa, bbb, etc. The acrostic form was both an aid to memory and an expression of the totality of grief and hope, 'from "a" to "z."' The last poem is alphabetic in that it contains as many lines as there are letters in the Hebrew alphabet. The dominant metric pattern in Lamentations is 3 : 2 (the so-called *ḳînāh* or lament meter) but there are plentiful exceptions in the form of 2 : 2, 2 : 3, and 3 : 3 patterns. The fifth poem is basically 3 : 3.

The literary typology of the poems is complicated, but thoroughly understandable in terms of the historical crisis. Chs. 1, 2, and 4 are built on funeral song motifs (cf *e.g.* 2 S 1[17-21], Am 5[1-2]). Ch. 3 is technically an individual lament and ch. 5 a collective lament. In point of fact the first four poems are examples of individualistic imagery and vocabulary transferred to national catastrophe. The highly individualized conception of ch. 3 is analogous in some ways to the Suffering Servant of Deutero-Isaiah.

6. Authorship.—No author is named or implied in Lamentations itself. The tradition of Jeremianic authorship which appears in the versions is probably due to a misunderstanding of 2 Ch 35[25] which claims the prophet as the writer of lamentations over Josiah.

The evidence against Jeremianic authorship is cumulative and convincing. He would hardly have identified himself so closely with the superficial confidence of the people in king and foreign alliances (4[16, 19]). Since he remained in Palestine only a short time after Jerusalem's fall, the despair due to a long period of foreign occupation apparent in the fifth poem cannot be attributed to Jeremiah. There are no acrostic poems in the book of Jeremiah. Linguistic and ideological affinities with the book of Jeremiah are best explained as springing from general prophetic religion or as evidence that the poet has modelled the national suffering in part after the experience of Jeremiah, especially in the third poem.

The first four poems are probably the work of a single poet, although the fifth may have been added by the anthologist. The high regard for king and nobility (1[6] 4[19]) suggests that a courtier may have written the poems, possibly someone from the family of Shaphan which had been cordial to the Deuteronomic Reformation and to Jeremiah.

7. Theology.—The nub of the book is the crisis of faith precipitated by the discrepancy between the historical promises of Yahweh and the collapse of political and institutional Yahwism. The bitterly realistic descriptions of death and destruction, especially of the emaciated and dying children, are directed not only to the people but also to God in the hope that he might spare them further suffering.

The 'priestly' elements of intercession and complaint are matched by equally emphatic 'prophetic' elements. The fall of the city is deserved punishment. Yahweh has not deserted His people but remains with them in all their experiences. Syncretism and polytheism are resisted. God's covenant love portends a future return of good fortune. Suffering contains a creative and disciplinary possibility. Lamentations bridges the pre-exilic and post-exilic religious life of Israel and anticipates many of the insights more fully developed in Deutero-Isaiah and Job.

N. K. G.

LAMPS.—1. The archaeological evidence of methods of illumination other than lamps does not survive. Resinous wood may have been used as **torches** (*e.g.* in Gideon's adventures, Jg $7^{16, 20}$), but no material evidence of such use can be expected to survive. In RV, RSV the translation of **lamp** for the Hebrew *nēr* is substituted for the AV **candles**. There is abundant archaeological evidence for the use of lamps both in OT and NT times, and the use of pottery vessels for this purpose can be traced back to the late 4th millennium B.C. The vessels would have held oil, and a wick probably of twisted flax (Is 42^3 RVm, RSV) would have projected from the edge of the vessel.

2. The earliest evidence so far found comes from the Late Chalcolithic or Proto-Urban period, in the last centuries of the 4th millennium. In tombs of this period such as those found at *Tell el-Fâr'āh*, near *Nâblus* (*RB* lvi, 58), and at Jericho (*PEQ*, 1953), shallow round-based bowls seem, from marks of burning on the rims, to have been used as lamps. Similar round-based bowls continued in use for this purpose in the beginning of the Early Bronze Age (*c* 2900–2600 B.C.). In Early Bronze III, their place was taken by flat-based saucers with splaying sides. Neither the round-based bowls nor the flat-based saucers were necessarily made especially for this purpose, for only a proportion of the vessels are smoke-marked.

3. The first vessels especially made for the purpose were introduced in the Intermediate Early Bronze—Middle Bronze period, by the Amorite tribesmen who destroyed the Early Bronze civilization. These lamps are invariably four-spouted; some have a flat base and some a round base. In many tombs of the period, for instance at Jericho, a niche was cut in the wall of the tomb and the lamp placed lighted in it (*PEQ*, 1953, p. 93).

4. With the beginning of the Middle Bronze Age, *c* 1900 B.C., a new type of lamp was introduced, a small round-based bowl with the lip slightly pinched at one point for the wick. The development of the form from now on to the type used in the Iron Age is continuous. During the Middle Bronze Age, the pinching of the spout is usually slight, but with the beginning of the Late Bronze Age in the 16th cent., the wall of the vessel at the spout begins to be increasingly folded over. The base of the vessel is usually round, though some of the Middle Bronze Age lamps may have flat bases. In the Iron Age a flat rim round the area of the vessel develops, and the later Iron Age lamps are very shallow and have a flat or dish base.

5. Throughout the Bronze Age and the Iron Age up to post-exilic times, the lamp is an open vessel, though with the lip increasingly folded in. The known examples are in pottery. There were also no doubt metal lamps, for instance the silver lamps mentioned in Jth 10^{22}, and the gold lamps of the Tabernacle and Temple, but no examples have survived.

6. The increasing fold of the lip would make a transition to a closed body quite simple, but the transition apparently took place not in Palestine but Greece. Closed lamps, often black glazed, with central filling hole and a long projecting nozzle, were introduced in the Hellenistic period. In the Roman period, the Roman variant, with a round body and slightly projecting nozzle, often with a pictorial moulded decoration on the disk, was introduced. From this type a more oval form developed, with a moulded pattern, usually non-pictorial. This type continued throughout the Byzantine and Early Arab period. With the spread of Christianity in the 4th cent., the lamps often bear Christian symbols. K. M. K.

LAMPSACUS, 1 Mac 15^{23} (AVm, RVm).—See SAMPSAMES.

LAMPSTAND.—See HOUSE, **8.**

LANCE, LANCET.—The former is found in AV only, Jer 50^{42} (RV, RSV **spear**). The Hebrew is *Kîdhôn*, which is probably a *scimitar*. It is found in RV and RSV in 1 K 18^{28} for Hebrew *rōmaḥ*, where AV has **lancet.** See ARMOUR AND ARMS, **1.**

LAND CROCODILE.—See CHAMELEON and LIZARD.

LANDMARK.—The word (*gᵉbhûl*) so rendered must not be identified off-hand, as is usually done, with the *kudurru* or boundary-stone of the Babylonians, for the fundamental passage, Dt 19^{14}, 'Thou shalt not remove thy neighbour's landmark, which they of old time have set,' should rather be rendered: 'Thou shalt not remove (or 'set back') thy neighbour's *boundary*, which they . . . have drawn.' Under the old Hebrew system of the cultivation in common of the village land, the boundaries of the plots may have been indicated as at the present day by 'a furrow double in width to the ordinary one,' at each end of which a stone is set up, called the 'boundary-stone' (*PEFSt*, 1894, pp. 195 f). The form of land-grabbing by setting back a neighbour's boundary-line must have been common in OT times, to judge by the frequent references to, and condemnations of, the practice (Dt 19^{14} 27^{17}, Hos 5^{10}, Pr 22^{28} 23^{10}, Job 24^2). A. R. S. K.

LANGUAGE OF CHRIST.—Four languages were in use in Palestine in the first century of our era, Latin, Greek, Hebrew, and Aramaic, and it is at least not impossible that Jesus was acquainted to some degree with all of them; each of them, moreover, has been put forward at one time or another as the language in which Jesus *habitually* spoke and taught. It will suffice merely to mention, as a curiosity of criticism, the theory of the Jesuit Hardouin (1741) that Latin was the most widely used language in Palestine in the days of our Lord and was generally used by Him, and, further, that it was the original language of most of the books of the NT. In reality Latin seems to have been of importance principally to the Roman military establishment (Jos. *BJ*, III. v. 4 [92]); thus it is the language of the inscriptions on the milestones of the Palestinian military roads. Latin doubtless also served the purposes of Roman law, as magistrates were obliged to use it in all their work (Valerius Maximus, II. ii. 2), and it may have served in some measure as the language of commerce, to judge from Latin borrowings in Aramaic.

A few scholars (A. Roberts, 1862; T. K. Abbott, 1891) have maintained that Greek was the language normally used by Jesus. In support of this contention it is urged that Greek was the common language of all the lands formerly comprised in the empires of Alexander and his successors. It is ingeniously suggested that the retention of the Aramaic phrases *talitha cumi* (Mk 5^{41}) and *ephphatha* (Mk 7^{34}) may be best understood if Jesus habitually spoke Greek and in these instances used Aramaic because it was the only language known to the persons addressed. Apart from being the usual medium of commercial intercourse between the Jews and foreigners, however, Greek was the normal speech only of the hellenized upper classes and of the representatives of the Roman government. There were Greek-speaking Jews in Jerusalem who had their own synagogues (Ac $6^{1, 9}$), but these appear to have formed special communities; doubtless most of them were Jews returned from the Diaspora. It is true that Greek was widely understood throughout Palestine, especially, perhaps, in 'Galilee of the Gentiles,' but this understanding was far from universal: we learn from Eusebius that even in the 3rd cent. A.D., in the hellenized town of Scythopolis, it was necessary to render Greek sermons, lessons, and liturgical passages into Aramaic for the benefit of some of the peasants who attended the church (*Mart. Pal.*, Syriac version, ed. Cureton, p. 4). Thus the evidence hardly warrants the conclusion that Jesus habitually spoke Greek, but the number of Greek-speaking persons in Palestine, Jews and Gentiles, and the fact that some intercourse with Roman administrative officials was unavoidable are surely reason enough for supposing that Jesus had a knowledge of the language. In particular, it may be that he used Greek in speaking with the Syrophoenician woman (Mk 7^{26}), the centurion (Mt 8^{5-13}, Lk 7^{1-10}), and Pilate (Mk 15^2). Of Jesus' disciples Matthew surely knew Greek, as he had been in the government's employ.

Recently it has been suggested (by H. Birkeland, 1954) that Hebrew never actually ceased to be a living language of the people of Palestine but persisted in isolated rural areas (much as Gaelic has persisted in the Scottish highlands) and was the language usually spoken by Jesus and, moreover, the language of the sources underlying our written Gospels. The Aramaic phrases referred to above are held to support this view also: they represent exceptional departures made by Jesus in exceptional cases, *i.e.* in speaking to persons who knew only Aramaic, and were left unaltered when the Gospel sources were translated into Greek, much as we might leave French phrases unchanged if they occurred in a German work we were rendering into English. The persistence of isolated pockets of 'popular' Hebrew is not impossible, but there is no real evidence at all for Jesus' use of such a dialect. However, if Jesus was a Galilean Rabbi or had any kind of formal Rabbinical training, it is not unlikely that He did use Hebrew as well as Aramaic, especially in His disputations with the Pharisees and on solemn occasions such as the Last Supper. But if Jesus did use Hebrew it was no hypothetical 'popular' dialect, but the scholastic language of the earliest Midrashim and, later, of the Mishnah. Jesus' use of the Hebrew Scriptures proves that His knowledge of them was extensive, so that it is reasonable to infer that he understood the Classical Hebrew in which they were written and that he was familiar with the Rabbinical idiom in which they were discussed. A number of scholars hold that a Hebrew, but not an Aramaic, source underlies the first two chapters of the third Gospel, but even if this is the case it can hardly have any bearing on the language used by Jesus.

The evidence for the view that Aramaic was the language normally used by our Lord is regarded by the majority of scholars as conclusive. In the first place it is clear that Aramaic had begun to replace Hebrew as the language of Palestine as early as the reign of Hezekiah. In Nehemiah's day the Law required explanation when read at public services (Neh 8^{7f}), and later a full translation into Aramaic was found to be necessary. Aramaic had become the language of the 'people of the land' and was, hence, the mother-tongue of our Lord: this is certified by the presence of Aramaisms in the sayings of Jesus in the Gospels (investigated by J. Wellhausen, C. C. Torrey, C. F. Burney, and most recently by M. Black). More obvious traces of Aramaic are to be seen in the name Cephas (Aram. *kêphā*) given to Simon, and in the occurrence of religious terms like *pascha* (Aram. *pasḥa*, not Heb. *pesaḥ*), *abba*, and *maranu tha* which prove that the earliest church grew up in an Aramaic-speaking community. As for the Aramaic phrases in Mk 5^{41} 7^{34}, their retention is explained by some scholars as due to the desire of the evangelist to reproduce exactly the 'words of power' used by our Lord; but it is simpler to think of Mark's Gospel not as a translation at all, but as an original composition in Greek by a writer accustomed to think in Aramaic. Thus he occasionally gives us, as by inadvertence, the actual words of Jesus, and then adds an explanation in Greek.

On *a priori* grounds it would seem more probable that Jesus spoke a dialect more closely related to that of the Palestinian Pentateuch Targum than to that of the Targums of Onkelos and Jonathan, which has been assimilated to the dialect of the Babylonian Jews in addition to being rather artificially bound to the Hebrew original. There is some evidence to support this presupposition: the Gospel *rabbouni*, *rabbounei* (Mk 10^{51}; Jn 20^{16}) occurs several times in the fragments of the Palestinian Pentateuch Targum which were found in the Cairo Genizah in 1930, and in Fragment D (Gn 44^{18}) it is twice found fully vocalized as *rabbūnî*, as against the Onkelos vocalization *ribbōnî*, *ribbōnanā'*. Quite recently a wealth of new material has come to light which will be of great value for the recovery of the language spoken by our Lord. In 1956 the Codex Neofiti I., in the Vatican Library, was identified as a copy of the complete Jerusalem Targum previously known only in fragments; this manuscript is dated to the 15th cent., but reflects, naturally, much earlier material. In the same year an Aramaic scroll came to light at Qumrân which has been called the *Genesis Apocryphon*, but which is actually part of a very ancient Targum to Genesis, dating probably from the 1st cent. B.C. E. G.

LANGUAGE OF THE NT.—The object of this article is to give a general non-technical account of the Greek in which the NT is written. It should be stated at the outset that the standpoint of scholarship in regard to this subject has materially altered since *c* 1900. We shall therefore briefly state the nature of the change in view, and then describe the NT Greek as we now regard it, without further reference to older theories.

1. The old view.—In every age of NT study, scholars have been struck by the fact that its Greek to a large extent stands alone. It differs immensely from the language of the great classics of the period which was closed some four centuries earlier, and not much less from that of post-classical writers of its own time, even when those writers were Palestinian Jews, as was Josephus. During the 17th cent. the 'Purist' school sought to minimize these differences, holding that deviation from the 'purity' of classic standards was a flaw in the perfection of the inspired Book, which must at all costs be cleared away. But, except for such eccentricities of learning, the efforts of scholars in general were steadily directed towards the establishment of some rationale for this isolation of what Rothe called the 'language of the Holy Ghost.' Two excellent reasons were found for the peculiarities of NT Greek. (1) NT writers were steeped in the language of the Greek OT, a translation which largely followed the Hebrew original with slavish literalness. A special religious phraseology was thus created, which not only contributed a large number of forms for direct quotation, but also supplied models for the general style of religious writing, much as the style of modern sermons or devotional books is modelled upon the English of the Bible. (2) The writers were mostly Jews who used Aramaic (a language closely related to Hebrew) in their daily life. When, therefore, they thought and wrote in Greek, they were prone to translate literally from their native tongue; and 'Aramaisms' thus infected the Greek, side by side with the 'Hebraisms' which came from the LXX. The degree to which either of these classes of Semitism was admitted to affect particular words or grammatical constructions in the Greek NT naturally differed in the judgment of different writers; but even J. H. Thayer, who wrote in *DB* iii. after the new lights had already begun to appear, showed no readiness to abandon the general thesis that the NT Greek lies outside the stream of progress in the development of the Greek language, and must be judged by principles of its own.

2. Newer views.—The credit of initiating a most far-reaching change of view, the full consequences of which are only beginning to be realized, belongs to a brilliant German theologian, Adolf Deissmann. His attention having been accidentally called to a volume of transcripts from the Egyptian papyri recently added to the Berlin Museum, he was immediately struck by their frequent points of contact with the vocabulary of NT Greek. He read through several collections of papyri, and of contemporary Greek inscriptions, and in 1895 and 1897 published the two volumes of his *Bible Studies* (English translation in one volume, 1901). Mainly on the ground of vocabulary, but not without reference to grammar and style, he showed that the isolation of NT Greek could no longer be maintained. Further study of the papyri he used, and of the immense masses of similar documents which have been published since, especially by the explorers of Oxford and Berlin, confirms his thesis and extends it to the whole field of grammar. To put the new views into two statements—(1) The NT is written in *the spoken Greek of daily life*, which can be proved from inscriptions to have differed but little, as found in

nearly every corner of the Roman Empire in the 1st cent. (2) What is peculiar in 'Biblical Greek' lies in the presence of boldly literal translations from Hebrew OT or Aramaic 'sources': even this, however, seldom goes beyond clumsy and unidiomatic, but perfectly possible, Greek, and is generally restricted to the inordinate use of correct locutions which were rare in the ordinary spoken dialect. The Egyptian non-literary papyri of the three centuries before and after Christ, with the inscriptions of Asia Minor, the Aegean islands and Greece during the same period—though these must be used with caution because of the literary element which often invades them—supply us therefore with the long desiderated parallel for the language of the NT, by which we must continually test an exegesis too much dominated hitherto by the thought of classical Greek or Semitic idiom.

3. History and diffusion of the Greek language.—At this point, then, we should give a history of the world-Greek of NT times. A sister-language of Sanskrit, Latin, Slavonic, German, and English, and most other dialects of modern Europe, Greek comes before us earliest in the Homeric poems, the oldest parts of which may go back to the 10th cent. B.C. Small though the country was, the language of Greece was divided into more dialects, and dialects perhaps more widely differing, than English in the reign of Alfred. Few of these dialects gave birth to any literature; and the intellectual primacy of Athens by the end of the classical period (4th cent. B.C.) was so far above dispute that its dialect, the Attic, became for all future time the only permitted model for literary prose. When Attic as a spoken language was dead, it was enforced by rigid grammarians as the only 'correct' speech for educated people. Post-classical prose accordingly, while varying in the extent to which colloquial elements invade the purity of its artificial idiom, is always more or less dominated by the effort to avoid the Greek of daily life; while in the NT, on the contrary, it is only two or three writers who admit to a small extent a style differing from that used in common speech. Meanwhile the history of Greece, with its endless political independence and variation of dialect between neighbouring towns, had entered a new phase. The strong hand of Philip of Macedon brought Hellas under one rule; his son, the great Alexander, carried victorious Hellenism far out into the world beyond. Unification of speech was a natural result, when Greeks from different cities became fellow-soldiers in Alexander's army, or fellow-colonists in his new towns. Within about one generation we suddenly find that a compromise dialect, which was based mainly on Attic, but contained elements from all the old dialects, came to be established as the language of the new Greek world. This 'Common' Greek, or Hellenistic, once brought into being, remained for centuries a remarkably homogeneous and slowly changing speech over the larger part of the Roman Empire. In Rome itself it was so widely spoken and read that St. Paul's letter needed no translating, and a Latin Bible was first demanded far away from Latium. In Palestine and in Lycaonia the Book of *Acts* gives us clear evidence of bilingual conditions. The Jerusalem mob (Ac 21^{40} 22^{2}) expected St. Paul to address them in Greek; that at Lystra (14^{11}) similarly reverted with pleasure to their local patois, but had been following without difficulty addresses delivered in Greek. It was the one period in the history of the Empire when the gospel could be preached throughout the Roman world by the same missionary without interpreter or the need of learning foreign tongues. The conditions of Palestine demand a few more words. It seems fairly clear that Greek was understood and used there much as English is in Wales to-day. Jesus and the Apostles would use Aramaic among themselves, and in addressing the people in Judaea or Galilee, but Greek would often be needed in conversation with strangers. The Procurator would certainly use Greek (rarely Latin) in his official dealings with the Jews. There is no reason to believe that any NT writer who ever lived in Palestine learned Greek only as a foreign language when he went abroad. The degree of culture in grammar and idiom would vary, but the language itself was always entirely at command.

4. NT Greek.—We find, as we might expect, that 'NT Greek' is a general term covering a large range of individual divergence. The author of *Hebrews* writes on a level which we might best characterize by comparing the pulpit style of a cultured extempore preacher in this country—a spoken style, free from artificiality and archaisms, but free from anything really colloquial. The two *Lukan* books show similar culture in their author, who uses some distinctively literary idioms. But St. Luke's faithful reproduction of his various sources makes his work uneven in this respect. *St. Paul* handles Greek with the freedom and mastery of one who probably used it regularly all his life, except during actual residence in Jerusalem. He seems absolutely uninfluenced by literary style, and applies the Greek of common intercourse to his high themes, without stopping a moment to polish a diction the eloquence of which is wholly unstudied. Modern attempts to trace formal rhetoric and laws of rhythm in his writings have had little success. At the other end of the scale, as judged by Greek culture, stands the author of *the Apocalypse*, whose grammar is very incorrect, despite his copious vocabulary and rugged vigour of style. Nearly as unschooled is *St. Mark*, who often gives us very literal translations of the Aramaic in which his story was first wont to be told: there seems some reason to suspect that in the oldest form of his text this occurred more frequently still. The other main Gospel 'source,' the '*Sayings of Jesus*,' shows likewise the traces of processes of translation. Space forbids any attempt to distinguish the position of all the NT writers, but we may note that the papyri supply parallels in degrees of culture to compare with them in turn, except so far as sheer translation comes in.

5. Help derived from Modern Greek, and from reconstructed Aramaic originals.—We must now return to the development-history of Greek to observe that its later stages, even up to the present day, are full of important contributions to our study of the NT. The 'Common' or Hellenistic Greek, described above, is the direct ancestor of the vernacular of modern Greece and Greek-speaking districts elsewhere. We are daily learning more of the immense significance of this despised patois for interpreting the sacred language. Here the student must carefully eliminate the artificial 'Modern Greek' of Athenian newspapers and books, which is untrustworthy for this purpose, just as is the Greek of Plutarch or Josephus. The genuine vernacular—with its dialects, based on inconsiderable local variations in Hellenistic Greek—may be placed by the side of modern folk-ballads and mediaeval popular stories and saint-legends, to take us back to the papyri and inscriptions, as our latest-found tools for NT study. The literature, classical and post-classical, will of course retain the place it has always held, when modern methods have taught us how to check its testimony. And Comparative Philology, with lights on the meaning of cases and tenses and moods, may be added to the equipment with which purely linguistic science may now help forward the interpretation of Scripture. All this is on the side of the student of Greek itself. But the other side of NT language must naturally not be forgotten. Contributions of great value have recently been made to our knowledge of the Aramaic, in which nearly all the sayings of Christ must have been uttered, and in which Papias (as usually understood) shows they were first written down. The possibility of reconstructing to some extent the original of our Greek Gospel sources is drawing nearer, and the co-operation of Greek and Semitic scholars promises marked advances in our knowledge of the very kernel of the NT.

6. Characteristics of NT Greek.—A few concluding words may be given to the general characteristics of the language which had so providentially become the language of the civilized world just at the time when the gospel began its advance. It used to be frequently

contrasted unfavourably with the classical Attic, which is undeniably the most perfect language the world has ever seen, for the clearness, subtlety, and beauty with which it can express thought. In Hellenistic Greek the subtlety, the sense of rhythm, and the literary delicacy have largely disappeared. But the old clearness is only enhanced by a greater simplicity; and the boundless resourcefulness of the language impresses us powerfully when in the NT for the first and (practically) last time the colloquial dialect of the people was enshrined in literature, the authors of which were nearly always unconscious that they were creating literature at all. The presentation of Christianity to the Western world as a system of thought could never have been accomplished in Hebrew, even if that language had attained universal currency. In Greek we are always conscious of a wealth of suggestiveness which no translation can convey, an accuracy and precision of thought which repay the utmost exactness of study. This is in no sense lost even when the simpler grammar of the later language becomes the tool of men who had no inheritance of Greek culture. A comparatively elementary knowledge of the simpler Greek, which can be attained without touching the complex structure of the classical language, will constantly reveal important elements in the writer's meaning that are beyond the reach of our language to convey directly. In our own time at last this language is being studied for its own sake; and even classical scholars are beginning to allow that the renewed youth of Greek, under conditions which make it largely a new language, produced a literature which the philologist, and not merely the theologian, can admire. LANGUAGES OF THE OT AND APOCRYPHA.—See HEBREW, ARAMAIC, TEXT AND VERSIONS OF OT.

LANTERN.—Only Jn 18^3, where some form of 'torch' is more probably intended. The Greek is *phanos*, a word not found elsewhere in Biblical Greek.

LAODICEA, to-day Eski Hissar, was situated in the valley of the Lycus, a tributary of the Maeander in Asia Minor. It was founded by Antiochus II. about the middle of the 3rd cent. B.C. It was planted in the lower Lycus glen, Colossae being situated in the upper. The Lycus glen was the most frequented path of trade from the interior of the country to the west, and the great road passed right through Laodicea. The city was nearly square, and strongly fortified, but dependent for its water supply on an aquedict 6 miles long. It played a comparatively small part in the dissemination of Greek culture. Its prosperity advanced greatly under the Romans, especially after Diocletian. It was an important manufacturing centre for a soft glossy black wool, which was made into garments of various kinds (cf Rev 3^{18}). In connexion with the temple of the Phrygian god Men Karou (13 miles W. of Laodicea), there grew up a celebrated school of medicine. Its most famous medicines were an ointment made from spice nard, which strengthened the ears, and Phrygian powder, obtained by crushing Phrygian stone, which was used for the eyes (Rev 3^{18}). There were many Jewish inhabitants of Laodicea, and the population as a whole was of very mixed race. The church there was not founded by St. Paul, but probably by one of his assistants, perhaps Epaphras (cf Col 4^{13}). Paul wrote the Laodiceans a letter which they were to share with the Colossians, and directed the latter to share his letter to them with the Laodiceans (Col 4^{16}). A Latin writer later tried to supply an Epistle to the Laodiceans. The author of the Apocalypse included Laodicea among the seven churches to which he sent letters (3^{14-22}), and reprimanded it severely. Laodicea was badly destroyed by an earthquake in A.D. 60–61. It was visited by Hadrian A.D. 123–124. A. So.—E. G. K.

LAP.—This renders five different words in RSV. **1.** Hebrew *beghedh*, literally 'garment,' 2 K 4^{39} (so AV, RV). **2.** Hebrew *birkayim*, literally 'knees,' 2 K 4^{20} (AV, RV 'knees'). **3.** Hebrew *ḥêḳ*, literally 'bosom,' Pr 16^{33} (so AV, RV). **4.** Hebrew *ḥōṣen*, literally 'bosom,' Neh 5^{13} (so AV, RV). The closely related word *ḥēṣen*, where the meaning is the same, is rendered 'bosom' in EV in Ps 129^7. **5.** Greek *kolpos*, literally 'bosom,' Lk 6^{38} (AV, RV 'bosom'). In each case, except **2**, the reference is to a fold in the garment.

LAPIDOTH, Jg 4^4 (AV).—See LAPPIDOTH.

LAPPIDOTH ('torches' or 'lightning flashes').—The husband of Deborah the prophetess, Jg 4^4 (AV **Lapidoth**). Some commentarors take the term to be descriptive of the character of Deborah, 'a woman of lightning flashes.' In favour of this they urge the feminine termination *-oth*, but the same termination is found elsewhere in men's names, *e.g. Meremoth.*

T. A. M.

LAPWING.—See HOOPOE.

LASCIVIOUSNESS.—The Greek word so translated by AV in Mk 7^{22} etc., is translated **'wantonness'** in Ro 13^{13}. This is the translation in the versions before AV in nearly all the passages where AV has 'lascivousness.' The idea of the Greek word is shameless conduct of any kind. RSV has 'licentiousness.'

LASEA (Lasaea) in Crete is mentioned by Luke (Ac 27^8), but by no other ancient author. It was the nearest town to Fair Havens, but it was 5 miles away, and this, in addition to the inconvenience of the roadstead, would explain the reluctance of the captain of St. Paul's ship to winter there. The ruins of Lasea were rediscovered in 1856. The site still bears the ancient name. A. E. H.—E. G. K.

LASHA.—A place which marked the SE. boundary of the land of the Canaanites, Gn 10^{19}. Jerome identified it with the hot springs of Callirrhoë, in the *Wâdī Zerqā Mā'în.* Wellhausen would identify it with **Laish, 1** (q.v.), on the N. frontier. There is nothing to support this but the resemblance in the name. Against it is the order in which the names occur. It cannot now be identified. W. E.

LASHARON.—A town taken by Joshua, Jos 12^{18} (RV **Lassharon**). LXX^B reads here 'the king of Aphek in Sharon,' and this is probably right. See APHEK, **1.**

LASSHARON, Jos 12^{18} (RV).—See LASHARON.

LAST SUPPER.—See EUCHARIST.

LAST THINGS.—See ESCHATOLOGY.

LASTHENES.—An officer of high rank, 'kinsman' (1 Mac 11^{31}) and 'father' (v.^{32}) of Demetrius II. He raised a body of Cretan mercenaries, and enabled Demetrius to land in Cilicia, and wrest the throne of Syria from Alexander Balas (Jos. *Ant.* XIII. iv. 3 [86]; cf 1 Mac 10^{67}). When Demetrius was endeavouring to make terms with Jonathan the Maccabaean, he wrote to Lasthenes in favour of the Jews, and forwarded a copy of his letter to the Jewish prince (1 Mac 11^{29-37}).

LATCHET.—Found in AV and RV, but replaced by **thong** in RSV. See DRESS, **6.**

LATIN.—In such provinces as Judaea the Latin language alone had place in official acts and Roman courts. Where Greek was allowed in court pleadings, it was, so to speak, an act of grace on the judge's part, and there can be little doubt that, *e.g.*, the speech of Tertullus in Ac 24 was in Latin. The Latin words used in a Greek form in the NT are mainly administrative, legal, or military (*e.g. census, custodia, praetorium, colonia, libertinus, centurio, legio*), or names of Roman coins (*denarius, quadrans*), but the total number of such Latin words occurring is only about twenty-five. The Gentile names adopted by Jews were generally of Greek form (*e.g. Philip*)—a Latin form like the name of St. Paul was an exception (to be expected perhaps with one so proud of Roman citizenship). Throughout Palestine, while Latin was the language of the administration, Greek was the main language of commerce, and Aramaic the language of common intercourse among Jews. Hence we find all three languages used for the superscription on the cross (Jn 19^{20}). A. E. H.

LATIN VERSIONS.—See TEXT (of OT and NT), GREEK VERSIONS OF OT, **11**, VULGATE.

LATRINE.—See DRAUGHT HOUSE.

LATTER RAIN.—See RAIN.

LATTICE.—See CASEMENT and HOUSE, **7**.

LAUD.—In Ro 15[11] the AV has 'Praise the Lord, all ye Gentiles; and laud him, all ye people.' The Greek verbs being different, two different English verbs are used. But RV and RSV turn 'laud' into 'praise.' In the OT, however, 'laud' and 'praise' are both used in RV in order to distinguish two Hebrew verbs, as in Ps 117[1] (RSV 'extol'; AV has 'praise' twice) 145[4] (so RSV; AV 'praise'), though not quite consistently. In Ps 147[12] the difference between the verbs is ignored in AV, RV, and RSV.

LAUGHTER.—Laughter is used in the Bible in three ways. (1) It is opposed to weeping, as Ec 3[4] 7[3], Job 8[21], Ps 126[2], Lk 6[21]. (2) It expresses incredulity, as Gn 17[17] 18[12]. (3) It signifies derision, as Ps 2[14], Bel[19].

LAVER.—See TABERNACLE, **4**, TEMPLE, **6** (*d*).

LAW (IN OT).—1. That 'the law was given through Moses' (Jn 1[17]) represents a belief held by Jews and taken over by the early Christians. Moses was their first as well as their greatest lawgiver; and in this matter religious tradition is supported by historical probability. The Exodus and subsequent wanderings constitute the formative epoch of Israel's career. This was the period of combination and adjustment between at least some of the tribes looking towards national unity. Such periods necessitate social experiments to develop a strong sense of corporate responsibility based on religious sanctions.

It therefore devolved upon Moses to establish a central authority for the administration of justice, which should be easily accessible and generally recognized throughout the group of tribes. There was only one method by which any such general recognition could be attained. That was by placing the legal and judicial system upon the basis of an appeal to that religion which had already been successful in rousing the people to a sense of unity and an effort towards freedom.

2. We can perhaps see the beginning of these legislative functions in Ex 18[15], where Moses explains how 'the people come to me to inquire of God; when they have a dispute, they come to me and I decide between a man and his neighbour, and I make them know the statutes of God and his decisions (*tôrôth*).' Originally *tôrāh* (the usual word in the OT for 'law') meant oral instruction or direction, as in this passage. This kind of *tôrâh* survived for long in Israel and Judah. It was practical and in conformity with the needs of primitive nations. Cases of exceptional difficulty were brought to the sanctuary, and the decisions rendered there were accepted as emanating from God (Ex 21[6] 22[8] RSV). The cases thus brought 'to God' may be divided into three classes: (1) matters of moral obligation, (2) civil suits, (3) ritual difficulties. We read that Moses found it necessary to delegate some of this judicial work to various trustworthy men, who could handle the ordinary cases, leaving only the most difficult for the leader (Ex 18[13–26]). Afterwards, local leaders, and finally the kings, assumed these judicial functions; see JUDGES and JUSTICE (II.).

Here, then, we can trace the character of Hebrew legislation in its earliest stages. Law (*tôrāh*) means oral direction, gradually crystallizing into consuetudinary law, which finally assumes the form of a written code. Laws, oral or written, could also be taken over from other peoples, such as the Canaanites, with whom there was cultural contact. When all this legal material was classified and reduced to writing (cf Hos 8[12]), *tôrāh* came to signify such a collection; and eventually the same word was used as a comprehensive term for the Pentateuch, in which the most important legal collections were included. In later Jewish usage it came to mean sometimes the entire OT or even all religious literature. Other OT terms for various kinds of laws are: *dᵉbhārîm*, 'words,' as in the Ten Words (or Commandments), also called the Decalogue (Ex 20[1], Dt 5[22]); *miṣwôth*, 'commands' or 'commandments'; *ḥuḳḳîm*, 'statutes'; and *mishpāṭîm*, 'judgments' or 'ordinances' (Dt 5[31]). It is not safe to make fine distinctions between these terms, or to call the first 'sacred' law and the other three 'secular' law. The Hebrews and other ancient peoples did not make this distinction as moderns do. All of life was sacred, and all law required Divine sanction.

Knowledge of the contributions of foreign legislation to the development of Hebrew law has been revolutionized in recent years by archaeological discoveries. Most strikingly helpful of the discovered material are the Laws of Eshnunna (Old Akkadian), the Lipit-Ishtar Code (New Sumerian), the Code of Hammurabi (Old Babylonian or Amorite), the Middle Assyrian Laws, the Hittite Laws, and the Neo-Babylonian Laws (see *ANET* for translations). These codes, in various languages and dialects, all come from Mesopotamia or Asia Minor, and date from the 20th to the 7th cents. B.C. All are phrased in the hypothetical manner ('If a man . . .,' etc.) as are most of the Book of the Covenant (cf Ex 22[1]), and parts of Deuteronomy and Leviticus in the OT (see below). This type of legislation is now sometimes called 'casuistic' or case law, with the implication that it arises from actual court decisions. It seems fairly obvious that practically every established community in the Ancient Near East had this type of legislation, and that the Hebrews, as they developed into a homogeneous community in Palestine, followed the same pattern, probably borrowing certain codes from the Canaanites and modifying these to suit their own needs.

Another set of laws important for our purpose is that from Nuzi or Nuzu of the 15th cent. B.C. Nuzi was in the kingdom of the Mitanni or Hurrians (OT Horites) in Upper Mesopotamia. These laws throw a flood of light on certain patriarchal incidents in Genesis, such as the childless Abram's adoption of Eliezer as an heir, and then having a son of his own (Gn 15[2ff]); and Rachel's theft of the household gods (Gn 31[19, 30–35]), possession of which is now known to have served as a guarantee of inheriting the ancestral property. Here again we see legal aspects of the OT drawn from the larger background.

Let us now examine the main formal divisions of legal material in the OT.

3. The Ten Commandments and Other Decalogues.—The Ten Words or Ten Commandments, also sometimes called the Ethical Decalogue, occur in two recensions, Ex 20 and Dt 5. The former is sometimes called the E-Decalogue because it now stands in a section of the E-Document (see PENTATEUCH); the latter then receives the corresponding name, D-Decalogue. The only real difference is the reason given for the observance of the Sabbath (see SABBATH), the Deuteronomy version making the institution a commemoration of the escape from Egyptian bondage, while the Exodus version considers it an original part of the plan of Creation, seemingly presupposing Gn 1[1]–2[3]. For this reason, some scholars now class the present form of the Exodus version with the P-Document, thus making it later rather than earlier than the Deuteronomy version (see Pfeiffer, *IOT*, 228 ff).

Many scholars of all shades of opinion attribute this Decalogue, or a simplified form thereof, to Moses (see TEN COMMANDMENTS). Certainly the tradition resulting in this remarkable formulation stems from Moses, or at least was transmitted by him. For some of it is much older than Moses: from the earliest stages of human society there were laws against murder, adultery, perjury, theft, and the like, else there would have been no human society. On the other hand, such matters as the ownership of houses and livestock, having slaves or servants, and employing resident aliens belong to the era of settled national life in Palestine. The dates of the origin of the Sabbath and of the prohibition of idols are controversial. Perhaps the surest contribution of Moses is the insistence on complete loyalty to the One God,

Yahweh, and the inclusion of strong ethical demands in His worship. Surely this kind of contribution was highly original and absolutely fundamental to the life of our religious tradition.

In contrast to the casuistic or case-law type of specific legal formulation, this enunciation of general principles, presumably by a religious authority, is sometimes referred to as the 'apodictic' or 'categorical' type. Whereas the form and even much of the content of the casuistic type comes from outside sources, the apodictic type of legal declaration is more specifically Hebraic or Israelite in form ('You shall not . . .,' etc.) as well as in content. Thus there are no really good parallels from other ancient cultures to our Ethical Decalogue. However, the best that can be cited are: the Negative Confession or Protestation of Guiltlessness from the Egyptian 'Book of the Dead,' a long list of the sins and crimes that the deceased has not committed (*ANET*, 34 ff); and the series of Babylonian incantation texts known as *Shurpu* ('ritual burnings'), in which the worshippers seek to ward off evil by purifying themselves from various sins, which are listed, thus giving us a pattern of the moral standards of the worshippers' culture (Price, *Monuments and the OT*, 1958 ed., 174 f; *Archiv f. Orientforsch.*, Beiheft 11).

The use of ten or twelve convenient words or phrases to set forth a set of rules that should be remembered was not confined to our Ethical Decalogue. Another notable example is the so-called Ritual or Cultic Decalogue, usually mentioned as being found in Ex 34^{18-26}, but present also, though in disarranged form, in Ex $22^{29, 30}$ 23^{12-19}. The version in Ex 34 is sometimes called the J-Decalogue, because it is surrounded by J material. However, all these early legal sections should be considered on their own merits apart from the documents. Much of this ceremonial procedure came from the Canaanites. It is significant that the law of the sacrifice of the first-born in Ex 22^{29} requires the giving of the first-born son along with the first-born of the animals, whereas Ex 34^{20} provides for the redemption of the son by substituting an animal, as is done in Gn 22^{13}. Human sacrifice was common among the Canaanites; it sometimes appeared among the Hebrews, but their superior ethical sense caused their legislators and prophets to see the wrong of it.

The other early collection often cited in this connexion is Dt 27^{15-26}, really a dodecalogue consisting of twelve curses, the strongest form of prohibition. Since the arrangement is in the form of a litany, with the people answering 'Amen' after each curse, this collection must have once been a part of a primitive ritualistic service. Yet this is not a 'ritual dodecalogue' in the sense of the preceding paragraph, for the demands are ethical, and of a high order; hence, this litany was probably not borrowed, but developed within the worshipping Israelite community itself.

4. The Book of the Covenant or Covenant Code (roughly Ex 20^{22}–23^{19}) is a fragment of Hebrew case law, with revisions and insertions of other material. As pointed out above, it is that part of OT law most intimately connected with the recently discovered Mesopotamian codes. A good example is 21^{35}, dealing with the division of costs and compensation between the owners of two oxen that engage in combat leading to the death of one animal. The Laws of Eshnunna, a thousand years earlier than the present form of the Hebrew code, contain an exact parallel (No. 53). This example shows how certain laws could pass from country to country and remain constant over a long period of time, while others needed to be changed completely or abolished to suit local conditions.

The most famous parallel corpus is, of course, the Code of Hammurabi, now known for more than half a century (dated at *c* 1700 B.C.). So striking is the similarity that at first statements were made to the effect that the Covenant Code was taken or borrowed from Hammurabi's laws. Now it is understood that both codes stem from a common background of widespread legislation. Though the Hebrew code is later in date, it is in some ways simpler and more primitive in character than that of Hammurabi, since Babylonia was more advanced in material culture at an early date. A specific difference concerns boat traffic on the Euphrates river, which had no parallel in Palestine.

As noted above, other kinds of legal material have been inserted into or joined with the case laws. Already mentioned is the disarranged version of the Ritual Decalogue standing at the end of the Covenant Code. Another addition is the so-called Participial Code, each law beginning with a participle in Hebrew (but 'whoever' in RSV), and requiring the death penalty. There are seven of these ($21^{12, 15ff}$ 22^{19f} 31^{15b}, the last in another context). These laws are of the apodictic type; they are harsh, and were probably brought in by the Israelites from the desert. Finally, there is the *lex talionis* of 21^{23-25}, obviously interpolated somewhat awkwardly and yet necessarily included on principle. Christian love in human relations repudiates the 'eye for an eye' principle (Mt 5^{38}), but the legal need of making the punishment commensurate with the crime continued (cf Dt 19^{21}, Lv 24^{17-21}) and continues to-day. The substitution of a monetary compensation or fine instead of literal retaliation was already used in ancient times (cf Ex 21^{28-36} with Hammurabi 250–252).

5. The Law or Code of Deuteronomy is the legal core of Deuteronomy (chs. 12–26) usually connected by scholars with the law book found during the reform of Josiah about 621 B.C. (2 K 22–23; see DEUTERONOMY and PENTATEUCH). It is obviously a revision of some of the material already discussed here, with additions to bring it into line with 7th-cent. conditions. There is no attempt at logical arrangement, civil, cultic, and ethical laws appearing indiscriminately. Though a product of the Southern Kingdom, this code shows distinct northern influences. Apparently not all the literature of Israel was destroyed when that nation fell, but some was brought to Judah and became a part of the religious tradition there. Josiah's reform followed a period of apostasy, and this code attempts both to eliminate foreign religious practices and to purify the worship of Y". Both priests and prophets seem to have had a hand in the compilation, with perhaps the emphasis on the priestly element. The penalty against apostasy is extraordinarily severe—death, in fact (13^{6-11}). On the other hand, a new humanitarianism blossoms in the code, mitigating the institution of slavery (15^{12-18}, cf Ex 21^{2-11}), making it easier to borrow money (23^{19f}), and lightening military service (20^{1-9}); but the doctrine of the holy war against foreigners is maintained, because of the danger of apostasy (20^{10-18}). The most characteristic law and innovation is that of the centralization of all religious worship in the Temple in Jerusalem to put an end to the foreign and syncretistic practices of the outlying districts (12^{13-27}). Permission to slaughter food animals in the villages without ritual was granted for the first time as a corollary, since formerly slaughter involved sacrifice. Connexion with the central sanctuary had to be maintained by pilgrimages (16^{1-17}).

6. The Holiness Code (Lv 17–26), really a part of the Priestly Code, and imbedded therein, is in a way a parallel to the code of Deuteronomy. Some regard it as a kind of unsuccessful rival to Deuteronomy, others consider it a post-exilic composition drawing on earlier sources. It shows remarkable affinity with the prophetic book of Ezekiel, leading to the conclusion that Ezekiel and H draw from a common source. Both make much of the holiness of God and man that gives H its name.

At the very beginning private and nonritualistic slaughter is forbidden (17^{1-9}), in contrast to D. Apparently H gives the older law that became obsolete after promulgation of D. Some of the other more characteristic rules are: blood is not to be eaten, all forms of incest are forbidden, grain must be left in the corners of the fields for the poor to glean (cf Ru $2^{2f, 8, 17}$), you must love your (Hebrew) neighbour and the resident alien as yourself ($19^{18, 34}$, cf Lk 10^{25-37}), human sacrifice

is forbidden, the sabbatical and jubilee years are to be observed (see SABBATICAL YEAR), slaves are to be taken only from foreign nations, no interest is to be charged fellow-countrymen, priests must be without physical defect and live an especially consecrated life, the practice of magic must be punished by death. Thus it can be seen that H, like D, represents a 'mixed' type of legislative collection.

7. The Priestly Code, as distinct from the Priestly Document as a whole (see PENTATEUCH), comprises the latter part of Exodus (25[1]–31[17] 35–40), all of Leviticus (unless H be excepted), and most of Numbers (1[1]–10[10] 15, 17–19, 28–36). In contrast to some of the mixed material previously considered, particularly D and H, P lays special stress on ceremonial institutions in a most elaborate and detailed manner. The priesthood claims particular attention, hence the name now assigned. Only the descendants of Aaron could be priests (Ex 28[1], Nu 18[7]), and the Levites were to be their servants (Nu 3[5–9]); formerly all Levites were eligible to be priests (Dt 17[9, 18] 18[1ff]). The title 'high priest' (*kōhēn gādhôl*) had not yet come into use (see PRIESTS AND LEVITES), though the office is in effect under such names as 'anointed priest' (Lv 4[3]), 'the priest who is chief among his brethren' (21[10]), or simply 'the priest' (Nu 27[19, 21ff]).

The P-Code is the charter of post-exilic Judaism, completed by *c* 450 B.C. We must not conclude, however, that all the content is late. Much is of high antiquity; it is the elaboration that is characteristic of P. As a matter of fact, P does not profess to supplant all other laws. The author has simply collected the details of ceremonial legislation, and the rubrics of Temple worship for a special purpose, namely to preserve the corporate life of the Jewish community as a holy nation, or rather, church, under God. It was only by emphasizing their special *religious* peculiarities that this struggling group could survive. Ezekiel's ideal city was named 'The Lord is there' (48[35]). P seeks to realize this ideal. All the laws, all the ceremonies, are intended to stamp indelibly upon the imagination of the people that Y" is supreme. Therefore the sense of sin must be deepened, that sin may be removed; the need for purification must be constantly proclaimed, that the corrupting and disintegrating influences of surrounding heathenism may not prevail; the ideal of national holiness must be sacramentally symbolized, and, through the symbol, actually attained. (For parallel legislation from other cultures on the exact details of ritual, see Pritchard, *ANET*[2], 325 ff, 502 f; Gordon, *Ugaritic Manual*, 191 ff, *idem*, *Ugaritic Literature*, 111 ff).

8. It must be plain that such stress on ritual enactments inevitably facilitated the growth of formalism and even hypocrisy. Not always, however, was this the case. We must remember that glad and devout attitude manifested in Ps 1[1ff] 19[7–10] 119, Sir 35[1–11], and elsewhere. To this day the Jews have a phrase, 'joy in the law' (*śimḥath tôrāh*), which expresses very well a relation to the law that is not formalistic or burdensome. We must also remember that Judaism has preserved through the OT another tradition, the prophetic, of which a few words should be said in conclusion.

The *tôrāh* of the prophets had a moral, rather than a ceremonial, emphasis. The priests, by their official duties much engaged in ritual actions, nevertheless had opportunities for giving the worshippers true direction (*tôrāh*) on the principles underlying their religious observances. It is for their neglect of such opportunities, and not, as is sometimes maintained, on account of any inherent antagonism between priestly and prophetic ideals, that the prophets so frequently rebuke the priests (see PROPHECY). The priests claimed Divine sanction for their worship, and tradition ascribed the beginning of all Hebrew priestly institutions to Moses (or Aaron). This the prophets do not deny; but they do deny that the distinctive feature of the Mosaic tradition lay in anything but its moral excellence. In this connexion the words of Jeremiah cannot be quoted too often: 'For in the day that I brought them out of the land of Egypt, I did not speak to your fathers or command them concerning burnt offerings and sacrifices. But this command I gave them, "Obey my voice . . . and walk in all the way that I command you"' (Jer 7[22ff]). The correct interpretation of Am 5[21–26] corroborates Jeremiah's position. It is probably unwarranted to say that the prophets condemned the sacrificial system as such, or denied its worth and Divine sanction. On the other hand, 'the law of the Lord' meant to the prophets something different from the punctilious observance of traditional ceremonies. What is more, they appeal without fear of contradiction to the Mosaic tradition as confirming their conviction that it is in the sphere of morality, rather than in the correct organizing of ritual, that the essence of Y"'s law is to be found. With this antithesis in mind, we are ready to consider the NT phase of the subject. (For post-Biblical Jewish law, see TALMUD.)

E. A. E.—W. F. S.

LAW (IN NT).—This subject will be treated as follows: (1) the relation of Jesus Christ to the OT Law; (2) the doctrine of law in St. Paul's Epistles; (3) the complementary teaching of Hebrews; (4) the attitude of St. James representing primitive Jewish Christianity.

1. Our Lord stated His position in the saying of Mt 5[17]: 'I did not come to destroy the law or the prophets, but to fulfil.' The expression covers the whole contents of Divine Scripture except the Hagiographa (sometimes for brevity, spoken of simply as 'the law'; see Jn 10[34] 12[34] 15[25]), which He does not mean to invalidate in the least (Mt 5[18]), as the novelty of His teaching led some to suppose (see 7[28ff]), but will vindicate and complete. But His 'fulfilment' was that of the Master, who knows the inner mind and real intent of the Scripture He expounds. It was not the fulfilment of one who rehearses a prescribed lesson or tracks out a path marked for him by predecessors, but the crowning of an edifice already founded, the carrying forward to their issue of the lines projected in Israelite revelation, the fulfilment of the blade and ear in 'the full corn.' Jesus penetrated the shell to reach the kernel of OT representations; and He regarded *Himself*—His Person, sacrifice, salvation, Kingdom—as the focus of manifold previous revelations (see Lk 4[17–21] 16[16] 24[27], Jn 1[17] 6[45]). The warning of Mt 5[17–20] was aimed at the Jewish legalists, who dissolved the authority of the law, while jealously guarding its letter, by casuistical comments and smothering **traditions,** who put light and grave on a like footing, and blunted the sharpness of God's commands in favour of man's corrupt inclinations. The Corban formula, exposed in Mk 7[7–13], was a notorious instance of the Rabbinical quibbling that our Lord denounced. It is a severer not a laxer ethics that Jesus introduces, a searching in place of a superficial discipline; 'Your righteousness,' He says, 'must *exceed* that of the scribes and Pharisees.'

Our Lord's fulfilment of 'the law'—*i.e.* in the stricter sense, the body of Mosaic statutes regulating Israelite life and worship—included (*a*) *the personal and free submission* to it, due to His birth and circumcision as a son of Israel (Gal 4[4]; cf Mt 3[15] 8[4] 15[24] 17[27], Lk 2[21ff]).

His fulfilment included (*b*) *the development of its unrecognized or partially disclosed principles.* Thus Jesus asserted, in accordance with views already advanced among the scribes, that 'the whole law and the prophets hang on the two commandments' of love to God and to our neighbour (Mt 22[34–40], Lk 10[25–37])—the parable of the Good Samaritan gives to the second command an unprecedented scope. His distinction between 'the weightier matters' of 'justice, mercy, fidelity,' and the lighter of tithes and washings, was calculated to revolutionize current Judaism.

(*c*) A large part of the Sermon on the Mount (Mt 5[21–48]) is devoted to *clearing the law from erroneous glosses and false applications*: on each point Jesus sets His 'I say to you' against what 'was said to the ancients'—mere antiquity goes for nothing; nor does He here distinguish between the text of the written law

and the traditional modifications. With each correction the law in His hands grows more stringent; its observance is made a matter of inner disposition, of intrinsic loyalty, not of formal conduct; the criterion applied to all law-keeping is that it shall 'proceed out of the heart.'

(*d*) Further, our Lord's fulfilment of the law necessitated the *abrogation of temporary and defective statutes.* In such instances the letter of the old precept stood only till it should be translated into a worthier form and raised to a higher potency (Mt 5[18]), by the sweeping away of limiting exceptions (as with the compromise in the matter of wedlock allowed to 'the hardness of heart' of Israelites, Mt 19[3-9]), or by the translation of the symbolic into the spiritual, as when cleansing of hands and vessels is displaced by inner purification (Mk 7[14-23], Lk 11[37-41]; cf Col 2[16f], He 9[9f]). Our Lord's reformation of the marriage law is also a case for (*b*) above: He rectifies the law by the aid of the law; in man's creation He finds a principle which nullifies the provisions that facilitated divorce. He also states a difference between a commandment made by God Himself and one given by Moses, the first being far superior. The abolition of the distinction of 'foods' (Mk 7[19]), making a rift in Jewish daily habits and in the whole Levitical scheme of life, is the one instance in which Jesus laid down what seemed to be a new principle of ethics. The maxim that 'what enters into the man from without cannot defile,' but only 'the things that issue out of the man,' was of far-reaching application, and supplied afterwards the charter of Gentile Christianity. Its underlying principle was, however, implicit in OT teaching, and belonged to the essence of the doctrine of Jesus. He could not consistently vindicate heart-religion without combating Judaism in the matter of its ablutions and food-regulations and Sabbath-keeping.

(*e*) Over the last question Jesus came into the severest conflict with Jewish orthodoxy; and in this struggle He revealed the consciousness, latent throughout His dealings with OT legislation, of being the sovereign, and not a subject like others, in this realm. Our Lord 'fulfilled the law' by *sealing it with His own final authority.* His 'I say to you,' spoken in a tone never assumed by Moses or the prophets, implied so much and was so understood by His Apostles (1 Co 7[10], Gal 6[2], 1 Jn 2[3f] etc.). Christ arrogates the rôle of 'a son over his house,' whereas Moses was 'a servant in the house' (He 3[5f]). Assuming to be 'greater than Solomon,' 'than Abraham,' 'than the temple' (Mt 12[6, 42], Jn 8[53]), He acted as one greater than Moses! The Sabbath-law was the chosen battle-ground between Him and the established masters in Israel (Mk 2[23-28] 3[2ff], Lk 13[10-17], Jn 5[9-16]). In the public Sabbath assemblies Jesus was oftenest confronted with cases of disease and demoniacal possession; He must do His work as God's 'sent' physician. The Sabbath-rules were clear and familiar; His infraction of them in acts of healing was flagrant, repeated, defiant; popular reverence for the day made accusations on this count particularly dangerous. Men were placed in a dilemma: the Sabbath-breaker is *ipso facto* 'a sinner'; on the other hand, 'how can a *sinner* do such signs?' (Jn 9 [16, 24ff]). Jesus argues the matter on legal grounds, showing from recognized practice that the 4th Commandment must be construed with common sense, and that 'it is lawful to do good on the Sabbath day' and to work in the service of God (Mt 12[5, 11f]). He goes behind those examples to the governing principle (see (*b*) above), that 'the Sabbath was made for man, and not man for the Sabbath' (Mk 2[27f]): the institution is designed for human benefit, and its usages should be determined by its object. But He is not content with saying this: the war against Him was driven on the Sabbath-question *à outrance*; Jesus draws the sword of His reserved authority. He claims, as sovereign in human affairs, to decide what is right in the matter—'The Son of Man is lord of the Sabbath'; more than this, He professes to have wrought His Sabbath works as God the Father does, to whom all days are alike in His beneficence, and through the insight of a Son watching the Father at His labour (Jn 5[17-20])—a pretension to Jewish ears, of blasphemous arrogance: 'He makes himself equal with God!' On this ground Jesus was condemned by the Sanhedrin (cf Jn 19[7]), because He set Himself above the Sabbath, on the strength of being one with God. Thus the law of Moses put Jesus Christ to death; it was too small to hold Him; its administrators thought themselves bound to inflict the capital sentence on One who was understood to have said, 'I am the Son of the Blessed' (Mk 14[61ff]).

(*f*) At the same time, Caiaphas, the official head of the system, gave another explanation, far deeper than he guessed, of the execution: 'That Jesus should die for the nation, and not for the nation only' (Jn 11[49ff]). Virtually, He was offering Himself for 'the lamb' of the Paschal Feast, ready to be slain in sacrifice, that He might 'take away the sin of the world.' This mysterious relation of the death of Jesus to Divine law He had hinted at here and there (Mt 20[28] 26[28], Lk 22[37], Jn 3[14] 6[51] 12[24]); its exposition was reserved for His Apostles speaking in the light of this grandest of all fulfilments. Jesus *made good the implicit promise of the sacrificial institutions of Israel.*

2. The word 'law' occurs one hundred and eighteen times in St. Paul's Epistles—one hundred and three times in Romans and Galatians alone. It is manifest how absorbing an interest the subject had for this Apostle, and where that interest mainly lay. Gal 2[19] puts us at the centre of St. Paul's position: 'I through law died to law, that I might live to God.' From legalism, as from a house of bondage, he had escaped into the freedom of the sons of God. Sometimes the Apostle, like Stephen (Ac 7[53]), and as in the Epistle to Hebrews (2[2]), emphasizes the fact that the Law was given by God not directly but through angels—which shows its inferiority to the Christian revelation. (*a*) Paul 'died to the law,' as he had understood and served it when a Pharisee, regarding obedience to its precepts as the sole ground of acceptance with God. He had sought there 'a righteousness of' his 'own, based on the law' (Ph 3[9]), to be gained by 'works,' by which he strove to merit salvation as a 'debt' due from God for service rendered—a righteousness such as its possessor could 'boast of' as 'his own' (Ro 4[1-5] 9[31-10:3]). Pursuing this path, 'Israel' had failed to win 'the righteousness of God,' such as is valid 'before God'; the method was impracticable—justification on the terms of 'the law of Moses' is unattainable (Ac 13[38f], Ro 8[3]). Instead of destroying sin, the law arouses it to new vigour, 'multiplying' where it aimed at suppressing 'the trespass' (Ro 5[20] 7[7-13], 1 Co 15[56]). Not the 'law' in itself, but the 'carnal' sin-bound nature of the man, is to blame for this; arrayed against 'the law of God,' to which 'reason' bows, is 'another law' successfully oppugning it, that 'of sin' which occupies 'my members' (Ro 7[12-23]), and which is, in effect, a 'law of death' (8[2]).

(*b*) But St. Paul's Judaistic experience had a positive as well as a negative result: if he 'died to law,' it was '*through* law'; 'the law has proved our *paedagogus* for [leading us to] Christ' (Gal 3[24]). Law awakened conscience and disciplined the moral faculties; the Jewish people were like 'an heir' placed 'under guardians and stewards until the appointed time,' and trained in bond-service with a view to their 'adoption' (Gal 4[1-5]). Even the aggravations of sin caused by the law had their benefit, as they brought the disease to a head and reduced the patient to a state in which he was ready to accept the proffered remedy (Ro 7[24]). 'The Scripture' had in this way 'shut up all things under sin,' blocking every door of escape and blighting every hope of a self-earned righteousness (Gal 3[21f]), that the sinner might accept unconditionally the 'righteousness which is through faith in Christ' (Ph 3[9]).

(*c*) Contact with Gentile life had widened St. Paul's conception of moral law; it was touched by the influences of Greek philosophy and Roman government. He

discerned a law established ' by nature,' and ' inscribed in the hearts ' of men ignorant of the Mosaic Code and counting with Jews as ' lawless.' This Divine *jus* (and *fas*) *gentium* served, in a less distinct but very real sense, the purpose of the written law in Israel ; it impressed on the heathen moral responsibility and the consciousness of sin (Ro 2^{6-16}). The rule of right and wrong Paul regards as *a universal human institute*, operating so as to ' bring the whole world under judgment before God ' (Ro 3^{9-19}) ; its action is manifested by the universal incidence of death : in this sense, and in the light of 2^{12-15}, should be read the obscure parenthesis of Ro 5^{13f}, as stating that ' law ' is concomitant with ' sin ' ; the existence of sin, followed by death, in the generations between Adam and Moses proves that law was there all along, whether in a less or a more explicit form ; the connexion of sin and death in humanity is, in fact, a fundamental legal principle (Ro 8^{2}).

(*d*) Having ' died to law ' by renouncing the futile salvation it appeared to offer, the Apostle had learned to live to it again in a better way and under a nobler form, since he had begun to ' live to God ' in Christ. St. Paul is at the farthest remove from Antinomianism ; the charge made against him on this score was wholly mistaken. While no longer ' *under* law,' he is ' not lawless toward God, but *in law* toward Christ ' (Ro 6^{14f}, 1 Co 9^{21}). The old *ego*, ' the flesh with its passions and lusts,' has been ' crucified with Christ ' (Gal 2^{20} 5^{16-24}). God's law ceases to press on him as an external power counteracted by ' the law of sin in the members ' ; the latter has been expelled by ' the Spirit of God's Son,' which ' forms Christ ' in him ; the new, Christian man is ' in law ' as he is ' in Christ '—he sees the law now from the inside, in its unity and charm, and it constrains him with the inward force of ' the law of the Spirit of life in Christ Jesus ' possessing his nature. He ' serves ' indeed, but it is ' in the new ' life wrought ' of the Spirit, and not in the old ' servitude to ' the letter ' (Ro 7^{6}, 2 Co 3^{6}). Constituting now ' one new man,' believers of every race and rank ' through love serve one another,' as the hand serves the eye or the head the feet ; for them ' the whole law is fulfilled in one word, Thou shalt love thy neighbour as thyself ' (Ro 13^{8-10}, 1 Co $12^{13, 25f}$, Gal 5^{13f}, Eph 2^{15-18}). The Christian ' fulfils *the law of Christ*,' as the limb the law of the head. Thus St. Paul's doctrine of the Law joins hands with that of Jesus (see 1 above). Thus also, in his system of thought, the law of God revealed in the OT, when received from Christ revised and spiritualized, and planted by ' faith ' along with Him in the believer's heart (cf Jer 31^{31-34}), becomes for the first time really valid and effective : ' Do we nullify law through faith? God forbid ; nay,' he cries, ' we establish law ! ' (Ro 3^{31}).

(*e*) Neither Jesus nor Paul makes a formal distinction between the moral and the ceremonial law (see, however, Ro 9^{4}). St. Paul's teaching bears mainly on the former : as a Pharisee he had no ritualistic bent, and his ambition was for ethical perfection. ' Circumcision ' has lost in his eyes all religious value, and remains a mere national custom, now that it ceases to be the covenant-sign and is replaced in this sense by baptism (1 Co 7^{18ff}, Gal 6^{15}, Col 2^{11ff}). It becomes a snare to Gentiles when imposed on them as necessary to salvation, or even to advancement in the favour of God ; for it binds them ' to keep the whole law ' of Moses, and leads into the fatal path of ' justification by law ' (Gal 2^{2-5} 3^{2ff} 5^{3-6}). St. Paul's contention with the legalists of Jerusalem on this question was a life and death struggle, touching the very truth of the gospel ' and ' the freedom ' of the Church (Ac 15^{1-11}, Gal 2^{1-10} 5^{1}). The same interests were threatened, more insidiously, by the subsequent attempt, countenanced by Peter and Barnabas at Antioch, to separate Jewish from Gentile Christians at table through the reassertion of the Mosaic distinction of ' foods ' which had been expressly discarded by Jesus. The assumption of a privileged legal status within the Church meant the surrender of the whole principle of salvation by faith and of Christian saintship (Gal 2^{11-21}, Ro 14^{17f}, 1 Co 8^{8} ; cf Mk 7^{14-23}). In some Churches Paul had to deal with the inculcation of Jewish ritual from another point of view. At Colossae the dietary rules and sacred seasons of Mosaism were imposed on grounds of ascetic discipline, and of reverence towards angelic (*scil.* astral) powers ; he pronounces them valueless in the former respect, and in the latter treasonous toward Christ, who supplies ' the body ' of which those prescriptions were but a ' shadow ' (Col 2^{16-23}).

3. Col 2^{17} forms a link between the doctrine of St. Paul on the Law and *the complementary teaching of the writer of Hebrews*—a Jew of very different temperament and antecedents from Saul of Tarsus. This author emphasizes the ceremonial, as Paul the moral, factors of the OT ; the Temple, not the synagogue, was for him the centre of Judaism. ' The first covenant,' he says, ' had ordinances of divine service,' providing for and guarding man's approach to God in worship (He 9^{1} etc.) ; for St. Paul, it consisted chiefly of ' commandments expressed in ordinances ' (Eph 2^{15}), which prescribe the path of righteousness in daily life. ' The law ' means for this great Christian thinker the institutions of the Israelite priesthood, sanctuary, sacrifices—all consummated in Christ and His ' one offering,' by which ' he has perfected for ever them that are sanctified ' (He 9^{1}–10^{14}). In his view, the law is superseded as the imperfect, provisional and ineffective, by the perfect, permanent and satisfying, as the shadowy outline by the full image of things Divine (7^{18f} 8^{1-4} 10^{1-4}) ; ' the sanctuary of this world ' gives place to ' heaven itself,' revealed as the temple where the ' great high priest '—Divine-human in person, sinless in nature, perfected in experience, and immeasurably superior to the Aaronic order (4^{14ff} 7^{26ff})—' appears before the face of God for us,' ' having entered through the virtue of his own blood ' as our ' surety ' and ' the mediator of ' our ' covenant,' who has won for mankind ' an eternal redemption ' (2^{9} 7^{22} 8^{6} 9^{24-28}). Jesus thus ' inaugurated a new and living way into the holy place ' (in contrast with the old and dead way of the law) ; as experience proves, He has ' cleansed the conscience from dead works to serve the living God,' while the law with its repeated animal sacrifices served to remind men of their sins rather than to remove them (7^{25} 9^{14} 10^{1-4}). Equally with St. Paul, the *auctor ad Hebraeos* regards ' remission of sins ' as the initial blessing of the Christian state, which had been unattainable ' under law,' and ' the blood of Christ ' as the means of procuring this immense boon. In Paul's interpretation, this offering ' justifies ' the unrighteous ' before God ' and restores them to the forfeited status of sonship ; in the interpretation of Hebrews, it ' cleanses ' worshippers and brings them ' nigh to God ' within His sanctuary ; on either view, the sacrifice of Calvary removes the barriers set up, by man's sin ' under the law,' between humanity and God.

4. For St. James also the OT law was transformed. He conceives the change in a less radical fashion than Paul or the writer of Hebrews ; James stands sturdily on the platform of the Sermon on the Mount. Re-cast by ' the Lord of glory ' and charged with ' the wisdom that comes from above,' the law is new and glorified in his eyes ; like Paul, he knows it as ' the law of Christ.' All the disciples of Jesus were one in the place they gave to that which James calls ' the sovereign law, Thou shalt love thy neighbour as thyself ' (2^{8-13} ; cf 1 Co 13) ; deeds of pure brotherly love prove ' faith ' alive and genuine ; they make it ' perfect,' and guarantee the believer's ' justification ' (ch. 2). When he describes this law as ' a perfect law, the law of liberty,' James' idea is substantially that of Paul in 1 Co 9^{21} and Ro $8^{2, 4}$, viz. that the law of God is no yoke compelling the Christian man from without, but a life actuating him from within ; the believer ' bends over it ' in contemplation, till he grows one with it (1^{24} ; cf 2 Co 3^{18}). ' The tongue ' is the index of the heart, and St. James regards its control as a sure sign of perfection in law-keeping (3^{1-12}). James treats of the law, not, like Paul, as it affects the sinner's standing before God—nor, like the author of Hebrews, as it regulates his approach in

worship—but as it governs the walk before God of the professed believer. His Epistle is, in effect, a comment on the last clause of Ro 8^4, 'that the righteousness of the law may be fulfilled in us.'

5. The word 'law' is entirely wanting in the Epistles of St. Peter and of St. John. 1 P $1^{18, 19}$ 2^{24} 3^{18} manifest the influence of Paul's doctrine of salvation on the writer; while 1 Jn $1^{7, 9}$ indicates a leaning to the mode of representation characteristic of Hebrews, and 1 Jn 2^2 and 4^{10} virtually sustain the doctrine of St. Paul on law, sin, and sacrifice.

6. On Roman law in NT see ROMAN PUBLIC LAW.

G. G. F.—J. He.

LAWGIVER.—The word is found six times in the AV of the OT (Gn 49^{10}, Nu 21^{18}, Dt 33^{21}, Ps 60^7 108^8, Is 33^{22}). The Hebrew *mᵉḥōḳēḳ*, which it translates, is from a root meaning to 'cut' or 'engrave,' and hence to 'enact' a law, afterwards to be engraved on the public archives. The Hebrew word appears to have two meanings: (1) 'ruler'; so in Dt 33^{21}, where RSV has 'commander' (RV 'lawgiver'; RVm 'ruler'), and Is 33^{22} (RV 'lawgiver'; RSV 'ruler'), where the parallelism shows the meaning. (2) 'Ruler's staff'; so in Gn 49^{10}, where the word is parallel to 'sceptre' (RV, RSV 'ruler's staff'), and in Ps 60^7 108^8 (RV, RSV 'sceptre'). In Nu 21^{18}, where AV has 'by the direction of the lawgiver,' RV and RSV have 'with the sceptre.'

In the NT the word 'lawgiver' (Gr. *nomothetēs*) is found once only (Ja 4^{12}, AV, RV, and RSV); there it is applied to God as the 'one lawgiver and judge,' who is regarded as the Supreme Source of all law. Other passages (He 7^{11}, Ro 9^4) where kindred Greek words are used, have a reference to the law of Moses, or, to be more exact, the law of Israel. T. A. M.

LAWYER.—This term in Scripture does not belong so much to the legal as to the religious sphere. It occurs three times in the NT (RSV), Mt 22^{35}, Lk 10^{25}, Tit 3^{13}; only the last refers, perhaps, to a secular jurisconsult. In Israel, the 'lawyers' busied themselves with the study and exposition of the Written and the Oral Law of Israel, and were practically identical with the scribes (q.v.).

LAYING ON OF HANDS.—This ceremony, of frequent occurrence in both OT and NT, is a piece of natural symbolism with the central idea that through physical contact the person performing it identifies himself with the other in the presence of God. In OT this is done with a view to the transference (*a*) of a Divine blessing (Gn 48^{14ff}; cf Nu $27^{18, 23}$, Dt 34^9); (*b*) of a burden of guilt (Lv 1^4 $4^{3f. 24}$ 16^{21f} etc.). In NT, while it is variously employed, the general idea is always that of blessing.

1. The simplest case is when Jesus lays hands of *blessing* on the little children (Mt $19^{13, 15}$ ||). The fact that the mothers desired Him to do so shows that this was a custom of the time and people. The narrative in Matthew shows further that, as used by Jesus, it was no magical form, but the symbolic expression of what was essentially an act of prayer (19^{13}).

2. In His deeds of *healing* Jesus constantly made use of this symbol (Mk 6^5 8^{23}, Lk 4^{40} 13^{13}; cf Mt 9^{18} ||, Mk 7^{32})—an example which was followed by the Apostolic Church (Ac $9^{12, 17}$ 28^8). In these cases, however, besides its religious symbolism, the act may further have expressed the healer's sympathy (cf the hand laid even on the leper, Mk 1^{41}, Lk 5^{13}), or have been designed to bring a reinforcement to faith.

3. In the early Church the imposition of hands was used, sometimes in close association with the act of *baptism* (Ac 9^{17f} 19^{5f}; cf He 6^2, which, however, may include all the various kinds of laying on of hands), but sometimes quite apart from it (Ac $8^{17, 19}$), as an *accompaniment of prayer* that believers might receive a special endowment of the Holy Spirit in charismatic forms. That this endowment does not mean the essential gift of spiritual life, but some kind of 'manifestation' (1 Co 12^7), is proved when Ac 9^{17} ('filled with the Holy Spirit') is compared with Ac 2^4, and when $8^{15, 17}$ is read in the light of the request of Simon Magus (v.^{18ff}), and 19^2 in the light of 19^6. The case of Ananias and Saul (9^{17}) suggests that the laying on of hands for this purpose was not a peculiar Apostolic prerogative.

4. In four passages the laying on of hands is referred to in connexion with an act that corresponds to **ordination.** The Seven, after being chosen by the multitude, were appointed to office by the Apostles, with prayer and the laying on of hands (Ac 6^6). The 'prophets and teachers' of the Church at Antioch 'set apart' Barnabas and Saul for their missionary work by laying their hands on them with fasting and prayer (13^3). Timothy received the gracious 'gift' which was in him with the laying on of the hands of a body of elders (see article PRESBYTERY), with which St. Paul himself was associated (cf 1 Ti 4^{14} with 2 Ti 1^6).

5. Of the *manner* in which deacons, elders, and bishops were set apart to office no information is given in NT. The injunction 'Do not be hasty in the laying on of hands' (1 Ti 5^{22}), has often been supposed to refer to the act of ordination; but the fact that the whole passage (vv.$^{19-25}$) deals with offenders points rather to the imposition of hands in the restoration of the penitent (cf 2 Co 2^{6f}, Gal 6^1), a custom that certainly prevailed in the early Church at a later time. The fact, however, that Jewish Rabbis, soon after A.D. 70, employed this rite when a disciple was authorized to teach, favours the view that it was commonly practised in the Apostolic Church, as it was almost universally in the post-Apostolic in consecration to ministerial office. See, further, BISHOP. J. C. L.—M. H. S.

LAZARUS.—A common Jewish name, the Greek form of an abbreviation of Eleazar.

1. The brother of Martha and Mary, the friend of Jesus (Jn $11^{3, 11, 36}$, where 'love' and 'friend' represent the same root in Greek). The family, according to John, lived at Bethany in Judaea, probably to be identified with *El-ʿAzarîyeh* about two miles SE. of the Mount of Olives, and to be distinguished from the Bethany in Peraea where Jesus was when word came to Him of Lazarus' death (cf 10^{40} 12^8). Lazarus is the subject of the greatest miracle which Jesus performs in John, and the last of His signs (Jn 11^{1-44}). Jesus had retired to Bethany beyond the Jordan when He learned that Lazarus was 'ill' (11^3). Jesus then stayed two more days in Peraea, probably to indicate that His return to Judaea, where He would be crucified, was not simply by force of the circumstance that Lazarus had died, but entirely by His own will. All His actions, from Cana (cf especially 2^4) to Bethany and Jerusalem, were done not under compulsion but in freedom.

Jesus finally left for Judaea. His disciples reminded Him that He was going to His death (11^8; cf v.^{16}); but He knew this. His raising of Lazarus could not be done independently of His own death; in fact the former hinged on the latter. Christ is Himself both the life-giver and the Conqueror of death; this is the significance of the sign of the raising of Lazarus, and this truth was revealed to those who could 'behold His glory' during His historical ministry. The life which Christ gives is victory over death, and this victory is validated by His own exaltation and is pointed to by this sign. Jesus goes to Judaea to raise Lazarus and to die. Life is given through death (cf 10^{10f}).

When Jesus arrived in Bethany, Lazarus had been in the tomb four days. From the Jewish point of view this length of time (more than three days) indicated the absolute dissolution of life. By this time the face would not even be recognizable with certainty; and the soul, which was believed to hover for three days over the body, would have departed. Martha reflects orthodox Pharisaism when she states her faith that Lazarus will be raised 'at the last day' (v.^{24}); but Jesus declares that He is [even now] the resurrection and the life and that believers in Him shall not die (v.^{25}). He is indignant

(vv.33, 38 ; RSV ' deeply moved ') at the lack of faith in Him expressed by the general weeping ; and, having prayed that it might be revealed that He was sent by the Father and could do nothing on His own authority (cf 5^{30}), He commands Lazarus to come out. And ' the dead man came out ' (v.^{44}). The chief priests and Pharisees then considered what they should do with Jesus ; and the high priest, Caiaphas, spoke more truth than he knew when he said that it was expedient ' that one man should die for the people ' (v.^{50}), and he ' prophesied ' that Jesus would die ' to gather into one the children of God who are scattered abroad ' (v.^{52}). Thus the recreation of life seals the death of the life-giver, without which death the new life which is victory over death cannot be offered.

As for the historicity of this sign or miracle, it must be said that the event is not recorded in the Synoptics. It is found only in John. It may be, therefore, that John was using his own tradition which at this point is not reflected in the Synoptics ; or that the narrative is related to Lk 16$^{19-31}$, and that a miracle story has developed from a parable (cf Mk 11$^{12-14, 20-23}$, where such a development may also be reflected). In any case John has edited whatever he had before him in his own theological interests.

Lazarus appears for the last time in ch. 12 where it is said that his presence, alive, led to increased numbers of Jews believing in Jesus ; therefore the chief priests planned to have Lazarus executed (12$^{9-11}$).

2. The beggar in our Lord's parable (Lk 16$^{19-31}$).—This parable may be divided into two parts, (1) the first dealing with the respective fortunes of a rich man and a beggar in this life, and their reversal in Hades (vv.$^{19-26}$), (2) the second being a petition from Hades that a sign be given to the living (vv.$^{27-31}$). The first part of the parable is perhaps based on an old Egyptian folk-tale, probably well known in Palestine in the days of Jesus, which ended with the words : ' He who has been good on earth will be blessed in the kingdom of the dead, and he who has been evil on earth will suffer in the kingdom of the dead.' The rich man in Jesus' parable was evil in that he feasted sumptuously while the poor man at his gate went hungry ; and although Jesus says nothing about the goodness of the poor man, in the story to which he alludes the poor man is humble and pious. When they die, both go to Hades (q.v.)—a name which describes an intermediate stage to which all go immediately after death. Gehenna, on the other hand, concerns the final state of men. In the intermediate state of Hades, the good and the evil are able to see each other in their very different conditions. The rich man sees Lazarus in Abraham's bosom—at the place of honour ; and Lazarus sees the rich man ' in anguish ' (v.^{25}). Moreover, between them a ' great chasm has been fixed,' in order that there may be no passing from one place to the other.

The second part of the parable, sometimes called an ' epilogue,' contains Jesus' main point. He uses the folk-tale as a device for his message, that no sign shall be given on earth (cf Mk 8^{12}). The rich man begs Abraham to send Lazarus to his father's house to warn his family lest they, too, suffer torment in Hades. But Abraham answers that they should listen to ' Moses and the prophets '—they should heed the revelation which has already been given them. So long as they ignore this revelation they will not receive any other. It is claimed by the rich man that if a resurrection should take place his evil family on earth would repent ; but Abraham answers that not even a resurrection from the dead would lead Jews to repent who did not listen to Moses and the prophets. Jesus' point is that faithless Jews would not be convinced by any sign, even by a resurrection from the dead. One who will not hear the Word of God will not be converted by a miracle ; hence no sign will be given.

It is interesting to compare Jn 11 where Lazarus *is* raised from the dead, but the Jews are only led to plot the death of both Jesus (vv.^{45ff}) and Lazarus (12^{10}). And the resurrection of the Lord Himself remained unconvincing. B. H. T.

LEAD.—See Mining and Metals.

LEAH.—The elder daughter of Laban, married to Jacob by stratagem, Gn 29^{21ff}. Jacob's love for her was less than for Rachel (v.^{30}) ; sometimes she is said to be hated (vv.$^{31, 33}$), but by Hebrew idiom this means ' loved less.' She was the mother of Reuben, Simeon, Levi, Judah, Issachar, Zebulun, and a daughter Dinah (29$^{31-35}$ 30$^{18, 20f}$). She was buried in the cave of Machpelah before Jacob went to Egypt (49^{31}). She is mentioned in Ru 4^{11}. By most her name is connected with an Arabic word, meaning ' wild cow.'

LEASING.—A ' leasing ' is a lie, in archaic English. Wycliffe uses the word often. Thus Jn 8^{44} ' Whanne he spekith a lesinge, he spekith of his owne thingis ; for he is a lyiere, and fadir of it.' The word occurs in AV in Ps 4^{2} 5^{6} and 2 Es 14^{18}. RV retains in 2 Es 14^{18}, but RSV nowhere uses it, substituting for it ' lies ' or ' falsehood.'

LEATHER.—See Arts and Crafts, 5. On Ezk 16^{10} (RSV), see Porpoise.

LEAVEN.—The leaven both of OT and of NT may be assumed to have always consisted of a piece of fermented dough from a previous baking. There is no clear trace, even in the Mishnah, of other sorts of leaven, such as the lees of wine or those enumerated by Pliny (*NH* xviii. 26). In ordinary cases, in the preparation of the household bread, the lump of dough, above referred to, was either broken down into the water in the kneading-trough (see Bread) before the fresh flour was added, or it might be ' hid ' in the latter and kneaded along with it, as in the parable, Mt 13^{33}. The bread made from dough thus prepared was ' leavened bread ' (Ex 12^{15} and often) ; cakes made from flour without the addition of leaven received the special name **mazzoth**, ' unleavened cakes,' which gave their name to ' the feast of unleavened cakes ' (Ex 23^{15} etc., EV ' unleavened bread ').

The prohibition of leavened bread during the continuance of this Feast, including the Passover, is probably another illustration of conservatism in ritual, the nomadic ancestors of the Hebrews, like the Bedouin of the present day, having made their bread without leaven. The further exclusion of leaven from the offerings placed upon the altar of Y^{w}—although admitted when the bread was to be eaten by the priests (Lv 7^{13} 23^{17})—is to be explained, like the similar exclusion of honey, from the standpoint that fermentation implied a process of corruption in the dough. The antiquity of this prohibition is attested by its occurrence in the earliest legislation (Ex 34^{25} 23^{18}). It does not seem to have been observed, however, in Amos' day in the Northern Kingdom (see the Comm. on Am 4^{5}).

This antique view of leaven as (in Plutarch's words) ' itself the offspring of corruption, and corrupting the mass of dough with which it has been mixed,' is reflected in the figurative use of ' leaven ' in such passages as Mt 16^{6} ||, and especially in the proverbial saying twice quoted by St. Paul, ' a little leaven ferments the whole lump ' (1 Co 5^{6}, Gal 5^{9} ; cf 1 Co 5^{7f}). In Mt 13^{33}, however, it is the silent but all-pervading action of leaven in the mass of the dough that is the point of comparison. A. R. S. K.

LEBANA.—The head of a family of returning exiles, Neh 7^{48} ; called **Lebanah** in Ezr 2^{45}, 1 Es 5^{29} (AV, RV **Labana**).

LEBANAH.—See Lebana.

LEBANON, now *Jebel Libnân*, is mentioned more than sixty times in the OT. The name, from the same root as *lābhān* (' white '), was probably given on account of the mountain's covering of snow. The snow of Lebanon is mentioned in Jer 18^{14}. Many passages refer to its beauty, particularly in relation to its cedars and other trees (see Ps 72^{16}, Ca 4^{11}, Hos 14$^{5, 7}$). From Lebanon was obtained wood for building the first (2 Ch 2^{8}) and the second

(Ezr 37) Temple. Lebanon was famous for its fruitfulness (Ps 72[16]) and its wine (Hos 14[7]).

The term 'Lebanon' may be considered in most places as referring to the whole mountain mass, more correctly distinguished as Lebanon and Anti-Lebanon (**Libanus** and **Antilibanus** of Jth 1[7] [AV, RV]). The two ranges traverse N. Syria, running roughly parallel, from SW. to NE., and are separated by a deep valley—the *biḳʿâh* of Jos 11[17] 12[7]—known to-day as *el-Buqaʿ*. The western range, Lebanon proper, is nearly 100 miles long, but the eastern, if Hermon is deducted as a separate entity, is only 65 miles long. The former range is divided from the mountains of Galilee by the deep chasm made by the *Liṭânî* river in its passage seawards. In the N. a somewhat similar gorge formed by the *Nahr el-Kebîr*, the ancient Eleutherus, divides it from the *Jebel Nusairîyeh*. The summits of the range rise in height from south to north. In the S. a few points attain to almost 7000 feet; in the centre, E. of Beirut, *Jebel Kuneiseh* is 6960 feet, and *Jebel Sannîn* 8554 feet; further N., to the SE. of Tripoli, is a great semicircular group of mountains, sometimes known as the 'Cedar group,' on account of the famous group of these trees in their midst, where the highest point, *Jebel Mukhmal*, reaches 10,207 feet, and several other points are almost as lofty. Geologically the Lebanon is built of three main groups of strata. Lowest comes a thick layer of hard limestone, named—after its most characteristic fossil (*Cidaris glandaria*)—Glandaria limestone; above this are strata of Nubian sandstone, yellow and red in colour, and in places 1500 feet thick, overlaid and interlaced with strata of limestone containing fossil echinoderms and ammonites; and thirdly, above this group, and forming the bulk of the highest peaks, is another layer, many thousand feet thick in places, of a limestone containing countless fossils known as hippurites, radiolites, and such like. The sandstone strata are most important, for where they come to the surface is the richest soil and the most plentiful water, and here flourish most luxuriantly the pines which are such a characteristic feature of W. Lebanon scenery. A great contrast exists between the W. and E. slopes. The former are fertile and picturesque, while down their innumerable valleys course numberless mountain streams to feed the many rivers flowing seawards. The E. slopes are comparatively barren, and, except at one point, near *Zahleh*, there is no stream of importance. Of the Lebanon rivers besides the *Nahr Liṭânî* (Leontes) and the *Nahr el-Kebîr* (Eleutherus), the following may be enumerated from S. to N. as the more important: *Nahr ez-Zaharânî*, *Nahr el-ʿAuwâlî* (Bostrenus), *Nahr Beirût* (Magoras), *Nahr el-Kelb* (Lycus), *Nahr Ibrahîm* (Adonis), and the *Nahr Qadîsha* or 'holy river,' near Tripoli.

The Lebanon is still fairly well wooded in a few places, though very scantily compared with ancient times, when Hiram, king of Tyre, supplied Solomon with 'cedar trees, fir trees, and algum trees out of Lebanon' (1 K 5[6], 2 Ch 2[8]). In regard to cultivation there has been a very great improvement in recent years, and the terraced lower slopes of the mountain are now covered with mulberry, walnut, and olive trees as well as vines. Many of the views in the Lebanon are of most romantic beauty, and the climate of many parts is superb. Wild animals are certainly scarcer than in olden days. Jackals, gazelles, hyaenas, wolves, bears, and panthers (in order of commonness) are found and, inland from Sidon, the coney (*Hyrax*) abounds.

Between the Lebanon and Anti-Lebanon is the great hollow known to the Greeks as **Coele-Syria**, and to-day called *Buqaʿ el-ʿAzîz*. Considered geologically, this wide valley is a product of the same great 'fault' as produced the deep Jordan valley. It is now a great, fertile, but little cultivated, plain, from 3 to 6 miles wide, and in it rise, not far from Baʿalbek, two famous rivers, the *Liṭânî* (Leontes), which flows S., and the *Nahr el-ʿÂṣî* (Orontes), which flows N., and enters the sea near Antioch. This hollow plain, besides being crossed transversely by the Damascus railway and road, is traversed over more than half its length by the line past Baʿalbek, Homs, and Hamath to Aleppo. Some part of this plain, 'the valley of the Lebanon,' would appear to have been conquered by the Israelites (Jos 11[17]).

The **Anti-Lebanon** is to-day known as *Jebel esh-Sherqi* or 'the east mountain,' the equivalent of 'Lebanon towards the sun-rising' of Jos 13[5]. In Ca 7[4] it is referred to as 'the tower of Lebanon that looketh towards Damascus.' In Dt 1[7] 3[25] 11[24], Jos 1[4] 9[1], the Hebrew 'Lebanon' is in the LXX translated 'Anti-Lebanon.' Anti-Lebanon is somewhat arbitrarily divided from Hermon, which is structurally its S. extremity, by a pass (along which the road runs), and especially by the *Wâdî Baradâ*. In the N. it terminates in the plain around Homs. Its highest point is *Tâlaʿat Mûsa* (8755 feet), but several other peaks are almost as lofty. A valley, like the *Buqaʿ* in miniature, traverses the S. part of the range from N. to S., and in this rises the *Nahr Yafûfeh*, which empties its water down the *Wâdî Yafûfeh* to join the *Liṭânî*; and the *Nahr Baradâ*, which, after rising in a beautiful pool at the SW. extremity of this plain, runs down the *Wâdî Baradâ* to Damascus. The N. part of this range is very bare.

Liberated from Turkish rule in World War I, Lebanon, like its neighbour Syria, became an area under French mandate 1920–1941. Foreign troops were withdrawn in 1946 and it is now a republic and member of the United Nations. It has a population of about 1,353,000 (1953 U.N. estimate). Beirut is the chief sea-port. The country is primarily agricultural, producing fruit, tobacco, olive oil, silk, and cotton.

E. W. G. M.—E. G. K.

LEBAOTH.—See BETH-LEBAOTH.

LEBBAEUS.—See THADDAEUS.

LEB-KAMAI.—Found in Jer 51[1] (RV); AV translates 'in the midst of them that run up against me' (so RVm). The expression is recognized as being an example of the Kabbalistic rule of hermeneutics whereby a cipher word was obtained by taking the letters of the alphabet in the reverse order, the last for the first, the last but one for the second, and so on. By this process (known as Atbash), *leb-ḳamai* gives us *Kasdîm*='the Chaldaeans' (RSV 'Chaldaea').

LEBO-HAMATH.—See HAMATH.

LEBONAH.—A place near Shiloh on the way to Shechem, Jg 21[19]. It is probably modern *Lubbân*, about three miles WNW. of *Seilûn* (Shiloh).

LECAH.—The 'son' of Er, 1 Ch 4[21].

LEECH (*ʿalûḳâh*, cf Arab. *ʿalaqeh*).—The horse-leech (*haemopis sanguisuga*) and the medicinal leech (*Hirudo medicinalis*) are very common in Palestine, and are the cause of much trouble, even sickness and death, to man and beast. They abound in many springs, streams, and pools, and lodge themselves, while still small, in the mouths of those drinking. Thence they not infrequently find their way to the pharynx, and even larynx, where they live and grow for many months. They cause frequent haemorrhages and, if not removed, lead to progressive anaemia and death. Their voracious appetite for blood, possibly referred to in Pr 30[15] (RSV 'leech'; AV and RV '**horseleach**'), is well illustrated by their habits as internal parasites. It is probable, however, that the reference here is not to the leech of common life, but to the mythological **vampire** (cf RVm) the *ghûl* of the Arabs. E. W. G. M.

LEEKS.—The Hebrew word *ḥâṣîr*, which is elsewhere translated 'grass' or 'herb,' is rendered 'leeks' in Nu 11[5], and in this passage, owing to the association with onions and garlic, the translation is probably correct, leeks being *the* herb *par excellence*. The leek (*Allium porrum*) is much grown in Palestine, where it is a general favourite. E. W. G. M.

LEES.—The sediment which settled at the bottom of the wine-jars, composed of morsels of husks, stalks, etc.; in OT only in figures. See WINE AND STRONG DRINK, 3.

LEG.—**1.** Hebrew *k^{e}rā^{ʿ}ayim*, a feminine dual, in which form alone it appears (Ex 12^{9} etc.). It denotes the legs from knee to ankle. **2.** Hebrew *reghel* (1 S 17^{6}), literally 'foot.' **3.** Hebrew *shôk*, the leg, apparently including the thigh, for which it stands in Ex 29$^{22, 27}$, Lv 7^{32ff} 8^{25f} 9^{21} 10^{14f}, Nu 6^{20} 18^{18}, 1 S 9^{24}, in all of which AV has 'shoulder,' but RV and RSV, correctly, **thigh** (save 1 S 9^{24}, where RSV has 'leg'). In Ps 147^{10} 'the legs of a man' may possibly mean 'foot soldiers.' The proverbial phrase 'hip and thigh' is literally 'thigh upon hip' (Jg 15^{8}), descriptive of the confusion of severed limbs. **4.** Hebrew *shōbhel* (Is 47^{2}; AV 'make bare the leg') means 'the flowing skirt' (RV 'strip off the train,' RSV 'strip off your robe'). **5.** Greek *skelos* (Jn 19^{31ff}). To hasten the death of the crucified, it was customary to break their legs.

LEGION.—This term, which means literally 'a gathering,' looks back to the early days of the Roman citizen army. In the time of the Empire it indicated a force of about 6000 infantry, together with complements of other arms. In NT times the Roman Empire maintained twenty-five legions, four of which were stationed in Syria. Provincials supplemented their ranks, as auxiliaries. The infantry proper were divided into ten **cohorts** (the word is translated '**band**' [q.v.] in Mt 27^{27}, Mk 15^{16}, Jn 18$^{3, 12}$, Ac 10^{1} 21^{31} 27^{1}, in AV and RV, but variously in RSV), each containing about 600 men, and each commanded on occasion by a military tribune. Of these tribunes there were six to a legion. A cohort was itself subdivided into six centuries, each commanded by a **centurion.** It is not necessary to remember all these facts in studying the NT use of the word 'legion' (Mt 26^{53}, Mk 5$^{9, 15}$, Lk 8^{30}). What chiefly impressed Semites was apparently the size of the legion, and 'legion' appears to have become a proverb among them for a large number of persons in orderly combination. A. So.—J. C. B.

LEHABIM.—Occurs only Gn 10^{13}, 1 Ch 1^{11} amongst the 'descendants' of Egypt (Mizraim). They are commonly identified with the *Lubim* or **Libyans** (q.v.), whether the word is an alternative traditional pronunciation of the name of this people, or whether, as is more probable, the form here given is due to textual corruption. The fact that *Lubim* or **Libyans** is a fairly common word, and that it is not found in the ethnological list of Gn 10, where it would naturally appear in the place of Lehabim, adds something to the evidence of identity. Some have thought *Ludim* in the same verse is another variant; but this is improbable. See LUD, LUDIM, **2.** J. F. McC.—H. H. R.

LEHEM.—See JASHUBI-LEHEM.

LEHI ('jawbone').—The scene of Samson's well-known adventure with the jawbone of an ass, Jg 15$^{9, 14, 19}$ (cf 2 S 23^{11}). The site is unknown.

LEMUEL.—The name of a king, otherwise unknown, to whom Pr 31$^{1-9}$ is addressed by his mother. His identity has been much discussed; he has been identified by the Rabbinical commentators with Solomon, and by Grotius with Hezekiah. Cf also **Massa.** It is possible that the name is a fanciful title to represent any virtuous king, invented for the purpose of conveying certain maxims. T. A. M.

LENDING.—See DEBT.

LENTILS.—Hebrew *^{ʿ}adhāshîm*, Gn 25^{34}, 2 S 17^{28} 23^{11}, Ezk 4^{9}. These are without doubt the Arabic *^{ʿ}adas*—a kind of small reddish bean, the product of *Ervum lens*, a small leguminous plant 6 or 8 inches high, much cultivated in Palestine, and ripening in June or July. It is the bean from which the well-known *revalenta*, a food for invalids, is made. In Palestine a kind of 'pottage' known as *mujedderah*, universally popular, is made from it. It is of a reddish-brown colour, and is certainly the original '**red pottage**' of Esau (Gn 25^{30}). E. W. G. M.

LEOPARD (*nāmēr*).—This animal (*Felis pardus*, Arab. *nimr*) is still found at times in the wilder parts of Palestine. Its beautiful spotted skin (Jer 13^{23}) is from time to time brought into the towns for sale. Some dervishes clothe themselves in a leopard's skin. Its fierceness (Hos 13^{7}), its agility (Hab 1^{8}) and untameableness (Is 11^{6}) are all mentioned. The name *Nimr* is a favourite one with the Arabs, who admire these qualities. In the names 'waters of *Nimrîm*' ('leopards,' Is 15^{6}, Jer 48^{34}) and '*Beth-nimrāh*' (female leopard, Nu 32$^{3, 36}$) references to the leopard also occur; cf the 'mountains of *n^{e}mērîm*' (*i.e.* 'the leopards' Ca 4^{8}). The cheetah (*Felix jubata*) is found also in Galilee, and it too may have been included under the Hebrew word *n^{e}mērîm.* E. W. G. M.

LEPROSY.—The Hebrew *ṣir^{ʿ}āh* and *ṣārā^{ʿ}ath* 'prostration' are general terms for any prostrating experience or disabling disease (cf Arab. *ṣara^{ʿ}a* 'prostrated,' *ṣaru^{ʿ}a* 'was prostrated by epilepsy' and *dari^{ʿ}a* 'submitted oneself; was feeble, weak').

I. The former, incorrectly translated 'hornet' (LXX, Vulgate), which cannot be philologically justified, means rather 'demoralization' (Koehler; cf Sa^{ʿ}adya and 'Abu-Sa^{ʿ}id), such as seems to have broken down Canaanite resistance before (cf Job 41^{14}) the advancing Hebrews (Ex 23^{28}, Dt 7^{20}, Jos 24^{12}); so the Assyrian writer of a letter to king Ashurbanipal says that the gods 'have caused fear to enter like a plague before the troops of my lord, king of kings' (Harper, *Assyrian and Babylonian Letters*, V. 460, O. 8–10).

II. The latter, commonly but incorrectly translated 'leprosy,' is the name given to several affections of the skin, the *leichēnes kai leprai kai leukai*, of which Greek physicians considered the last to be the most deadly (Hippocrates, *Prorrhesis* ii. 43); but it cannot be definitely identified.

A. The rules describing the various affections of the skin subsumed under *ṣārā^{ʿ}ath* are by no means clear; for the ancient priest had no scientific knowledge and no vocabulary adequate to describe what he was diagnosing. This difficulty long persisted, and subsequent laws added that a skilled layman should assist the priest in his examination, although the priest made the actual declaration of cleanness or uncleanness (Mishnah, *Negaim* ii. 5, iii. 1; cf *Zadokite Documents* xv. 7). Even when the lazar-houses in England and France were suppressed, as leprosy was dying out, many persons suffering from non-leprous diseases were found in them. The relative incidence of diseases, too, changes over the years; what in one period or in one society is trivial may be serious, even fatal, at another time or in another society. The clinical pattern of a specific disease may also vary considerably, depending on such factors as the virulence of the causal factor, the natural (racial or individual) immunity of the patient, and so on.

B. In the first group of affections discussed under *ṣārā^{ʿ}ath* the terms used are *śe^{ʿ}ēth* 'discoloured blotch, scar' [not 'swelling'] (LXX 'scar' and Vulgate *diversus color*; cognate Arab. *ši'atu, šiyatu* 'colour, mark'), and *sappaḥath* 'scab' (LXX 'mark, scab,' Vulgate *pustula, erumpentes papulae*; Ass. *sapāḫu* 'to strew, sprinkle' perhaps cognate with the Hebrew term) and *bahereth* 'bright patch' (LXX 'conspicuous whiteness,' Symmachus 'efflorescence,' Vulgate 'shining patch, whiteness; scar'; cognate Heb. *bāhar* 'gleamed').

If a man develops any of these symptoms on his skin 'and it will become a lesion of *ṣārā^{ʿ}ath*,' *i.e.* if it looks like becoming *ṣārā^{ʿ}ath*; he must show it to the priest. If the lesion is subcutaneous and the hairs in it have turned white, it is a 'lesion of *ṣārā^{ʿ}ath*' and the patient is unclean. If it is a white 'bright patch' and the lesion appears to be superficial and the hairs are not affected, the patient is confined for seven days and, if necessary, another seven days for observation. By then, if the lesion has remained localized and is fading, it is simple 'scabbing' (*mispaḥath*); the patient must wash his clothes and is declared clean. If however the scabbing spreads, it is *ṣārā^{ʿ}ath* and the man is pronounced unclean (Lv 13$^{2-8}$).

LEPROSY

Any lesion in the skin, if it is deep-seated and tends to spread and the hairs turn white, is *ṣāraʿath* and therefore unclean; if it is superficial, remains localized and does not affect the hairs, and it starts to fade within fourteen days, it is not unclean. These seem to be general rules by which the diagnosis of unclean and clean lesions may be made; no specific diagnosis is possible here on the evidence.

1. If the priest examining the sufferer who has a 'lesion of *ṣāraʿath*' finds a 'white blotch' in which the hairs have turned white and 'raw flesh,' *i.e.* ulceration, appears, the condition is 'chronic *ṣāraʿath*' and does not call for diagnostic confinement (13$^{9-11}$); he is *ipso facto* unclean. This shows that *ṣāraʿath* with ulceration is a long-standing condition.

If the *ṣāraʿath* spreads all over the patient's body and the lesion has 'all turned white,' he is clean. If, however, 'raw flesh' appears, it is *ṣāraʿath* and unclean; but, if the 'raw flesh' heals and the rash becomes white, it is again regarded as clean (13$^{12-17}$).

That 'the lesion has all turned white' seems to imply healing by desquamation, in which the diseased superficial layer of skin flakes off, revealing fresh white skin underneath. If then a generalized eruption heals by desquamation, it is considered clean; but if, instead of healing, a secondary infection with ulceration occurs, it is unclean and remains so until the skin again becomes clear. For example, generalized *eczema* may heal by desquamation, leaving a clear white skin; but secondary infection may prevent healing and produce ulceration, which, too, may eventually heal by desquamation.

2. (*a*) If a healed ulcer (*shᵉḥîn*) develops a white 'blotch' or a reddish-white 'bright patch,' and the examining priest discovers a 'low,' *i.e.* deep-seated (*shāphāl*) lesion with whitened hairs, it is a lesion of *ṣāraʿath* and unclean. If he finds no white hairs and the lesion seems superficial and fading, the patient is put into diagnostic confinement for seven days; if the lesion spreads, it is a 'lesion of [*ṣāraʿath*]' (as read by the LXX and one Hebrew MS) and unclean; but, if it remains localized, it is merely the scar of the ulcer and clean (13$^{18-23}$).

Discoloration at the site of a healing ulcer may be associated locally with induration and atrophy of the hair or it may tend to spread; such a condition is regarded as unclean. If, however, the discoloration is superficial and after seven days it is still localized and fading, it is clean. The reference apparently is to an open lesion, an ulcer or a sore, of the skin; if there is a local inflammatory reaction causing induration at the base of the ulcer or one spreading in the skin (*cellulitis*), it is unclean; if there is no obvious inflammation and a tendency to heal, it is clean.

(*b*) When the same discolorations occur at the site of a burn and examination reveals a subcutaneous lesion in which the hairs have turned white, it is a 'lesion of *ṣāraʿath*' and unclean. If there are no white hairs and the lesion is superficial and fading, the patient is confined for seven days for examination; if it has spread, it is *ṣāraʿath* and unclean; if it has remained localized and continues to fade, it is simply the scar of the burn and clean (13$^{24-28}$).

If in a case of discoloration round a burn there is local induration with atrophy of the hair or if the discoloration tends to spread in the skin, it is unclean; but, if it is superficial and fading and after seven days is still localized and fading, it is clean. The inflammatory changes in view are presumably due to an infection at the site of the burn.

3. If white 'bright patches' which are dull or fading appear on the skin of a man or woman, this is *bōhaḳ* and clean (13^{38}).

This disease is *vitilligo* (*alba*) for which *alphos* 'dull white leprosy' (Liddell and Scott) is used by the LXX, and which (like *leucoderma*) is still called *bahaqu* by the Arabs. It is very common in tropical and subtropical countries. It begins insidiously as a small depigmentated spot without raw flesh; these spots spread and coalesce and the hair may go white. No other symptoms appear, and the sufferer's health is unimpaired, but recovery, except from a single patch at an early stage, is very unlikely; and it is not contagious. The introduction of *bōhaḳ* between two sections dealing with baldness (13$^{29-37}$ and 13$^{40-44}$) suggest a displaced note from a different set of rules.

4. (*a*) If a man or woman develops a lesion in the scalp or under the beard which is subcutaneous and in which thin 'yellow' (*ṣāhôbh*) hairs appear, it is 'scurf' (*netheḳ*), classified as *ṣāraʿath* and therefore unclean.

If the lesion is superficial and 'yellowish' (LXX, 'Abū Saʿīd; Hebrew 'black') hairs appear, the patient is kept for seven days in diagnostic confinement. Then, if the affection has not spread and it shows no 'yellow' hairs and remains superficial, the hair round the affected area should be shaved off and the patient confined for another seven days. If the scurf is then still localized and superficial, he is pronounced clean and must wash his clothes; if the scurf subsequently spreads, it is unclean but, if it remains localized and black hairs appear in it, it is healed and declared clean (13$^{29-37}$).

A lesion of the hairy skin, if it is deep-seated and causes the hair to become thin and faded or tends to spread, is unclean; if it is superficial and does not injure the hair and does not spread during fourteen days of close observation, aided by shaving the surrounding hair, it is clean; when fresh hair grows again, it is regarded as healed.

No specific disease seems to be described, although many attack the hairy skin; the commonest are fungal (such as *tinea barbae*), others bacterial (such as *impetigo* and *sycosis barbae*) infections. The fungal infections usually produce superficial and circumscribed patches of scaly skin, in which the hairs are relatively light in colour and brittle and break off short; the condition may spread locally and, if complicated by acute inflammation, develop deep-seated lesions full of pus. The bacterial infections are superficial (*impetigo*) or deep-seated (*sycosis barbae*); they have little effect on the hair but have a great tendency to spread and suppurate (*i.e.* to ulcerate and produce pus).

Other disorders are *psoriasis* and *dermatitis seborrhoeica*. The former is an indolent condition characterized by patches of white scales; it does not affect the hair but sometimes spreads widely. The latter consists in a greasy scalp producing white powdery scales (*seborrhoea*, dandruff); for unknown reasons it may flare up, when the scalp becomes red and swollen and oozes serum which forms crusts and mats the hair.

In their simplest form these conditions are classified as 'scurf' (*netheḳ*; cf Heb. *nāthaḳ* 'pulled off, tore away' and Arab. *nataqa* 'pulled skin from the body'), *i.e.* desquamation of the skin, to which the *exuviae* of the hair-follicles are added; in complicated forms they may suppurate and injure the hair or spread, when they are classified as *ṣāraʿath* and unclean. These disorders may persist as simple lesions for long periods of time, they are liable to become complicated and are therefore potentially unclean.

The reference to hair turning yellow raises a difficulty; for no known pathological process can be equated with it, and the LXX's 'black' ought to be accepted for MT's 'yellow.' Diseased hair usually fades and becomes grey; but reddish hair may appear in malnutrition.

(*b*) When the hair falls out of a man's temples or head and no other symptoms appear, the condition is clean; but, if the baldness is accompanied by reddish-white 'discoloration' like that in *ṣāraʿath* elsewhere on the body, it is *ṣāraʿath* and unclean (13$^{40-44}$).

The text does not show whether the 'reddish-white lesion' is supposed to appear on an already bald scalp or if it is associated with the development of baldness. In the former case, it may be identified with the unclean eruptions of *ṣāraʿath* elsewhere on the body. In the latter several diagnoses are possible; the most probable diseases are fungal infections such as *syphilis*, seborrhoeic *dermatitis*, chronic *lupus erythematosus* and so on.

Leprosy only very seldom, and *psoriasis* never, produces baldness of the scalp.

C. Clearly *ṣāraʿath* has no specific aetiological or morphological meaning in relation to human disease, but its general import is clear. It is applied to a number of eruptions, single or multiple, on the hairy and the hairless skin. The eruptions in the Bible fall into two classes according as they are regarded by the Hebrew writer as benign or malignant. The former, in which the lesion is local, superficial and fading or faint, are not called *ṣāraʿath*; the latter, which are subcutaneous or deep-seated, spreading or chronic, and in which ulceration may occur and the hair lose its colour, are *ṣāraʿath* and unclean. The purpose of the lawgiver is simply to lay down sufficient rules regarding *ṣāraʿath* 'to teach when it is unclean and when it is clean' (Lv 14^{57}), *i.e.* to guide the priest in the important practical problem of separating unclean from clean diseases of the skin, the benign from the malignant or potentially dangerous. Regarded in this way the rules make good sense; but, if they are regarded as a guide to precise diagnoses of specific dermatological conditions, they are totally inadequate on modern medical standards.

III. (*a*) True leprosy, not mentioned in these rules, is described in an Egyptian text *c* 1500 B.C. and is therefore likely to have been known to the Jews; it is sometimes called the 'Phoenician disease' (Hippocrates *l.c.*; cf Kuhn, *Medicorum Graecorum Opera*, xix, 152, when Galen so explains this term), and it is reported to be still common amongst Eastern Jews and some Moslems. It is of two kinds, lepromatous and non-lepromatous. The latter may heal itself. The characteristic lesion of the former is an ill-defined nodule infiltrating deep into the skin; these nodules commonly occur on the face or ears, fingers or buttocks. When they develop on the face (especially the forehead), the hair and eye-brows are lost, the skin becomes thickened (hence called *elephantiasis*) and the face acquires a 'cobble-stoned' or 'leonine' appearance (hence called *leontiasis*). If untreated, they tend to ulcerate, certain nerves become involved, sensation is lost, and the patient may injure himself; this ulceration may reach the bone, which then dies and sloughs off, so that the fingers become shortened, giving the appearance of having dropped off. Also, when nerves supplying the muscles are attacked, paralysis causing contractures may ensue. Lips, tongue, and throat may be so ulcerated that the sufferer dies of malnutrition and exhaustion. In maculo-anaesthetic and tuberculoid leprosy, in which the tissues have the upper hand, the patches are much more clearly defined. The surface of the skin is dry and scaly, and anaesthesia is an early sign, showing that the nerves are involved; these become rigid and thick, and the limbs which they supply are insensitive or paralysed, becoming wasted and susceptible to injury; in such cases proper treatment must be promptly applied if deformity is to be prevented, arrested or alleviated. Otherwise the long-continued effects of this wasting produce the grotesquely deformed extremities which are characteristic of the last stages of severe leprosy. The distinction between all these forms of leprosy is clear; but intermediate forms occur where both lepromatory and tuberculoid elements appear. As in tuberculosis, so in leprosy there is a great tendency to spontaneous healing in the less severe forms of the disease; but, once the more severe lepromatous form develops, it goes on its relentless course if untreated, however slowly, and sufferers may live for many years. Modern treatment, however, is highly successful in staying the ravages of this disease.

The descriptions of the two leprosies show that *ṣāraʿath* 'prostration,' may once have designated or included these diseases; for the normal termination of both may be emaciation and exhaustion, often accompanied by complications. The term will then have been extended to other affections of the skin which resemble true leprosy or which may accompany it. Several such affections begin with depigmentation or discoloration of the skin; their lesions are subcutaneous; the conditions are more or less persistent and incurable; some are mildly contagious; most, if not all, follow or are caused by emotional disturbance. Thus the true leprosies and the other affections classified as *ṣāraʿath* have so many similar symptoms that they may easily have been confused at certain stages by a priest without modern knowledge. In any case, if the lesser disorders brought under the heading of *ṣāraʿath* could have been confused by such a priest and condemned as unclean, the greater disease (namely true leprosy) would also have been unclean in his eyes.

(*b*) Whether true leprosy can be found in the Bible is a difficult question, although 'leprosy' appears in the translations at several places.

Moses on God's instruction put his hand into his bosom and, when he withdrew it, it was 'leprous (*mᵉṣōraʿath*) white as snow' and when, after putting it back, he again withdrew it, it became like the rest of his flesh (Ex 4^{6-7}). This evanescent attack was no ordinary case but a miracle and cannot be otherwise explained. When Miriam was punished by being made 'leprous white as snow,' Aaron prayed that she might not be 'as one dead, of whom the flesh is half-consumed when he cometh out of his mother's womb'; then, when Moses interceded with God, he was ordered to confine her for seven days, after which she was re-admitted to the camp, apparently cured (Nu 12^{10-15}). This case too is miraculous but can be roughly explained. At first sight *eczema* is suggested by the acute onset of an apparently generalized eruption; but *eczema* with its red lesions is ruled out by the description of those in the story as 'white as snow,' and a related condition, *dermatitis exfoliativa*, may be meant. In mild forms of this disorder the superficial layers of the skin may flake or peel off; secondary infection may turn it into a dangerous disease which may destroy the skin (gross destruction of tissue). Aaron might then have hoped that Miriam would not become like a macerated foetus (*i.e.* one which had been dead in the womb for some time before delivery). His fear precludes true leprosy, which cannot be inherited or contracted by an unborn child in the womb. The case of Naaman is interesting because it describes a strong and healthy man as 'leprous' (*ṣārûaʿ*). On consulting Elisha he was bidden to bathe himself seven times in the Jordan, whereupon 'he turned and went away in a rage'; he did, however, on the persuasion of his attendants, return, whereupon 'his flesh came again like the flesh of a little child and he was clean' (2 K 5^{1-14}). Here the disorder is one of those not accompanied by any septemic upset of which *psoriasis* is the commonest. This, or *leucoderma*, is suggested also by the whitening of the skin, which is never found in true leprosy. King Azariah or Uzziah went into the sanctuary to offer incense in spite of the protests of the priests and while he was angrily arguing with them *ṣāraʿath* broke out on his forehead; the priests immediately shunned him and he was forced to live 'in his own house, relieved of duties,' and the disorder afflicted him for the rest of his life (2 K 15^{5} = 2 Ch 26^{19-21}). Not improbably the king already had *ṣāraʿath* when he entered the sanctuary; but when he flew into a rage, his forehead became congested and the disease became obvious. That it started on the forehead suggests true leprosy; but this is by no means specific for that condition. Alternatively *lupus erythematosus*, which may start on the forehead, must be considered. Job's malady, which is nowhere called *ṣāraʿath* and of which the symptoms are variously described (Job 2^{7-8}; cf 2^{12} 3^{25} 6^{4} $7^{5, 14f}$ 19^{17} $30^{17, 30}$), has been identified with leprosy (Dillmann), possibly tuberculoid leprosy (Duhm); but this is most unlikely, as leprosy is not accompanied by itching. Only an intractable scabies, such as 'Norwegian scabies,' in an advanced or chronic state fits the description of Job's disease; in this the scratching is so intense that the skin is broken down, secondary infection sets in, and severe *dermatitis* with ulcers and scabs complicates the condition. Such ulcers, if large enough, would be infected with maggots, pains and terrors at night with

feelings of strangulation would accompany the disease, and the ceaseless throbbing of the veins would refer to the sufferer's general condition produced by the constant irritation of an advanced scabitic condition. The *ṣāraʿath* afflicting the four lepers at the gate of Samaria (2 K 7$^{3-10}$) and the malady of the 'lepers' mentioned in several passages of the NT (Mt 8^{2}, Mk 14^{3}, Lk 17^{12}) are not described and therefore cannot be identified; but the 'lepers' of the NT cannot have had true leprosy, as the Greek word does not designate that disease.

(*c*) Many of the disorders of the skin here described (notably *dermatitis, eczema, leucoderma, psoriasis, vitilligo, lepra nervorum*) are caused by nerve-impulses and are due to or accompany emotional disturbances; and people who suffer from them are said commonly to have intelligence above the average. This connexion explains the stories of the sudden infliction of 'leprosy' as a divine punishment (Miriam; cf Herodotus, *Histories* i. 138) and as accompanied by outbursts of rage when caused (Azariah) or cured (Naaman), as also of its equally sudden cure (Miriam) and its response to faith-healing methods (Naaman; cf Mt 8$^{2-4}$, Lk 17$^{12-19}$).

(*d*) The lawgiver does not refer in detail to true leprosy, being concerned with the recognition of certain states resembling or portending this disease. The seven days' confinement, therefore, is not a period of isolation or quarantine to check contagion, although the Babylonians understood the principle of isolation (Finet, in the *Annuaire de l'Institut de Philologie et d'Histoire Orientales et Slaves* xiv, 127–129), but a postponement to enable the priest to watch its progress, even if far too short, since leprosy may take from five to fifteen years to declare itself. The period, however, can be repeated (13^{5}), presumably as often as necessary if the diagnosis is uncertain; even so, its shortness effectively precludes true leprosy. Only when the disease is clearly identified is the sufferer banished from human society (13$^{45-46}$). The reason for this exclusion is certainly not fear of contagion; for the text says nothing of such a risk, the disease is treated as non-infectious in the Talmud, and it is in fact contagious only in certain circumstances, while many authorities consider that children are more susceptible to it than adults. The real reason is undoubtedly religious or ceremonial, as the expulsion of all 'lepers' from the holy camp in the wilderness is joined with that of others suffering from sexual pollution and contact with a corpse shows (Nu 5$^{2-4}$). Nothing unseemly or impure may approach what is holy. So the Hebrews normally spoke of cleansing 'lepers' as though ceremonially or morally unclean, and the cure of 'leprosy' is described as healing only twice in the Bible (Lv 14^{3}, Lk 17^{15}); it was thought as often as not to be a punishment for sin and so needed to be cleansed, and it was considered incurable except by Divine intervention (2 K 5^{7}; cf Mt 8$^{2-4}$, Lk 17$^{12-19}$).

IV. The scaly nature of many affections of the skin explains what is meant by *ṣāraʿath* in garments of linen or wool, on stone or in wood. The former is probably a fungus, mildew or mould, such as is likely to grow on garments worn for a long time in a hot climate unwashed, as they often are in the East, whether due to a specific parasite or not. If after a week's seclusion the spot spreads, the garment must be destroyed. If it has not spread, the garment must be washed and then secluded for another week; it must then be burnt if the spot is unchanged but must be washed and then may be used again if the spot, which must be torn out and burnt, is fading (Lv 13$^{47-59}$). When reddish or greenish depressed patches appear on an inner wall, the house must be emptied and shut up for seven days. If the patches spread, the stone must be taken out and cast in an unclean place and the plaster scraped; if they do not return, the house may be reused but, if they do return, it must be destroyed (Lv 14$^{34-48}$). What is meant is 'the formation of a flocculent mass of calcium nitrate, such as often takes place when the gases set free from decaying animal matter act on the lime of plaster and is sometimes called mural salt. This, with an accompaniment of mould or other hypomycetous fungus, produces an appearance like that described' (Macalister). The fungus, too, of dry rot eats into the woodwork, and sheets of felt-like texture with a greenish-yellow or red surface, half an inch or so thick, are formed between the lath and the plaster, especially in damp structures shut off from the circulation of the air (Creighton). So the Assyrian *sâmānu* 'redness' denotes both a disease of the head, apparently 'ringworm,' and *sal murale* which was prescribed as a drug for itch (Thompson, *Dictionary of Assyrian Chemistry and Geology*, 6–12) and the Arabic *bahaqu* 'leucoderma' means also 'lichen.'

G. R. D. with the help of R. G. C. and H. Go.

LESHEM.—A form, occurring only in Jos 19^{47bis}, of the name **Laish** (see DAN).

LESSAU, 2 Mac 14^{16} (RV).—See DESSAU.

LET.—In Anglo-Saxon *laetan* meant 'to permit' and *lettan* 'to hinder.' In course of time both words were spelled 'let.' Consequently, in AV, besides its modern meaning of 'permit' the verb 'let' sometimes has the opposite meaning of 'hinder.' So in 2 Th 2^{7} (RV, RSV 'restrain'). The other places are Ex 5^{4} (RV 'loose,' RSV 'take away'), Nu 22^{16} (AVm; RV, RSV 'hinder'), Is 43^{13} (RV 'let,' RVm 'reverse,' RSV 'hinder'), Wis 7^{22} (RV 'unhindered,' RSV 'invulnerable'), Ro 1^{13} (RV 'hinder,' RSV 'prevent').

LETHECH, LETHEK.—See WEIGHTS AND MEASURES.

LETTER.—See WRITING.

LETTUS, 1 Es 8^{29} (AV).—See HATTUSH, **2.**

LETUSHIM.—One of the Dedanite tribes in N. Arabia (Gn 25^{3}), the others being **Leummim** and **Asshurim** (q.v.). In this verse LXX adds two other tribes; but in the parallel passage, 1 Ch 1^{32}, the sons of Dedan are omitted altogether both in MT and in most MSS of LXX. None of the three tribes has been identified.

J. F. McC.

LEUMMIM.—A tribe of Dedanites, Gn 25^{3}. See LETUSHIM.

LEVI.—1. The third son of Jacob (Gn 29^{34}). The meaning and origin of the name are unknown. The form is a gentilic noun, and in the story of Levi's birth a popular etymology connected it with the root *lwh*, 'to be joined.' A similar play upon this root occurs in the Priestly account in Nu 18$^{2, 4}$: 'Bring your brethren also, the tribe of Levi . . . that they may *join* you. . . .'

2. The eponymous ancestor of one of the tribes of Israel. According to the Blessing of Jacob (Gn 49$^{5-7}$): 'Simeon and Levi are brothers; Weapons of violence are their swords. . . .' This is a reflection of the story in Gn 34 in which Simeon and Levi took revenge on Shechem son of Hamor for the seduction of their sister. The story is probably a personalized account of ancient tribal history in which these two secular tribes had violated an alliance with the Shechemites in a particularly violent manner. The Blessing of Jacob reflects the lack of sympathy of the other tribes for their kinsmen's unnatural act.

3. An Israelite tribe (Dt 18^{1} etc.), priestly in character. How the ancient secular tribe became a priestly one is completely unknown. As a priestly tribe they had no separate territory but were scattered throughout Israel. This may have been concerned in the episode related under 2 above (cf Gn 49^{7}). For Levi as a priestly tribe see PRIESTS AND LEVITES and TRIBES OF ISRAEL.

4. Another name for the apostle **Matthew** (q.v.).

5. Two ancestors of Jesus, one the son of Melchi (Lk 3^{24}), and the other the son of Symeon (vv.^{29f}).

6. 1 Es 9^{14}; see LEVIS. J. A. C.—J. W. W.

LEVIATHAN.—The Hebrew *liwyāthān*, variously translated in the oldest versions *drakōn* (LXX, Theodotion) and *mega kētos* (LXX), when not transliterated, or *draco* and *leviathan* (Vulgate), comes from the √*LWY* 'coiled, twisted, wreathed' (cf Akkadian *lawû* 'to surround,' *limītu* 'circuit' and *la'ûtānu* 'escort,' Hebrew *liwyāh* 'chaplet,' Arabic *talawwa* 'coiled itself up' and *liyatu* 'snake'); and this root determines its meaning. I. When it is described as 'a slippery serpent, a writhing

serpent' (Is 27^{1}), and as having many heads (Ps 74^{14}), as it also is in a text from Ugarit (see RÂs SHAMRA), where its heads are said to be seven (B I* i. 1–3, 28–30), only a serpent, albeit a mythical one like the Lernaean hydra of Greek mythology, can be meant. II. Leviathan 'which thou didst form to sport in it,' *sc.* the sea, or as it has been (by Eissfeldt) rendered, 'whom Thou hast made to joust with him,' *sc.* the sea-monster (Ps 104^{25-26}) is probably not a serpent but a dolphin or whale; for the whale, as the name suggests, lives in the sea, is notably gregarious and continues to accompany its young even when grown up. It is also probably the dolphin or whale in the famous poem (Job 41^{1-8}) in which God asks Job whether he can catch him with a hook in his nose or barbs in his skin, play with him as a bird, whether it begs itself off when captured with an almost human voice or enters the service of man (as the dolphin does according to Pliny) or whether fishermen take shares in him (as the tunny-fishers do in the tunnies which they take). Lastly, the most potent binders of spells are those who can call up Leviathan, *i.e.* the whale, or other sea-monster (as the word must be read) to do their bidding (Job 3^{8}; AV 'their mourning,' instead of Leviathan, goes back to the Targum through rabbinical sources). The Apocalyptic and Rabbinic writers gave full scope to their imagination in describing this and other mythical or semi-mythical monsters (see BEHEMOTH): Leviathan was created with Behemoth on the fifth day, and the depths of the sea were assigned to him as his abode; God plays with him during the last quarter of each day; the Jordan empties itself into his mouth; his flesh will be food for the righteous at the Messianic banquet; part of his skin will be made into a tent for them and the rest will be spread on the walls of Jerusalem while its brightness will be visible to the ends of the earth (1 En 60^{7-9}, 2 Es 6^{49}, Apoc. Bar 29^{4}; B. Talmud, *Aboda Zara*, 3b, and *Baba Bathra*, 74b–75b; Targum on Ca 8^{2} and Est 2^{37}). J. T.—G. R. D.

LEVIS (AV, RV; RSV '**Levi**').—This is taken in 1 Es 9^{14} as a proper name; in Ezr 10^{15} 'Shabbethai the Levite' stands in place of 'Levis and Sabbateus.'

LEVITES.—See LEVI, and PRIESTS AND LEVITES.

LEVITICAL CITIES.—See PRIESTS AND LEVITES.

LEVITICUS.—The third book of the *Torah*, the first division of the Hebrew canon. Its title is derived from the name 'the Levitical book,' which was prefixed to it in the LXX, despite the fact that it nowhere refers to the special functions of the Levites. The title given to it in the Talmud, 'Law of the priests,' better indicates its scope, for it consists almost entirely of legislation; and the purpose of such narrative as it contains (8^{1}–10^{7}) is less to describe what once happened than to prescribe what is to be done in the future. Moreover, the legislation, except for that in chs. 18–20, 22 f, 25, has to do with the priesthood, the one living institution which persisted in Israel from its formation as a nation until the destruction of the Temple. It persisted because the praxis which regulated its services received the constant modification it required to meet the nation's changing circumstances. The unification of the diverse customs of different sanctuaries to form the code of the post-exilic Temple in Jerusalem—the process which is reflected in Leviticus—was an important aspect of this modification.

To discern the structure of the book one must begin with ch. 8. This describes the **consecration of Aaron** and his sons, and so records the fulfilment of the instructions given in Ex 29^{1-35} 40^{12-15}. It is thus part of the expansion of Ex 25–29 which is now contained in Ex 35–40. To this also belongs ch. 9, recounting the sacrifices offered at the inauguration of the sacrificial system. 10^{1-7}, the story of Nadab and Abihu offering 'unholy fire' before the Lord—quite unrelated to its context—seems to be an appendix to this narrative. It may represent an attempt to provide theological justification for the exclusion from the service of the Temple of certain priesthoods claiming descent from Nadab and Abihu, despite the statement in Nu 3^{4} that they had no children. On 10^{18-20} see below.

It is probable that the law of the **Day of Atonement** (16^{2ff}) once followed immediately upon the story of Nadab and Abihu in ch. 10. When it was separated from this by the insertion of the material in chs. 11–15, v.^{1} was prefixed to it to resume the connexion. The chapter gives rise to a number of problems. The ritual prescribed, especially in vv.$^{7-10, 15-28}$, is undoubtedly ancient, and yet in the surviving pre-exilic codes there is no reference to the observance, though there may be an echo of it in Ezk 46^{18-20}. Furthermore, in the account of the promulgation of Ezra's code (Neh 8) it is completely ignored: the feast of Tabernacles (which, according to Lv 23^{33} was to be kept on the fifteenth day of the seventh month) follows immediately on New Year's Day, on the second day of the seventh month. If Ezra's law book was, as seems likely, based upon the customs of the Jerusalem Temple for which authentication was claimed by the representation that they had been divinely prescribed to Moses at Sinai, the inference to be drawn is that the Day of Atonement was a feature in the observance of some other sanctuary than Jerusalem (possibly on New Year's Day; see below, on 25^{9}), and that it was not given a place in the Jerusalem calendar until some time after the promulgation of Ezra's code—and indeed later than the writing of the account of its promulgation now contained in Neh 8. If so, its acceptance in Jerusalem was one of the concessions which had to be made to secure recognition of the Temple as the sole cult centre of Yahwism. It was prescribed for the tenth day of the seventh month (16^{29})—ten days after New Year's Day—and Tabernacles was moved to the fifteenth day. If this reconstruction is valid, then it is likely that 16^{2ff} was added to the narrative of the erection of the Tabernacle, the consecration of Aaron and his sons and the inauguration of the sacrificial system, immediately after ch. 9, from which it was separated, first, by the intrusion of the story of Nadab and Abihu, and then by the laws in chs. 11–15. It is to be noted that in the account of the inauguration of the sacrificial system in ch. 9 nothing is said of Aaron going into the most holy place within the veil; nor is there any indication in the material in Ex 25–31, 35–40 as to when or in what manner the most holy place was to be entered. It is accordingly not unlikely that underlying ch. 16 is a set of directions for the consecration of the most holy place—which may well have followed upon Ex 29^{37}—and possibly an account of the fulfilment of these directions, and that this material was fused with the regulations for the Day of Atonement when these were added to the narrative.

It is probable that ch. 24 was also part of the framework. Vv.$^{1-4}$, commanding the provision of oil for the ever-burning light in the sanctuary, and vv.$^{5-9}$, giving directions regarding the **bread of the Presence**, are clearly out of context. The former law is found also in Ex 27^{20f}, where it is again out of place, for in its mention of Aaron and his sons as the ministers of the light it anticipates their designation as the priests of Yahweh in Ex 28^{1}. On the other hand, Ex 39^{37} assumes that oil for the light had already been prepared, and so that any directions for its preparation had been given previously. Ex 39^{37}, however, is part of the supplement (chs. 35–40) to Ex 25–29. The inference to be drawn from all this is that neither in Ex 25–29 nor in the supplement (Ex 35–40, Lv 8–9) were there originally any directions for the preparation of the oil, and so that Lv 24^{1-4} is later than the supplement, and that it was added to it at the end of ch. 9, from which it was subsequently separated by the intrusion of chs. 10 and 16. The directions regarding the bread of the Presence (vv.$^{5-9}$)—referred to without explanation in Ex 25^{30}—are, it may be assumed, from the same hand as vv.$^{1-4}$ (Ex 27^{10f} will thus be an addition by some scribe who noticed that the directions were required by 39^{37}, but who did not remove them from Lv 24. He seems, however, to have overlooked the mention of the bread of the Presence in

Ex 39[36] 40[23]). If 24[1-9] belongs to the framework of the book, then it may be assumed that the following narrative, telling of the execution of a man who committed blasphemy (vv.[10-13, 23]), is also part of it. Into it has been inserted a group of laws (vv.[15-22]) against blasphemy and against injury to men and cattle.

The two dominant themes of Ex 25–29, 35–40, Lv 8–9 are the Tabernacle and the Aaronite priesthood. This material, together with 10[1-7] and chs. 16 and 24, is the framework into which have been fitted the other laws in the book: (*a*) Chs. 1–7. These laws were placed between the account of the Tabernacle being set up (Ex 40) and that of the consecration of the priests (Lv 8), presumably because it was thought suitable that the laws which regulated the sacrifices to be offered by the priests should precede ch. 9 which recounts the inauguration of the sacrificial system. Ch. 1 lays down the ritual precedure to be followed when a man 'brings a burnt offering from the herd' (vv.[3-9]), or 'from the flock' (vv.[10-13]), or 'of birds' (vv.[14-17]). The original continuation of this is to be found in ch. 3 (as is indicated by a comparison of 12[f] with 31, which reads in Hebrew 'if his offering . . .'), which deals with peace offerings, 'from the herd' (vv.[1-5]) and 'from the flock' (vv.[6-17]). In these chapters the references to the sons of Aaron are obviously secondary, a fact which indicates that the laws are earlier than those regarding the Aaronite priesthood in their present framework. A further fact to be noted is that the sanctuary is referred to throughout not as the Tabernacle but as the tent of meeting. This is the designation, in the earlier (JE) history, of the tent pitched outside the camp at which the people 'sought the Lord' (=consulted the oracle), and where 'the Lord used to speak to Moses face to face' (Ex 33[7-11]; cf Nu 11[16, 24ff] 12[4]). There is no suggestion in JE that it was the centre of an organized cult. In Ex 25–29, 35–40, on the other hand, 'tent of meeting' designates the tent-like structure within the court of the Tabernacle, and in particular that part of it without the veil (*e.g.* 28[43] 29[4, 42] 40[26]) The usage however is not consistent, and this possibly suggests that underlying Ex 25–29, 35–40 there may be an earlier account of the cult in the wilderness which represented the older, simpler 'tent of meeting' as the place of sacrifice, and that the detailed description of the sanctuary in Ex 25–29 is an elaboration of this. If this is the case, then the use of the 'tent of meeting' in chs. 1 and 3 may indicate that the code from which they were taken had already been worked over to give it a desert provenance before the material was placed in its present context by the compiler of Leviticus, who is, it may be taken for granted, responsible for the insertion of the references to the sons of Aaron.

The intrusive position of ch. 2 between chs. 1 and 3, and the difference in the introductory formulae ('when' in ch. 2, 'if' in chs. 1 and 3) indicate that the laws regulating cereal offerings have been derived from another code than those of the burnt offerings and the peace offerings. Furthermore, the fact that in 2[1-3] the third person is used and vv.[4ff] the second person suggests that the laws in the collection are of different dates. A comparison of v.[2] with v.[8] indicates that in v.[2] the reference to 'Aaron's sons the priests' is secondary, and this suggests either that vv.[3, 10] are an addition, or that 'Aaron and his sons' is a substitution for 'the priest.'

Ch. 4 lays down the ritual procedure in connexion with sin-offerings. In the first two sections, dealing with the sin-offering of the anointed priest and of the whole congregation of Israel, the reference is to the 'tent of meeting' (vv.[4, 7, 14, 18]), a fact which suggests that they are related to if not derived from the same code as chs. 1 and 3; but in the sections dealing with the ruler and with 'any one of the common people' neither tent of meeting nor Tabernacle is mentioned, indicating that the material in vv.[22-32] is from another date, if not indeed from another code, than that in vv.[3-21]. Furthermore, a comparison of the laws in the first two sections with similar laws elsewhere reveals certain significant differences. Thus the sin offering for the congregation is a young bull here (v.[14]) but a goat in 9[15] (cf Nu 15[24]); and the sin-offering of the anointed priest (vv.[3-12]) is more elaborate than that of the high priest in 9[8-11] (cf Ex 29[10-14]). The inference to be drawn is that the older law has been modified by the authors of its present frame-work (to which ch. 9 belongs) to meet changing circumstances.

Ch. 5[1] mentions a sin which could not be called unintentional; vv.[2-4], on the other hand, refer to unintentional sins for which a 'guilt-offering' of a lamb or a goat is required (vv.[5f]). V.[1] would thus seem to be from another hand than vv.[2-6], and the fact that the term 'guilt-offering' is used in vv.[5f] instead of 'sin-offering' as in ch. 4 suggests that the respective laws come from different dates or from different codes. Vv.[7-13] permit those who cannot afford an animal to offer a less expensive sacrifice; in these verses ([7, 9, 11, 12]) the term 'sin-offering' is used, and ritual directions, lacking in vv.[2-6], are given. The section would thus seem to be from another code than vv.[2-6], and it is possible that in its original context it prescribed two birds as the normal sin-offering for all, not as a substitute for those who could not afford an animal. Vv.[14-19] mention further unintentional sins for which a 'guilt-offering' is required; they do not seem to belong with vv.[2-6], however, for (*a*) the offering prescribed is a ram (not a lamb or a goat); (*b*) the value of the ram is mentioned (vv.[15, 18]); and (*c*) restitution is demanded (v.[16a]) in addition to the sacrifice. These features rather suggest that the section is derived from the same code as 6[1-7], prescribing the guilt-offering of a ram for robbery and fraud.

Chs. 6[8-18, 24-30] 7[1-18] deal with matters ancillary to the sacrifices, and are especially concerned with dues for the priests. Each of the regulations is introduced by the formula 'this is the law of' (6[9, 24] 7[1, 11]). In this material the 'tent of meeting' is referred to only three times (6[16, 26, 30]); and a comparison of vv.[16] and [26] with 7[6] suggests that these two references may be secondary; while v.[30] seems to be harmonization with ch. 4. These laws would thus seem to be derived from another code than those in chs. 1 and 3. The formula 'this is the law of' appears again in the subscription (7[37f]), which ignores the laws in vv.[22-36]. These are accordingly an addition to the basic material in the section; vv.[22-27] forbid the eating of the fat and the blood, already prohibited, though in less detail in 3[17]. The similarity of the concluding formula (v.[27]) to that in v.[21] suggests that vv.[19-21] and [22-27] are derived from the same source; the law in vv.[19-21] was inserted here as a supplement to the law of the sacrifice of peace-offerings (vv.[11ff]), and with it vv.[22-27]. Vv.[28-34] give the wave breast and the right thigh of the peace-offering to the priest. The subscription to this (vv.[35f]) would suggest that it is taken from a collection listing the dues assigned to the Aaronite priesthood, and that it was placed here by the compiler of the book. Ch. 6[19-23], prescribing the cereal offering to be made by Aaron and his successors on the day of their anointing, separates the law of the cereal offering from that of the sin-offering which are listed together in 7[37]. Its mention here, whatever its origin, is also due in all probability to the compiler of the book, who then added 'of the consecration' to the subscription in 7[37]—though in the wrong place. Ch. 10[12-15] is a law requiring that the portion of the cereal offering reserved for the priests as their due shall be eaten by them in the sanctuary (cf 6[16]), but permitting them to eat the wave breast and the right thigh of the peace offering, referred to in 7[21ff], 'in any clean place.' This is at variance with the command in 6[26] 7[6] that the priests shall eat their part of the sin offering and the guilt offering in the sanctuary; it may reflect the practice of the sanctuary from which the law of peace offerings (7[29ff]) was derived. If so, the compiler of the book reconciled the two customs by attaching this to the story of Nadab and Abihu and implicitly representing it as a modification of the previous commands. Ch. 10[16-20] may likewise reflect the similar

custom of eating the sin offering outside the sanctuary (cf 6^{26} 7^{6}). Ch. 10^{8-11} may well be from the same code.

(*b*) Chs. 11–15. The priests, however, had other functions in the life of the people besides those immediately connected with sacrifice. It was their business to determine on all questions connected with **uncleanness.** Therefore, following the account of the consecration of the priests and the inauguration of the sacrificial system, and preceding the regulations regarding the Day of Atonement (ch. 16), obviously regarded as the culminating duty of the priesthood, there comes a series of regulations bearing on this side of the priestly duties. The rules in ch. 11 on clean and unclean animals (vv.$^{2-23, 41-45}$) appear in a more primitive form in Dt 14^{4-20}. The subscription in vv.^{46f} is similar to 7^{37} in that it begins 'this is the law of.' This may be due to imitation on the part of the compiler; on the other hand it may indicate that the material is derived from the same code as the law of the burnt offering, etc., in chs. 6 f. However that may be, the fact that the subscription ignores the law of defilement from touching unclean animals and all carcases (vv.$^{24-40}$) suggests that this is from another source than vv.$^{2-20, 41-45}$.

Chs. 12 and 15 prescribe the forms for the purification of a woman after childbirth and of any one who 'has a discharge from his body' (15^{2}). In their basis these rules are very old, but the careful detail of derivative uncleanness (cf especially $15^{1-12, 19-27}$) shows where a slow elaboration has been at work. To be noted is the fact that the ceremony of cleansing is in each case to be performed 'at the door of the tent of meeting' (12^{6} $15^{14, 29}$), which suggests that the material has the same immediate background as the code from which chs. 1 and 3 are derived; in 15^{31}, however, the Tabernacle is referred to—indicating that this verse is from the hand of the writer who placed the material in its present framework. Chs. 13 and 14 contain a series of directions for the diagnosis of leprosy (q.v.) in human beings, clothing, leather and houses, and for the method of purification. The primitive character of the prescribed purification ($14^{2-8, 49-53}$), along with the fact that the cleansing of a man is carried out away from the sanctuary, indicates the early origin of the rules. The sacrifices to be offered following the cleansing are prescribed in 14^{10-32}, and here again the mention of the 'tent of meeting' (vv.$^{11, 23}$) is to be noted as an indication of the history of the material.

(*c*) Chs. 17–23, 25–26. These chapters have come to be known as the **Holiness Code** or the Law of Holiness because of the frequent references they contain to (ritual) holiness, both of persons and of things. That they are derived from a collection other than the codes upon which chs. 1–3, 11–15 depend is suggested by the facts that the laws have a much wider scope than those in the preceding chapters, and that they refer in places to matters which have already been dealt with (cf *e.g.* 19^{6-8} with 7^{15-18}; 20^{25} with ch. 11; and 23^{26-32} with ch. 16). It should be noted, however, that in ch. 17 there is no reference to 'holiness'; nor does the proclamation 'I am the Lord (your God),' found repeatedly in chs. 18 ff, occur in it. Moreover, ch. 18 opens with a formal introduction (vv.$^{1-5}$) in which 'I am the Lord' occurs three times, whereas ch. 17 begins simply with 'This is the thing which the Lord has commanded.' The question may accordingly be raised whether in fact ch. 17 is not from another source than chs. 18 ff.

Ch. 17 prescribes that all animals suitable for sacrifice must be slain at the sanctuary (vv.$^{1-6}$), and that such animals when sacrificed must be offered to Yahweh alone (vv.$^{7-9}$). These regulations, presupposing the existence of local sanctuaries throughout the land—for otherwise the killing of an animal for food would have been practically illegal—have been adapted to their present context by the substitution of 'the tent of meeting' for some more general term. Vv.$^{10-14}$, forbidding the eating of blood, are a repetition at greater length of the prohibition in 7^{26f}. Vv.^{15f}, forbidding the eating of the carcase of 'what dies of itself or what is torn of beasts,' repeats Ex 22^{31}.

Ch. 18 is a series of laws on incest (vv.$^{6-18}$) and other sexual offences (vv.$^{19f, 22f}$), with an admonitory introduction (vv.$^{1-5}$) and a conclusion (vv.$^{24-30}$). In the middle of it is a prohibition of Molech worship (v.^{21}), placed here in all probability under the influence of ch. 20 which prescribes the penalty for its infraction together with the penalties for the other offences listed in ch. 18. Ch. 19 contains a group of miscellaneous laws—also with introduction and conclusion—which seems to be arranged in no kind of order. That in vv.$^{6-8}$ repeats 7^{15-18}; vv.^{9ff} are found again in 23^{22} and in Dt $24^{19, 21}$. Vv.$^{11-18}$ contain a series of prohibitions of dishonesty and oppression in their various forms, ending with the command 'you shall love your neighbour as yourself.' V.^{19} prohibits cross-breeding of animals, sowing two kinds of seed in one field, and wearing a garment made of two kinds of stuff (cf Dt 22^{9-11}). Vv.$^{20-22}$ prescribe the sacrifice to be offered by a man who seduces a betrothed slave. Vv.$^{23-25}$ forbid the eating of the first four years' yield of a fruit tree. Vv.$^{26-28}$ prohibit the eating of blood (cf 3^{17} etc.), the practice of augury and witchcraft (cf Dt 18^{10}), and certain mourning customs (cf 21^{5}, Dt 14^{1}). Vv.$^{29-36}$ forbid a man to make his daughter a harlot, command the keeping of the sabbath, prohibit consultation of mediums and wizards, demand respect for the aged, justice for the sojourner, and just weights and measures. Ch. 20 prescribes the penalties for offences specified in the preceding chapters: vv.$^{2-5}$ for Molech worship (18^{21}); v.^{6} for resorting to mediums and wizards (19^{31}); v.^{9} for cursing one's parents (not previously mentioned in Leviticus, but cf Ex 21^{17}, Dt 27^{16}); vv.$^{10-21}$ for incest and other sexual offences (18^{6-23}). Vv.^{25f} refer to clean and unclean animals, etc., and perhaps suggest that laws like those in ch. 11 once stood in this place in the code. V.^{27} prescribes death for mediums and wizards. Chs. 21–22 deal with priests and offerings. Ch. 21^{1-8} states the ceremonial restraints required of the priests in their daily life. V.^{9} prescribes death by burning for any priest's daughter who becomes a harlot. Vv.$^{10-15}$ duplicate vv.$^{1-8}$—v.^{11} going further than v.^{2} however in that it forbids a priest to touch the dead body of his father or his mother. Ch. 21^{16-24} demands bodily perfection in every officiating priest. Ch 22^{1-16} ordains that sacrificial food may be eaten only by those who are ceremonially clean and who can claim membership in the priestly family. Ch. 22^{17-25} requires sacrificial animals to be perfect. Three minor regulations as to sacrifices (vv.$^{26-30}$) are followed by another exhortation (vv.$^{31-33}$). The laws in these chapters are presumably based on ancient custom but the original prescriptions have undoubtedly been added to and adapted to meet changing circumstances; *e.g.* the list of possible disabilities in 21^{18-20} bears the marks of such elaboration, as does 21^{4b-8}.

Ch. 23 is a calendar of the appointed **feasts** of the Lord. A comparison of v.^{2} with v.^{4}, and the wording of v.^{38} suggest that vv.^{2f}, commanding the observance of the sabbath, have been added to the original list. Vv.$^{5-8}$ command the observance of the Passover on the fourteenth day of the first month, and the Feast of Unleavened Bread for seven days beginning with the fifteenth day of the first month. The structure of the law and a comparison of it with Ex 23^{15} 34^{18}, in neither of which is there any reference to Passover (contrast Dt 16^{1ff}), suggests that the mention of it here is secondary. Vv.$^{9-14}$ contain the regulations for the offering of firstfruits, no date being prescribed (cf Dt 26^{1-11}); in the present context the implication is that this is part of the observance of Passover-Unleavened Bread. Vv.$^{15-20}$ deal with the offerings to be made seven weeks after the offering of the firstfruits, on what is referred to in Ex 34^{22}, Dt 16^{9f} as the Feast of Weeks. (Ex 23^{16} is ambiguous; it refers to the firstfruits, and so is associated with Unleavened Bread, but at the same time it seems to be referring to another feast.) The material in vv.$^{10-20}$

may have been derived from another source than vv.4, 6–8, and have displaced the explicit mention of the Feast of Weeks in that source, to which v.21 also belongs. V.22 (cf 19f, Dt 24[21]) appears to have been attracted here by the reference to (the implied seven weeks of) harvest in vv.10, 15f. Vv.24–36 prescribe the observance of the three feasts of the seventh month (the first month of the ecclesiastical year): on the first day, the Feast of Trumpets (all that was left, apparently, of the great New Year's Day festival in pre-exilic Jerusalem); on the tenth, the Day of Atonement (cf ch. 16); and, beginning on the fifteenth day and lasting for seven days thereafter, the Feast of Booths (cf Ex 23[16b], Dt 16[13ff]). Vv.37f form the conclusion of the calendar. Vv.39–43 contain further instructions regarding the Feast of Booths and may be derived from another code than vv.24–36.

Reasons have already been advanced for holding that the material in ch. 24 once followed immediately on ch. 16, being part of the framework of the book. When he inserted the 'holiness' material (chs. 17, 18–23, 25 f) the compiler broke its continuity by placing chs. 25 f after the conclusion of the framework, for the reason, it may be assumed, that the laws regarding the sabbatical year and the year of jubilee were to be applicable only after the people had settled in the land (25[2]). The basic material on the sabbatical year would seem to be vv.3–7, with vv.19–22 as a supplement; that on the year of jubilee, vv.8–13, 23, vv.14–17 and 24–25 being supplementary, probably from a number of different hands. Vv.19–22 were separated from vv.3–7 in order to make the regulations contained in them apply to the year of jubilee as well as to the sabbatical year. This at once raises the question whether the sabbatical year and the jubilee were not ultimately derived from different codes. To be noted in this connexion is the fact that according to v.9 the year of jubilee began on the tenth day of the seventh month—that is, the Day of Atonement by 23[16] (16[29]). This suggests the possibility that at one time the Day of Atonement may have coincided with New Year's Day. Vv.25–27 contain a law regarding the right of redemption of alienated land, which is related to the jubilee legislation by v.28. Vv.29, 30a deal with the right of redemption of a house in a walled city, which, unlike houses in unwalled villages (v.31), does not come under the jubilee provisions (v.30b), except the houses of the Levites in their cities (vv.32–34). Vv.35–38 forbid the exaction of interest. Vv.39–46 extend the jubilee provisions from land to persons by ordering that an Israelite—but not a sojourner—who had sold himself into slavery should serve only 'until the year of the jubilee.' It is impossible to decide what the relation of this provision is to that in Dt 15[12–18], ordering that a Hebrew slave should be released at the end of seven years' service; it may be a modification of it because the latter had proved impracticable, or it may be an earlier custom which Deuteronomy was trying to liberalize, whether successfully or unsuccessfully. Vv.47–55 demand that an Israelite who has sold himself to a sojourner shall have the same rights of redemption as he would have from an Israelite master.

Ch. 26, apart from two fragments, of which v.1 is parallel to 19[4] and v.2 identical with 19[30], contains the hortatory conclusion (vv.3–45) which the compiler of chs. 18–23, 25 appended to his collection. It closes with the subscription (v.46) which the editor of Leviticus added when he inserted the collection in its present position.

While the incidence of the characteristic formula 'I am the Lord (your God)' in chs. 18–23, 35 is lacking in regularity, there is nevertheless a pattern in its occurrence which would seem to warrant the assumption that (allowing for occasional additions) the material was derived from a single existing code. For although the formula does not occur in the detailed laws against incest and other sexual offences (18[7–12, 22f]), nor in the register of penalties for their infraction (20[6–20]), nor in the calendar of appointed feasts (ch. 23; v.22 is an isolated intrusion), in each case it is found in a subscription (18[24–30] 20[22–26] 23[43]), and this would seem to indicate that even if, as seems likely, the material was earlier derived from another collection of laws, it was a part of the Holiness code as that lay before the compiler of Leviticus. It is evident, however, that chs. 18–23, 25 did not comprise the whole of the code; they contain a selection from it—those laws which the compiler decided must be included, both because of their intrinsic worth and because without them his code would not be accepted by the priesthood from which the Holiness code derived. And it may be assumed that the same principle governed the selection of the other laws in the book—and in the book of Numbers. It has been suggested by some scholars that other laws in the Pentateuch have been derived from the same collection as those in chs. 18–23, 35: *e.g.* Ex 31[13, 14a], Lv 11[1–23, 41–47], Nu 15[37–41]. This may be the case, for the compiler of Leviticus was in all probability responsible for the final form of the post-exilic material in Exodus and Numbers, and he may well have felt that these laws would fit better in their present contexts than in Leviticus. Nevertheless, undue significance must not be attributed to the appearance of the formulae 'I am the Lord,' 'I am the Lord who sanctify you,' since once some laws had been thus countersigned, there would be a natural tendency to attach the formulae to others.

Ch. 27 contains a number of rules on the commutation of **vows and tithes.** Following 26[46], it is clearly a supplement.

Compiled as it is from a number of earlier codes, the book of Leviticus reflects the process by which the uses, customs, and laws of the various sanctuaries throughout the land were gradually adapted and fused into one system, to be the law of the Jerusalem Temple in post-exilic times. And it shows, particularly in the Holiness code, that the interest of the priests was not limited to matters connected with the cult; they were concerned with human relationships, complex and varied even within the comparatively simple structure of an agricultural society, and saw that the holiness of God demands that 'you shall love your neighbour as yourself' (19[18])—and 'neighbour' included the sojourner (19[34]). C. A. Si.

LEVY.—See SOLOMON, 6.

LEWD.—In the AV 'lewd' does not always mean 'lustful,' as it does now. That meaning, indeed, is not found in the Apocrypha or NT. There the meaning is simply 'wicked,' as Ac 17[5] 'certain lewd fellows of the baser sort'; RSV, 'some wicked fellows of the rabble.' So 'lewdness' is usually simply 'wickedness.'

LIBANUS.—The Greek form of the Hebrew name **Lebanon** (q.v.), 1 Es 4[48] 5[55], 2 Es 15[20], Jth 17, Sir 24[13] 50[12].

LIBATION.—See SACRIFICE, **11.**

LIBERTINES.—See FREEDMEN.

LIBERTY.—Although the Bible does not engage directly in the historic debate on the freedom of the will, a clear, consistent, and even sophisticated position may be detected between its lines. Its tacit assumption, from Adam's fall to Judas' betrayal, is the freedom of human beings as responsible, purposive agents, capable of decision and choice: 'Choose this day whom you will serve' (Jos 24[15]; cf 1 K 18[21]). Most of the parables of Jesus dramatize the Deuteronomic exhortation, 'Therefore choose life' (Dt 30[19]). Indeed, most of the Bible's key words are verbs which become meaningless the moment free will is denied: love, repent, forgive, judge, thank, rejoice, betray, obey.

Some interpreters, in the interest of theological doctrines like predestination, original sin, or irresistible grace, have feared that to grant human freedom would contravene the sovereignty of God. These interpreters appeal to passages in which God actually overrides human freedom, as when he hardens Pharaoh's heart (Ex 9[12] 10[20, 27] 11[10]), or puts a lying spirit in the mouth of the false prophets (1 K 22[23]). These citations, however, instead of contradicting the belief in human freedom,

support it. Pharaoh and the false prophets were deprived of their *normal* capacity for free choice, presumably for having overtaxed God's patience. Before God intervened, Pharaoh had already hardened his own heart three times (Ex 8$^{15, 32}$ 9^{34}). The principal significance of these passages is to establish that the same God who gave men the gift of freedom can also, under sufficient provocation, revoke it (cf Is 6^{9f}, Ro 1^{24}).

In the Bible, human freedom is contrasted, not with necessity, but with bondage. Only beings who are by nature free can suffer bondage. Animals cannot become slaves. Possessing the innate capacity for freedom, man may fall into physical serfdom, or, more subtly, into spiritual servitude. The latter, or 'bondage unto sin' (cf Jn 8^{34}, Ro 6^{17} 7$^{14-25}$ 8^{15}, Gal 4^{9}), occurs whenever men try to order their lives without reference to God. They transfer their trust to some false god, which, having demanded their freedom as collateral, promptly forecloses. Whatever potential freedom they retain is like that of a man in prison. It only increases their frustration. 'Formerly, when you did not know God, you were in bondage to beings that by nature are no gods' (Gal 4^{8}). Victims of these false gods become in turn a part of the conspiracy against human freedom. They are likened to hucksters who 'promise . . . freedom, but are themselves slaves of corruption' (2 P 2^{19}).

Where false gods enslave men, the mark of the true God is to liberate (Is 61^{1}). The Lord delivered his people 'out of the house of bondage,' not only physically, but spiritually as well, by inviting Israel to 'walk in his ways.' The 'ways of the Lord' are the 'law of liberty' (Ja 1^{25}; cf Ps 119^{45}). The NT word 'ransom' (Mt 22^{28}, 1 Ti 2^{6}) likewise suggests the price paid to free a bond-servant. The Christian is set free from bondage to dumb idols (Hab 2^{18}, 1 Co 12^{2}), and incorporated into the 'glorious liberty of the children of God' (Ro 8^{21}; cf Jn 8$^{32-36}$, Gal 5^{1}). This liberty, however, differs significantly from the ordinary definition. It is customary to correlate freedom with independence, so that the maximum of freedom requires the maximum of self-sufficiency. For the Bible, however, the reverse is true. The way to preserve and enhance human freedom is to love and be loved. Men do not achieve this kind of liberation simply by taking thought. Rather, their deliverance is the work of God Himself who, through His Holy Spirit, knits them into a redemptive community (cf Ro 5^{5}). This experience, contradicting the definition of freedom as splendid isolation, leads the Christian to exclaim: 'Where the Spirit of the Lord is, there is freedom' (2 Co 3^{17}). E. L. C.

LIBNAH.—1. An unidentified station in the desert wanderings, Nu 33^{20f}. **2.** A Canaanite city taken by Joshua after Makkedah and before Lachish (Jos 10^{23} etc.), named between Arad and Adullam (13^{15}), and between Makkedah and Ether in the lowland (15^{42}). It was given to the Levites (21^{13}, 1 Ch 6^{57}). Taking advantage of an Edomite revolt, it rose against Judah under Joram, 2 K 8^{22}, 2 Ch 21^{10}. It was besieged by Sennacherib, 2 K 19^{8}, Is 37^{8}. Hamutal, mother of Jehoahaz and Zedekiah, was a native of Libnah, 2 K 23^{31} 24^{18}, Jer 52^{1}. It is possibly modern *Tell eṣ-Ṣâfī*.

LIBNI.—The eldest son of Gershon, that is to say, the eponym of a principal family of Gershonite Levites, Ex 6^{17}, Nu 3^{18}, 1 Ch 6$^{17, 20}$. In 1 Ch 6^{29}, perhaps owing to some dislocation of the text, the name appears as that of the eponym of a family of Merarites. The patronymic **Libnites** occurs in Nu 3^{21} 26^{58}. Libni is called **Ladan** (AV **Laadan**) in 1 Ch 23^{7ff} 26^{21}; see LADAN, **2.**

LIBRARY.—See WRITING, **5.**

LIBYA, LIBYANS.—The name of a people mentioned in Nah 3^{9}, 2 Ch 12^{3} 16^{8} (in all of which AV, RV have **Lubim**), Dn 11^{43}. The place, Libya, is mentioned in RSV in Ezk 30^{5} (following LXX, where RV, following MT, has **Cub** [AV **Chub**]), Ac 2^{10}. AV 'Libya' in Ezk 30^{5} is an error for Put (RV, RSV). The Libyans were a very ancient people living W. of Egypt, who were subdued by the Egyptians at an early date and long furnished mercenary soldiers to their armies. At length they invaded Egypt, subdued it in the 10th cent. B.C., and established a powerful dynasty, of which the Biblical Shishak was the founder. Perhaps *Lubim* should be read for **Ludim** (*q.v.*) in certain passages. Cf LEHABIM.

J. F. McC.—H. H. R.

LICE.—Hebrew *kinnîm* is rendered **lice** in AV and RV in Ex 8$^{16-18}$, Ps 105^{31} (RVm **sandflies** or **fleas** at Ex 8^{16}). All the insects named are only too common in Palestine and Egypt. The three well-known varieties of *pediculi* or lice are perpetually prevalent among the dirty, and a plague of them would certainly be much more terrible than one of the harmless, though irritating, 'sandfly' (*Simulium*), and far more disgusting than one of the flea (*Pulex*). RSV in all these passages has **gnat** (*q.v.*). See also PLAGUES OF EGYPT. In Is 51^{6} *kēn* is rendered in AV, RV 'in like manner,' but in RVm, RSV 'like gnats.'

LICENTIOUSNESS.—See LASCIVIOUSNESS.

LICTOR.—See POLICE.

LIDEBIR.—Jos 13^{26} (RVm, RSVm), taken by EV to mean 'belonging to Debir' (see DEBIR, **3**); but we should read **Lo-debar** (*q.v.*).

LIE, LYING.—1. In the OT.—The simple lie, which is a deliberate suppression of the truth in conversation, was condemned by the Levitical code as contrary to the character of holiness demanded by, and becoming to, the people of Israel's holy God (Lv 19^{11f}, cf 6^{2f}). Perjury, as an aggravation of the ordinary sin, was emphatically condemned, and stringently punished in the legislative enactments of Israel (Ex 23^{1}, Dt 19$^{16-20}$). There can be no doubt that the moral consciousness of the Hebrews was alive to the sinfulness of deceit (Pr 19^{22} 21^{28} 24^{28} 25^{18} 30$^{6, 8}$; cf Is 58^{11} AVm). The lying selfishness of Cain, and the reprehensible deception practised by Abraham, are recorded by the historian in a tone which reveals his attitude towards such acts (Gn 4^{9} 20$^{2-16}$ 12$^{11-20}$; cf 2 K 5$^{20-27}$ where Gehazi's punishment is the reward of his thoughtless levity at a time of national gloom, as well as of his deceitful conduct and words). The moral reprobation of falsehood reaches its climax in the utterances of the prophets. According to these teachers, it is at the foundation of all human depravity (Hos 7^{13} 12^{1}, Mic 6^{11f}). **Truth** can be arrived at and spoken only by those who are in personal touch with the sacred Fountain of truth (cf Is 6$^{5-8}$). Indeed, some of the most emphatic declarations as to the moral attributes of Yahweh are based on the belief that He is above all else the God of truth (Nu 23^{19}, 1 S 15^{29}; cf Ps 89^{35}, Ezk 24^{14}, Mal 3^{5f}; see 2 Ti 2^{13}, Tit 1^{2}). Hence the enormity of the guilt of those teachers who had not Yahweh as the source of their inspiration, though they might speak in His name, who pandered to the prevailing moral degeneracy (Jer 5^{31} 6^{13} 29^{9}, Ezk 13^{6}; cf Wis 14^{28ff} etc.), or who encouraged their hearers in idolatry with its debasing ritual (Jer 16^{19}, Jon 2^{8}; cf Ps 31^{6}).

A curious phenomenon in the OT is the bold speculation which sought to explain the authorship of the lying instruction by which Yahweh's enemies were seduced to their own destruction. The fatuity of Ahab's conduct, and its fatal consequences, are detailed in the light of this conception (1 K 22), while a still more unequivocal directness, Samuel is said to have been counselled by God to deceive Saul (1 S 16^{1f}). In both instances the historian is evidently interpreting events by the ideas current in his day.

2. In the NT—Falsehood is here traced back to its source in the principle of evil. Jesus attributes its origin to Satan (Jn 8^{44}; cf Ac 5^{3}, Rev 12^{9}). Membership in the Christian body postulated a new creation 'in true righteousness and holiness' (Eph 4^{24f}), and forbade one member to lie to another (Col 3^{9}).

The denial of the Messiahship of Jesus is characterized by the Johannine author as a lie (1 Jn 2^{22}), while the same writer makes self-deceit the cause of that Pharisaic complacency which he so unsparingly condemns (1 Jn 1^{8ff}). The Pauline representation of paganism bases

its degrading moral influence on the fact that it is founded essentially on a lie (Ro 1^{22}).

The awful fate which awaits 'all liars' (Rev 21^{8}) is the outcome and direct development of the OT judgment of this sin, for it fundamentally estranges the guilty from Him whose 'word is truth' (Jn 17^{17}; cf Rev 21^{27} 22^{15}, and see Ps 51^{6} 24^{4} 119^{160}). Cf also TRUTH.

LIEUTENANT.—See SATRAP.

LIFE.—1. In the OT.—This word is used to translate two main Hebrew expressions: (1) *ḥayyîm*, 'life,' with the related verb 'live' and adjective 'living'; its opposite is death; (2) *nephesh*, the word which is traditionally rendered 'soul.' There is not space for a discussion of this word here (see SOUL), but it might be roughly described as life as a formative and directive force active within and activating the *bāśār*, 'flesh,' of a man or a group. This soul which activates the flesh does not exist alone as a disembodied ghost; the living being, or the centre of life in the living being, is the *nephesh*. It is well translated as 'life' in many passages, *e.g.* Lv 17^{14}: 'The life (*nephesh*) of all flesh (RSV every creature) is the blood of it'; or Ex 21^{23}, 'life (*nephesh*) for life, eye for eye . . .' But there are many places where *nephesh* can hardly be translated by 'life,' while the latter answers almost constantly to Hebrew *ḥayyîm*. Sometimes the two words are brought together in *nephesh ḥayyāh*, 'living *nephesh*.' Adam was made of dust, but when God gave him breath he became living *nephesh*, living being. This is not peculiar to man however, for the animal world is characteristically 'living *nephesh*,' living creature, also (Gn 2^{7} 1^{24}).

We may begin our survey with the concept of the living God and of life as the sphere of God in the OT. This may safely be reckoned to the early foundations of Yahwism (against L. Koehler, *Old Testament Theology*, 1957, pp. 53–54) and 'As Yahweh lives' is perhaps the commonest oath formula in Israel. The active God, intervening in history, is the living God, Jos 3^{10}, and no other god has life as He has, Dt 32^{39ff}. The close attachment of life to Yahweh may be illustrated by contrast by remarking how the realm of death is from early times seen as apart from Yahweh (Ps 88^{4-5} etc.) and all necromancy is abhorrent in Yahwism. Unlike some other Oriental deities who promote fertility and life, Yahweh does not pass through the cycle of death and life. But the living God is the source of life. The breath by which men and animals live, the cessation of which means death, is breathed into their nostrils by God, so that their life depends at each moment on Him (Ps 104^{29}). In the cult the presence of the living God is a source of wonder and awe (Ps 42^{2} 84^{2}).

In the OT life is positively valued. To prefer death to life is abnormal, or is the result of experience which seems to contradict the Israelite understanding of life; that Job should prefer death is the measure of his desperation as a man tormented by God, and Ecclesiastes' sense of the futility of life is at least partly prompted by his knowledge that life is limited by death. But even he knows the typical Israelite belief; 'a living dog is better than a dead lion,' 9^{4}. The pious Israelite will be one who 'desires life and covets many days,' Ps 34^{12}. It is good for a man to die 'old and full of days' like Isaac (Gn 35^{29}) and be gathered to his kindred. Suicide is very rare in the OT. Death correspondingly is lacking in positive content; its realm is shadowy, futile, vain, forgotten; there is no death-romanticism in the OT. But equally man is known to be mortal, and the longing for immortality is not part of Israelite thinking; a man wishes length of days, and content of blessing in them, but not to live for ever. He is excluded from the tree of life which is access to immortality (Gn 3^{22-24}). But unless a man's life is vain and accursed he leaves behind him his name and remembrance in his children and property.

The life of man may be threatened or weakened, and he comes under the influence and dominion of death (frequent in Psalms, *e.g.* 18^{4-6}). We see that 'life' and 'death' are not mere statements of physical fact; life is power or vitality, and may be augmented or diminished. Illness diminishes it, and the man who is healed 'lives' or 'comes to life,' 'revives' as we would say (*e.g.* Jos 5^{8} where 'till they were healed' (RSV) is literally 'till they came alive'). Prayers for life and for delivery from death form an important part of the Psalter. Nevertheless man has a choice to exercise here, for in the covenant ceremonies God asks Israel to choose; He sets before them life and death, good and evil, blessing and curse (Dt 30^{15-20}); to love Yahweh and serve Him means life and length of days.

If Yahweh is the source of life, life also belongs to Him and is not unreservedly at the disposal of men. We have already seen that the blood is, or can be regarded as, the life. Men are permitted to kill animals for food by the Noachic covenant (Gn 9^{1-7}) but the life, *i.e.* the blood, is not consumed by man; it is meant, in all probability, that the life reverts to God. In the sacrificial system this is seen, for there the blood is applied to the altar or other holy places where God is specially present; and the application of blood or life to the altar has a powerful expiating effect (Lv 17^{11}). The shedding of human blood, however, in the Noachic law is subject to Divine inquisition and human retribution, for man is in the image of God. For the taking of human life, therefore, as for certain other offences specially abhorrent to Yahweh, the offender is deprived of life (*e.g.* Nu 35^{33}).

From what has been said it should be evident that a picture of a 'future life' or 'life after death' is not a normal element of the classical Israelite understanding of man. One should not, however, mistake this for a secularism where death is a physical extinction which cannot be challenged and which leaves no trace. Certainly Yahwism by its emphasis on life is hostile to all cult of the dead, and all necromancy, and shows none of the widespread interest in life after death such as we know from Egyptian religion. But several elements exist in Israelite tradition which show that death is not a factual extinction which sets a limit to Yahweh's interest in life. We may mention: old stories of the translation to Yahweh's presence of persons like Enoch and Elijah (Gn 5^{24}, 2 K 2^{11}); miraculous healings or restorations to life by prophets and men of God (*e.g.* 2 K 4^{32-37}); the influence of the constant prayers in the cult for life and delivery from death; and the problem of retribution and reward where either the retribution is concealed (as in the common question of the wicked who flourish) or the evildoing itself is concealed and its extent not yet manifested (*e.g.* Is 26^{21}). Sheol, the shadowy abode of the dead, is not something accepted and recognized in the OT, even in quite early sources (note its absence from all creation stories) but something resisted or deplored at the least. How can the worshipper of Yahweh accept willingly a destiny where he is unremembered and unknown? (cf Ps 16^{9-11}).

Accordingly, in certain mainly rather late passages we have assertions of restoration of life, and of these the most important are the Isaiah Apocalypse (a 4th cent. text?—Is 25^{8} 26^{19-21}) and Dn 12^{2-3}; cf also Is 53^{10}, Hos 13^{14}, Ezk 37. Not all these texts go the same length, and none of them is very precise, certainly not so precise as to mean a universal resurrection of the dead; but they all seem to mean some restoration of life in the face of the power of death. Since life cannot be thought of as disembodied, the restoration is seen as rising of dead bodies, reclothing of dead bones with flesh, and so on. In Dn 12^{2} we have the first and only occurrence of 'everlasting life.' This is not a timeless existence; it is 'life of *'ôlām*,' and *'ôlām* is the remotest time, the time of the first beginnings or the distant future. The contrast here is between continuing life and continuing corruption and abhorrence (cf Is 66^{24}). Daniel's conception is shared with some other works of late Judaism, *e.g.* 1 En 58^{3} 'the elect shall be in the light of eternal life, and the days of their life shall be unending.

2 Mac 7[9, 14, 36] all refer to resurrection to eternal life. We cannot however at this point follow the problem of resurrection as such in later Judaism except in so far as it is needed for the understanding of the term 'life' (see RESURRECTION).

For the more general understanding of 'life' Wis 1–5 has some interesting contributions. God is the author of life, not of death, and does not rejoice at the destruction of sinners; men should not bring destruction on themselves by a misguided life (1[11–15]). The view that life is short and painful, and that there is no healing in the face of death, is a mistaken one, and leads to a reckless life in which the poor and righteous are oppressed; it forgets that man is made for incorruption (ch. 2). The more sceptical view of life as less attractive than death still appears occasionally, following Ecclesiastes (Sir 30[17]).

The Qumrân community also used the term 'life,' and appears to have followed OT usage fairly closely. It is still being discussed how far ideas of resurrection are important for them, but the term 'eternal life' occurs, in wording different from, but probably dependent on, Dn 12[2]—*Zadokite Document*, iii. 20, 'they that hold fast to it (the sure house of the new covenant) are for eternal life.' In the *Manual of Discipline* iv. 6–8 we read how the counsels of the community are 'for healing and abundance of peace in length of days, and fruitfulness of seed, with all blessings of eternity and everlasting joy in eternal life.' This may seem to refer mainly to a future life, and is paralleled by a visitation of punishment on the wicked by fire, darkness, and corruption. We may wonder, however, whether something of this 'eternal life' does not already exist for the community, just as the covenant of its constitution is a 'covenant of eternal community' iii. 11. In the *Hymns* we find 'life' used rather as in the OT Psalms; the worshipper has been threatened by 'the Pit' or 'Sheol,' but his life is delivered by God; he can thank God that he has been put among trees of life. It is reasonable to suppose that something of the life in store is already tasted by the men who know such deliverance.

In Rabbinic Judaism the commonest phrase is 'The life of the world to come,' which can be contrasted with the life of this world.

2. In the NT.—'Life' here translates mainly three words: (1) *zōē*, which corresponds roughly to Hebrew *ḥayyîm*, and is the opposite of death; (2) *bios*, which is not very frequent in NT, and refers mainly to the conduct of everyday life (*e.g.* 2 Ti 2[4], contrasted with a soldier's proper calling), its ambitions and pleasures (Lk 8[14]), property and the means of subsistence (Mk 12[44]); (3) *psychē*, 'soul, life,' corresponding in its ambivalence to Hebrew *nephesh*, and certainly to be translated 'life' in places like Mk 10[45] ('to give his life—or himself—as a ransom') or Mt 2[20] ('to seek the life of' a person). For the NT conception of life the term *zōē* is by far the most important.

A great deal of what the NT says about life is shared with the OT. As in the latter, life is positively valued, and death is the enemy of life; so that when a little girl lies sick and dying, this is not accepted as an easy translation to a better sphere, but the question is how she may be saved and live (Mk 5[23]). On the other hand the only security of life is in God, and it is vain to safeguard life by the accumulation of goods or by worrying about one's needs (Ja 4[13], Lk 12[13–30]); property and anxiety only draw attention away from life itself. Life, then, is the most precious possession; but to seek to hedge one's life or self (*psychē*) with security is to lose it, while to lose it for Christ's sake is to gain (Mk 8[34–38]). This conception of the giving up of precious life is drawn from OT sacrificial conceptions, from the sanctification of the first-born for the increase of holiness and life by depriving them of life, and from the Suffering Servant of Is 53, who 'poured out his soul to death.' Thus a line of thought about life which agrees with the OT is characteristically modified by its fusion with another line of OT thinking.

But the most important influence on NT thinking about life is the resurrection of Christ, and it is this new element which prevents the idea of giving up of life from leading to a life-denying form of thought. God has life in Himself, and has granted the Son to have that same life in Him (Jn 5[26]); and He has come that men should have life. But His mission leads Him to a death which is a struggle with death; and the resurrection shows it to have been a victorious struggle. By it death, which operated through the barriers of sin and law dividing man from God, is defeated and will in the end be destroyed (1 Co 15[20–26, 51–57]). Because Christ is risen in the body, it is possible to see that this new life is one of incorruptibility and immortality, and yet a real life and not a shadowy existence beyond.

Meanwhile there exists for those who are in Christ a double time connexion; for they are incorporated in Him who has already passed from death into the resurrection life, and yet they remain in this present life and await the resurrection. But although an expectation of the future remains, it is already possible to live 'in newness of life' (Ro 6[4]) *because* (and not although) they will share the resurrection. It is in the Johannine literature that this idea of possessing now the true or eternal life is most frequent. 'We have passed out of death into life' (1 Jn 3[14]); Jesus is the resurrection and the life, and immortal life belongs to those who trust in Him (Jn 11[25–26]). Or, in Pauline thought, the real life of the Christians is with the ascended Christ in heaven; it is hidden with Him, and the manifesting of Christ is also the manifestation of their life (Col 3[3–4]). In the Church as ministering, the putting to death of Christ is active, in order that the life of Christ should be made manifest; in the Church as ministered to, this life is active (2 Co 4[10–12]). The Spirit, who is active in the Church, is the Spirit of Life and gives life (Ro 8[2], 2 Co 3[6]); witnessing of Christ in His life below and ascended, He is the Church's contact with Him and the guarantee of the life that is already hers in Him and that is also still to come. J. Ba.

LIGAMENTS.—This word is found only in Col 2[19] in RSV (AV, RV 'bands'). The word means 'the things which bind [the body] together,' *i.e.* the sinews or ligaments.

LIGHT.—In Gn 1[3] light is the first emergence of the creative act; God dwells in it (Ex 24[10]) and is clothed with it (Ps 104[2]). He is the light of Israel (Is 10[17]), and the house of Jacob is called to walk in His light (Is 2[5]). Apocalyptically, the advent of salvation brings light (Is 9[2]) and the Servant of the Lord is a light to the Gentiles (Is 42[6] 49[6]). In later apocalyptic writings, and especially in the Qumrân Scrolls, the good are the sons of Light, the wicked the sons of Darkness (cf The Warfare Scroll particularly). The same duality underlies the NT, especially by the application of OT typology. Jesus is 'the light of the world' (Jn 1[4f, 9] 8[12]). His followers are also 'the light of the world' (Mt 5[14, 16]). On the contrary, a godless life is **darkness** (Jn 3[19] 8[12] 12[46], 1 Jn 2[11]). Apart from this religious usage 'light' is also used in the OT with the physical meaning of morning light (Jg 16[2]), broad daylight (sunshine) (Am 8[9]). But in the NT the only physical light is that of a lamp (AV **candle**) (Mt 5[15]). B. J. R.

LIGHTNING.—The colloquial use of 'fire' for 'lightning' had its counterpart in Hebrew, *e.g.* in such a phrase as 'fire (*'ēsh*) and hail' (Ex 9[23] etc.; cf Gn 19[24], 1 K 18[38] etc.). The Hebrew *'ôr* (Job 37[3]) is literally 'light'; *bāzāḳ* (Ezk 1[14]) should probably read *bārāḳ*; *lappîdh*, literally 'torch,' is used in the plural for 'lightnings' (Ex 20[18]); a word of uncertain meaning, *ḥᵃzîz* (Job 28[26] 38[35], Zec 10[1] [AV here 'bright clouds, RSV 'storm clouds']), is evidently related to **thunder**, and should probably in each case be translated 'thundercloud.' The usual Hebrew word is *bārāḳ*, Greek *astrapē* (2 S 22[15] etc., Mt 24[27] etc.). It is used figuratively for the glitter of bright metal (Dt 32[41], literally 'the lightning of my sword'; cf Ezk 21[10], Nah 3[3], Hab 3[11]), and for the glittering weapon itself (Job 20[25]). It is suggested,

either by the flash of polished metal, or by the speed of the chariot (Nah 2[4]). Lightning is associated with the appearance of God (Ex 19[16] etc.), and He alone can control it (Job 38[35], Ps 18[14]). With lightnings as with arrows, God scatters His enemies (Ps 144[6] etc.). A radiant face (Dn 10[6]), and gleaming garments (Mt 28[3]), are like lightning. There is vivid suggestiveness in the comparison of Satan's overthrow with the descent of lightning (Lk 10[18]). Cf the name *Barak* (Jg 4[6]) with the Carthaginian *Barka*. W. E.

LIGN-ALOES, Nu 24[6] (AV, RV).—See ALOES.

LIGURE.—See JEWELS AND PRECIOUS STONES.

LIKHI.—The eponym of a Manassite family, 1 Ch 7[19].

LIKING.—In older English 'liking' was used for the outward appearance, qualified by good or ill. So Job 39[4] 'Their young ones are in good liking' (AV, RV; RSV 'become strong').

LILITH.—Is 34[14] (AV 'screech owl,' RV 'night monster,' RSV 'night hag'); see OWL. The *Lilith* is mentioned in connexion with the desolation which would haunt Edom. Strange stories are told about *Lilith* by the Rabbis. It was a nocturnal spectre who assumed the form of a beautiful woman in order to beguile and destroy young children. In the Talmud she is associated with the legends of Adam, whose wife she was before Eve was created, and so became the mother of the demons. T. A. M.—H. H. R.

LILY.—The Hebrew word *shûshan* (1 K 7[19]), *shôshannāh* (2 Ch 4[5], Ca 2[1], Hos 14[5]), is probably a loan-word from the Egyptian for the 'lotus.' In Arabic it is *sûsan,* which includes a great number of allied flowers—lilies, irises, gladioli, etc. No doubt the Hebrew word was equally comprehensive. Flowers of this group are very plentiful in Palestine, the irises being pre-eminent for their handsome appearance. The **'lily work'** (1 K 7[19, 22, 26]) is likely to have been modelled after the lotus (*Nymphaea lotus*) itself: lotus-like flowers appear on some Jewish coins. The Greek *krinon* of Mt 6[28], Lk 12[27] probably had as wide a significance as *shûsan,* and included much more than actual lilies. E. W. M. G.

LIME (*śîdh,* LXX *konia*) is mentioned by name in EV only in Is 33[12], Am 2[1]. Is 33[12] 'the peoples shall be as the burnings of lime,' *i.e.* they shall be so utterly consumed as to be comparable to the heap of quicklime that is left after limestone has been burned in a furnace. In Am 2[1] the prophet denounces Moab because they 'burned the bones of the king of Edom into lime'—phosphate of lime being the chief ingredient of the ash of well-burned bones. In Dt 27[2, 4] *śîdh* occurs both as verb and noun, but is rendered **plaster** (AV, RV **plaister**). For Is 27[9] see CHALK-STONES. The **'whited sepulchres'** of Mt 23[27] (AV, RV; RSV 'whitewashed tombs') and the **'whited** (RSV 'whitewashed') **wall** of Ac 23[3] are allusions to the whitewashing of tombs with diluted quicklime so as to render them conspicuous, and of walls for purposes of embellishment. J. C. L.

LIMP.—The Hebrew verb *pāsaḥ* is rendered 'to limp' in RSV in 1 K 18[26] (AV, RV 'leaped'), where it denotes a ritual dance with bent, or contorted, body (see H. H. Rowley, *BJRL* xliii [1960–1961], 204 f). The same verb is similarly rendered in RSV in v.[21] (AV, RV 'halt'), where there may be some allusion to this. In 2 S 4[4] it is used of the gait of Mephibosheth, who was dropped by his nurse in his infancy, and who thereafter became 'crippled' (RSV; AV, RV 'lame').

LINE.—**1.** *Ḳaw,* which is of most frequent occurrence, is properly a measuring line (*e.g.* Jer 31[39], Ezk 47[3], Zec 1[16]). Figuratively it denotes a rule of life (cf 'precept upon precept, line upon line' of Isaiah's teaching, Is 28[10]). In Ps 19[4] 'their line (RSV 'voice') is gone out through all the earth' has been variously interpreted. The LXX, taking the line to be a resonant cord, rendered by *phthongos*—'a musical sound,' and St. Paul quotes that version Ro 10[18] (AV, RV 'sound'; RSV 'voice'). More probably, however, the idea is still that of a measuring line. Cf Perowne (*Psalms, in loc.*), who gives 'line or boundary,'—as the heavens seems to measure and mark out the earth (whence the term horizon or boundary).' **2.** *hebhel,* a rope or cord, especially a measuring cord used in measuring and dividing land (cf Ps 78[55], Am 7[17], Zec 2[1]). 'The lines have fallen for me in pleasant places' (Ps 16[6]) alludes to the marking out of plots of land with a measuring cord. **3.** *tiḳwāh* (from the same root as *ḳaw*) is used of the cord of scarlet thread that Rahab bound in the window (Jos 2[18, 21]). **4.** *ḥûṭ,* properly a sewing-thread, only in 1 K 7[15]. **5.** *pāthîl,* a string or cord, only in Ezk 40[3]. **6.** *śeredh* in Is 44[13] is misrendered 'line' for which RV and RSV give **'pencil,'** RVm 'red ochre.' **7.** In NT 'line' occurs only in AV of 2 Co 10[16]. The Greek word is *kanōn,* a measuring rod (AVm 'rule,' RV 'province,' RVm 'limit,' RSV 'field'), and so, figuratively, a rule. Probably the Apostle's idea is that of a measuring line, as defining the boundary between his own province and another's. J. C. L.

LINEN is cloth made from the prepared fibre of **flax.** In ancient Egypt great proficiency was attained in its manufacture (Pliny, *HN* vii. 56; Strabo, xvii. 41; Herod. ii. 182), and a flourishing trade was carried on (Pr 7[16], Ezk 27[7]). As material of wearing apparel it has always been esteemed in the East. In a hot climate it tends to greater freshness and cleanliness than cotton or wool. The Egyptian priests were obliged to wear linen (Herod. ii. 37; Wilkinson, *Anc. Egyp.* iii, 117). The 'cotton garments' mentioned on the Rosetta stone were probably worn over the linen, and left outside when the priests entered a temple. The embalmed bodies of men and animals were wrapped in strips of linen. No other material was used for this purpose (Wilkinson, *ib.* iii, 115, 116, 484). Perhaps we may trace Egyptian influence in the place given to linen in the hangings, etc., of the Tabernacle, and in the garments of the priests (Ex 25[4] 26[1] etc., 28[15] etc.). It formed part of the usual clothing of royalty, and of the wealthy classes Gn 41[42], Est 8[15], Lk 16[19]). It is the dress worn by persons engaged in religious service. The priests are those who 'wear a linen ephod' (1 S 22[18]). The child Samuel in Shiloh (1 S 2[18]), and David, bringing back the Ark (2 S 6[14] etc.), also wear the linen ephod; cf Ezk 9[2] 10[2], Dn 10[5]. It formed the garment of the Levite singers (2 Ch 5[12]). It was the fitting raiment of the Lamb's wife, 'the righteousness of the saints' (Rev 19[8]); presumptuously assumed by 'the great city Babylon' (18[16]); in it are also arrayed 'the armies that are in heaven' (19[14]).

No clear and uniform distinction can be drawn between several Hebrew words translated 'linen.' *badh* appears to be always used of garments (Gn 41[42] etc.), while *shēsh* may perhaps mean the thread, as in the phrase '*badh* of fine twined *shēsh*' (Ex 39[28]), the cloth made from it (Ex 25[4] 26[1], Ezk 27[7] etc.), and also garments (Ex 28[5] etc.). We cannot, indeed, be certain that 'linen' is always intended (Guthe, *Bib. Wörterbuch, s.v.*). The modern Arabic *shash* means 'cotton gauze.' *būṣ* is a word of Aramaean origin, occurring only in later books (Ezk 27[16], 1 Ch 4[21], Est 1[6]), whence comes the Greek *byssos,* which covered both *badh* and *shēsh* (Jos. *Ant.* III. vi. 1 f [103, 110]). By later writers it was taken to represent cotton (Liddell and Scott[8], *s.v.*). *pishtîm* is a general term, denoting the flax, or anything made from it (Jos 2[6], Jg 15[14], Jer 13[1] etc.). *Sādhîn* was a sheet in which the whole body might be wrapped (Jg 14[12f], Pr 31[24] etc.). It probably corresponded to the *sindōn* **'linen cloth'** of Mk 14[51], and the **shroud** of Mt 27[59] etc. *'ēṭûn* (Pr 7[16]) is probably fine Egyptian thread, with which cloths and hangings were ornamented. *Othonē* (Ac 10[11]) is a large sheet: *othonia* (Jn 19[40] etc.) are strips for bandages. *Ōmolinon* (Sir 40[4]) was cloth of unbleached flax. *Sha'atnēz* (Lv 19[19]) was probably cloth composed of linen and cotton.

Linen yarn (1 K 10[28], 2 Ch 1[16] [AV], Hebrew *miḳweh*) should almost certainly be rendered with RSV 'from **Kue'** (q.v.). W. E.

LINTEL.—See HOUSE, 6.

LINUS.—One of the Christians at Rome, and presumably a prominent one, from whom St. Paul sends greetings at the end of Second Timothy (4^{21}). The Church tradition identifies him as the first bishop of Rome (after Peter and Paul). The earliest form of the tradition is in Irenaeus (*adv. Haer.* iii. 3. 2, 3): 'The blessed Apostles then, having founded and built up the Church, entrusted the office of bishop to Linus,' and it is repeated in Eusebius and the early Roman episcopal lists, in which the episcopate of Linus is said to have lasted twelve years. The name occurs elsewhere (in Martial and a group of inscriptions), but is not very common, and the tradition may be correct in the sense that Linus was a recognized leader of the Roman Church; but it is an open question whether anything like a monarchical episcopate was established in Rome at so early a date. The chronology is entirely uncertain.

J. L.

LION.—The Hebrew *'aryēh*, *'ᵃrî*, words cognate to which are general terms for any wild beast in the sister languages, is the ordinary word for the 'male lion,' while *lābhî'* is that for a 'lioness' (Is 5^{29}, Ezk 19^{2} etc.); a 'young lion' is *kᵉphîr* (Ezk 19^{3} etc.). Other words are *layish* (used also as a proper name) and as usually explained *shaḥal*. The former is the same word as the Akkadian *nēšu* 'male lion' and the Arabic *laithu* 'lion,' which is perhaps only a descriptive term meaning 'strong' (Arab. *laiyîthu* 'strong'); it is translated 'lion-cub' in most of the ancient versions (LXX and Peshitta at Is 30^{6}, Pr 30^{30}; Targum at Is 30^{6}) occasionally *leo* and even *tigris* (Vulgate at Job 4^{11}). The latter is generally translated 'lion' or 'lioness' (LXX, Vulgate), 'lion' (for which six or seven other names occur) and 'young lion' (Peshitta, Targum), but twice 'panther' (LXX at Hos 5^{14} 13^{7}). The Arabic *saḫḫalatu* '(newly born) lamb, kid; leveret above the age at which the mother leaves it' (cf *saḥala* 'drove away') perhaps justifies taking the Hebrew *shaḥal* as denoting a young beast, *e.g.* a lion-cub; but the context nowhere requires a cub. The word is perhaps rather in origin onomatopoeic (cf Akk. *šaḫālu* 'to emit a sound, to shout' and the Arabic *saḥala* 'made a rolling sound, brayed'), being then a general term for any of the large cats, whether lion (cf Aram. *shaḥlâ* at Ps 17^{12}, Targum), panther (large leopard), or leopard. This last crouches in tall grass or reeds beside a stream with its belly almost touching the ground and its head held down but its eyes kept just above the level of the grass, ready to spring on man or beast who comes to drink. Possibly Job refers to this habit when he says (if the MT's impossible *yigh'eh kashshaḥal* may be corrected to *kᵉshaḥal yigh'eh*) 'like a panther which rises to spring Thou dost hunt me' (Job 10^{16}; cf LXX). Indeed, the root of this verb may have originally been coined to represent the spasmodic raucous sounds emitted by some beasts before springing on the prey (cf Arab. *ja'ja'a* 'cried *ji' ji'*' when driving camels to water and 'breasted the waves'). The Greek *panthēr* includes several spotted cats beside the leopard, which has a different name (see LEOPARD). The leopard (*felis pardus*) is still met, though in small numbers, round the Dead Sea, in Gilead and Bashan, often lurking near watering places ready to pounce on any unwary cattle. The hunting leopard or cheetah (*felis jubata*) was still found in the 19th cent. round Tabor, in the hills of Galilee and in Gilead (Tristram). Two other *felidae*, the spotted lynx (*felis pardina*) and the red lynx (*felis caracal*), are found in Palestine; but whether these are subsumed under one or other of the terms for 'leopard' cannot be said.

Further, the meaning of 'Beersheba' may have been 'lion's well,' if a Hebrew**shebha'*=Arabic *sab'u* 'wild beast, lion' may be postulated; if so, this will be another place-name indicating Arab settlements in S. Palestine. The suggestion has also been made that the Arabic *'asadu* 'lion' in the sense of 'warrior' may lie behind the mysterious *'ēsh dāth* 'fire of law! (in)' *mîmîmô* (*'ēd shāth* corrected to) *'ᵃshādhôth lāmô* 'he has (warriors brave as) lions at his right hand' (Dt 33^{2}, Beeston). Finally *bᵉnê shaḥaṣ* 'sons of pride' (Job 28^{8} 41^{26}) is merely a poetic expression for 'lions' (cf Aram. *šaḥṣâ* 'lion') or other beasts of prey.

Lions, though extinct since the Crusades, must once have been common in Palestine, especially in the thickets of the Jordan (Jer 49^{19} 50^{44}, Zec 11^{3}); they were a source of danger to men (1 K 13$^{24-25}$ 20^{36}, 2 K 17^{25}) and to flocks (1 S 17^{37}, Is 31^{4}, Am 3^{12}, Mic 5^{8}). Their roar was terrifying (Pr 19^{12} 20^{2} etc.) and was compared to the voice of God (Am 3^{8}; cf Jer 25^{10}, Jl 3^{16}). In the OT Judah (Gn 49^{9}; cf Rev 5^{5}) and Israel (Nu 23^{24} 24^{9}) as well as Dan (Dt 33^{22}) are compared to lions; in the NT the lion is typical of Satan (1 P 5^{8}). G. R. D.

LIP.—**1.** Hebrew *śāphāh*, the usual OT word, and of very frequent occurrence. Only rarely are the lips referred to from the point of view of description of physical beauty and charm (Ca 4$^{3, 11}$ 5^{13}). Once they are associated with kissing (Pr 24^{26}), once with drinking (Ca 7^{9}, with which cf Ps 45^{2}), once anthropomorphically (of Y") as the source from which the breath issues (Is 11^{4}); once the protrusion of the lips occurs as a gesture of mocking contempt (Ps 22^{7}, AV, RV 'shoot out the lip'; RSV 'make mouths'). Twice (2 K 19^{28}, Is 37^{29}) we have an allusion to the cruel Assyrian custom of passing a ring through the lips (AV, RV 'my bridle in thy lips'; RSV 'my bit in your mouth') of captives and leading them about with a rope or thong. But in the great majority of cases the lips are referred to as organs of speech (Job 27^{4}, Ps 119^{171}, Pr 15^{7} 24^{2}). Hence, according to the kind of words they utter and the quality of the heart from which the words come, they are described figuratively as uncircumcised (Ex 6$^{12, 30}$), flattering (Ps 12^{2f}), feigned (17^{1}), lying (31^{18}), joyful (63^{5}), crooked (Pr 4^{24}), righteous (16^{13}), wicked (17^{4}), burning (26^{23} AV; RV 'fervent,' RSV 'smooth'), unclean (Is 6^{5}). By an intensification or extension of this figurative use, swords are said to be in the lips (Ps 59^{7} AV, RV; RSV 'snarling with their lips'), the poison of vipers to be under them (140^{3}) or in them a scorching fire (Pr 16^{27}). In Is 57^{18} 'the fruit of the lips'=praise. For Hos 14^{2} see CALVES OF THE LIPS. **2.** Hebrew *śāphām* (Ezk 24$^{17, 22}$, Mic 3^{7}, only in the phrase 'cover the lips'), whose equivalent is 'moustache,' it being the Eastern custom to cover this as a sign of stricken sorrow. **3.** Greek *cheilos* occurs six times in NT, always in quotations from LXX: Mt 15^{8} and Mk 7^{6}=Is 29^{13}; Ro 3^{13}=Ps 140^{3} [139^{4}]; 1 Co 14^{21}=Is 28^{11}; He 13^{15}=Hos 14^{2}; 1 P 3^{10}=Ps 33^{13} [33^{14}].

J. C. L.

LIST.—The Old English verb 'to list' occurs in Mt 17^{12}, Mk 9^{13}, Jn 3^{8}, Ja 3^{4}. It means 'to desire *or* choose.' RSV avoids the word, in this sense.

LITTLE HORN.—In Dn 7$^{8\pi, 20t}$ 8$^{9\pi}$ the expression 'Little Horn' refers to Antiochus Epiphanes (see ANTIOCHUS, 4, and DANIEL, 2), whose persecution of the Jews and whose desecration of the Temple and suspension of the rightful sacrifices led to the Maccabaean rising. For a full discussion of this question (with the examination of other proposed identifications) and of the identification of the other horns of Dn 7, see H. H. Rowley, *Darius the Mede and the Four World Empires in the Book of Daniel*, 2nd ed., 1959, pp. 98 ff, where the identification of the three uprooted horns is particularly discussed.

LITTLE OWL.—See OWL.

LIVELY.—In AV 'lively' sometimes means 'living.' Thus in 1 P 2^{5} Christians are 'lively stones,' while in the previous verse Christ is a 'living stone,' though the Greek word is the same in both verses. The other passages are Ac 7^{38} 'lively oracles' and 1 P 1^{3} 'lively hope.' RSV does not use the word.

LIVER (*kābhēdh*).—**1.** In the great majority of cases where the liver is mentioned, it is in connexion with the law of sacrifice as prescribed in P (Ex 29$^{13, 22}$, Lv 3$^{4, 10, 15}$ etc.), and always in association with the appendage of the liver (AV, RV **caul**; Hebrew *yōthereth*). The

LXX, followed by Josephus (*Ant.* III. ix. 2 [228]), takes *yōthereth* to be a lobe of the liver; but it is now agreed that it denotes the fatty mass at the opening of that organ. According to Semitic ideas, a peculiar holiness belonged to the liver and kidneys (q.v.), together with the fat attached to them; the reason being that they were regarded as the special seats not only of emotion but of life itself. Because of its sacredness the liver with its fat was not to be eaten, but was to be offered in sacrifice to Y". **2.** Pr 7^{23} 'till an arrow pierces its entrails' (*kābhēdh*), La 2^{11} 'my heart (literally liver) is poured out in grief' (cf Job 16^{13} 'he pours out my gall on the ground') are further illustrations of the physiological ideas referred to above. Either they are strong expressions for a deadly disease, or they denote sorrowful emotion of the most poignant kind. **3.** In Ezk 21^{21} the king of Babylon, at the parting of the way, 'looks at the liver' as one of the three forms of divination he employed. **4.** In To 6^{4-16} 8^{2} the liver of a fish is used for the purpose of exorcism. See; further, MAGIC, DIVINATION AND SORCERY. J. C. L.

LIVING CREATURES.—See BEAST, **2.**

LIZARD.—(1) *l'ṭā'āh*, a generic name for lizard (so AV, RV, RSV).

(2) *ṣāḇh* (cf Arab. *ḍabb*) translated AV **tortoise,** RV and RSV **great lizard.**

(3) *'anāḳāh*, translated AV **ferret,** RV and RSV **gecko.**

(4) *kōaḥ*, translated AV **chameleon,** RV and RSV **land crocodile.**

(5) *ḥōmeṭ*, translated AV **snail,** RV and RSV **sand lizard.**

(6) *tinshemeth*, translated AV **mole,** RV and RSV **chameleon** (q.v.). All of these names occur only in Lv 11^{27f} as 'unclean' animals; most of them are uncertain.

(7) *śemāmîth*, Pr 30^{28}, translated AV **spider,** RV and RSV **lizard.** Lizards are ubiquitous and exceedingly plentiful in Palestine, over forty species have been identified. The most common is the green lizard (*Lacerta viridis*). The Palestinian **gecko** (*Ptyodactylus Hasselquistii*) is common in all native houses; it is able to walk up the walls and along the ceilings by means of the disc-like suckers at the ends of its toes. If *śemāmîth* was, as many scholars claim, a lizard, then probably the gecko is the special species indicated. The *ḍabb* is a large lizard (*Uromastix spinipes*), with a long spiny tail. The **sand lizards** or skinks are common on soft, sandy soil; seven species are found in Palestine. The **'land crocodile,'** known to the Arabs as the *warrel*, is a large lizard, sometimes 5 feet long; two species have been found in the Jordan valley—the *Psammosaurus scineus* and the *Monitor niloticus*. The **chameleon** is dealt with in a separate article. E. W. G. M.

LOAF.—See BREAD.

LO-AMMI.—A symbolical name given to Hosea's son (Hos 1^{9}), signifying 'not my people' (so RSV), as **Lo-ruhamah,** the name of his daughter, signifies 'not-pitied.' Opinions are divided as to whether these names are of actual persons used symbolically, or are purely allegorical. See HOSEA.

LOAN.—See DEBT.

LOCK.—See HOUSE, **6.**

LOCUST.—The insect is mentioned frequently in the Bible and was designated by various Hebrew and Greek words:

(1) *'arbeh* (root 'to multiply') occurs more than twenty times; in Jg 6^{5} 7^{12}, Job 39^{20}, Jer 46^{23} it was translated in AV as **grasshoppers** (q.v.); RSV regularly translates as 'locust.'

(2) *ḥāgābh* (translated AV, RV, RSV 'locust' in 2 Ch 7^{13}, elsewhere 'grasshopper'), possibly a small locust or any locust allowed for food: see Lv 11^{22}, Nu 13^{33}, Ec 12^{5}, Is 40^{22}.

(3) *gēbhîm* (plural, 'swarm'), Am 7^{1}, AV 'grasshoppers,' RV, RSV 'locusts,' AVm 'green worms'; *gōbhay*, Nah 3^{17}, AV 'grasshoppers,' RV 'swarms of grasshoppers,' RSV 'locusts'; cf *gēbhîm*, Is 33^{4}, AV, RSV, 'locusts.'

The remaining Hebrew words are very uncertain. (4) *gāzām*, AV **'palmer worm'** (*i.e.* caterpillar), RSV 'cutting locust' and 'locust.' (5) *yeleḳ*, AV 'canker-worm,' RSV 'hopping locust.' (6) *ḥāsîl*, AV **'caterpillar,'** RSV 'destroying locust.' These three (Jl 1^{4} 2^{25} etc.), as the different translations above indicate, may all be stages in the development of the locust, or they may, less probably, be some varieties of grasshoppers. The greater size and ability of the locust to destroy foliage makes it probable that the locust rather than the grasshopper is involved in references to catastrophic events. (7) *ḥargōl*, Lv 11^{22} (mistranslated in AV 'beetle'; RV, RSV **'cricket'**), and (8) *sol'ām*, Lv 11^{22} (translated AV, RV, RSV **'bald locust'**) are also some varieties or stages of locust or grasshopper (it is impossible to be certain of the varieties specified). (9) *s'ēlāṣal*, Dt 28^{42}; the root is uncertain and may imply the strident noise of the *cicada* or cricket, or the shadow or darkness cast by the swarm of locusts; AV, RSV 'locust.'

Various words are used in the LXX to translate the Hebrew; the most common one is *akris* (Jg 6^{5} 7^{12}, Am 7^{1}, Nah 3^{17} etc.), which is also the NT word for 'locust' (Mt 3^{4}, Mk 1^{6}, Rev $9^{3, 7}$).

Locusts and grasshoppers are included in the family *Acrididae*. They are always plentiful in the Near East, but the locusts fortunately do not appear in swarms, except at intervals of years. The most destructive kinds are *Acridium peregrinum* and *Oedipoda migratoria*; they are to be distinguished from the *Cicada septendecim* (the seventeen-year locust or cricket) which is often called 'locust' in the United States. Some characteristics of the locust in the ancient Near East can be recognized by a study of the OT references to them. When they arrive in their countless millions, they darken the sky (Ex 10^{15}). The poetical description in Jl 2^{1-11} is full of faithful touches; particularly the extraordinary noise they make (v.^{5}) when they are all feeding together. Their voracious onslaught is referred to in Is 33^{4}, and their sudden disappearance when they rise in clouds to seek new fields for destruction is mentioned in Nah 3^{17}. They eat the foliage and fruit of every green thing in their path (Ex 10^{15}). No more suitable figure can be conceived for an invading army (Jg 6^{5} 7^{12}, Jer 46^{23}). In modern times when the Anezi tribe of Bedouin Arabs from E. of the Jordan 'swarmed' or encamped on the Plain of Esdraelon, an eyewitness described the Plain as being stripped utterly bare, 'just as if the locusts had been over it.' When locusts are blown seaward, they fall into the water in vast numbers (Ex 10^{19}). In recent years, travellers along the N. shore of the Dead Sea have reported seeing on occasions a continuous ridge of dead locusts washed up. The smell of such piles of rotting locusts is described as intolerable. The feebleness and insignificance of these insects, as viewed individually, are referred to in Nu 13^{33}, Ps 109^{23}, Is 40^{22}, although in such passages the translation is usually 'grasshopper' to distinguish the insect from the more formidable locust. Locusts are still eaten (cf Mt 3^{4}). See FOOD, **8.**

Great strides have been made in the control of the locust, although control measures are difficult because of the extensive breeding grounds involved. During the 1930s several international locust control conferences were held, and in 1932 the Anti-Locust Research centre in London was established. Since the 19th cent., attempts have been made in such places as Cyprus to destroy the eggs and to kill the mature locust by the use of various types of traps and poison baits. A warning system has been established to announce the outbreak of a locust plague, and during World War II., ambitious programmes of control were undertaken. The use of the aeroplane to dust with insecticides the swarms and breeding grounds in Africa and Asia has become common. Such protection for Palestine has been provided with considerable success against the locust swarms originating in the Arabian desert. E. W. G. M.—W. L. R.

LOD, LYDDA.—A town in the territory of Benjamin, not apparently of pre-Israelite origin, but built (1 Ch 8[12]), along with Ono, by the Benjamite Shemed (but *Luthen* and *Auanau* occur side by side in the lists of Thothmes III.). Elsewhere it is mentioned only in the post-Captivity lists (Ezr 2[33], Neh 7[37] 11[35]); and in connexion with the healing of Aeneas at this place (Ac 9[32]). Its inhabitants were enslaved by Cassius, and freed by Anthony (Jos. *Ant.* XIV. xi. 2 [275], xii. 2 [304]). Cestius Gallus burned it, and it afterwards surrendered to Vespasian (*BJ* II. xix. 1 [516], IV. vii. 1 [144]). In the Middle Ages it was the seat of a bishopric. It is a centre of the cultus of that strange being called by the Christians St. George (to whom the church is dedicated), and by the Muslims *el-Khudr*—probably an ancient spirit of vegetation. It was known as *Diopholis* in the Byzantine period, but the old name *Ludd* is still attached to the site. R. A. S. M.

LODDEUS, 1 Es 8[45f] (RV).—See IDDO, **1.**

LO-DEBAR.—A place in Gilead, near to, and apparently E. from, Mahanaim. It was the retreat of Mephibosheth till he was summoned to court by David (2 S 9[4f]). It is mentioned also upon the occasion of David's flight to the E. of the Jordan (17[27]), and again in Am 6[13] (RSV; AV, RV translate the name, 'a thing of nought'). It is perhaps the same as **Lidebir** (q.v.). Its site is uncertain; possibly modern *Umm ed-Dabar*, S. of *Wâdī el-'Arab*.

LODGE.—See CUCUMBERS.

LOFT.—See HOUSE, **5.**

LOG.—See WEIGHTS AND MEASURES.

LOGIA.—See GOSPELS.

LOGOS.—In classical Greek *logos* signifies both 'word' and 'reason,' but in the LXX and the NT it is used, with few exceptions, in the former sense only. When it is God's word that is spoken of, it denotes the declaration or revelation of the Divine will, and specifically the Christian gospel as the utterance of the Divine plan of salvation (*e.g.* Mt 13[19–23]‖, Ph 1[14]). But in the Prologue to the Fourth Gospel (1[1] [three times] [14], with which cf 1 Jn 1[1] [5[7] of AV is spurious; see RSV] and Rev 19[13]) 'Logos' (EV **Word**) is applied to Jesus Christ, and is used to set forth His peculiar glory as the only-begotten Son of God, who is also the Life and Light of men. It is with this Johannine Logos that we have now to deal, and in doing so it seems necessary to consider (1) the content of John's Logos doctrine; (2) its sources; (3) its place in the Fourth Gospel; (4) its theological significance.

1. Content.—Three stages appear in the exposition of the Logos doctrine given in the Prologue. (*a*) First (vv.[1–5]), the nature and functions of the Logos are set forth in His relations to God, the world, and man. He was with *God* in the beginning, *i.e.* He eternally held a relation of communion with Him as a separate personality—a personality itself Divine, for 'the Word was God.' As to the *world*, it was made by Him (v.[3], cf v.[10]), perhaps with the further suggestion that from Him it draws continually the life by which it is sustained (v.[4]). But from Him there flows also the higher life of *man* as a spiritual being possessed of reason and conscience, for His life becomes the universal light of human souls (v.[5], cf v.[9]). (*b*) The second stage of the exposition (vv.[6–13]) is a contrast of the Logos with the word of God that came by John the Baptist. John was not the Light; he came only to bear witness to it. The Logos is the true Light, and the mediator of Divine life to all who believe in His name. (*c*) Finally (vv.[14–18]), the author describes the incarnation of the Logos in the flesh, and declares His identity with the historical Jesus Christ, the bringer of grace and truth. In v.[18] the whole Prologue is summed up. Here the writer returns to the point from which he set out (cf v.[1]), but his readers now understand that the eternal Logos is one with Jesus Christ, the Son of God.

2. Sources.—(1) For these some have been content to refer to *the OT and the post-canonical Jewish writings.* And it is true that a connexion is clearly to be traced. We can hardly mistake a reference in the Prologue (vv.[1, 3f, 10]) to the creative word of God in Gn 1. In the Psalms and Prophets, again, a personification of the word of the Lord is common (*e.g.* Ps 33[6], Is 55[11]). And in the Wisdom literature, both canonical and apocryphal, this personifying tendency is carried still further (Pr 8[22–31], Sir 24), though it is God's Wisdom, not His Word, that becomes His representative, and a full personification of the Word does not meet us till we have reached a point in Jewish history where Greek influences have begun to make themselves felt (Wis 9[1] 16[12]). All this, however, is very far from explaining the Johannine Logos doctrine. The most that can be said is that the doctrine of the Prologue reflects a tendency of Jewish thought, finding its roots in the OT, to conceive of the Divine self-revelation as mediated by the personified Wisdom or Word of the Lord.

(2) Some have held that John's Logos doctrine was derived entirely from *the Judaeo-Alexandrian philosophy*, and specifically from the teaching of **Philo** (q.v.). From early times there had grown up among the Greeks a conception of the Logos as the Divine Reason manifested in the universe, and explaining how God comes into relation with it. To this Logos philosophy Plato's doctrine of ideas had contributed, and afterwards the Stoic view of the Logos as the rational principle of the universe. In his efforts to blend Judaism with Hellenism, Philo adopted the term as one familiar alike to Jews and to Greeks, and sought to show by means of allegorical interpretations that the true philosophy of God and the world was revealed in the OT. And St. John, it is supposed, simply appropriated this teaching, and by means of an idealizing treatment of Christ's life constructed in his Gospel a philosophical treatise on the doctrine of Philo. The theory breaks down on any examination. To Philo the Logos was the principle of Reason; to St. John He was the Divine revealing Word. Philo's Logos is not really personal; St. John's certainly is. Philo does not identify the Logos with the Messiah; to St. John He is no other than the Christ, the Saviour of the world. Philo sees in the flesh a principle opposed to the Godhead; St. John glories in the fact of the Incarnation. With Philo the antithesis between God and the world is a metaphysical one; with St. John it is ethical and religious. St. John cannot, then, have derived his doctrine of the Logos from Philo. But he undoubtedly used the term because Philo and others had made it familiar to Graeco-Jewish thought as a means of expressing the idea of a mediation between God and the universe, and also perhaps because he himself had received certain formal influences from the Philonic philosophy (see *e.g.* the value he assigns to knowledge; his crystallization of the gospel into such general terms as 'light,' 'truth,' 'life'; his constant antithesis of light and darkness—though these were ancient religious symbols). Apart, however, from such formal influences and the convenience of a familiar and suggestive term, the real source of the Johannine Logos doctrine is still to seek.

(3) That source is assuredly to be found in *the actual historical personality of Jesus Himself* as we find it set forth in the rest of this Gospel. More and more it becomes impossible for the careful student of this book to treat it as a philosophical romance in which a purely idealizing treatment is given to the figure of Jesus; more and more the substantial historical truth of the presentation becomes evident. And, assuming the substantial truth of the narrative, it seems clear that St. John uses his Logos conception, not 'to manufacture the Light of the World out of the Messiah of Israel,' but to set forth, in a way that would appeal to readers of his own place and time, Christ's real relations to God and the universe as these had been attested by His words and deeds, by His dying and rising from the dead, and by all the facts of His self-revelation. We must bear in mind, moreover, that while the term 'Logos' was a new one to be applied to Christ, the place of dignity and power assigned to Him by John was by no means new. Both

St Paul and the author of Hebrews had taught the doctrine of Christ's eternal Sonship, and of His functions as the creator of the universe and the revealer of the Father (Ph 2^{5-11}, Col 1^{13-20} 2^{9}, He 1^{1-4}), and the teaching of both, already familiar and widely accepted in the Church, is subsumed in the Johannine doctrine of the Logos.

3. Place in the Fourth Gospel.—The attempt has been made to distinguish between the Logos doctrine in the Prologue as Hellenic, and the Gospel itself as Palestinian; and it has been maintained that the influence of the Logos idea does not extend beyond the Prologue, and that it was merely intended to introduce to Greek readers the story of the Jewish Messiah with a view to making it more attractive and intelligible. We may remind ourselves, however, of Strauss's comparison of this Gospel to the seamless robe of Jesus, a judgment which has been verified by nearly every critical student of whatever school. It is true that when we pass beyond the Prologue the word 'Logos' is not repeated. The author nowhere puts it into the mouth of Jesus—one evidence surely of his historical fidelity. But, all the same, the doctrine of the Prologue manifestly works right through the narrative from beginning to end (see such passages as 3^{13-21} 6^{53-58} 7^{28f} $8^{12, 14, 16}$ 10^{29ff} 12^{44-50} 14^{6-11} $17^{5, 8, 24}$ etc.). It is very noticeable that in 20^{31}, where, before laying down his pen, the writer reveals the motive of his work, he really sums up the great ideas of the Prologue as he declares that Jesus is the Christ, the Son of God, and that believing we may have life through His name. The Logos, then, is not a mere catchword, put forth in order to seize the eye and arouse the interest of the Greek reader. The Logos idea underlies the whole Gospel, and has much to do with the author's selection of his materials. In the Prologue, as in any other well-written introduction, the plan of the work is set out, and the Logos doctrine is stated there because it supplies the key to a right understanding of the history that follows.

4. Theological significance.—From the time of Justin and ever since, the Logos doctrine of St. John's Prologue has served as the material of many a Christian metaphysic. It is no doubt inevitable that this should be the case; but we must be careful not to make St. John responsible for the theological constructions that have been woven out of his words. If an injustice is done him when his doctrine of the Logos is supposed to be nothing more than the fruitage of his study of Philo, another injustice is committed when it is assumed that he is setting forth here either a metaphysic of the Divine nature or a philosophy of the Incarnation. It is plain, on the contrary, that in all that he says it is the religious and ethical interests that are paramount. He uses the Logos conception for two great purposes—to set forth Jesus (1) as *the Revealer of God*, and (2) as *the Saviour of men*. The first of these ideas, as has been said, is one that we find already in the Pauline Epistles and in Hebrews; but by his emphasis on the relations of Fatherhood and Sonship St. John imparts a peculiarly moral meaning to the essential nature of the God who is revealed in Christ. But it is above all for a soteriological purpose that he seems to employ the Logos idea. The Logos, who is identified with Jesus Christ, comes forth from the bosom of the Father, bringing life and light to men. He comes with a gospel that supersedes the Law of Moses, for it is a gospel of grace as well as of truth. Himself the Son of God, He offers to all who will believe in His name the right (or power) to become the children of God. And so, while the Logos is undoubtedly the agent of God's creative will, He is still more distinctively the mediator of God's redeeming purpose. It is therefore as a religious power, not as a metaphysical magnitude, that St. John brings Him before us. The Evangelist shows, it is true, that the absoluteness of Christ's historical mission and His exclusive mediation of the Divine saving grace are garuanteed by the fact that the roots of His personal life reach back into the eternal life of God. His Logos doctrine thus wards off every Christology that would see in Jesus no more than a prophetic personality of the highest originality. But, while the Logos idea 'illuminates the history with the light of eternity, it can reveal eternity to us only in the light of history, not in its own supernatural light' (*PRE*[3] xi, 605). J. C. L.—H. C.

LOIS.—The grandmother of Timothy (2 Ti 1^{5}), and probably the mother of Eunice, Timothy's mother. The name is Greek. The family lived at Lystra (Ac 16^{1}), where St. Paul first made their acquaintance. Lois was a devout Jewess by conviction, who instructed her family diligently in the Holy Scripture. M. St.

LONGSUFFERING.—This word, regularly used in the AV (and sometimes retained by the RV) to translate *makrothymia* and its corresponding verb, is not found in the RSV, either OT or NT. In the NT it has been replaced by some form of 'patient' except for Lk 18^{7} ('delay long'), 2 P 3^{9} ('be forbearing'), and 2 P 3^{15} ('forbearance').

The Greek word means 'a long holding out of the mind before it gives room to action or passion—generally to passion' (Trench, *Synonyms of NT*, liii); it implies the opposite of short temper; cf Old English 'long-animity.' In the NT the patience of God is regarded as a proof of His 'goodness' (Ro 2^{4}; here and elsewhere 'patience,' ‖ '**forbearance**' [*anochē*]) and of His faithfulness (2 P $3^{9, 15}$); it is manifested in the gracious restraint which characterizes His attitude towards those who deserve His wrath (Ro 9^{22}, 1 P 3^{20}). The Divine patience is perfectly exemplified in Christ's dealings with sinners (1 Ti 1^{16}). Patience is, therefore, a conspicuous grace in the ideal Christian character (2 Co 6^{6}, Eph 4^{2}, Col 3^{12}, 1 Th 5^{14}, 2 Ti 3^{10} 4^{2}); it is viewed as an evidence of Divine strengthening (Col 1^{11}), as a manifestation of love (1 Co 13^{4}), and as a fruit of the Spirit (Gal 5^{22}).

LOOPS.—See TABERNACLE, 5 (*a*).

LORD.—The Hebrew, OT has three leading names for God: (1) 'the name of four letters' (*tetragrammaton*) YHWH (familiar to us in the incorrect form 'Jehovah'; the real vocalization is almost certainly 'Yahweh' [see GOD]); (2) *'Adhōnay*; (3) *'Elohîm*. By the Greek period the Jews shrank from uttering the first of these (the LXX of Lv 24^{16} expressly forbids it), and added to its four consonants, in their reading of the OT, the *vowels* of either *'Adhōnay* or *'Elohîm*. When the vowels of the former were added, the AV, RV, and RSV generally translate the word by 'LORD,' when those of the latter, by 'GOD'; using small capitals in each case (ARV reads 'Jehovah' in both cases). If, however, *'Adhōnay* is originally in the text, all versions represent it by 'Lord,' using an initial capital only. Thus in the OT (except in ARV) 'LORD' represents *Yahweh* when it was read as *'Adhōnay*; and 'Lord' represents *'Adhōnay* when it stands in the original text. This distinctive printing is not observed in the NT. There are several other Hebrew words in the OT expressing the general idea of lordship, which are rendered by 'lord' (Gn 45^{8}, Jg 3^{3}, Is 16^{8} etc.).

In the NT, AV uses 'Lord' once (Mk 10^{51}) as translation of *Rabboni* (but RSV '**Master**'), and five times of *despotēs* (Lk 2^{29}, Ac 4^{24}, 2 P 2^{1}, Jd 4, Rev 6^{10}). In the latter cases, however, RSV reads 'Lord,' 'Sovereign Lord,' or '**Master**' while RV and ARV have '**Master**' in text or margin. Elsewhere 'Lord' represents *kyrios*, applying the title (1) to God (Mt 1^{20}, Ac 5^{19} etc.); (2) to Christ (Lk 6^{46}, Jn 20^{28} etc.). Indeed, as applied to Christ, it is the highest confession of His Person (1 Co 12^{3}, Ro 10^{9}, Rev 19^{16}). The form 'lord' in NT indicates mere possession of authority (*e.g.* Mt 18^{25}), but in such cases RSV usually renders 'master' or the like.

C. T. P. G.—J. Br.

LORD OF HOSTS.—By NT times *Sabaoth* had become a Greek title (cf Ro 9^{29}, Ja 5^{4}, AV, RV, but not RSV), and the LXX likewise renders it, though by no means consistently, in transliteration. Where the

rendering is interpretative, the meaning attached to the word is 'all-powerful,' 'sovereign,' 'lord of all creation.' This, probably, is also the meaning given to it by Christians to-day when they pronounce the word in public worship.

It might be argued that by adopting this now traditional Christian interpretation the Church merely uses a Hellenistic paraphrase and avoids anthropomorphism by introducing metaphysical theology, with the consequent loss of Hebraic realism. But a survey of the OT usage will show that a closer definition is well-nigh impossible. The title occurs nearly three hundred times in all, nearly two hundred and fifty of them in the prophetical books, and obviously its popularity betokens a long tradition, and a fundamental significance for Hebrew religion. Nevertheless, it is not used in the Pentateuch, and it first occurs historically in the military contexts of Samuel. In 1 S 17[45] we have a definition, 'the Lord of Hosts, the God of the armies of Israel,' and it is sometimes thought that originally the form of the title was God of Hosts, in apposition to Yahweh, and the abbreviated Yahweh of Hosts came later. In Am 4[13] 5[27] the formula reads 'The Lord whose name is the God of hosts.' In 2 S 6[2] the Ark 'is called by the name of the Lord of hosts,' and it lies to hand to suggest that the title was connected with military exploits, especially where the Ark accompanied the army. But in the Elijah story in 1 K 19[14], although a conflict is presupposed, the Lord of Hosts is opposed to natural and cosmic forces, and there is no hint that a change of connotation has taken place. Other passages from the same literary period show that the title was used in purely cultic, non-militaristic contexts, such as 1 S 1[3, 11] where it applies to the shrine at Shiloh, and 2 S 6[18] where a cultic act is centred on the Ark in Jerusalem. The prevalence of the title in Royal Psalms likewise postulates a cultic use, which glorifies not only Yahweh's championship in battle but also over the forces of Nature. When we turn to the prophets' use of the title it becomes obvious that any recollection of Yahweh as military leader of Israel's forces has gone. The Lord of Hosts is here the cosmic Judge, who can abolish the false altars of Bethel (Am 3[13f]), mediums and wizards (Is 8[18]), and the false prophets (Jer 5[14]), 'who touches the earth and it melts' (Am 9[5]).

The most recent full treatment of the term, by Wambacq (*L'Épithète Divine Jahvé Ṣᵉba'ôt*, 1947) traces a gradual growth of the idea from an original association with the military forces of Israel to the cosmic title of the prophets, but the reaction against such an evolutionary explanation is well expressed by G. von Rad (*Theologie des A.T.*, 1957), who says that the use of the title by the prophets can include everything except the nationalistic ideas of the Samuel passages. It is probably pessimistic, however, to follow von Rad further, and admit that such an ancient epithet, with obvious cultic associations, cannot be supplied with a rational explanation to accommodate all its uses. The clue to the discrepancy between the prophetic use and Samuel might be that the latter is secondary to the former, and is the result of applying incidentally a conception with a much wider connotation in the history of Hebrew religion.

A totally different explanation of the title has been offered by O. Eissfeldt, 'Jahwe Zebaoth,' *Miscellanea Academica Berolinensia II* 2 (1950). He regards the plural of the noun as an expression of abstract or intensive noun-form—by no means an isolated grammatical convention—and the title thus denotes 'power' or, adjectivally, 'the powerful one.' The point is a complicated one, but there is a growing tendency to accept the idea. So perhaps after all the Hellenists were nearer the mark than they have been credited with being! B. J. R.

LORD'S DAY.—1. Name and origin.—The title used in the Apocalypse (Rev 1[10]), probably to describe the day upon which the Christian Church in Apostolic days assembled for worship. The Acts of the Apostles shows us the disciples of Christ immediately after Pentecost as a closely united body, 'of one heart and soul,' supported by daily meetings and the Eucharist (4[32] 2[42, 46]). Their new faith did not at first lead them to cut themselves off from their old Jewish worship, for their belief in Jesus as Messiah seemed to them to add to and fulfil, rather than to abolish, the religion of their childhood. This worship of Christians with their Jewish fellow-countrymen secured the continuation of the Church of God from one dispensation to another; while their exclusively Christian Eucharists consolidated the Church and enabled it to discover itself.

The *daily* worship of the Christian Church would no doubt soon prove impracticable, and a weekly gathering become customary. For this weekly gathering the **Sabbath** (q.v.) was unsuitable, as being then observed in a spirit radically different from the joy and liberty of the new faith; doubtless also the restrictions as to length of a Sabbath day's journey would prove a bar to the gathering together of the little body. Of the other six days none so naturally suggested itself as the first. To it our Lord had granted a certain approval; for on it He rose from the dead and appeared to His disciples, and on the following Sunday repeated His visitation (Jn 20[1, 26]); while, if Pentecost that year fell on the first day of the week (which it did if the chronology of St. John be followed), it received a final seal as the special day of grace.

That this day was actually chosen is seen in the NT (Ac 20[7], 1 Co 16[2]). And mention of it is found in the literature immediately following the Apostolic writings.

Not the least interesting evidence is found in a report to the Emperor Trajan written by Pliny, Governor of Bithynia in A.D. 112, which mentions that the custom of the Christians was to meet together early in the morning on a certain 'fixed day,' and sing hymns to Christ as a god, and bind themselves by a *sacramentum* to commit no crime. Ignatius, the earliest of post-Apostolic Christian writers, also speaks of it, telling the Magnesians to lead a life conformable to 'the Lord's Day' (9[1]).

And from then to now a continuous stream of evidence shows that the Church has faithfully observed the custom ever since.

The *title* by which early Christian writers usually called the festival was 'the Lord's Day'; but before long the Church felt no difficulty in adopting the heathen title of '**Sunday,**' realizing that as on that day light was created, and the Sun of Righteousness arose on it, there was to them a peculiar fitness in the name.

The most valuable evidence as to the method by which the early Church observed the day is found in Justin Martyr's *Apology* (i. 67, A.D. 155), where we read that on the day called Sunday the Christians met together, out of both city and country, and held a religious service at which first the writings of Apostles and Prophets were read; then the president preached; after which common prayers were said; and when these were ended, bread and wine were brought to the president, who uttered prayers and thanksgivings, to which the people said, 'Amen'; all present then participated in the Eucharist, the deacons carrying it to the absent. Thus it is clear that the early Church continued the Apostolic custom (Ac 20[7]) of celebrating the Lord's Supper every Lord's Day—a custom so widespread as to enable Chrysostom to call Sunday *dies panis*, or 'the day of bread.'

2. Relation to the Sabbath.—The Sabbath was originally instituted as a provision for deep physical and spiritual needs of human nature, providing by religious sanction for the definite setting apart of the seventh day as a time for rest from labour and for communion with God. Our Lord found the original institution almost hidden beneath a mass of traditional regulations. Thus His action towards the Sabbath as He found it, was to bring men back to its first ideal. This He did by showing that their tradition told how David broke the letter of its regulation and yet was guiltless (Lk 6[3]); how charity and common sense led men to break their own rules (13[15]); how the Sabbath was given to man as a blessing and not laid on him as a burden (Mk 2[27]);

and how He as Son of Man, fulfilling ideal manhood, was its Lord (2[28]); but while our Lord thus purified the Sabbath, there is no proof that He abolished it.

We can best see God's will regarding the Sabbath and the Lord's Day in what actually happened in Apostolic times. The Acts shows us that the Christians who were originally Jews observed *both* the Sabbath and the Christian Lord's Day (Ac 21[20f]); and this double observance lasted among them at least until the destruction of the Temple. The Jewish members of the Church were soon outnumbered by the Gentile, and these latter would feel in no way drawn to continuing the observance of the Jewish Sabbath as well as their own Lord's Day; and this the more so that they had received the gospel under the wider teaching of St. Paul, who had emphasized the danger of an undue observance of days, and had spoken of the Sabbath as 'a shadow of the things to come' (*i.e.* the Christian dispensation; cf Col 2[16f], Gal 4[9-11], Ro 14[5f]). But if the Gentile Christian did not observe the Jewish Sabbath, yet he could not be ignorant of its deeper meaning, for he saw the Sabbath observed by his Jewish neighbours, and read in the OT of its institution and uses; and thus imperceptibly the essential principle of the Sabbath would pass into the Christian day of worship. But whereas the old Sabbath commemorated God's rest from His old creation, the Lord's Day became a celebration of God's new creation begun in the resurrection of Christ from the dead. C. T. P. G.—M. H. S.

LORD'S PRAYER.—The Lord's Prayer is found in the Gospels of St. Matthew and St. Luke, but in different contexts and with considerable variations. In Mt 6[9-13], which is part of the Sermon on the Mount, it follows the warning 'When you pray, you must not be like the hypocrites . . .' It has eight clauses introduced by the words, 'Pray then like this':

v.[9] (1) Our Father who art in heaven,
(2) Hallowed be thy name.
v.[10] (3) Thy kingdom come,
(4) Thy will be done on earth as it is in heaven.
v.[11] (5) Give us this day our daily bread;
v.[12] (6) And forgive us our debts, as we also have forgiven our debtors.
v.[13] (7) And lead us not into temptation.
(8) But deliver us from evil.'

Later MSS add a doxology 'For thine is the kingdom and the power and the glory for ever,' but few critics regard this as part of the true text.

In Lk 11[1-4] the Prayer is introduced as given in answer to the request of a disciple: 'And he said to them, When ye pray, say,

v.[2] (1) Father,
(2) Hallowed be thy name.
(3) Thy kingdom come.
v.[3] (5) Give us each day our daily bread;
v.[4] (6) And forgive us our sins, for we ourselves forgive everyone who is indebted to us.
(7) And lead us not into temptation.'

The Prayer in Luke is thus considerably shorter than in Matthew. Except in inferior texts the Third Gospel has nothing to correspond to Matthew's 'Our' or 'in heaven' in clause (1), and it omits clauses (4) and (8). This shorter version is probably nearer to the original than Matthew's, for while it is easy to imagine clauses being added in the Church's use, it is difficult to think that words or petitions would have been omitted. Matthew's additions are not difficult to account for:

(1) The words 'in heaven' are frequent in the First Gospel and may be compared with a Jewish use common in the 1st cent. A.D.; but they are seldom used when God is addressed directly, and for that reason they are probably not original in the Prayer.

(4) 'Thy will be done on earth as it is in heaven' may have been derived from Christ's own prayer in the garden (Mt 26[42]); but a more probable suggestion is that the clause originated as an explanation of the preceding words 'Thy kingdom come' at a time when the Church's apocalyptic hopes were growing dim.

Similarly clause (8) may be an expansion of the petition 'Lead us not into temptation.' The word translated 'temptation' may mean any kind of trial or severe testing, and clause (7) is a prayer that God's providence may not bring upon the suppliant trials, physical or moral, greater than he can bear. Then clause (8) develops the thought—may God rather deliver His servant from every kind of evil. Jewish parallels may be quoted: C. Taylor, *Sayings of the Jewish Fathers*, p. 128, compares the rabbinic prayer, 'May it be thy will to deliver us from evil man, from evil hap, from evil disposition, from evil companion, from evil neighbour, and from Satan the destroyer' (B. T. D. Smith, *St. Matthew*).

The Greek word translated 'evil' in clause (8) might be masculine and refer to Satan, 'the evil one'; but it seems better to take it as neuter, *i.e.* evil in the wider sense. The suggestion that the reference is to the exceptional trials which Jewish thought associated with the coming of the kingdom (cf Mt 24[6-22]) is possible but unnecessary, unless Schweitzer's contention that the whole Prayer is eschatological be accepted.

It is probable, then, that Luke's version is the more primitive. Taking the clauses in order:

(1) 'Father' translates the Aramaic 'Abba' which Mark records as having been Jesus' own address in prayer (Mk 14[36]) and which St. Paul twice mentions as used in the early Church (Ro 8[15], Gal 4[6]). That neither Matthew nor Luke quotes the Aramaic word in the Lord's Prayer is one of the indications that both evangelists were familiar with the Prayer as it had long been translated into Greek.

(2) 'Hallowed be thy Name' may be compared with similar clauses in many Jewish prayers, which were always primarily acts of worship. Ultimately the petition reflects Ezk 36[25] 'I will sanctify my great name which has been profaned among the nations,' and it is a prayer for God's action rather than men's. Thus it looks forward to

(3) 'Thy Kingdom come' which expresses the eschatological hope of Israel adopted and transmuted by the Christian Church. W. O. E. Oesterley, *Jewish Background of the Christian Liturgy*, p. 73, quotes an ancient Jewish prayer, the 'Half-Kaddish,' "May he establish His kingdom in your lifetime and in your days." This may be said to have become the characteristic petition of the Christian Church (cf *Didache*, x).

(5) 'Give us each day our daily bread' is less easy to interpret owing to the use by both Matthew and Luke of a Greek word (*epiousion*) of which the translation is quite uncertain. Origen, writing early in the 3rd cent., was puzzled by it and could only suggest that it had been coined by the evangelists. It would seem to mean 'coming upon' or 'succeeding,' and then the petition would be 'Give us each day our bread for the coming, or next, day.' But no certainty can be claimed, and the various translations of the versions are evidence that the early Church could only guess the meaning. That the word occurs in both the Gospels is evidence that it represents a very early (and perhaps unfortunate) translation of some Aramaic word. The familiar English rendering 'daily' which is founded on the Vulgate's '*quotidianus*' may not be far wrong. The clause is a prayer that God will supply the daily needs of His people, and Schweitzer's attempt to connect it with the thought of the 'coming' kingdom is unconvincing.

(6) 'Forgive us our sins, for we ourselves forgive everyone who is indebted to us' may be paralleled in part from the sixth of the Jewish *Eighteen Benedictions*: 'Forgive us, our Father, for we have sinned: pardon us, our King, for we have transgressed'; and the reference to man's forgiveness of his neighbour may be compared with Sir 28[2] 'Forgive thy neighbour the hurt that he has done thee, and then thy sins shall be pardoned when thou prayest.' For Matthew's 'debts' Luke substitutes 'sins'; but he has 'for we ourselves forgive every one who is indebted to us,' which suggests that Matthew's version is here nearer to the original. A slight difference

in meaning can be detected in the two versions of this clause. Matthew uses the perfect tense; we *have forgiven* our debtors, and can therefore ask for the same indulgence (cf Mt 18[35]). Luke's 'Forgive us our sins, for we ourselves forgive' describes the consistent Christian attitude. Here again many commentators consider Matthew to be the more primitive.

(7) 'And lead us not into temptation.' As noted above, the word translated 'temptation' is ambiguous. It may mean 'temptation to sin,' and is so used in some passages in the NT. Possibly some in the Early Church took this clause as implying that God's providence may deliberately confront men with temptation to do evil, and the author of the Epistle of James wished to correct that idea when he wrote (1[13]), 'Let no one say, when he is tempted, "I am tempted by God"; for God cannot be tempted with evil and he himself tempts no one.' But, as already noted, the Greek word may have a wider meaning, 'severe trial' or 'testing' (Gal 4[14], Rev 3[10]), and this is more probable here. Then the petition is a prayer to be delivered from life's ills; but since suffering sometimes brings with it temptation to sin (as in the case of Job) the former meaning is not altogether excluded.

It is remarkable that there is no quotation from the Lord's Prayer in the rest of the NT Scriptures—unless 2 Ti 4[18] is an echo of the final clauses in Matthew. It must have been used liturgically at an early date, and such use in the local churches provides the best explanation of the variations in the Gospels of Matthew and Luke; a clause might be added in one church and not in another, and slight differences in wording would creep in. At a later date the process was reversed and harmonization was inevitable. In late MSS, such as underlie the AV, the Prayer in Luke differs little from that in Matthew.

Taken as a whole, the Lord's Prayer in its earliest form is a simple act of worship, the elements of which can readily be paralleled from Jewish sources (I. Abrahams, *Studies*, 2nd series, p. xii). Yet the whole is more than a sum of its parts, and few will deny that the Lord's Prayer provides the perfect pattern of Christian devotion. Throughout the centuries the Church has used it in all its worship and has made it the type of more extended supplications. P. G.-S.

LORD'S SUPPER.—See EUCHARIST.

LORDS OF THE PHILISTINES.—The chieftains or 'tyrants' of the five Philistine cities, Gaza, Ashkelon, Ashdod, Ekron, and Gath. Wherever they are mentioned (Jos 13[3], Jg 3[3] 16[5, 8, 18, 27, 30], 1 S 5[8, 11] 6[4, 12, 16, 18] 7[7] 29[2, 6f], 1 Ch 12[19]) the word translated 'lord' is a peculiar one, being identified with the Hebrew word for 'axle.' Once (1 S 18[30]) the Hebrew word for 'princes' is applied to them. Probably the peculiar word is a native Philistine title. Their functions, so far as can be gathered from the OT, were the same as those of petty kings. G. A. B.

LO-RUHAMAH.—See HOSEA, LO-AMMI.

LOT.—The son of Haran and nephew of Abraham. His name seems to be derived from a root meaning *to wrap closely*. The account of his life is contained in Gn 11[27]–14[16] 19. He was born in Ur, and went with Abraham to Haran, and thence to Canaan. He accompanied Abraham in much of his wandering. The separation (ch. 13) was due to a quarrel between their herdsmen, each having great possessions of live stock. As a result, Lot dwelt in the cities of the plain, making his home in Sodom. During the expedition of Chedorlaomer (ch. 14) he was carried away captive, but was eventually rescued by Abraham. In ch. 19 is narrated the escape of Lot and his daughters from Sodom, with the subsequent incidents. The city of **Zoar**, where they lived for a time, was near the southern end of the Dead Sea, in the Valley of Siddim (14[3]), but the site is now unquestionably covered by the water of the Dead Sea, which has slowly risen. The mountain to which Lot finally went is doubtless the mountainous region later known as Moab. The story of the daughters of Lot (19[30–38]) is now considered to be, not history, but a traditional account of the origin of the two nations, Moab and Ammon. The basis of the story is the popular etymology of the two names, and it was prompted also by national rivalry and hostility. Lot himself is supposed by modern scholars to personify the characteristics, migrations, and alliances of certain tribes, perhaps Aramaean, of which he was the supposed ancestor.

Lot's wife.—The story of Lot's wife and her transformation into **a pillar of salt** probably arose from the peculiarities of the cliffs in the vicinity of the Dead Sea. At its SW. extremity is a great salt mass stretching in a north-south direction, some 5 miles long, 3 miles wide, and 600 feet high, now called *Jebel Usdūm*, 'the mountain of Sodom.' It consists of crystallized rock salt, covered with chalky limestone and gypsum, and curiously furrowed and worn, so as sometimes to resemble a human figure. G. R. B.—T. J. M.

LOTAN.—A Horite clan, Gn 36[20, 22, 29], 1 Ch 1[38f].

LOTHASUBUS.—One of those who stood on Ezra's left hand at the reading of the Law, 1 Es 9[44]; a corruption of **Hashum**, Neh 8[4].

LOTS.—See MAGIC, URIM AND THUMMIM, PURIM.

LOTUS.—This is the correct rendering of *ṣe'elîm* in Job 40[21f] (RV 'lotus trees,' RSV 'lotus plants'; AV 'shady trees'), where it describes the haunt of Behemoth (q.v.). The tree is probably = the Arab *dâl*, the '*dom*-tree,' and must not be confused with the Egyptian water-lilies. It is a prickly shrub found in N. Africa and S. Europe. See also LILY. W. E.

LOVE.—1. In the OT.—'Love' (noun and verb) represent Hebrew words which ranged, like the English term, from (1) *sensuous*, and often evil, *desire* or passionate love between man and woman (as in Gn 25[28], 2 S 13[4], Jer 2[33]), through (2) *family affection* and *natural friendship* (Gn 22[2], Ex 21[5], 1 S 18[16], 2 S 1[26]), up to (3) *the highest spiritual passion*. Under (3) come the theological meanings: (*a*) *Y"'s love to* Israel, to the righteous, etc., as chosen by Him; this love is spontaneous, directed to the nation rather than to individuals (except perhaps in the Psalms); it condemns and judges sin, making moral demands (Dt 4[37] 7[6f], Hos 3[1] 9[15] 11[4] 14[4], Am 3[2], Jer 2[2], Is 43[4] 48[14] 63[9], Mal 1[2], Ps 11[7] 47[4] 78[68] 87[2] 146[8], Pr 3[12] 8[17]); at times it is not confined to one nation Israel (Am 9[7], Is 19[19ff] 42[1ff] 49[6]); and (*b*) *Israel's love to Y"*, His name, word, house, salvation, law, etc. (*e.g.* Ex 20[6], Dt 6[5] etc., Neh 1[5], 1 K 3[3]—same verb as in 11[1], Ps 5[11] 31[23] 116[1] 119[97] etc., Mic 6[8]); and (*c*) *dutiful love to one's neighbour* should perhaps be included here, for it is commanded even towards one's enemies (*e.g.* Ex 23[4f]). Passages coming under (*b*) are relatively numerous, and date from the redemption of the Exodus. None of the instances under (*a*) is certainly earlier than Hosea, who first represented the covenant of Y" as a *spousal* contract. The books of Ruth and Jonah very strongly suggest that His love is shared by other nations. It is a love which induces repentance (Jer 31[33]).

The unique place which love holds in the Israelite, as compared with other religions, is due to its insistence on a *reciprocal affection of God and people*. Abraham is the friend of God, and love to God is even demanded by Him. Moreover, the very word which expresses this love is drawn from a sphere which involves reciprocity, namely marriage relations and intimate friendship (as between David and Jonathan). But man's love to God is not primarily spontaneous; Y" loved man first and provoked his response. Y" chose Israel, not because of any merit or love on Israel's part (Dt 9[4ff], Ezk 16[3–14]).

The character of Y", 'the Holy One of Israel,' gives to His love its qualities—purity, intensity, selflessness, fidelity; reciprocal love calls forth like qualities in His people (see the relevant expressions of love to Y" in the Psalms).

2. In the LXX.—All these varieties of love, human and Divine, may in the LXX be expressed by the verb *agapaō* and noun *agapē*. In the story of Samson and Delilah *agapaō* describes sexual relationship (Jg 16[4, 15]),

not to mention Solomon's legalized lust (3 K 11[2]), besides expressing love in its higher reaches. *Phileō* is a much rarer word in the LXX, but it is not by any means confined to spontaneous or unreasoning love, for it does duty on occasion for the tenderness of parental love (Gn 37[4]) and for the deliberate, reverential love of Wisdom (Pr 8[17] 29[3]). In the Greek Bible, in the form in which it must have been known to the NT writers, *agapaō* does duty for every shade and variety of love, from divine pity and preference for Israel right down to erotic passion. It is true that *agapaō* is not the only verb to express erotic love in the LXX, for there are also *pro-aireomai* and *enthumeomai* (Heb. *ḥshḳ* and *ethelō* (*ḥpṣ*); but it is very commonly used to render Hebrew *'hb* when the context makes plain that this very type of love or passion is intended. Nor has *agapaō* the monopoly for rendering what may be described as reasoning attachment: thus the more usual verbs for divine pity are *eleeō* and *oikteirō*. The noun *agapē* is usually connected with sex, or at least with love of women; or, it is a passion comparable in intensity with hatred; it is not at all a higher love than *philia*. Indeed, in the LXX *agapēsis* may be said to be a higher type of love than *agapē* (cf especially Hos 1[4], Zeph 3[17], Jer 38 (31)[3]).

3. In the NT.—The Greek words used for 'love' are the verbs *agapaō* and *phileō* and the noun *agapē*. We have seen something of the history of these words in the Greek Bible, but naturally they are clothed in the NT with that new meaning of 'love' which is necessarily involved in the Christian gospel: love of and for Christ, and love of and for the Christian brethren. It is a mistake to suppose that *agapaō* and *agapē* are the sole means of expressing this, or that *phileō* involves a different kind of love. In the Synoptic Gospels the latter sometimes means 'to kiss,' but not always. In the Fourth Gospel it is quite indistinguishable from *agapaō*, and that is not surprising in view of what we have seen in the LXX. Apparently no other significance than a desire for variety in vocabulary may be read into such passages as Jn 21[15ff], where the Lord questions Peter three times and changes are rung on these two verbs; nor must 'the other disciple, the one whom Jesus loved' (20[2]) be distinguished from 'that disciple whom Jesus loved' (21[7]) on the ground that the two verbs are different. Some of the older commentators believed that in the NT there was a difference in meaning between the two verbs, *phileō* being the stronger, more spontaneous love, and *agapaō* the reasoning attachment which is based on deliberate choice of an object, involving the respect and reverence which are not essential to the other verb. So men can be, and in the NT are, commanded to love God with the verb *agapaō*, but not with *phileō*. Strictly speaking that may be so, but the fourth evangelist clearly did not maintain the distinction: he describes God's love for man as *agapaō* when God deliberately sets His love upon the world (3[16]) and when He chooses to love him who loves Jesus (14[21, 23]), but it is *phileō* when God chooses to love the disciples for the very same reason, that they love Jesus (16[27]); the Father loves the Son (*agapaō* in 3[35] 10[17] 15[9] 17[23f, 26]; but *phileō* in 5[20]); the disciples may conceivably have loved their Master in two distinct ways (*agapaō* in 14[15, 21, 23, 28]; *phileō* in 16[27]), but there is nothing in the immediate context or in the Gospel as a whole to suggest such a distinction. This evangelist is fond of ringing the changes on synonyms for no other apparent reason than love of variety (cf *send, ask, man,* and many other words).

If we leave aside the ordinary uses of 'love' in the NT (*e.g.* to love to do something, love of relatives, of fellowmen, of friends, or one's life, of praise, of gain from wrongdoing, of falsehood, salutations, and the best seats), we are left with certain qualities of a new Christian love, of which we have seen something already in the Fourth Gospel. It is God the Father's spontaneous love for the human race, inspiring a plan of redemption in which He loves the Son, and resulting in a family of disciples who share the Father's and the Son's mutual love, and who love all other members of the same brotherhood. In the Pauline Epistles, except where there is reference to marital affection (Ephesians, Colossians), 'love' is always used in this specialized sense, and is usually *agapē* and *agapaō*: it is God's and to God, and of Christians for one another (Romans); to God and Christ, of Paul for his converts, and Christian love in general (1 and 2 Corinthians; cf 1 Co 16[22] where *phileō* is used interchangeably); it is Christ's love for us and ours for Him and His (Ephesians); it is the Christian's for the brethren (Philippians); it is God's and Christian love (Colossians); it is God's and Christ's, and of Christians for one another (1 and 2 Thessalonians); it is personal affection for Paul (Philemon); in the Pastoral Epistles it is the love of Christians for one another (*phileō* once) and love of Christ's appearing. In the remaining books, it is God's love (James), Christian love (Hebrews, 2 Peter), our love for Christ and one another (1 Peter), God's love for us and Christian love of God and one another (Johannine Epistles), God's and Christian love (Jude), Christ's and Christian love (Revelation, where *phileō* is used interchangeably of Christ's love).

Analysis of the above references to Divine and Christian love will reveal three main varieties. There is:

(*a*) *The love of God,* which is completed when Christians love one another; it unites them to the Father and to Christ and dwells in their hearts. This love is revealed by Christ, and shared by Himself, but it was already manifested in the creation of the world, in Divine providence, and God's dealings with man in general. Paul seems to be referring to this when he speaks so often of 'grace' (q.v.). For this Divine love in its various aspects, see 1 Jn 2[5] 3[24] 4[11f 16–21]; Jn 17[21–26]; Jn 3[16f]; Ro 5[5–8]; Ja 1[17f], 1 P 4[19]; Ro 2[4] 9[22], 1 Ti 1[16], 1 P 3[20]; Ro 8[35, 39], 2 Co 5[14], Ga 2[20], Eph 3[19].

(*b*) *The love of Christians towards God and Christ,* which is not so much a spontaneous response to the above, though it is caused by it (1 Jn 4[19]), but it is implanted in the heart by God the Spirit Himself (Ro 5[5], Gal 5[22], Eph 3[16–17]). It displaces the old loves in the Christian's life (of money, the world, self, and pleasure (1 Jn 2[15ff], Ja 4[4], 2 Ti 3[2–5], Lk 16[13f], Jn 15[19–24]). Unbelief, the reverse of faith, is inconsistent with love for God and leads to persecution of Christians (Ro 8[7, 38f], Gal 4[29], 1 Jn 3[12f]).

(*c*) *Christians' love for all men, especially fellow Christians*; this is the most common use of 'love' in the NT. This too is not spontaneous but is rather a duty and a commandment and a proof of the Christian's love for God. 1 Co 13[4–7] is the best description of the love required of Christians, in all its detail: the reverse of jealousy, boastfulness, arrogance, and rudeness; it is patient and kind, gives way to others without resentment or irritability; sympathetic, encouraging, optimistic, and unselfish. It was this quality which Paul was ever placing before the minds of his converts as the goal which may be achieved with the help of the Spirit, and without which all spiritual gifts and accomplishments appear very small. It is an expansion of the second half of Jesus' summary of the Law. It is also the means by which God's own love may reach the world.

G. G. F.—N. T.

LOVE FEAST (AGAPE).—The common meal of the early Christians, which took its name from a specialized meaning of the word for love (*agapē*). The custom dates from apostolic days, and was connected with the observance of the **Eucharist** (q.v.). The 'breaking of bread in their homes' (Ac 2[46]) probably included both under the title 'the Lord's Supper' (1 Co 11[20]). In Ac 20[7] we are told that a religious observance connected with the Agape continued until dawn—though this may have been an exceptional case, Paul's farewell visit at Troas. The scandalous behaviour which Paul rebuked in 1 Co 11[17–34] shows that not all who attended the observance were fit to communicate; again, this case was probably unusual. More serious evils were introduced by the false teachers described in Jd 12: 'These are blemishes

[margin, *or* reefs] on your love feasts, as they boldly carouse together, looking after themselves.' The writer is dependent upon 2 P 2[13] : 'They count it pleasure to revel in the daytime. They are blots and blemishes, revelling in their dissipation (margin, *other ancient authorities read* love feasts), carousing with you.' But the criticism is so extravagant one cannot help recalling parallels from later ecclesiastical controversy and polemics which went beyond the facts in the case.

In spite of the disorders, which marred the religious value of these social club feasts and led eventually to their suppression, they lasted for a considerable time. Ignatius of Antioch wrote to the Church in Smyrna *c* 110 (*Smyrn.* 8) : 'See that you follow the bishop. . . . It is not lawful either to baptize or to hold a love feast apart from the bishop, but whatever he approves is also pleasing to God ; so that whatever you do may be safe and secure [or binding].' The context of this passage implies that this included the Eucharist. Tertullian (*Apol.* xxxix. 17 f) gives a vivid description of the feast explained by its own name. 'Before reclining at table, the banqueters first taste [the food] of prayer to God. Only so much is eaten as will satisfy hunger ; only so much is drunk as will meet the needs of the modest. They satisfy themselves as those will who recall that even during the night they must worship God. Their conversation is that of those who know the Lord is listening. After the water is brought for the ablutions of the hands [after dinner], the lights are brought in, and each is asked to stand forth before the others and sing the praise of God, either from his own heart or from the Holy Scriptures. This also is evidence of how little we drink. Then the banquet ends, as it began, with prayer.'

The food apparently consisted of bread, fish, vegetables, and wine—the diet of the poor. The pictures of Love Feasts found in the murals in the catacombs give a prominent place to fish (*Ichthus*, 'fish,' was a common symbol or password among the Christians ; it was the abbreviation of *Iēsous Christos Huios Theou Sōtēr* : Jesus Christ Son of God Saviour). Interesting examples of the prayers used are found in the *Didache*. The direction to give thanks 'after you are satisfied [with food]' clearly associates the prayer in ch. 10 with the Love Feast rather than the Eucharist : 'We give thee thanks, Holy Father for thy Holy Name which thou hast made to tabernacle in our hearts, and for the knowledge and faith and immortality, which thou hast made known to us through thy Servant Jesus. To thee be the glory for ever and ever. Thou, Almighty Master, didst create all things for thy Name's sake, and didst give food and drink to men for enjoyment, that they might render thanks to thee ; but didst bestow upon us spiritual food and drink and eternal life through thy Servant. Above all we give thanks to thee that thou art mighty. To thee be glory for ever ! Remember, O Lord, thy Church, to deliver it from all evil and to make it perfect in thy love, and to gather it together, in its sanctification, from the four winds into thy Kingdom which thou hast prepared for it ; for thine is the power and the glory for ever. Let grace come and let this world pass away ! Hosanna to the God of David ! If any man is holy, let him come. If any man is not, let him repent. *Marana tha* ! Amen. (But permit the prophets to hold Eucharist as they will.)' This final sentence (or rubric) has led some modern scholars to doubt if the two chapters (9 and 10) are sharply to be distinguished, as referring first (ch. 9) to the Eucharist and then (ch. 10) to the Love Feast. Both begin alike : (ch. 9) 'Concerning the Eucharist, *give thanks as follows* : First concerning the Cup. . . . And concerning the Broken Bread. . . .' (Ch. 10) 'After you are satisfied, *give thanks as follows*. . . .' (Both prayers are eucharistic.) Moreover, the date of the *Didache* is still debated, many dating it *c* A.D. 135 or later, others *c* A.D. 98 (as if to anchor it securely within the 1st cent. !). In any event, the term 'Love Feast' does not appear in the *Didache* ; the preferred term is Eucharist.

The term Love Feast was popular in the 19th cent. among groups which emphasized the social and religious fellowship (*koinōnia*) of the communion rite, and they sometimes used it to cover the whole observance of the Supper. But the usage of the NT does not support this one-sided interpretation. The separation of the Love Feast from the Eucharist seems to have been due largely to the attitude of the Roman government, which was always suspicious of secret societies, especially those claiming to be religious. Pliny's letter to Trajan (x. 96, *c* A.D. 110) speaks of the celebration of the Eucharist in the early morning as followed by a simple meal, which had been omitted since the edict forbidding clubs. On the other hand, fear of calumnies regarding any more or less secret feasts, and experience of such disorders as were found in Corinth and reflected in 2 Peter and Jude, provided motives which must have hindered the practice in certain places and eventually extinguished it.

A. E. B.—F. C. G.

LOVELY.—In 2 S 1[23] the word means lovable. Elsewhere it is used of something which is agreeable and pleasing (as Esther seemed to the king in Est 5[1], where the Greek word is used in the LXX) ; the same Greek word with the same meaning is found in the NT at Ph 4[8], but in Sir 47 20[13] this word has the rather different sense of popularity with respectable men ('beloved' RSV). N. T.

LOVER.—In the OT it is used with the less worthy sense of erotic love, as a *paramour*, especially in Jeremiah, Ezekiel, and Hosea ; but also with the idea of ordinary friendship in Ps 38[11] 88[18]. In the NT, there are lovers of pleasure, who are contrasted with lovers of God (2 Ti 3[4]), lovers of goodness (Ti 1[8]), of self and of money (2 Ti 3[2]). These are parts of a Greek compound word, compounded with *phil-* (see the article on Love). N. T.

LOVINGKINDNESS.—Two ideas are blended in this expressive word ; it denotes *kindness* which springs from the loyalty of *love*. It is the frequent translation (30 times in the AV, 42 times in the RV) of the Hebrew word *ḥesedh* (which occurs nearly 250 times altogether), which G. A. Smith renders 'leal love' (*Book of the Twelve Prophets*, rev. ed., i. 255). N. H. Snaith renders 'covenant love' (*Distinctive Ideas of the OT*, pp. 94 ff.), and A. R. Johnson 'devotion' (*Interpretationes ad VT pertinentes S. Mowinckel missae*, pp. 100 ff.). AV and RV most frequently translate *ḥesedh* '**mercy**' and not seldom '**kindness,**' while RSV has '**steadfast love**' 177 times. The American RV has 'lovingkindness' uniformly when the reference is to God's love to man. The adoption of this suggestion would bring out the connexion between 'lovingkindness' as a fundamental attribute of the Divine nature (Ex 34[6f] etc.), its poetic personification (Ps 42[8] 57[3] 89[14]), and the appeal to God to be true to Himself—to save and redeem 'for His lovingkindness' sake' (Ps 6[4] 44[26] 115[1]). For the combination of 'lovingkindness' with 'faithfulness' see Ps 89, where each word occurs seven times, and cf La 3[22f], Is 55[3]. Cf also Love.

J. G. T.—H. H. R.

LOWLAND.—See Plain (5).

LOZON.—One whose sons returned with Zerubbabel, 1 Es 5[33] ; called **Darkon** in Ezr 2[56], Neh 7[58].

LUBIM.—See Libya, Libyans.

LUCAS, Phn 24 (AV), for **Luke.**

LUCIFER, Is 14[12] (AV).—See Stars.

LUCIUS.—1. A 'consul of the Romans' (1 Mac 15[16ff]), who transmitted the decree of the Senate in favour of the Jews. Probably the reference is to Lucius Calpurnius Piso, consul in 139 B.C. **2.** Of Cyrene, one of certain prophets and teachers at Antioch in Syria, mentioned in Ac 13[1], to whom it was revealed that Paul and Barnabas should be separated for the work to which they had been called. The suggestion that he was the same person as St. Luke, the Evangelist, has nothing to support it. **3.** Mentioned in Ro 16[21], as sending greetings to the brethren at Rome. Possibly the same person as **2**, but of this there is no certain proof. M. St.

LUCRE.—The English word 'lucre' is in AV always qualified by the adjective 'filthy,' because the word itself had not then the offensive meaning it has now. Erasmus speaks of God turning men's wickedness 'into the lucre and encreace of godlynesse.' It simply meant gain. Filthy lucre means sordid gain. RSV does not use the word.

LUD, LUDIM.—1. In Gn 10^{22}, 1 Ch 1^{17} *Lud* is named as one of the sons of Shem, along with the well-known Elam, Asshur, and Aram, and the uncertain Arpachsad. In this list the Elamites at least are not Semitic, but are regarded as such by reason of association with the Babylonians. In a similar way the Lydians, who are usually identified with the people of **Lydia** (q.v.), may be associated here with the Semitic Assyrians, whose rule once extended to the borders of the Lydian empire.

2. In Gn 10^{13}, 1 Ch 1^{11} *Ludim* is the name given to one of the descendants of Egypt (Mizraim) in a list of peoples all undoubtedly African. Here there can be no question of Asiatic Lydians. Either an unknown African people is referred to, or we should read *Lubim* = **Libyans** (q.v.). This reading would suit Jer 46^{9}, and *Lub* has been suggested for *Lud* in Ezk 27^{10} 30^{5}, Is 66^{19}. But it is improbable that the same error has invaded so many passages. J. F. McC.—H. H. R.

LUHITH.—The ascent of 'Luhith' (Is 15^{5}) is probably the path called the 'descent *or* going down of Horonaim,' the latter lying, probably, higher than Luhith (cf Jer 48^{5}). The *Onomasticon* places Luhith between Areopolis and Zoar, but the site cannot be identified.

LUKE (EVANGELIST).—Luke, a companion of St. Paul, is mentioned in Col 4^{14}, Phn ^{24}, 2 Ti 4^{11}, in all three places in connexion with Mark. He is generally believed to be the author of the Third Gospel and Acts, and therefore a frequent fellow-traveller with the Apostle of the Gentiles. (See the following article.) He has been identified, but without probability, with **Lucius of Cyrene** (Ac 13^{1}). He may have been converted by St. Paul as some have conjectured, possibly at Tarsus, where he could have studied medicine. (But the theory that Luke-Acts shows evidence of special knowledge of medicine has been greatly weakened by modern research, especially by H. J. Cadbury's demonstration that Luke's 'medical knowledge' was not greater than that of Lucian, who was not a physician.) Tertullian calls St. Paul his 'illuminator' and 'master' (*adv. Marc.* iv. 2), which perhaps has this meaning; but it may be a mere conjecture. Luke joined St. Paul on his Second Missionary Journey, apparently for the first time, at Troas. He was not an eye-witness of the gospel events (Lk 1^{2}), but had ample means of getting information from those who had been. He was a Gentile (cf Col 4^{10f} and v.^{14}); thus he could not have been of the Seventy, or the companion of Cleopas (Lk $24^{13, 18}$), as some have thought. He was a doctor (Col 4^{14}), and perhaps had attended St. Paul in his illnesses. A tradition, perhaps of the 6th cent., makes him a painter, who had made a picture of the Virgin. He was possibly of servile origin; his name, which seems to be an abbreviation of Lucanus, Lucius, Lucilius, or Lucianus, may well have been a slave's name; and physicians were often slaves. Chrysostom and Jerome take him for 'the brother who is famous among all the churches for his preaching of the gospel' (2 Co 8^{18} RSV; see GOSPEL). Other traditions connect him with Achaia, Bithynia or, Alexandria; some assign to him a martyr's crown.

The great difficulty in the identification of Luke, the companion of Paul, with the author of the Third Gospel and the Acts of the Apostles is that Paul himself, especially in 1 and 2 Corinthians, took a far more authoritative position relatively to his own converts and their churches than is represented or assumed in Acts; the author sees Paul in the light of a later period, according to which he and the original Twelve in Jerusalem were on the best of terms, Paul readily submitting to their authority. From Paul's own letters it is clear that in reality a wide gulf separated them, which Paul did his best to close, especially by his 'collection' for the poor among the 'saints' in the mother church. The relations between Christianity and Judaism are also differently described in Acts than in the Pauline letters. Accordingly, many modern scholars hesitate to identify Luke with the author of the Gospel), though admitting the possibility that he was the author of the 'we-sections' in the latter **3**, part of Acts. See next article, **3**.

A. J. M.—F. C. G.

LUKE (GOSPEL ACCORDING TO) AND ACTS OF THE APOSTLES.—1. Unity of authorship.—That the two books are from the same hand is practically indisputable. Both are addressed to a certain Theophilus (Lk 1^{3}, Ac 1^{1}), who is otherwise quite unknown; and in the opening words of Acts the author refers to 'the first book,' in which he has 'dealt with all that Jesus began to do and teach, until the day when he was taken up, after he had given commandment through the Holy Spirit to the apostles whom he had chosen.' The reference here is manifestly to the Gospel; and we are clearly intended to conclude that Acts is a continuation of the Gospel, and, consequently, the work of the same author. This was, in fact, the conclusion universally drawn in antiquity; and it is the conclusion which holds the field to-day. It is, of course, open to an objector to point out that the direct evidence is drawn entirely from a comparison of the prefaces of the two books, and to maintain that a different author, writing Acts, may well have wished to represent it as a continuation of the Gospel and composed a preface accordingly. Such a supposition, however, in itself improbable, is made very much more improbable by closer inspection of the books themselves. From this it appears that there are a number of words which are either very rare or do not occur at all elsewhere in the NT, but which are fairly frequent in Luke–Acts—*e.g.* the adverb *parachrēma* (='immediately') occurs ten times in Luke, seven times in Acts, but elsewhere in the NT only twice (Mt 21^{19f}). Again, characteristic phrases that are found in the Gospel are found also in Acts—thus, the phrase 'as his custom was' is found only at Lk 4^{16} and Ac 17^{2}, and in each case it is connected with entry into a synagogue on the Sabbath. The same authors' interests, too, are discernible in both books (see **6**). Hence, if the author of both books is not the same, the later writer must so successfully have studied, absorbed, and imitated his predecessor's style, characteristics, and interests, as to make it impossible to tell the difference. That anyone should have been capable of doing this (even assuming that anyone would have wished to do it) is incredible.

2. Contents.—The two books taken together give the story of the origins of Christianity from its beginnings in remote Judaea 'in the days of Herod' (*i.e.* Herod the the Great, 37–4 B.C.) until its firm establishment in Rome, the capital of the Empire, in the seventh decade of the 1st cent. A.D.

The Gospel opens with a Preface (the only one of its kind in the NT) setting forth the author's purpose in writing, his qualifications for writing, and the circumstances in which he wrote (1^{1-4}). This is followed by a collection of 'Birth and Childhood' narratives (1^{5}–2^{52}), which are noteworthy as giving an account of the birth and childhood of John the Baptist as well as of Jesus: all these narratives are peculiar to Luke. With the date at 3^{1f} (obviously designed to set the events he is about to record firmly within their historical context) the evangelist introduces us to the Ministry of Jesus, which in turn is introduced by the Ministry of John the Baptist. From this point until the close of the Galilean ministry (9^{50}) the material included is very roughly the same as that found in the earlier parts of Matthew and Mark: for the most part it appears in very much the same order, and not infrequently in very much the same words—typical exceptions are the Rejection in the Synagogue at Nazareth (4^{16-30}, which may reasonably be held to 'replace' the similar incident recorded at

LUKE (GOSPEL) AND ACTS

Mt 13[53-58] and Mk 6[1-6] as having happened later on, but in the strict sense cannot be regarded as 'parallel'), the Call of the First Disciples (5[1-11], which has points of contact both with the narratives recording the call of the same four disciples at Mt 4[18-22] and Mk 1[16-20], and also with the story of the Miraculous Draught of Fishes at Jn 21[1-14]), and the Raising of the Widow's Son at Nain (7[11-17], peculiar to Luke). At 9[51] a new section begins—the Journey to Jerusalem (9[51]–19[28]): it is impossible here to follow the route of the journey in anything except the broadest outline, and it looks rather as if the evangelist had used this section of his Gospel to gather together material which had no very obvious setting elsewhere: to this section belong several well-known incidents peculiar to Luke (*e.g.* the Mission of the Seventy, 10[1-16]; the Healing of the Ten Lepers, 17[11-19]; the Story of Zacchaeus, 19[1-10]), as also a striking series of peculiarly Lukan parables (the Good Samaritan, 10[29-37]; the Importunate Friend, 11[5-8]; the Rich Fool, 12[16-21]; the Barren Fig Tree, 13[6-9]; the Prodigal Son, 15[11-32]; the Unjust Steward, 16[1-13]; the Rich Man and Lazarus, 16[19-31]; the Unjust Judge, 18[1-8]; the Pharisee and the Publican, 18[9-14]). The account of the ministry in Jerusalem (19[29]–21[37]) follows similar lines to the corresponding accounts in Matthew and Mark. With the account of the Passion and Resurrection (22[1]-24[53]), however, it is otherwise; there are a number of incidents and sayings not found elsewhere (*e.g.* the account of Jesus before Herod, 23[6-16]; the Lament over the Daughters of Jerusalem, 23[28-31]; the story of the Two Disciples at Emmaus, 24[13-35]); when the same incidents or sayings do occur elsewhere the Lukan version almost always has a distinctive 'slant'; while a comparison of the Lukan language in such cases with the language used in the other Gospels suggests the minimum of connexion.

Acts takes up the story where the Gospel left off. 'You shall be my witnesses in Jerusalem and in all Judaea and Samaria and to the end of the earth' the Risen Lord is reported as saying to his disciples at the Ascension (1[8]); and these words may be taken as the programme of the book. It falls naturally into two parts. The first part (1[1]–12[25]) deals with the activity 'in Jerusalem and in all Judaea and Samaria'; the gospel-message spreads outward from Jerusalem and as far northward as Antioch in Syria (11[19]); at Caesarea the Gentile, Cornelius, is admitted to the Church (10[1-48]); and at Antioch preaching to Gentiles is undertaken of set purpose (11[20]). Throughout these events Peter is the leading figure. But in the second part of the book, which extends the horizon 'to the end of the earth' (13[1]–28[31]), the reader's attention is fixed on the converted Pharisee, Saul. At 13[9] his name is changed to Paul. By now he has already become a leader, in fact the outstanding leader, of the whole world-wide Christian mission. And we follow him on his travels, from Antioch (13[3]) back to Antioch (14[27]), again through Asia Minor (15[36]–16[10]) and on to the mainland of Europe (16[11]–18[17]), back again to Antioch (18[22]), once more through Asia Minor and the European mainland (18[23]–20[12]), on his last journey to Jerusalem (20[13]–21[16]), and then finally to Rome (27[1]–28[16]). The Church has now expanded, and the gospel-message has been carried from the religious capital of Jewry to the capital of the civilized world.

3. Author.—Ecclesiastical tradition, from the days of Irenaeus (*c* A.D. 180) onwards, is unanimous that the author was Luke. With this tradition there is no need to quarrel. Luke is mentioned only three times in the Pauline Epistles (Col 4[14], 2 Ti 4[11], Phn 24), and nowhere else in early Christian literature. His obscurity is accordingly the best possible argument for the soundness of the ecclesiastical tradition. The tradition, moreover, is to some extent supported by the internal evidence of Acts. From Acts it would appear that the author was a companion of Paul; he joins Paul at Troas on his Second Journey (Ac 16[10]); and frequently thereafter he betrays his presence as a fellow-traveller by using the pronoun 'we' (*e.g.* Ac 20[13] 28[11]). If these so-called 'we-passages' are due to genuine reminiscence (and there is no sound reason for supposing they are not), and we take the names of Paul's companions given in the Epistles, we find that all but four must be excluded, either as having joined Paul after his arrival in Rome (the author certainly made the journey with him, Ac 27[1]), or as being mentioned in a manner inconsistent with authorship. The four exceptions are Crescens, Jesus Justus, Titus, and Luke. Neither Crescens (2 Ti 4[10]) nor Jesus Justus (Col 4[11]), so far as we know, had either long or specially intimate connexions with Paul. The effective choice, therefore, is between Titus and Luke; and tradition favours Luke. According to Col 4[10-14] Luke was a Gentile and a physician; and even if it is possible to overestimate the importance of the allegedly 'medical' language and interests of the author of Luke–Acts (*e.g.* Lk 4[38] 'a *high* fever'; Ac 28[7-10]), there can be no doubt about his interest in Gentiles and the Gentile mission (see **6**)—indeed, such a phrase as 'in their language' with reference to Aramaic (Ac 1[13]) betrays that he was a Gentile himself. The tradition, therefore, is amply confirmed by the contents of both the Gospel and Acts.

The Anti-Marcionite *Prologue to Luke* (either late 2nd cent. or early 3rd cent.) describes Luke as 'by nation a Syrian of Antioch'; Eusebius (*HE* III. iv. 7) says he was 'by birth of those from Antioch'; and this account of his origin is repeated by later Fathers. However, its accuracy is doubted because of 'the cold way' in which the Syrian Antioch is referred to in Acts. Some conjecture that Pisidian Antioch is meant, and the description of the scenes in that neighbourhood is so vivid that it might well be by an eye-witness. But against this it is to be noted that the 'we-passages' in Acts have not yet begun, and this seems decisive against the writer having been present. Others believe the author to have been a Macedonian of Philippi, since he took so great an interest in the claims of that colony (Ac 16[12]). On the other hand, he appears to have had no home there but went to lodge with Lydia (Ac 16[15]), and only 'supposed' that there was a Jewish place of prayer by the riverside (Ac 16[13]). His interest in Philippi may best be accounted for by his having been left in charge of the church there (Ac 17[1]-20[6]; in the interval between Paul's departure from Philippi on his Second Journey and his return on the Third the pronoun 'they' is used instead of 'we'). Yet he may well have been a Macedonian of a Greek family once settled at Antioch. At any rate, he was certainly a Gentile, not without some contempt for the Jews; there is no evidence for his having been a Roman citizen, as was Paul; and his essentially Greek outlook shows itself in his calling the inhabitants of Melita 'barbarians' (Ac 28[2]), and in many other ways.

4. Style and Characteristics.—The author of Luke-Acts is the most accomplished stylist in the NT. The Preface at the head of the Gospel reminds us at once of similar prefaces in contemporary pagan writers, and its Greek is so much more idiomatic and literary than anything found elsewhere in the NT (or indeed in the rest of his own work) that it seems as if Luke was making a deliberate attempt to catch the eye of the world of letters. After this Preface, however, the change is abrupt. At Lk 1[5] we are introduced to a simple, 'old world' narrative such as might have come straight out of the pages of the OT, and which is marked by a very high concentration of Semitisms (*i.e.* expressions which though odd or inexplicable in Greek are readily explicable as literal translations of a Hebrew or Aramaic original). This concentration is highest in Lk 1 and 2, but Semitisms are found regularly (even if less frequently) throughout the rest of the Gospel and also throughout Acts (though again less frequently towards the end): as examples may be quoted 'And he sent yet a third' (literally 'And he *added to send* a third' Lk 20[11]) with which may be compared 'He proceeded to arrest Peter also' (literally 'He *added to arrest* Peter also' Ac 12[3]), and 'all who dwell upon *the face of* the whole earth' (Lk 21[35])

LUKE (GOSPEL) AND ACTS

with which may be compared 'every nation of men to live on all *the face of* the earth' (Ac 17[26]). A possible explanation of these Semitisms is that Luke derived them from Semitic or Semitizing sources. To some extent this may be true (see **5**). But the more probable explanation of the majority of them, in the light of a close study of their nature and distribution, is that they are due to conscious imitation of the Septuagint. They should, therefore, be termed 'Septuagintalisms' rather than 'Semitisms'; and we should think of Luke having deliberately employed them to emphasize the 'Biblical' character of his theme. That he could write good literary Greek is proved by the Preface to the Gospel. He chose, in Lk 1 and 2, to exchange this for a patently OT style because he was writing of the period before the birth of Christ. The Ministry took place in Palestine among Semitic-speaking people; the narrative of the Ministry accordingly has a suitable Semitic flavour. The same is true of the early chapters of Acts, which record the growth of the Church in Palestine; and it is only when the Church expands beyond Palestine that the Semitisms are reduced to the minimum. The style of Luke-Acts is thus seen to be an essential part of the plan of the work as a whole. The language, as it were, sets the scene.

According to the Preface to the Gospel the author was not an eye-witness of the events he describes; yet he has a keen sense of effective composition, as can be seen from the way in which he narrates his incidents (*e.g.* that of the sinful woman, Lk 7[36–50]). The same sense is to be remarked in Acts, and the fact that no difference is discernible in this respect between the 'we-passages' and the rest of Acts makes it plain that Luke's powers of description were not dependent upon his having witnessed an incident himself. Despite the elaborate dating at Lk 3[1f], he is, on the whole, indifferent to chronology, and also (in the Gospel at least) to geography; time and again we meet vague phrases like 'on one of those days' (Lk 5[17]), or 'in a certain place' (Lk 11[1]), or 'on the way to Jerusalem he was passing along between Samaria and Galilee' (literally 'through the midst of Samaria and Galilee,' Lk 17[11]). And at times this vagueness and indifference to detail result in obscurity and incoherence, even if not in contradiction. Thus, at Lk 1[62] Zechariah is represented as deaf, although the angel had only threatened him with dumbness (Lk 1[20]); at Lk 9[10] Jesus withdraws 'apart to a city called Bethsaida'; and at Lk 19[13] the nobleman in the parable calls '*ten* of his servants' yet only *three* appear in the sequel (Lk 19[16, 18, 20]). Similarly in Acts the author seized on the (to him) significant features and ignores the insignificant: so he tells us practically nothing of the missionary journey through Cyprus (Ac 13[6]), though much work must have been done among the Jews on that occasion, while considerable space is devoted to the interview with the proconsul, Sergius Paulus. He leaves always a good deal to be understood; he states facts, and expects the reader to deduce the causes or inferences; he reports directions or instructions, and leaves it be inferred that they were carried into effect (*e.g.* at Ac 13[13f] the reason for Mark's departure is not stated, neither is any reason given for Paul and Barnabas going to Pisidian Antioch; at Ac 17[15] it is not recorded that the injunction was obeyed, but from 1 Th 3[1] it is clear that Timothy had rejoined Paul at Athens and had been sent away again to Macedonia, whence he came to Corinth at Ac 18[5]).

5. Sources.—The Preface to the Gospel states explicitly that the information contained in the Gospel was not first-hand; the evangelist knew of written 'narratives,' and he implies that he also had access to eye-witnesses, although he himself was not an eye-witness (Lk 1[1f]). The question, therefore, arises as to how much of the Gospel depends on written sources and how much on oral testimony. There is general agreement that the primary written source was Mark. There is also fairly general agreement that Luke, like the author of Matthew, drew largely from the hypothetical document, or documents, known as Q. Whether he used any other written sources besides these is debated, It is often maintained that the more important narrative sections peculiar to the Gospel (such as the birth-stories Lk 1[5]–2[52]) were drawn from written sources; and many would say the same of the peculiarly Lukan parables (such as the Good Samaritan, Lk 10[30–37]). But the Preface suggests that the author made careful inquiries and collected a fair proportion of his material by word of mouth. As a companion of Paul he was in an excellent position to do this. The two years at Caesarea would provide a first-rate opportunity. Mary, the mother of Jesus, may easily have been alive at the time (*c* A.D. 58), and Luke may have met, if not her, at least several of the women best known to her. In any case, he is bound to have come across many who had seen the Lord Himself in the flesh and companied with Him during His Ministry (including, perhaps, some of the Twelve), and it is to them that he presumably refers when he speaks in the Preface of the 'eye-witnesses and ministers of the word,' who 'delivered to us' an account 'of the things which have been accomplished among us.' If so, there is no need to conjecture additional written sources beyond Mark and Q. The considerable quantity of matter which is found in Luke alone is just as easily, and probably far more satisfactorily, accounted for as the evangelist's writing up of the results of his own inquiries.

The situation with regard to Acts is rather different. For the last part of Acts Luke was either his own informant or else could rely on information supplied by Paul or other members of the Pauline circle. For the earlier part (*i.e.* the part describing the growth of the Church in Palestine) he was in exactly the same position as he was in the Gospel; here he was necessarily limited either to the personal reminiscences of those he met in Palestine (*e.g.* Philip the Evangelist, who may have been the source of much of the material in Ac 6–8) or to written documents. Since he used at least two written sources in the Gospel there might seem at first sight to be a decided balance in favour of his having used written sources also in the first part of Acts. On investigation, however, the analogy breaks down. By the time Luke wrote, the term 'Gospel' had a very generally recognized content in Christian circles and there was plenty of written material available—Luke himself tells us that as a Gospel-writer he had 'many' predecessors (Lk 1[1]). But there is nothing whatever to suggest that anyone else before him had ever thought of writing 'Acts.' This means that through sheer force of circumstances there would be for Acts no written material available, irrespective of whether the author would have made use of it or not. And study of the actual text yields an equally negative result. Many have spent much time in trying to distinguish written sources in Acts; but there is no general agreement. If we are not prepared to leave the question open, we must admit quite candidly that so far as the evidence goes it is very definitely against written sources and in favour of Luke's having been indebted partly to the stories told in the churches that he visited with Paul, partly to the first-hand accounts given him by the many Christians that he came across (including Paul), and partly to his own personal recollections.

6. Author's Interests.—Luke gives us a greater insight into his personal interests and outlook than most NT writers. Quite apart from his possible use of 'medical' language, he has a very evident interest in cures of all kinds (see **3**), which is consonant with his having been a physician; it may even be that the interest in sorcery apparent in Acts is due to his having regarded sorcery as a rival to medicine (*e.g.* Ac 8[9–24] 13[6–12] 19[13–20]). In the Gospel several domestic scenes are described with understanding (*e.g.* Lk 2[41–51] 10[38–42] 11[5–8]), and the author's sympathy with, and interest in, women has often been remarked in both the Gospel and Acts (*e.g.* Lk 7[11–17] 8[2f] 23[27–31], Ac 1[14] 11[36–43] 21[5, 9]). Of other 'minor' interests may be mentioned navigation (the voyages by sea and the various harbours are described

LUKE (GOSPEL) AND ACTS

minutely and vividly, while the land journeys are passed over summarily, *e.g.* Ac 20$^{13-15}$ 21$^{1-3}$ 27^{1}–28^{13}) and the frequent references to angels as agents of God in His dealings with men (*e.g.* Lk 1^{11,26} 2^{9,13} 22^{43} 24^{4}, Ac 1^{10} 8^{26} 12$^{7-11}$ 27^{23}).

Of far greater importance, however, is the way in which certain major theological interests (perhaps we should rather call them 'themes') dominate the two books throughout. In Acts the task entrusted to the disciples at the Ascension was to be 'witnesses in Jerusalem and in all Judaea and Samaria and to the end of the earth' (Ac 1^{8}). The rest of the book shows how this task was carried out, attention being specially concentrated on the three missionary journeys of Paul, who preached always 'to the Jew first and also to the Greek' (Ro 1^{16} 2^{9}; cf Ac 13$^{44-49}$ 18^{5f}). Yet it was the latter aspect of this double mission that appealed especially to Luke, himself a Gentile; and in the Gospel his interest in the Gentile mission is reflected in almost every page. The aged Simeon in the Temple, with the infant Jesus in his arms, sings of the 'salvation' which God has 'prepared in the presence of all peoples, a light for revelation to the Gentiles' (Lk 2$^{30-32}$). The quotation from Isaiah at Mk 1^{3} is of one verse only, but at Lk 3$^{4-6}$ it is extended by two extra verses in order to end with the words 'and all flesh shall see the salvation of God.' The Seventy are sent out to preach (Lk 10$^{1-16}$)—proleptically, it seems—to the seventy nations of the world. Again, when Luke comes to rewrite Mark's End-time discourse (Mk 13) in ch. 21, he speaks of the destruction of Jerusalem as decreed by God 'until the times of the Gentiles are fulfilled' (Lk 21^{23f}), and we are reminded of Paul's argument in Ro 9–11, and of his formula 'a hardening has come upon part of Israel, until the full number of the Gentiles come in' (Ro 11^{25}). And it is in conformity with this guiding principle that the Ministry of Jesus is presented. Historically that Ministry was limited to Palestine and for the most part confined to Jews. But Luke never tires of stressing the interest taken by Jesus in the outcasts from official Judaism ('tax collectors,' 'sinners,' 'Samaritans') and the encomiums pronounced upon them (*e.g.* Lk 7$^{36-50}$ 10$^{30-37}$ 19$^{1-10}$). The Mission of Jesus, Luke is saying, was universal from the start; it was only circumstance that might make it appear that it was not.

In other ways, too, the Gospel reflects the author's theological interests as fully worked out in Acts, and often anticipates, as it were, the later situation in the Church. At Ac 19$^{1-7}$ an occasion at Ephesus is described when some 'disciples,' who had been baptized only 'into John's baptism,' had hands laid upon them by Paul, and at once received the Holy Spirit and 'spoke with tongues and prophesied' (*i.e.* they were received into the Church and showed immediate signs of having been legitimately received). In other words, it was axiomatic in the Church, and therefore for Luke, that John's ministry and baptism were merely preparatory. Accordingly, in his Gospel he emphasizes this aspect of the Baptist. John is appointed to 'go before' Jesus 'in the spirit and power of Elijah' (Lk 1^{17}); but he is *not* Elijah, and the section in Mk (9$^{9-13}$), which identifies him with Elijah, is designedly omitted. At Lk 3$^{15-17}$ Luke has rewritten his Markan source in order to include a categorical denial from John himself that he was 'the Christ' as many were imagining. And the account of the imprisonment of John by Herod at Mk 6$^{14-18}$ is transposed to Lk 3$^{18-20}$ so that John may be removed effectively from the scene before the Ministry of Jesus begins.

No less than sixteen times in Luke Jesus is referred to in narrative as 'the Lord' (*e.g.* Lk 7^{13} 10^{1}). Since this usage is characteristic of Luke, being found in neither Mark nor Matthew, it is not fanciful to see here the influence of the ecclesiastical phraseology with which the author was familiar. For Gentile Christians the central figure of the story, whatever he may have been on earth in Palestine, was the exalted object of their worship, whom they had been enabled by the Spirit to confess as 'Lord' at their conversion (1 Co 8^{5f} 12^{3}), and whom they referred to habitually as 'the Lord' in daily life (*e.g.* 1 Co 9^{1f} 10^{21}). Luke, in consequence, slips naturally into the title to which he was accustomed.

Similarly, with the Twelve. In Acts they are 'the Apostles' and function, at least in the earlier stages, as the supreme governing body of the Church at Jerusalem (*e.g.* Ac 8^{1} 15^{6}). But in the Gospel too they are called 'apostles' (Lk 9^{10} 17^{5} 22^{14} 24^{10}). The name is said (by Luke only) to have been given to them when they were chosen (Lk 6^{13}). Passages in Mark in which they appear in a discreditable light are either omitted (*e.g.* Mk 8^{32f} 10$^{35-45}$), or else palliated by the addition of an excuse—as when 'Peter and those who were with him' are said to have been 'heavy with sleep' on the Mount of Transfiguration and therefore not responsible for what they said (Lk 9^{32}), or when, in the Garden of Gethsemane, they are represented as sleeping 'for sorrow' (Lk 22^{45}). Here Luke's natural reverence for the Twelve obtrudes itself. For by the time he wrote his Gospel they were looked back upon, and up to, as the pillars of the Church.

Sometimes, again, we see him answering a problem that was pressing on his contemporaries. The angels at the Ascension had promised that 'This Jesus, who was taken up from you into heaven, will come in the same way as you saw him go into heaven' (Ac 1^{11}). The speedy return of Jesus in glory 'on the clouds of heaven' was thus, not unnaturally, expected. But the years went by and he did not return. The result was the despair of many. In this situation Luke has a message for the Church. The faint-hearted can fortify themselves from the very words of Jesus. When asked on one occasion by the Pharisees 'when the kingdom of God was coming' Jesus Himself had warned them that 'the kingdom of God is not coming with signs to be observed' (Lk 17^{20f}). The Parable of the Pounds, moreover, which speaks of 'a nobleman' going 'into a far country to receive kingly power and then return,' had been uttered precisely because there were some with Jesus at that moment who erroneously 'supposed that the kingdom of God was to appear immediately' (Lk 19^{11ff}). The anxious must therefore be patient and wait on God's good time. They need have no anxiety. 'Fear not, little flock,' Jesus had said, 'for it is your Father's good pleasure to give you the kingdom' (Lk 12^{32}). In all this Luke is clearly addressing himself to the situation and needs of the Church as he knew them. His interests, to a far greater extent than is often recognized, were the interests of the Church of his day.

7. Author's Purpose.—An indication of purpose has already been given in the preceding section. Luke was a Gentile. It is clear also that he was writing for Gentiles. Thus, he omits the Aramaic *talitha cumi* when he comes to reproduce Mk 5^{41} at Lk 8^{54}: he regularly substitutes Greek names and titles for Semitic (*e.g.* 'Zelotes' for 'Cananaean' at Lk 6^{15} and Ac 1^{13}, 'the Skull' for 'Golgotha' at Lk 23^{33}, and 'Master' for 'Rabbi' at Lk 9^{33}); he explains Jewish customs (Lk 22^{1}), and adopts generally a 'western' point of view—as when he uses 'Judaea' for the whole of Palestine (*e.g.* Lk 7^{17}, Ac 10^{37}) and alters Mark's description of the breaking up of the mud roof through which the paralytic was let down (Mk 2^{4}) and speaks instead of the man being let down 'through the tiles' (Lk 5^{19}). Since, then, the Gentile Mission is a dominant, if not *the* dominant, theme in both the Gospel and Acts (see **6**), it is hardly fanciful to suppose that the provision of an account of the origin of that mission was the main purpose Luke had in mind in writing. In part this supposition is borne out by his own words. 'It seemed good to me also,' he states in his Preface to the Gospel, 'having followed all things closely for some time past, to write an orderly account for you, most excellent Theophilus, that you may know the truth concerning the things of which you have been informed.' The implication here, however, is that Luke is addressing, not a group or class of people (whether Christian or pagan), but an individual,

and that that individual was not merely a Gentile, but also an instructed Gentile Christian. Unfortunately the name Theophilus by itself tells us little. The natural interpretation of the passage is that Theophilus was the real name of a converted pagan, probably of good social standing (the epithet 'most excellent' may mean that he was a Roman official—cf Ac 23^{25} 24^{3} 26^{25}, where it is applied to Felix and Festus), who had commissioned the work; in that case Theophilus will have been Luke's patron as Maecenas was the patron of Virgil. Some think it a pseudonym employed by Luke to conceal his patron's identity at a time when the profession of Christianity by those in high places might involve penalties. Others hold it to be a generic name for any Christian (since it means 'beloved of God'), and that Luke meant no more by it than 'Christian reader'; in which case the address is to the general Christian public, and the seemingly individual application is purely a literary device. But be this as it may, both the style and content of the Preface make us aware at the very beginning that 'the things which have been accomplished among us' are being presented, not to any narrow circle of half-educated Jews or Jewish-Christians, but to a wider and more cultivated Gentile audience, familiar with the conventions established by the writers of Greece and Rome.

At all events, throughout both books Luke manifestly has his eye on this wider public and is concerned to relate the history of Christianity to Roman history and to present it in the most favourable possible light from the point of view of the Roman authorities. The elaborate date at Lk 3^{1f} starts with a reference to 'the fifteenth year of Tiberius Caesar, Pontius Pilate being governor of Judaea.' In the narrative of the Passion the responsibility for the death of Jesus is unequivocally fixed on the Jews; at Lk 23^{2} they bring him to Pilate protesting 'We found this man perverting our nation, and forbidding us to give tribute to Caesar, and saying that he himself is Christ a king'; Pilate affirms categorically, no less than three times (Lk $23^{4, 14-16, 22}$), that he finds no justification for the charge; and it is only when he can do nothing to persuade them that he yields, unwillingly, to their demand that Jesus should be crucified. And similarly in Acts. Paul is justly proud of his Roman citizenship (Ac 16^{37} 22^{25-28}); and the generally sympathetic attitude towards him on the part of the responsible Roman magistrates contrasts strikingly with the persistent opposition and persecution of him by the Jews. In Cyprus the proconsul, Sergius Paulus, heard 'the word of God' and 'believed' (Ac $13^{7, 12}$): at Corinth, when the Jews made 'a united attack' on Paul and accused him in open court, another proconsul, Gallio, 'paid no attention' and 'drove them from the tribunal' (Ac 18^{12-17}); at Caesarea the slanders of the Jerusalem Jews carried no weight either with the procurator Felix (Ac 24^{22f}), or with his successor Festus (Ac 25^{14-21}); and after Paul had appealed to Caesar, and had made the journey to Rome, we are left with a picture of him living there 'two whole years . . . welcoming all who came to him, preaching . . . and teaching . . . quite openly and unhindered' (Ac 28^{30f}). It is clear that Luke intends to point out that there was nothing criminal in either Jesus or Paul, nor was there anything treasonable in what they taught. From Christianity the Empire had nothing to fear; and the best proof of the truth of this was a statement of facts from the very first. Looked at from this angle Luke-Acts takes on the character of an 'apology for Christianity' in two parts, and it may legitimately be held to anticipate, though in a rather different way, the Apologies of the 2nd cent.

8. Date and Place of Writing.—These very largely depend upon what we think was the author's main purpose in writing. Two dates are commonly suggested, an earlier date *c* A.D. 63, and a later one *c* A.D. 80–90. In favour of the earlier date it is argued that the second half of Acts gives a fairly detailed account of Paul's movements and activities, particularly in the later chapters. We are told how he was arrested in Jerusalem, imprisoned at Caesarea, 'appealed to Caesar,' and made the journey to Rome. And then, after the excitement of the journey, Acts ends with the picture of Paul living 'two whole years' in Rome 'preaching . . . and teaching . . . unhindered.' The reader wants to know what happened to Paul after all. Did he appear before Caesar? If he did, was he condemned or acquitted? Or if not, what did happen? The book clearly lacks a climax, and we feel instinctively that Luke owes us an answer to these questions. The fact that he gives no answer is said accordingly to be the best proof there possibly could be that at the time he was writing there was no answer to give, because Paul's fate was still undecided—*i.e.* Acts carries the narrative right down to the time of writing, and it was, therefore, finished two years after Paul's arrival in Rome, in A.D. 63, when the author himself was with him (Ac 28^{16}). Since at the beginning of Acts (the argument continues) Luke plainly refers to the Gospel as 'the first book,' in which he has 'dealt with all that Jesus began to do and teach, until the day when he was taken up' (Ac 1^{1f}), the Gospel must have been written previously. How long previously we cannot precisely say; but most probably also during the two-year period at Rome, or perhaps (if we may suppose that it survived the shipwreck!) during the three years that Paul was imprisoned at Caesarea (*c* A.D. 57–60).

In favour of the later date it is argued that Luke's knowledge of, and use of, Mark in the Gospel is decisive; Mark is usually dated *c* A.D. 65–67; we must allow time for its having been sufficiently widely known and respected to have been used by Luke as a main source; Luke, therefore, must have been written after A.D. 70, and Acts later still. Furthermore, there are indications that Luke was aware of the details of the Fall of Jerusalem which took place in A.D. 70 (Lk 19^{43f} 21^{20-24} 23^{27-32}). And if we add to this such considerations as have been mentioned in **6** (*e.g.* his attitude to the Twelve and his manifest concern to deal with the problem posed by the deferment of the return of Jesus) it appears that the claim that both Luke and Acts 'breathe the atmosphere of a later age' has substance; and a date *c* A.D. 80–90 seems more likely. It is possible, of course, to counter the arguments on either side; to point out, for example, against the later date that Luke's use of Mark is not nearly so decisive as is maintained, since the date of Mark is far from certain and it may easily have been written in the 40's or 50's, which would allow time for Luke to have used it in A.D. 61–63, or even in A.D. 57–60; or again, against the earlier date, that we can legitimately argue little from the end of Acts, since Luke himself refers to the Gospel as his 'first (not 'former') book,' and he may have intended to write a third in which the trial and death of Paul were described in detail—indeed, he may actually have written it, and it has been lost. But the issue really turns on the view we take of Luke as an author and of what he was trying to do. If we regard him merely as a historian, writing 'straight history,' then we shall probably incline to the earlier date. However, the more his interests, motives, and literary methods have been studied in recent years, the more obvious has it become that he was concerned far more to select and order his material to promote the causes he had at heart than simply to record 'what happened' for its own sake. If he was primarily an apologist for Christianity, and the origin and progress of the Gentile Mission his main theme, then the details of Paul's death were as irrelevant as the details of the great Apostle's birth and his life as a Jew. Moreover, after taking considerable pains to show that throughout Paul's career as a Christian he had been consistently vindicated by every properly constituted civil court before which he had been brought, to conclude with an account of his execution in Rome must have seemed to Luke a stultification of his purpose. So the end of Acts falls naturally into place; at the end of the Gospel the Church was securely rooted in Jerusalem, at the end of Acts in Rome. And it is for such reasons as these that

most moderns prefer the later date. As we have seen, if the earlier date be preferred, probably both books were written in Rome. They may also have been written in Rome if we prefer the later date, but not necessarily—the Anti-Marcionite *Prologue to Luke* (see 3), for instance, says that the Gospel was written 'in the regions of Achaea' (*i.e.* Greece).

9. Accuracy.—In the 19th cent., when it was the fashion among the more radical critics to date Luke–Acts in the 2nd cent., considerable play was made of the alleged inaccuracy of the author on certain points, with the result that his general trustworthiness as a historian was impugned. Particular points adduced were: (1) the description of the 'enrolment' in Lk 2^{1ff}, which was said to involve difficulties of all kinds, especially the statement that the enrolment took place 'when Quirinius was governor of Syria'—Quirinius did not become governor of Syria until A.D. 6, and his census in Judaea is to be dated in either A.D. 6 or 7, that is to say at least ten years *after* the death of Herod the Great (4 B.C.), in whose reign Luke implies that Jesus was born; (2) the reference at Ac 5^{36f}, in the speech of Gamaliel, to the rebellion of Theudas (A.D. 45) several years before it happened, and the placing of it *before* the rebellion of Judas (A.D. 7)—some explained this curious inaccuracy as due to a misconstruction on the author's part of a passage in Josephus's *Antiquities*, published *c* A.D. 93; and (3) the difficulty of reconciling the account of the Jerusalem Council in Ac 15 with the (presumably unimpeachable) statements in the Pauline Epistles, especially in Gal 1 and 2. Replies were made to these points, notably by Sir William Ramsay, who dedicated himself to a systematic defence of Luke as a reliable historian. It would have been impossible, Ramsay argued, for a 2nd-cent. writer to have avoided a number of pitfalls when describing situations involving Roman officials a century earlier. Yet these pitfalls the author of Luke–Acts avoids. Thus, the governor of Cyprus is correctly termed a 'pro-consul' and his name given as Sergius Paulus at Ac 13—Cyprus had only been under the rule of the Senate for a short time when Paul went there, and soon afterwards ceased to be so governed; much the same may be said about Gallio as 'pro-consul' of Achaia' (Ac 18^{12}); and, similarly, the right titles are given to 'the leading men' at Pisidian Antioch (Ac 13^{50}), 'the city authorities' (literally 'politarchs') at Thessalonica (Ac 17^{6}), and 'the Asiarchs' at Ephesus (Ac 19^{31}). The inference is that the author had moved in the world he is describing, and that he must be assigned, therefore, to the 1st, and not the 2nd, cent. There can be no doubt that, so far as the arguments drawn from the second half of Acts are concerned, Ramsay made out his case; and the controversy as he found it is now dead. On the other hand, it must be emphasized that in spite of his attempts to remove them, or palliate them, many of the difficulties still remain—in particular the 'enrolment' under Quirinius, Gamaliel's reference to the rebellion of Theudas, and the reconciliation of Ac 15 with Paul's own statements in Gal 1 and 2. In other words, Ramsay succeeded in proving only that Luke described accurately the world that he knew and had travelled in the company of Paul—*i.e.* the Graeco-Roman world in the period *c* A.D. 45–65. To go on from this and maintain that this shows him in general to be 'a trustworthy historian,' and that what he has to tell us about events in Palestine up to fifty years previously must therefore be accurate, in spite of evidence to the contrary, is unjustified. For the material in his Gospel Luke explicitly says in the Preface to the Gospel that he was dependent on information received; and we may reasonably assume that the same is true about the material in the first part of Acts. In consequence, it is not a simple matter of 'accurate' or 'inaccurate,' or of 'trustworthy' or 'untrustworthy,' throughout. There are in Luke–Acts varying degrees of 'accuracy' and different levels of 'trustworthiness'; for we have to take into account, not only the sources on which Luke was dependent, but also his interests, such motives as may have led him to select from his sources and on occasion to modify them, as well as his total purpose in writing. And the truth seems to be that he is most reliable when recording what he had seen and taken part in himself.

10. Luke–Acts in the Early Church.—Of 2nd-cent. writers the following can without doubt be said to have known the Gospel or to imply its previous composition: Justin Martyr (*c* A.D. 150), who gives particulars found in Luke only; Tatian, Justin's pupil, who included it in his Harmony (the *Diatessaron*); Marcion (*c* A.D. 150), who produced an adulterated version of it; and Celsus (*c* A.D. 180), who referred to the genealogy of Jesus from Adam. The first writers who name Luke in connexion with the Gospel are the author of the Muratorian Canon (*c* A.D. 170) and Irenaeus (*c* A.D. 180). There are probable references to Acts in Clement of Rome (*c* A.D. 95), in Ignatius (*c* A.D. 110), and in Polycarp (*c* A.D. 112): probably also in the Martyrdom of Polycarp (*c* A.D. 155). Full quotations are found towards the end of the century in Irenaeus and Tertullian (*c* A.D. 200), both of whom ascribe the book to Luke, as does also the Muratorian Canon. Moreover, the Apocryphal Acts of the 2nd cent. are built on the canonical Acts, which implies that their authors knew it and highly regarded it. H. F. D. S.

LUNATIC.—See MOON, POSSESSION.

LUST.—The English word 'lust,' which is now restricted to sexual desire, formerly expressed strong desire of any kind. And so, as Thomas Adams says, there can be a lusting of the Spirit, for the Spirit lusteth against the flesh (Gal 5^{17}).

LUTE.—See MUSIC AND MUSICAL INSTRUMENTS, 4 (1) (*b*).

LUZ.—1. A town mentioned in Gn 28^{19} 35^{6} 48^{3}, Jos 16^{2} 18^{13}, Jg $1^{23, 26}$. The exact locality is uncertain, and a comparison of the above passages will show that it is also uncertain whether Luz and **Bethel** were one or two sites. In Gn 28^{19} it is stated that Jacob changed the name of the place of his vision from Luz to Bethel (cf also Gn 35^{6}, Jg 1^{23}). The two passages in Joshua, however, seem to contradict this; both of them speak of Luz and Bethel as two distinct places. A possible solution is that Luz was the name of the old Canaanite city, and Bethel the pillar and altar of Jacob outside the city. **2.** Luz is also the name of a city built on Hittite territory after the destruction of the original Canaanite city, Jg 1^{26}. The site is unknown. T. A. M.

LYCAONIA meant originally the country inhabited by the Lycaones, a central tribe of Asia Minor. It is for the most part a level plain, which is merged on the north and east in the plains of Galatia and Cappadocia, and is bounded on the west and south by hills. It was and is an excellent country for pasturage. Its exact boundaries varied at different times. At some uncertain date a part of Lycaonia, containing fourteen cities, of which Iconium was one, was transferred to Galatia. (See ICONIUM.) Lycaonia was part of the Seleucid Empire until 190 B.C. Later the whole or part of it belonged successively to the Pergamenian kings, the Galatians, Cappadocia, and Pontus. At the settlement of 64 B.C. by Pompey, the north part was added to Galatia, the south-east to Cappadocia, and the west was added to the Roman Empire, to be administered by the governor of the Roman province Cilicia. The eastern part was independent under Antipater of Derbe. In 39 B.C. Mark Antony gave the western part (including Lystra and Iconium) to Polemon, but in 36 B.C. it was transferred to Amyntas, king of Pisidia, along with Galatia proper. (See GALATIA.) Amyntas conquered Derbe and Laranda, which were incorporated in the Roman Empire when Amyntas' kingdom was made into the province Galatia in 25 B.C. In A.D. 37 Eastern Lycaonia was placed under Antiochus of Commagene, along with most of Cilicia Tracheia, and got the name Lycaonia Antiochiana.

Under Claudius and Nero, when St. Paul visited the churches of South Galatia, Lycaonia included the two parts, the Roman and Antiochian. The former

part included Lystra and Derbe and a number of smaller places, and it is correctly described in Ac 14[6]. The Apostles, when persecuted at Iconium in Phrygia (or the Phrygian district of the vast province Galatia), crossed into Lycaonia (another district of the same province). In Ac 16[1-4] this territory is not explicitly named, but its two cities are mentioned by name. In Ac 18[23] the same cities are included in the expression used.

Both parts of Lycaonia were comprised in the united province of Galatia-Cappadocia under Vespasian and his sons (A.D. 70 onwards). They were again divided by Trajan in A.D. 106. About A.D. 137 'the triple eparchy' was formed, consisting of Cilicia, Lycaonia, and Isauria.

The name of the Lycaonians is not mentioned in the Bible, but their language is in Ac 14[11]: it was no doubt prevalent in the villages and smaller towns.

A collection of Christian inscriptions (of 3rd cent. A.D. and later) has been discovered in Lycaonia, which for numbers cannot be matched in any other Eastern province. They show the wide diffusion of Christianty in this district evangelized by St. Paul.

A. So.—E. G. K.

LYCIA was a mountainous country in the SW. of Asia Minor, which played very little part in the early history of Christianity. In it were situated many great cities such as **Patara** (Ac 21[1]) and **Myra** (Ac 27[5], cf 21[1]). The former was a celebrated seat of the worship of Apollo, the latter an important harbour, between which and Alexandria there was constant traffic in ancient times. Lycia was ruled by the Persians, and conquered by Alexander the Great. After his death it belonged to the Seleucid Empire, was then taken from Antiochus by the Romans in 188 B.C., and given to Rhodes at first, but afterwards freed in 168 B.C. It was one of the self-governing states, to which the Romans allegedly sent letters in favour of the Jews among the population in 138–137 B.C. (1 Mac 15[23]); see CARIA, DELOS. Lycia was made a Roman province by Claudius in A.D. 43 on account of dissensions between its cities, and in A.D. 74 was formed into a double province along with Pamphylia. A. So.—E. G. K.

LYDDA.—See LOD.

LYDIA was the name for the central part of the coast-land on the west of Asia Minor in ancient times, having been so called from the race which inhabited it, the Lydians. It was a prosperous kingdom with its capital at Sardis and the name of the last king, Croesus, has become proverbial for wealth. The Persians seized the kingdom from him in 546 B.C. ('Lydia' in Ezk 30[5] AV is corrected to '**Lud**' in RV and RSV). Alexander the Great conquered it in 334 B.C. The possession of it was disputed by the Pergamenians and Seleucids till 190 B.C., in which year it became definitely Pergamenian (cf 1 Mac 8[8]). In 133 B.C. it passed by will with the rest of the Pergamenian kingdom into the Roman Empire, and the whole kingdom was henceforth known as the province Asia, by which name alone it is indicated in the NT (see ASIA). After the formation of the province, the term 'Lydia' had only an ethnological significance. The chief interest of Lydia for us is that it contained several very ancient and important great cities (of the Ionian branch of Greek language and culture), Smyrna, Ephesus, Sardis, Colophon, etc., some of which were among the 'churches of Asia.' The evangelization of the country is connected with St. Paul's long residence in Ephesus (Ac 19[1ff]). Sardis has been the scene of important American excavations. A. So.—E. G. K.

LYDIA.—A woman of Thyatira in the district of Lydia, the west-central portion of the province Asia, a district famed for its purple dyes. She supported herself at Philippi by selling purple-dyed garments. Apparently she was wealthy, perhaps a widow. Lydia was not her proper name, but she was known as 'the Lydian' at Philippi. She is not mentioned by that name in Paul's Epistle to the Philippians, though her house was the first centre of the Christian community at Philippi (Ac 16[15, 40]). Zahn (*Apg.* 582) has supposed that the name was either Euodia (not Euodias!) or Syntyche (Ph 4[2]). The incident in Ac 16 illustrates the comparatively independent position of women in Asia Minor and Macedonia. A. J. M.—E. H.

LYE.—See NITRE and SOAP.

LYRE.—See MUSIC AND MUSICAL INSTRUMENTS, 4 (1) (*a*).

LYSANIAS.—This tetrarch is mentioned only in Lk 3[1]. His tetrarchy was the mountainous territory about Abila, at the S. end of the Anti-Lebanon range, about 18 miles NW. of Damascus. (See ABILENE.) There was a well-known Lysanias, son of the dynast Ptolemy of Chalcis in Coele-Syria (Dio Cassius, XLIX. xxxii. 5), who reigned 40–36 B.C. and was executed by Mark Antony. Some writers, assuming that Luke referred to this ruler, have accused Luke of an error in chronology at this point. But the reference was doubtless to a younger Lysanias who ruled in the 1st cent. and died some time between A.D. 28–37. Josephus refers to him (*Ant.* XIX. v. 1 [275]) and he is also known to us from inscriptions (*CIG* 4521, 4523; *OGIS* 606). F. C. G.

LYSIAS.—1. A general of Antiochus Epiphanes, charged with a war of extermination against the Jews (1 Mac 3[32ff], cf 2 Mac 10[11] 11[1ff]); defeated at Bethsura (1 Mac 4[34ff]); after the death of Epiphanes he championed the cause of Eupator, and finally suffered death along with the latter at the hands of Demetrius (6[14ff, 63] 7[2-4], 2 Mac 14[2]). Cf MACCABEES, **2.**

2. See next article.

LYSIAS, CLAUDIUS.—A Roman officer in command of the garrison in the fortress ('Castle') of Antonia, which adjoined the Temple in Jerusalem. He is said to have rescued Paul from a lynching mob. The title given him in Ac 21[31] is *chiliarchos*, 'commander of a thousand,' although the actual force in his charge may not have exceeded half or a third that number. Thus 'battalion major' would seem to approximate his rank. He was a Greek, as appears from his family name. According to Ac 22[28] he had purchased Roman citizenship 'for a large sum'; his first name indicates that he had been adopted into the Claudian gens. Beyond the further fact that he rescued Paul and sent him secretly to Caesarea with an accompanying letter to his superior in command, the procurator Felix (Ac 23[23ff]), we know nothing about him. J. S. K.

LYSIMACHUS.—1. The translator of the 'Letter of Purim' (=Esther) into Greek (Ad. Est 11[1]) in 114 B.C. **2.** The brother of the high priest Menelaus. He excited the hatred of the populace by his systematic plundering of the Temple treasures, and was finally killed in a riot (2 Mac 4[29, 39-42]).

LYSTRA (near modern *Khatyn Serai*).—A city situated about 18 miles SSW. of Iconium in the south of the Roman province Galatia and in the Lycaonian part of that province, connected with Pisidian Antioch by the direct military 'Imperial road,' which did not pass through Iconium. Both Pisidian Antioch and Lystra were 'colonies' (see COLONY) established by the Emperor Augustus in A.D. 6 to make the Roman occupation more effective. The site of Lystra was identified in 1885 by means of an inscription found there by the Wolfe expedition. Hardly any remains of the city exist above ground. No trace of the temple of Zeus-before-the-City (Ac 14[13]) has been found. The sacrifice to Barnabas and Paul as Zeus and Hermes (or the national Lycaonian gods corresponding to these) took place at the entrance to it. The town appears not to have been much Hellenized, and the uncultivated populace expressed themselves in Lycaonian. There were Jews in Lystra (Ac 16[1]), but there is no mention of a synagogue. Timothy was a native of Lystra, which was visited by St. Paul four times in all (Ac 14[6, 21] 16[1] 18[23]), and addressed by him in the Epistle to the Galatians. A. So.—E. G. K.

M

MAACAH.—1. A son of Nahor, Gn 22[24] (AV **Maachah**). **2.** The daughter of Talmai, wife of David, and mother of Absalom, 2 S 3[3] etc. **3.** The father of Achish, king of Gath, 1 K 2[39] (AV **Maachah**), possibly the same as **Maoch**, 1 S 27[2]. **4.** Wife of Rehoboam, and mother of Abijah, 2 Ch 11[20] (AV **Maachah**). When she is called 'daughter' of Absalom (1 K 15[2, 10], 2 Ch 11[20f]), 'granddaughter' may be intended, as Absalom had but one daughter, **Tamar**, who may have married Uriel of Gibeah, 2 Ch 13[2], where the name is given as **Micaiah** (AV **Michaiah**; cf Jos. *Ant.* VIII. x. 1 [249]). Maacah fell under the spell of loathsome idolatry, for which Asa deposed her from the position of queen-mother, which she appears to have held till then (1 K 15[13], 2 Ch 15[16]). **5.** A concubine of Caleb, 1 Ch 2[48] (AV **Maachah**). **6.** Wife of Machir, 1 Ch 7[15f] (AV **Maachah**). **7.** Wife of Jehiel, the father of Gibeon, 1 Ch 8[29] 9[35] (AV **Maachah**). **8.** One of David's warriors, father of Hanan, 1 Ch 11[43] (AV **Maachah**). **9.** The father of Shephatiah, the captain of the Simeonites, 1 Ch 27[16] (AV **Maachah**).

MAACAH.—A small Aramaean kingdom, whose people aided the Ammonites against David, and shared in their overthrow, 2 S 10[6ff], 1 Ch 19[6ff]. In 1 Ch 19[6] it is called **Aram-maacah** (AV **Syria-maachah**). The gentilic is **Maacathite**, Jos 13[11, 13], 2 S 23[34] (RSV 'of Maacah'). The Israelites were not able to drive out its inhabitants, Jos 13[13] (RV, RSV **Maacath**; AV **Maachathites**). See GESHUR.

MAACATH.—See MAACAH.

MAACHAH.—AV spelling of **Maacah** (q.v.) in most of its occurrences.

MAADAI.—One of the sons of Bani, who had married a foreign wife, Ezr 10[34], 1 Es 9[34] (AV, RV **Momdis**).

MAADIAH.—A priestly family which returned with Zerubbabel, Neh 12[5]; called **Moadiah** in v.[17].

MAAI.—One of the sons of Asaph who took part in the dedication of the walls, Neh 12[36].

MAALEH-ACRABBIM, Jos 15[3] (AV).—See AKRABBIM, ASCENT OF.

MAANI.—1. 1 Es 9[34] (AV); see BANI, **9.** **2.** 1 Es 5[31] (RV); see MEUNIM.

MAARATH.—A town of Judah, Jos 15[59], possibly modern *Beit Ummâr*. Some think it may be the same as **Maroth** (q.v.).

MAAREH-GEBA.—The place from which the men placed in ambush rushed forth to attack the Benjamites, Jg 20[33] (RV; AV 'the meadows of Gibeah'; RVm 'the meadow of Geba'). There can be little doubt that we should emend MT to '*west* of Geba' (so RSV), or better 'west of *Gibeah*.'

MAASAI.—The name of a priestly family, 1 Ch 9[12] (AV **Maasiai**).

MAASEAS, Bar 1[1] (RV).—See MAHSEIAH.

MAASEIAH.—1. A priest, of the sons of Jeshua, who had married a foreign wife, Ezr 10[18], 1 Es 9[19] (AV **Matthelas**, RV **Mathelas**). **2.** A priest, of the sons of Harim, who had committed the same offence, Ezr 10[21], 1 Es 9[21] (AV **Eanes**, RV **Manes**). Foreign wives had been taken also by **3.** and **4.**—a priest, of the sons of Pashhur (Ezr 10[22], 1 Es 9[22] [AV, RV **Massias**]), and a layman, of the sons of Pahath-moab, Ezr 10[30] (perhaps called **Moossias** [AV **Moosias**] in 1 Es 9[31]). **5.** A wall-builder, Neh 3[23]. **6.** One of those who stood upon the right hand of Ezra at the reading of the Law, Neh 8[4]; called **Baalsamus** in 1 Es 9[43] (AV **Balasamus**). **7.** One of those who expounded the Law to the people, Neh 8[7], 1 Es 9[48] (AV **Maianeas**, RV **Maiannas**). He is perhaps the same as the preceding. **8.** One of those who sealed the covenant, Neh 10[25]. **9.** A Judahite, Neh 11[5]; probably the same as **Asaiah** in 1 Ch 9[5]. **10.** A Benjamite, Neh 11[7]. **11, 12.** Two priests, Neh 12[41f]. **13.** A priest in the time of Zedekiah, Jer 21[1] 29[25] 35[4] 37[3]. **14.** The father of the false prophet Zedekiah, Jer 29[21]. **15.** A Levitical singer, 1 Ch 15[18, 20]. **16.** One of the captains who assisted Jehoiada in the overthrow of Athaliah, 2 Ch 23[1]. **17.** An officer of Uzziah, 2 Ch 26[11]. **18.** A son of Ahaz slain by Zichri the Ephraimite, 2 Ch 28[7]. **19.** Governor of Jerusalem under Josiah, 2 Ch 34[8]. **20.** In 1 Ch 6[40] **Baaseiah** appears to be a textual error for **Maaseiah.** **21.** Jer 32[12] 51[59] (AV); see MAHSEIAH.

MAASIAI, 1 Ch 9[12] (AV).—See MAASAI.

MAASIAS, Bar 1[1] (AV).—See MAHSEIAH.

MAASMAS.—Apparently a corrupt duplicate of Shemaiah in 1 Es 8[43] (cf v.[44]), where AV has **Masman**; cf the corresponding list in Ezr 8[16].

MAATH.—An ancestor of Jesus (Lk 3[26]).

MAAZ.—A Jerahmeelite, 1 Ch 2[27].

MAAZIAH.—A priestly family which constituted the 24th course, 1 Ch 24[18], Neh 10[8].

MABDAI, 1 Es 9[34] (AV).—See BENAIAH, **3.**

MACALON, 1 Es 5[21] (AV, RV).—See MICHMAS.

MACCABEES.—The name commonly given to the Jewish family otherwise known as **Hasmonaeans,** who led the revolt against Syria under Antiochus IV., and furnished the dynasty of leaders and rulers in the State thus formed. The family is said to have derived its name from a more or less mythical ancestor *Hasmonaeus*. The chief members of the house were:

1. Mattathias (166 B.C.), a citizen of Modin, and of priestly descent. When, in accordance with the policy of Antiochus IV., the royal officer attempted to establish heathen sacrifices in that town, Mattathias refused to conform, killed the officer and a Jew about to offer sacrifice, levelled the heathen altar to the ground, and fled with his five sons to the mountains. There he was joined by a number of other patriots and by 'the Pious' (see HASIDAEANS). After a few months of vigorous fighting in behalf of the Torah, Mattathias died, leaving the conduct of the revolt to his five sons. Of these, Eleazar and John were killed in the succeeding struggle without having attained official standing. The other three were his successors (1 Mac 2).

2. Judas (165–160 B.C.), called *Maccabee*, or 'the Hammerer,' from which surname the entire family came to be known. Judas was essentially a warrior, whose plans involved not only the re-establishment of the Torah, but also, in all probability, the re-establishment of the Jewish State in at least a semi-independent position. He defeated successively the Syrian generals Apollonius and Seron. Antiochus IV. then sent **Lysias,** the imperial chancellor, to put down the revolt, and he in turn sent a large body of troops against Judas, under three generals —Ptolemy, Nicanor, and Gorgias. Judas called the fighting men of Galilee together at Mizpah, organized them, and at Emmaus surprised and utterly defeated the forces of **Gorgias** (165–164). In the autumn of 164 B.C., **Lysias** himself came against Judas at the head of a great army, but was defeated at Bethzur. Thereupon, in December 164 B.C., Judas cleansed the Temple of the Syrian pollutions and inaugurated the re-established worship with a great feast. For a year and a half he waged war on his enemies on the east of the Jordan, while his brother Simon brought the Jews scattered

throughout Galilee back to Judaea for safety. Lysias returned with a great army, and at Beth-zacharias completely defeated Judas. He then laid siege to Jerusalem, where the citadel was still in Syrian hands. Jerusalem surrendered, but Lysias did not attempt again to disestablish the Jewish faith. He appointed Alcimus as high priest. Judas and his party remained in revolt, and when Lysias returned to Syria, undertook war against Alcimus himself. Demetrius I., who had succeeded Antiochus IV., sent **Nicanor** to put an end to the rebellion. He was defeated by Judas at Capharsalama, and retreated to Jerusalem, where he threatened to burn the Temple if Judas were not delivered up. This once more brought 'the Pious' to the support of Judas, who decisively defeated the Syrians at Adasa, Nicanor himself being killed. Josephus states that at this time Alcimus died and Judas was made high priest. Although this is probably an error, Judas was now at the head of the State. He sent ambassadors to Rome asking for assistance, which was granted to the extent that the Senate sent word to Demetrius I. to desist from fighting the Jews, the allies of the Romans. Before the message of the Senate could reach Demetrius, Judas had been defeated by the Syrian general **Bacchides**, at Elasa, and killed (1 Mac 3–9^{22}).

There is no sound basis for the notion that 'the Pious' (Hasidaeans) were interested only in religious reform and not in national independence. There was an occasion in the early years of the revolt when certain scribes of 'the Pious' sued for peace. During the parley their negotiators were perfidiously seized and killed (1 Mac 7$^{12-16}$). The folly of trusting the enemy was thus made clear, and the main body of 'the Pious' presumably continued to support Judas Maccabaeus (cf 2 Mac 14^{6}). After the war, during the struggle for power in the newly established revolutionary state, party conflict seems to have developed between 'the Pious' and the Maccabees (Hasmonaeans) over the questions of the legitimacy of the Maccabean claims to the high priesthood. This conflict can be dated as early as the composition of 1 Maccabees. Since its author, a court historian of the later Maccabees, disparages the legal interpretations of the scribes of 'the Pious' of his day by drawing attention to the rueful mistake of those scribes of 'the Pious' who during the revolution had misplaced their trust in a priestly family which, though from their point of view was legitimate, had turned out to be neither trustworthy nor just (1 Mac 7$^{12-18}$).

3. Jonathan (160–142 B.C.) undertook the leadership of the revolt, only to suffer serious defeat E. of the Jordan, where he had gone to avenge the killing of his brother John by the 'sons of Jambri.' For a time it looked as if Syria would again establish its complete control over the country. The high priest Alcimus died, and Bacchides, believing the subjection of Judaea complete, returned to Syria (159 B.C.). The land, however, was not at peace, and in the interests of order Bacchides gave Jonathan the right to maintain an armed force at Michmash. The fortunes of the Maccabaean house now rose steadily. As a sort of licensed revolutionist, Jonathan was sought as an ally by the two rivals for the Syrian throne, Alexander Balas and Demetrius I. Each made him extravagant offers, but Jonathan preferred Alexander Balas; and when the latter defeated his rival, Jonathan found himself a high priest, a prince of Syria, and military and civil governor of Judaea (152 B.C.). When Alexander Balas was conquered by Demetrius II., Jonathan laid siege to the citadel of Jerusalem, which was still in the hands of the Syrians. Demetrius did not find himself strong enough to punish the Jews, but apparently bought off the siege by adding to Judaea three sections of Samaria, and granting remission of tribute. Jonathan thereupon became a supporter of Demetrius II., and furnished him auxiliary troops at critical times. Thanks to the disturbance in the Syrian Empire, Jonathan conquered various cities in the Maritime Plain and to the south of Judaea, re-established treaties with Rome and Sparta, and strengthened the fortifications of Jerusalem, cutting off the Syrian garrison with a high wall. Joppa was garrisoned and various strategic points throughout Judaea fortified. This steady advance towards independence was checked, however, by the treacherous seizure of Jonathan by Trypho, the guardian and commanding general of the young Antiochus V., by whom he was subsequently (142 B.C.) executed (1 Mac 9$^{23-12}$).

4. Simon (142–134 B.C.), another son of Mattathias, succeeded Jonathan when the affairs of the State were in a critical position. A man of extraordinary ability, he was so successful in diplomacy as seldom to be compelled to carry on war. It was greatly to his advantage that the Syrian State was torn by the struggles between the aspirants to the throne. Simon's first step was to make the recognition of the independence of Judaea a condition of an alliance with Demetrius II. The need of that monarch was too great to warrant his refusal of Simon's hard terms, and the political independence of Judaea was achieved. In May 141 Simon was able to seize the citadel, and in September 140, at a great assembly of priests and people, and princes of the people, and elders of the land, he was elected to be high priest and military commander and civil governor of the Jews, 'for ever, until a trustworthy prophet should arise.' That is to say, the high-priestly office became hereditary in Simon's family. Following the policy of his house, Simon re-established the treaty with Rome, although he became involved in a strenuous struggle with Syria, in which the Syrian general was defeated by his son, John Hyrcanus. Like his brothers, however, Simon met a violent death, being killed by his son-in-law at a banquet (1 Mac 13–16^{16}).

5. John Hyrcanus (134–104 B.C.). Under this son of Simon, the Jewish State reached its greatest prosperity. Josephus describes him as high priest, king, and prophet, but strangely enough the records of his reign are scanty. At the opening of his reign, John's position, like that of his father and uncle, was critical. Antiochus VII. (Sidetes), the last energetic king of Syria, for a short time threatened to reduce Judaea again to political dependence. He besieged Jerusalem and starved it into surrender. For some reason, however, probably because of the interference of the Romans, he did not destroy the city, but, exacting severe terms, left it under the control of Hyrcanus. Antiochus was presently killed in a campaign against the Parthians, and was succeeded by the weak Demetrius II., who had been released from imprisonment by the same nation. John Hyrcanus from this time onwards paid small attention to Syrian power, and began a career of conquest of the territory on both sides of the Jordan and in Samaria. The affairs of Syria growing ever more desperate under the succession of feeble kings, John ceased payment of the tribute which had been exacted by Antiochus, and established a brilliant court, issuing coins as high priest and head of the Congregation of the Jews. He did not, however, take the title of 'king.' His long reign was marked by a break with the Pharisees, who, as successors of 'the Pious,' had been the traditional party of the government, and the establishment of friendship with the Sadducees, thereby fixing the high priesthood as one of the perquisites of that party. John died in peace, bequeathing to his family a well-rounded-out territory and an independent government (Jos. *Ant.* XIII. viii.–x [230–300]; *BJ* I. ii. 3–8 [54–69]).

6. Aristobulus I. (Judas) (104–103 B.C.). According to the will of John Hyrcanus, the government was placed in his widow's hands, while the high priesthood was given to the oldest of his five sons, Aristobulus. The latter, however, put his mother in prison, where she starved to death, established his brother Antigonus as joint-ruler, and threw his other three brothers into prison. In a short time, urged on by suspicion, he had his brother Antigonus killed, and he himself took the title of 'king.' Of his short reign we know little except that he was regarded as a friend of the Greeks, and conquered and circumcised the Ituraeans, who probably lived in Galilee. At this time the final Judaizing of Galilee began (Jos. *Ant.* XIII. xi. [301–323]; *BJ* I. iii. [70–84]).

7. Alexander Jannaeus (Jonathan) (103–76). After the death of Aristobulus, his widow Alexandra (Salome) released his three brothers from prison, and married the oldest of them, Alexander Jannaeus (or Jonathan), making him king and high priest. Alexander carried on still more vigorously the monarchical policy of Aristobulus, and undertook the extension of Judaea by the conquest of the surrounding cities, including those of Upper Galilee. He was essentially a warrior, but in his early campaigns was defeated by the Egyptians. Judaea might then have become a province of Egypt had not the Jewish counsellors of Cleopatra advised against the subjection of the land. The Egyptian army was withdrawn, and Alexander Jannaeus was left in control of the country. His monarchical ambitions, however, aroused the hostility of the Pharisees, and Judaea was rent by civil war. For six years the war raged, and it is said that 50,000 Jews perished. The Pharisees asked aid from Demetrius III., and succeeded in defeating Alexander. Thereupon, however, feeling that they were in danger of falling again into subjection to Syria, many of the Jews went over to Alexander and assisted him in putting down the rebellion. The consequent success of Alexander was marked by a series of terrible punishments inflicted upon those who had rebelled against him. During the latter part of his reign he was engaged in struggles with the Greek cities of Palestine, in the siege of one of which he died, bequeathing his kingdom to his wife Alexandra, with the advice that she should make friends with the Pharisees (Jos. *Ant.* XIII. xii–xv. [320–404]; *BJ* I. iv. [85–106]).

8. Alexandra (Salome) (76–67 B.C.) was a woman of extraordinary ability, and her reign was one of great prosperity, according to the Pharisees, whose leaders were her chief advisers. She maintained the general foreign policy of her house, defending her kingdom against various foreign enemies, but particularly devoted herself, under the guidance of her brother Simon ben-Shetach, to the inner development of Judaea along lines of Pharisaic policy. The Sadducean leaders were to some extent persecuted, but seem to have been able to bring about their appointment to the charge of various frontier fortresses. The death of Alexandra alone prevented her being involved in a civil war (Jos. *Ant.* XIII. xvi. [405–432]; *BJ* I. v. [107–119]).

9. Aristobulus II. (67–63 B.C.). After the death of Alexandra, civil war broke out. According to the queen's provision, her eldest son, Hyrcanus II., who was already high priest, was to have been her successor. In fact, he did undertake to administer the State, but his younger and more energetic brother Aristobulus organized the rebellion, defeated Hyrcanus, and compelled him to surrender. By the agreement that followed, Hyrcanus was reduced to private life in the enjoyment of a large revenue. It was at this time that **Antipater**, the father of Herod I., appeared on the scene. He was an Idumaean of boundless ambition and much experience. He undertook to replace Hyrcanus on the throne. With the assistance of Aretas, king of Arabia, he organized an army and besieged Aristobulus in the Temple Mount. As the war was proceeding, Pompey sent Scaurus to Syria (65 B.C.). Scaurus proceeded towards Judaea to take advantage of the struggle between the two brothers. Before he reached Judaea, however, both Aristobulus and Hyrcanus referred their quarrel to him. Scaurus favoured Aristobulus, and ordered Aretas to return to Arabia. This decision, however, did not end the controversy between the brothers, and they appealed to Pompey himself, who meantime had arrived at Damascus. The two brothers pleaded their cause, as did also an embassy of the Jewish people, which asked that the monarchy be abolished, and the government by the high priest be re-established. Pompey deferred his decision, and ordered the two brothers to maintain peace. Aristobulus, however, undertook to continue the revolt, fleeing to Alexandrium, a fortress on the Samaritan hills, above the Jordan Valley. At the command of Pompey he surrendered the fortress, but fled to Jerusalem, where he prepared to stand a siege. Pompey followed him, and Aristobulus promised to surrender. When, however, Gabinius, the Roman general, went to take possession of the city, he found the gates closed against him. Thereupon Pompey proceeded to beseige the city. The various divisions of Jerusalem surrendered to him except the Temple Mount. This was captured after a long siege, and at terrible cost (63 B.C.). Pompey went into the Holy of Holies, but did not touch the Temple treasures. He did, however, make Judaea tributary to Rome and greatly reduced its territory. Aristobulus was taken prisoner, and Hyrcanus was re-established as high priest, but without the title of 'king.' Great numbers of Jews were taken by Pompey to Rome at this time, together with Aristobulus, and became the nucleus of the Jewish community in the capital. With this conquest of Pompey's, the Maccabaean State really came to and end; and Judaea became tributary to Rome (Jos. *Ant.* XIV. i.–iv. [1–79]; *BJ* I. vi. f [120–158]).

10. Hyrcanus II. (**Jonathan**) was a weak man, but had for his adviser and *major domo* Antipater, an exceedingly able man. The State, as re-organized by Gabinius, was attached to Syria, and Hyrcanus exercised the function of high priest (63–40). During this time Judaea was swept more completely into the current of Roman history, because of the assistance rendered by Antipater and Hyrcanus to Caesar in his struggle with the party of Pompey in Egypt. In gratitude Caesar gave many rights and privileges to the Jews throughout the Roman world. Hyrcanus was, however, not appointed king, but 'ethnarch,' and Antipater was made procurator. The walls of Jerusalem, which had been broken down by Pompey, were now rebuilt, and various cities taken away by Pompey were restored to the Judaean territory. Hyrcanus, completely under the control of Antipater, supported Cassius in the struggle which followed the death of Caesar, but in the disturbances following the death of Brutus and Cassius espoused the cause of Antony. At this critical juncture Antipater was killed, and his two sons, Phasael and Herod, were appointed by Antony tetrarchs of the country of the Jews. Antigonus, however, the second son of Aristobulus, with the assistance of the Parthians, captured Phasael, compelled Herod to flee, and seized the State. Hyrcanus was carried away prisoner by the Parthians, and his ears were cut off, so that he could no longer act as high priest.

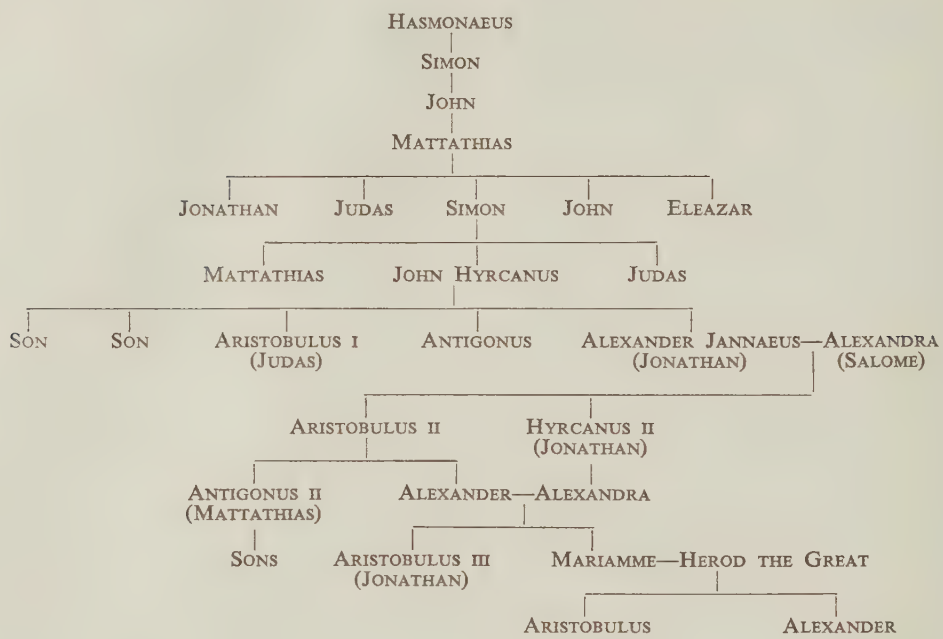
After Herod had been made king, Hyrcanus was brought back to Judaea, and became a centre of one of the various intrigues against Herod, who had married Hyrcanus' grand-daughter Mariamme. As a result, Herod had him executed (30 B.C.), on the charge of conspiracy with the king of Arabia (Jos. *Ant.* XIV. v.–xiii. [80–369]; *BJ* I. viii.–xiii. [159–273]).

11. Alexander, the elder son of Aristobulus II., who escaped from Pompey on the journey to Rome, collected an army and headed an insurrection in Judaea (57 B.C.). He was finally defeated, and later during the civil wars was beheaded by order of Pompey as a friend of Caesar.

12. Antigonus (**Mattathias**) with his father Aristobulus, escaped from the Romans, and in 56 B.C. headed a revolt in Judaea. Aristobulus retreated to Machaerus, but after two years' siege was compelled to surrender, and went again as prisoner to Rome, where he was poisoned (49 B.C.), just as he was setting out to the East to assist Caesar. Antigonus in 47 B.C. attempted unsuccessfully to induce Caesar to establish him as king of Judaea in place of Hyrcanus and Antipater. After the death of Caesar and during the second triumvirate, Antigonus attempted to gain the throne of Judaea with the assistance of the Parthians, and in 40–37 maintained himself with the title of 'king and high priest.' At the end of that period, however, Herod I., who had been appointed king by the Romans, conquered Antigonus with the assistance of Rome. Antigonus was beheaded (37 B.C.) by Antony at the request of Herod (Jos. *Ant.* XIV. xiv.–xvi. [370–491]; *BJ* I. xiv. 1–xviii. 3 [274–357]).

13. Alexandra, daughter of Hyrcanus II., married her cousin Alexander, son of Aristobulus II. She was a

MACCABEES



woman of great ability, and as the mother of Mariamme, wife of Herod I., was an object of bitter hatred on the part of Herod's sister Salome. She was executed by Herod in 28 B.C.

14. Aristobulus III. (Jonathan), son of Alexander and Alexandra, became a member of the household of Herod after the latter's marriage with Mariamme. He was possessed of great beauty, and like all Hasmonaeans he was a favourite with the people. At the request of his sister he was made high priest by Herod (35 B.C.). On account of his popularity, Herod had him drowned while he was bathing at Jericho, in the same year, when he had reached the age of seventeen.

15. Mariamme, daughter of Alexander and Alexandra, was reputed to be one of the most beautiful women of the time. She became the wife of Herod, who loved her jealously. Driven to madness, however, by the scandalous reports of his sister Salome, Herod had her executed in 29 B.C.

Although the direct line of Hasmonaeans was thus wiped out by Herod, the family was perpetuated in the sons of Herod himself by Mariamme—Alexander and Aristobulus. Both these sons, indeed, Herod caused to be executed because of alleged conspiracies against him, but the Maccabaean line still lived in the persons of Herod of Chalcis and Agrippa I. and II. (see HEROD).

MACEDONIA.—The Macedonians were a part of the Hellenic race who settled early in history in the region round the river Axius at the NW. corner of the Aegean. When they first came into Greek politics they had dominion from the mountains N. of Thessaly to the river Strymon, except where the Greek colonies of the peninsula of Chalcidice kept them back. Their race was probably much mixed with Illyrian and Thracian elements; they did not advance in culture with Southern Greece, but kept their primitive government under a king, and were regarded by the Greeks as aliens. Down to the time of Philip (359 B.C.) they played a minor part as allies of various Greek cities having interests in the N. Aegean. Under Philip, through his organization of an army and his diplomatic skill, they became masters of Greece, and under his son Alexander conquered the East. The dynasties which they established in Syria and Egypt were Macedonian, but in the subsequent Hellenization of the East they took no larger part than other Greek tribes. In their original dominions they remained a hardy and vigorous race. In the battle of Pydna (168 B.C.) the last king of the Macedonians was overcome by a Roman army under L. Aemilius Paullus. Macedonia was then divided into four separate districts with republican government, but it received the regular organization of a province in 146 B.C. The capital of the Macedonian kings was Pella, 23½ miles NW. of Thessalonica.

Macedonia was the scene of St. Paul's first work in Europe. See PAUL, PHILIPPI, THESSALONICA, BEROEA. The province at that time included Thessaly, and stretched across to the Adriatic; but Philippi was a colony, not subject to the governor of the province, and Thessalonica was also a 'free city,' with the right of appointing its own magistrates. The Via Egnatia ran across the province from Dyrrhachium to Neapolis, and St. Paul's journey was along this from Neapolis through Philippi, Amphipolis, Apollonia, to Thessalonica. A further visit is recorded in Ac 20^{3-6}, and the Pastoral Epistles imply another after his first imprisonment (1 Ti 1^{3}).

MACEDONIANS, 1 Mac 8^{5}.—See KITTIM.

MACHAERUS.—A place E. of the Dead Sea, fortified by Alexander Jannaeus, and greatly enlarged and strengthened by Herod the Great (Jos. *BJ* VII. vi. 1 [163–170]). According to Josephus, the wife of Herod Antipas retired to this place when she got wind of her husband's intention to rid himself of her and wed Herodias. From there she escaped to her father Aretas, king of the Nabataeans. Josephus describes Machaerus as 'in the borders of the dominions of Aretas and Herod,' and then 'subject to her father' (*Ant.* XVIII. v. 1 [111 f]). He goes on to say that here John was imprisoned and beheaded (Mk 6^{14-29} etc.). If it was then subject to Aretas, this is at least curious. The fortress was one of the last taken by the Romans in the war of independence

(*BJ* II. xviii. 6 [485 f], VII. vi. 1–5 [163–209]). It is identified with the ruin of *Mekāwer*, on the height about halfway between *Wâdī Zerkā Ma'în* and *Wâdī el-Môjib*. No thorough archaeological exploration has as yet been carried out here. W. E.—**E. G. K.**

MACHBANNAI.—A Gadite who joined David at Ziklag, 1 Ch 12^{13}.

MACHBENA, 1 Ch 2^{49} (RV).—See MACHBENAH.

MACHBENAH.—Named in the genealogical list of Judah, 1 Ch 2^{49} (RV **Machbena**). It is perhaps the name of a place, to be identified with **Cabbon** (q.v.).

MACHI.—The father of Geuel, the Gadite spy, Nu 13^{15}.

MACHIR.—**1.** The eldest 'son' of Manasseh, Jos 17^{1}; in Nu 26^{29} the only son. Machir was also the 'father of Gilead.' These names are ethnographic, and their use suggests that the **Machirites** were either coterminous with the tribe of **Manasseh** (q.v.) or were its most warlike part. Settled on the W. of Jordan, they invaded N. Gilead some time after the days of Deborah, and so became the 'father of Gilead.' **2.** Son of Ammiel of Lo-debar on the E. of Jordan. He clung to the house of Saul as long as possible, and afterwards victualled David's men when that king was fleeing from Absalom, 2 S 9^{5} 17^{27}. W. F. C.

MACHNADEBAI.—One of the sons of Bani, who had married a foreign wife, Ezr 10^{40}; RSV substitutes this name in 1 Es 9^{34} for RV **Mamnitanemus** (q.v.; AV **Mamnitanaimus**).

MACHPELAH.—The name of a locality in which, according to P, were situated a field and a cave bought by Abraham from Ephron the Hittite as a burial-place for himself and his family (Gn 23^{17-18}). Here Sarah, and subsequently Abraham, Isaac, Rebekah, Leah, and Jacob were buried (Gn 49^{31}). The word is used with the definite article, which suggests that it is a common noun, perhaps surviving in its Ethiopic cognate, which means 'portion, lot.' The place is described as being 'before Mamre' (Gn 25^{9}), Mamre (q.v.) being in the vicinity of Hebron (Gn 23^{19}), which lies on the sides of a narrow valley, the main portion of it lying on the face of the E. slope. The traditional site of the cave of Machpelah is on the E. hill also.

Above the supposed site of the cave there is now a rectangular precinct (Arab. *ḥarām*) measuring 181 feet by 93 feet internally (the longer axis running from NW. to SE.), and surrounded by massive walls 40 feet high dating from the time of Herod the Great. At the SE. end of the quadrangle is a mosque, once a Christian church, 70 feet by 93 feet, parts of which are attributed to the 12th cent. Within the mosque are cenotaphs of Isaac and Rebekah; in a porch on the NW. side are those of Abraham and Sarah; and at the opposite end of the enclosure are those of Jacob and Leah. The cave, which is reputed to be the real resting-place of the patriarchs and their wives, is below the floor of the mosque, and is thought to be double, in accordance with a tradition which is perhaps derived from the LXX rendering of *Machpelah* as 'double cave.' The entrances to it, of which there are said to be three, are in the flagged flooring of the building. G. W. W.—**J. Gr.**

MACRON.—Surname of Ptolemy (1 Mac 3^{38}, 2 Mac 4^{45}), who was governor of Cyprus (2 Mac 10^{12f}) and subsequently of Coele-Syria and Phoenicia (2 Mac 8^{8}).

MADAI.—Gn 10^{2}, 1 Ch 1^{5}; see MEDES.

MADMANNAH.—A town in the Negeb of Judah, named with Hormah and Ziklag, Jos 15^{31} (cf 1 Ch 2^{49}). Its place is taken in Jos 19^{5} etc. by **Beth-marcaboth** (q.v.). It is probably modern *Umm Deimneh*.

MADMEN.—A place in Moab, which, if the MT be correct, has not been identified. The name occurs only in Jer 48^{2} where there is a characteristic word-play: *gam Madhmēn tiddōmmî*, 'also, O Madmen, thou shalt be brought to silence' (LXX *kai pausin pausetai*). It is a very natural suggestion that the initial *m* of *Madmen* has arisen by dittography from the final *m* of the preceding word, and that for *Madmen* we should read *Dimon* (q.v.); cf Is 15^{9}. See DIBON.

MADMENAH.—A place apparently N. of Jerusalem, named only in the ideal description of the Assyrian invasion, Is 10^{31}. The site is unknown.

MADON.—A royal city of the Canaanites in the north, Jos 11^{1} 12^{19}. It is probably modern *Qarn Ḥaṭṭîn*.

MAELUS, 1 Es 9^{26} (AV, RV).—See MIJAMIN, **1.**

MAGADAN.—See DALMANUTHA.

MAGBISH.—A family of returning exiles, Ezr 2^{30}, 1 Es 5^{21} (AV **Nephis,** RV **Niphis**), omitted from the parallel passage, Neh 7^{33}. Possibly Magbish is a Benjamite town, but if so it is unknown.

MAGDALA, MAGDALENE.—See MARY.

MAGDIEL.—A 'duke' of Edom, Gn 36^{43}, 1 Ch 1^{54}.

MAGGOT.—See WORM.

MAGI, the plural of *magus*, is used in Mt 2^{1-12} for the 'wise men' who came from the East to do obeisance to the newly born Christ-child at Bethlehem, having found indication of His birth in the appearance of a star. From v.^{12} it is evident that they were known to be men who received guidance not only from observation of celestial phenomena, but also through dreams. The word comes from the name of a priestly class in ancient Media, which appears in the Old Persian inscriptions in the form *magush*. Herodotus is aware that they were not only sacrificial priests (I. 101), but men who interpreted the significance for human affairs of celestial phenomena (VII. 37), and the meaning of dreams (I. 107, 108, 120, 128; VII. 19). Their reputation as men who had access to supernatural knowledge was widespread among the Greeks. One of them from Syria was known to have predicted the death of Socrates (Diogenes Laertius, II. v. 24). Perhaps because these priests continued to serve the old *daevas* who, after the success of Zoroaster's religious reformation, had been degraded to the status of demons, the word *magos* came to have a pejorative sense, and from as early as the 5th cent. B.C. is used in Greek to mean 'sorcerer' or 'thaumaturge.' It has this sense in Ac $13^{6.\ 8}$, and in the name Magus given to the Simon of Ac 8^{9-24}. It is from this sense that we have our words 'magic' and 'magician.'

Both the LXX and Theodotion use the word in Dn 2^{2} for the 'enchanters' of the Chaldaeans, and the writer of the story in Matthew was doubtless thinking of wise men from Mesopotamia where, since the days of Nebuchadrezzar, there had been an interest in Palestinian affairs. Alerted by the rising of a star they had come to see the future king born in Bethlehem, bringing gold, frankincense, and myrrh, precious things brought to Mesopotamia by caravans from fabulous South Arabia, and hence appropriate for presentation as gifts. The form of their query: 'Where is he who is born king of the Jews?' suffices to show that they were thought of as non-Jews.

The story does not say how many they were. Oriental tradition has favoured the number twelve, but in the West, apparently on the ground of the threefold gift, they have generally been reckoned as but three. Later tradition knows their names, tells whence each one came and whither he went on his return, and has various fanciful interpretations of the significance of their gifts. Their remains were said to have been found in the East in the 4th cent. and brought to Constantinople, where they were placed in the church Hagia Sophia, only to be removed by Eustorgius to Milan and then in 1162 by Frederic Barbarossa to Cologne. As early as the 4th cent. the festival of the Epiphany seems to have celebrated the manifestation of the Christ to the Magi. See also STAR OF THE MAGI. A. J.

MAGIC, DIVINATION, AND SORCERY.—Magic, divination, sorcery, and witchcraft are all connected with belief in superhuman powers, and are methods whereby men endeavour to obtain from these powers knowledge of the future, or assistance in the affairs of life. Belief in magic and divination is most prevalent in the lower

stages of civilization and religion. The arts of the magician and the diviner were founded upon the same logical processes as have issued in the development of modern science; but the limits within which deduction would be valid were disregarded, and the data were frequently imperfect. Accidental coincidence was often confused with causal sequence (see Hastings' *DB*, article 'Divination'). Magic and divination were derived from attempts at reasoning which were very often erroneous; but from such crude beginnings science has slowly grown.

In their beginning these arts were associated with religion; and diviners and magicians were those thought to be most intimately connected with the Deity, and, owing to their superior knowledge of Him and His ways, best able to learn His secrets or secure His aid. Among the Arabs the priest was originally also the **soothsayer**; the Hebrew *kōhēn*, 'priest,' is cognate with the Arabic *kāhin*, 'soothsayer'; the primitive priest had charge of the shrine of the god, and both offered sacrifices and gave responses. In this manner classes of professional diviners and magicians arose, as in Egypt (Gn 41[8], Ex 7[11]), in Babylon (Dn 2[2]), in connexion with Baal (1 K 18[19]), and even among the Israelites in the rank of professional prophets. Such officials were set apart for their office by some rite specially connecting them with the god, as the eating of a particular food, or the wearing of a sacred dress (cf 2 K 1[8], Zec 13[4]). The animism, in which magical arts had their root, soon passed beyond the simple belief that Nature was peopled with spirits, and began to distinguish between good and evil spirits. When that distinction had been attained, the art of the magician and diviner also became subject to moral distinctions, according to the character of the spirit whose aid was sought and the purpose in view. This diversity in the moral characteristics of magic and divination is illustrated in the history of Israel; for divination is akin to some of the institutions sanctioned by God, such as the Urim and Thummim (Ex 28[30], Lv 8[8]), and it includes, at the other extreme, such necromancy as that of the witch of Endor. Among Semitic races and by the Egyptians, magic and divination were associated with the worship of various gods and the belief in the existence of a vast number of demons. With the gradual rise of religion in Israel under the teaching of God, early modes of prying into the future, and magical methods of seeking superhuman help, were slowly abandoned, and, as revelation became clearer, they were forbidden. The teaching of the inspired prophets of Yahweh was very different from that of the professional prophets and from the religion of the common people. Throughout pre-exilic times there was a struggle in Israel between the pure worship of Y″ alone as inculcated by the great prophets, and the worship of 'other gods,' such as the local Canaanitish Baalim and idols in the homes of the people. In process of time magic and divination became closely linked with these illicit cults, and were consequently denounced by the great prophets; but at the same time the desire of the human heart to learn the future and to secure Divine help (which lies at the root of magic and divination) was met by God, purified, elevated, and satisfied by the revelation of His will through the prophets. God's revelation was suited to the stage of spiritual development to which the people had attained, hence His prophets sometimes employed methods similar to those of divination; consequently some forms of divination are allowed to pass without censure in many passages of the Bible, but these were gradually put aside as the people were educated to a more spiritual conception of religion. On the other hand, as men sought to prognosticate the future by illicit commerce with false gods and spirits, magic and divination became generally degraded and divorced from all that is right and good. This explains the increasing severity with which magic and divination are regarded in the Scripture; nevertheless we find it recorded, without any adverse comment, that Daniel was made head of the 'wise men' of Babylon—although these included magicians, enchanters, sorcerers, and 'Chaldaeans'—(Dn 2[2, 48]); and that the wise men (Mt 2[1]) were *magi* (see MAGI). In explanation it may be said that reliance upon divination is a moral evil in proportion to the religious light vouchsafed to the individuals concerned; and God accommodated the methods of His teaching to the condition of those to whom He revealed Himself.

General course of the history of magic and divination in Israel.—Several sources can be traced from which the Israelites derived their magical arts, and different periods are apparent at which these influences were felt. (*a*) *From patriarchal times up to Israel's contact with Assyria*, most of their occult arts were the outcome of the beliefs common to Semitic peoples. Although their sojourn in Egypt brought them into contact with a civilized nation which greatly practised divination and sorcery, we cannot trace any sign that they borrowed many magical arts from the Egyptians at that time. In this early period of Israelitish history we find divination by *teraphim*, the interpretation of dreams and necromancy, besides the authorized means of inquiry of God. The Book of the Covenant legislates against sorcery (Ex 22[18] E); and we read that Saul 'put the mediums and the wizards out of the land' (1 S 28[3]).

(*b*) *Under the influence of the Assyrian advance southward*, the small States of Palestine were driven into closer relations with one another, owing to the necessity of united opposition to the common foe. This was prejudicial to religion, through its rendering Israel more tolerant towards the gods of their allies (*e.g.* the worship of the Phoenician Baal, fostered by Ahab), and by its favouring the introduction of methods of magic and divination in use among their neighbours (cf Is 2[6]). This evil tendency was encouraged by Manasseh (2 K 21[6]), but in the reformation of Josiah, idolatry, witchcraft, and the use of *teraphim* were suppressed (2 K 23[24]) in accordance with Dt 18[10-12] (D).

(*c*) *The Captivity* brought Israel into contact with a much more fully developed system of magic and divination than they had known before. In Babylon, not only were illicit magical practices widely indulged in, but the use of such arts was recognized by their being entrusted to a privileged class (Dn 2[2]). The officials are here denominated '**magicians**' (*ḥarṭummîm*, scribes who were acquainted with occult arts), '**enchanters**' (*'ashshāphîm*, probably a Babylonian word meaning 'those who used conjurations,' but its derivation is uncertain), '**sorcerers**' (*m'khashsh'phîm*, in its root meaning perhaps indicating those who mixed ingredients for magical purposes [LXX *pharmakoi*], but this is not certain), and '**Chaldaeans**' (*kasdîm*, a name which, from being a national designation, had come to mean those who were skilled in the occult lore of Babylonia and could interpret dreams). In Babylonian religion and medicine, magic had a recognized, legitimate place. The Babylonians believed in a vast number of demons and evil spirits, which could be exorcised by appropriate means; they practised astrology (Is 47[12f]), augury from the inspection of the liver of victims (Ezk 21[21]), the use of amulets and talismans, etc. (see G. Contenau, *La Magie chez les Assyriens et les Babyloniens*, Paris, 1947).

(*d*) *Egyptian influences* were strongly felt in the century before, and the one following, the Christian era. The Mishnah shows the presence of a very strong tendency to occult sciences, and in the NT we find examples of Jews who practised them in Simon Magus (Ac 8[9]) and Elymas (13[8]). Among the Alexandrian Jews, and later by the Alexandrian Gnostics, magic was much used, and the name of Y″ in various forms entered into their spells and the inscriptions upon their amulets. Books of incantations, reputed to have been the work of Solomon, were extant, and the Babylonian Talmud is full of superstition (Schürer, *HJP* II. iii, 152). Such books and charms were burnt at Ephesus when their owners became Christians (Ac 19[19]). So celebrated was Ephesus for its magic, that 'Ephesian letters' was a common name for amulets made of leather, wood, or metal on which a magic spell was written (Farrar, *St. Paul*, ii, 26).

A. Distinguishing *divination*, in which prominence is

MAGIC, DIVINATION, AND SORCERY

given to the desire to know the future, from *magic*, which has for its object power to do something by supernatural aid, we have now to inquire into the modes of divination and magic which appear in the Scriptures.

Forms of divination mentioned in the Bible.—(*a*) *The casting of lots.*—The casting of lots was founded on the belief that God would so direct the result as to indicate His will (Pr 16[33]). It was employed: (1) *In crises in national history and in individual lives.* The phrase 'enquire of God' sometimes referred to the drawing of lots, perhaps with the use of **Urim and Thummim**. This occurs in the arrangements for the conquest of Canaan (Jg 1[1]), in the campaign against the Benjamites (20[27]), in David's uncertainty after the death of Saul (2 S 2[1]), and in war (5[19, 23]). The Phoenicians cast lots to discover the cause of the tempest (Jon 1[7]). (2) *In criminal investigation.* It was employed to discover the wrongdoer in the cases of Achan (Jos 7[14]) and Jonathan (1 S 14[41f]). (3) *In ritual.* Lots were cast in reference to the scapegoat (Lv 16[8]). Two goats were brought, and lots were cast; one goat was offered as a sin-offering, and the other was sent away into the wilderness. (4) *In dividing the land of Canaan* (Nu 26[55] 33[54] 34[13], Jos 21[4, 6, 8]). (5) *In selecting men for special duties*: the election of Saul (1 S 10[20]), the choice of the men to attack Gibeah (Jg 20[9]), the division of duties among the priests (1 Ch 24[5]).

In most cases the method of casting the lot is not stated. Several ways were in use among the Israelites, some of which were directly sanctioned by God as a means of Divine guidance suited to the degree of religious knowledge attained by the people at the time. The following methods can be distinguished:

(i) *By Urim and Thummim.* Although not certain, it is believed by most scholars that the **Urim and Thummim** were two stones which were carried in a pouch under the breastplate of the priest, and which were drawn out as lots (see Hastings' *DB* s.v. 'Urim and Thummim'). In connexion with this the **ephod** is mentioned. The employment of the Urim and Thummim for consulting God disappeared before the clearer guidance received through the inspired prophets. Apparently it had ceased by the time of Israel's return from the Captivity (Ezr 2[63]). Inquiry respecting the future was also made of heathen deities (2 K 1[2f]), and their responses were probably given by the drawing of lots.

(ii) *By belomancy and in other ways.* The word *ḳāsam* (which is specially applied to the drawing of lots as with headless arrows) is used of divination generally and frequently translated 'to divine.' It is generally referred to unfavourably (except Pr 16[10]). **Arrows** are once specified as the means by which the lot was cast (Ezk 21[21f]) This practice is found among the Arabs, and was also used in Babylonia. Arrows with the alternatives written upon them were shaken in a quiver at a sanctuary, and the first to fall out was taken as conveying the decision of the god. Nebuchadnezzar is represented as deciding in this manner his line of march (Ezk 21[21]), and, as the result of casting the lot, holding in his hand 'the divination Jerusalem,' *i.e.* the arrow with 'Jerusalem' written upon it (see Driver, *Deut.* p. 224).

Without any indication of the method of divination, operations denoted by the word *ḳesem* appear among the Moabites (Balaam, Nu 23[23], payment being made for the service, 22[7]), among the Philistines (1 S 6[2]), and among the Babylonians (Is 44[25]). It also appears as a method of the lower rank of prophets in Israel (Mic 3[6–11], Ezk 13[6, 9] 22[28]). Prophets are named in connexion with diviners *ḳōs^{e}mîm* (Jer 27[9] 29[8]). The word is used in relation to necromancy and the consultation of *t^{e}rāphîm* (1 S 15[23] 28[8], 2 K 17[17], Zec 10[2]). The practice is forbidden in Dt 18[10].

(iii) *By rhabdomancy.* This is alluded to in Hos 4[12]. Probably pieces of stick were used for drawing lots, as in the case of divination by arrows.

(*b*) *Dreams and visions.*—Numerous instances occur in which Divine intimations were communicated to men by **dreams** and visions. (1) In so far as these were spontaneous and unsought, they do not properly belong to the domain of divination. Such occur in Gn 20[3] 28[12] 31[10, 24] 37[5], 1 K 3[5], Mt 1[20] 2[12] 27[19]. Dreams are spoken of as a legitimate channel for God's communications to His prophets and others (Nu 12[6], 1 S 28[6], Job 33[15], Jl 2[28]). (2) But the belief in Divine warnings through dreams came very near to divination when interpreters were sought to make clear their meaning, as in Egypt (Gn 40[5ff] 41[8]; Pharaoh calls the *ḥarṭummîm*—a word used only in the sense of scribes possessed of occult knowledge), among the Midianites (Jg 7[13]), and in Babylon (Dn 2[2]). (3) Dreams were sought by the prophets of a lower order in Israel, and it is known that among the Egyptians and other ancient nations special means, such as fasting or drugs, were used to induce them, from the belief that they were Divine communications. In Egypt it was a common practice for worshippers to sleep within the precincts of the temples in order to obtain intimations by dreams, and some devotees lived by the rewards received by them for recounting the dreams which had come to them in the temple. References to misleading divination by dreams occur in Dt 13[1–5] (prophets were to be judged by the character of their teaching and to be put to death if they favoured idolatry), Jer 23[25–28] 27[9] 29[8], Zec 10[2].

Vision (*ḥāzôn*, with its cognate words) has a similarly wide application, extending from the God-given experiences of the higher prophets to the misleading predictions of false prophets. Instances of its highest signification occur in Is 1[1] 2[1], Am 1[1], Mic 1[1]. The word is used respecting the deception practised by lower prophets, as in Nu 24[4, 16], where reference is apparently made to the seer receiving the intimation in a trance, but the interpretation is not quite certain (see Gray, *Numbers*, p. 361); other physical phenomena appear in connexion with prophesying (1 S 10[10] 19[18–24]). The word also appears in connexion with false prophets (Is 28[7] 30[10], La 2[14], Ezk 12[24] 13[6, 16, 23] 21[29] 22[28], Zec 10[2]).

(*c*) *Observation of omens* (**augury**).—*nāḥash*, translated 'to divine' or 'to use enchantments,' the agent being called 'an enchanter' (Dt 18[10]), means 'to learn by means of **omens**.' Very probably the expression is derived from *nāḥāsh*, 'a serpent,' with the underlying idea that the intimation was obtained by the worshipper through the assistance of the serpent-god; another, but less likely, derivation is from the 'hissing' or 'whispering' tones of the diviner. The word is frequently used with a bad sense attaching to it.

Words were sometimes taken as omens of the future (1 K 20[33], RVm 'took it as an omen'; also 1 S 14[10]). The movements of animals also constituted omens. It was considered by the Arabs that some animals, under the influence of a higher power, could see what was invisible to men, and consequently their action became an omen. It would be quite in accordance with this that Balaam's ass should see what was hidden from her master (Nu 22[27]); a similar belief in the significance of the movements of animals is shown in the lords of the Philistines watching the way the kine took with the Ark of God (1 S 6[12]).

The methods of divination by omens are often unexpressed, as Gn 30[27], Lv 19[26], 2 K 17[17] 21[6], 2 Ch 33[6]. The following practices in divination by omens appear: (i) *By hydromancy* (Gn 44[5]). In Egypt it was common to attempt to divine the future by the appearance of the liquid in a goblet or dish. (ii) *By the observation of the clouds.* The clouds were carefully studied by diviners among the Chaldaeans, and the word *'ōnēn* seems to indicate this practice as existing among the Hebrews and Philistines (Is 2[6]). Driver, however, leaves the kind of divination undecided, and suggests a derivation from an Arabic root meaning 'to murmur' or 'whisper,' the reference being to the mutterings of the soothsayer (*Deut.* p. 224). This form of augury was forbidden (Lv 19[26], Dt 18[10]), and those practising it were denounced (Mic 5[12], Jer 27[9]). Manasseh fostered it (2 K 21[6], 2 Ch 33[6]). (iii) *By astrology.* The **stars** were very early believed to have an influence on the fortunes of men (Jg 5[20], Job 38[33]). Professional **astrologers** were prominent among the Assyrians and Babylonians. Babylonian astrology, with its announcement of coming events and

notification of favourable and unpropitious days (such as are now extant on Babylonian clay tablets), is mentioned in Is 47[13]; but astrology does not seem to have been practised by Israel in early times; Jer 10[2] speaks of it as 'the way of the nations,' and warns the people against it (the passage is probably late, from about the time of Second Isaiah). In later times astrology was regarded by the Jews in a less unfavourable light: *e.g.* Dn 2[48], where Daniel is made chief of the wise men who included astrologers (cf Mt 2, where the wise men, who appear to have been astrologers were met by God in their darkness, and led to the infant Saviour). (iv) *By inspecting victims.* Forecasting the future from the appearance of the livers of victims is mentioned in Ezk 21[21]. This was common in Babylon (Diod. Sic. ii. 29) and also among the Romans (Cic. *de Divin.* ii. 12). It does not appear to have been in use among the Israelites; the sacrifices of Balaam (Nu 23[1, 14]) were not for this purpose, but to propitiate the deity consulted.

Connected with the use of omens is the appointment of '**signs**' by prophets to assist their consulters in believing what they predicted. Signs were given by God and His prophets as well as by false prophets; these were exhibitions of Divine power in smaller matters by which men might be enabled to trust God in things of greater moment (Jg 6[36]); or they were instances of truth in small predictions, to awaken confidence in greater promises or threatenings (Ex 4[8] 10[2], Is 7[11]); or they were simply the attachment of particular meaning to ordinary facts to remind men of God's promises or threats (Gn 9[12] 17[11], Is 8[18], Ezk 12[11], Zec 3[8]). In the time of Christ such signs were demanded by the Jews (Mt 12[38] 16[1], Lk 11[16], Jn 4[48], 1 Co 1[22]). Cf SIGN.

(*d*) *Necromancy and* **familiar spirits.**—Of these there were two kinds: (1) A spirit (primarily a subterranean spirit, *'ôbh*) was conceived as dwelling in a human being (Lv 20[27]), most commonly in a woman. Those thus possessed were sometimes called *'ôbhôth* (Is 8[19]), or the woman was denominated *ba'alath 'ôbh* (1 S 28[7]). Another explanation (H. P. Smith, *Samuel*, p. 239) makes the *'ôbh* a sort of idol, on the ground that Manasseh 'made' an *'ôbh* (2 K 21[6]) and that it is classed with *t'rāphîm* (2 K 23[24]). These **necromancers** professed to have the power of calling up the dead (1 S 28[11], Is 8[19]). Of their method of procedure we know nothing. In the interview with the **witch of Endor**, it appears that Saul was told by the witch what she saw, but the king himself entered into the conversation. Necromancers seem to have deceived their inquirers by speaking in a thin weak voice to make it appear that it was the spirit speaking through them (Is 8[19] 29[4]). The LXX generally represents them as ventriloquists, *engastrimythoi* (cf *goētes*, 2 Ti 3[13]). A similar belief that a spirit might dwell in a human being and give responses appears in Ac 16[16]; this opinion was common in heathendom. The Jews had similar views respecting the indwelling of demons in cases of demoniacal possession.

(2) Other diviners represented themselves as having fellowship with a spirit from whom they could receive intimations. These spirits were called *yidde'ōnîm*, the meaning being either that the spirits were wise and acquainted with the future, or that they were known to the **wizards** and had become '**familiar spirits**' to them. The word occurs only in conjunction with *'ôbh*, as in Lv 19[31] 20[6], Dt 18[11].

(*e*) *Divination by teraphim.*—The **teraphim** were images in human form (cf Michal's stratagem, 1 S 19[13]), and they were worshipped as gods (Gn 31[19, 30], Jg 18[24]), but in later times they seem to have been degraded to magical uses.

Some suppose them to have been the remains of a primitive ancestor-worship, and connect the word with *r'phā'îm*, which means 'ghosts' (root *rāphāh*, 'to sink down,' 'to relax'). Some Jewish commentators (cf Moore, *Judges*, p. 382) have suggested that they were originally the mummied heads of human beings, and that images of wood or metal were substituted for these in later times.

Teraphim were apparently used for divination in later times. Nebuchadnezzar is represented as consulting them (Ezk 21[21]). Josiah abolished *teraphim* as well as other methods of illicit divination (2 K 23[24]), but they subsequently reappeared (Zec 10[2]). The use of the *teraphim* in divination is not stated, but it was probably somewhat similar to the consulting of familiar spirits, namely, the diviner gave the response which he represented himself to have received from the *teraphim*.

B. Magic, like divination, had both legitimate and illicit branches. The moral character of the attempt to obtain supernatural aid was determined by the purpose in view and the means used to attain it. **Witchcraft**, which sought to injure others by magical arts, has always been regarded as evil and worthy of punishment among all nations. Invocation of aid from false gods (who were still regarded as having real existence and power) and from evil spirits has been generally denounced. But there was also a magic, which has been denominated 'white magic,' having for its object the defeat of hostile witchcraft and the protection of individuals from evil influences.

1. Magic employed to counteract the work of evil spirits or the arts of malicious magicians.—This kind of magic was extensively practised among the Assyrians and Babylonians, and was the kind professed by the wise men who were under the patronage of Nebuchadnezzar (Dn 2[2]). It also appears in the ceremony of **exorcism.** In Babylonia illness was traced to possession by evil spirits, and exorcism was employed to expel them. Exorcism was practised by the later Jews (Ac 19[13], Mt 12[27]).

The method of a Jewish exorcist, Eleazar, in the time of Vespasian is described by Josephus (*Ant.* VIII. ii. 5 [47–49]). He placed a ring containing a magical root in the nostril of the demoniac; the man fell down immediately, and the exorcist, using incantations, said to have been composed by Solomon, adjured the demon to return no more.

This kind of magic is also exemplified in the use of **amulets** and **charms**, intended to defend the wearer from evil influences. These derived their power from the **spells** which had been pronounced over them (thus *lāḥash*, which began with the meaning of serpent-charming, came to mean the muttering of a spell, and from that it passed to the meaning of an amulet which had received its power through the spell pronounced over it), or from the words which were inscribed upon them, or the symbolic character of their form. They were used by all ancient peoples, and were opposed by the prophets only when they involved trust in other gods than Y^{e}. Probably the earrings of Gn 35[4] and Hos 2[13] were amulets; so also were the moon-shaped ornaments of Jg 8[21, 26] and Is 3[18]; their shape was that of the crescent moon which symbolized to the Arabs growing good fortune, and formed a protection against the evil eye. Written words were often employed to keep away evil. The later Jew, understanding Dt 6[8f] in a literal sense, used **phylacteries** (Mt 23[5]), to which the virtue of amulets was attributed, although their origin apparently was mistaken exegesis rather than magic. The use of such charms was very prevalent in the early centuries of the Christian era among the Alexandrian Jews and the Gnostics. Phylacteries have been found among the Qumrân discoveries.

2. Magic in forms generally denounced by the great prophets.—(*a*) *Magic which was apparently dependent upon the occult virtues attributed to plants and other substances.*—The Hebrew term for this was *kesheph*. The root *kāshaph* means 'to cut,' and has been explained as denoting the cutting which the worshipper inflicted upon himself (as 1 K 18[28]), or (by W. Robertson Smith) as the cutting up of herbs shredded into the magic brew; the latter meaning is supported by the LXX translation of *kesheph* by *pharmaka*, and also by Mic 5[12], where *k'shāphîm* appear to be material things; such a decoction is perhaps referred to in Is 65[4]. A wider signification is, however, possible, as in 2 K 9[22], where *k'shāphîm* has

the meaning of corrupting influences (RSV ' **sorceries** '). Some derive *kāshaph* from an Assyrian root meaning ' **to bewitch** ' (see Hastings' *DB*, article MAGIC).

Hebrew magic came to a considerable extent from Assyria and Babylonia, where the art was practised by a class of men specially set apart for it (Dn 2^2; cf also Is $47^{9,12}$, Nah 3^4). Egyptian sorcerers are also noticed (Ex 7^{11}), but Egyptian influence in the art was most strongly felt by the Jews in post-exilic times. The belief in the virtue of **mandrakes** as love-philtres appears in Gn 30^{14} and Ca 7^{13} (*dûdhā'îm*, from the root *dûdh*, ' to fondle '). **Sorcerers** are frequently denounced in the Bible (Ex 22^{18}, Dt 18^{10}, 2 K 9^{22}, 2 Ch 33^6, Jer 27^9, Gal 5^{20}, Rev 9^{21} 21^8).

(*b*) *Magic by spells or the tying of knots.*—The tying of knots in a rope, accompanied by the whispered repetition of a **spell**, was common in Babylonia (cf Is $47^{9,12}$) and in Arabia. This practice may lie behind the word *hābhar*, Dt 18^{11}, or the word may refer to the spell only as a binding together of words. *Hābhar* is also used with the special meaning of serpent-charming (Ps 58^5). This art, as now found in India and Egypt, was also denominated by the word *lāḥash* (Ps 58^5, Ec 10^{11}, Jer 8^{17}); from the muttering of the charm, the word gained the meaning of whispering (2 S 12^{19}, Ps 41^7), and it is used of a whispered prayer (Is 26^{16}, or, as some understand it in this passage, ' compulsion by magic '). Magical power was also held to be present in the reiteration of spells or prayers as in the case of the priests of Baal (1 K 18^{26}), and this repetition of the same words is rebuked by our Lord (Mt 6^7).

In close connexion with the power of spells is the belief in the efficacy of **cursing and blessing** when these were uttered by specially endowed persons (Nu 22^6, Jg 5^{23}).

An authorized ceremony closely approaching the methods of magicians is found in the ritual for the trial by **ordeal** of a wife charged with unfaithfulness (Nu 5^{12-31}); the woman brought the prescribed offerings and the priest prepared a potion of water in which was put dust from the Tabernacle floor; the curse, which the woman acquiesced in as her due if guilty, was written and washed off with the water of the potion, the idea being that the curse was by this means put into the water, and the potion was afterwards drunk by the woman.

(*c*) *Symbolic magic.*—Magicians often made, in clay or other material, figures of those whom they desired to injure, and, to the accompaniment of fitting spells, inflicted upon these models the injuries they imprecated. They believed that in this way they sympathetically affected the persons represented. A trace of this symbolism is to be found in the placing of **golden mice and tumours** beside the Ark by the Philistines when they sent it back to Israel (1 S 6^5); by this means they believed that they would rid themselves of the troubles which the Ark had brought to them. F. E. R.—J. P. H.

MAGISTRATE.—This word is used in the AV to represent either ' judge ' or ' ruler '—' authority ' in the most general sense. In Jg 18^7, where AV has ' there was no magistrate in the land ' (cf RV), RSV has ' lacking nothing that is in the earth,' which rests on an amended text. In Ezr 7^{25} (so also RV, RSV) it represents *shāph^{e}ṭîn*, the Aramaic form of the common Hebrew word rendered ' judges.' RSV employs the word in Dn 3^{2f} for a word of uncertain meaning (AV, RV ' sheriffs '). In Lk $12^{11,58}$, Tit 3^1 it stands in AV for derivatives of the general word *archō*, ' to rule,' but in the passages from Luke with special reference to judges (RV and RSV ' magistrate ' in Lk 11^{58}, ' rulers ' in 12^{11}, Tit 3^1). In Ac 16^{20-38} (RV and RSV ' magistrates ') the word is used to translate the Greek *stratēgoi*. This is often used as the equivalent of the Latin *praetores*, and in the older Roman colonies the two supreme magistrates were often known by this name. Here it appears to be no more than a courtesy title for the more precise *duoviri*. A. E. H.

MAGNIFICAL.—Obsolete for ' magnificent '; retained in AV and RV (RSV ' magnificent ') in 1 Ch 22^5 from the Geneva version—' the house . . . must be exceeding magnifical.' The adverb occurs in Rhem. NT, Lk 16^{19} ' He fared every day magnifically.'

MAGNIFICAT, BENEDICTUS, AND NUNC DIMITTIS.—The hymn *Magnificat* (Lk 1^{46-55}) has been well described as ' something more than a psalm, and something less than a complete Christian hymn ' (Liddon). The same characterization may apply to the *Benedictus* (Lk 1^{68-79}). They are the poems of those who felt nearer to the fulfilment of the promises than any writer of the OT. But no Evangelist of the NT, writing after the Death and Resurrection of Christ, could have failed to speak of the event of salvation as having already occurred. Both hymns stand on the brink of the fulfilment, but the fulfilment has not yet been accomplished.

It is therefore widely believed to-day that both hymns emanate from circles associated with John the Baptist, which were still looking for the Coming One. Also, both hymns are detachable from their context. V.^{56} follows directly upon v.^{45}, the ' her ' of v.^{56} then referring unambiguously to the speaker of v.^{45}; similarly v.^{80} follows naturally upon v.^{66}, since both speak of the growth of John the Baptist, while the whole hymn (1^{68-79}) hangs somewhat in mid-air, and would come more appropriately after v.^{64}. Thus it would seem that the Evangelist, or his source, has interpolated two liturgical compositions of a John the Baptist community into an already existing narrative.

This suggests a solution to the much discussed problem of the true reading in v.^{46}. In the TR the hymn is ascribed to Mary, but there is a variant reading ' Elisabeth.' ' Mary ' is the reading of all the Greek MSS, of the great majority of Latin MSS, and of many Early Fathers as far back as Tertullian (2nd cent.). On the other hand, three old Latin MSS (*a*, *b*, *l*) have ' Elisabeth.' (The frequent reference to Origen is a mistake.) Niceta of Remesiana (*fl. c* 400) quoted it in his treatise ' On the good of Psalmody,' ch. 11, and it occurs in two MSS of the Latin translation of Irenaeus *Adv. Haer.* IV. 12 (3rd cent.). There is much to be said for the view that the original text was simply ' and she said,' so that both ' Mary ' and ' Elizabeth ' should be regarded as glosses.

On the question which is the right gloss, opinions have been divided. As a Christian evangelist, however, proclaiming God's decisive act of redemption in Christ, Luke must surely have understood the *Magnificat* as a prophecy not of the redemptive act conceived merely as a future hope, but as a hope which had been fulfilled precisely in the Christ-event. It would therefore seem plausible to suppose that while the *Magnificat* was originally a hymn of a John the Baptist sect, it has been taken over to Christian usage, either by Luke himself, or by the Church before him, and transferred from Elisabeth to Mary, the Mother of the Christ, by the addition of v.^{48b}, which, as has frequently been pointed out, is more appropriate on the lips of Mary than of Elisabeth.

The *Magnificat* has four strophes. In strophe i (vv.$^{46-47}$) Mary praises God with all the powers of soul and spirit. In ii (vv.$^{48-49}$) she speaks of living in the memory of men, not as something deserved but because it is the will of the holy Lord. In iii (vv.$^{50-53}$) she rises to a large view of the working out of God's purposes in human history, in the humbling of proud dynasties, and the triumph of the meek. In iv (vv.$^{54-55}$) she comes back to the fulfilment of the promises in the Messianic time, beginning with the birth of the Christ, which is the crowning act of God's mercy and love.

The *Benedictus* falls into two parts. Part i (vv.$^{68-75}$) praises God because his Messianic promises are now on the brink of fulfilment. The past tenses, ' has visited ' etc. are ' prophetic '; so certain is the fulfilment, and so close at hand, that it can already be spoken of as having occurred. Part ii (vv.$^{76-79}$) is a prophecy of John the Baptist's role as the forerunner of the Coming One, spoken of as the Star (RSVm ' dayspring ') who will accomplish the redemptive act of God. In the John the Baptist community the advent of the Coming One still lay in the future. But in the perspective of the Evangelist he has already come in Jesus.

The *Nunc Dimittis* (2[29-32]) is similarly detachable from its context, for it duplicates the prophecy in vv.[34b-35]. Like the other canticles, it is probably a pre-Lucan liturgical hymn, but unlike them a Christian one. The Messianic salvation has already occurred (v.[30]), and is not, as in the John the Baptist hymns, merely on the brink of fulfilment. Also, the salvation is defined in universalistic terms (v.[32]; contrast 1[55f] and [69, 73f]). This hymn consists of three couplets: v.[29], in which the speaker recognizes that he may depart from this life 'in peace'; vv. [30-31], which state the reason for this, that the long-awaited Messianic salvation has now begun; v.[32] a succinct definition of the content and scope of the salvation. A. E. B.—R. H. F.

MAGOG.—The name of a people, enumerated in Gn 10[2] 1 Ch 1[5] among the sons of Japheth, between Gomer (the Cimmerians) and Madai (the Medes). It appears also in Ezk 38[2] (with the definite article) and 39[6], apparently as indicating the land under the rule of **Gog** 'chief prince of *Meshech* and *Tubal*' who is to lead a great expedition against the restored Israel, from 'the uttermost parts of the north,' and who has as his allies *Gomer* and (Beth)-*Togarmah*. The names italicised are also mentioned in Gn 10[2f] as closely connected with Magog. From these notices it would seem that Magog was a people (or land) to the far north of Palestine, not far from Meshech and Tubal, whose home is shown by Assyrian records to have been NE. of Cilicia. Josephus (*Ant.* I. vi. 1 [123]) connected Magog with the Scythians, a people whom Herodotus designated as belonging N. of the Crimea (iv. 17–20, 47–58), and whose predatory incursions into Asia and elsewhere are known over a long period. If Gog is connected with Gyges of Lydia (see Gog), this seems unlikely; and neither this nor the interpretation of Gog as reminiscent of Gagâ'a (Gaga, Gašga)—barbarians, explains the name Magog, unless it is to be regarded either as an artificial form, simply denoting the home of Gog (a sort of rhyming couplet), or as a corruption of Assyrian *mat-Gugi*—land of Gyges. The suggestion has been made that Magog in Gn 10[2] is simply an erroneous copying of Gomer (written with its consonants in the wrong order as *mgr*). In Ezk 38[2] it has also been thought to be a marginal note, an abbreviation of the Hebrew equivalent (*hammagēdōn*) of Greek '*Ho Makedōn*' *i.e.* the Macedonian (Alexander the Great). It certainly needs to be explained why Magog appears here with the definite article (literally 'the land of the Magog'), and the reference in 39[6] could equally be personal.

In Rev 20[8] Gog and Magog represent the nations of the whole earth, gathered by Satan to be brought to disaster as they engage in a final assault on the saints and the holy city (see, further, Gog).

S. R. D.—P. R. A.

MAGOR-MISSABIB.—A nickname given (Jer 20[3] AV, RV; RSV 'Terror on every side') by Jeremiah to Pashhur, chief officer in the Temple, who had caused Jeremiah to be beaten and put in the stocks as a false prophet. The name is an etymological play on the word *Pashhur*, and denoted 'fear-round-about'; but whether Pashhur (q.v.) was to be that to his surroundings, or *vice versa*, does not appear. W. F. C.

MAGPIASH.—One who sealed the covenant, Neh 10[20].

MAGUS.—See Bar-Jesus, Magi, Magic, Simon Magus.

MAHALAB.—A town of Asher, Jos 19[29] (so RSV; Hebrew has *meḥebhel*, which AV renders 'from the coast,' and RV 'by the region of,' with margin 'from Hebel to'). **Ahlab** and **Helbah** (Jg 1[31]) are probably both to be identified with this place, which figures in Sennacherib's inscription as *Maḥalliba*; modern *Khirbet el-Maḥâlib*.

MAHALAH, 1 Ch 7[18] (AV).—See Mahlah, **2.**

MAHALALEEL.—See Mahalalel.

MAHALALEL.—1. Son of Kenan and great-grandson of Seth (Gn 5[12f, 15-17], 1 Ch 1[2] [AV all **Mahalaleel**], Lk 3[37] [AV, RV, RSV **Mahalaleel**]); called **Mehujael** in Gn 4[18]. **2.** The son of Perez, who dwelt at Jerusalem after the Captivity, Neh 11[4] (AV **Mahaleleel**).

MAHALATH.—1. Daughter of Ishmael and sister of Nebaioth, who became Esau's wife, Gn 28[9]; called **Basemath** (q.v.) in Gn 36[3]. **2.** Wife of Rehoboam, 2 Ch 11[18]. **3.** See Psalms, **2.**

MAHALATH LEANNOTH.—See Psalms, **2.**

MAHANAIM ('two camps' or 'two hosts' [if the Hebrew word is really a dual, which is very doubtful]).—An important city E. of Jordan on the frontier of Gad and Manasseh (Jos 13[26, 30]); it was a Levitical city within the territory of Gad (Jos 21[38]). It was clearly N. of the Jabbok, as Jacob travelling S. reached it first (Gn 32[2, 22]). Here Abner made Ish-bosheth, son of Saul, king (2 S 2[8]), and here David took refuge from his rebel son Absalom (2 S 17[24-27] 19[32]). Solomon put Abinadab in authority in this city (1 K 4[14]). There is apparently a reference to Mahanaim in Ca 6[13] (RV, AVm, RSVm). The site of Mahanaim is quite uncertain, and various identifications have been proposed; those recently maintained include *Kh. Maḥneh*, *Tell el-Hajjāj*, and *Tulūl eḍ-Ḍahab*. Of these the first is most favoured.

MAHANEH-DAN.—A town situated between Zorah and Eshtaol, W. of Kiriath-jearim, Jg 13[25] (AV translates 'the camp of Dan') 18[12]. The site is unknown.

MAHARAI.—One of David's thirty heroes, 2 S 23[28], 1 Ch 11[30]; according to 1 Ch 27[13], of the family of Zerah, and captain of the Temple guard for the tenth monthly course.

MAHATH.—1. The eponym of a Kohathite family, 1 Ch 6[35], 2 Ch 29[12]; perhaps to be identified with **Ahimoth** of 1 Ch 2[65]. **2.** A Levite in the time of Hezekiah, 2 Ch 31[13].

MAHAVITE, THE.—The EV designation in 1 Ch 11[46] of Eliel, one of David's heroes. The MT should perhaps be emended to read 'the Mahanaimite.'

MAHAZIOTH.—The Hemanite chief of the 23rd course of singers, 1 Ch 25[4, 30].

MAHER-SHALAL-HASH-BAZ ('spoil speeds, prey hastes').—A symbolical name given to one of Isaiah's sons to signify the speedy destruction of the power of the allied kings Rezin and Pekah by the king of Assyria, Is 8[1f].

MAHLAH.—1. One of the daughters of Zelophehad (q.v.), Nu 26[33] 27[1] 36[11], Jos 17[3]. **2.** One of the sons of Hammolecheth, 1 Ch 7[18] (AV **Mahalah**).

MAHLI.—In Ex 6[19], Nu 3[30], 1 Ch 24[26, 28], it is the name of a son of Merari, Levi's youngest son. In 1 Ch 23[23] 24[30] a son of Mushi, Mahli's brother, bears the same name. Ezr 8[18], 1 Es 8[47] speak of a man of discretion (see Ish-Sechel) of the sons of Mahli (1 Es 8[47], AV **Moli**; RV **Mooli**) namely Sherebiah (in Ezr 8[18], AV and RV have 'and Sherebiah'). In Nu 3[33] 26[58] Mahli's descendants are called 'the family of the **Mahlites.**' According to 1 Ch 23[22], these Mahlites were descended from the daughters of Eleazar, the elder son of the Mahli mentioned in Ex 6[19]. Eleazar left no male offspring. Their cousins, the sons of Kish, therefore took them in marriage, and prevented the extinction of their father's name.

MAHLON ('sickness').—Son of Elimelech and Naomi (Ru 1[2]), who married Ruth (4[10]), a Moabitess, and after a sojourn of ten years in Moabite territory died there. His widow subsequently married Boaz (q.v.).

MAHOL.—The father of Ethan the Ezrahite, Heman, Chalcol, and Darda (1 K 4[31]), who are mentioned as famous for their wisdom, though surpassed in this respect by Solomon. But in 1 Ch 2[6] the same four, with Zimri, are mentioned as sons of Zerah. The word *māḥôl* is elsewhere found amongst instruments of music (*e.g.* Ps 149[3] 150[4], where EV have 'dance'), so that the four wise men mentioned above may really be described

as ' sons of music, ' in which case their wisdom may have consisted chiefly in their skill in the composition of hymns. T. A. M.

MAHSEIAH.—Grandfather of Baruch and Seraiah, Jer 32[12] 51[59] (AV **Maaseiah**), Bar 1[1] (AV **Maasias**, RV **Maaseas**).

MAIANEAS, 1 Es 9[48] (AV).—See MAASEIAH, **7.**

MAIANNAS, 1 Es 9[48] (RV).—See MAASEIAH, **7.**

MAIL.—See ARMOUR, **2** (*c*).

MAINSAIL.—See SHIPS AND BOATS.

MAJESTY.—A variety of words are used to express the idea of majesty, which is often ascribed to God (*e.g.* Ex 15[7, 11], Dt 33[26], 1 Ch 16[27] 29[11], Job 13[11] 31[23] 37[4, 22], Ps 8[1, 9] 29[4] 68[34] 76[4] 93[1], Is 2[10] 30[30], Mic 5[4], 2 P 1[17], Jd 25), or to Christ (2 P 1[16]), but also to Zion (Is 60[15], La 1[6]) or to kings (1 Ch 29[25], Ps 45[3f], Est 1[4], Dn 4[30, 36]), or to mountains (Ps 76[4], Is 35[2]) and trees (Is 10[34] [AV, RV ' by a mighty one ']), or to animals (Dt 33[17], Job 39[20]). In several of these cases the older EV render by ' excellency ' or ' glory.' See also GLORY.

MAKAZ.—A town on the W. slopes of Judah, 1 K 4[9]. The LXX reading, *Michmash*, is impossible. It is possibly modern *Kh. el-Mukheizin*.

MAKE.—In Jg 18[3] AV ' to make ' means ' to do '—' What makest thou in this place? ' In Jn 8[53] AV and RV ' Whom makest thou thyself? ', and in Jn 19[7] AV, RV, and RSV ' He made Himself the Son of God,' ' make ' means ' pretend to be ' ; cf Jos 8[15] AV and RV ' Joshua and all Israel made as if they were beaten.' This is the meaning also in 2 S 13[5] AV, ' Lay thee down on thy bed, and make thyself sick.' In Ezk 17[17] AV and RV ' Neither shall Pharaoh with his mighty army and great company make for him in the war,' ' make for ' means ' assist.'

MAKED.—A ' strong and great ' city in Gilead (1 Mac 5[26, 36]). The site is unknown.

MAKHELOTH.—One of the twelve ' stations ' of the children of Israel, Nu 33[25f] ; the site is unknown.

MAKKEDAH.—A Canaanite royal city in the ' lowland ' (Shephelah) of Judah (Jos 12[16] 15[41]), tentatively identified with modern *Khirbet el-Kheishûm*, 14½ miles W. of Bethlehem, about midway between Azekah and Beth-shemesh. Here Joshua encamped after the battle of Gibeon, and here he captured and killed the five kings whom he had defeated in that battle. At the same time he stormed Makkedah and massacred its inhabitants together with their king (Jos 10[10–29]). F. F. B.

MAKTESH.—The name of a locality mentioned only in Zeph 1[11] (AV, RV) as a commercial quarter of Jerusalem. The word denotes a mortar (hence RSV ' the **Mortar** '), and presumably was given to the place because it was basin-shaped. If so, a part of the Tyropoeon valley has as good a claim as any other locality to be regarded as what is referred to.

MALACHI.—This is not the personal name of the author of the book, to whose identity we have no clue, but rather a substitute for his name, derived from his allusion to the predicted ' messenger ' of 3[1]. There may have been those who believed that this prophet himself was the messenger. However, his own meaning was that an angel of the Lord would come.

The position of the book at the end of the Minor Prophets suggests that it is post-exilic. The contents show that this is indeed the case. It is generally put between Haggai-Zechariah (520 B.C.) and Nehemiah (*c* 445 B.C.). It looks back on the recent destruction of Edom (*c* 460 B.C.). The Jews are ruled by a governor (1[8])—presumably the one in Samaria, for it was only with Nehemiah's coming that Judaea became a separate province. In considering Edom's downfall as final the prophet was fully vindicated. The explorations of Glueck have shown that when Edom was again resettled it was by a new people, the Nabataeans.

The book of Malachi is unique in that the author has a question and answer method in getting into his topics. Fortunately there are no serious literary-critical difficulties. The only later addition seems to be the conclusion 3[22–24]. There are six discourses or disputations.

(1) Proof that Yahweh loves Israel ; Esau is the rejected one (1[2–5]).

(2) The priests are criticized for sacrificing blemished animals and the laity blamed for paying its vows with such. The former are threatened with punishment by the Lord (1[6]–2[10]).

(3) Jewish men are upbraided for divorcing their wives and marrying foreigners (2[10–16]).

(4) Doubters are warned that the day of wrath will surely come (2[17]–3[5]).

(5) Hard times are blamed on the failure to pay tithes. Recovery is promised if this is done (3[6–12]).

(6) Those sceptical of God's justice are assured that He will reward the godly and punish the evildoers (3[13–21]).

The conclusion (3[22–24]) is composed of two additions to the book. The first (v.[22]) is an admonition to obey the Law, and the second (vv.[23f]) provides a fresh interpretation of the ' messenger ' of 3[1]. He is here identified with the prophet Elijah, who is to return to earth and act as restorer. He is virtually a substitute figure for a Messiah. In Sir 48[10–11] (written *c* 190 B.C.) the Malachi passage is referred to and augmented with allusion to Is 42[6]. By the time of Jesus the returning Elijah had become a forerunner or attendant of the Messiah.

The original prophecy is a significant witness to the situation prevailing in Judaea before the introduction of the Law. It was a rather discouraged and demoralized life that was lived there. The community was urgently in need of new impulses.

Malachi has some very advanced ideas (see 1[11] 2[10, 16]), but on the OT level it was not possible to follow them through to their fullest extent. He shows the need for a new and higher order. E. G. K.

MALACHY.—2 Es 1[40] (AV and RV) for **Malachi.**

MALCAM.—**1.** One of the heads of the fathers of Benjamin, and the son of Shaharaim and Hodesh, 1 Ch 8[9] (AV **Malcham**). **2.** In Zeph 1[5] *Malcam* (RV ; AV **Malcham**) is apparently the name of an idol, and might be rendered literally ' their king,' as in the margin of AV and RV. Quite possibly, however, there is an error in the pointing of the Hebrew word, and it should be rendered, as in RSV, **Milcom** (q.v.), the ' abomination ' of the children of Ammon, and identical with Molech. In Jer 49[1, 3] RV again has *Malcam* (AV ' their king ' ; AVm **Melcom**) where RSV has **Milcom.** See MOLECH.

MALCHAM.—AV form of **Malcam** (q.v.).

MALCHIAH.—**1.** A priest, the father of Pashhur Jer 21[1] 38[1] ; the same as **Malchijah, 2.** **2.** A member of the royal family, to whom belonged the cistern-prison into which Jeremiah was let down, Jer 38[6].

MALCHIEL.—The eponym of an Asherite family, Gn 46[17], Nu 26[45], 1 Ch 7[31]. The Gentilic name **Malchielites** occurs in Nu 26[45].

MALCHIJAH.—**1.** A descendant of Gershom, 1 Ch 6[40 (Heb. 25)]. **2.** A priest, the father of Pashhur, 1 Ch 9[12], Neh 11[12] ; the same as **Malchiah, 1.** **3.** Head of the 5th course of priests, 1 Ch 24[9] ; possibly the same as the preceding. **4.** A son of Parosh who had married a foreign wife, Ezr 10[25], 1 Es 9[26] (AV, RV v.[25] **Melchias**). **5.** A second son of Parosh who did the same according to the Hebrew of Ezr 10[25] (so AV, RV), but RSV substitutes the name **Hashabiah,** on the basis of 1 Es 9[26], where Greek has **Asibias.** **6.** One of the sons of Harim who had married a foreign wife, Ezr 10[31] ; he took part in repairing the wall, Neh 3[11] ; in 1 Es 9[32] he is called **Melchias.** **7.** The son of Rechab who repaired the Dung Gate, Neh 3[14]. **8.** One of the guild of the goldsmiths who helped to repair the wall, Neh 3[31]. **9.** One of those who stood at Ezra's left hand at the reading of the Law, Neh 8[4], 1 Es 9[44] (AV, RV **Melchias**). **10.** One of those who sealed the covenant, Neh 10[3] ; probably the same as **9.** **11.** A

priest who took part in the ceremony of dedicating the wall, Neh 12[42].

MALCHIRAM.—Son of Jeconiah, 1 Ch 3[18].

MALCHISHUA.—The third son of Saul, 1 S 14[49] (AV **Melchishua**), slain by the Philistines at Mt. Gilboa, 1 S 31[2] (AV **Melchishua**), 1 Ch 10[2].

MALCHUS.—The name of the high priest's slave whose ear Peter cut off in the Garden of Gethsemane at the arrest of our Lord. Only the Fourth Gospel mentions his name (Jn 18[10]), a fact perhaps related to its source of information in the high priest's household (Jn 18[15]). The incident is related in the other three Gospels (Mt 26[51], Mk 14[47], Lk 22[50]), but without naming the slave. M. St.—F. C. G.

MALICE.—The word was not used by AV or RV in the OT, but does occur in Prayer-Book Psalter, in AV Apocrypha, and in NT in AV and RV. In these three versions, however, malice is generally to be understood in 17th cent. sense of 'wickedness' in general (=Gr. *kakia*); and in the case of Apocrypha, RV substituted 'wickedness' where AV had 'malice,' this having become a more accurate translation in view of the change of meaning of the English word. There are two passages in OT where the modern meaning of 'malice' is the right translation (Ezk 25[6, 15]=*sh*e'*āṯ*) and two more (Ps 41[5] 73[8]) where the context shows it to be the right translation of *ra*'= 'evil' (cf RSV). In NT there is no word other than *kakia* for malice, but it is understood from the context as having the special meaning of malice in Ro 1[29], 1 Co 5[8], Eph 4[31], Col 3[8], Tit 3[3], 1 P 2[1]. *Ponēria* is similarly translated in Mt 22[18]. Malice means 'a desire to hurt or harm' and as such is quite contrary to the principle of love. S. B. F.

MALLOTHI.—A son of Heman, 1 Ch 25[4, 26].

MALLOW.—Hebrew, *mallûah*, connected with *melah*, 'salt.' This word is found in Job 30[4] (AV, RSV; RV **salt-wort**). Almost certainly the sea orache (*Atriplex halimus*), a perennial shrub with leaves somewhat like the olive, common on saltish marshes, especially near the Dead Sea, where it is associated with the *retem* (See Broom). The sour-tasting leaves can be eaten, but only in dire necessity. In Job 24[24] RSV restores 'mallow' from the LXX.

MALLUCH.—**1.** A Merarite, ancestor of Ethan, 1 Ch 6[44]. **2.** One of the sons of Bani who had married a foreign wife, Ezr 10[29], 1 Es 9[30] (AV, RV **Mamuchus**). **3.** One of the sons of Harim who had married a foreign wife, Ezr 10[32]. **4. 5.** Two of those who sealed the covenant, Neh 10[4, 37]. No **4.** is probably identical with **Malluchi** (q.v.).

MALLUCHI.—The eponym of a priestly family who returned with Zerubbabel, Neh 12[14] (AV, RVm **Melicu**).

MALLUS.—A city of Cilicia which joined Tarsus in a rebellion against Antiochus Epiphanes about 171 B.C. (2 Mac 4[30]). Tradition said that it was founded at the time of the Trojan War. Its coinage shows that it was an important town. Its site is doubtful, but ancient statements locate it near the river Pyramus, near the sea, and also on a hill. Sir Wm. Ramsay identified it with *Kara-Tash*, on a coast line of hills E. of Magarsa, which served as its port. The W. branch of the Pyramus has become almost completely dried up. A. E. H.

MALOBATHRON.—The name of a spice-yielding plant, named in RVm of Ca 2[17], where AV, RV have **Bether** (q.v.) and RSV has 'rugged (mountains).' Against RVm it is argued that the malobathron plant (*Laurus malabathrum*) did not grow wild on any of the mountains of Palestine.

MALTA.—An island about sixty miles S. of Sicily, with an area of about ninety-five square miles. Its excellent position as a commercial station led to its early colonization by Phoenicians and Greeks. It became subject to Carthage, but was conquered by the Romans in 218 B.C., and became part of the province of Sicily. But the Carthaginian and Libyan element predominated, hence Luke's use of the phrase 'the natives' (Ac 28[2]). There can be no doubt that this *Melitē* was the scene of St. Paul's shipwreck. The use of the name Adria (Ac 27[27]) led to an attempt to identify it with Melita in the Adriatic, but the term 'Adria' (q.v.) was freely applied to the sea E. and SE. of Sicily, and the wind 'Euraquilo' (q.v.; Ac 27[14]) would drive them from Crete to Malta if the captain, realizing that his chief danger was the Syrtis quicksands (27[17]), took the natural precaution of bearing up into the wind as much as the weather permitted. The description is precise. On the fourteenth night of their drifting, by sounding they found they were getting into shallower water, and cast out anchors; but when day dawned they saw before them a bay with a shelving beach, on which they determined to run the vessel. Therefore they hastily cast off the anchors, unfastened the rudders, which had been lashed during their drifting, and with the aid of these and the foresail tried to steer the ship onto the beach. But before they reached it they ran on a shoal 'where two seas met,' and reached the shore only by swimming or floating on spars. Every detail of the narrative is satisfied by assuming that they landed on the W. side of St. Paul's Bay, eight miles from Valetta, five miles from the old capital Città-Vecchia. St. Luke relates only two incidents from St. Paul's three-months' stay. As they made a fire for the shipwrecked men, a viper, aroused from the wood by the heat, fastened on St. Paul's hand, and, to the surprise of the onlookers, did him no harm. The word 'venomous' (28[4] AV, RV) is not properly in the text, and Luke does not state that it was a miraculous deliverance. But the natives thought it was, and therefore there probably were venomous snakes in Malta then. There are none now, but in an island with 2000 inhabitants to the square mile they would be likely to become extinct. The other incident was the curing of dysentery of the father of Publius (q.v.). Naturally there are local traditions of St. Paul's residence, and the earliest map of Malta, a Venetian one of 1530, has a Church of St. Paul near the bay, but on its E. side. The first known bishop of Malta was at the Council of Chalcedon in 451.

Malta has had a varied history since. Vandals, Normans, Turks all left their mark on it. In 1530, Charles V. gave it to the knights of St. John, who defended it three times against the desperate attacks of the Turks. In 1798, Napoleon seized it, but the British took it from him in 1800, and it remained in British hands until 1960, when the island became independent. But the population remains very mixed. The native language, Maltese, is a descendant of the Phoenician. A. E. H.—E. G. K.

MALTANNEUS, 1 Es 9[33] (RV).—See Mattenai, **2.**

MAMAIAS, 1 Es 8[44] (AV).—See Shemaiah, **15.**

MAMBRES.—See Jannes.

MAMDAI (1 Es 9[34]).—See Benaiah, **3.**

MAMMON, represents the Aramaic word *māmōn* 'riches' or 'wealth,' (the English double *m* derives from late Greek MSS). Its derivation is disputed, but the probabilities are that it is from the common Semitic root *'mn* 'to be firm, reliable' (the same root from which we have *Amen*); so that *māmōn* is something secure, that on which one may rely. In the NT it occurs only in the words of Jesus about serving God and Mammon (Mt 6[24]=Lk 16[13]) and in the parable of the unjust steward (Lk 16[9, 11]), but it is not uncommon in the Targums and Talmud, and is used in the Qumrân documents, in the Hebrew of Sirach (31[8]), and in Mandaean. Augustine (*De serm. Dom. in monte*, ii, 47) says that in the Punic language of his day it was used with the meaning 'riches,' and was doubtless so common a word in Levantine Aramaic that the evangelist could use it without translation. Since in Mt 6[24] and Lk 16[13] it seems to be personified there was a notion, found as early as Gregory of Nyssa, that it was the name of a Canaanitish god or demon of riches, a Semitic Ploutos, but there is no satisfactory basis for such an idea. A. J.

MAMNITANAIMUS, 1 Es 9[34] (AV).—See MAMNITANEMUS.

MAMNITANEMUS, 1 Es 9[34] (RV).—This name appears to correspond to **Mattaniah, Mattenai** in Ezr 10[37], and to be a corruption of them; but RSV substitutes **Machnadebai** of Ezr 10[40], which seems rather to be replaced by 'the sons of **Ezora**' in 1 Es 9[34] (RV).

MAMRE.—A name found several times in connexion with the history of Abraham. It occurs (*a*) in the expression '**terebinths of Mamre**' in Gn 13[18] 18[1] (both J), and 14[13] (from an independent source) with the addition of 'the Amorite'; (*b*) in the expression 'which is before Mamre,' in descriptions of the cave of Machpelah, or of the field in which it was (Gn 23[17, 19] 25[9] 49[30] 50[13]), and in 35[27], where Mamre is mentioned as the place of Isaac's death; (*c*) in Gn 14[24] as the name of one of Abraham's allies, in his expedition for the recovery of Lot. In (*b*) Mamre is an old name, either of **Hebron** or of a part of Hebron (cf 23[19] 35[27]); in Gn 14[13] it is the name of a local sheikh or chief (cf v.[24]), the owner of the terebinths called after him; in Gn 13[18] 18[1] it is not clear whether it is the name of a person or of a place. The 'terebinths of Mamre' are the spot at which Abraham pitched his tent in Hebron. The site is uncertain, though, if the present mosque, on the NE. edge of Hebron, is really built over the cave of Machpelah, and if 'before' has its usual topographical sense of 'east of,' it will have been to the W. of this, and at no great distance from it (for the terebinths are described as being 'in' Hebron, Gn 13[18]). From Josephus' time (*BJ* IV. ix. 7 [533]) to the present day, terebinths or oaks called by name of the Abraham have been shown at different spots near Hebron; but none has any real claim to mark the authentic site of the ancient 'Mamre.' The oak mentioned by Josephus was 6 stadia from the city; but he does not indicate in which direction it lay. Sozomen (*HE* ii. 4), in speaking of the 'Abraham's Oak' of Constantine's day (2 miles N. of Hebron), states that it was regarded as sacred, and that an annual fair and feast was held beside it, at which sacrifices were offered, and libations and other offerings cast into a well close by. It is perhaps to be identified with *Râmet el-Khalîl* near Hebron. S. R. D.—**A. S. H.**

MAMUCHUS, 1 Es 9[30] (AV, RV).—See MALLUCH, 2

MAN.—The Bible is concerned with man only from the religious standpoint, with his relation to God. This article will deal only with the religious estimate of man, as other matters which might have been included will be found in other articles (CREATION, ESCHATOLOGY, FALL, SIN, PSYCHOLOGY). Man's dignity, as made by special resolve and distinct act of God in God's image and likeness (synonymous terms), with dominion over the other creatures, and for communion with God, as asserted in the double account of his Creation in Gn 1 and 2, and man's degradation by his own choice of evil, as presented figuratively in the story of his Fall in Gn 3, are the two aspects of man that are everywhere met with. The first is explicitly affirmed in Ps 8, an echo of Gn 1; the second, without any explicit reference to the story in Gn 3, is taken for granted in the OT (see especially Ps 51), and is still more emphasized in the NT, with distinct allusion to the Fall and its consequences (see especially Ro 5[12-21] and 7[7-25]). While the OT recognizes man's relation to the world around him, his materiality and frailty as 'flesh' (q.v.), and describes him as 'dust and ashes' in comparison with God (Gn 2[7] 3[19] 18[27]), yet as made in God's image it endows him with reason, conscience, affection, free will. Adam is capable of recognizing the qualities of, and so of naming, the living creatures (2[19]), cannot find a help meet among them (v.[20]), is innocent (v.[25]), and capable of moral obedience (v.[16f]) and religious communion (3[9f]). The Spirit of God is in man not only as life, but also as wisdom and understanding, counsel and might, skill and courage (see INSPIRATION). The Divine immanence in man as the Divine providence for man is affirmed (Pr 20[27]).

In the NT man's dignity is represented as Divine sonship. In St. Luke's Gospel Adam is described as 'son of God' (3[38]). St. Paul speaks of man as 'the image and glory of God' (1 Co 11[7]), approves the poet's words, 'we also are his offspring,' asserts the unity of the race, and God's guidance in its history (Ac 17[26-28]). In his argument in Romans regarding universal sinfulness, he assumes that even the Gentiles have the law of God written in their hearts, and thus can exercise moral judgment on themselves and others (2[15]). Jesus' testimony to the Fatherhood of God, including the care and bounty in Providence as well as the grace in Redemption, has as its counterpart His estimate of the absolute worth of the human soul (see Mt 10[30] 16[26], Lk 10[20] 15). While God's care and bounty are unlimited, yet Jesus does not seem to limit the title 'child *or* son of God' to those who have religious fellowship and seek moral kinship with God (see Mt 5[9, 45]; cf Jn 1[12]). St. Paul's doctrine of man's adoption by faith in God's grace does not contradict the teaching of Jesus. The writer of Hebrews sees the promise of man's dominion in Ps 8 fulfilled only in Christ (2[8f]). Man's history, according to the Fourth Evangelist, is consummated in the Incarnation (Jn 1[14]).

The Bible estimate of man's value is shown in its anticipation of his destiny—not merely continued existence, but a future life of weal or woe according to the moral quality, the relation to God, of the present life (see ESCHATOLOGY). The Biblical analysis of the nature of man is discussed in detail in article PSYCHOLOGY.

A. E. G.

MAN OF SIN (or **LAWLESSNESS**).—Probably the equivalent, in 2 Th 2[3-10], of the Jewish figure of **Antichrist** (q.v.). According to the Pauline view, the Parousia would be preceded by an apostasy of believers ('the rebellion') and the appearance of the 'man of lawlessness' (or sin) 'who opposes and exalts himself against every so-called god or object of worship, so that he takes his seat in the temple of God, proclaiming himself to be God' (v.[3f]). The appearance of this evil one and his oppression of the believers were prevented by some force or person: 'You know what is restraining him now.' In the course of time, however, this restraint will be removed. The wicked one will then exercise his power until Christ comes and destroys him (vv.[6-8]).

The precise meaning of the references contained in this statement is now lost beyond recovery. St. Paul may have had in mind some definite historical person or force. But the 'man of sin' may have been expected without any prior knowledge or theory as to his identity. In any case, he is not Satan, but his representative (v.[9]), as the opposite of Jesus the representative of God. On the other hand, 'the one who restrains' must have been clearly recognizable, since 'you know him' (v.[6]). We can only speculate as to the identity of this person or power. Was it the Roman Emperor? or the Roman State? or the still unfinished preaching of the Gospel in all the world (cf Mt 24[14])? However, it is clear that the 'lawless one' was even now engaged in his mysterious activity (v.[7]), that his lawlessness would continue and would rise to the highest pitch (v.[9]; cf Mt 24[12]). But at the Parousia of Christ this final opposition to God's work of salvation would be swept away (Mt 7[23] 13[41]).

H. G.

MANAEN.—1. One of the Greek forms used in the Septuagint for the Hebrew name Menahem (2 K 15[14-23]). **2.** One of the Christian prophets and teachers at Antioch mentioned in Ac 13[1]. In the same passage he is called 'a member of the court of Herod the Tetrarch' (RSV). Another possible meaning of this expression is '(one) who had been brought up with Herod' (Goodspeed). If the latter meaning is the correct one, he may have been related in some way with Manaen the Essene, who according to Josephus had predicted to Herod the Great, when a child, that he would become king of the Jews. But the former meaning is more likely in the light of the Hellenistic parallels first adduced by Deissmann.

W. R. S.

MANAHATH.—1. Mentioned only in 1 Ch 8[6] as the place to which certain Benjamite clans were carried

captive. The town is probably identical with that implied in **Manahathites** (q.v.), with the *Manochō* of the Greek text of Jos 15[59], and if the text in Judges is correct, with the **Menuhah** of Jg 20[43] RVm (but see NOHAH, **1**). It is probably modern *Mâlḥā*, SW. of Jerusalem. **2.** Eponymous ancestor of an Edomite clan, Gn 36[43], 1 Ch 1[40].

MANAHATHITES.—A gentilic found in 1 Ch 2[52] (AV **Manahethites**), and probably originally in v.[54] (RV, RSV **Menuhoth**; AV **Manahethites**). See MANAHATH, **1.**

MANAHETHITES, 1 Ch 2[52, 54] (AV).—See MANAHATHITES.

MANASSEAS.—See MANASSEH, **2.**

MANASSEH.—In MT and AV of Jg 18[30] *Manasseh* (cf RVm, RSVm) is a scribal change for dogmatic purposes, the original being *Moses* (so RV, RSV); see GERSHOM, **1. 2.** A son of Pahath-moab, Ezr 10[30], called **Manasseas** in 1 Es 9[31]. **3.** Son of Hashum, Ezr 10[33], 1 Es 9[33] (AV, RV **Manasses**). **4.** Judith's husband, Jth 8[2] (AV, RV **Manasses**). **5. 6.** See next two articles. **7.** For 'Prayer of Manasseh' see APOCRYPHA, **13.**

MANASSEH.—The firstborn son of Joseph, and brother of Ephraim (Gn 41[51f]), by Asenath, the daughter of Poti-phera, priest of On. In form the name is a *Pi'ēl* participle of the verb *nāshāh* and could bear the meaning 'one who makes to forget,' *i.e.* an earlier misfortune. He was the eponymous ancestor of the tribe that bears the name Manasseh. The two tribes, Ephraim and Manasseh, together form the 'tribe of Joseph' (Jos 17[14]) and the 'house of Joseph' (17[17] 18[5], Jg 1[22f, 35]). One lot is assigned to them in Jos 16[1-3]. Manasseh's son Machir is given Gilead and Bashan in Jos 17[1]. The names of the rest of the sons (or descendants) of Manasseh, Abiezer, Helek, Asriel, Shechem, Hepher, Shemida, as well as the five daughters of Zelophehad, the great-grandson of Machir, are probably all place-names, as some of them certainly are, and not personal names.

Uncertainty of interpretation rests on nearly everything that is recorded in connexion with the tribe of Manasseh. Four different lists of his descendants have been incorporated in the OT. (i) Jos 17[1f] (J), where he is the father of all the clans associated with the tribe of Manasseh and is the grandfather of Gilead. (ii) Nu 26[28-34] (P), where he is the father of Machir and grandfather of Gilead from whom the other Manassite clans are said to be descended. (iii) 1 Ch 7[14-19], which is noteworthy for its mention of an Aramaean concubine suggesting a consciousness of connexion between Manasseh and the Aramaeans. (iv) 1 Ch 2[21-23], whose interest lies in the connexion of a member of Judah with an east-Jordan tribe. In the Song of Deborah, the oldest source for the history of the tribal settlement, Ephraim is mentioned by name but Manasseh is clearly meant by **Machir** (v.[14]); in other traditions Machir is associated with east-Jordan and not west as in the song. The most likely theory is that, contrary to the assumption that Moses allotted territory E. of Jordan to half-Manasseh on condition of military help in the 'conquest,' Manasseh (Machir) first occupied territory W. of Jordan, but, finding the situation too cramped (Jos 17[14-18], Nu 32[39]) moved E. and occupied Gilead while kindred clans, Jair and Nobah, occupied neighbouring territory (Nu 32[41f]). The consequent readjustment of tribes and territory possibly led to the father-son relationship between Manasseh, Machir, and Gilead, although the latter was almost certainly a place-name in origin. Jair was also taken up into the genealogy (1 Ch 2[22]). The delineation of territory assigned to Ephraim and Manasseh is also a source of difficulty (Jos 16, 17) which emerges most clearly at 16[9] 'the towns which were set apart for the Ephraimites within the inheritance of Manasseh' and at 17[11] 'Also in Issachar and in Asher Manasseh had Beth-shean and its villages, and Ibleam and its villages, etc.' Why should Ephraim hold cities within the land occupied by Manasseh? and why should the territory of Manasseh intrude within that of Issachar and Asher? The answer may well be that the actual historical situation was an ever changing one; that the tribe of Manasseh sprang to birth out of the tribe of Ephraim due to an expansion of that tribe northwards in the direction of the territory held by Canaanites, the plain of Esdraelon, and by Issachar and Asher, N. of the plain, and that parts of this northern element crossed the Jordan and settled in Gilead alongside the native inhabitants and other settlers (Jair and Nobah). Some such sequence of events may further be reflected in the fact that at one time Ephraim is given precedence over Manasseh (Gn 48[5]) as indicated in the way in which Jacob crossed his hands in giving his blessing (Gn 48[14]; cf also Dt 33[17]), but that Manasseh is otherwise regarded as the firstborn (Gn 41[51f]).

The tribe, owing to its situation, had much to endure during the Syrian wars (Am 1[3], 2 K 10[33]), and, according to 1 Ch 5[26], the eastern half was deported in 743 B.C. by Tiglath-pileser III. L. H. B.

MANASSEH, son of Hezekiah, reigned longer than any king of his line—fifty-five years, according to our sources (2 K 21[1]). His reign was remarkable for the religious reaction against the reforms which had been made by Hezekiah. The record (vv.[2-9]) is that he built again the altars which Hezekiah had destroyed, and erected altars for Baal, and made an *'ashērāh*, as Ahab king of Israel had done, and that he worshipped the host of heaven and served them. In restoring the old altars he doubtless thought he was returning to the early worship of the nation, and the Baal whom he worshipped was probably identified in the minds of the people with the national God Yahweh. The *'ashērāh* was a well-known accompaniment of altars in Israel down to the time of Hezekiah. The worship of the host of heaven was probably an obligation of his subjection to Assyrian domination. Both Esarhaddon and his successor Ashurbanipal list 'Manasseh king of Judah' among their twenty-two vassal kings. The sacrifice of his son and the practice of witchcraft and magic were not unheard of practices in ancient Israel. The reaction was accompanied by active persecution of the prophetic party. It is no wonder that the record of *Kings* is couched in terms of strong condemnation. A different picture is given by the Chronicler, however. 2 Ch 33[11-13, 18, 19] tells of the captivity of Manasseh in Babylon, of his conversion and submission to God, and of his restoration to his own throne. The captivity may well be a true tradition for it is known that Ashurbanipal had several royal captives at his court. The Chronicler has probably embellished it in the interests of accounting for the longest reign enjoyed by the worst king. H. P. S.—L. H. B.

MANASSES.—**1.** 1 Es 9[33] (AV, RV); see MANASSEH, **3. 2.** Jth 8[2] (AV, RV); see MANASSEH, **4. 3.** To 14[10] (AV, RV); RSV reads **Ahikar** (q.v.). **4.** For 'Prayer of Manasses' see APOCRYPHA, **13.**

MANDRAKE (*dûdhā'îm*, Gn 30[14-16] [RVm 'love apples']; cf *dôdhîm* 'love,' Ca 7[13]).—Although other plants have been suggested, the mandrake (*Mandragora officinarum*), of the *Salanaceae* or Potato order, is most probable. It is a common plant in all parts of S. Palestine. Its long and branched root is very deeply imbedded in the earth, and an old superstition survives to-day that he who digs it up will be childless—but at the same time the effort of pulling it up will cure a bad lumbago. The ancients believed that this root gave a demoniacal scream as it was pulled up. Occasionally the root resembles a human figure, but most of those exhibited have been 'doctored' to heighten the resemblance. The leaves are dark green, arranged in a rosette, and the flowers dark purple. The fruit, which ripens about May, about the time of the wheat harvest, is somewhat like a small tomato, and orange or reddish in colour; it is called by the natives *baiḍ el-jinn*, 'the eggs of the *jinn*.' It has a heavy narcotic smell and sweetish taste. It is still used medicinally, but is known to be poisonous, especially the seeds. The mandrake was known to the ancients as an aphrodisaic (see MAGIC, B, 2 (*a*)). E. W. G. M.

MANEH.—See Weights and Measures, iii.

MANES, 1 Es 9^{21} (RV).—See Maaseiah, **2.**

MANGER (Lk 2$^{7, 12, 16}$ 13^{15} RVm).—EV translation of *phatnē*, the LXX equivalent of Hebrew *'ēbhûs*, Job 39^{3} EV **crib**). It also represents *'ūrāwôth* (MT *'ᵃwērôth*), 2 Ch 32^{28} (EV **stalls**), and *repheth* in Hab 3^{17} (EV **stalls**). In Job 39^{9} *'ēbhûs* may mean the stall or shelter; in Is 1^{3} it is probably the **crib** (so EV) in which the food was placed. A like ambiguity attached to *'ūryāh* in 2 Ch 32^{28}. The Hebrew *repheth* in Hab 3^{17} clearly means 'stall.' The further Hebrew word *marbēḳ* (EV 'stall,' Am 6^{4}, Mal 4^{2}) is the place where the cattle are 'tied up.'

If *kataluma* (Lk 2^{7}) means 'guest chamber' (see Hospitality, *ad fin.*) Joseph and Mary may have moved into the side of the house occupied by the cattle, from which the living-room is distinguished by a higher floor, with a little hollow in the edge, out of which the cattle eat. The present writer has seen a child laid in such a 'manger.' Or, in the crowded *khān*, only the animals' quarters may have afforded shelter. We do not now know. Ancient tradition places Jesus' birth in a cave near Bethlehem. Caves under the houses are extensively used in Palestine as stables. The *midhwad*, 'manger' cut in the side, is an excellent 'crib' for a baby. W. E.

MANI, 1 Es 9^{30} (AV, RV).—See Bani, **8.**

MANIUS.—According to 2 Mac 11^{34}, **Titus Manius** was one of two Roman legates who, being on their way to Antioch after the campaign of Lysias against Judaea in the year 164 B.C., sent a letter to the Jews confirming the concessions of Lysias, and offering to undertake the charge of their interests at Antioch in concert with their own envoy. This action would be in accord with the policy the Romans were following towards the Syrian kingdom, and is probable enough. But we have no knowledge from any other source of the presence in the East of any legate called Titus Manius. A. E. H.

MANNA.—A food of the Israelites during the wilderness wanderings (Ex 16^{35}, Nu 11^{6ff}, Jos 5^{12}).

1. The origin of the word is uncertain. In Ex 16^{15} the exclamation might be rendered, 'It is *mān*!' (note RVm). If so, the Israelites were reminded (but only vaguely, see v.^{15}) of some known substance. The similar Arabic word means 'gift.' More probably the words are a question—'What is it?' (So RSV).

2. The manna was flaky, small, and white (Ex 16$^{14, 31}$). It resembled the 'seed' (better 'fruit') of the coriander plant (Ex 16^{31}, Nu 11^{7}), and suggested bdellium (Nu 11^{7} [see 3]). It could be ground, and was stewed or baked (Ex 16^{23}, Nu 11^{8}). The taste is compared to that of honey-wafers (Ex 16^{31}), or oil (Nu 11^{8}). It was gathered fresh every morning early (but see **4**), for, if exposed to the sun, it melted (Ex 16^{21}; cf Wis 19^{2}); if kept overnight (see **4**), it went bad (Ex 16^{19ff}). Each person was entitled to a measured *'omer* of manna (Ex 16^{18}).

3. Manna has been explained as an edible lichen or as the sweet globules produced by the lichen *Lecanora esculenta*, though this plant is not now found in the Sinai region. Others have identified it with a sweet juice exuded in June by a shrub or tree, *Tamarix gallica mannifera*. Note that manna is likened (see **2**) to bdellium, which is a resinous exudation. One theory was that the manna oozed from holes made by an insect, but now it is generally held that manna is excreted by the insect which sucks large quantities of sap and gives out the excess carbohydrates as a liquid which in the air becomes the drops of sticky honeydew, characteristic of many plant lice and scale insects. The Biblical description of manna supports this identification. The appearance, season and geographical limits of natural manna agree with the Biblical account.

4. Manna would thus come under the category of 'special providences,' not 'miracles.' It was, however, regarded by the Biblical writers (Ex 16, Dt 8$^{3, 16}$, Neh 9$^{15, 20}$, Ps 78$^{23-25}$ 105^{40}; Nu 11$^{7-9}$ may be an exception) as, like the quails, miraculously provided. (*a*) There is enough for a host of '600,000 footmen.' (*b*) The quantity gathered proves exactly suited to the consumer's appetite (Ex 16^{18}). (*c*) The Sabbath supply (gathered the previous day) retains its freshness (Ex 16^{23ff}). (*d*) An *'omer* of it is kept as a sacred object near (Ex 16^{33ff}) but not *within* (1 K 8^{9}; cf He 9^{4}, Rev 2^{17}) the Ark. (*e*) Allusions to it suggest the supernatural (Neh 9^{20}, Ps 78^{24ff} 105^{40}, 2 Es 1^{19}, Wis 16^{20} 19^{21}).

5. Philo allegorized the story of manna (*Legum Allegoria* iii. 169–176). For the rabbis manna was the food of the age to come. See *Eccles. R.*, 1^{28}, 2 Bar 29^{8}. In the NT Christ as the living bread is typified by manna (Jn 6^{31ff}, 1 Co 10^{3}; cf 4); and secret spiritual sustenance is the reward for 'him who conquers' (Rev 2^{17}).

H. F. B. C.—W. D. McH.

MANOAH.—The father of Samson, of the town of Zorah, and of the family of the Danites, Jg 13^{2ff} 16^{31}. We learn but little of his character and occupation from the Bible narrative. He was a worshipper of Yahweh, and a man of reverent piety; he was hospitable, like his ancestor Abraham; he shared the dislike of his people for the alien surrounding tribes, and strongly deprecated an alliance between his son and the Philistines. His wife was barren, but she was warned by a Divine messenger that she was destined to bear a son who was to be a Nazirite and dedicated to Yahweh. The messenger appeared again when Manoah also was present, and repeated his prophecy. We hear of Manoah on four more occasions; we find him remonstrating with his son about the proposed Philistine marriage (14^{2ff}); he accompanied his son on the preliminary visit to Timnah (vv.^{5ff}), and again to the marriage itself (vv.^{9ff}). He did not survive his son, who was buried by his side (16^{31}). Cf Samson.

These scanty details are somewhat amplified by Josephus (*Ant.* v. viii. 2 f [276–284]), who was apparently following some ancient Jewish tradition. T. A. M.

MANSION.—The English word occurs in Scripture only in Jn 14^{2}, 'In my Father's house are many mansions' (RVm 'Or, *abiding places*'; RSV 'rooms'). Its retention is an archaism, for the modern connotation of a house of some dignity is quite lacking from the word as used by Tyndale (1525), apparently from the Vulgate *mansiones*, 'abiding places.' The Greek word (*monē*), like the Latin, means (1) the act of abiding, (2) a place of abode. In the NT it occurs also in Jn 14^{23}, where 'make our home' is Greek idiom for 'abide.' Hence the thought in Jn 14^{2} is simply that there is ample room for the disciples in the Father's house. In the LXX the Greek word occurs only once, viz. 1 Mac 7^{38}, 'give them no abiding place' (RSV 'let them live no longer').

MANSLAYER.—See Kin [Next of] and Refuge [Cities of].

MAN-STEALING.—See 'Kidnapping' in article Crimes, **7.**

MANTELET.—See Fortification.

MANTLE.—See Dress, **4** (*c*).

MANUSCRIPTS.—See Text and Writing.

MAOCH.—The father of Achish, king of Gath, 1 S 27^{2}. See Maacah, **3.**

MAON.—A town in the hill-country of Judah, Jos 15^{55}. It was in the wilderness of Maon that Nabal dwelt (1 S 25^{2}), and in this district David sojourned on two occasions during the period of his outlaw life (23^{24ff} 25^{2ff}). It is the modern *Tell Ma'în.*

MAONITES.—In Jg 10^{12} the Maonites are mentioned together with the Sidonians and Amalekites as having oppressed Israel. They dwelt in Mt. Seir, S. of the Dead Sea. According to 1 Ch 4^{41ff}, the Maonites (called **Meunim** [so RV, RSV; AV 'habitations'] in this passage) were, in the reign of Hezekiah, driven out of their pasture land by the Simeonites. The passage is interesting as showing how long the original Canaanites held their own in the land after the Israelite invasion. In 2 Ch 26^{7} (RSV **Meunites,** AV **Mehunims,** RV **Meunim**) they are mentioned as having been overcome by Uzziah

(cf 2 Ch 20[1]), where 'Ammonites' should probably be **Meunites** [so RSV; cf RVm]).

MARA.—The name which Naomi claimed for herself: 'Do not call me Naomi ('pleasant'), call me Mara ('bitter'), for the Almighty has dealt very bitterly with me,' Ru 1[20].

MARAH.—The first 'station' of the Israelites after crossing the sea, Ex 15[23], Nu 33[8f]. It is possibly modern *ʿAin Ḥawârah*.

MARALAH, Jos 19[11] (AV, RV).—See MAREAL.

MARANATHA is really two words, *mâranā thā* (less likely *mâran ethā*, and still less likely *mâran athā*), an Aramaic expression meaning: 'O our Lord, come!' In the NT it occurs only in 1 Cor 16[22], but in form it is closely parallel to the 'Amen! come Lord Jesus' of Rev 22[20], and is actually used with *Amen* in *Didache* x. 6. It would seem, then, to have been an early Christian ejaculatory prayer in expectation of the early consummation of the Parousia, the glorious return of the Lord Jesus. Only if it were one of those phrases in common use, perhaps in liturgical use, such as *Amen*, *Hosannah*, can we understand the Apostle using an Aramaic phrase in a letter to the Greek-speaking community at Corinth. The fact that it is used immediately after the word *anathema*, soon led, in circles unacquainted with Aramaic, to the assumption that it was a Semitic word of imprecation, so that in this quite mistaken sense it appears in numerous documents from the 4th cent. onwards. A. J.

MARBLE.—See MINING AND METALS.

MARCHESVAN.—See TIME.

MARCUS.—AV of Col 4[10], Phn[24], 1 P 5[13] = **Mark.**

MARDOCHEUS.—See MORDECAI, **1, 2.**

MAREAL.—A place on the W. border of Zebulun, Jos 19[11] (AV, RV **Maralah**). It is possibly modern *Tell Ghaltah*.

MARESHAH.—**1.** The 'father' of Hebron (1 Ch 2[42]). [On Mareshah (1°) in this verse, cf MESHA, **2.**] **2.** A Judahite, or family of Judah (1 Ch 4[21]). These genealogical data are connected with: **3.** An important city in the Shephelah of Judah (Jos 15[44]), fortified by Rehoboam (2 Ch 11[8]; see also 2 Ch 14[9f] 20[37], Mic 1[15]). Later, under the name *Marissa*, Josephus describes its chequered history (*Ant.* XII. viii. 6 [353] etc.). The site of Marissa is *Tell es-Sandaḥannah*, just over a mile SSE. of *Beit Jibrîn* (now *Beth Gubrîn*), excavated by Bliss, who found under the Hellenistic town Jewish pottery and inscribed jar-handles, which carry the occupation back to *c* 800 B.C. The place was of strategic importance as a base for Seleucid operations against Judas Maccabaeus and his family (1 Mac 5[66], 2 Mac 12[32]), but with the extension of Jewish power to the S. it lost its significance and declined. After a brief revival in the Roman period it was finally destroyed by the Parthians in 40 B.C. The name is preserved in *Khirbet Mar'ash*, a small Roman site about half a mile to the NW. In the vicinity there are a number of striking cave-tombs with paintings and epitaphs which indicate a colony of Sidonians and Idumaeans in the 3rd cent. B.C. It is doubtful if this is Moresheth-Gath, which the mosaic map of Madaba places to the NNE. of Eleutheropolis (*Beit Jibrîn*). This suggests *Tell el-Judeideh*, which Bliss excavated and found evidence of occupation towards the end of the Hebrew monarchy. See MARISA.

E. W. G. M.—**J. Gr.**

MARI.—The identification of *Tell el-Ḥarîrī* as the probable site of ancient Mari was made by W. F. Albright in 1932. This identification was confirmed almost immediately when excavations were undertaken by André Parrot and a number of associates at the site, which is about 11 km. NNE. of *Abû Kemal* on the Iraqi border, and not far from the Euphrates (which in ancient times flowed right past the city). Thus far there have been ten seasons of digging at Mari, the last campaign being conducted in 1954–1955. Numerous publications have appeared, though much more is yet to come: A. Parrot, *Studia Mariana* (1950); and his official *Mission Archéologique de Mari*: I. *Le temple d'Ishtar* (1956); II. *Le Palais* (in two parts; 1958). In addition the vast hoard of tablets is gradually being edited and published by a number of scholars: *Archives Royales de Mari*, i–ix and xv (1950–1960).

While excavations have not yet reached the lowest levels, it is already clear that Mari had a long history of occupation. A Sumerian city flourished at the beginning of the 3rd millennium. Mari was captured by Sargon of Akkad (24th cent. B.C.), following which there is a break in occupation until the 3rd Dynasty of Ur (*c* 2000), when it was rebuilt by Ur-nammu. The Amorites moved in during the 19th cent., and established a dynasty which held the city, with one interruption, until its final destruction. The last king was Zimri-Lim, a contemporary of the great Hammurabi of Babylon, Rim-Sin of Larsa, and Shamshi-Adad of Assyria. Mari was taken and destroyed by Hammurabi in his 32nd year, *c* 1697 B.C. (according to the low chronology; otherwise *c* 1750). The two spectacular discoveries at Mari are the royal palace, which covered 6 acres and contained over 250 rooms, and the royal archives which include over 20,000 tablets. Both are monuments to the reign and glory of Zimri-Lim.

According to Biblical tradition the Patriarchs came from Haran in northern Mesopotamia, and for a long time maintained contacts with their kinsmen in that region. With the discovery and publication of the Mari tablets our knowledge of these Northwest-Semitic nomads (the Amorites) who infiltrated and took possession of many of the city-states along the inside rim of the fertile crescent, has been greatly enriched. While no direct links with the Patriarchs have been established, the general background, orientation, and customs of the Patriarchs have been clarified to a considerable extent. The practice of sacrificing an ass to solemnize a contract finds an echo in the Biblical narrative of the Bene Ḥamor (*i.e.*, 'ass') of Shechem (Gn 33[19f]), whose god was the 'Lord of the Covenant' (Jg 9[4]). The use of fire signals for rapid communication is likewise echoed in the Lachish Letters of 1,000 years later. A group of troublesome nomads, whose name is semantically equivalent to the Biblical Benjamites is repeatedly referred to in the Mari correspondence. The ʿApiru are another frequently mentioned group in the Mari archives. While scholarly opinion is divided on the question of the relationship of the ʿApiru to the Biblical Hebrews (*ʿIbhrîm*), some connexion is quite probable. The use of the term in the OT to characterize the Patriarchs and their descendants as foreigners (*i.e.*, stateless people) in relation to the settled population of Canaan and Egypt, corresponds to the description of the ʿApiru in various sources including the Mari letters (cf on the question of the ʿApiru, J. Bottéro, *Le Problème des Ḫabiru à la 4e rencontre assyriologique internationale* [1954]; M. Greenberg, *The Hab/piru* [1955]; for a comprehensive discussion of the relevant data, see H. H. Rowley, *From Joseph to Joshua* [1950], ch. i). Another point of contact with Biblical tradition concerns the phenomenon of prophecy. Quite apart from the usual techniques and procedures of divination, there was a class of religious functionaries at Mari, who received messages from the god under direct inspiration, and delivered them accordingly. These messengers, called *apilu*, spoke to the king and other officials in the name of their god, much as the later prophets of Israel, though the content and scope of the messages were quite different. It is possible that we have here more than a parallel, though less than a direct source. On the significance of the Mari excavations for Biblical studies, see G. E. Mendenhall, BA, xi (1948), 1–19; Albright, *Interpreter's Bible*, i (1952), 261–264; G. E. Wright, *Biblical Archaeology*, pp. 96–97.

D. N. F.

MARIMOTH, 2 Es 1[2] (AV, RV).—See MERAIOTH, **2.**

MARISA.—The Greek form of the name **Mareshah.** It occurs only in 2 Mac 12[35], but should be read also in 1 Mac 5[66] (so RVm, RSV), where all Greek MSS wrongly have 'Samaria' (so AV, RV).

MARK (JOHN).—There are three groups of NT passages where the name Mark occurs.

(1) *John Mark* was a Jew and son of Mary, who was a leading Christian woman at Jerusalem. At her house the faithful assembled for prayer, and thither Peter went on his release from imprisonment, having perhaps previously lodged there (Ac 12^{12ff}). An improbable conjecture makes Mark the son of the 'good-man of the house' in Mk 14^{14}, and another identifies Mark himself with the 'young man' of Mk 14^{51}; but the Muratorian Canon (late 2nd cent.) apparently denied that Mark had ever seen our Lord. Probably Mary was a widow. 'Mark' would be an added name such as the Jews often took, in Roman fashion; it was a Roman *praenomen*, much used among Greek-speaking people, but not common among the Jews. John Mark was chosen as companion of Barnabas and Saul when they left Jerusalem for Antioch (Ac 12^{25}—the reading of RSVm is hardly possible), and taken by them on their first missionary journey (13^{5}), not as chosen expressly by the Holy Spirit (cf v.^{2}), and not as an equal; 'they had also John as their attendant (AV minister, RSV to assist them).' It has been suggested that Mark was a Levite (see below), and that the designation here used means 'a synagogue minister,' as in Lk 4^{20}. But this would make the words 'they had' intolerably harsh. Probably Mark's work was to arrange the Apostles' journeys, perhaps also to baptize—a work not usually performed by St. Paul himself (1 Co 1^{14}). Mark remained with the Apostles on their journey through Cyprus, but left them at Perga in Pamphylia (Ac 13^{13}) either from cowardice, or, more probably, because the journey to Pisidian Antioch and beyond, involving work among distant Gentiles, was a change of plan which he did not approve (Ramsay). He had not yet grasped the idea of a world-wide Christianity, as St. Paul had. His departure to Jerusalem led later to the estrangement of Paul and Barnabas; the latter wished to take Mark with them on the Second Journey (15^{37ff}), but Paul refused, and separated from Barnabas, who then took Mark to Cyprus.

(2) *The Mark of the Pauline Epistles* was cousin of Barnabas (Col 4^{10} RSV), probably of the Jewish colony of Cyprus, and a Levite (Ac 4^{36}). It is therefore generally agreed that he was the same as John Mark. If so, he became reconciled to St. Paul, and was his 'fellow-worker' and a 'comfort' to him (Col 4^{11}, Phn ^{24}), and 'very useful in serving' him (2 Ti 4^{11})—this was Mark's special office, not to be an original organizer but a useful assistant. We learn that Mark was contemplating a visit to Colossae, and perhaps that the Colossians had hesitated to receive him (Col 4^{10}).

(3) *The Petrine Mark.*—St. Peter speaks of a Mark as his 'son' (1 P 5^{13}), and as being with him at 'Babylon' when he wrote the First Epistle. It is usually held that 'Babylon' means Rome (cf Rev 14^{8ff} 17^{1ff} 18^{1ff}), as there seems not to have been a Jewish colony in the real Babylon at the time, and as all ecclesiastical tradition connects St. Peter's work with Rome. If this be so, we may safely identify all the three Marks as one person. The identification is made more likely by the fact that John Mark is connected with both Peter and Paul in Acts; and if 1 P 5^{13} refers to Rome, there is no reason why this double connexion should not have continued as long as both Apostles lived. And if, as is not impossible, St. Peter survived St. Paul for some time, we can well understand that Mark devoted himself exclusively to the former after the death of the latter, and that in this way the ecclesiastical tradition (see next article), which almost unanimously attaches him to Peter, grew up. By that tradition Mark's activity is associated both with Rome and with Alexandria; and the Egyptian Church assigns its principal liturgy to his name. But the early Alexandrian Fathers, Clement and Origen, are silent as to Mark's residence in Egypt. The *Acts of Mark* (5th cent.?) makes him a martyr.

MARK, GOSPEL ACCORDING TO.—1. Position in Canon.—The order of the four approved Gospels is not invariable in early MSS and lists. The early Western order, represented by a few Greek MSS and some versions, gives Mt and Jn precedence because of their accepted Apostolic authorship, with Mk occupying third or fourth place. Our order, which is that of nearly all the Greek MSS and soon prevailed throughout the Church, recognizes that Mt Mk Lk form a group (the Synoptics) in distinction from Jn; Mk occupies the second place in virtue of its resemblance to, and supposed dependence upon, Mt.

2. General characteristics.—All four Gospels are narratives dealing with the ministry, death and resurrection of Jesus. In Jn the events related are few, and the sections (usually an incident with accompanying teaching) into which the Gospel may be conveniently divided are comparatively lengthy (*e.g.*, 4^{1-42} 9^{1-41} 11^{1-54} 14^{1}–16^{33}). In Mk, as in Mt–Lk, the units are numerous and generally brief, seldom exceeding twenty of our modern verse-divisions and frequently very condensed (*e.g.*, in Mk: Baptism of Jesus, three verses, Cleansing of the Temple, five verses, Last Supper, nine verses). Many of these sections, though embedded in a continuous narrative, have an internal unity and completeness apart from their present context, and may have circulated as independent stories, groups of sayings, etc., before Mk was compiled (see **4** (*b*)). The general plan of Mk is as follows. After a short introduction dealing with John the Baptist, the baptism of Jesus and His temptations, in which Jesus is declared Messiah and Son of God (1^{1-13}), Mark describes the opening of Jesus' ministry in Galilee. He comes preaching that the Kingdom of God is at hand, calls the first disciples, heals many possessed by demons and afflicted with various diseases, and by word and action asserts His authority (1^{14}–3^{6}). Already He has aroused the opposition of the Pharisees (especially by His attitude to the Sabbath) but His fame and popularity are widespread. He appoints the Twelve, teaches multitudes at the lakeside by means of parables, performs further miracles and sends out the Twelve on a preaching and healing mission (3^{7}–6^{13}). The next division includes a cycle of stories connected with the Lake—the feeding of five thousand, crossing the sea, discussion on defilement, and two miracles—followed by a somewhat similar cycle introduced by the feeding of four thousand (6^{14}–8^{26}). These activities have already taken Jesus beyond Galilee, to the other side of the Lake and to the region of Tyre. Now at Caesarea Philippi He hears Peter's confession of Him as the Christ, foretells His passion and calls for the full self-sacrifice of His followers. The Transfiguration is closely bound to that crisis in the ministry, and the shadow of the Cross falls again and again upon the narrative as Jesus journeys through Galilee, Peraea and Jericho to Jerusalem (8^{27}–10^{52}). The humble Messianic entry there is followed by the cleansing of the Temple, and action and teaching much of which is charged with judgment, including the apocalyptic discourse of ch. 13 (11^{1}–13^{37}). The Last Supper and the arrest in Gethsemane lead on to an account of the trial and crucifixion of Jesus, and the burial of His body (14^{1}–15^{47}). An incomplete account of resurrection appearances (16^{1-8}, see **7**) forms the conclusion of the Gospel. Mark must have received some parts of his story (especially the Passion Narrative) in a form in which a number of sections were already combined, but generally we must attribute the arrangement of the Gospel to him (assuming Mk to be the earliest of the Gospels, see **3**). It is written in a style that is unpolished from a literary point of view, but effective in its very simplicity (note the recurrent 'and . . . and' in sentence construction) and often vivid in its descriptive touches.

3. Relation to the other Gospels.—In this article we assume that Mk, substantially as we have it, was a source of Mt and Lk. (There is less interest now than formerly in the hypothesis of an Ur-Markus, an earlier form of the Gospel used by Matthew or Luke or both. For example, W. Bussmann argued for a first stage of Mk used by Luke, a second expanded with Galilean material and used by Matthew, and a third, our Mk, containing

details not found in Mt or Lk. One of the aims of such hypotheses has been to explain the absence of parts of our Mk from Mt and Lk. In so far as it is assumed that Matthew and Luke must have made exhaustive use of their sources, Ur-Markus theories are on precarious ground, especially in the case of Luke who writes with great freedom.) The reasons that have led most scholars to accept the priority of Mk are given at some length in article GOSPELS, 3. Here they may be briefly summarized. (*a*) Nearly all of the material of Mk is found, with varying degrees of verbal correspondence, in Mt or Lk or both. (*b*) The order of Mk's sections is always preserved either in Mt or in Lk. (*c*) Where Mt and Lk differ in detail from Mk in || passages, the wording of Mt and Lk is frequently an evident revision or improvement of Mk. It follows, if Mk's priority is accepted, that the work of Mark in the compilation and ordering of his material is formative also in the other Synoptics. It follows also that a comparative study of details on the basis of the priority of Mk will illumine the distinctive interests of the three Evangelists and also show up tendencies of development of the traditions in the early Church. The relation of the Fourth Gospel to Mk is more difficult to assess. Where there is common ground with the Synoptics, there are some striking phrases not in Mt or Lk but common to Mk and Jn, *e.g.* 'loaves costing 200 denarii' Jn 6^{7}, Mk 6^{37}, 'pistic (RSV **pure**) nard' Jn 12^{3}, Mk 14^{3}, 'pallet' Jn 5^{8}, Mk 2^{11}. Jn is indebted to at least part of the Markan tradition, and probably to Mk as a whole.

4. The Sources of the Gospel.—Knowledge of the sources of Mk can be attained by a study of the contents of the Gospel (*a*) in conjunction with early external testimony (*b*) in relation to the life and interests of the early Church.

(*a*) *The Petrine tradition.*—Papias of Hierapolis (*c* A.D. 140, quoted by Eusebius *HE* iii. 39) gives the earliest statement connecting the Gospel with Peter's preaching, as follows:

'And the elder said this also: Mark, having become the interpreter of Peter, wrote down accurately all that he remembered of the things said or done by the Lord, but not, however, in order. For neither did he hear the Lord, nor did he follow Him, but afterwards, as I said, (attended) Peter, who adapted his teachings to the needs (of his hearers), but not as though he were drawing up a connected account of the Lord's oracles. So then Mark made no mistake in thus writing down some things just as he remembered them; for he made it his one care to omit nothing that he had heard and to make no false statement therein.'

Probably the words of the elder who was Papias' informant do not extend beyond the first sentence, the rest being Papias' comment. The statement has to be given due weight. It can hardly be doubted that it is our Mk that Papias and his informant have in mind. Evidently there is no dispute about its authorship; the writer is Mark (identified with the John called Mark associated with both Peter and Paul in Ac) a subordinate figure whom no one was likely to have connected with the Gospel unless he was known to have actually had a part in writing it. There may be a note of depreciation of the order of Mark's account (in comparison with Mt or Jn), but Apostolic authority for the contents of the Gospel outweighs any defect in presentation. It is not claimed that Mark himself was an eyewitness; he was dependent on Peter whom he served as an interpreter (? translating his Aramaic). Later writers locate Peter's preaching and Mark's writing in Rome (already 1 P 5^{13} is evidence of their association there, 'Babylon'=Rome) and Mark's writing is dated either before (Clement of Alexandria) or after (Irenaeus) the death of Peter.

Up to a point the contents of Mk are favourable to the tradition of Papias. At very many of the events related the presence of Peter is either expressly noted (the names Simon and Peter occur twenty-six times) or can be justly inferred. These are the very sections (mostly stories about Jesus Himself or His miracles) in which notes of place and time, gestures and emotions, and descriptive details (often omitted in the ||s in Mt and Lk) give the impression of eyewitness testimony. Examples of such vivid details peculiar to Mk are: (from chs. 1, 2) 1^{20} 'with the hired servants,' 1^{33} 'the whole city was gathered together about the door,' 1^{41} 'moved with pity,' 1^{43} 'sternly charged,' 2^{3} 'carried by four men,' 2^{4} 'removed the roof'; (from later chs.) 3^{34} 'looking around on those who sat about him,' 4^{38} 'in the stern, asleep on the cushion,' 6^{39} 'by companies upon the green grass,' 10^{21} 'looking upon him loved him.' In a few places Peter, James, and John are named as accompanying Jesus on specific occasions (5^{37} raising of Jairus' daughter, 9^{2} Transfiguration, 13^{3} prophetic teaching on the Mount of Olives, 14^{33} Gethesemane). It may be, as is usually supposed, that these formed an inner circle of disciples, but the chief interest in James and John here may be as corroborators of Peter's testimony. In any case it is remarkable that we hear so little of the rest of the Twelve. Legendary interest, which in the future will spin apocryphal tales round names like Andrew and Thomas, has not yet come to the front. Yet the rest of the Twelve must have had their own special experiences in contact with Jesus, and the fact that such are not recorded by Mark is a sign that he did not invent where he had no information, and a guarantee that what he records around the name of Peter has a historical basis. It should be noted that circumstantial detail is not found uniformly throughout Mk. It is less striking in the sections which Mark may be supposed to have incorporated from the general Church tradition or from fragmentary information. The vivid description should therefore not be attributed to Mark's imaginative invention but to his Petrine source.

(*b*) *Non-Petrine sources.*—The Gospels have been thoroughly analysed by the methods of Form-criticism, which seeks to classify the sections and relate the form of each to the activities and practical needs of the early Church. Thus some insight is gained into the period of oral tradition before the need of written Gospels came to be felt. Among the forms so distinguished the Pronouncement-stories are easily identified. Each of these culminates in a saying of Jesus treasured by the Church as important for guidance in its life (*e.g.* Mk 2^{18-20} on fasting, 10^{1-9} on divorce, 10^{13-16} on children, 12^{13-17} on tribute to Caesar). It is believed that such passages received their present form not at the hands of the Evangelists but by an earlier process of adaptation for purposes of preaching and instruction. It is putting unnecessary strain on the statement of Papias' elder to attribute to Peter's testimony all these stories, all the miracle and other narrative sections, and all the groups of sayings and parables found in Mk. And Papias' statement itself leads to the view that the planning and arrangement of the material to form a continuous Gospel was the work of Mark himself. Within the Gospel some sections are united in groups by occasion or by topic (*e.g.* 1^{21-38} a day in Capernaum, $2^{1-3^{6}}$ stories of controversy, 6^{30}–8^{26} lake-cycles, 14^{1}–16^{8} passion and resurrection narrative). Some of these groups may have been compiled by Mark himself, but others were probably connected in his sources.

5. The Theology of the Gospel.—In Mk we can distinguish (*a*) the theology of Jesus Himself, expressed in His teaching and actions, and preserved in Mark's sources, (*b*) the faith of the early Church reflecting upon and modifying the traditions, (*c*) the theological emphases of Mark himself. Our special interest here is in (*c*). Mark's work, however, is mainly a presentation of (*a*) and (*b*), much of it is taken over by Matthew and Luke, and much is confirmed in these Gospels by material derived from non-Markan sources. Jesus comes into Galilee after His baptism proclaiming the nearness of the Kingdom of God (primarily God's Kingly Rule), $1^{14f.}$ This is an eschatological message, challenging men to repentance and decision in face of the final fruition of God's purposes for the world. The Kingdom is future and imminent (1^{15} 9^{1} 14^{25}). But as its coming is closely associated with

Jesus' own mission, the Kingdom in a sense is already present, and men may 'receive' or 'enter' it (10$^{15, 23ff}$). His works fulfil the promise of a Messianic age. Here Mark shows a special interest in Jesus' authority over demons or 'unclean spirits,' supernatural powers supposed to be responsible for various perversions of human personality. His first recorded miracle is an exorcism (1^{21ff}). Other cases of demon-possession follow (5^{1ff} 7^{25ff} 9^{14ff}). Summaries of Jesus' activities, and also of His disciples,' give it prominence (1$^{32ff, 39}$ 3$^{11, 15}$ 6$^{7, 13}$), and the opposition to Jesus, roused first by His authoritative attitude to the Law, takes the form of an accusation that He casts out demons by Beelzebul, prince of the demons (3^{22}). The effect is to give the Gospel the character of a supernatural drama, in which Jesus' conflict with the powers of evil brings Him to the Cross but in the end to the victory of the Resurrection.

In 1^{1}, 'Jesus Christ (Messiah) Son of God,' we see the main features of the presentation of Christ's Person and Work which is to follow. The personal name Jesus, which occurs eighty-one times in Mk, indicates the objective historical interest of the Gospel. The true humanity of Jesus is expressed in a simple and natural way. He is addressed frequently as 'Rabbi' or 'Teacher' (for which Mt and Lk usually have the more reverential 'Lord' or 'Master'). Reference is made to His eating and drinking and sleeping (2^{15} 14^{3} 4^{38}), to His compassion (1^{41} 6^{34}), to an impulse of love (10^{21}), to emotions such as anger, surprise, grief (1^{43} 3^{5} 10^{14} 14^{33f}). Questions are asked for information (5^{30} 8^{5} 9^{16}). And limitations of power and knowledge are indicated (6^{5} 13^{32}). Such expressions are peculiar to Mk in many cases. Jesus is referred to as the Son of God in 1$^{1, 11}$ 3^{11} 5^{7} 9^{7} 14^{61}. The title in Mk does not evidently bear all (*e.g.*, pre-existence) that is expressed in the Christology of John and other NT writers, but it means much more than 'a son of God' (Mk 15^{39} RSVm). It belongs to Jesus as a unique person in virtue of His unique vocation. The title Messiah, however, does not in itself have the same content, as it does not necessarily indicate, as Son of God does, a supernatural person.

The Messiahship of Jesus is a dominant theme of Mk. The word Christ is not frequent in the Gospel (1^{1} 8^{29} 9^{41} 12^{35} 13^{21} 14^{61} 15^{32}) and is not used by Jesus directly of Himself. The title, Son of David, occurs at 10^{47f}. This infrequency, especially in the earlier chapters of the Gospel, itself reflects Mark's interest in Jesus' Messiahship. Realizing the diversity of Jewish Messianic hopes and the originality of Jesus' purpose, Mark pictures Jesus as silencing the demons who recognize Him (1$^{24f, 34}$ 3^{11f}), checking publicity after miracles and exceptional experiences of the disciples (*e.g.*, 1^{44} 5^{43} 7^{36} 8$^{26, 30}$ 9^{9}), and instructing the disciples in 'mysteries' which it is given only to them to understand (4^{10ff}). Accordingly, the confession of Peter (8^{29}) and Jesus' admission before the high priest (14^{62}) are very dramatic and significant points in the narrative. Jesus' reserve in Mark's portrait led to Wrede's theory of the 'Messianic Secret' (1901). It postulates that what we find in Mk is the product of (*a*) the fact that Jesus did not claim to be Messiah and (*b*) the disciples' belief after their Resurrection experiences that He was Messiah. To this theory, which makes Mark's picture an artificial construction, there are strong objections. It has no sufficient answer to the historical question how the disciples ever came to regard Jesus as Messiah, it overlooks the Messianic factors in the pre-Markan tradition and in the actual events culminating in the Crucifixion, and it makes Mark a more subtle writer than he is. On the other hand, the Messianic Secret regarded as historical, points to Jesus' originality in His conception of the Messiah's vocation. It is doubtful whether the designation Son of Man, used in the Gospels only by Jesus and always of Himself, was regarded as a Messianic title and whether suffering was ever attributed to the Messiah before Jesus. Jesus effectively brought together in thought and action, Messiahship, the Son of Man ideal, and the suffering of God's chosen Servant (cf Is 53). In Mk the term Son of Man at 2$^{10, 28}$ may not have Messianic significance, but Peter's confession of Jesus as Christ (8^{29}) leads immediately to the first prophecy of the suffering, death and resurrection of the Son of Man. Similar forecasts of betrayal, passion and resurrection are found at 9$^{9, 12, 31}$ 10^{33f} 14$^{21, 41}$. In other passages the Son of Man whose Parousia in glory is prophesied is the supernatural figure of apocalyptic, developed from the symbolic 'one like a son of man' of Dn 7 (8^{38} 13^{26} 14^{62}). 10^{45} tells of the redemptive mission of the Son of Man.

It has sometimes been argued that Mark's theology is derived from Paul. Certainly the Death and Resurrection of Christ, central in Paul's thinking, are in view early in Mark's Gospel, so that the Galilean ministry seems like an introduction to the Passion. And in other matters, as the stubborn resistance of the Jews to the Gospel, Mark and Paul have affinities. But the Evangelist and the writer of the Epistles have different approaches to the historical traditions, and what they have in common is most probably derived from the stock of early Christian ideas. Some characteristic doctrines of Paul do not appear in Mk.

6. Historical value.—The establishment in the 19th cent. of the priority and primitive character of Mk led to the production of elaborate Lives of Jesus in which the Markan sequence of events was relied on as the basis for biographical and psychological studies. Among the influences which have led to a reaction is Form-criticism (4 (*b*)) which has shown the part played by the early Church in moulding and ordering the historical traditions. It has even been suggested that the order of Mk follows a liturgical sequence (Archbishop Carrington). Studies of the life and teaching of Jesus have become less sweeping in scope. Yet the outstanding landmarks of the ministry of Jesus, as set up in Mark's narrative, remain. And throughout his Gospel there are many indications of reliance on authentic memories of the events. There is the internal evidence, as well as the Church tradition (4 (*a*)) of dependence upon Peter. There are names of places and persons which appear to have been brought down from the earliest tradition; the geographical references are very numerous, those to persons include some peculiar to Mk (2^{14} 10^{46} 15^{21}—? the sons of Simon of Cyrene known to Mark and his readers). Among the signs that the Gospel rests ultimately on Aramaic sources are some words of Jesus preserved in the original Aramaic and explained to Mark's readers (3^{17} 5^{41} 7$^{11, 34}$ 14^{36}). The importance of Mk as a historical source is beyond doubt; whether we regard the Gospel itself as a historical work depends on what we expect from historians. Mk is not an impartial work, viewing the life of Jesus critically from a position of detachment. It is a product of faith, but of faith elicited by and centering upon historical events. Whether faith has given some of these events, *e.g.*, certain miracles, a form different from that which would have been noticed by a detached observer is a matter for discussion. But it is certain that the challenge of Jesus demands a response at a deeper level than cold impartiality if its historical significance is to be revealed.

7. The non-Markan conclusion.—The last twelve verses (16$^{9-20}$) are contained in nearly all the MSS, but are absent from two of the most reliable Greek MSS (the Vatican and the Sinaitic), the Sinaitic MS of the old Syriac, and MSS of the Armenian, Georgian and Ethiopic versions, and Greek MSS known to Eusebius. They are contained in an expanded form in the Washington Greek MS. A shorter conclusion is found in a few Greek MSS in addition to the usual ending, and in a MS of the old Latin version standing alone. It is as follows: 'But they reported briefly to Peter and those with him all that they had been told, And after this, Jesus himself sent out by means of them, from east to west, the sacred and imperishable proclamation of eternal salvation' (RSV).

This also points to the absence in earlier MSS of 16$^{9-20}$. 16^{9} does not continue from v.^{8} but at the position of v.^{1} and vv.$^{9-20}$ seem to summarize material from the other

Gospels. As such they have their value, but not as part of the original Mk; RSV appends them to the Gospel. Is the original ending of Mk lost? 16^8 concludes with 'for they were afraid,' which may not even be the end of a sentence. While some scholars have felt that Mark has fulfilled his aim at 16^8, most feel that 'for they were afraid' is intolerably abrupt. There is also the consideration that to a 1st cent. reader 'they said nothing to anyone' would evoke the question where the Evangelist got his information and would suggest that 16^{1-8} arose from guesswork or imagination. The loss of the end of a papyrus roll or the last leaf of a codex is a not improbable accident; but it must have happened to the original writing, or if to a copy, the whole line of textual transmission must go back to it.

8. Authorship, place of writing, date, use in Church.—Doubtless the name of the writer was Mark, and though Marcus was a common name it is reasonable to accept the early testimony which identifies the writer with the Mark ('John whose other name was Mark,' Ac $12^{12, 25}$ 15^{37} RSV) associated elsewhere in NT both with Peter and Paul (see previous article). Rome is most probably the place of writing. Already in 1 P 5^{13} we find Mark in the company of Peter there. The anti-Marcionite Prologue to Mk (2nd cent.) states that Mark after the death of Peter wrote the Gospel 'in the regions of Italy.' Irenaeus (late 2nd cent.) has a similar statement specifying Rome as the place of writing (*Adv. Haer.* iii. 1, 2). Clement of Alexandria (*c* A.D. 200) also locates the origin of the Gospel in Rome, but within the lifetime of Peter (Eusebius *HE* vi. 14, 6f). In later writings it is stated that Mark became first bishop of Alexandria and wrote his Gospel there. The silence of the Alexandrians, Clement and Origen, is unfavourable to the first part of this statement and their mention of Rome (or 'Babylon') highly adverse to the second. Subsidiary evidence for Rome is found in a number of Graecised Latin words, some used in ||s in Mt and Lk, but a few peculiar to Mk (*e.g.*, 15^{39} 'centurion,' 6^{27} 'speculator' [AV 'executioner,' RSV 'soldier of the guard']). The date, if judgment is based on the external evidence, would be somewhat before (Clement) or somewhat after (Irenaeus) the death of Peter in Nero's persecution (A.D. 64). More probably the latter as the former tradition may be motivated by desire to emphasize the Apostolic authority of the Gospel. The internal testimony points approximately to the same period. The details of the apocalyptic discourse of chapter 13 and especially a comparison of 13^{14} with Lk 21^{20}, where the investment of Jerusalem by the Romans is definitely alluded to, has led many scholars to the conclusion that Mk was written before the culmination in A.D. 70 of the Jewish War. On the other hand, a much earlier date will not seem likely if allowance is made for the period of oral tradition preceding the need for written Gospels. A date between A.D. 65 and 70 is generally favoured.

There is reason to believe that after the publication of Mt and Lk with their fuller teaching content Mk was comparatively neglected in the Church. Victor of Antioch (? 5th cent.) did not know of a commentary on Mk earlier than his own. In Christian writings (Apostolic Fathers) down to *c* A.D. 150 there is very occasional use in apparent allusions to the Gospels of wording closer to Mk than to the other Synoptists; but even there loose oral tradition is possible. Such doubtful traces of knowledge of Mk are found in Polycarp, 1 Clement, Hermas, Barnabas. The earliest versions, however (Latin, Syriac, Coptic), contained Mk. Justin Martyr (*c* A.D. 150) refers to Peter's 'Memoirs' (*Dial.* 106) and mentions the name Boanerges, applied to the sons of Zebedee, which occurs only in Mk 3^{17}. That Mk by this time had a secure place among the Gospels is shown by Tatian's inclusion of Mk in his *Diatessaron* or Harmony of the Four. By the end of the 2nd cent., with Irenaeus, Tertullian, Clement of Alexandria, and others, representing all geographical regions, the period of frequent quotation has arrived. But it is only with the advance of literary and historical study in the 19th and 20th cents. that the special value of Mk has come to light.

A. B.

MARKET, MARKET PLACE.—The former is found in OT in Ezk $27^{13, 17}$ etc., as the rendering of a collective noun signifying 'articles of exchange,' hence RV and RSV throughout '**merchandise,**' this last in v.^{15} being AV rendering of another word for which RV gives '**mart**' and RSV '**market.**' In NT 'market' has disappeared from RV in favour of the uniform 'marketplace' (Gr. *agora*); so also RSV, save in 1 Co 10^{25}, where RSV has 'meat market' for AV and RV 'shambles.' Here we must distinguish between the 'market places' of Jerusalem (Mt 11^{16}, Mk 7^4 etc.), which were simply streets of shops—the 'bazaars' of a modern Eastern city—and the 'market place' (RV) of a Greek city (Ac 16^{19} 17^{17}). The latter was the centre of the public life of the city, and was a large open space adorned with colonnades and statues, and surrounded by temples and other public buildings.

A. R. S. K.

MARKS.—1. The mark of circumcision.—This is an instance (among many) of the taking-over of a pre-existing rite, and adapting it to Yahweh-worship; whatever it may have meant in its origin—and opinions differ very widely on this point—it became among the Israelites the mark *par excellence* of a Yahweh-worshipper (cf Gn 17^{14}), the symbol of the covenant between Him and His people (see, further, CIRCUMCISION).

2. The mark of Cain.—In Gn 4^{15} we are told that 'the Lord put a mark on Cain, lest any who came upon him should kill him.' The Hebrew word for 'mark' here is *'ôth*, usually rendered 'sign.' The purpose of the sign was protective, but, in the setting which the Yahwist has given to the story of Cain and Abel, there was no other person on earth from whom the slayer would need protection. Hence it is clear that the story does not belong to its present context, and has passed through several stages of transmission, undergoing changes of meaning in the process. The intention of the Yahwist in using the ancient story was to show the rapid and tragic break-up of human relationships resulting from the first act of disobedience which broke the original relationship between man and God. But it is probable that in an early stage of its transmission, the story was a tradition of a ritual killing intended to remove the cause of a failure of the crops. The killer was a priest or ritual person who was rendered ritually unclean and had to flee from the community until he was cleansed. But he bore a mark indicating that his person was sacrosanct. The suggestion of Gunkel and Robertson Smith that the mark was a tribal mark is not satisfactory, as the mark would be common to all the members of the tribe. A parallel case is to be found in the Athenian ritual of Bouphonia, where the two men who slew the sacrificial bull were obliged to flee the community (Harrison, *Themis*, 142). The slayer was no common murderer but a priest or sacred person who had performed an act for the benefit of the community, an act involving temporary banishment of the slayer until he was purged from his ritual defilement. Hence the mark was probably a tattoo mark or other indication that the fugitive belonged to a sacred class. See article CAIN.

3. The mark of the prophet.—In 1 K 20^{35-43} there is the account of how one of the prophets 'disguised himself with a headband over his eyes'; the king does not recognize the man as a prophet until the latter takes away this covering from his face, whereupon the king 'discovered him as one of the prophets.' Clearly there must have been some distinguishing mark on the forehead of the man whereby he was recognized as belonging to the prophetic order. This conclusion is strengthened by several other considerations. (1) It is a fact that among other races the class of men corresponding to the prophetic order of the Israelites are distinguished by incisions made on their persons. (2) There is the analogy of circumcision; just as among the Israelites this was the distinguishing mark of the people of Yahweh, so those who, like the prophets, were more especially His close followers also

had a special mark, a distinctive sign, which differentiated them from other men. (3) The custom of putting a mark upon cattle to denote ownership, and for the purpose of differentiating from other herds, was evidently well known in early Israel. When one remembers how rife anthropomorphisms were among the Israelites, it is perhaps not fanciful to see here an analogy: just as the owners of herds marked their own property, so Yahweh marked His own people; and as the prophets were differentiated from the ordinary people, so they would have their special mark. (4) There is the passage Zec 13$^{4-6}$. These considerations point distinctly to marks of some kind or other which, either on the forehead or on the hand—possibly on both—were distinctive characteristics of a prophet among the Israelites.

4. Marks connected with Yahweh-worship.—It is possible that the 'sign' upon the hand and the 'memorial' between the eyes prescribed in Ex 13^{9} were originally cuttings in the flesh, intended to mark the Israelites as the people of Yahweh. But in Nu 15^{39} the 'sign' has become a 'tassel' attached to the corners of the garment, the Jewish 'tallith'; and in Dt 6^{8} 11^{18} the sign has become what is now called the 'phylactery,' whose very name indicates its protective purpose. There may be a reference to the early custom in Job 31^{35}, where Job says, 'Lo, here is my mark (RVm), let the Almighty answer me'; but the word for mark here is not *'ôth* ('sign'), but *tâw* (the letter Tau), the word which is also used in Ezk 9^{4} for the protective mark placed on the foreheads of those who were to be preserved from the destruction of the idolatrous Israelites. Reference may also be made to the passage in Is 44^{5} where it is said that a man will 'write on his hand, To the Lord.'

5. Cuttings for the dead.—The Canaanite practice of gashing the face and shaving the head and beard after a death, was evidently taken over by the Israelites after their settlement in Canaan, as may be seen from the prohibitions in Lv 19^{28} 21^{5}, Dt 14^{1}. It has been shown that such practices had their origin in the fear of the spirits of the dead, and were intended to prevent the spirits from recognizing their surviving relatives and harming them. But the practice may in later times have come to be signs of sorrow and of respect for the dead. The reason assigned in Dt 14^{1} for the prohibition is to distinguish Israel as being specially Yahweh's people, separated out 'from all the peoples that are upon the face of the earth.' W. O. E. O.—S. H. He.

6. The Marks of Jesus.—The phrase occurs only in Gal 6^{17}, 'Henceforth let no man trouble me; for I bear on my body the marks (Gr. *stigmata*) of Jesus.' The reference is to scars and other evidences of hardships and scourgings suffered on missionary service (see 2 Co 11$^{23-27}$). The remark has special point if Lystra, where Paul was stoned (Ac 14^{19}), was one of the destinations of this letter. The figure suggests first that Paul's scars bore some physical resemblance to the wounds Jesus received from His scourging and crucifixion. For the apostle this implied a share in Christ's sufferings (Ph 3^{10}) and a closer fellowship with Him (2 Co 4^{10f}). For this reason Paul did not shrink from afflictions but embraced them (Col 1^{24}). Secondly, the phrase refers to the practice of marking slaves with the sign of their owner. Paul saw himself scored with the proof-marks of his Master's service as a slave was branded with his master's name. Thirdly, and most appositely, religious devotees and the slaves attached to a temple were often branded with the name of the deity. Herodotus tells (ii. 113) of a temple of Heracles where, 'if any man's slave take refuge and have the sacred marks (*stigmata* as here) set upon him, *giving himself over to the god*, it is not lawful to lay hands upon him.' 'The marks of Jesus' were a sign that Paul had made a similar surrender.

Paul thus warns his Galatian converts that further animosity would be both unseemly and ineffective.

7. The Mark of the Beast.—The sign (Gr. *charagma*, 'engraving') set upon 'worshippers of the beast and its image' in the book of Revelation. The second beast of ch. 13 caused all those who worshipped the first beast to receive a mark on the forehead or the hand (13^{16} 19^{20}), without which, it appears, buying and selling in the common markets was impossible (13^{17}). The mark would prove a curse, bringing plague on earth (16^{2}) and wrath hereafter (14$^{9-11}$). Those who steadfastly refused it would be sealed with the name of the Father on their foreheads (3^{12} 7^{3} 14^{1} 22^{4}) and would reign with Christ (20^{4}). There are various explanations. V.^{17} is the chief difficulty. *Charagma* was the technical name for the official seal of commercial documents. It was inscribed with details of the reigning emperor and it is possible that it was either denied to Christians or rejected by them. To possess it would thus be a sign of surrender and compliance. On the other hand, branding was not uncommon. Cattle, slaves, even soldiers were branded. Ptolemy Philopator branded Jews with the ivy leaf of Dionysus (3 Mac 2^{29}), and devout Jews may have marked themselves with a sign of loyalty to Yahweh (see Is 44^{5} and Zec 13^{5f}). Whatever the explanation, 'the mark of the beast' is a reference to the inescapable and indelible stain of apostasy. W. D. S.

MARMOT.—See JACKAL, 5.

MARMOTH, 1 Es 8^{62} (AV, RV).—See MEREMOTH, 1.

MAROTH ('bitterness').—A town mentioned only in Mic 1^{12}, where there is a play on the name. See MAARATH.

MARRIAGE.—1. Forms of Marriage.—There are two forms of marriage among primitive races: (1) where the husband becomes part of his wife's tribe, (2) where the wife becomes part of her husband's tribe.

(1) W. R. Smith (*Kinship and Marriage in Early Arabia*) gives to this form the name *ṣadîca*, from the *ṣadāc* or 'gift' given to the wife. (*a*) The union may be confined to an occasional visit to the wife in her home (*mota* marriage). This is distinguished from mere prostitution, in that no disgrace is attached, and the children are recognized by the tribe; cf Samson's marriage. (*b*) The husband may be definitely incorporated into his wife's tribe (*beena* marriage). The wife meets her husband on equal terms; children belong to her tribe, and descent is reckoned on the mother's side. Women could inherit in Arabia under this system (*op. cit.* p. 94). Possible traces in OT are the marriages of Jacob (Laban claims wives and children as his own, Gn 31$^{31, 43}$), Moses (Ex 2^{21} 4^{18}), Samson (Jg 14, 15, 16^{4}; there is no hint that he meant to take his wife home; his kid seems to be the *ṣadāc* or customary present). So the Shechemites must be circumcised (Gn 34^{15}); Joseph's sons born in Egypt are *adopted* by Jacob (48^{5}); Abimelech, the son of Gideon's Shechemite concubine (Jg 8^{31}), is a Shechemite (9$^{1-5}$). The words of Gn 2^{24} may have originally referred to this custom, though they are evidently not intended to do so by the narrator, since *beena* marriages were already out of date when they were written. Many of the instances quoted can be explained as due to special circumstances, but the admitted existence of such marriages in Arabia makes it probable that we should find traces of them among the Semites in general. They make it easier to understand the existence of the primitive custom of the '*matriarchate*,' or reckoning of descent through females. In addition to the cases already quoted, we may add the closeness of maternal as compared with paternal relationships, evidenced in bars of marriage (see below, 3), and the special responsibility of the maternal uncle or brother (Gn 24^{29} 34^{25}, 2 S 13^{22}). It is evident that the influence of polygamy would be in the same direction, subdividing the family into smaller groups connected with each wife.

(2) The normal type is where the wife becomes the property of her husband, who is her 'Baal' or possessor (Hos 2^{16}), she herself being 'Beulah' (Is 62^{4}). She and her children belong to his tribe, and he alone has right of divorce. (*a*) In unsettled times the wife will be acquired by *war* (Jg 5^{30}). She is not merely a temporary means of pleasure, or even a future mother, but a slave and an addition to a man's wealth. Dt 21$^{10-14}$ regulates the procedure in cases of capture; in Jg 19–21 we have an instance of the custom. Traces may remain

in later marriage procedure, *e.g.*, in the band of the bridegroom's friends escorting, *i.e.*, 'capturing,' the bride, and in her feigned resistance, as among the Bedouin (W. R. Smith, *op. cit.* p. 81). (*b*) Capture gives place to *purchase* and ultimately to *contract*. The daughter is valuable to the clan as a possible mother of warriors, and cannot be parted with except for a consideration. Hence the 'dowry' (see below, **5**) paid to the bride's parents.

2. Polygamy among the Hebrews was confined to a plurality of wives (polygyny). There is no certain trace in OT of a plurality of husbands (polyandry), though the Levirate marriage is sometimes supposed to be a survival. The chief causes of polygyny were—(*a*) the desire for a numerous offspring, or the barrenness of the first wife (Abraham's case is directly ascribed to this, and among many peoples it is permitted on this ground alone); (*b*) the position and importance offered by numerous alliances (*e.g.*, Solomon); (*c*) the existence of slavery, which almost implies it. It can obviously be prevalent only where there is a disproportionate number of females, and, except in a state of war, is possible only to those wealthy enough to provide the necessary 'dowry.' A further limitation is implied in the fact that in more advanced stages, when the harem is established, the wife when secured is a source, not of wealth, but of expense.

Polygamy meets us as a fact: *e.g.* Abraham, Jacob, the Judges, David, Solomon; 1 Ch 7^4 is evidence of its prevalence in Issachar; Elkanah (1 S 1^{1f}) is significant as belonging to the middle class; Jehoiada (2 Ch 24^3) as a priest. But it is always treated with suspicion; it is incompatible with the ideal of Gn 2^{24}, and its origin is ascribed to Lamech, the Cainite (4^{19}). In Dt 17^{17} the king is warned not to multiply wives; later regulations fixed the number at eighteen for a king and four for an ordinary man. The quarrels and jealousies of such a narrative as Gn 29^{31}–30 are clearly intended to illustrate its evils, and it is in part the cause of the troubles of the reigns of David and Solomon. Legislation (see below, **6**) safeguarded the rights of various wives, slave or free; and according to the Rabbinic interpretation of Lv 21^{13} the high priest was not allowed to be a bigamist. Noah, Isaac, and Joseph had only one wife, and domestic happiness in the Bible is always connected with monogamy (2 K 4, Ps 128, P 31, Sir $25^{1,8}$ $26^{1,13}$). The marriage figure applied to the union of God and Israel (**10**) implied monogamy as the ideal state. Polygamy is, in fact, always an unnatural development from the point of view both of religion and of anthropology; 'monogamy is by far the most common form of human marriage; it was so also amongst the ancient peoples of whom we have any direct knowledge' (Westermarck, *Hum. Marr.*, p. 459). Being, however, apparently legalized, and having the advantage of precedent, it was long before polygamy was formally forbidden in Hebrew society, though practically it fell into disuse; the feeling of the Rabbis was strongly against it. Herod had nine wives at once (Jos. *Ant.* XVII. i. 3 [19]). Its possibility is implied by the technical continuance of the Levirate law, and is proved by the early interpretation of 1 Ti 3^2, whether correct or not (**8**). Justin (*Dial.* 134, 141) reproaches the Jews of his day with having 'four or even five wives,' and marrying 'as they wish, or as many as they wish.' The evidence of the Talmud shows that in this case at least the reproach had some foundation. Polygamy was not definitely forbidden among the Jews till the time of R. Gershom (*c* A.D. 1000), and then at first only for France and Germany. In Spain, Italy, and the East it persisted for some time longer, as it does still among the Jews in Mohammedan countries.

3. Bars to Marriage.—(1) *Prohibited degrees.*—Their range varies extraordinarily among different peoples, but on the whole it is wider among uncivilized than among civilized races (Westermarck, *op. cit.* p. 297), often embracing the whole tribe. The instinctive impulse was not against marriage with a near relative *qua* relative, but against marriage where there was early familiarity.

'Whatever is the origin of bars to marriage, they are certainly early associated with the feeling that it is indecent of housemates to intermarry' (W. R. Smith, *op. cit.* p. 170). The origin of the instinct is natural selection, consanguineous marriages being on the whole unfavourable to the species, in man as among animals. This, of course, was not consciously realized; the instinct took the form of a repulsion to union with those among whom one had lived; as these would usually be blood relations, that which we recognize as horror of incest was naturally developed (Westermarck, p. 352). We find in OT no trace of dislike to marriage within the tribe (*i.e.* endogamy), though, judging by Arab analogies, it may have originally existed; on the contrary, the Hebrews were strongly endogamous, marrying within the nation. The objection, however, to incestuous marriages was strong, though in early times there was laxity with regard to intermarriage with relatives on the *father's* side, a natural result of the 'matriarchate' and of polygamy, where each wife with her family formed a separate group in her own tent. Abram married his half-sister (Gn 20^{13}); 2 S 13^{13}, Ezk 22^{11} imply the continuance of the practice. Nahor married his niece (Gn 11^{29}), and Amram his paternal aunt (Ex 6^{20}). On marriage with a stepmother see below, **6**. Jacob married two sisters (cf Jg 15^2). Legislation is found in Lv 18^{7-17} 20^{11} (cf Dt $27^{20,22f}$); for details see the commentaries. We note the omission of prohibition of marriage with a niece, and with the widow of a maternal uncle. Lv 18^{18} forbids marriage not with a deceased but with a living wife's sister, *i.e.* a special form of polygamy. The 'bastard' of Dt 23^2 is probably the offspring of an incestuous marriage. An heiress was not allowed to marry outside her tribe (Nu 36^6; cf 27^4, To 6^{12} 7^{12}). For restrictions on priests see Lv $21^{7,14}$. There were no caste restrictions, though difference in rank would naturally be an objection (1 S $18^{18,23}$). Outside the prohibited degrees consanguineous marriages were common (Gn 24^4, To 4^{12}); in Jg 14^3 the best marriage is 'from thy brethren.' Jubilees 4 maintains that all the patriarchs from Adam to Noah married near relatives. Cousin marriages among the Jews are said to occur now three times more often than among other civilized peoples (Westermarck, p. 401).

Recent discoveries at Qumrân and the vicinity would seem to indicate that there was a certain laxity in later Judaism with regard to the 'forbidden degrees.' The Zadokite Document (iv. 21, v. 6) re-emphasizes the ancient regulations without which 'only a rickety wall may be built.' Monogamy is the original divine demand and in infraction of the 'forbidden degrees' the woman is held equally responsible with the man. 'The laws of forbidden degrees are written, to be sure, with reference to males, but they hold good equally for females' (v. 9). The Zadokite Covenanters were more stringent in enforcement of these laws.

(2) *Racial bars* arose from religious and historical causes. Gn 24, 28, 34, Nu 12^1, Jg 14^3 illustrate the objection to foreign marriages; Esau's Hittite wives are a grief to his parents (Gn 26^{34} 27^{46}); cf Lv 24^{10}. The marriage of Joseph (Gn 41^{45}) is due to stress of circumstances, but David (2 S 3^3) and Solomon (1 K 3^1 11^1) set a deliberate example which was readily imitated (16^{31}). Among the common people there must have been other cases similar to Naomi's (Ru 1^4): Bathsheba (2 S 11^3), Hiram (1 K 7^{14}), Amasa (1 Ch 2^{17}), Jehozabad (2 Ch 24^{26}) are the children of mixed marriages. They are forbidden with the inhabitants of Canaan (Ex 34^{16}, Dt 7^3), but tolerated with Moabites and Egyptians (23^7). Their prevalence was a trouble to Ezra (9, 10) and to Nehemiah (10^{30} 13^{23}). To 4^{12} 6^{15}, 1 Mac 1^{15} renew the protest against them. In the Diaspora they were permitted on condition of proselytism, but Jubilees 30 forbids them absolutely; they are 'fornication.' Jewish strictness in this respect was notorious (Tacitus, *Hist.* v. 5; cf Ac 10^{28}). The case of Timothy's parents (Ac 16^{1-3}) is an example of the greater laxity which prevailed in central Asia Minor. It is said that now the proportion of mixed

to pure marriages among the Jews is about 1 to 500 (Westermarck, p. 375), though it varies greatly in different countries. 1 Co 7[39] probably discourages marriage with a heathen (cf v.[12ff] 9[5]), but the general teaching of the Epistles would remove any religious bar to intermarriage between Christians of different race, though it does not touch the social or physiological advisability.

4. Levirate Marriage (Lat. *lēvir*, 'a brother-in-law').—In Dt 25[5-10] (no ‖ in other codes of OT) it is enacted that if a man die leaving no son ('child' LXX, Josephus, Mt 22[24]), his brother, if he lives on the same estate, is to take his widow, and the eldest child is to succeed to the name and inheritance of the deceased (cf Gn 38[9]). If the survivor refuses, a formal declaration is to be made before the elders of the city, and the widow is to express her contempt by loosing his sandal and spitting in his face. The law is a codification, possibly a restriction, of an existing custom. (*a*) It is presupposed for the patriarchal age in Gn 38, the object of this narrative being to insist on the duty of the survivor; (*b*) Hebrew has a special word = 'to perform the duty of a husband's brother'; (*c*) the custom is found with variations in different parts of the world—India, Tibet, Madagascar, etc. In India it is confined to the case where there is no child, and lasts only till an heir is born; sometimes it is only permissive. In other cases it operates without restriction, and may be connected with the form of polyandry where the wife is the common property of all the brothers. But it does not necessarily imply polyandry, of which indeed there is no trace in OT. Among the Indians, Persians, and Afghans it is connected with ancestor worship, the object being to ensure that there shall be some one to perform the sacrificial rites; the supposed indications of this among the Hebrews are very doubtful. In OT it is more probably connected with the desire to preserve the family name (a man lived through his children), and to prevent a division or alienation of property. On the other hand, the story of Ru 4 seems to belong to the circle of ideas according to which the wife is inherited as part of a man's property. Boaz marries Ruth as *gō'ēl*, not as *levir*, and the marriage is legally only a subordinate element in the redemption of the property. There is no stigma attached to the refusal of the nearer kinsman, and the son ranks as belonging to Boaz. The prohibited degrees in Lv 18 (P) make no exception in favour of the Levirate marriage, whether repealing or presupposing it is uncertain. In later times we have **the Sadducees' question** in Mk 12[19] ‖. It does not imply the continuance of the practice. It had fallen into disuse, and the Mishnah invents many limitations to avoid the necessity of compliance. It was agreed that the woman must have no child (Deuteronomy 'son'), and the school both of Shammai and of the Sadducees apparently confined the law to the case of a betrothed, not a wedded, wife. If so, the difficulty was twofold, striking at the Levirate custom as well as at the belief in the Resurrection (Edersheim, *LT* ii. 400).

5. Marriage Customs.—(1) *The arranging of a marriage* was normally in the hands of the parents (Gn 21[21] 24[3] 28[1] 34[4], Jg 14[2], 2 Es 9[47]); there are, in fact, few nations or periods where the children have a free choice. But (*a*) infant or child marriages were unknown; (*b*) the consent of the parties was, sometimes at least, sought (Gn 24[8]); (*c*) the rule was not absolute; it might be broken wilfully (26[34]), or under stress of circumstances (Ex 2[21]); (*d*) natural feeling will always make itself felt in spite of the restrictions of custom; the sexes met freely, and romantic attachments were not unknown (Gn 29[10] 34[3], Jg 14[1], 1 S 18[20]); in these cases the initiative was taken by the parties. One view of Canticles is that it is a drama celebrating the victory of a village maiden's faithfulness to her shepherd lover, in face of the attractions of a royal rival. It was a disgrace if a daughter remained unmarried (Sir 42[9]); this fact is the key to 1 Co 7[25ff]. (2) The **betrothal** was of a more formal and binding nature than our 'engagement'; among the Arabs it is the only legal ceremony connected with a marriage. Gn 24[58, 60] may preserve an ancient formula and blessing. Its central feature was the **dowry** (*mōhar*) paid to the parents or representatives of the bride, the daughter being a valuable possession. Dt 22[29] (cf Ex 22[16]) orders its payment in a case of seduction, and 50 shekels is named as the average. In Gn 34[12] Hamor offers 'never so much dowry'; cf the presents of ch. 24. It might take the form of service (Gn 29, Jacob; 1 S 18[25], David). Dowry, in our sense of provision for the wife, arose in two ways. (*a*) The parents provided for her, perhaps originally giving her a portion of the purchase money (Gn 24[61] 29[24]). Caleb gives his daughter a field (Jos 15[19] = Jg 1[15]); Solomon's princess brings a dowry of a city (1 K 9[16]); Raguel gives his daughter half his goods (To 8[21] 10[10]). This dowry was retained by the wife if divorced, except in case of adultery. (*b*) The husband naturally signified his generosity and affection by gifts to his bride (Gn 24[53] 34[12] [where gift is distinct from 'dowry'], Est 2[9]). According to the Mishnah, the later ceremony of betrothal consisted in payment of a piece of money, or a gift, or the conveyance of a writing, in presence of two witnesses. A third method (by cohabitation) was strongly discountenanced. *After betrothal* the parties were legally in the position of a married couple. Unfaithfulness was adultery (Dt 22[23], Mt 1[19]). The bridegroom was exempt from military service (Dt 20[7]). Nonfulfilment of the marriage was a serious slight (1 S 18[19], Jg 14[19]), but conceivable under certain circumstances (Gn 29[27]).

Archaeological discoveries have now revealed the presence of a hitherto unknown people—the Hurrians—in N. Mesopotamia, the home of Abraham's kinsfolk. They occupied this area from the late 3rd millennium B.C. to near the close of the 2nd millennium. The identity of this non-Indo-European, Armenoid, people was formerly concealed under the erroneous biblical translation 'Horites': these were commonly assumed to be Palestinian cave-dwellers or listed among the aboriginal giants. Their great civilization and high degree of culture has been made known to us through a vast collection of tablets discovered at Nuzi (modern Kirkuk), as also through the discoveries at Râs Shamra where the Hurrians constituted the second largest element in the population. In these Hurrian documents we find a customary law, in regard to marriage and family, that corresponds closely with that observed by the patriarchs, but is not common in later Hebrew practice. Much light is here shed upon adoption customs (Gn 24[2]) and it is clear that to those people the production of children was the main end of marriage. If a woman failed here her lot might be hard enough, but she could alleviate her lot by procuring children through surrender of her handmaid to her husband. Thus 'she could be built up' (Gn 30[3] 16[2]) for the children so born were accounted hers by adoption. The story of Jacob and Laban and their intromissions are not easily understood on a purely Hebrew basis, but the matter becomes clear in the light of the Nuzi tablets. There it was customary for a man to adopt a son, as Laban did, giving Leah and Rachel as wives. Jacob was heir unless Laban should beget sons—which he did—and the eldest became heir, and was entitled to receive the *t^erāphîm* (household gods). If no son was born to Laban Jacob would receive the *t^erāphîm*, and with these went the title to the property. As possessor of the *t^erāphîm* Jacob had the right to inheritance. Thus we can well understand the indignant cry of Laban, 'Wherefore hast thou stolen my gods?' (Gn 31[30]).

(2) *Wedding ceremonies.*—Great uncertainty attaches to the proceedings in Biblical times. We have to construct our picture from passing notices, combined with what we know of Arabic and later Jewish customs. In some cases there seems to have been nothing beyond the betrothal (Gn 24[63-67]); or the wedding festivities followed it at once; but in later times there was a distinct interval, not exceeding a year in case of a virgin. Tobit (7[14]) mentions a 'contract' (cf Mal 2[14]), which became a universal feature. The first ceremony was the *wedding procession* (Ps 45[15], 1 Mac 9[37]), which may be a relic of

' marriage by capture,' the bridegroom's friends (Mt 9[15], Jn 3[29]; cf ' 60 mighty men ' of Ca 3[7]) going, often by night, to fetch the **bride** and her attendants; in Jg 14[11, 15, 20] Samson's comrades are necessarily taken from the bride's people. The rejoicings are evidenced by the proverbial ' voice of the **bridegroom**,' etc. (Jer 7[34] etc., Rev 18[23]). Gn 24[53], Ps 45[13–15], Jer 2[32], Rev 19[8] 21[2] speak of the magnificence of the bridal attire; Is 61[10], of the garland of the bridegroom and jewels of the bride (cf 49[18]); the veil is mentioned in Gn 24[65] 29[23]; the supposed allusions to the lustral bath of the Greeks (Ru 3[3], Ezk 23[40], Eph 5[26]) are very doubtful. The situation in Mt 25[1] is not clear. Are the ' virgins ' friends of the bridegroom waiting for his return with his bride, or friends of the bride waiting with her for him? All that it is possible to say is that the general conception is that of the wedding procession by night in which lights and torches have always played a large part. Another feature was the scattering of flowers and nuts; all who met the procession were expected to join in it or to salute it.

The marriage supper followed, usually in the home of the bridegroom (2 Es 9[47]); Gn 29[22], Jg 14[10], To 8[19] are easily explained exceptions. Hospitality was a sacred duty; ' he who does not invite me to his marriage will not have me to his funeral.' To refuse the invitation was a grave insult (Mt 22). Nothing is known of the custom, apparently implied in this passage, of providing a wedding garment for guests. Jn 2 gives us a picture of the feast in a middle-class home, where the resources are strained to the uttermost. It is doubtful whether the ' ruler of the feast ' (cf Sir 32[1f]) is ' the best man ' (3[29], Jg 14[20]), the office being unusual in the simple life of Galilee (Edersheim, *LT* i, 355). There is nowhere any hint of a *religious ceremony*, though marriage was regarded with great reverence as symbolizing the union of God with Israel (*ib.* 353). The feast was no doubt *quasi*-sacramental (cf the Latin ' confarreatio '), and the marriage was consummated by the entry into the ' chamber ' (*ḥuppāh*). W. R. Smith (*op. cit.* p. 168) finds in this a relic of ' beena ' marriage (see above, **1**), the *ḥuppāh* or canopy (Jl 2[16]) being originally the wife's tent (Gn 24[67], Jg 4[17]); cf the tent pitched for Absalom (2 S 16[22]). In Arabic, Syriac, and Hebrew the bridegroom is said to ' go in ' to the bride. Ps 19[5] speaks of his exultant ' coming forth ' on the following morning; ' the chamber ' can hardly refer there to the ' canopy ' under which in modern weddings the pair stand *during* the ceremony, though this has no doubt been evolved from the old tent.

The wedding festivities were not confined to the ' supper ' of the first night, at any rate in OT times. As now in Syria, the feast lasted for 7 days (Gn 29[27], To 11[19] 8[19] [a fortnight]). The best picture is in Jg 14, with its eating and drinking and not very refined merriment. Canticles is generally supposed to contain songs sung during these festivities; those now sung in Syria show a remarkable similarity. 7[1–7] in particular would seem to be the chorus in praise of the bride's beauty, such as is now chanted, while she herself in a sword dance displays the charms of her person by the flashing firelight. During the week the pair are ' king and queen ' enthroned on the threshing-board of the village. It is suggested that ' Solomon ' (3[7]) had become the nickname for this village king. Dt 24[5] exempts the bridegroom from military service for a year (cf 20[7]).

6. Position of the wife.—The practically universal form of marriage was the ' Baal ' type, where the wife passed under the dominion of her ' lord ' (Gn 3[16], Tenth Com.). Side by side with this was the ideal principle, according to which she was a ' help meet for him ' (Gn 2[18]), and the legal theory was always modified in practice by the affection of the husband or the strong personality of the wife; cf the position of the patriarchs' wives, of women in Judges or in Proverbs (especially 31); cf 1 S 25[18], 2 K 4[8]. But her value was largely that of a mother of children, and the position of a childless wife was unpleasant (Gn 16[4] 30[1–4], 1 S 1[6], 2 Es 9[43]). Polygamy led to favouritism; the fellow-wife is a ' rival ' (1 S 1[6]) —a technical term. Dt 21[15ff] safeguards the right of the firstborn of a ' hated ' wife; Ex 21[10] provides for the rendering of the duties of marriage to a first wife, even if a purchased concubine; if they are withheld she is to go free (cf Dt 21[14] of a captive). The difference between a wife and a **concubine** depended on the wife's higher position and birth, usually backed by relatives ready to defend her. She might claim the inheritance for her children (Gn 21[10]); her slave could not be taken as concubine without her consent (16[2]). As part of a man's chattels his wives were in certain cases *inherited by his heir*, with the limitation that a man could not take his own mother. The custom lasted in Arabia till forbidden by the Koran (ch. iv). In OT there is the case of Reuben and Bilhah (Gn 35[22] 49[4]), perhaps implying the continuance of the custom in the tribe of Reuben, after it had been proscribed elsewhere (Driver, *ad loc.*). It is presupposed in 2 S 3[7], where Ishbosheth reproaches Abner for encroaching on his birthright, and in 16[22], where Absalom thus publishes his claim to the kingdom. In 1 K 2[22] Adonijah, in asking for Abishag, is claiming the eldest brother's inheritance. Ezk 22[10] finds it still necessary to condemn the practice; cf Dt 22[30], Lv 18[8]. Ru 4 shows how the wife is regarded as part of the inheritance. A **widow** normally remained unmarried. If poor, her position was bad; cf the injunctions in Deuteronomy, the prophets, and the Pastoral Epistles. In royal houses her influence might be greater than that of the wife; *e.g.* the difference in the attitude of Bathsheba in 1 K 1[16] and in 2[19], and the power of the queen-mother (1 K 15[13], 2 K 11). There was a strong prejudice in later times against her re-marrying (Lk 2[36]; Jos. *Ant.* XVII. xiii. 4 [349ff], XVIII. vi. 6 [180]). There is no instance of a corresponding dislike to the marriage of a widower, but the wife was regarded as a man's property even after his death. St. Paul, however, permits re-marriage (1 Co 7[39]), and even enjoins it for younger widows (1 Ti 5[14]).

7. Adultery.—If a bride was found not to be a virgin, she was to be stoned (Dt 22[13–21]). A man who violated an unmarried girl was compelled to marry her with payment of ' dowry ' (v.[29], cf Ex 22[16]). A priest's daughter playing the harlot was to be burnt (Lv 21[9]). Adultery holds a prominent place among social sins (Seventh and Tenth Com., Ezk 18[11]). If committed with a married or betrothed woman, the penalty was stoning for both parties, a betrothed damsel being spared if forced (Dt 22[22–27], Lv 20[10], Ezk 16[40] 23[45]). The earlier penalty was burning, as in Egypt (Gn 38[24]; Tamar is virtually betrothed). In Nu 5[11–31] the fact of adultery is to be established by ordeal, a custom found in many nations. It is to be noted that the test is not poison, but holy water; *i.e.* the chances are in favour of the accused. The general point of view is that adultery with a married woman is an offence against a neighbour's property; the adultery of a wife is an offence against her husband, but she has no concern with his fidelity. It is not probable that the extreme penalty was ever carried out (2 S 11, Hos 3). The frequent denunciations in the prophets and Proverbs (2[18] 5[8] 6[26]) show the prevalence of the crime; the usual penalty was divorce with loss of dowry (cf Mt 5[31]). In the ' pericope ' of Jn 8, part of the test is whether Christ will set Himself against Moses by sanctioning the abrogation of the Law; it is not implied that the punishment was ever actually inflicted; in fact, no instance of it is known. The answer (v.[11]) pardons the sinner but by no means condones the sin: ' damnavit, sed peccatum non hominem ' (Augustus); cf the treatment of ' the woman who was a sinner ' (Lk 7[47]). The NT is uncompromising in its attitude towards this sin, including in its view all acts of **unchastity** as offences against God and the true self, as sanctified by His indwelling, no less than against one's neighbour (Mt 5[27], Ac 15[29], 1 Co 5[11] 6[9, 13–20], Gal 5[19], 1 Th 4[3]). The blessing on the ' virgins ' of Rev 14[4] probably refers to chastity, not celibacy; cf ' the bed undefiled ' of He 13[4]. The laxity of the age

made it necessary to insist on purity as a primary Christian virtue (see Swete, *ad loc.*).

8. Divorce is taken for granted in OT (Lv 21[7, 14] 22[13], Nu 30[9]), it being the traditional right of the husband, as in Arabia, to 'put away his wife' (Gn 21[14]). The story of Hosea probably embodies the older procedure, which is regulated by the law of Dt 24[1]. There must be a **bill of divorcement** (Is 50[1], Jer 3[8]), prepared on a definite charge, and therefore presumably before some public official, and formally given to the woman. (But cf Mt 1[19], where possibility of private divorce is contemplated [or repudiation of betrothal?]). The time and expense thus involved would act as a check. Further, if the *divorcée* re-marries, she may not return to her former husband—a deterrent on hasty divorce, also on re-marriage—if there is any prospect of reconciliation. The right of divorce is withheld in two cases (Dt 22[19, 29]). There was great divergence of opinion as regards *the ground* 'if she find no favour in his eyes, because he hath found in her the nakedness of a thing.' The school of Hillel emphasized the first clause, and interpreted it of the most trivial things, practically 'for any cause' (Mt 19[3]); that of Shammai laid stress rightly on the second clause, and confined it to **unchastity**. But the vague nature of the expression (cf Dt 23[14]), and the fact that 22[22] enacts death for unchastity, show that something wider must be meant, probably 'immodest or indecent behaviour' (Driver, *ad loc.*). In spite of the prohibition of Mal 2[13-16] and the stern attitude of many Rabbis, divorce continued to be frequent; Ezr 9, 10 encouraged it. The Mishnah allows it for violation of the Law or of Jewish customs, *e.g.* breaking a vow, appearing in public with dishevelled hair, or conversing indiscriminately with men. Practically the freedom was almost unlimited; the question was not what was lawful, but on what grounds a man ought to exercise the right the Law gave him. It was, of course, confined *to the husband* (1 S 25[44] is simply an outrage on the part of Saul). Women of rank such as Salome (Jos. *Ant.* xv. vii. 10 [259]) or Herodias (xviii. v. 4 [136]) might arrogate it, but it is condemned as a breach of Jewish law. Christ contemplates its possibility in Mk 10[12], perhaps having in view the Greek and Roman world, where it was legal. But the words caused a difficulty to the early versions, which substitute desertion for divorce, and may be a later insertion, added for the sake of completeness. In a later period the Talmud allowed a wife to claim a divorce in certain cases, *e.g.* if her husband had a loathsome disease.

In the NT divorce seems to be forbidden absolutely (Mk 10[11], Lk 16[8], 1 Co 7[10, 39]). Our Lord teaches that the OT permission was a concession to a low moral standard, and was opposed to the ideal of marriage as an inseparable union of body and soul (Gn 2[23]). But in Mt 5[32] 19[9] He seems to allow it for 'unchastity,' an exception which finds no place in the parallels (cf 1 Co 7[15], which allows re-marriage where a Christian partner is deserted by a heathen). (*a*) Fornication cannot here be sin before marriage; the sense of the passage demands that the word shall be taken in its wider sense (cf Hos 2[5], Am 7[17], 1 Co 5[1]); it defines the 'uncleanness' of Dt 24[1] as illicit sexual intercourse. (*b*) Divorce cannot be limited to separation 'from bed and board,' as by R.C. commentators (1 Co 7 uses quite different words). To a Jew it always carried with it the right of re-marriage, and the words 'makes her an adulteress' (Mt 5[32]) show that our Lord assumed that the *divorcée* would marry again. Hence if He allowed divorce under certain conditions, He allowed re-marriage. (*c*) It follows that Mt 19[9], as it stands, gives to an injured husband the right of divorce, and therefore of re-marriage, even if it be supposed that the words 'except for unchastity' qualify only the first clause, or if 'shall marry another' be omitted with B. A right given to an injured husband must on Christian principles be allowed to an injured wife. Further, re-marriage, if permitted to either party, is logically permitted both to innocent and to guilty, so far as the dissolution of the marriage bond is concerned, though it may well be forbidden to the latter as a matter of discipline and penalty. Mt 5[32] apparently allows the re-marriage of the justifiably divorced, *i.e.* guilty wife, though the interpretation of this verse is more doubtful than that of 19[9]. (*d*) The view implied by the exception is that adultery *ipso facto* dissolves the union, and so opens the way to re-marriage. But re-marriage also closes the door to reconciliation, which on Christian principles ought always to be possible; cf the teaching of Hosea and Jer 3; Hermas (*Mand.* iv. 1) allows no re-marriage, and lays great stress on the taking back of a repentant wife. (*e*) Hence much is to be said for the view which is steadily gaining ground, that the exception in Matthew is an editorial addition from the Judaic standpoint, or under the pressure of practical necessity, the absolute rule being found too hard. (For the authorities, see Hastings' *DB*, Ext. Vol. p. 27[b], and add Wright's *Synopsis* and Allen's *St. Matt.*). It is true that though the textual variations in both passages of Matthew are numerous, there is no MS authority for the entire omission of the words. But there is no hint of the exception in Mark, Luke, or 1 Corinthians; Mt 19[3] alters the question of Mk 10[2], adding the qualification 'for every cause,' which thus prepares the way for the qualified answer of v.[9]. This answer really admits the validity of the law of Dt 24[1], with its stricter interpretation (see above), whilst the language of v.[8] leads us to expect its abrogation. The introduction of the exception upsets the argument, which in Mark is clear and logical. Again, is it not contrary to Christ's method that He should legislate in detail? He rather lays down universal principles, the practical application of which He left to His Church (see below, **11**).

(*f*) The requirement in 1 Ti 3[2, 12], Tit 1[6], that the 'bishop' and 'deacon' shall be 'married only once,' is probably to be understood as a prohibition of divorce and other sins against the chastity of marriage (cf He 13[4]), made necessary by the low standard of the age. Of course, no greater laxity is allowed to the layman, any more than he is allowed to be 'a drunkard or violent'; but sins of this type are mentioned as peculiarly inconsistent with the ministry. Other views of the passage are that it forbids polygamy (a prohibition which could hardly be necessary in Christian circles) or a second marriage. But there was no feeling against the re-marriage of *men* (see above, **6**), and St. Paul himself saw in a second marriage nothing *per se* inconsistent with the Christian ideal (1 Ti 5[14]), so that it is hard to see on what grounds the supposed prohibition could rest.

9. The Teaching of NT.—(1) *Marriage and celibacy.* The prevalent Jewish conception was that marriage was the proper and honourable estate for all men. 'Any Jew who has not a wife is no man' (Talmud). The Essene, on the other hand, avoided it as unclean and a degradation. Of this view there is no sign in NT (1 Ti 4[3]). Christ does, however, emphasize the propriety of the unmarried state in certain circumstances (Mt 19[12] [? Rev 14[4]]). The views of St. Paul undoubtedly changed. In 1 Th 4[4] he regards marriage merely as a safeguard against immorality. The subject is prominent in 1 Corinthians. In 7[1, 7, 38] he prefers the unmarried state, allowing marriage for the same reason as in 1 Thessalonians (1 Co 7[2, 9, 36]). He gives three reasons for his attitude, the one purely temporary, the others valid under certain conditions. (*a*) It is connected with the view he afterwards abandoned, of the nearness of the Parousia (v.[31]); there would be no need to provide for the continuance of the race. (*b*) It was a time of 'distress,' *i.e.* hardship and persecution (v.[26]). (*c*) Marriage brings distractions and cares (v.[32]). The one-sidedness of this view may be corrected by his later teaching as to (2) *the sanctity of the marriage state.* The keynote is struck by our Lord's action. The significance of the Cana miracle can hardly be exaggerated (Jn 2). It corresponds with His teaching that marriage is a Divine institution (Mt 19[9]). So Eph 5[22], Col 3[18], and the Pastoral Epistles assume the married state as normal in the Christian Church. It is raised to the highest pinnacle as the type of 'the union betwixt

Christ and His Church.' This conception emphasizes both the honourableness of the estate and the heinousness of all sins against it; husband and wife are one flesh (Eph 5; cf He 13[4]). (3) As regards *relations between husband and wife*, it cannot be said that St. Paul has entirely shaken himself free from the influences of his Jewish training (6). The duty of the husband is love (Eph 5[28]), of the wife obedience and fear, or reverence (v.[22, 33], Col 3[18]), the husband being the head of the wife (v.[23], 1 Co 11[3, 7-11]); she is saved 'through her childbearing' (1 Ti 2[11-15]). The view of 1 P 3[1-7] is similar. It adds the idea that each must help the other as 'joint heirs of the grace of life,' their common prayers being hindered by any misunderstanding. Whether the subordination of the wife can be maintained as ultimate may be questioned in view of such passages as Gal 3[28].

10. Spiritual applications of the Marriage Figure.—*In OT* the god was regarded as *baal*, 'husband' or 'owner,' of his land, which was the 'mother' of its inhabitants. Hence 'it lay very near to think of the god as the husband of the worshipping nationality, or mother land' (W. R. Smith, *Prophets*, 171); the idea was probably not peculiar to Israel. Its most striking development is found in Hosea. Led, as it seems, by the experience of his own married life, he emphasizes the following points. (1) Israel's idolatry is whoredom, adultery, the following of strange lovers (note the connexion of idolatry with literal fornication). (2) Y" still loves her, as Hosea has loved his erring wife, and redeems her from slavery. (3) Hosea's own unquenchable love is but a faint shadow of Y"'s. A similar idea is found in Is 54[4]; in spite of her unfaithfulness, Israel has not been irrevocably divorced (50[1]). Cf Jer 3, 31[32], Ezk 16, Mal 2[11]. The direct spiritual or mystical application of Canticles is now generally abandoned.

In NT, Christ is the **bridegroom** (Mk 2[19], Jn 3[29]), the Church His **bride**. His love is emphasized, as in OT (Eph 5[25]), and His bride too must be holy and without blemish (v.[27], 2 Co 11[2]). In OT the stress is laid on the ingratitude and misery of sin as 'adultery,' in NT on the need of positive holiness and purity. Rev 19[7] develops the figure, the dazzling white of the bride's array being contrasted with the harlot's scarlet. In 21[2, 9] she is further identified with the New Jerusalem, two OT figures being combined, as in 2 Es 7[26]. For the coming of her Bridegroom she is now waiting (Rev 22[17], cf Mt 25[1]), and the final joy is represented under the symbol of the marriage feast (22[2], Rev 19[9]).

11. A general survey of the marriage laws and customs of the Jews shows that they cannot be regarded as a peculiar creation, apart from those of other nations. As already appears, they possess a remarkable affinity to those of other branches of the Semitic race; we may add the striking parallels found in the Code of Hammurabi, *e.g.* with regard to betrothal, dowry, and divorce. Anthropological researches have disclosed a wide general resemblance to the customs of more distant races. They have also emphasized the *relative* purity of OT sexual morality; in this, as in other respects, the Jews had their message for the world. But, of course, we shall not expect to find there the Christian standard. 'In the beginning' represents not the historical fact, but the ideal purpose. Gn 2 is an allegory of what marriage was intended to be, and of what it was understood to be in the best thought of the nation. This ideal was, however, seldom realized. Hence we cannot apply the letter of the Bible, or go to it for detailed rules. Where its rules are not obviously unsuited to modern conditions, or below the Christian level, a strange uncertainty obscures their exact interpretation, *e.g.* with regard to the prohibited degrees, divorce, or 'the husband of one wife'; there is even no direct condemnation of polygamy. On the other hand, the principle as expanded in NT is clear. It is the duty of the Christian to keep it steadily before him as the ideal of his own life. How far that ideal can be embodied in legislation and applied to the community as a whole must depend upon social conditions, and the general moral environment. C. W. E.—**J. Pn.**

MARSENA.—One of the seven princes who had the right of access to the royal presence, Est 1[14].

MARS' HILL.—See AREOPAGUS.

MARSHAL.—1. RV and RSV of Jg 5[14] have 'marshal.' It was the duty of this officer to muster the men available for a campaign. In later times he kept a register of their names (2 K 25[19], Jer 52[25], 2 Ch 26[11], where the same Heb. word is used; see also 1 Mac 5[42]). The staff (not 'pen') in his hand was an emblem of authority (Jg 5[14]; cf Nu 21[18]). **2.** The Hebrew *tiphsār* is identified with the Assyrian *dupsarru*, 'tablet-writer,' 'scribe.' In Jer 51[27] (RV, RSV 'marshal,' AV 'captain') and Nah 3[17] (RV, RSVm 'marshal'; AV 'captain,' RV 'scribe') it denotes a military official of high rank.

MART.—See MARKET.

MARTHA is mentioned in Lk 10[38-42] and in Jn 11[1-40] 12[2]. She lived with her sister Mary and, according to John, her brother Lazarus. Where they lived is not known. Luke simply says 'in a certain village' (10[38]). John identifies the village as Bethany near Jerusalem (11[18]); but Luke cannot be understood to locate them there, as Jesus is nowhere near Jerusalem at this point in his narrative. In Luke, Martha is contrasted with Mary (see MARY, 2). She invited Jesus to her home and then was 'distracted with much serving' (10[40]), while Mary 'sat at the Lord's feet and listened to his teaching' (10[39]). It is to be noted that it was Martha, not Mary, who invited the Lord to her home; but when He came the Lord told her that while she was anxious about many things, she had need of only one thing—namely, of what Mary had chosen. It was more important for her at that moment that she cease her work for the Lord and listen to Him than that she serve Him.

In the Fourth Gospel when Jesus goes to Bethany to raise Lazarus from the dead, it is Martha who goes out to meet Him while Mary stays at home (11[20]); and it is Martha who makes the confession of faith in 11[27]. Martha is referred to for the last time in the NT as serving a meal to Jesus while Mary anointed His feet and wiped them with her hair (Jn 12[2f]). It is probable that John here reflects knowledge of some form of the story recorded in Lk 10[38ff]. B. H. T.

MARTYR.—See WITNESS.

MARY.—The Greek form of Hebrew Miriam.

1. Mary, mother of James and Joses, was one of the company of women who followed Jesus from Galilee, ministering to him, and who saw the crucifixion from afar (Mt 27[55f]). She is spoken of as 'the other Mary' (Mt 27[61] 28[1]), as 'the mother of James the younger and of Joses' (Mk 15[40]), as 'Mary the mother of Joses' (Mk 15[47]), and as 'Mary the mother of James' (Mk 16[1], Lk 24[10]). There is a question as to whether this Mary is the same as the one referred to in Jn 19[25] as 'Mary the wife of Clopas.' It is possible that 'James the son of Alphaeus' (Mk 3[18], etc.) is the James who is the son of the above Mary; in which case Alphaeus would have been the husband of this Mary. It is likewise possible that Clopas (in Jn 19[25]) is Alphaeus, the same Aramaic possibily underlying both names. (See Lightfoot, *Galatians*, p. 256; and *per contra* Schmiedel, *EBi*, article 'Clopas.')

2. Mary, the sister of Martha, is mentioned twice in the Gospels—(1) as sitting at the feet of Jesus listening to His teaching while her sister served (Lk 10[38-42]); and (2) as falling at His feet on His arrival to raise Lazarus from the grave (Jn 11[32]. See also 11[1, 19, 20, 28, 31, 33, 45]). Mary fulfils St. Paul's ideal in her 'undivided devotion to the Lord' (1 Co 7[35]). She knows what the 'good portion' is—that 'man shall not live by bread alone, but by every word that proceeds from the mouth of God' (Mt 4[4]). The Fourth Gospel identifies this Mary with the elsewhere unnamed woman who anointed Jesus (Mk 14[3-9], Mt 26[6-13], Lk 7[36-50]); but this identification is probably the work of John. Nowhere in the Synoptics is it even implied that the name of the woman was Mary.

3. Mary Magdalene, probably so called as coming

from Magdala, also known as Tarichaea, on the western side of the Sea of Galilee. She is first mentioned in Lk 8^{2} as one of the women who, having been 'healed of evil spirits and infirmities . . . provided for them out of their means.' Seven demons had been cast out of her (cf Mk 16^{9}), indicating, perhaps, that her affliction had been particularly serious (cf Mt 12^{45}, Mk 5^{9}).

A questionable tradition identifies her with the unnamed sinful woman who anointed our Lord (Lk 7^{37ff}); and she has thus been regarded as the typical reformed 'fallen woman.' But St. Luke, though he placed them consecutively in his narrative, did not identify them; and possession did not necessarily presuppose moral failing in the victim's character.

With the other women she accompanied Jesus on His last journey to Jerusalem; with them she beheld the crucifixion, at first 'from afar,' but afterwards standing by the Cross itself (Mt 27^{55f}, Jn 19^{25}); she followed the body to the burial (Mk 15^{47}), and then returned to prepare spices, resting on the Sabbath. On the first day of the week, while it was yet dark, she visited the sepulchre (Jn 20^{1ff}). Finding the grave empty, she assumed that the body had been removed, and that she was thus deprived of the opportunity of paying her last tribute of love. She ran at once to Peter and John and said, 'They have taken the Lord out of the tomb, and we do not know where they have laid him.' They all three returned to the tomb, she remaining after the men had left. Weeping, she looked into the sepulchre, and saw two angels guarding the spot where Jesus had lain. To their question, 'Why are you weeping?' she repeated the words she had said to Peter and John. Apparently feeling that someone was standing behind her, she turned, and saw Jesus, but mistook Him for the gardener. The utterance of her name from His lips awoke her to the truth. She cried, 'Rabboni' ('my Master')—and would have clasped His feet. But Jesus forbade her, saying, 'Do not hold me; for I have not yet ascended to the Father.' She must no longer regard Him from a human point of view (2 Co 5^{16}), but possess Him as a Divine being in spiritual communion. This first appearance of our Lord after His Resurrection (Mk 16^{9}) conferred a special honour on one whose life of loving ministry had proved the reality and depth of her devotion.

4. Mary, the mother of Jesus.—(1) *Scripture data.*—The NT gives but little information regarding her. In the Gospels, aside from the references to her in the Infancy Narratives, she is mentioned directly only three times (Jn 2$^{1-12}$, Mk 3^{31ff} and parallels in Matthew and Luke, Jn 19^{25ff}), and indirectly thrice (Mk 6^{3} and parallel in Matthew, Lk 11^{27}, Jn 6^{42}). Outside the Gospels she is mentioned only once (Ac 1^{14}). Thus the references to Mary are scant indeed. In Jn 19^{25ff} Mary is said to have been one of four women (improbably three) who stood by the cross of Jesus; and it is here that Jesus commends Mary to the 'disciple whom he loved.' She plays in this scene only a passive rôle. In the references in Jn 2$^{1-12}$ Jesus declares His independence of His mother; and in Mk 3^{31} and parallels He does the same, declaring that whoever does the will of God is His mother and brother and sister.

It is, therefore, only in the birth narratives of Matthew and Luke that Mary plays an important role in the NT. Neither Mark nor John records Jesus' birth. In Matthew the Lord's birth of a virgin is clearly stated, and it is said that the event took place in order that the prophecy might be fulfilled: 'Behold, a virgin shall conceive and bear a son, and his name shall be called Emmanuel' (Mt 1^{23}). The reference here to birth of a virgin is based on the Greek translation of the Hebrew OT. This translation, which Matthew quotes, refers to a virgin; but the Hebrew text speaks of a 'young woman' (Is 7^{14}). Elsewhere in his Gospel, however, Matthew assumes that Joseph was Jesus' father—as, for example, in his tracing of Jesus' genealogy (q.v.) back through Joseph (1^{16}), and in the reference to Jesus as the 'carpenter's son' (13^{55}).

Luke has only two references to Jesus as born of a virgin, one of which appears to be a gloss. The latter is found in 3^{23}, being the words 'as was supposed.' The insertion of these words makes the ensuing genealogy irrelevant and meaningless. The other Lucan reference to the Virgin Birth is in the question Mary addresses to the angel, 'How can this be, since I have no husband?' And the angel answers that the Holy Spirit will come upon her (1^{34f}). Elsewhere, however, Luke speaks of Jesus' 'parents' (2^{27}) and of Jesus' 'father' (2^{33}). He also traced Jesus' genealogy back through Joseph (3^{23}).

The significance of Jesus' birth of a virgin lies in its uniqueness and its predestined character. The understanding of Jesus as a pre-existent being (cf Ph 2^{6}) points in the same direction, the end of which is to be seen in the Logos Christology of the Prologue to the Fourth Gospel. The doctrine of the Virgin Birth is not a proved miracle; it is understandable only by faith.

(2) *Place of the Virgin in the Christian Church.*—As early as the 4th cent., Epiphanius (*c* A.D. 374–377) rebuked heretics, called Collyridians, who worshipped the Virgin; soon thereafter the error found a welcome in the Church, and was heightened at the time of the Nestorian controversy (A.D. 431). In repudiating the views of Nestorius the Church insisted that our Lord had only one personality, and *that* Divine; it therefore emphasized the fact that He who was born of the Virgin was very God. It thus became the custom to give Mary the title *Theotokos* (bearer of God). The emphasis was on the divinity of Christ and not on the nature of Mary. The Church did not at this time call her 'mother of God.' Later the title was applied to her, as her worship increased.

With the worship of Mary arose a belief in her sinlessness. Finally, in the last century, her freedom from all taint of sin, whether original or actual, was officially declared an article of faith in the Roman Church by the dogma of the Immaculate Conception decreed by Pius IX in 1854. In 1950 Pious XII proclaimed the doctrine of the Assumption of Mary—viz. that after Mary's death her body was taken into heaven.

(3) *The perpetual Virginity of Mary* is an essential dogma of the Roman Catholic and Greek Churches. The main arguments in favour of the dogma are doctrinal. Militating against Mary's perpetual virginity are the references in the Gospels (*e.g.* Mk 3^{32}) to Jesus' brothers (see *Brothers of the Lord*). Epiphanius' view, held by many in the early church, was that these 'brothers' were children of Joseph by a former marriage. Jerome's view was that they were cousins. But the Greek language had a word for 'cousin' (cf Col 4^{10}), and these brothers in the Gospels are associated with Jesus' mother. A further objection to the dogma is the implication of such passages as 'He knew her not *until* she had borne a son' (Mt 1^{25}) and 'She gave birth to her *first*-born son' (Lk 2^{7}). Such expressions as these would hardly have been used by writers who assumed Mary's perpetual virginity.

5. Mary, the mother of John Mark (Ac 12^{12}).

6. Mary, saluted by St. Paul (Ro 16^{6}). B. H. T.

MASCHIL.—AV and RV form of **Maskil.** See PSALMS, **2.**

MASH.—One of the sons of Aram, Gn 10^{23}. The parallel passage, 1 Ch 1^{17}, gives **Meshech** (q.v.), as also does LXX in both passages. But this is wrong, as Meshech was Japhetic. Either Mons Massius is meant, or a region and people in the Syro-Arabian desert corresponding to the 'desert of Mash' of the Assyrian inscriptions. J. F. McC.

MASHAL.—See MISHAL.

MASIAH.—One of Solomon's servants, 1 Es 5^{34} (AV, RV **Masias**); the name is missing from the parallel list in Ezra.

MASIAS, 1 Es 5^{34} (AV, RV).—See MASIAH.

MASKIL.—See PSALMS, **2.**

MASMAN, 1 Es 8^{43} (AV).—See MAASMAS.

MASON.—See ARTS AND CRAFTS, **3.**

MASPHA, 1 Mac 3^{46} (AV).—See MIZPAH, **6.**

MASREKAH.—Mentioned as the home of an Edomite king, Samlah, Gn 36[36], 1 Ch 1[47]. The locality has not been identified.

MASSA.—A son of Ishmael, representing a N. Arabian tribe, Gn 25[14], 1 Ch 1[30]. Its exact location is unknown, but it seems to be mentioned in an inscription containing a report to king Ashurbanipal of Assyria (668–626 B.C.) of an attack made by the Massorites upon the people of **Nebaioth** (q.v.). The tribe of Massa would therefore seem to have lived not very far E. of Palestine. This view is confirmed by the fact that Pr 30 is ascribed to Agur, king of Massa (RVm, RSV), and Pr 31[1–10] to Lemuel, king of Massa (RVm, RSV), since Pr 30 and 31 belong to the borderland wisdom of Israel. J. F. McC.

MASSAH AND MERIBAH.—Ex 17[1–7] tells of a miraculous gift of water at a spot near Horeb, which was called *Massah* and *Meribah* ('testing' and 'contention') because the people tested Yahweh by doubting His providence and contended with Moses. 19[1] states this occurred within three months of the Exodus. Nu 20[1–13] tells a similar story, but puts the event some forty years later and locates it at Kadesh, which receives the name *Meribah* from the contention of Israel with Yahweh; it also tells of the sin of Moses and Aaron because of which they were not allowed to enter the Promised Land. There are references to the first passage in Dt 6[18] 9[22], Ps 81[7] 95[8]; and to the second in Nu 27[14], Dt 32[51], Ps 106[32]. The two stories are variants of a tradition associated with Kadesh (cf Meribath-kadesh Dt 32[51], Ezk 47[19] 48[28]), in the vicinity of which is a spring (*'Ain Qudeirāt*) bursting from a rock. Another, older, variant is echoed in Dt 33[8]: Yahweh proved (tested) Levi (=the priesthood) at *Massah* and strove with him at *Meribah*, giving him the sacred oracle, the Urim and Thummim. This suggests that *Meribah* originally meant the place of judgment (cf En-mishpat=Kadesh, Gn 14[7]), where Moses, priest and judge, delivered his oracular sentences and forged the tribes of the Exodus into a strong unity.

Massah stands alone in Dt 6[16] 9[22]; and it has been cogently argued that the reference in the tradition fragmentarily preserved in Ex 15[25b] was originally to *Massah* (not Marah) as the place where Yahweh proved Israel. These three passages suggest that the *Massah* legend may once have existed independently of that of *Meribah*. J. T.—C. A. Si.

MASSIAS, 1 Es 9[22] (AV, RV).—See MAASEIAH, **3.**

MASSORAH.—See TEXT OF OT.

MAST.—See SHIPS AND BOATS.

MASTER.—The Greek word for teacher is translated in AV as 'master' in 2 Mac 1[10], Ja 3[1], and in all its occurrences in the Gospels except Lk 2[46], where it is 'doctor,' and Jn 3[2] 'teacher.' RSV prefers 'teacher.'

MASTIC.—Hebrew *ṣŏrî*, Gn 37[25] EV 'balm' (q.v.), RVm 'mastic'; Greek *schinos*, Sus[54] (RSV 'mastic'; AV, RV 'mastick'). A dioecious shrub (the *pistacia lentiscus* L.) found in thickets on the Mediterranean seaboard. The gum obtained through cuttings in the bark is chewed as a dentifrice, and also for its pleasant taste and perfume. It is sometimes used as a flavouring by confectioners. W. E.

MATHANIAS, 1 Es 9[31] (AV).—See MATTANIAH, **6.**

MATHELAS, 1 Es 9[19] (RV).—See MAASEIAH, **1.**

MATHUSALA, Lk 3[37] (AV).—See METHUSELAH.

MATRED.—The mother-in-law (?) of Hadar (Genesis) or Hadad (Chronicles), one of the kings of Edom, Gn 36[39], 1 Ch 1[50]. In Genesis the LXX and Peshitta make Matred the *son* not the *daughter* of Me-zahab (q.v.).

MATRI, 1 S 10[21] (AV).—See MATRITES.

MATRITES.—A family of the tribe of Benjamin to which Saul belonged, 1 S 10[21] (AV **Matri**).

MATTAN.—1. Priest of Baal, 2 K 11[18], 2 Ch 23[17]. **2.** Father of Shephatiah, a contemporary of Jeremiah, Jer 38[1].

MATTANAH.—A stopping-place on the wanderings, Nu 21[18f]. The site is unknown.

MATTANIAH.—1. The original name of king Zedekiah, 2 K 24[17]. **2.** An Asaphite, 1 Ch 9[15]. He was the leader of the Temple choir, Neh 11[17, 22] 12[8], also a door-keeper, 12[25, 35]. **3.** Mattaniah in 2 Ch 20[14] should probably be identified with the preceding. **4. 5. 6. 7.** Four of those who had married foreign wives, Ezr 10[26], 1 Es 9[27] (AV **Matthanias**); Ezr 10[27] (called **Othoniah** in 1 Es 9[28] [AV, RV **Othonias**]); Ezr 10[30] (called **Bescaspasmys** in 1 Es 9[31] [AV **Mathanias,** RV **Matthanias**]); Ezr 10[57] (combined in 1 Es 9[34] with the following Mattenai into **Mamnitanemus** so RV; RSV **Machnadebai,** q.v.). **8.** A Levite who had charge of the offerings, Neh 13[13]. **9.** A Hemanite, 1 Ch 25[4, 16]. **10.** An Asaphite, 2 Ch 29[13].

MATTATHA.—An ancestor of Jesus, Lk 3[31].

MATTATHIAH.—See MATTITHIAH, **5.**

MATTATHIAS.—1. 1 Es 9[43] (AV, RV); see MATTITHIAH, **5.** **2.** 1 Es 9[23] (RV); see MATTATTAH. **3.** The father of the five Maccabaean brothers, 1 Mac 2[1, 14, 16f, 19, 24, 27, 39, 45, 49] 14[29]; see MACCABEES, **1.** **4.** A captain in the army of Jonathan the Maccabaean, 1 Mac 11[70]. **5.** A son of Simon the high priest, who was murdered, together with his father and brother Judas, at a banquet at Dok, by Ptolemy the son of Abubus, 1 Mac 16[14–16]. **6.** One of three envoys sent by Nicanor to treat with Judas Maccabaeus, 2 Mac 14[19]. **7. 8.** Two ancestors of Jesus, Lk 3[25f].

MATTATTAH.—A Jew who had married a foreign wife, Ezr 10[33], 1 Es 9[33] (AV **Matthias,** RV **Mattathias**).

MATTHAN.—Grandfather of Joseph (Mt 1[15]); perhaps to be identified with *Matthat*, who occupies the same place in Lk 3[24].

MATTHANIAS.—1. 1 Es 9[27] (AV, RV); see MATTANIAH, **4.** **2.** 1 Es 9[31] (RV); see MATTANIAH, **6.**

MATTHAT.—1. See MATTHAN. **2.** Another ancestor of Jesus (Lk 3[29]).

MATTENAI.—1. 2. Two of those who had married foreign wives, Ezr 10[33], 1 Es 9[33] (AV **Altaneus,** RV **Maltanneus**) [37] (combined in 1 Es 9[34] with the preceding Mattaniah to form **Mamnitanemus,** q.v.). **3.** Representative of the priestly house of Joiarib in the days of Joiakim, Neh 12[19].

MATTHELAS, 1 Es 9[19] (AV).—See MAASEIAH, **1.**

MATTHEW (APOSTLE).—Two sets of parallel passages, probably from a Petrine tradition, tell us of this chosen companion of our Lord. The first (Mt 9[9], Mk 2[14], Lk 5[27]) narrates his call. He was named both 'Matthew' (Mt) and '**Levi**' (Mk [where some Western MSS read 'James'] and Lk), and was the son of Alphaeus (Mk). He was a publican (Lk), and was 'sitting at the tax office' (Mt, Mk, Lk) near Capernaum, which lay on the road from Damascus to the Mediterranean; here he collected dues for Herod the tetrarch. No doubt he was only an agent, not one of the wealthy farmers of the taxes. Nevertheless he must have been fairly rich, and had much to give up in following Jesus. The call is followed by a meal (Mt, Mk), a great feast given to Jesus by Matthew himself (Lk), which roused the anger of the 'scribes of the Pharisees.' The name 'Matthew' probably means 'Gift of Yahweh' (cf 'Theodore'), and is another form of 'Matthias'; though some take it as meaning 'strong,' 'manly.' It was doubtless given to Levi as an additional name, perhaps (like 'Peter') by Jesus Himself.

The second set of passages gives the list of the Twelve (Mt 10[3], Mk 3[18], Lk 6[15], Ac 1[13]). In all these the surname 'Matthew' is given, not 'Levi,' just as 'Bartholomew' and 'Thomas' are surnames; and in all four Bartholomew, Matthew, Thomas, and James the (son) of Alphaeus are mentioned together, though not always in the same order. In two lists (Mt, Ac) Matthew comes next to James (though they are not joined together as a pair); in the other two, next but one. If then we take the

view that this James is neither the brother of our Lord, nor yet the same as James the Little (Mk 15^{40}), and if we negative the idea that 'Alphaeus' (Aram. *Ḥalphai*) and 'Clopas' are one name, there is perhaps something to be said for the opinion that Matthew and James were brothers. But they are not mentioned together elsewhere. Only in the Mt list is the designation 'the publican' added. For Matthew's connexion with the First Gospel, see the next article. We have no trustworthy information as to his later career. He is probably mentioned under the name Mattai in the Babylonian Talmud, *Sanhedrin* 43a. A. J. M.—W. D. D.

MATTHEW, GOSPEL ACCORDING TO.—1. The First Gospel in the Early Church.—Papias (*c* A.D. 140 or earlier), as quoted by Eusebius (*HE* iii. 39), says: 'Matthew, however, composed the *logia* in the Hebrew dialect, but each one interpreted them as he was able.' This remark occurs in his work *The Exposition of the Lord's Logia*, and is practically all the external information that we have about the Matthaean Gospel, except that Irenaeus says: 'Matthew among the Hebrews published a Gospel in their own dialect, when Peter and Paul were preaching in Rome and founding the Church' (*Haer.* iii. 1). Irenaeus is probably quoting from Papias. In the 4th cent. Eusebius tells a story of Pantaenus finding in the 2nd cent. the original Aramaic Matthew in India, but the story is very uncertain; Epiphanius says that the Aramaic Gospel of Matthew existed in his day in the possession of an Ebionite sect (distinguished in modern times as Elkasites) and describes it; and Jerome describes what he alleges to be the original of Matthew as in use among the Nazarenes, and says that he translated it into Greek. We have, therefore, first to interpret Papias and then to relate what he says to the later testimonies.

(*a*) *What does Papias mean by the logia?*—Two views have been held. First, that the term means 'oracles' and that it refers to OT prophecies of the Coming One, a collection of which was embedded in Matthew. Papias would not have confused *logia* (oracles) with *logoi* (sayings). The inclusion of this collection by Matthew in the Gospel explains the ascription of the latter to Matthew. This is the view favoured by F. C. Grant (in *The Gospels, Their Origins and Their Growth*, 1957) who claims for it the support of Eusebius §14 where the *logia Kyriaka*, the subject of Papias' exegesis (§1), are described as the oracles of the Lord, precisely as in the OT prophets. Secondly, by the term *logia* it is claimed that Papias here simply means our canonical Matthew. Two explanations of this are given. According to some (Westcott, Lightfoot, Donovan) *logia* is an early word for the Gospels so that Papias would naturally use it in this sense. Bacon, who regards Papias' references as pure guess-work, explained the choice of the term *logia* as an attempt to describe the Gospel in terms of its important contents, *i.e.* of the five great discourses incorporated in it. T. W. Manson rejects this, on the ground that Eusebius would hardly have troubled to quote Papias, of whose intelligence he had a low opinion, had he not thought that he was transmitting a tradition of value. He insists, therefore, that while Papias himself in using the term *logia* was thinking of the canonical Gospel, this was due to a confusion on his part. In the tradition that he had received, the term *logia*, referring to a work written by the Apostle Matthew, had reference not to the canonical Gospel but to an element which came to be incorporated in it, namely, Q, mainly a collection of the teaching of Jesus. T. W. Manson thus renewed a view urged earlier by Schleiermacher and Meyer. The term *logia*, as Grant has urged, is best translated by 'oracles,' but here refers to oracles of Jesus; and all that Papias notes concerning the *logia* fits what we know of Q, while it does not suit our canonical Matthew. Thus the latter cannot have originally been written in Hebrew because it incorporated a Greek document, Mark, and used the LXX. And only by a *tour de force* can the Gospel as a whole be characterized as *logia*. Though it contains *logia*, this does not constitute it as *the logia*, and its dependence on Mark makes it very improbable that it is the work of the Apostle Matthew. On the other hand, Q is a collection of *logia* probably written in Aramaic, Matthew and Luke having used different versions of it. There is no reason against its ascription to Matthew.

The view is tempting, therefore, that Papias had a tradition about a work by Matthew in Aramaic which he wrongly took to be the Gospel. This mistake of Papias may be the ground for other statements to the effect that there was an original Matthew in Hebrew and it was itself made plausible by the existence in Palestine, in that period, of information about a document or documents actually existing in a Semitic tongue and bearing a more or less close resemblance to our Matthew (Irenaeus, *Haer.* I. xxii, ed. by Harvey, i, p. 213); Eusebius, *HE* iii. 27. This view of Manson's is shared by Sherman Johnson.

Kilpatrick, on the other hand, rejects attempts to account for the ascription of the Gospel to Matthew in terms of its incorporation of Q, composed by Matthew or of Testimonia by him. The hypothesis of a translation of the original Matthew he thinks is due to the desire to meet objections to the apostolic authorship of the Gospel as it stood. These may have been due to knowledge that existed as to how the Gospel actually came into being. But this fails to exploit possibilities suggested by the existence of translations of the canonical Matthew. The views of Grant and Manson would seem best to meet the facts of the case and we are inclined, on the whole, to the position of the latter (so too S. E. Johnson, Wikenhauser) Grant's position demands the assumption that Papias did not know of the existence of a Gospel according to St. Matthew in the 2nd cent., though he knew of a testimony book of that title; but the probability is that the tradition of Matthaean authorship arose at least by *c* A.D. 125. Quotations from Matthew are found in the Epistle of 'Barnabas' (*c* A.D. 100?), one with the formula 'as it is written.'

There was a 'Gospel of the Hebrews' also current in the 2nd cent., known to Hegesippus, probably to the writer of the *Clementine Homilies*, perhaps to Ignatius. Jerome knew of it and gives extracts from it; and Epiphanius knew of a derived or kindred Gospel, used by the sect of the Nazarenes and containing several episodes different from our canonical narrative, *e.g.* in connexion with our Lord's baptism, and His appearance to James after the Resurrection (cf 1 Cor 15^{7}). In this Gospel the Holy Spirit is called the 'Mother' of Christ, the word 'Spirit' being feminine in Aramaic. Most critics agree that this Gospel is later than our canonical four, and there are good reasons for deriving it directly from our canonical Matthew. Bacon regarded it as a targum of the latter. We have seen that the presence of such targums or translations of the canonical Matthew would help to explain the references in Papias.

2. Sources and characteristics of the Gospel.—The sources upon which Matthew drew for his work are the following. First, he takes over almost the whole of Mark. This is surprising because the point of view of Mark on crucial terms, *e.g.* the Law, is not that of Matthew (compare Mk 7^{1-23} and Mt 15^{1-20}). The way in which he uses Mark, conflating it freely with material he uses from other sources (see the alternation of Q and Markan material in ch. 12) shows that Matthew had long been familiar with Mark so that he could use it from memory. Grant suggests a familiarity of twenty years or so. There was free intercourse between Rome and Palestine or Syria where Matthew probably is to be located, and Mark was evidently regarded with profound respect because Matthew not only uses his material but also largely follows his order. Secondly, as we saw in Mt 12, Matthew has combined Markan material with Q, a collection of the teaching of Jesus with which he was probably familiar in his Church. Thirdly, he has drawn upon material which is peculiar to him. This material was possibly a document because it reveals a definite structure. Perry has shown that if we remove the Q material from the Sermon on the Mount the remainder gives (1) seven beatitudes 5^{3-10}; (2) three contrasts between the Law and the new ethic of Jesus $5^{17-20, 21-24, 27-30, 33-37}$; (3)

three contrasts between ostentation and the new piety, introduced $6^{1-4, 5-8, 16-18}$. In addition, Matthew has drawn upon tradition probably from a Northern Palestinian or Syrian Church. F. C. Grant has isolated the following elements in this: (1) Christian Midrashic Haggadah (Mt 1–2, 14^{28-31} 16^{17-19} 17^{24-27} 27^{3-10}); (2) Christian exegesis and homiletics (*e.g.* $3^{14, 15}$ 12^{5-7} 13^{36-43}); (3) Material of a codal kind (cf the *Didache*; see the Sermon on the Mount, 10^{41} 18^{18} 19^{10-12} $23^{2f, 8-10}$); (4) early liturgical material probably underlies 6^{7-13} 11^{25-30} 18^{19-20} 28^{18-20}; (5) Apocalyptic material (*e.g.* 13^{24-30} 20^{1-16} 22^{1-14} 25 *passim*); (6) Apocryphal material $27^{19, 24f, 51b-53, 62-66}$ $28^{2-5, 11-15}$; (7) it is also possible that Matthew had a collection of OT passages or testimonia: the OT is adduced to explain certain events, and had influenced the tradition itself. (See especially the Birth and Passion Narratives.) How much of the above material Matthew found already in *written* form and how much of it he himself first put into writing must remain doubtful; but two factors are clear, first, that liturgical elements have strongly entered Matthew (though it cannot be regarded as a lectionary) and, secondly, that a Christian tradition of exegesis lies behind Matthew. Stendahl in his work *The School of Matthew* (1954) has indeed argued that Matthew is the product of a school of exegesis very similar to that revealed in the Dead Sea Scrolls: he does this on the basis of the so-called formula-quotations in Matthew. Not all, however, have been convinced that these reveal a use of Scripture either essentially like that of Qumrân or essentially peculiar to Matthew in the NT.

The characteristics of Matthew are chiefly, first, to use a loose term, its Jewishness. Even while Matthew presents attacks against Judaism (23), it also upholds the tradition of Judaism (5^{18} $23^{1f, 23}$); the themes that interest Matthew are the law, the Messiah, fulfilment of prophecy. But though this would suggest that Matthew stands over against Paul, some having found in 5^{19} a cryptic attack on that Apostle, this is probably not the case. (2) Coexisting with the 'Jewishness' of Matthew is its universalism: and it has been possible to claim that 'the assurance that the gentiles have displaced the Jews is the basic message and the gentile bias of Matthew' (K. W. Clark, *JBL* lxvi, 1947, p. 172). (See 8^{12} 12^{21} 21^{43} 28^{16-20}; see also $21^{28, 32, 33-43}$ 25^{1-13}). While this is to go too far, the ambiguity of Matthew must be fully recognized. (3) Matthew is the 'ecclesiastical gospel.' The Church is the 'new Israel' within the larger body of Jewry, but destined also to include the Gentiles. Expected to maintain the Law and go beyond its demands as they have been fulfilled in Christ, it has developed a discipline (Mt 18^{13ff}). The ecclesiastical interests of Matthew emerge in 9^{35}–10^{42} 16^{17-19} 17^{24}–18^{35}. (4) The interest of Matthew in the true interpretation of the will of God, *i.e.* in ethics, appears not only in the Sermon on the Mount, but elsewhere in his attempts at the application of the teaching of Jesus to life. While Matthew does not transform the gospel into a code of rules he does represent a casuistic interest. (5) Along with this we find a thoroughly apocalyptic–eschatological emphasis ($24^{12, 23f}$), which has led some to connect it specifically with the period at the beginning of the 2nd cent. when, culminating in the Bar Cochba revolt there was a heightened apocalyptic messianism (*e.g.* F. C. Grant).

3. The Purpose of the Gospel.—This has been variously understood. Matthew's catechetical traits have led some to regard it as a catechism for the use of members who had joined the Church; others have seen in it a Christian Manual of Discipline. Still others emphasize it as designed for liturgical purposes in the Church. But although there are catechetical, liturgical, and 'disciplinary' motifs in Matthew these are secondary. Are we to find in the Gospel primarily an appeal to the Jewish nation either after the disaster of A.D. 70 or before that of A.D. 135? This would explain the emphasis on 'peace,' but is hardly enough to illumine the whole purpose of Matthew. The same is true of the view, despite the element of truth that it contains, that Matthew's basic message is that the Gentiles have displaced the Jews as the chosen people. Matthew's central concern lies elsewhere. Jesus is for Matthew the Messiah and the Son of Man, but He has also become for him the Lord of the Church, His people. He has fulfilled the purpose of Judaism and become the living Lord of the New Israel, the worshipping Church. It is the illumination of Jesus as Lord of His community that Matthew has in mind, in their relation to the Law, Jesus being the new Moses of the new Sinai, and in relation to the world, His mission being henceforth to the Gentiles. Matthew is a gospel from a Church to a Church which asserts that in Jesus of Nazareth, Messiah, Son of Man, God is with us (1^{23} 28^{20}). But Jesus is all this as the Suffering Servant, who Himself was obedient and calls the Church to the same obedience. To expound all this to the Church is the purpose of Matthew.

4. Date and Place of Origin.—Attempts at dating Matthew, in Protestant scholarship, have been governed by the assumption that Matthew utilized Mark and is therefore to be dated after that Gospel. Since Mark is seldom dated before A.D. 65 (sometimes 70) Matthew has to be placed at least after this. The first piece of secure external evidence for the use of the Gospel occurs in Ignatius, so that Matthew can fall somewhere between A.D. 65 and 115. The following are the main arguments variously expressed which have been usually used to fix the Gospel in the last decade of the century.

(1) Mt 22^{7} points to a date after the Fall of Jerusalem in A.D. 70: 11^{12} 27^{8} 28^{15} also suggest some lapse of time since the days of Jesus.

(2) The conditions of Church life reflected in Matthew, namely, world persecution (24^{9}), dissension (24^{16}), the presence of false prophets (24^{11}), the lovelessness of Christians (24^{12}), a developed Church order and interest in the same, see 16^{19} 18^{17f}, and the increased reverence paid to the apostles 8^{26} 13^{16} 14^{33} 16^{9} $17^{4, 9, 23}$ (cf their Markan parallels), and the simultaneous rise of false Christian prophets $7^{15, 22}$. These conditions, it is claimed, point to a time not far removed from that which produced the book of Revelation, Clement, and the Pastorals.

(3) The external conditions—persecution 10^{22} 24^{9ff}—where Matthew is at pains to emphasize that hatred will be shown by all the Gentiles. But there is even more emphasis on false teaching than on persecution; this, according to Bacon, points to the later period of the reign of Domitian; documents from its earlier period reflect more preoccupation with persecution than with false teaching.

(4) The renewed emphasis on eschatology so widely noticed in Matthew suggests a time when the first expectations of the immediate return of the Son of Man had languished and had consequently to be revived: apocalyptic fervour to convince the faithful that though He tarried He would yet come is the mark of a late date. See 24^{37-51} 25^{1-12} 26^{13}. F. C. Grant emphasizes this reason for an early 2nd cent. date.

G. D. Kilpatrick—in this he was anticipated by von Dobschütz—shows anxiety to relate Matthew to Jamnia, and, apparently in this interest, insists that Mark reflects Palestinian conditions before A.D. 70, Matthew those after (*The Origins of the Gospel according to St. Matthew*, 1946). The Pharisees in Matthew have emerged as the significant group in Judaism, the Sadducees and other parties are overshadowed; the discussion of legal questions recalls those in the Mishnah; the niceties of the schools are introduced into them, *e.g.* the discussions of divorce and of the Sabbath; and it is significant that circumcision is a dead issue to Matthew. The use of 'their' in certain contexts in Matthew points to the exclusion of Christians from Jewish synagogues and Kilpatrick traces the impact on the Gospel of the *Birkath ham-Minim* in the Shemoneh Esreh. All in all he finds reflected in Matthew the late 1st cent. when Judaism and Christianity were consciously going their separate ways. Kilpatrick has thus added to the more general considerations advanced by Bacon and others for a date in the last decade of the 1st cent. and more specific

considerations connecting Matthew with that decade through Jamnia.

Nevertheless not all have thought such a late date necessary. Allen found it impossible to date it much after A.D. 70. He takes 24^{29} to refer to events which are to follow immediately upon the Fall of Jerusalem: Paul's arrival at Rome was the fulfilment for Matthew of the 'preaching in all the world' as a testimony to all nations. And this points to a period before A.D. 75. The ecclesiasticism of Matthew does not, he thinks, demand any later date. Nor does he seem to be in error here. Those passages which are cited as revealing a developed and therefore late ecclesiasticism would seem to be derived from regulations which were apparently commonly utilized among sectarian movements in Judaism: here the evidence of the Dead Sea Scrolls may be decisive. The points raised by Kilpatrick, used it would seem in anxiety to pin down the Gospel to the Rabbinical activity of the last decade, are all questionable. Thus his claim that the Sadduccees have ceased to be a party when Matthew was written is surely mistaken; discussions of divorce such as are recorded in Matthew took place before the Fall of Jerusalem and need not be taken to reflect Jamnia. T. W. Manson accordingly prefers a date between A.D. 70–80; so too Michaelis. Streeter (*The Four Gospels*, 1924) placed Matthew at about A.D. 85, and it is probable that such a date is to be accepted. Roman Catholic scholars have persisted in regarding Matthew as the first of the Gospels: this claim has been forcibly reiterated by Butler, in *The Originality of St. Matthew*.

Efforts to find the place where Matthew originated have been equally indecisive. Attempts to pin it down to Alexandria are to be dismissed outright because they flaunt all historical probability. The choice would appear to be somewhere in Palestine or Syria. Michaelis favoured Palestine and so too Schlatter, Allen, Schniewind. R. Bultmann, although he does not directly discuss the origin of Matthew, would seem to favour a Palestinian Jewish Christian milieu. The reasons which have led to this position can be broadly summarized thus: (1) The Gospel is concerned with carrying on an *Auseinandersetzung* with Judaism and thus suggests a Palestinian milieu; (2) the Greek of the Gospel points to a strong Semitic influence; (3) the audience addressed seems to be composed of Palestinian Jews; thus Jewish customs are referred to without explanation (15^{2} 23^{27}); so, too, Jewish dress (9^{20} 23^{5}); and a Jewish Christian religious practice and piety are presupposed (5^{20} 10^{5} 15^{24} 23^{3} 24^{20}). Moreover, the external evidence connects the Gospel with an eastern Jewish milieu. Papias, who is our earliest certain external attestation for Matthew, took Matthew to have been written in Hebrew or Aramaic (Eusebius, *HE* iii. 39).

On the other hand, there are elements in Matthew which have been claimed to point to Syria. Arguing that the Gospel was originally compiled for the use of a Great Church, Streeter in particular chose Antioch (Rome and Ephesus are ruled out by the external evidence) as its place of origin. This would explain the extraordinary interest shown by the author in Peter; because Antioch had followed Peter in adopting a *via media* between the Christianity of James and that of Paul. In addition it might well be the home of such haggadic expansions of Mark as we find in Matthew, and of its intermingling of Jewish and Gentile Christianity. An interesting detail seems to confirm all this, namely, that the *statēr* equalled two didrachmas only in Antioch and Damascus, according to Streeter; see Mt 17^{24-27}. Moreover, the external evidence points to Antioch. Ignatius Bishop of Antioch (*c* A.D. 115), shows most familiarity with Matthew, and so too does the *Didache* which Streeter dated about A.D. 100, and located in Syria. B. W. Bacon (*Studies in Matthew*, 1930) equally, like A. H. McNeile, admitted that the author of Matthew was remote from Palestine: he found indications of this in 7^{29} 9^{35} 11^{1} 13^{54}, where the use of 'their' in referring to Jewish scribes, synagogues, and cities in these places is significant; so too the use of 'that' in $9^{26, 31}$ 14^{35}. The use of the term Canaanite in 15^{22} points to Syria, and the way in which reference is made in 27^{8} to the field bought for thirty pieces of silver points to an extra-Palestinian origin, as do the references to the Jews in 28^{15} and the vagueness of geographical references in 5^{1} 8^{28} 14^{35} $15^{29, 39}$ 28^{16}. But Bacon further rejected Streeter's reasons for tying Matthew specifically to Antioch. This was the place of its dissemination, not of its composition. According to Bacon, Matthew came to Antioch from some eastern locality of mixed Aramaic and Greek speech, possibly Edessa. Streeter maintained that the authorship was ascribed to Matthew probably because the author of the Gospel knew that one of his sources was the work of the Apostle Matthew; the incorporation of a document written by Matthew would account for the ascription of the whole Gospel to Matthew. Bacon, on the other hand, regarded the title as given to distinguish this Gospel from other Gospels which were circulating in Antioch. Later on it was 'sponsored' not only by Antioch but by Churches in Phrygia, Asia, and Rome: it was not the Gospel of the Antiochian Church in any peculiar sense. The evidence of Ignatius is not as clear as Streeter made out; his quotations from Matthew are very few and chiefly from 1^{18}–2^{12}. Ignatius has legendary material alien to Matthew; and in his discussion of the resurrection of the flesh, to which Matthew lends itself, he ignores Matthew. So, too, the *Didache* is later than Streeter allows, so that he cannot allow earlier testimony to Matthew than Ignatius. Bacon urges that we are to connect Luke–Acts with Antioch rather than Matthew. At the same time by making Antioch the second stage in the history of Matthew he preserves the advantages of Streeter's theory and avoids its difficulties.

The attack on Antioch as the place of origin has been carried still further by Kilpatrick (*The Origins of the Gospel according to St. Matthew*, 1946). However, he first of all allows full weight to the claims of Antioch as they are advanced by Streeter and others and indeed he introduces new factors in its favour—Antioch was near enough to the centre of Judaism to feel the effect of measures taken against Christianity, which Kilpatrick finds echoed in Matthew; the absence of parallels to Philo in Matthew, such as are found in John, may be due to the independence of thought which was always characteristic of Antioch. But there is a debit side. If Ignatius was Bishop of Antioch when Matthew was written, he shows no trace of the strong Jewish influence which is so prominent in Matthew. The importance of Peter in Antioch does not indicate that he need not also have been important in other areas, such for example as the Syrian ports. Indeed Ac 11^{19-26} is against ascribing too much importance to Peter at Antioch: Peter was called, according to Gal 2^{8}, to be minister of the circumcision, whereas Antioch was the centre of the Gentile mission. This would, according to Kilpatrick, bring Peter and Matthew together and separate them both from Antioch. Kilpatrick is particularly concerned with gaining recognition for the fact that Matthew 'originated in a community in close contact with the Judaism of Jamnia,' and because this would be more true of a city like Tyre than of Antioch he prefers to place the origin of Matthew in the former or in some such Phoenician city; but the arguments by which he supports this view are not always convincing. It would seem that, on the whole, we can only pin Matthew to somewhere in Syria. Thus Kilpatrick holds that Matthew reserves the term *thalassa* for the Mediterranean, a fact which would suggest the Phoenician seaboard. But it is doubtful if his thesis can be maintained.

W. D. D.

MATTHEW'S BIBLE.—See ENGLISH VERSIONS, 20.

MATTHIAS.—1. The disciple chosen by Lot (Ac 1^{24-26}) to take the place of the traitor Judas. The name, a shortened form of Mattathias, means 'gift of Yahweh.' Apart from the fact that he was one of the original group of disciples during Jesus' ministry, there is no reliable

tradition about him. Clement of Alexandria identifies him with Zacchaeus, the Clementine Recognitions with Barnabas, and legend makes him an apostle to the Ethiopians and a compiler of 'Traditions' (a Gospel?). From this work Clement quotes the interesting saying, 'If an elect man's neighbour sin, the elect man has sinned.'

Modern criticism of the method of selection (by lot) is beside the point. Resort to the lot was an established Hebrew custom. **2.** 1 Es 9[33] (AV); see MATTATTAH.

J. L.

MATTITHIAH.—**1.** One of the sons of Nebo who had married a foreign wife, Ezr 10[43], 1 Es 9[35] (AV, RV **Mazitias**). **2.** A Korahite Levite, 1 Ch 9[31]. **3.** A Levite of the guild of Jeduthun, 1 Ch 15[18, 21] 25[3, 21]. **4.** An Asaphite Levite, 1 Ch 16[5]. **5.** One who stood at the right hand of Ezra during the reading of the Law, Neh 8[4]; called **Mattathiah** in 1 Es 9[43] (AV RV **Mattathias**).

MATTOCK.—The mattock of Is 7[25] (AV, RV) is rather the **hoe** (so RSV) with which land inaccessible to the plough was hoed—noun and verb being the same here, 5[6] RV and RSV 'hoed' for AV 'digged.' For descriptions and illustrations of the triangular hoe and the mattock, or pick, of modern Palestine, see *PEFSt*, 1901, p. 110f, and Hastings' *DB* iii, 306. The passage 1 S 13[20f] is very corrupt, and in v.[20] at least 'mattock' (AV, RV) should probably be 'goad' (but RSV 'sickle'). 2 Ch 34[6], where AV has 'mattocks' and AVm 'mauls,' is also corrupt, and RV and RSV read 'ruins.'

A. R. S. K.

MAUL.—See CLUB, **2**, and ARMOUR AND ARMS, **1** (*f*).

MAUZZIM.—The Hebrew phrase *'elōah mā'uzzîm* in Dn 11[38] (AVm 'God of Mauzzim') has been variously understood. RV and RSV translate 'god of fortresses,' and 'fortresses' for *mā'uzzîm* again in v.[39]. It is not so easy to decide which god is intended. Antiochus Epiphanes is the king referred to. He had begun to build a temple to Jupiter Capitolinus in Antioch (Livy, xli. 20). It has therefore been held that he is the god meant. But Antiochus also sent 'an old man from Athens' to 'pollute the temple in Jerusalem and call it the temple of Olympian Zeus' (2 Mac 6[2]). It is accordingly more probable that Jupiter Olympius is referred to.

MAW.—This old English word for the stomach is used by AV and RV in Dt 18[3] (RSV 'stomach') and by RV in Jer 51[34] (AV and RV 'belly'). Coverdale translates, 1 K 22[34], 'A certayne man bended his bowe harde and shott the kynge of Israel betwene the mawe and the longes.'

MAZITIAS, 1 Es 9[35] (AV, RV).—See MATTITHIAH, **1**.

MAZZALOTH.—See STARS.

MAZZEBAH (*maṣṣēbhāh*).—See PILLAR.

MAZZOTH (*maṣṣôth*).—See LEAVEN, PASSOVER.

MEADOW.—This word disappears from RV and RSV in the only two places where it is found in AV (Gn 41[2, 18], Jg 20[33]). In the former passages the Hebrew reads *āḥû*, an Egyptian word which probably means 'reed grass' (RV, RSV), and may possibly cover the natural pasture lands of old Egypt. It occurs again in Job 8[11] (AV, RV 'rush'; RVm, RSV 'papyrus'). In Jg 20[33] (AV 'the meadows of Gibeah') RV transliterates **Maareh-geba**; but it is practically certain that we should read *ma'ᵃrabh* and translate 'west of Geba' (so RSV). In RV 'meadows' stands for *'ārôth* in Is 19[7] (AV **paper reeds**), where RSV renders 'bare places.' RSV has 'meadows' in two places: Ps 65[13] (AV, RV 'pastures') for Hebrew *kārîm*; and Zeph 2[6] (AV 'cottages,' RV 'folds'), where MT has *nᵉwōth kᵉrôth*, which is probably corrupt.

MEAH.—See HUNDRED, TOWER OF.

MEAL.—See FOOD, **2**.

MEAL-OFFERING.—See SACRIFICE, **11**.

MEALS.—In the article FOOD attention was confined to the various articles of diet supplied by the vegetable and animal kingdoms. It now remains to study the methods by which these were prepared for the table, the times at which, and the manner in which, they were served.

1. *Preparation of food.*—The preparation of the food of the household was the task of women from the days of Sarah (Gn 18[6]) to those of Martha (Lk 10[40]). Only the houses of royalty and the great nobles had apartments specially adapted for use as kitchens, with professional **cooks**, male (1 S 9[23]) and female (8[13]). At the chief sanctuaries, also, there must have been some provision for the cooking of the sacrificial meals (1 S 2[13ff]), although Ezekiel (46[24] RV; RSV '**kitchens**') is the first to mention '**boiling-houses**' in this connexion (cf Ex 29[31], Lv 8[31]).

The usual method of cooking and serving meat can have differed but little from that most commonly observed at the present day in Syria. The meat is cut into larger or smaller pieces (1 S 2[13], Ezk 24[3ff]; cf Micah's telling metaphor 3[3]), and put into the cooking-pot with water. It is then left to stew, vegetables and rice being added. Such a stew—with perhaps crushed wheat in place of rice—was the 'savoury meat' which Rebekah prepared for her husband from 'two kids of the goats' (Gn 27[9]). When meat was boiled in a larger quantity of water than was required for the more usual stew, the result was the **broth** of Jg 6[19f], from which we learn that the meat and the broth might be served separately. The cooking-pots were of earthenware and bronze (Lv 6[28]). For an account of cooking utensils generally, with references to illustrations, see HOUSE, **9**.

In addition to boiling, or, as in AV, RV more frequently **seething** ('sod,' 'sodden,' Gn 25[29], Ex 12[9] etc.; but RSV has 'boil' throughout), **roasting** was much in vogue, and is, indeed, the oldest of all methods of preparing meat. Originally the meat was simply laid upon hot stones from which the embers had been removed, as in the parallel case of the 'cake baked on hot stones' (1 K 19[6] RSV). The **fish** of which the disciples partook by the Sea of Galilee was cooked on the charcoal itself. A more refined mode of roasting was by means of a spit of iron or wood. In NT times the Passover lamb had always to be roasted in an oven, suspended by a spit of pomegranate laid across the mouth.

Eggs (Job 6[6], Lk 11[12]), we read in the Mishnah, might be cooked by being boiled in the shell, or broken and fried, or mixed with oil and fried in a saucepan.

As regards the important group of the **cereals**, wheat and barley ears were roasted on an iron plate or in a pan, producing the '**parched corn**' (RSV 'parched grain') of OT. A porridge of coarse wheat or barley meal has also been referred to under FOOD, **2**. The seeds of the leguminous plants were mostly boiled (Gn 25[29]; cf 2 K 4[38]). A 'pleasing odour' (1 Es 1[12]) was imparted to the stew by the addition of other vegetables of a more pungent character, such as onions. In short, it may be affirmed that the Hebrew housewives were in no way behind their modern kinsfolk of the desert, of whom Doughty testifies that 'the Arab housewives make savoury messes of any grain, seething it and putting thereto only a little salt and *samn* [clarified butter].'

The direction in which Hebrew, like most Eastern, cooking diverged most widely from that of our northern climate was in the more extensive use of **olive oil**, which served many of the purposes of butter and fat among ourselves. Not only was oil mixed with vegetables, but it was largely used in cooking fish and eggs (as we have just seen), and in the finer sorts of baking. The poor widow of Zarephath's 'little oil' was not intended for her lamps, but to bake her 'handful of meal' (1 K 17[12]). The flour was first mixed with oil, then shaped into cakes and afterwards baked in the oven (Lv 2[4]); or a species of thin flat cake might first be baked in the usual way and then smeared with oil. The latter are the 'wafers spread with oil' of Ex 29[2] etc. **Honey** and oil were also used together in the baking of sweet cakes (Ezk 16[13, 19]). In this connexion it is interesting to note that while Ex 16[31] compares the taste of manna to that of 'wafers made with honey,' the parallel passage,

Nu 11[8], compares it to ' the taste of cakes baked with oil ' (RSV).

2. *The two chief meals.*—Among the Hebrews, as among their contemporaries in classical lands, it was usual to have but two meals, properly so called, in the day. Before beginning the work of the day the farmer in the country and the artisan in the city might ' break their fast ' (Jn 21[12, 15] RV) by eating a morsel of bread —the ' morning morsel ' as it is called in the Talmud— with some simple relish, such as a few olives ; but this was in no sense a meal. Indeed, to ' eat [a full meal] in the morning ' was a matter for grave reproach (Ec 10[16]).

The first **meal-time** (Ru 2[14]), speaking generally, was at an hour when the climate demanded a rest from strenuous exertion, namely, about noon ; the second and more important meal of the two was taken a little before or after sunset, when the labourers had ' come in from the field ' (Lk 17[7]). This was the ' **supper** time ' of Lk 14[17]. The former, the *ariston* of the Greeks—in EV rendered **dinner**, Mt 22[4], also Lk 11[38] but RVm here **breakfast**—was in most cases a very simple meal. ' A servant plowing or keeping sheep ' or harvesting would make his midday meal of bread soaked in light wine with a handful of parched corn (Ru 2[14]), or of ' pottage and bread broken into a bowl ' (Bel [33]), or of bread and boiled fish (Jn 21[13]). All the evidence, including that of Josephus, goes to show that the second or evening meal was the principal meal of the day.

3. *Position at meals.*—Within the period covered by OT the posture of the Hebrews at meals, in so far as the men were concerned, was changed from **sitting** to **reclining.** In the earliest period of all, the Hebrews took their meals sitting, or more probably, squatting on the ground (Gn 37[25] etc.), like the Bedouin and fellahin of the present day, among whom squatting ' with both knees downwards, and with the legs gathered tailor-fashion, alone is the approved fashion when at table ' (*PEFSt*, 1905, 124). The food was served in a large wooden bowl placed upon a mat of leather or plaited grass, round which the company gathered. The first advance on this primitive practice was to present the food on a wooden or other tray, set upon a low stand raised but a few inches from the ground. The next step was the introduction of seats, which would naturally follow upon the change from nomadic to agricultural life after the conquest of Canaan. Saul and his mess-mates sat upon ' seats ' (1 S 20[25]), the precise form of which is not specified, as did Solomon and the high officials of his court (1 K 10[5], where the queen of Sheba admires the ' sitting,' *i.e.* the seated company of his servants ; cf 13[20] etc.).

With the growth of wealth and luxury under the monarchy, the Syrian custom of reclining at meals gradually gained ground. In Amos's time it was still looked upon as an innovation peculiar to the wealthy nobles (Am 3[12] 6[4]). Two centuries later, Ezekiel is familiar with ' a stately bed ' or couch (as Est 1[6]) with ' a table prepared before it ' (Ezk 23[41]). In the post-exilic period the custom must have taken firm root, for by the end of the 3rd cent. B.C. it was probably universal save among the very poor (Jth 12[15], To 2[1]). In NT, accordingly, whenever ' **sitting at table** ' (AV, RV ' at meat ') is mentioned, we are to understand ' reclining,' as the margin of RV everywhere reminds us. At table, that is to say, the men—for women and children still *sat*—reclined on **couches** (see HOUSE, **8**) with wooden frames, upholstered with mattresses and provided with cushions, on which they leaned the left elbow (see Sir 41[19]), using only the right hand to eat with (see **5** below).

4. From the Mishnah we learn that in NT times the **tables** (see HOUSE, **8**) were chiefly of wood, and furnished with three or four feet. They were lower and smaller than with us. The couches or divans were as a rule capable of accommodating several people. In the houses of the great each guest at a banquet might have a couch and table for himself. The Greek custom was to assign two, the Roman three, guests to each couch. As each guest reclined on his left elbow, *the person next on his right on the same couch* could be said to ' recline in the bosom ' of his fellow-guest. Such were the relative positions of John and Jesus at the Last Supper (Jn 13[23]).

5. *Procedure at meals*, etc. In our Lord's day, as we learn from the Gospels, great importance was attached by the Jewish authorities to the ' **washing of hands** ' before meals. This consisted of pouring water (which had been kept from possible defilement in large closed jars, the ' stone jars ' of Jn 2[6]) over the hands and allowing it to run to the wrist (cf Mk 7[3] RVm and commentaries).

This washing over, the food was brought in by the women of the household (Mk 1[31], Lk 10[40]) ; in wealthy families by male slaves, the ' servants ' of 1 K 10[5], Jn 2[5, 9], ' attendants ' of Jth 13[1]. At this stage **grace** was said. The date of the introduction of this custom is unknown, for 1 S 9[13] is not a case in point. In NT the blessing before a meal has the repeated sanction of our Lord's example (Mt 15[36] 26[26] etc. ; cf Ac 27[35] for Paul).

As to what may be termed, with the Mishnah, ' the vessels for the service ' of the table, these naturally varied with the social position of the household, and more or less with the progress of the centuries. In early times earthenware vessels would be used, for which, as civilization advanced, bronze would be substituted, and even in special cases, silver and gold (see HOUSE, **9**). Bread, we know, was usually served in shallow wicker **baskets** (Ex 29[23]). The main part of the meal in the homes of the people will have been served in one or more large **bowls** or **basins,** of earthenware or bronze, according to circumstances. Such was the ' **dish** ' into which our Lord dipped the ' sop ' (Mt 26[23], Mk 14[20]). A shallower dish is that rendered ' **platter** ' in Mt 14[8, 11], and ' **dish,**' Lk 11[39].

In the case of a typical dish of meat and vegetables, prepared as described above, those partaking of the meal helped themselves with the fingers of the right hand (Pr 19[24]=26[15], Mt 26[23])—knives and forks being, of course, unknown at table—while the more liquid parts were secured, as at the present day, by using pieces of thin wafer-like bread as improvised spoons, or simply by dipping a morsel of bread, the **sop** of Jn 13[26] (AV, RV), into the dish. It was customary, as this passage shows, for the head of the family to hand pieces of food to various members ; these are the **portions** of 1 S 1[4].

6. In the event of a Jew of some position resolving to entertain his friends to dinner, it was usual to send the invitations by his servants (Mt 22[3]), and later to send them again with a reminder on the appointed day (v.[4], Lk 14[17]). Arrived at his host's residence, the guest is received with a kiss (Lk 7[45]), his feet are washed (v.[44]), and his head is anointed with perfumed oil (v.[38] ; cf Ps 23[5]). He himself is dressed in white gala costume (Ec 9[8] ; see DRESS, **7**), for to come to such a feast in one's everyday garments would be an insult to one's host (cf Mt 22[11f]). After the ' **places of honour** ' (Mt 23[6] ; AV ' uppermost rooms,' RV ' chief places ') on the various couches had been assigned to the principal guests, the hands duly washed, and the blessing said, the meal began. This would consist of several courses, beginning with light appetizing dishes, such as salted fish, pickled olives, etc. During the course of the dinner those whom the host wished to single out for special distinction would receive, as a mark of favour, some dainty portion, such as Samuel had reserved for Saul (1 S 9[23]). These were the **portions** (AV, RV ' **messes** ') sent by Joseph to his brethren (Gn 43[34]—for a list of the parts of an animal in order of merit, so to say, used for this purpose at a fellahin banquet to-day, see *PEFSt*, 1905, 123).

At the close of the dinner the hands were again washed, the attendants bringing round the wherewithal, and tables with all sorts of fruit were brought in, over which a second blessing was said. Although wine was served in the first part of the **banquet** as well, it was at this second stage that the ' fruit of the vine ' was chiefly enjoyed. The wine-cups were filled from the large mixing bowls (Jer 35[5]) in which the wine had been diluted with water

and perfumed with aromatic herbs. It was usual, also, to appoint a '**steward of the feast**' (Jn 2^8; cf Sir 32^1) to regulate the manner and the quantity of the drinking, and to enforce penalties in the case of any breach of etiquette. 'Music and dancing' (Lk 15^{25}) and other forms of entertainment, such as the guessing of riddles (Jg 14^{12ff}), were features of this part of the banquet. For instruction in the 'minor morals' of the dinner-table, Jesus ben-Sira has provided the classical passages, Sir 31^{12-18} 32^{3-12}, expanding the wise counsel of the canonical author of Pr 23^{1f}. A. R. S. K.—**W. A. I.**

MEANI, 1 Es 5^{31} (AV).—See MEUNIM.

MEARAH.—Mentioned amongst the districts of Palestine that had yet to be possessed, Jos 13^4. We should perhaps read *mē-'ārāh* 'from Arah.' Arah may be modern *Kh.* *'Arah*.

MEASURES.—See WEIGHTS AND MEASURES.

MEASURING LINE.—See ARTS AND CRAFTS, **1, 3.**

MEAT.—This word is used in AV for food in general, as it is in Scotland still. Thus 2 Es 12^{51} AV 'I had my meat of the herbs'; cf Hall, *Works* i, 806, 'There was never any meat, except the forbidden fruit, so deare bought as this broth of Jacob.'

MEAT-OFFERING.—See SACRIFICE, **11.**

MEBUNNAI.—The name of one of David's thirty heroes, 2 S 23^{27}; elsewhere called **Sibbecai** (q.v.).

MECHERATHITE.—1 Ch 11^{36}, probably for **Maacathite.** See MAACAH.

MECONAH.—A town inhabited after the exile, Neh 11^{28} (RV and RSV needlessly alter AV **Mekonah**). The site is unknown.

MEDABA, 1 Mac 9^{36} (AV and RV) = **Medeba** (q.v.).

MEDAD.—See ELDAD.

MEDAN.—One of the sons of Abraham and Keturah, Gn 25^2, 1 Ch 1^{32}. The existence of such a tribe, however, is very doubtful. In Gn 37^{36} 'Medanites' (see RVm) is miswritten for **Midianites** (so EV), and there is every likelihood that in the former passage 'Medan' is a doublet of 'Midian,' the next word in the verse. Medan is unknown elsewhere in the Bible, nor is it represented by the name of any people in any extra-Biblical document. To connect it with the name of an Arabian god *Madân*, or with the similar name of a wady in NW. Arabia, is very hazardous, both because the associations are remote, and because the word-form is common in Semitic, and is liable to occur in various relations. J. F. McC.

MEDEBA (Nu 21^{30}, Jos $13^{9,16}$, 1 Ch 19^7, Is 15^2).—A city in the fertile plain or tableland (Heb. *Mîshôr*), E. of the N. end of the Dead Sea, about 25 miles S. of 'Amman (ancient Philadelphia) and 6 miles S. of Heshbon on the Roman road to Kerak. It appears to have been taken from the king of Moab by the Amorite Sihon and then conquered by Israel (Nu 21^{24-26}; Hebrew mentions 'Medeba' in v.^{30} where Greek has 'Moab' and Syriac reads 'wilderness,' but other geographical references in this passage indicate that the territory conquered could have included Medeba). It was assigned to Reuben (Jos 13^9). In the time of David the Syrians who came to assist Ammon (1 Ch 19^{6-15}) may have encamped at Medeba, which was apparently then Ammonite (cf v.^{7} where Medeba is mentioned; because the parallel in 2 S 10^{6-7} does not name the city, it is possible that another Ammonite city rather than the Moabite Medeba, figured in the campaign). When Moab was defeated by David it is probable that Medeba fell into Israelite hands (2 S 8^2). According to the famous Moabite stone (see MOAB), Medeba (l. 8) had been among the possessions held by Omri and his son (Ahab) for forty years until Mesha rebuilt it (l. 30) with other Moabite cities. Joram and Jehoshaphat made an unsuccessful attempt to retake the land of Moab (2 K 3), and in later Israelite times, the fortunes of Medeba must have paralleled those of Moab (cf Is 15^2 which implies that the city was held by the Moabites but was in a state of ruin).

In Maccabaean times it was the stronghold of a robber clan, Jambri, which killed John, eldest son of Mattathias. Jonathan avenged this (1 Mac 9^{36-42}; Jos. *Ant.* XIII. i. 2, 4 [11, 18 ff]). John Hyrcanus besieged Medeba (Jos. *Ant.* XIII. ix. 1 [254]). Alexander Jannaeus took it from the Arabians, and Hyrcanus II. promised to restore it to Aretas (*ib.* XIII. xv. 4 [397], XIV. i. 4 [18]). During the Byzantine period Medeba was a flourishing Christian centre, the seat of bishopric, and represented at the Council of Chalcedon. About 1880 a colony of Roman Catholics from Kerak settled there. Although no large-scale excavations are possible because it is one of the thriving cities of Jordan, now called Madeba, many ancient remains have come to light. These include a large reservoir with solid walls, remains of gates and towers, Moabite tombs, four churches, and some fine mosaics, especially the famous coloured mosaic map of Palestine and Egypt constructed in the 6th cent. A.D. and now in the floor of the Greek Orthodox church.

C. H. W. J.—**W. L. R.**

MEDES, MEDIA.—A people and country called by the same word **Madai** in Hebrew and Assyrian. The Medes were an Aryan (Iranian) people, the first known reference to whom (as Amadai) occurs in 836 B.C. as paying tribute to the Assyrian conqueror Shalmaneser II. They occupied the mountainous country S. and SE. of the Caspian Sea, their chief city being Ecbatana (Achmetha in Ezr 6^2 AV, RV), modern *Hamadān*. Later Assyrian rulers campaigned against them, and Sargon in 715 and 713 received tribute from a substantial number of chieftains; 2 K 17^6 18^{11} records that Israelites from Samaria were deported to 'the cities of the Medes.' The Medes remained subject to Assyria until the second half of the 7th cent., when they regained their independence and became a dangerous rival. A dynasty was established claiming to derive from one Deioces, who is said to have founded Ecbatana and unified the country. Phraortes, his son, subjugated the **Persians** (q.v.) who had probably settled to the E. of the Persian Gulf at about the same time that the Medes settled farther N., being another branch of the same people. Phraortes was succeeded by Cyaxares I., who in alliance with Nabopolassar of Babylon succeeded in destroying Assyria, taking Nineveh in 612 B.C. While the Babylonians took control of the lowlands, the Medes ruled in the highlands, as far W. as Cappadocia. The power of the Medes was such that the exiled Jews expected the overthrow of Babylon at their hands (Is 13^{17} 21^2, Jer 25^{25} $51^{11,28}$). But with the rebellion of **Cyrus** of Anshan (q.v.) Astyages, king of the Medes, was defeated in *c* 549 B.C., and although the Medes retained an important place in the new Persian empire, they did not again become independent. A Mede, Phraortes, claiming to be of the family of Cyaxares, was one of the rebels defeated by Darius I. at his accession. But their prominence as principal part of the Iranian population results in the name Medes being more frequently mentioned than that of the Persians, except in the later books of the OT. Madai is mentioned in Gn 10^2 among the sons of Japheth, with no allusion to the Persians. Persia and Media are mentioned together in Esther ($1^{3,14,18}$ 10^2), while a belief in the unalterability of their law is expressed in 1^{19} as also in Dn $6^{8,12,15}$. Dn 5^{28} 9^1 11^1 (cf 8^{20}) erroneously inserts an empire of the Medes between that of Babylon and that of Persia, perhaps because of the prophecies of a Median conquest of Babylon. The Persians took over the Median culture, its religion, military and political organization, weapons, clothing and customs. In Ac 9^2 the Medes are mentioned, the reference being to Jews or proselytes living in Media and using the language of the country.

Media was occupied by Alexander the Great, and its southern part came under the Seleucid rulers and was intensively Hellenized. Later it fell to the Parthians, as did also the northern area which had enjoyed a period of independence. The varied traditions concerning Zoroaster associate his origin with Media, probably in the 7th or 6th cent.; he may have belonged to the old school of Median Magi, but it was in eastern Iran that the new faith first gained a firm foothold. J. F. McC.—**P. R. A.**

MEDIATOR, MEDIATION.—The word 'mediator' (Gr. *mesitēs*) occurs in the NT, once of Moses as the mediator of the Law (Gal 3^{19f}), in the other instances of Christ as the 'one mediator between God and men' (1 Ti 2^5), and the mediator of a 'better' (He 8^6), or 'new' (9^{15} 12^{24}, in latter passage 'new' in sense of 'recent') covenant. The verbal form occurs in He 6^{17} [RSV 'interposed (Gr. mediated) with an oath']. The LXX has the term once in Job 9^{33} (AV and RV '**daysman**,' RSV 'umpire'). But the idea of mediation, that is, of God dealing with man, or man with God, not directly but through the interposition of another, has a leading place throughout Scripture. Different aspects of mediation, however, need to be distinguished. As regards the fundamental relation of man to God, Jesus, in the NT, is the one and sole Mediator.

1. The most general form of mediation is *intercessory prayer*. This is the privilege of all (cf Ja 5^{16}). Well-known Scripture examples are the intercession of Abraham for Sodom (Gn 18^{23-33}), of Moses for Israel (Ex 32^{30-34}), of Samuel for Israel (1 S 7^{8-12}). Jeremiah (15^1) singles out Moses and Samuel as the chief representatives of this form of prayer. Probably an element of intercession enters into all effective mediation. St. John (ch. 17) preserves the great intercessory prayer of Jesus after the Last Supper, and intercession is declared to be a chief exercise of Christ's mediatorial function in heaven (Ro 8^{34}, He 7^{25}, 1 Jn 1^1). Intercessory prayer is a duty of the Christian (1 Ti 2^{1f}), but always and only in the name of Christ, who in the same context is declared to be the 'one mediator' (v.^{5}).

2. Mediation has a peculiar place in *the formation of the great covenants*. It is the singular fact in connexion with the covenant with Abraham, of which St. Paul and the Epistle to the Hebrews in different ways take notice, that it involved no mediator (Gn 12^{1-3} 15, 17). It was a covenant of promise absolutely (Gal 3^{15-18}). This seems to be the force of St. Paul's peculiar saying, 'Now an intermediary implies more than one; but God is one' (Gal 3^{20}; there were not, as in the covenant through Moses, two contracting parties; the covenant proceeded solely from God, and was unconditional). In He 6^{13-18} this is carried further. God Himself took the place of Mediator in this covenant, and, because He could swear by no higher than Himself, 'interposed (mediated) with an oath' in ratification of His promise (cf Gn 22^{15-18}). It is different in the covenant with Israel at Sinai, where Moses is throughout (by God's appointment and the people's own desire, Ex 19^{10-25} 20^{18-21}) the mediator between God and the people (Gal 3^{19}, point of contrast between law and promise). Finally, mediation is the law in the 'new' and 'better' covenant, as the passages in Hebrews declare. The reason is that this perfect and eternal covenant, procuring forgiveness of sins, and removing all barriers to access to God, could be formed only on the basis of a reconciling sacrifice; and this Jesus alone, the Son of God, had the qualification to offer. It is noticeable, therefore, that all the passages that speak of Jesus as 'Mediator' do it in direct connexion with His sacrificial death: 1 Ti 2^5 'one mediator between God and men, the man Christ Jesus' connects with v.^{6} 'who gave himself as a ransom for all'; He 9^{15} declares: 'Therefore he is the mediator of a new covenant, so that those who are called may receive the promised eternal inheritance, since a death has occurred which redeems them from the transgressions under the first covenant' (cf Ro 3^{25}); 12^{24}, where to come 'to Jesus the mediator of a new covenant' is to come 'to the sprinkled blood that speaks more graciously than the blood of Abel'; so also 8^6 (cf the context, v.^{3}). It is this fact, that Jesus has made the perfect sacrifice for sin, coupled with His unique dignity, as Son of God, which constitutes Him the Mediator *sui generis*.

3. Here, accordingly, is brought to consummation the last great aspect of mediation in the OT—the mediation of *a sacrificing priesthood*. Prophets also might be called mediators, as commissioned revealers of the will of God to the people; but mediation is peculiarly connected with the functions of the priest. In earlier times the head of the family was the priest; an interesting example of patriarchal mediation is given in the Book of Job (1^5 for his sons; cf 42^{7-9} for his friends). Under the Law the people could approach God only through the Aaronic priesthood; but the mediatorial function was peculiarly vested in, and exemplified by, the high priest. To him it pertained, on the one hand, to represent the people before God (cf the ephod and breastplate, with their precious stones graven with the names of the twelve tribes of Israel, Ex 39^{6-14}), and to offer sacrifices for their sins (He 2^{17} 8^3; he alone had the right of entry into the Holy of Holies on the great annual Day of Atonement, He 9^7); and, on the other, to represent God to the people, in declaring His will by the Urim and Thummim, and blessing in His name (cf Dt 10^8 33^8, prerogatives of the high priest). This twofold aspect of the high-priestly function, as the Epistle to the Hebrews seeks to show, is in a perfect and abiding way realized in Christ, who is thus the one true Mediator, our 'great high priest who has passed through the heavens' (4^{14}). See ATONEMENT, PROPITIATION, RECONCILIATION.

J. O.

MEDICINE.—It is difficult to compare general health to-day with that of Bible times. If a number of diseases of Bible times have tended to recede, others have come to the fore. Infant mortality, as archaeological excavations show, was heavy; the general expectation of life was shorter, and people attained maturity earlier.

1. The idea of a causal connexion between **health** and virtue finds frequent expression in OT: 'If you will diligently hearken to the voice of Yahweh your God . . . I will put none of the diseases upon you which I put upon the Egyptians; for I am Yahweh your healer' (Ex 15^{26}). **Disease** was popularly regarded as a penalty for wrong-doing (Jn 9^2) and as sent by God, either directly (Ex 4^{11}, Dt 32^{39}) or permissively by means of others (Job 2^7). It might also be caused by human envy (Job 5^2) or by physical excess (Sir 37^{30f}); but even so it was viewed as being ultimately authorized by God.

In these circumstances **healing** was treated as a token of Divine forgiveness (Ex 15^{26}). The connexion of priest with **physician** was correspondingly close. On the whole, medical knowledge was very defective, nor are there any traces of medical education in Palestine. Apart from Joseph's servants the physicians who embalmed Jacob (Gn 50^2), we have no Biblical record of physicians until the time of the monarchy, although Ex 21^{19} may imply their existence in Israel. Jer 8^{22} suggests that Gilead was the home of skilled healers. It has been inferred from 2 Ch 16^{12} that the Chronicler thought it sinful to consult physicians; if Asa suffered from senile gangrene in his feet, such ministration as physicians of his day would provide might well have aggravated the disease. A more modern attitude is expressed in Sir 38^2. The prayer of Sir 38^{15} that the sinner may fall into the hands of a physician may simply mean 'may he fall sick'; in any case, the Hebrew text reads: 'He who sins against his Maker will behave arrogantly towards his physician.' Medical duties were frequently performed by priests (as in early Egypt); priests certainly had the supervision in the case of leprosy (Lv 13^{2ff}), and prophets also were applied to for medical advice (cf 1 K 14^2 17^{18}, 2 K 4^{22} 20^7). Even in Sir 38^{14} physicians are regarded as intercessors, at least to the extent that they 'will pray to the Lord that he should grant them success in diagnosis and in healing, for the sake of preserving life.' The invalid is exhorted to pray, repent, and offer a sacrifice before visiting the physician (vv.^{9ff}). In the NT Luke is called a physician (Col 4^{14}), a statement which finds some corroboration from certain features of Luke and Acts.

The medical knowledge of the priests, in whose charge the healing art remained for long, would be mainly traditional and empirical. The sacrificial ritual gave them some knowledge of animal morphology, but human anatomy can scarcely have existed as a science at all, in view of the ceremonial objections to touching the dead, not to speak of dissecting them. Biblical references to facts of anatomy and physiology are very few. The ban

on eating blood (Gn 9[4], Lv 17[11]) was an important sanitary precaution. A rudimentary embryology can be traced in Job 10[10], Ps 139[15ff] (cf Ec 11[5]). But most of the physiological theories mentioned in the Bible are expressed in language of poetry and metaphor. The Jews (like other ancient peoples) evidently regarded the **heart** as the seat of mental and moral activity (Pr 2[2] 4[23] etc.), the **kidneys** (AV ' reins ') of impulse and conscience (Jer 11[20] 12[2], Ps 7[9]), and the **bowels** of sympathy (Ps 40[8], Job 30[27]). (In Dn 2[28] 4[5] 7[1] dreams are located in the **head.**) Proverbs about physicians are echoed in Sir 38[1], Mk 2[17], Lk 4[23]. Visitation of the sick is a pious act (cf 2 K 13[14] 20[1]) ; it was enforced by Christ (Mt 25[36]).

2. *General terms for disease.*—The words ' **disease,**' ' **illness,**' ' **infirmity,**' ' **sickness,**' used in EV, usually represent Hebrew *ḥôlî* or one of its cognates or derivatives in OT and either Greek *astheneia* or *nosos* in NT. ' **Pestilence** ' and ' **plague** ' represent a variety of Hebrew and Greek words, many of which have the root sense of ' blow,' ' scourge,' or ' stroke.'

Some diseases, *e.g.* leprosy (q.v.), were regarded as unclean, and those suffering from them were excluded from cities and other centres of human habitation. But in general the sick were treated at home. We know very little about the treatment which they received. In later times the Jews followed the universal practice of bleeding : whether it was resorted to in earlier times we cannot say. The wording of Pr 30[15] is too uncertain for us to draw any inference about the medicinal use of **leeches.**

3. *Specific diseases.*—Bible references to specific diseases are usually general and vague ; even where concrete mention of particular ailments is found it is not always easy to determine their exact nature. Occasionally symptoms are given, but sometimes very indefinitely.

In Dt 28[22] there is a list of diseases which resemble one another in that they are sudden, severe, epidemic, and fatal. The first is ' **consumption** ' (*shaḥepheth*), which may include any wasting disease such as pulmonary tuberculosis ; the same word is used in Lv 26[16]. The ' **fever** ' which is mentioned next (*ḳaddaḥath*) would usually be malaria, specially prevalent in the Jordan valley, but might include any other febrile illness such as typhoid. In Lv 26[16] AV renders it ' **burning ague.**' The ' **inflammation** ' (*dalleḳeth*) of Dt 28[22] is rendered *rhigos*, ' ague,' in LXX ; it may be tertian malaria. Then comes ' **fiery heat** ' (*ḥarḥûr*), either some unspecified kind of irritating disease, or **erysipelas** (but this latter disease is not of frequent occurrence in Palestine).

The descriptions of disease given in Ps 38[5] 39[11], Lv 26[39], Ezk 24[23] 33[10], Zec 14[12] suggest an attack of confluent **smallpox,** with its disfiguring and repulsive effects ; if in some of these places the language is figurative, the imagery may even so be borrowed from this ailment.

Allusions to **pestilence** or **plague** are very common in the OT. At least four outbreaks are recorded among the Israelites during their wilderness wanderings, viz. Nu 11[33] (it has been suggested that the quails mentioned here came from a plague-stricken region) 14[37] 16[46] 25[9] (in this last case it may have been communicated by the Moabites). For other references to plague, cf 2 S 24[15], 2 Ch 21[14], Ps 91[3, 6], Jer 21[9] 42[17]. Am 6[8–10] reminds one of the house-to-house searching for the dead recorded of the London plague of 1665. **Bubonic plague** was the periodic scourge of Bible lands ; it was probably this that destroyed Sennacherib's army (2 K 19[35]). The mortality which broke out among the Philistines when the Ark was in their midst (1 S 5[9ff]) appears to have been due to this plague (cf the death of the seventy men of Bethshemesh, 1 S 6[19]). The ' **tumours** ' of 1 S 5[6, 9, 12] (AV ' **emerods** ') were evidently the buboes of the plague. Pestilence was looked upon as a visitation from God, being one of His three sore judgments (cf 2 S 24[12f], Jer 24[10] 32[24, 36]).

Of **diseases in the digestive organs** the case of Jehoram in 2 Ch 21[19] was one of chronic **dysentery** in its worst form, leading to a massive rectal prolapse. Dysentery such as accompanied the fever from which the father of Publius was healed (Ac 28[8], AV ' **bloody flux** ') was very prevalent in Malta. The results of over-indulgence in alcohol are described in Pr 23[29ff], Is 19[14] 28[7f].

Liver. Hebrew physicians regarded many disorders as due to an alteration in the bile (cf Job 16[13], La 2[11]). Timothy's ailments (1 Ti 5[23]) may have been some form of dyspepsia, possibly causing a diminution of energy (cf 1 Ti 4[12–16]) ; the taking of alcohol would give temporary relief. Dryness of throat is mentioned in Ps 69[3] as a result of acute emotional disturbance ; the flatulent distension of the colon mentioned in Is 16[11], Jer 4[19] is due to the same cause.

Heart. There are few references to heart-disease. Cases of syncope have been (doubtfully) diagnosed in Gn 45[26], 1 S 4[18] 28[20], Dn 8[27]. The allusions to a ' broken heart ' are always metaphorical (cf Ps 69[20]). Stroud's once popular theory that our Lord's death was due to rupture of the heart is now regarded as quite unacceptable.

Paralysis (AV, RV **palsy**). This is a disease of the central nervous system, which comes on rapidly as a rule, and disappears slowly, if at all. The paralytic of Mk 2[3] and parallels evidently had paralysis of the legs, perhaps due to a spinal cord lesion, though severe infantile paralysis is not to be excluded. The centurion's servant (Mt 8[6]) may have been suffering from tetanus ; this is suggested by his being in great pain and at the point of death. The ' **withered hand** ' of Mk 3[1] and parallels was probably caused by a complete atrophy of the bones and muscles. The man born lame in Ac 3[2] may have suffered from a severe degree of congenital club foot, or *spina bifida.* The man at the pool of Bethesda (Jn 5[7]) may have suffered from withered limbs ; *locomotor ataxia* is less probable in view of the duration of his ailment (38 years). The sudden ' **drying up** ' of Jeroboam's hand (1 K 13[4]) was probably due to sudden haemorrhage affecting part of the brain, which in certain circumstances may be only temporary.

Apoplexy. A typical seizure is recorded in Nabal's case (1 S 25[37]), due to cerebral haemorrhage produced by excitement, supervening (in this instance) on a drinking bout. Apoplexy has also been diagnosed in the case of Uzzah (2 S 6[7]), and of Ananias and Sapphira (Ac 5[5, 10]).

Mental illness. Saul's ailment (1 S 16[14]) would be diagnosed to-day as a case of manic-depressive insanity, with periods of black melancholy, flashes of homicidal violence, and deeply rooted delusions that David and others were plotting against him. Nebuchadnezzar's **madness** (Dn 4) was paranoia in the form of a fixed delusion that he was an ox (compare **lycanthropy,** in which the patient believes that he has been changed into a wolf). A Qumrân text (*The Prayer of Nabonidus*) may preserve a variant account in which the king is Nabonidus and the ailment some form of ' inflammation.' In the NT various nervous affections are probably included among the instances of **demon-possession** ; see POSSESSION.

Deafness and Dumbness. Cases of temporary aphasia arising from sudden emotion or the like are recorded of Ezekiel (Ezk 24[72] 33[22]), Daniel (Dn 10[15]), Zechariah (Lk 1[22]) and Paul (Ac 9[7]). But Zechariah's dumbness was evidently attended by deafness (v.[62]) ; such functional deafness is very uncommon. Some cases of dumbness in the NT are put down to possession (*e.g.* Mt 9[32], Mk 9[25]). In Mk 7[32] stammering is joined to deafness. Patience with the deaf is enjoined in Lv 19[14].

Epilepsy. The case of the boy in Mk 9[18] and parallels is shown by the graphically described symptoms to have been one of epileptic fits, to which (like many epileptics) he had been subject from childhood. The word used in Mt 17[15] to describe this trouble means literally ' to be moon-struck ' ; cf Mt 4[24], Ps 121[6]. It was a very general belief that epilepsy was somehow connected with the phases of the moon ; such a theory was put forward as late as 1577 by the English court-physician Vicary.

Sunstroke. Sunstroke or heat-stroke (cf Ps 121[6], Is 49[10], Rev 7[16]) probably caused the death of Judith's husband (Jth 8[2f]) ; it has also been diagnosed in the case

of the Shunammite's son (2 K 4[18ff]), although cerebral malaria is another possibility; his restoration was plainly miraculous. Jonah's plight when the sheltering plant withered (Jon 4[8]) may have been a case of heat syncope; he fainted from the heat, and on recovery was conscious of a severe headache and a feeling of intense prostration.

Dropsy. This disease was common in Jerusalem; a cure is recorded in Lk 14[2ff].

Gout. This disease is very uncommon in Palestine and is not, as a rule, fatal. The disease in his feet from which Asa suffered (1 K 15[23], 2 Ch 16[12]) was probably not gout but senile gangrene. The perfumed spices which the Chronicler mentions in connexion with his funeral may have been intended to counteract the stench inseparable from this disease.

The **spirit of infirmity** (Lk 13[11]) from which Jesus cured a woman in an unspecified synagogue appears to have been a case of severe spinal curvature due to bony fusion of the vertebrae (*spondylitis deformans*), either tuberculous or osteoarthritic. Such a condition disqualified a man from becoming a priest (Lv 21[20]). The evidence of mummies suggests that it was fairly common in Egypt.

Fracture of the skull. A case is recorded in Jg 9[53] (Abimelech), where insensibility did not immediately supervene, showing the absence of compression of the brain. In Ac 20[9] fatal compression and probably a broken neck were caused by the accident. Ahaziah's fall in 2 K 1[2] was also fatal.

Lameness. Mephibosheth's lameness was ascribed to an accident in childhood (2 S 4[4]); he may have sustained a fracture of both legs with gross displacement. Considering, however, the tendency of children's bone to grow straight again, we may wonder whether the lameness was not due to anterior poliomyelitis, although everyone blamed the fall. Lameness was a disqualification for the priesthood (Lv 21[18]). Jacob's lameness has been diagnosed as due to ruptured and prolapsed intervertebral disc producing severe and intractable sciatica from pressure on the nerve roots; that his hip joint was actually dislocated, as most versions indicate, is highly improbable (Gn 32[25]). The **hunchback** (AV, RV '**crook-backt**') was also disqualified for the priesthood (Lv 21[20]).

Congenital malformations. The possession of superfluous parts (cf the six fingers and toes of the giant in 2 S 21[20], 1 Ch 20[6]) disqualified a man for the priesthood (Lv 21[18]), as did various other congenital malformations. The term rendered 'flat nose' in Lv 21[18] (RSV 'mutilated face') might denote a hare-lip.

Of **skin diseases** the most important was leprosy (see under LEPROSY). But many minor skin affections receive mention in the Bible.

Baldness was not regarded as causing ceremonial uncleanness (Lv 13[40–43]). In Is 3[24], Ezk 29[18] it is the result of carrying burdens on the head.

Itch or **scabies** (Dt 28[27]) is caused by the spider-like *Sarcoptes scabiei*, which burrows under the skin, especially between the fingers and toes, but sometimes all over the body. It is very infectious. It was a disqualification for the priesthood (Lv 21[20]).

Scab or **scurvy** (Lv 21[20], Dt 28[27]) has nothing to do with the disease which we call scurvy, which is due to lack of fresh fruit and vegetables. The Hebrew words (*gārābh*, *yallepheth*) may cover a wide variety of skin diseases, including psoriasis and eczema; they disqualified a man for the priesthood (Lv 21[20]). The terms rendered '**scall**' or 'itch' (Lv 13[30]) and '**tetter**' (Lv 13[39] RV and RSV; AV '**freckled spot**') may denote leucodermia or psoriasis.

The **boils of Egypt** (Dt 28[27, 35] [AV '**botch**']; cf Job 2[7], Ex 9[9], 2 K 20[7], Is 38[21]) were accompanied by **blains**, *i.e.* pustules (Ex 9[10]). To us a boil is a swelling due to infection of a hair follicle; the Hebrew word (*shᵉḥîn*) may have a wider connotation. In Dt 28[35] the knees and legs are particularly affected. Many of the features of **Job's disease** suggest smallpox, but the rare *dermatitis herpetiformis* has claims to be considered. The boils of Egypt may have been the papular stage of smallpox, followed by the pustules. Hezekiah's boil may have been a carbuncle (2 K 20[7]). Two further words, *sappaḥath* and *mispaḥath*, from the same root, found in Lv 13[2] 14[56] and Lv 13[6–8], are rendered '**scab**' in AV and RV, but '**eruption**' in RSV. On these see LEPROSY, II. (*a*).

More general terms for skin diseases are '**blemish**' (Lv 21[17] [AV, RV, RSV], Dt 32[5] [RV, RSV; AV '**spot**'], Job 11[15] [RSV; AV, RV 'spot']), Dn 1[4] [AV, RV, RSV]), '**flaw**' (Ca 4[7] [RSV; AV, RV 'spot']). For an animal suppurating sore AV and RV have '**wen**' in Lv 22[22], where RSV has '**discharge.**'

Our Lord's **sweat . . . like great drops of blood** (Lk 22[44]) has been discussed inconclusively. The simile may denote the size of the drops of perspiration, not their colour. A few old examples of blood-tinged sweat have been quoted, but they lack adequate authentication.

Poisonous serpents are mentioned in several places. In Nu 21[6] their bite is miraculously cured by the erection of a bronze model of a serpent on a pole in the middle of the camp (the use of this figure as a symbol of Asklepios, the Greek god of healing, is perhaps a coincidence). The reference in Mk 16[18] is probably to Paul's experience in Ac 28[3] (where it is disputed whether the creature was actually a viper, or *Coronella leopardinus*). Scorpion bites can be fatal, especially to children.

Worms, mentioned in connexion with the death of Herod Agrippa I. (Ac 12[23]), suggest (together with the more detailed account given by Josephus in *Ant.* XIX. viii. 2 [346–59]) that he was suddenly stricken with acute intestinal obstruction, possibly resulting from a strangulated hernia, for which to-day an operation would be performed. The worms which appeared subsequently would be regarded as the cause of his death. A similar description is given in 2 Mac 9[5–9] of the last illness of Antiochus Epiphanes, which may have been due to rectal cancer.

The third plague of Egypt (Ex 8[16]) is called one of **lice** (AV, RV) or **gnats** (RSV); but RVm suggests **sand-flies** or **fleas.** Possibly they were mosquitoes or sand-fleas, the latter of which breed in the dust.

Discharges or **issues** of various kinds caused ceremonial impurity (Lv 15[2ff]). Some of these were natural (Dt 23[10]), others would be due to gonorrhoea, and therefore infectious. In the absence of any means of distinguishing between them, it was safest to impose precautions in the case of all. It is uncertain how much the Hebrews and their neighbours knew of venereal diseases.

Blindness was exceedingly common in Palestine and the adjoining lands. The words denoting this affliction occur frequently in the Bible, in senses both literal and metaphorical. Two main forms of blindness appear to be recognized: (1) trachoma, a highly contagious form of conjunctivitis, due to a virus transmitted through the bodies of lice, still the cause of much blindness in the Near and Middle East, and (2) optic atrophy, found in old people like Isaac (Gn 27[1]), Eli (1 S 3[2]) and Ahijah (1 K 14[4]). Blindness was regarded as a visitation from God (Ex 4[11]), it disqualified a man for the priesthood (Lv 21[18]), but compassion for the blind was enjoined (Lv 19[14]) and offences against them were accursed (Dt 27[18]). Leah probably suffered from some minor form of ophthalmia (Gn 29[17]). In Lv 26[16] ophthalmia accompanies malarial fever. The blinding of Elymas in Ac 13[11] may have been hypnotic, as also possibly the blinding of the Syrian soldiers in 2 K 6[18]. The cases of blindness cured by our Lord are usually mentioned without specific characterization; the two of most interest are that of the man born blind (Jn 9[1]) and that of the man whose recovery was gradual (Mk 8[22]). In both cases the use of saliva (cf Mk 7[33]) may have been intended in part to strengthen their faith; a belief in the efficacy of saliva as a remedy for blindness and other troubles was widespread (cf Tacitus, *Hist.* iv. 8; Pliny, *Nat. Hist.* xxviii. 7). In the latter case we do not know whether the blindness was congenital or not; if it was, the intermediate stage of his recovery, in which he saw men 'like trees, walking,' would be one in which he was still unable properly to interpret and understand what he saw. Paul's blindness (Ac 9[8]) was possibly a temporary

amaurosis, such as may be caused by looking at the sun, in which case the 'scales' which fell from his eyes would not have been material; others, however, would compare them with the 'white films' which 'scaled off from the corners' of Tobit's eyes (To 11[13]). The remedy adopted for Tobit's blindness (fish gall) has a parallel in Pliny (*Nat. Hist.* xxxii. 24). Although the **eye-salve** of Rev 3[18] is metaphorical, it is noteworthy that Laodicea was not only the home of a medical school but also a centre for the manufacture of collyrium, which was used as a medicine for various eye troubles in antiquity. The chemical-bearing mud of the thermal springs in the vicinity may have provided its basis. Paul's **thorn in the flesh** (2 Co 12[7]) has sometimes been identified as trachoma or a similar disease of the eyes (although other suggestions have been made, *e.g.* malaria, epilepsy).

Senility. Here should be mentioned the famous passage in Ec 12, with its poetic description of the failing powers of old age.

Child-birth. The pain of childbearing is mentioned in Gn 3[16] as the penalty for Eve's transgression. Two twin-births are described in some detail: that of Esau and Jacob (Gn 25[22]) and that of Perez and Zerah (Gn 38[29ff.]). The latter has been described as an account of the delivery of locked twins with (in one case) a transverse presentation. Rachel's case (Gn 35[18]) was one of fatal *dystocia*. Phinehas's wife was taken in premature labour brought on by shock and proving fatal (1 S 4[19]). Sarah (Gn 21[2]), Manoah's wife (Jg 13[24]), Hannah (1 S 1[20]), the Shunammite woman (2 K 4[17]) and Elizabeth (Lk 1[57]) all bore their firstborn at a late period. Barrenness was regarded as a Divine judgment (Gn 20[18] 30[2]); fertility was correspondingly looked upon as a token of Divine favour (1 S 2[5], Ps 113[9] 127[3ff.] 128[3]). Miscarriage is invoked as a token of Divine displeasure in Hos 9[14]. The attendants at birth were women (Gn 35[17]), the **midwives** of Gn 38[28], Ex 1[15]. The mother was seated (as is still done among Egyptian fellahin) on the double seat called the birthstool (Ex 1[16]), or else on someone's knees (Gn 30[3] 50[23], Job 3[12]). After childbirth the mother was ceremonially unclean for seven days if the child was a boy, for fourteen if the child was a female. After this she continued in a state of modified 'uncleanness' for thirty-three or sixty-six days, as the case might be, during which period she was not allowed to visit the Temple. (The *lochia* was supposed to last longer in the case of a female child.) Nursing continued for two or three years (Gn 21[8], 1 S 1[23f.], 2 Mac 7[27]). In 1 K 11[20] a child is taken by a relative to wean. Ezk 16[4] describes an infant with undivided umbilical cord, neither washed nor dressed. The skin of newborn infants was rubbed with salt to make it firm.

The legislation for the **menstrual period** and more irregular discharges of the same order is given in Lv 15[19ff.]. A rigid purification was prescribed, including everything touched by the woman, and everyone who touched her or any of those things (see CLEAN AND UNCLEAN). The woman of Mk 5[26] and parallels, who had suffered from twelve years' persistent **haemorrhage** (AV, RV **'issue of blood'**) had probably an uterine fibroid. The statement—watered down by Luke!—that she 'had suffered much under many physicians, and had spent all that she had' suggests that practitioners charged considerable fees and used drastic methods of treatment.

Infantile diseases appear to have been very severe in Palestine in Biblical days as in more recent times. We read of sick children in 2 S 12[15], 1 K 17[17] and elsewhere. Christ healed many children.

Among cases of **unspecified diseases** may be mentioned those of Abijah (1 K 14[1]), Benhadad (2 K 8[7]), Elisha (2 K 13[14]), Joash (2 Ch 24[25]), Lazarus (Jn 11[1]), Dorcas (Ac 9[37]), Epaphroditus (Ph 2[27]), Trophimus (2 Ti 4[20]).

4. *Methods of Treatment.*—The Bible provides little information on this point. We read of washing (2 K 5[10]), anointing with oil (Ja 5[14]), the application of soothing ointment to wounds before binding them (Is 1[6]), the use of oil and wine for wounds (Lk 10[34]), a fig poultice for a boil or carbuncle (Is 38[21]), the stimulation of bodily heat by contact (1 K 1[2] 17[21], 2 K 4[34]). The use of a roller bandage in the treatment of a fracture is mentioned in Ezk 30[21]. **Balm** (particularly **balm of Gilead**) is mentioned in Gn 37[25] 43[11], Jer 8[22] 46[11] 51[8], Ezk 27[17]. This balm may have been of the nature of frankincense or some similar aromatic juice containing benzoin, pleasant in odour and antiseptic in effect. (See BALM.)

There are few examples in the Bible of the taking of medicine by mouth. That it was so taken is implied by such a proverb as 'A cheerful heart is a good medicine' (Pr 17[22]). The manufacture and use of healing drugs are commended in Sir 38[4ff.]. The **'wine mingled with myrrh'** offered to Jesus on the cross (Mk 15[23]) was apparently intended as an alleviation of pain; myrrh is slightly sedative. Paul's advice to Timothy to take wine for his stomach (1 Ti 5[23]) has been mentioned already. **Mandrakes** (*Mandragora officinarum*) were regarded as a stimulant to conception (Gn 30[16]); the fruit was used as a drug. **Mint** (*Mentha silvestris*), **anise** (*Anethum graveolens*), and **cummin** (*Cuminum sativum*) were used as carminatives (Mt 23[23]). The **caper-berry** (*Capparis spinosa*) was regarded as an aphrodisiac (Ec 12[5]). Most of the remedies were dietary in the Jewish as in the Egyptian pharmacopoeia, *e.g.* meal, milk, vinegar, wine, water, almonds, figs, raisins, pomegranates, honey. The **apothecary's** art is mentioned in Ex 30[22ff.] 37[29], Ec 10[1], 2 Ch 16[14], Neh 3[8], Sir 49[1], but in all these passages the reference is really to the perfumer (cf RSV); Sir 38[8], however, speaks of the **pharmacist's** art. **Amulets** are mentioned in Is 3[20], Ezk 13[18ff.].

Hygienic enactments dealing with food, sanitation, and infectious diseases are particularly common in the Levitical code. Herbivorous ruminant animals were permitted for food, and all true fishes; but carnivorous birds were forbidden, and all invertebrates except locusts. The pig, which was forbidden, is an unclean feeder and harbours the trichina worm and a tapeworm which could be passed on to man. The flesh of animals dying of natural causes was prohibited (Dt 14[21]); animals slaughtered for food must be inspected. Fat and blood were forbidden as food. The purity of water supplies were safeguarded. Frequent washing of the body and of clothing was prescribed. The prohibition of garments of mixed linen and woollen materials (Lv 19[19], Dt 22[11]) was helpful in this regard, for such garments cannot be so easily or thoroughly cleansed as those of one material. The sanitary disposal of excreta and sewage (cf Dt 23[12-14]) was a most important hygienic requirement. Isolation was enjoined in the case of infectious diseases. The periodic destruction of leaven (Ex 12[19] 13[7], Dt 16[3]) must have been of service for the maintenance of pure breadstuffs. Whatever may have been the original principle underlying some of these enactments, there is no doubt that their general effect was a remarkably high standard of social hygiene.

5. *Surgery.*—An **awl** for boring the ear is mentioned in Ex 21[6]. The most important surgical operation was **circumcision,** which was originally performed with a flint-knife, even as late as the end of the Bronze Age (Ex 4[25], Jos 5[2f.]). In Israel it was performed on male infants of eight days old; among some of their neighbours at puberty (cf Ishmael, Gn 17[25]). Its original purpose may have been the imposition of a tribal mark; later it was regarded not only as a sign of membership in the Abrahamic covenant-community but also of purification (hence the metaphorical use of the term, as in Lv 26[41], Dt 10[16], Jer 4[4] 6[10] 9[26], Ezk 44[7]). **Eunuchs** were originally excluded from the service of God (Dt 23[1]), perhaps because of the fear of importing heathen rites into Israel; in Is 56[3ff.] the repeal of this exclusion is announced. Eunuchs were important court functionaries under the monarchy, as in Oriental courts generally (1 K 22[9], 2 K 8[6] 9[32] 24[15], Jer 29[2] 34[19] 38[7] 41[16]); later there were eunuchs at the court of the Herods, as elsewhere (Ac 8[27]).

The healing ministry of Jesus was accepted as a heritage by the apostles, as well as His teaching; and the care of the sick continued to be regarded as a primary duty by

the Church of the first Christian centuries, as by the Church of later days. A. W. F. B.—F. F. B.

MEEDA, 1 Es 5[32] (AV).—See MEHIDA.

MEEDDA, 1 Es 5[32] (RV).—See MEHIDA.

MEEKNESS.—Two related Hebrew words (*'ānî* and *'ānāw*) lie behind the occurrences of 'meek' and 'meekness' in the Bible. Their meaning is not 'meek' in the modern English sense of 'mild and self-effacing' but 'abased,' and so 'afflicted,' 'distressed,' 'lowly,' 'poor' (cf the description in Job 24, which well illustrates the historical situation from which, in part, the words took their meaning). Since Yahweh is proclaimed as the champion of the afflicted and the poor they are promised special blessings (Ps 34[4π] 37[11], quoted in Mt 5[5], Is 26[6], etc.); these blessings spring not only from their situation (the primary meaning of *'ānî*), but from the humble, trustful attitude of mind which so often accompanies it (the characteristic meaning of *'ānāw*). Thus to be meek is to submit to God's will at all times, rather than to exhibit a particular virtue (cf Nu 12[3], Sir 45[4], Ja 1[21] where meekness in the modern sense is not intended). This line of OT thought is well summed up in the Magnificat (Lk 1[46π]), and it took concrete form in the godly remnant in Israel who, often despised by the rulers, lived devout lives nourishing their faith on the Scriptures and 'waiting for the consolation of Israel' (Lk 2[25]). In the OT 'meekness' is never used of Yahweh; but it did characterize the Messiah even in his kingly rôle (Zec 9[9]), and so, according to Mt 11[25–30], Jesus claimed this status and character for Himself: a claim which He was enabled to make because of the poverty and the humble trust in God which characterized His earthly life (cf Mt 21[5]), and a claim made subsequently for Him by St. Paul, since the incarnation itself was the supreme example of humility and self-effacement (Ph 2[1–11], cf 2 Co 10[1]). Finally, the risen Christ gives this humility as a gift of the Spirit to His people, along with faith and love and other gifts (1 Co 4[21], Gal 5[23] 6[1], Eph 4[2], Col 3[12]), so that by sharing His meekness in their relations with one another they may also share His glory. Here the non-biblical sense of the Greek word *praüs* ('meek' in the sense of 'tamed and under control') has fused with the Biblical ('humbly obedient to God's will') to produce a description of character which is not a moral excellence so much as a gift of the Spirit; but in this fusion the Biblical element remains dominant. R. S. B.

MEGIDDO (once **Megiddon,** Zec 12[11] AV and RV).—One of the most important of the fortress cities of ancient Canaan. It was captured by Thut-mose III. about 1470 B.C., the spoils being magnificent; it is mentioned several times in the Tell el-Amarna correspondence. Although the king of Megiddo among others was defeated by Joshua (Jos 12[21]) and the city was listed among the possessions of Manasseh (Jos 17[11], 1 Ch 7[29]), it is clear that the Hebrews were not strong enough to drive out the inhabitants until some time after the Conquest (Jg 1[27]). Near the 'waters of Megiddo' the Canaanites under Sisera were defeated by Barak and Deborah (Jg 5[19]). In the time of Solomon the city served as the headquarters for the governor of one of the twelve administrative districts (1 K 4[12]), and by the use of forced labour the king built Megiddo as one of his strong chariot cities (1 K 9[15–19]). Here king Ahaziah died after being wounded by Jehu (2 K 9[27]). Also at Megiddo king Josiah met and was killed by Pharaoh Neco who was en route to join the king of Assyria (2 K 23[29f], 2 Ch 35[22]). Although Josiah is not mentioned by name in Zec 12[11], an ancient tradition holds that the verse alludes to the mourning for this good king 'in the plain of Megiddo.' Not all scholars agree but it is widely held that Armageddon (RV **Har-Magedon,** 'mount Megiddo'; AV, RSV **Armageddon**) in Rev 16[16] is a designation of the region of the final struggle between the forces of good and evil at Megiddo because the place had so often been the scene of historic battles.

The site of Megiddo may now be considered as proved to be *Tell el-Mutesellim* ('Hill of the Governor'), a great mound overlooking the fertile plain of Esdraelon (q.v.) and the pass where the historic route through the Mount Carmel range leads from the seacoast to northern Palestine and Phoenicia. The armies of Thut-mose III., Napoleon and General Allenby made use of the pass at Megiddo; the city is near the border of Jordan and Israel, located in and defended by the latter.

Extensive excavations have been conducted at Megiddo, from 1903–1905 by the Deutsche Orient Gesellschaft and from 1925–1939 by the Oriental Institute of the University of Chicago. The summit of the mound covered about fifteen acres, and the slopes about thirty-five more. Proximity to fertile fields and a good water supply, plus its strategic location, made this a desirable city site for many generations, as demonstrated by deposits of more than seventy feet in some places and the remains of twenty super-imposed cities. Excavations have disclosed that the site was first occupied by settlers as early as 4000 B.C., although it was not until about a millennium later that public buildings were constructed. By the beginning of the Early Bronze Period (*c* 3000 B.C.) temples and city walls were constructed, and other archaeological evidence suggests that at Megiddo, as at other Near Eastern cities of the period, a high degree of civilization had been reached involving world trade with the regions of Egypt, Mesopotamia and Syria. While there is not complete agreement as to the dating of all the levels which follow, it is clear that city remains from the periods of the Canaanites, David, Solomon, Omri and Ahab have been found. The city appears to have been abandoned about 350 B.C. South of the mound is an abundant stream, and in Roman times a fortified post, the *Legio* of Eusebius, the modern *el-Lejjûn,* was established there.

Among the famous discoveries at Megiddo are an impressive water shaft, about 165 feet long, exquisite ivories, Solomon's stables large enough to have housed about 500 horses, an elaborate city gate, a fragment of an Egyptian stela bearing the name of Shishak, a seal containing the name of 'Shema', the servant of Jeroboam,' and a proto-Ionic capital (*c* 10th cent. B.C.). For technical reports of the excavations, consult the publications of the Deutsche Orient Gesellschaft, and of the Oriental Institute of the University of Chicago. For excellent popular surveys, see articles in *BA,* iii, No. 4 (Dec. 1940), iv, No. 1 (Feb. 1941) and xiii, No. 2 (May, 1950).
E. W. G. M.—W. L. R.

MEGILLOTH.—See CANON OF OT, 8.

MEHETABEL.—**1.** The grandfather of Shemaiah, Neh 6[10]. **2.** The wife of Hadar or Hadad, king of Edom, Gn 36[39], 1 Ch 1[50].

MEHIDA.—The eponym of a family of Nethinim (q.v.) who returned with Zerubbabel, Ezr 2[52], Neh 7[54], 1 Es 5[32] (AV **Meeda,** RV **Meedda**).

MEHIR.—A Judahite, 1 Ch 4[11].

MEHOLATHITE.—Gentilic found in 1 S 18[19], 2 S 21[8]; probably an inhabitant of **Abel-meholah** (q.v.).

MEHUJAEL.—See MAHALAEL, **1.**

MEHUMAN.—One of the seven eunuchs in attendance upon king Ahasuerus, Est 1[10].

MEHUNIM, Ezr 2[50] (AV).—See MEUNIM.

MEHUNIMS, 2 Ch 26[7] (AV).—See MAONITES.

ME-JARKON.—A city in Dan, Jos 19[46]; but the site is not yet recovered. It is possibly *Tell Qasîleh.*

MEKONAH, Neh 11[28] (AV).—See MECONAH.

MELATIAH.—A Gibeonite, Neh 3[7].

MELCHI.—**1. 2.** Two ancestors of Jesus (Lk 3[24, 28]).

MELCHIAS.—**1.** 1 Es 9[26] (AV, RV); see MALCHIJAH, **4. 2.** 1 Es 9[32]; see MALCHIJAH, **6. 3.** 1 Es 9[44] (AV, RV); see MALCHIJAH, **9.**

MELCHIEL.—The father of Charmis (Jth 6[15]).

MELCHISHUA, 1 S 14[49] 31[2] (AV).—See MALCHISHUA.

MELCHIZEDEK.—Described as king of Salem and priest of God Most High (*'El 'Elyōn*), who met Abraham on his return from the slaughter of Chedorlaomer and his allies, refreshed him and his servants with bread and wine, blessed him, and received from him a tenth of the spoil he had taken (Gn 14^{18-20}). **Salem** (q.v.) has been variously identified: (1) with the *Shalem* of Gn 33^{18} (AV and RVm), a place a little to the E. of Mt. Gerizim and not far from Shechem; (2) with the *Salim* of Jn 3^{23} in the Jordan Valley S. of Scythopolis; and (3) with *Jerusalem* which is called *Salem* in Ps 76^{2}. the last identification is much the most probable; for though it is implied in Jos $15^{8, 63}$, Jg 19^{10} that Jerusalem was called *Jebus* so long as it was inhabited by the Jebusites (*i.e.* up to the time of David), the name *Jerusalem* really goes back to the 14th cent. B.C., since it appears in the Tell el-Amarna tablets as *Uru-salim*. This view has the support of Josephus (*Ant.* I. x. 2 [180]), and further obtains some slight confirmation from the resemblance of the name of Melchizedek to that of Adonizedek, who was king of Jerusalem in the time of Joshua (Jos 10^{3}), the element *zedek* in each name being probably that of a Canaanite deity.

The historical character of the narrative in which Melchizedek is mentioned has been questioned on the ground of certain improbabilities which it contains; but though the events related have received no corroboration from other sources, the topography is reasonably satisfactory, and some of the names can be paralleled. The theory identifying Amraphel with Hammurabi, however, must be abandoned. For the name and personality of Melchizedek no independent confirmatory evidence has yet been obtained.

In Ps 110^{4}, a psalm probably composed for use at the enthronement of David himself and/or that of his successors, the king is promised an endless priesthood 'after the order of Melchizedek.' The reference to Melchizedek, like the story in Genesis 14, points to a piece of syncretism whereby the pre-Davidic kingship of Jerusalem and the worship of a supreme god under the title of 'El 'Elyōn were linked with Yahwism and the founding of the Davidic dynasty to foster the emergence of Jerusalem as Israel's cultic centre. (See also PSALMS.)

The writer of the Epistle to the Hebrews, identifying Jesus with the Messiah, and asserting His high priesthood, cites the words of Ps 110, and declares that He was 'designated by God a high priest after the order of Melchizedek' (He 5^{10}). He then proceeds to show the superiority of Christ's priesthood over that of the Jewish priests, the descendants of Aaron, and seeks to illustrate it by the superiority of Melchizedek over Abraham, as he gathers it from Gn 14. He explains Melchizedek's name to mean 'king of righteousness,' and his title of 'king of Salem' to mean 'king of peace'; and then, arguing from the silence of the record respecting his parentage, birth, and death, describes him as 'without father or mother or genealogy,' and with 'neither beginning of days nor end of life, but resembling the Son of God,' and affirms him to have been greater than Abraham, since he blessed him ('for it is beyond dispute that the inferior is blessed by the superior') and received from him (and through him from his unborn descendants the Levitical priests) a tithe of his spoils (He 7^{1-10}). In this passage much of the writer's argument is fanciful, the narrative in Genesis being handled in allegorical fashion, and the parallel drawn between our Lord and Melchizedek being largely based on the mere omission, in the OT record, of certain particulars about the latter, which, for the historian's purpose, were obviously irrelevant. But in antiquity such arguments were highly effective. See also PRIEST (IN NT). G. W. W.—H. C.

MELCOM.—See MALCAM.

MELEA.—An ancestor of Jesus (Lk 3^{31}).

MELECH.—**1.** A great-grandson of Jonathan, 1 Ch 8^{35} 9^{41}. **2.** See MOLECH.

MELICU, Neh 12^{14} (AV, RVm).—See MALLUCHI.

MELITA.—AV and RV for **Malta** (q.v.).

MELONS.—*'abaṭṭīḥîm* (the same word as the Arabic *baṭṭīkh*), Nu 11^{5}. Here the water-melon is specially referred to, as it was common in Egypt in ancient times. No fruit is more appreciated in the arid wilderness. Melons flourish in Palestine, especially on the sands S. of Jaffa, and are eaten all over the land. E. W. G. M.

MELZAR.—A proper name (AV), or official title (RV, RSV 'steward') in Dn $1^{11, 16}$—in both cases with the article. It is generally agreed that the word is a loan-word from the Assyrian *maṣṣāru*, 'guardian,' and stands for one who was teacher and warden of the royal wards.

MEM.—Thirteenth letter of Hebrew alphabet, and so used to introduce the thirteenth part of Ps 119, every verse of which begins with this letter.

MEMEROTH, 1 Es 8^{2} (RV).—See MERAIOTH, **1.**

MEMMIUS, QUINTUS.—Named along with Titus Manius (q.v.) as a Roman legate (2 Mac 11^{34}).

MEMORY.—See REMEMBRANCE.

MEMPHIS.—The famous ancient capital of Egypt, during the Old Kingdom, a few miles S. of Cairo. According to tradition, Memphis was built by Menes, who first united the two kingdoms of Upper and Lower Egypt *c* 3000 B.C. Kings and dynasties might make their principal residences in the cities from which they sprang, but until Alexandria was founded as the capital of the Greek dynasty, no Egyptian city, except Thebes, under the New Kingdom equalled Memphis in size and importance. The palaces of most of the early kings (3rd–12th Dynasties) were at or near Memphis, their positions being now marked by the pyramids in which the same kings were buried. The pyramid-field extends on the edge of the desert about 20 miles, from *Dahshûr* on the S. to *Abū Rôsh* on the N., the great pyramids of Gizeh lying 12 miles N. of the central ruins of Memphis.

The Egyptian name *Menfi* (in Hebrew **Noph,** Is 19^{13}, Jer 2^{16} 44^{1} $46^{14, 19}$, Ezk $30^{13, 16}$; once **Moph,** Hos 9^{6}), was apparently taken from that of the palace and pyramid of Pepy I. of the 6th Dynasty, which were built close to the city.

According to Jer 44^{1} some Jews fled to Memphis after the murder of Gedaliah in 586 B.C. At a later period, Tirhakah ruled at Memphis; Neco, Hophra, and the other kings of the 26th Dynasty were buried at their ancestral city Saïs, although their government was centred in Memphis. After the foundation of Alexandria the old capital fell to the second place, but it held a vast population till after the Arab conquest, when it rapidly declined. The growth of Fosṭaṭ and Cairo was accompanied by the destruction of all the stone buildings in Memphis for the sake of the materials, but the necropolis still bears witness to its former magnificence. The bull Apis (Egyp. *Hapi*), whose name is read in LXX at Jer 46^{15} ('Why did Apis [so RSV; AV, RV follow MT] flee from thee?'), was worshipped at Memphis as sacred to Ptah (Hephaestus), the principal god of the city.

F. Ll. G.—R. J. W.

MEMUCAN.—One of the seven princes of Persia who had access to the royal presence, Est $1^{14, 16, 21}$.

MENAHEM, one of the latest kings of Israel, was a usurper, like so many other monarchs in this period. He and **Shallum** (q.v.) planned to seize the throne about the same time (2 K 15^{13f}), Shallum having possession of Samaria, while Menahem commanded the ancient fortress and former capital, Tirzah. War raged for a brief time with unusual ferocity, resulting in the defeat of Shallum. Menahem seems not to have felt secure on the throne, and to have purchased the help of Assyria, by paying a heavy tribute to Tiglath-pileser (called Pul in 2 K 15^{19}). Or we may suppose the Assyrians to have invaded the country because it was so weakened by civil war that it could no longer make effective resistance. The tribute was a thousand talents of silver, and it was raised by a direct tax on the holders of landed property. The assessment of sixty shekels each shows that there were sixty thousand proprietors in Israel at this time.

From the Assyrian sources we learn that this tribute was paid in the year 738 B.C.

It is interesting to note that in the literature of Judaism *Menahem* (='Comforter') is a title of the Messiah.

H. P. S.

MENE MENE TEKEL AND PARSIN (AV, RV **Upharsin**—the 'U' being simply the conjunction).—The words of the handwriting on the wall, which, according to Dn 5[5, 25] appeared mysteriously at Belshazzar's feast, and was successfully read and interpreted by Daniel alone (vv.[25-28]). In v.[25] the words of the inscription ('the writing . . . *inscribed*' RSV, RV [AV **written**]) are given as above, but in the explanation (vv.[26-28]) they are quoted in a divergent form, and no account is taken of the repetition of the first word. The discrepancy can best be accounted for by assuming that the words of the inscription as given in v.[25] already lay in their present form before the author and are not the product of his free invention. It is less satisfactory to emend the text (cf LXX, etc.), by omitting the first '*mene*' and altering '*parsin*' to '*peres*,' for assimilation of text to interpretation is easier to understand than the present divergence. The freedom in the interpretation may be paralleled, *e.g.* in the Habakkuk Commentary of the Dead Sea Scrolls, and represents the author's application of the words, independently of their original meaning, to the situation in the narrative.

It appears most probable that the words are really the names of weights. *Mene* is the Aramaic equivalent of the Hebrew *māneh* (1 K 10[17], Ezr 2[69], Neh 7[71f], Ezk 45[12]) and=mina, equivalent to fifty shekels; *tekel*=shekel; and *parsin* is a plural, or better, dual form 'two parts, halves,' *i.e.* probably 'half-shekels' rather than the half-mina which is often suggested (*peres*, literally=division). Thus the four words read consecutively: 'A mina, a mina, a shekel, and two half-shekels.' An alternative which has been suggested is to treat the first *mene* as meaning 'counted' (cf v.[26]) and to regard the whole phrase as originally an expression of the counting-house: 'Counted: mina, shekel, half-shekel(s).' This might be a familiar, almost proverbial expression, or might represent an actually existing inscription utilized by the narrator of the story.

The inability of the wise men of Babylon to read the inscription (v.[8]) may be rationalized as due to its being in an unfamiliar script; but such rationalization is inappropriate to the atmosphere of the story. The theme of writing on a wall, or of mysterious writing as such, is not unfamiliar in folk-tales; and the emphasis must lie on the inability of all but the hero to read and interpret the words. Here, properly enough, it is Daniel, who elsewhere attributes his skill in interpretation to the power of God (2[20-23, 28]), who is enabled to read and interpret.

Each of the mysterious words is given a meaning suggested by philological affinity. The term for 'mina' is linked to a root meaning 'to number,' and is taken to be a passive participle: 'numbered.' The meaning is elaborated to 'God has numbered the days of your kingdom and brought it to an end.' 'Tekel' (shekel) is linked to a root meaning 'to weigh,' and hence 'you have been weighed in the balance and found wanting' (an idea familiar from Egyptian thought about the dead). 'Peres' (half-shekel) suggests a double play upon words, first connected with a root meaning 'to divide' and second with the name 'Persians' (*Pāras*), and so 'Your kingdom is divided, and given to the Medes and Persians,' which fits in with the author's belief that there were two separate empires following on the Babylonian (cf MEDES, PERSIA). As in the 'prophetic pun' (cf Jer 1[11f], Am 8[1f]) the similarity or identity of sound is seen as meaningful; popular etymology works on the same principle of the identification of like words. Attempts at relating the words to particular rulers (*e.g.* Nebuchadnezzar, Evil-merodach [or Nabonidus], and Belshazzar) are ingenious, but there is no clear basis for such exegesis in the text.

G. H. B.—P. R. A.

MENELAUS.—Brother of Simon the Benjamite (2 Mac 3[4]), or, according to Josephus (*Ant.* XII. v. 1 [238 f]), a younger brother of Jason and Onias. He purchased the office of high priest from Antiochus Epiphanes for the sum of 660 talents (*c* 172 B.C.), thereby causing the deposition of Jason, who had obtained the office by similar corrupt means. Being unable, through lack of funds, to pay the required sum, he was cited to appear before the king, but, finding the latter absent on warfare, he plundered the Temple of sacred vessels and thereby found means to silence his enemies. Having secured the death of Onias III., who threatened to divulge the sacrilege (2 Mac 4[27-34]), he became so unpopular that Jason marched against him to recover the office he had lost (5[5-10]). After this attempt of Jason, which ended in failure, Menelaus is lost to sight for some years, but finally suffered death at the hands of Antiochus Eupator (*c* 163 B.C.).

T. A. M.

MENESTHEUS.—The father of Apollonius (2 Mac 4[21]).

MENI.—A deity named with **Gad** in Is 65[11]: 'Ye that . . . prepare a table for Gad (RV, RSV 'Fortune') and that fill up mingled wine for Meni (RV, RSV 'Destiny').' Gad is *Fortune* and Meni *Destiny*. The name has been correlated with the Arabic *Manīyyat*, and with a supposed Babylonian god *Manu*. *Mānāh* in Hebrew means 'to number' (cf AV 'unto that number'), and so 'to apportion.' See GAD.

W. F. C.

MENNA.—An ancestor of Jesus (Lk 3[31]).

MENUCHAH, Jg 20[43] (AVm).—See NOHAH, **1.**

MENUHAH, Jg 20[43] (RVm).—See NOHAH, **1.**

MENUHOTH.—See MANAHATHITES.

MEONENIM.—See DIVINER'S OAK.

MEONOTHAI.—Son of Othniel, 1 Ch 4[13f].

MEPHAATH.—A city of Reuben, Jos 13[18]; assigned to the Levites, 21[37], 1 Ch 6[79]; a Moabite city in Jer 48[21]. In the 4th cent. A.D. it is said to have been the station of a Roman garrison. It is perhaps modern *Tell el-Jâwah*, near *Kh. Nefa'a*, which preserves the ancient name.

MEPHIBOSHETH—1. A son of Jonathan (2 S 4[4]). The original form of the name, given in 1 Ch 8[34] 9[40], was **Merib-baal**, 'Baal defends (my) case'; Mephibosheth is an intentional corruption of this, with *bōsheth* ('shame') substituted for 'Baal.'

Mephibosheth was five years old when Saul fell on Mt. Gilboa, and in the flight of the royal household after the battle he was so seriously injured by a fall as to become lame in both feet (2 S 4[4]). When David succeeded to the throne, he inquired if any one was left of Saul's house, that he might show him kindness for the sake of Jonathan (2 S 9[1ff]). He was informed by **Ziba**, who had been Saul's steward, that Mephibosheth was in Lo-debar, E. of the Jordan. David then restored to Mephibosheth all the estates of Saul, Ziba became his steward, and Mephibosheth himself was maintained as a permanent guest at David's table (2 S 9[13]). Mephibosheth's lameness prevented him from becoming a real rival of David, which no doubt further inclined the latter to mercy. When David handed over Saul's surviving descendants to the Gibeonites for execution (2 S 21[7ff]), he spared Mephibosheth because of his oath to Jonathan.

When David fled from Jerusalem after Absalom's rebellion, Ziba met him on the Mount of Olives with provisions. He also stated that his master had remained in Jerusalem in hope of obtaining the kingdom of Saul. Apparently believing him, David said 'Behold, all that belonged to Mephibosheth is now yours' (2 S 16[4]). On David's return Mephibosheth came out to meet him, and declared that Ziba had accused him falsely, taking advantage of his lameness. David seems to have doubted the truthfulness of Mephibosheth or did not wish to alienate Ziba, who had also been faithful, and divided the land of Saul between the two. Mephibosheth expressed his willingness that Ziba should have all, 'since my lord the king has come safely home' (2 S 19[30]).

From 2 S 9[12] we learn that Mephibosheth had a son, Mica, whose descendants are listed in 1 Ch 8[35ff] 9[41ff].

2. One of the sons of Saul's concubine Rizpah, slain by the Gibeonites (2 S 21[8]). W. F. B.—J. Br.

MERAB.—The elder daughter of Saul, promised to the slayer of Goliath (1 S 17[25]), and then to David personally as a reward for prowess against the Philistines (1 S 18[17]), but given as wife to Adriel the Meholathite. In 2 S 21[8] her sons are said to have been given over to satisfy the Gibeonites (AV, RV here read 'Michal,' with Heb.; RSV corrects to 'Merab,' with 2 Heb. MSS and LXX[L]).

MERAIAH.—The head of a priestly house, Neh 12[12], where the name is probably a corruption of **Amariah** (so Syriac and LXX[L]).

MERAIOTH.—**1.** Son of Ahitub and father of Zadok, 1 Ch 9[11], Neh 11[11]. **2.** A Levite, 1 Ch 6[6f], Ezr 7[3], 2 Es 1[2] (AV, RV **Marimoth**); called **Memeroth** in RV in 1 Es 8[2] (AV **Meremoth**; RSV omits with LXX[B]). **3.** A priestly house in the days of Joiakim, Neh 12[15]; called **Meremoth** in v.[3].

MERAN, Bar 3[23] (AV).—See MERRAN.

MERARI, MERARITES.—**1.** The third son of Levi, to whom a division of the Levites traced their descent (Gn 46[11], Ex 6[16], Nu 3[17], 1 Ch 6[1, 16] 23[6]). The title 'Merarites' is found only in Nu 26[57]; elsewhere they are called 'sons of Merari' (Ex 6[19], Nu 3[20] 4[29, 33, 42, 45] 7[8] 10[17], Jos 21[7, 34, 49], 1 Ch 6[19, 29, 44, 63, 77] 9[14] 15[6, 17] 23[21] 24[27] 26[19], 2 Ch 29[12], Ezr 8[19] [cf HANANIAH, **11**]). They were subdivided into two groups, the **Mahlites** and the **Mushites** (Nu 3[33] 26[58]), each being traced to a 'son' of Merari (Ex 6[19], Nu 3[20], 1 Ch 6[19, 29, 47] 23[21]). From these families fragments of genealogies remain, some branches being traced through the daughters of Mahli (see 1 Ch 23[22]).

Very little is related of the Merarites after the Exile. Certain Merarites are mentioned in 1 Ch 9[14, 16-18] = Neh 11[15, 17-19] as dwelling in Jerusalem immediately after the Return, and certain others as accompanying Ezra to the city (Ezr 8[18f]). But Peter and the Chronicler introduce the family into the earlier history. (1) During the desert wanderings the Merarites were on the north side of the Tent (Nu 3[35]); their duty was to carry the less sacred parts of it, the 'boards' (or rather frames), pegs, cords, etc. (3[36f] 4[31f] 10[17]), for which they were given four wagons and eight oxen (7[8]); and they were superintended by Ithamar, the youngest son of Aaron (4[33]). (2) After the settlement in Palestine, twelve cities were assigned to them (Jos 21[7, 34-40] = 1 Ch 6[63, 77-81]). (3) In David's reign the Chronicler relates that the Temple music was superintended partly by Ethan, or Jeduthun, a Merarite, and his family (1 Ch 6[44-47] 16[41f] 25[1, 3, 6, 9, 11, 15, 19, 21f]; and see 15[6, 17-19]). David divided the Levites into courses 'according to the sons of Levi' (23[6]; Merarites, vv.[21-23] 24[26-30]), and particular offices of certain Merarites are detailed in 26[10-13, 16-19]. (4) They took part in the cleansing of the Temple under Hezekiah (2 Ch 29[12, 14]). Cf also KOHATH.

2. The father of Judith (Jth 8[1] 16[7]). A. H. McN.

MERATHAIM.—A symbolic name for Babylon, Jer 50[21]. A play on words, meaning 'double rebellion,' with an allusion to Akkadian *marrâtim*, the region in S. Babylonia near the Persian Gulf.

MERCHANDISE, MERCHANT.—See MARKET, TRADE AND COMMERCE.

MERCHANTMAN.—This English word is now used only of a trading vessel. In AV it means 'merchant, tradesman': it occurs in Gn 37[28] (so RV, RSV 'trader'), I K 10[15] (RV 'chapman,' RSV 'trader'), Mt 13[45] (RV 'man that is a merchant,' RSV 'merchant'). In each case the earliest editions of AV have two separate words.

MERCURY.—See HERMES.

MERCY, MERCIFUL.—Mercy (French *merci*) is traced, through ecclesiastical Latin, to *merces* (reward); it seems to have got its meaning from the exclamation of the alms-receiver, 'Merci!', *i.e.* 'Reward to you (in heaven)!' 'May God reward you!'—the expression passing from the acknowledgment made to the bounty given, and then to the spirit prompting it. Thus **mercy** is by derivation allied to *merit, merchant, mercenary, amerce*.

1. In the OT, noun and adjective stood in AV for two different Hebrew roots, but in RSV they are used comparatively rarely for either. (1) The root *rāḥam* occurs as noun, adjective, or verb ('have mercy,' 'show mercy') with the translation 'mercy' over sixty times. The noun means primarily 'bowels' (see Gn 43[30], 1 K 3[26]), then 'compassion,' 'yearning.' In five cases the word 'pity' is used, and in seventeen 'compassion.' In RSV rather less than half of all these remain as 'mercy,' and 'pity,' 'compassion' are the regular renderings. This is as it should be, because the root is used mostly of God's compassion and pity for weak and suffering humanity. (2) *Ḥesedh* is a familiar word, and in AV it was rendered forty-three times by 'kindness' (often on the part of men), and thirty times by 'loving-kindness' (always of God, and mostly in Psalms), by 'mercy' some 150 times, with other occasional renderings. RV generally substituted 'loving-kindness,' which was Miles Coverdale's word, but in RSV almost everywhere we find 'steadfast love' (of God) and occasionally 'loyalty,' 'kindness' (of men). The translation 'mercy' is comparatively rare. This change is good, because the Hebrew *ḥesedh* has a basic meaning of 'strength' and it comes to be used for the proper attitude which each party to a covenant should maintain towards the other. When it is used of God's attitude to the people of His covenant, the word means 'steadfast love.' G. A. Smith's rendering was 'leal-love.' This is because of God's determined and persistent love for a wayward people. In LXX the usual rendering is *eleos*, and in the Vulgate it is *misericordia*. This is the origin of the 'mercy,' 'kindness' of AV, and the translation arose because in practice God had to exercise continual mercy and forgiveness towards this people Israel. The word *ḥesedh* is associated frequently with 'covenant,' but more often still with 'truth,' so that in AV we get the phrase 'mercy and truth.' It is better to render this 'steadfast love and reliability,' or 'troth and truth,' because both words are used to describe God's faithfulness and loyalty in the Covenant he has made with Israel. (3) A third root (*ḥānan*), the noun of which is translated 'grace' (q.v.) and its adjective 'gracious' appears in the verb sixteen times as 'be gracious' or the like, and sixteen times as 'have' or 'show mercy' in AV (Dt 7[2], Ps 4[1] etc.), thrice as 'pity.' This distribution is maintained in RSV. The main difference between this root and (2) is that this root is used of good favour where there is no covenant obligation, whereas *ḥesedh* becomes essentially a covenant-word, and is used in cases where there is a bond between the two parties. The LXX rendering of *ḥanan* is *charis*, which is the NT Greek word for 'grace.' But the NT 'grace' is a combination of (2) and (3). It is the 'steadfast love' of the covenant with the 'middle wall of partition' broken down, so that God's saving love is available for all mankind, combined with the 'good favour' which He persistently shows to all the undeserving. See GRACE.

2. Mercy in NT plays a subordinate part to that of love (q.v.). It represents a pair of Greek synonyms, both chiefly, but not exclusively, applied (in Scripture) to God. (*a*) *eleos*, used in LXX in its noun-form to represent the Hebrew *ḥesedh*, but the corresponding adjective and verb stand more often for (3) of the Hebrew roots indicated above, and less frequently for (1). Thus this word is retained in RSV in all quotations from OT (Mt 9[13] etc.) where the Hebrew has *ḥesedh* and the RSV has changed in the OT to 'steadfast love.' Apart from such cases, the NT 'mercy' does actually mean 'mercy, compassion, pity' and the like. (*b*) *oiktirmos* is used in LXX chiefly to represent (1) and this usage is carried over into NT. In AV the regular renderings were 'mercy, compassion,' but in RSV some of these have been replaced by 'love.' G. G. F.—N. H. S.

MERCY SEAT.—See TABERNACLE, 7 (*b*).

MERED.—A Judahite, 1 Ch 4[17] (AV and RV, also v.[18]).

MEREMOTH.—**1.** The head of the 7th course of priests, Ezr 8[33], Neh 3[4, 21] 10[5], 1 Es 8[62] (AV, RV **Marmoth**). **2.** One of the sons of Bani who had married a foreign wife, Ezr 10[36]; called **Carabasion** in 1 Es 9[34]. **3.** A priestly house, Neh 12[3]; called **Meraioth** in v.[15]. **4.** 1 Es 8[2] (AV); see MERAIOTH, **1.**

MERES.—One of the seven princes and counsellors of Ahasuerus, Est 1[14].

MERIBAH.—See MASSAH AND MERIBAH.

MERIBAH-KADESH.—AV or AVm for **Meribath-kadesh** (q.v.).

MERIBAH OF KADESH.—RV for **Meribath-kadesh** (q.v.) in Dt 32[51].

MERIBATH-KADESH.—See MASSAH AND MERIBAH.

MERI(B)BAAL.—See MEPHIBOSHETH.

MERIBOTH-KADESH.—RV for **Meribath-kadesh** (q.v.) in Ezk 47[19].

MERODACH.—The name of the city-god of Babylon, worshipped, after the establishment of Babylon as capital of the Babylonian empire, as chief god of Babylonia. The Babylonian name was *Marduk*, older form *Maruduk*. He gradually absorbed the attributes of other gods once supreme through the influence of their city seats of worship, particularly Enlil the old Bēl, or lord supreme of Nippur. Hence he was in later times the Bēl of Babylonia. Merodach is a Hebraized form occurring only in Jer 50[2], but the Bēl of the Apocryphal Bēl and the Dragon and of Is 46[1] and Jer 51[44] is the same deity. Nebuchadrezzar was specially devoted to his worship, but the Assyrians reverenced him no less; and even Cyrus, on his conquest of Babylon, treated him with the deepest respect. The name occurs in many Babylonian proper names, and appears in the Bible in *Merodach-baladan* and *Evil-merodach*, and probably in *Mordecai*. C. H. W. J.

MERODACH-BALADAN.—A Babylonian usurper, mentioned in Is 39[1] and in 2 K 20[12] (AV and RV **Berodach-baladan**, following the mis-spelling of MT). In Assyrian the name is *Marduk-aplā-idin*, and means 'Marduk has given a son.' For his history see ASSYRIA AND BABYLONIA, II. 2 (*e*).

MEROM, THE WATERS OF.—The scene of Joshua's victory over the northern kings, after which he is said to have destroyed Hazor (Jos 11[5ff]). The Waters of Merom have generally been identified with Lake Huleh in the Upper Jordan Valley, and the proximity of Hazor might seem to corroborate this location. There is, however, a strong trend of modern opinion in favour of the village of *Meirûn* near *Ṣafed* in Upper Galilee. Here there is no considerable *tell*, though Late Bronze, Iron Age, Hellenistic, and Roman sherds attest a history which corresponds with that of Merom, which is mentioned for the first time in the conquest-lists of Thothmes III. (15th cent.). Y. Aharoni, in an archaeological survey of Galilee, has noticed the encroachment of settlement in the Iron Age from Lower Galilee on the more fertile plateau of Upper Galilee, which was more thickly populated in the Canaanite period. He regards the Battle of the Waters of Merom as the last effort of the king of Hazor and his allies from the Plain of Esdraelon and the Plain of Acco to resist Israelite penetration. The strategic situation of *Meirûn*, or the somewhat more northerly *Marûm er-Râs*, on the plateau at the head of the *Wâdī el-ʿAmûd*, which gives access to Upper Galilee from the Plain of Chinnereth, is a strong argument for this location of the Waters of Merom. W. E.—**J. Gr.**

MERONOTHITE.—A designation applied in the OT to two men: **1.** Jehdeiah, 1 Ch 27[30]. **2.** Jadon, Neh 3[7]. Meronoth was apparently close to Gibeon and Mizpah (cf Neh 3[7]), but it cannot be identified.

MEROZ.—A place which the angel of Yahweh bids men curse, together with its inhabitants, because they did not come to fight Yahweh's battle against Sisera. It is mentioned only in Jg 5[23], and probably owes its mention merely to the fact that it 'lay in the line of Sisera's flight' (Moore).

MERRAN.—Bar 3[23] only (AV **Meran**). Probably *d* was misread *r* in the Semitic original, and the name = **Midian** (cf Gn 37[28], Hab 3[3, 7]).

MERUTH, 1 Es 5[24] (AV).—See AMARIAH, **7,** IMMER, **1.**

MESALOTH.—See ARBELA.

MESHA.—**1.** Son of Shaharaim, a Benjamite, 1 Ch 8[9]. **2.** Firstborn of Caleb (so AV, RV), 1 Ch 2[42] (RSV **Mareshah,** following Gr.). **3.** See next article.

MESHA.—Place name in Gn 10[30], marking one limit of the *habitat* of the sons of Joktan, brother of Peleg and son of Eber of the lineage of Shem. The other limit was **Sephar** (q.v.), the mountain of the E. In the present text the sons of Joktan include the peoples of Yemen. But there is reason to believe that the text has been expanded in 10[26–29] and that the Yahwistic source did not extend the Joktanids so far. In P Sheba is counted among the sons of Ham (10[7]) and that may have been J's view too. The analogous formulation in Gn 25[18] (J) 'from Havilah to Shur' thinks of the remoter point before the nearer. Mesha is thus probably the farther limit of the sons of Joktan. Since the name can be vocalized **Massa** (q.v.), which is linked with Tema (q.v.) in Gn 25[14–15], it is quite possible that this was what the original writer intended. It would then lie in the *Jauf* area of N. Arabia. After the expansion of text this no longer fitted and brought about the different vocalization. E. G. K.

MESHA.—A king of Moab in the 9th cent. B.C. He was a tributary of Ahab of Israel, but rebelled at the death of the latter. Jehoram mobilized for war and Jehoshaphat of Judah joined in the campaign, as did the king of Edom. The prophet Elisha was with the Israelite army. The siege of Kir-hareseth (*el-Kerak*) could not be prosecuted to a successful conclusion (2 K 3). The whole situation gained new vividness through the accidental discovery on the surface of the ground at *Dhibân* (ruined site of Dibon) of a stela of King Mesha himself. It was found by a German missionary named Klein in 1868. Unhappily a rivalry ensued to get possession of the stone, and this led the Arabs to break it up and sell the pieces. A squeeze made before this happened has made possible the restoration of some of the lacunae, and the patched together monument is in the Louvre. Strange to say there was debate about whether the inscription was not a forgery. The stela was dedicated to the Moabite God Chemosh and was evidently raised up after Mesha had successfully maintained his independence. It records that Omri had subjected the Medeba territory. Ataroth, still farther S., had apparently been held by the Israelite tribe of Gad in the face of the rise of Moabite power under Mesha's father Chemosh-melech. That king had succeeded in pushing as far as Medeba. Mesha calls himself the Dibonite (cf how the Edomite king list mentions the places where the kings came from, Gn 36[31–39]). His stela was erected at a new high-place at the city he built—the otherwise unknown *Ḳrḥh*. The stone, therefore, must have later been brought to Dibon for reasons unknown. Israelite prisoners had to hew out the cisterns for the new town. Mesha carried on a war of extermination against some Israelite cities, such as Ataroth, Nebo and no doubt Jahaz, in the case of which this is not explicitly said. The text is translated in *ANET*, pp. 320 f. E. G. K.

MESHACH.—The name **Mishael**, by which one of Daniel's three companions, one of the children of Judah, was originally called, was changed by the prince of the eunuchs into *Meshach*, Dn 1[7] 2[49] 3[12ff]. Such changes of name were not uncommon; they marked the fact that a new state of life had now begun. The meaning of the name is quite uncertain.

MESHECH.—**1.** The name of a people of Asia Minor mentioned after **Tubal** as among the sons of Japheth, Gn 10[2], 1 Ch 1[5], These two peoples, possibly kindred,

appear almost always in conjunction in OT; so even in Is 66[19], where read 'Meshech' instead of 'that draw the bow' (the word for 'bow' being a supplementary gloss). In Ps 120[5] Meshech and **Kedar** appear as types of barbarous and warlike people, just as Meshech and Tubal are represented in Ezk 32[26] 38[2] 39[1]. In the Assyrian annals the *Tabali* and *Mushki*, who are undoubtedly the same as Tubal and Meshech, are found again together (as fierce opponents of Assyria in the 12th cent. B.C.), the former lying to the NE. of Cilicia and the latter eastward between them and the Euphrates. The *Tibareni* and *Moschi* of the classical writers must stand for the same two peoples. Ezk 27[13] names them as trading in slaves and articles of bronze. **2.** In 1 Ch 1[17] 'Meshech' is written by mistake for '**Mash**' (cf Gn 10[23]).

MESHELEMIAH.—The eponym of a family of Korahite doorkeepers, 1 Ch 9[21] 26[1f, 9]; called **Shelemiah** in 26[14], **Shallum** in 9[17, 19, 31], and **Meshullam** in Neh 12[25].

MESHEZABEL.—**1.** One of those who helped to repair the wall, Neh 3[4]. **2.** One of those who sealed the covenant, Neh 10[21]. **3.** The father of Pethahiah, Neh 11[24].

MESHILLEMITH.—A priest, 1 Ch 9[12]; called **Meshillemoth** in Neh 11[13].

MESHILLEMOTH.—**1.** An Ephraimite, 2 Ch 28[12]. **2.** See MESHILLEMITH.

MESHOBAB.—A Simeonite, 1 Ch 4[34].

MESHULLAM.—**1. 2.** Three Benjamites, 1 Ch 8[17] 9[7f]. **4.** A Gadite, 1 Ch 5[13]. **5.** The grandfather of Shaphan, 2 K 22[3]. **6.** The father of Hilkiah, 1 Ch 9[11], Neh 11[11]. **7.** Another priest of the same family, 1 Ch 9[12]. **8.** A Kohathite, 2 Ch 34[12]. **9.** A son of Zerubbabel, 1 Ch 3[19]. **10.** One of the 'chief men' whose services were enlisted by Ezra to procure Levites, Ezr 8[16], I Es 8[44] (AV **Mosollamon**, RV **Mosollamus**). **11.** A Levite who opposed Ezra's proceedings in connexion with the foreign marriages, Ezr 10[15], 1 Es 9[14] (AV **Mosollam**, RV **Mosollamus**). **12.** One of those who had married foreign wives, Ezr 10[29], 1 Es 9[30] (AV, RV **Olamus**). **13.** Son of Berechiah, one of those who helped to repair the walls of Jerusalem, Neh 3[4, 30]. His daughter was married to Tobiah, To 6[18]. **14.** Son of Besodeiah. He helped to repair the old gate, Neh 3[6]. **15.** One of the company that stood at Ezra's left hand during the reading of the Law, Neh 8[4]. **16. 17.** A priest and a chief of the people who sealed the covenant, Neh 10[7, 20]. **18.** One of the princes of Judah who marched in procession at the dedication of the walls of Jerusalem, Neh 12[33]. **19. 20. 21.** Two heads of priestly houses and a porter in the time of the high priest Joiakim, Neh 12[25], called **Meshelemiah** (q.v.) in 1 Ch 9[21] etc.

MESHULLEMETH.—Wife of king Manasseh and mother of Amon, 2 K 21[19].

MESOBAITE, 1 Ch 11[47] (AV).—See MEZOBAITE.

MESOPOTAMIA = **Aram-naharaim** (see ARAM).

MESS.—A mess is any dish of food *sent* to the table (Lat. *missum*, Old Fr. *mes*). The word occurs in AV and RV in Gn 43[34] (RSV 'portion'), 2 S 11[8] (RSV 'present'), Sir 30[18] (RSV 'offerings'), and RV introduces it at He 12[16] (AV 'morsel of meat,' RSV 'single meal').

MESSIAH.—**1. General.**—The word Messiah (sometimes Messias, following the Hellenized transcription) represents the Hebrew *māshîaḥ*, or *māshûaḥ* 'anointed,' from the verb *māshaḥ* 'anoint.' It is exactly rendered by the Greek *christos* 'anointed.'

The etymological background of the term is thus quite simple. Considerable terminological difficulties appear, however, when we try to relate ourselves to modern English usage of 'Messiah' and still more of the corresponding adjective 'Messianic.' In modern usage *futurity* or *expectation* is commonly taken to be essential to the meaning of 'Messiah' or 'Messianic.' Thus in the shorter *OED* the only definition given speaks of 'a promised deliverer of the Jewish nation, and hence Jesus of Nazareth as such deliverer.' Hence the word 'Messianic' is sometimes loosely extended to apply to any expectations of a golden age or realm of perfection lying in the future. In numerous books on the subject, when the question is raised 'What truly Messianic passages are there in the OT?', this is tacitly or explicitly taken to mean 'Which passages in the OT refer to a future and expected deliverer, or even to Jesus of Nazareth, or to an age of final plenty and welfare such as such a deliverer might be expected to initiate?'

This modern usage is, however, somewhat misleading. The concept of the *māshîaḥ* in Israel begins not with persons expected in the near or distant future but with persons now living. Saul was a *māshîaḥ* and was recognized by David as such. This article hopes to show how the expectation of the future *māshîaḥ* arose from the acknowledgement of the present *māshîaḥ*. But the conceptions of the first period, when the *māshîaḥ* is a person now living, are determinative and formative in a high degree for the later time. To define 'Messiah' as essentially futurist in sense is therefore to make a damaging split in what is one stream of thought. It means the peculiar assumption that Saul or David was called *māshîaḥ* but that they were not Messiahs or Messianic. The English versions of the Bible often rather obscure the linguistic facts here by using 'the anointed' where living persons are concerned. Justified as this may be in many ways, it is unfortunate in its disconnecting 'anointed' from 'Messiah,' when these are in fact the same word in Hebrew.

This is not to say that we can easily and conveniently reverse modern usage and say 'Messiah' or 'Messianic' without explanation every time the Hebrew says *māshîaḥ*. What is important is that an inadequate modern usage should not be allowed to impose a false delimitation or narrowing of the scope of the subject. The scope of the subject here will be taken as the whole range of meaning and association of Hebrew *māshîaḥ*, Greek *christos*. Where the terms 'Messiah' and 'Messianic' are used, an attempt will be made to make clear their meaning in the context concerned, if there is a danger of misunderstanding. For further discussion of this terminological question see Mowinckel, *He That Cometh*, ch. 1; Bentzen, *King and Messiah*, pp. 35–38 ('The King as the Present Messiah'); Anderson, in H. H. Rowley (ed.), *The O.T. and Modern Study*, p. 305. In general, the discussion about the sense of the terms has been so varied and so indecisive in recent years that it seems we cannot any longer take any sense for granted as axiomatic or as justified by tradition.

2. Oriental kingship.—We shall see that for the study of Israelite Messianism we must begin with the Israelite kingship. It is therefore convenient at this point to make a brief survey of kingship in the Ancient Near East. For this there is plentiful evidence from Egypt and Mesopotamia, while for Syria/Palestine the most important evidence is that now available from Ugarit. In addition it may be said that the whole field of kingship and its connexion with many aspects of religion has in recent years attracted much attention in anthropological study for many areas of the world (for a recent collection of essays over a wide range, see *La Regalità Sacra—The Sacral Kingship*, Leiden, 1959).

In general, we may say that the mythology embraces the world of the gods and the structure and needs of human society. The king is to some considerable extent the centre and pivot of human society, and is thus specially related to the world of the gods. He may have a superhuman descent or be born by a divine birth; or be adopted as son, the chosen or favourite of a god. Kingship as an institution is part of the divine order for the world, and may be traced back, as in the Sumerian King List, to the primeval times. On the other side the needs of society and their satisfaction are related by the gods to the king—order and justice, the defence of the oppressed; fertility and prosperity, victory in war and the establishment of peace. The king is thus a focus of the ordered and productive world in contrast to the chaos which constantly threatens it.

It is clear that all this is not mere theory, but embraces

and informs the actual processes of administration, justice, and warfare—what we would call political and economic matters. But on the other hand the mythology has its expression in ritual, for ritual is the re-enaction of the primal cosmic events in which the divinely-given order is established. Ritual involves such elements as the combat against hostile and chaotic powers, expiation of evil and dangerous elements, the promotion of fertility. The king as the focus of society's relation to the gods may have a priestly, dramatic, or representative part in such ritual. Recent study has had a special interest in the rituals of the New Year's Days in this connexion, because with the annual cycle of life in the great agricultural civilizations they seemed not unnaturally to have a specially important part in the ideas of re-establishment of the primal order and reintegration of society with the divine harmony. Within such types of thinking it is clear that salvation and well-being for a people would be closely related to their king; and this fact has led some scholars to suggest that the term 'Messianism' could be used without impropriety of this ideology or form of thought.

What has been said above is a considerable generalization, which seems broadly true for the mythological cultures of the Ancient Near East, but cannot be applied in an identical way in every situation. A notable contrast has been drawn in particular between Egypt and Mesopotamia. Although both are mythologically moulded cultures in which there is a certain similarity in the centrality of kingship, Egyptian thought differs from Mesopotamian in its underlying structure and not only in details within a common structure; and there are correspondingly great differences in the position of the king. It is in fact only by isolating certain features of kingship from the relevant culture as a whole that one can arrive at a common 'pattern' of kingship which can then be supposed to prevail in the same way in different cultural centres. In particular, certain important differences between Egypt and Mesopotamia have been abundantly demonstrated by recent study (see especially H. Frankfort, *Kingship and the Gods*). In Egypt the king was a god, the embodiment of Horus; he was, in fact, Horus. He is one with all gods. The mode of his union with deity includes both what we would call metaphysical and physical aspects. He is not only the symbol but the embodiment of the *ma'at* or divine right, justice, order, and harmony, by which the land, and indeed the world, is held in fruitfulness, peace, and life. Pharaoh was not a man at all, but totally belonged to the world of the gods. In Mesopotamia on the other hand the king was a man, but one greater than other men because he was the chosen of the gods, their favourite, one whom they had fashioned from the womb and upon whom they had laid the burden of government. Where the king is a 'son' of a god, this is meant in the sense mainly of choice, favouritism, adoption. Only at certain periods and in certain centres is the king's name preceded by the determinative indicating 'deity.' These cases are probably to be understood not as an innate divinity inhering in the king but rather as the occasional deification of him, *i.e.* the taking up of the human king into a closer association with the company of the gods—in Frankfort's opinion, mainly when a goddess chooses the king to be her bridegroom (*op. cit.* pp. 295–312). Although Mesopotamian government begins with the city-state, its theoretical scope becomes wider, and the kings call themselves kings of 'the land' or of 'the universe.' The institution of kingship on the other hand is traced back to the earliest times in the Sumerian King List, which begins 'when kingship was lowered from heaven.'

For Ugarit in northern Syria we also have good evidence of a kingship closely integrated with myth and religion. 'First and foremost in the society of ancient Canaan as exemplified at Ugarit stood the king in all the strength of his unique sacral status, the son of former rulers and the father of rulers to come, who was celebrated in the Ugaritic saga as suckled by the goddesses Atherat and Anat. . . . In the more primitive age to which the Krt and Aqht texts refer the king, realizing in his person the sacramental union of his people and their god, personally represented the people as their priest and mediated the divine revelation' (J. Gray, *The Legacy of Canaan*, 1957, p. 160). Essential to the kingly office is the administration of justice, in particular the vindication of the widow, the orphan, and the oppressed. But kingship does not maintain itself on the formal grounds of the institution; it requires the kingly power to be manifested in the splendour of the palace, the sexual vigour of the king, his begetting of sons to follow him and maintain his name.

This Ugaritic evidence is of special value to us for our purpose because of its nearness to Palestine. But it would be dangerous to assume that the situation of Late Bronze Ugarit was uniformly reproduced all over Syria/Palestine. Ugarit's position in the far north, near to Hurrian and other non-Semitic cultures, may have developed the older Semitic tribal inheritance in a special direction. It may, however, be taken as very probable that, although thought and practice were not uniform, a form of kingship closely integrated with myth and religion was widespread in the settled culture of Canaan during the first centuries of the Israelite settlement.

3. Israelite kingship.—(*a*) *The historical traditions.*—It was clearly realized in Israel that the monarchy, associated as it was with the will of God, did not go back into primeval times but had a historical origin of which a fairly good tradition was preserved; and that one of the most formative times in the Divine activity towards Israel, namely the story of the patriarchs, the Exodus, the giving of the Law, and the conquest of Palestine, had all been before the institution of kingship began, although it was well known to have existed among other peoples. Cf occasional remarks like Gn 36^{31}, Jg 21^{25}.

The story of the beginnings and the formative period of the kingdom is given in the books of Samuel. It has long been noticed that different estimates of the kingdom are represented in the different traditions brought together here. In some it is represented as a rejection of God by the people that they have demanded a king, so 1 S 8. But even in these passages God agrees to the demand which He has called a rejection of Himself, and the king is chosen and installed in a sacral act. In other passages the king is seen as foreknown and chosen by God. This aspect of the predestination of the kingship is hinted at frequently during the story of Samuel himself; *e.g.* the song of Hannah is related to the 'anointed one,' 1 S 2^{10}, and the future fall of the house of Eli is prophesied not because of its relevance to Samuel but because of the future priesthood of Zadok which shall be related to the anointed of the Lord, *i.e.* to David, 1 S 2^{35}. In their present composite form, which must have been attained while the Judaean kingdom was still in being, the story somewhat paradoxically combines the idea of a Divine purpose and foreordination with the element of human rebellion in the making of the kingdom.

The first kings, Saul and David, are initiated into kingship through anointing by a sacred official, and this remained the practice afterwards (Saul—1 S 10^{1}; David—1 S $16^{1, 12-13}$; Solomon—1 K 1^{45}). The anointing may probably be taken as a ritual representation of life, health, and plenty as concentrated in the person anointed. It cannot be certainly said what place anointing had in Israelite religious practice before the first kings. We hear of the anointing of a *maṣṣēbhāh* or standing stone by Jacob, Gn 31^{13}, probably an application of oil, fat, or blood as forces of life to the deity. The numerous references in the Priestly documents of the Pentateuch to the anointing of priests may with some probability be taken as a practice later than and derived from the anointing of kings. It is likely, then, that the use of anointing as an installation was a Canaanite practice adopted by Israel, and its first mention is in Jotham's parable spoken at Shechem where a city-state kingship of the Canaanite type was established, Jg $9^{8, 15}$.

At any rate, whatever other places anointing may have had, we can be certain that within the lifetime of the first king the title *m^e^shîaḥ Yahweh* 'the anointed of Yahweh,' was amply recognized as a proper title for the king chosen and established by God (*e.g.* 1 S 16^{6-13} 24^{6} 26^{11}). Though the story represents Saul as having been rejected by Yahweh, nevertheless David cannot but continue to see him as the anointed one and therefore sacrosanct, in spite of his fierce enmity to David.

One cannot say that during Saul's time the status of the anointed one carried with it distinct lineaments of function, power, and authority. Saul was able to summon the men of Israel to arms in emergency, but it is not clear how far his activity in this went beyond the action of charismatic deliverers like Gideon. Pressure from the Philistines, the lack of a solid foundation for personal power, the inertia and unadaptability of older institutions, and Saul's own inner instability, contributed to prevent him from building a new and positive tradition round the status he held. How far Canaanite ideals of the kingly office were known to and adopted by Saul we can hardly tell from our evidence; but in general he seems to have adhered to the older Israelite traditions and not to have moved far towards assimilation with the Canaanites; cf, for example, 2 S 21^{2}.

With David, however, the kingly power assumes forms quite clearly distinct from those of the older deliverers. There is a personal royal domain of some extent and a professional army, small indeed but devoted to the king's interests; there is a kingly initiative in policy and planning; from the capture of Jerusalem onwards the royal city, the king's property, is the capital. There the palace is built, and the royal sanctuary becomes the centre of older Israelite traditions when the Ark is brought to rest there; there is also probably some assertion of continuity with older pre-Davidic Jerusalem tradition (Melchizedek) and of priest-kingship. And, perhaps most important of all, a dynastic principle is asserted; this was never established beyond doubt under Saul, who in some of his moments himself, as there is no reason to doubt, came to believe that David would succeed him (1 S 24^{20}), an expectation which his son Jonathan certainly held. What it means to be 'the anointed of Yahweh' is thus shown with much more positive content by David. Yet the very negativity of the picture of Saul which our sources give, rejected by Yahweh and rather a failure among men, makes all the more emphatic the fact that David still calls him 'the anointed of Yahweh.' The part of Saul cannot be neglected in any assessment of what is Messianic.

For in fact an important theme of the Books of Samuel in their present form, if not indeed their main theme, is the relation between Saul and David, not simply as historical persons, but as anointed ones; and between the house of Saul and the house of David, the two Messianic houses—using the word in the sense of the families chosen and marked out by the distinction of anointing given to their head and whose destinies are so different and yet so intimately interwoven. The dramatic tension of the story is worked out by the tracing of a number of subsidiary themes which run through the story. These can only be indicated in outline here. They include: the contrast of Saul's disobedience which brings disaster and David's sins which are turned to good; the attachment of Jonathan to David and David's promise to care for his descendants after his death, and the sequel; the marriages of David with daughters of Saul, which in the end never produce a child belonging to both families; the bitter and tragic strife and rebellion within David's family; the twin prophecies of Nathan, that there should always be a king of David's house, and that there should always be a sword against that house; and above all the question of guilt, with the strong sense that the Anointed should not avenge himself and bring guilt upon his house, but should allow Yahweh to take vengeance for him, and the repeated profit given to David by deeds of blood which are needed in his interest but which he cannot condone or accept as his guilt. And thus we have twin narratives of expiation in 2 S 21^{1-14} and 24^{1-25}, the first for the guilt of the house of Saul now laid to rest, and the second for a sin of David, with the place of expiation now established for the future.

It seems clear that this narrative, though much of it based on eye-witness experience, has its real interest in the characters as those to whom in that first and formative period the status of 'anointed of Yahweh' was given, along with their families. On the other hand we may expect that this story may have been fruitful in effects on later thought.

Although the term 'Messiah' has scarcely been used in this section, we must reiterate that 'Messiah' is merely a transliteration of the word we have translated as 'Anointed.' We are therefore justified in speaking of David and Saul as Messianic figures and their families as Messianic houses so long as we can understand the term 'Messianic' as equivalent to the *māshîaḥ* 'anointed' of the passages. The sense is not of future deliverers but of present chosen representatives of Yahweh. But a certain future element is now introduced in the story of David which is potentially important—the promise of the permanent future continuance of the Davidic house in the kingship before Yahweh (2 S 7). It is this element which more than any other gives an opening for the growth of Messianism in the future sense.

Meanwhile we may point to one or two famous passages which have traditionally been regarded as 'Messianic' in the sense of pointing towards the future deliverer or towards Jesus Christ, but which are better taken as related to David and his reign. The first is the famous 'Shiloh' prophecy in the blessing of Judah, Gn 49^{10}. Jacob sees the sceptre of primacy in the hands of Judah, to remain there until it is finally exercised by the prince to whom nations owe allegiance—'until he comes to whom it belongs' (so RSV), or perhaps 'until his ruler, *i.e.* Judah's ruler, comes' (Akk. *shelu* or *shilu*, 'ruler'). The second is the Balaam prophecy of the Star, Nu 24^{17}, which shall come from Jacob and overcome the people of Moab and Edom. It was, of course, David who first subjected these areas to Israelite domination. It is quite possible that both these passages are not purely *vaticinia ex eventu*, *i.e.* pseudo-prophecies produced in David's time to refer to events which have already come to pass, but are built on older pre-Davidic material which already asserted the excellence of Judah and the hope of victory over the surrounding nations. But it is clear that in their present form their fulfilment is supposed to lie in David; they are then Messianic in the sense of seeing Judah as the tribe from which the reigning Messianic house of David has come, and of seeing the nature of this Messianic calling fulfilled in domination over the surrounding nations. In later times, however, both passages are taken Messianically in the sense of prophesying the *future* deliverer, and this interpretation is confirmed from Qumrân.

(*b*) *The Psalms.*—In contrast with an earlier generation, which relegated many or most of the Psalms to a post-exilic or even a Maccabaean setting, most scholars now are prepared to assign a substantial proportion of them to the time of the monarchy. In this case the Psalter can be used with due care as evidence for the liturgical practice and the associated world of thought in the Solomonic Temple.

The Jerusalem Temple stood in the closest relation to the royal family. The city was royal property and the sanctuary was part of the palace complex. We hear of ritual actions on the part of the kings from time to time (David in 2 S 6^{16ff}; Solomon in 1 K 8); and there is no reason to doubt the statement of 2 S 8^{18} that 'David's sons were priests' although it is not clear how their priesthood is related to that of Zadok and Abiathar. It has indeed been suggested that the king played a major part in ritual, participating in coronation ceremonies and ritual combats. We cannot enter into this here, but may regard it as probable that the association of the king with the ritual was effective in fixing, stylizing and

giving permanence to the forms of poetical expression. Some characteristic themes may now be mentioned:

(1) The victory of the king over his enemies and the submission to him of the kings of other nations (*e.g.* Ps 2, 110).

(2) The distress, affliction, and humiliation of the king, which nearly brings him into the realm of chaos and the underworld; and his vindication through his appeal to Yahweh (*e.g.* Ps 18, probably also Ps 22).

(3) The divine birth, choice, and installation of the king (Ps 2, 110).

(4) The maintenance of justice and the defence of the weak (*e.g.* Ps 72).

(5) The blessing of fertility and abundance given to the nation through the righteousness, strength, and life of the king (Ps 72).

(6) The continuance of the name, the strength and the dynasty of the king (*e.g.* Ps 72, 89, 132).

In these passages the term *māshîaḥ* 'the Anointed' refers not to a future deliverer but to the reigning king (Ps 105^{15} is a rather exceptional extension of it figuratively to the patriarchs). For the people the anointed one is 'our shield' (Ps 84^{9}); for God to look favourably on His anointed is to convey blessing and prosperity to the people.

We must also mention the Psalms of the kingship of Yahweh, which in many cases contain the formula 'Yahweh reigns' or 'Yahweh has come to reign,' *e.g.* Ps 47, 93, 95, 96, 97, 98, 99. It is now widely held that these were used in a part of the autumn or New Year feast, in which the reigning king took some part to express the kingship of Yahweh. Whether this be so or not, we must notice a common theme of these Psalms—the thought of the creation of the world as an act of Yahweh's kingship, and along with that its defence against the forces of chaos which threaten it; and the suggestion of the coming or nearer approach of Yahweh with the dawning or beginning of a new era. This new era is not meant as a distant and future 'end of the world,' but is something immediately introduced and inaugurated in the celebration. It is not probable that the kingship of Yahweh is a contrast or opposition to the position of His anointed representative (in Ugarit also there is kingship among the gods, as there is among men); but certainly in the songs of the kingship of Yahweh the human king recedes from the centre of attention, whether because he is representing Yahweh's kingship or not. Nevertheless the themes of Yahweh's kingship may coincide with those associated with the earthly king, *e.g.* cf Ps 47 and Ps 2, Ps 98–99 and Ps 72.

In general then it would appear that the kingship as we know it in the Psalms is an institution central in the impartation of Yahweh's gifts and blessing to the people. Its centrality is something which can hardly be derived from the old pre-Conquest traditions of Israel, and must to some extent be attributed to Canaanite influence. But a good deal of transformation has also taken place; we may mention (1) reference to the historical realities of the Davidic house, its afflictions and its triumphs; (2) the influence of the older Israelite traditions; (3) in particular, the force exerted by the traditional Israelite conceptions of God and man, so that Yahweh is the only deity given positive recognition, the characteristic polytheistic patterns of mythology are weakened, and a limit is set to the mythological understanding of a person like the king. The divine birth and sonship of the king is probably not to be understood as a sharing in the Divine essence but as a belonging to the Divine work and purpose by predestination, election and adoption.

There are, then, a series of aspects and functions of the present reigning king which we may be justified in calling 'Messianic.' The 'Anointed' or 'Messiah' in the Psalms probably nowhere means a deliverer to come in the future. There are, however, a number of aspects which involve a future interest of some kind, namely (1) the promise of dynastic continuity, (2) the promise of victory over enemies and exaltation over all other kings, and (3) the initiation of a new time of right and prosperity, associated with the nearness and the kingship of Yahweh, which could be the starting point for an increasing futurist development.

4. Kingship and the classical prophets.—The Davidic settlement was not permanent, and after Solomon the northern kingdom not only broke away from the house of David but appears to have forsaken also the dynastic system; at any rate no dynasty succeeded in establishing itself for very long in fact. The tradition understands this whole matter theologically: Solomon followed other gods, and must lose most of his kingdom; only because of the promise to David is he left with Judah. But going farther back, we can see that the community between Israel and Judah, which David had to a fair extent himself achieved, had already been severely disturbed by events in David's reign provoked by the tragic strife in the royal family itself (2 S 19–20) and especially by David's own reliance (after the Absalom rebellion) on the loyalty of Judah to a Judaean king.

For the two centuries after Solomon we have little evidence to trace the conceptions held of the kingship of David's line; the great prophets of the 9th cent. worked mainly in the N. But it is clear that in part they are taking a stand on a revived old Israelite tradition and from it attacking the syncretistic religion and the more absolute claims of power of certain kings. In the 8th cent. the prophets are still more emphatic in their criticisms of contemporary life, more radical in the judgment and destruction they see as impending, more hostile to the security found in religious practices, in the supposed special place of the nation in the plans of God, and in the expected favourable aspect of the 'Day of Yahweh.'

The main interest in the Davidic kingship is found, however, in the Jerusalem prophet Isaiah, who had much to say about the related subjects of the Davidic line and the city of Jerusalem. His message is closely related to the political history of the time, with the renewed Assyrian pressure towards the W., and the planning of defensive alliances in Syria and Palestine.

Is 7 concerns an incident when the northern alliance tries to force Ahaz to join them, and failing that to replace him on the Judaean throne by a king of non-Davidic line. The use of the term 'house of David' in vv.$^{2, 13}$ show that it is the king as representative of the anointed house, and not just in himself, who is being tested here. The prophet asks for trust in God. By the old dynastic promises the Davidic house is to be 'constant' or 'established' (2 S 7^{16} etc.); but this continuance is now to depend upon trust. Ahaz's refusal to ask a sign is probably taken as a refusal to trust in Divine action here. God will therefore give His own sign, the child Immanuel to be born. Although scholars are deeply divided over the interpretation of this, it seems to the writer reasonable to take the Immanuel as an ideal kingly child of the Davidic house, who will fulfil indeed what the actual Davidic line in its representative Ahaz is failing to do. He is thus a Messianic child, soon to be born, who will be what the true Anointed should be, the representative or embodiment of the presence of God with His people. For the name Immanuel, 'God with us,' we may compare the frequent thought of Yahweh's being 'with' David, and the curds and honey may with some probability be taken as food of paradise (cf ch. 11). This interpretation is best supported by comparing the passage Mic 5^{2-4}, a passage which, in spite of the judgment of many older scholars, may very probably be taken as a genuine prophecy of Micah, and therefore close in time and situation to Isaiah. The Micah passage speaks of the birth of the true Davidic ruler whose origin lies in the primeval times. We have thus now come to the idea of a Messiah in the more usual sense, of a coming deliverer, although his coming may be expected soon, certainly in the Isaiah passage. But it is clear that this expectation of a coming Messiah is an extension into the future of the forms of thought surrounding the reigning Anointed.

Is 9^{1-7} is also in all probability genuinely Isaianic; it comes from the time when certain northern areas of

Israel (v.[1]) were incorporated as provinces in the Assyrian Empire; some of these were areas first brought under Israelite domination under David, and now that they are 'in darkness' the prophet sees the Messianic child, the new David, born to establish right and prosperity. Is 11^{1-9} can less certainly, but still with considerable probability, be taken as the work of Isaiah. The coming king and judge of David's line will be richly endowed with the Spirit of Yahweh; righteous judgment will be his function, as in the older kingly ideal; but in this time there will be a state of innocence and peace as in the primeval paradise. That kingly rule had sometimes been associated with the paradise is seen from Ezk 28^{12-13}, and of course the element of the primeval man's rule over the other creatures is seen in Gn 1, cf Ps 8.

In Isaiah's work then we may see clearly the emergence of one who is of the Davidic house but is other than the reigning king, and who will represent far more fully the ideals of the kingly office.

A century later the next of the great prophets, Jeremiah, is also concerned with the standing and the destiny of the Davidic house. Jer 22^{1-8} reiterates the demand for obedience by the king to the norms of justice, and points out that if this obedience is given the Davidic dynasty is assured of continuance; otherwise Yahweh is prepared to destroy it; oracles about various kings follow; Jehoiachin is rejected and exiled, and none of his offspring will succeed him on the Davidic throne. The next passage (23^{1-8}) speaks of how the evil shepherds will be punished and careful shepherds put in their place; and in coming days God will raise up a 'righteous Branch' as king; the name 'Yahweh our righteousness' (*Yahweh ṣidhḳēnû*) is a pun on and a contrast with the name of similar meaning of Zedekiah, the last of the Davidic line. The genuineness of this passage as a Jeremianic oracle has been much disputed, and it has been held to be dependent on Zec 3^{8} 6^{12} (*e.g.* Mowinckel, *He that Cometh*, pp. 19 f, 164, 456). In view of the interest of Jeremiah in the Davidic dynasty as expressed in ch. 22, however, it would seem reasonable to take 23^{1-8} as being in substance his thought, and to suppose that like Isaiah he looked for one who should be more truly a representative of anointed kingship then the present rulers were, and that the visible tottering of the dynasty in the early 6th cent. lent stimulus to this thought. Another form, perhaps rather later, of the same idea is Jer 33^{14-26}, probably spoken after 586 but not necessarily long after; it includes the priestly family of the Levites with the royal house of the Davidides. Cf also 17^{19-27}, which envisages the continuance of the Davidic line on condition of obedience to the law of the Sabbath (this passage also is often taken as not Jeremiah's, wrongly in the writer's opinion). In general, Jeremiah contributed less of real originality to the understanding of the kingship and the development of the expectation of the coming true or ideal king than did Isaiah; but his thought on the matter is sharpened by the impending disaster of the monarchy. The book of Jeremiah in its present form sees special significance in Jeremiah as the prophet who lived through and continued after the fall of Jerusalem, and this is one reason for the addition of historical material about this period (39–44) and about the later return to favour of Jehoiachin (52^{31-34}).

A not dissimilar position is occupied by the contemporary Ezekiel. In Ezk 21^{25-27} we have a prophecy of the dethronement and profanation of the king, probably Zedekiah; there is to be a state of ruin (there are some obscurities here) until 'he comes whose right it is,' *i.e.* the rightful king to whom the royal emblems and dignity are to be restored. The wording here may perhaps be a hint at or an interpretation of the 'Shiloh' passage of Gn 49^{10}. A number of modern scholars hold this passage to be part of the post-exilic supplementation of Ezekiel, but this seems improbable to the writer. The following passages belong either to the later period of Ezekiel when, after the fulfilment of the disaster which like Jeremiah he had expected and pronounced, his message turned to a new note of hope and restoration for his people or to a later supplementer of his work: 17^{22-24}, the tender sprig to be plucked from the cedar and planted on the heights of Israel; 34^{23f}, where David, *i.e.* a true offspring of David's line, will be the one and faithful shepherd of Israel (cf the thought of Jer 23); 37^{22-28} looks forward to the reunion of Israel and Judah under 'my servant David.' In the programme of restoration and reform in Ezk 40–48, however, the central emphasis is on the priestly Temple service, and the 'prince' is noticed mainly as responsible for the provision of the offerings, 45^{16-17}; the holy city lies within his territory, 48^{21-22}.

Something of the aura which continued to attach to the kingship at and after its end, in spite of the criticisms of the later prophets, can be seen in the meditation on Zedekiah's fate, La 4^{20}—'The breath of our nostrils, the Lord's anointed, was taken in their pits, he of whom we said, "Under his shadow we shall live among the nations".'

The later centuries of the kingdom also saw a rise in the importance of the priesthood, a tendency which is regarded by some scholars as a 'democratization' of a function originally belonging to the kings, and in particular the great prominence of a 'chief' or 'high' priest. It is in post-exilic documents that we hear of this person also with the title 'anointed' (*e.g.* Lv 4^{3}). By this time the high priest is deemed to be of the tribe of Levi and of Zadokite or Aaronic family. We have here the datum point from which is later developed the idea of the priestly, Levitical or Aaronic, Messiah.

It will be observed that the position of the king throughout this period cannot be simply characterized in the modern categories of 'religious' and 'political.' He is not purely one or the other, nor can his functions be separated between the one and the other. Even as 'political' ruler of Israel, his relation to other kings and to the rest of the world goes beyond 'practical' and 'realistic' policies. He is a man, the man whom Yahweh has chosen; but in certain circles of tradition he may be traced back also to a Divine, a primeval or a superhuman origin.

5. The Exile and after.—The tendencies which we have traced in the greater prophets, and in particular the expectation of one who would fulfil the true calling and nature of the Davidic kingship more truly than the reigning king, was immensely strengthened and popularized by the end of the monarchy. The expected restoration of Israel included the restoration of the Davidic house and the rebuilding of the Temple; and more widely, the vindication of Israel against the heathen nations, the establishment of peace, the renewal of fruitfulness, and the acknowledgement by the world of the dominion of Yahweh. 'Messiah' in this case means clearly the expected Davidic ruler of the days of restoration; the total expected restoration can be spoken of as the Messianic age.

Considerable variety of thought remains possible, however. In particular the unknown prophet of the exilic period whom we call Deutero-Isaiah, and the group of Servant Songs which are woven into his work, show original and unusual features. First we must mention the characterization of the Persian Cyrus as the anointed of Yahweh, Is 45^{1}, cf 44^{28} and 41^{25ff} 46^{11}. Along with this goes a noticeable absence of interest in the restoration of the Davidic house, although the return of Israel from exile and the rebuilding of the Temple are clearly spoken of. It would be perhaps reasonable to say that this prophet follows the line shown in Jeremiah of regarding the great heathen king rather than the Judaean monarch as the central active instrument of Yahweh; Jeremiah called Nebuchadnezzar Yahweh's 'servant' (Jer 27^{6}), Deutero-Isaiah goes on to call Cyrus 'anointed.' The function of Cyrus is the bringing of judgment on Babylon and the restitution of Jerusalem; he does not himself understand or know the God of Israel (45^{4-5}); 45^{3} probably does not mean that the prophet expects Cyrus to become a worshipper of Yahweh in the fullest sense.

A more positive place in Deutero-Isaiah is taken by the 'servant,' both the general thought of Israel as the servant in the prophet's work and the more particular picture of the servant, seen at least sometimes as a single person, in the 'Servant Songs.' How far is the 'servant' of these passages to be understood as a Messianic figure? Some scholars recently have pointed to traits in the songs which are related to aspects of the royal theology, *e.g.* affliction and vindication, the maintenance of right, the representation of the people; and stylistically Deutero-Isaiah seems to have used to some extent the poetical forms of the royal cult. On the other hand it is clear that there are traits in the servant which point towards a prophetic rather than a kingly figure. It may be suggested that in Deutero-Isaiah there is a splitting apart of the royal theology; the task of armed vindication falls to Cyrus; but while there is no cultivation of the royal Davidic line as central to the future of Israel, the servant figure, itself composed from prophetic, patriarchal and kingly ideals, occupies the place of centrality which the Messianic house of David otherwise held and thus received a certain likeness of pattern to it. The servant figure therefore is not so much Messianic as something that takes the place of, and assumes some part of the forms of, the Messianic. Its reference seems to be past, in that some passages look back on a life of hardship and suffering, but also future in that a vindication from God is expected, and in that the form of the servant is expected to remain influential in the mission of Israel.

The thought of the Messianic line in a more traditional form, however, was given new life when Zerubbabel, a true descendant of the Davidic line, became for a short time prince of the revived Judaean community under Persian rule. With him was associated Joshua the high priest, and they are the two anointed ones (literally, 'sons of oil') of Zec 4^{14}. Zerubbabel's Messianic position as the son of David now actually reigning, and expected to introduce a new era of blessing, is expressed in Hag 2^{23}, Zec 3^{8-10} 4^{7} 6^{9-14}. This last passage has been taken by many scholars to have represented originally the coronation as Davidic king of Zerubbabel, by whose throne the priest (in fact Joshua) would stand; subsequently the name of Zerubbabel dropped out of the text. The peaceful concord between the two bearers of Messianic dignity, priest and prince, is emphasized. In fact the time of Zerubbabel was a very difficult one, and ushered in no age of perfection; its great achievement was the restoration of the Temple, but Zerubbabel himself had only a brief period of prominence, and then disappeared from history; perhaps he was considered dangerous by the Persian authorities, but he may have continued for some time in his modest position as governor, for he never had real independence. After him we know no more of members of the Davidic house upon whom similar hopes could be placed. With the departing of that modest but real reproduction of the Davidic pattern which Zerubbabel represented, the expectation of the coming Messiah revived and remained powerful; many of the later prophetic passages probably came from this period. In such as Zec 9^{9-10} the influence of the old kingship pattern is clear; the incident is pictured probably as a coronation procession.

Unlike the time of Zerubbabel, that of Ezra and Nehemiah is marked by a sober attention to law and organization and an absence of Messianic concentration; these men may have expected the future Messiah, but their main contribution to Judaism lay elsewhere. In any case, as later Judaism settled down in its concentration on the law, there occurred also an efflorescence of futurist and eschatological thought. From this period come prophecies like Malachi, the later parts of Zechariah, and certain late portions incorporated in the book of Isaiah. The interest in the future is not only in a restoration of the Davidic kingdom over Israel, but in the approach of Yahweh for judgment, victory over the final enemies of His people, the punishment of the wicked and the vindication of the righteous, and the healing and renewing of creation. In such eschatological passages the Messiah often does not appear, and often Yahweh is seen as carrying out His final purpose without any mediation. The Messiah is by no means essential to any expression of the future hope.

Finally this late prophecy turns into apocalyptic. This form of thought is more conscious of the larger sweep of history than the older prophecy, and commonly works with the periodization of history. Past time is interpreted as an episode awaiting the inauguration of the new; there is a strong sense that the new period is soon to begin, and a feeling of present crisis; a period of strong transitional woe and pain opens the way to the final age.

In apocalyptic, too, the future expectation can be developed with no mention of the Messiah. It is so for example in most of Daniel. The anointed ones of 9^{25-26} are probably (1) Zerubbabel or Joshua and (2) Onias the high priest—persons of the past when Daniel was written, although represented as future by the predictive form of writing. The eschatological kingdom of God is mentioned in 2^{44}, but no Messianic king. *Jubilees* has little to say of the Messiah, and the *Assumption of Moses* does not mention him.

The figure 'like a son of man' in Dn 7^{13} is probably not intended as the Messiah. Modern scholarship has frequently interpreted him as merely a figurative representation of Israel or the pious Israelites; it has also connected him with the idea of a Primordial Man, connected with paradise, glorious and wise, hidden in heaven but to be revealed at the end. The writer would prefer to understand him as an angelic figure, charged with the guardianship of God's kingdom (see J. Barr, 'Daniel,' *Peake Commentary*[2], ed. Black and Rowley). In any case the one like a son of man is a heavenly and eschatological figure, coming with clouds and heralding the last stage in the apocalyptic periodic scheme. 'Son of man' itself means 'a human being' (cf Ps 8^{4}), and it can be misleading to give it capitals and the definite article at this stage, since it is not really a title (the same applies in places to the usage of 'The Messiah'). It seems unlikely to the writer that a completely independent figure entitled 'the Son of Man' ever existed.

Until recently it has commonly been held that the next development was to be found in the 'Similitudes' of Enoch, to which the 'Elect One' (the common title for the Messiah in this work) is introduced as 'that Son of Man' in a passage closely following Daniel. The view that Enoch therefore developed the term 'Son of Man' much farther than Daniel, and in particular united it with the Messiah, in the 2nd cent. or so B.C., is now very doubtful, because no fragments from this section of Enoch have been found at Qumrân, though much has been found from outside the Similitudes. It seems likely, therefore, that this section of Enoch is post-Christian, and may represent syncretistic Judaistic Christianity. Certain other apocalyptic works in which the cosmic and heavenly dimension of eschatology was emphasized can also no longer be deemed pre-Christian, *e.g.* 2 Bar.

The literary type of 'Testaments of Patriarchs' was also known at Qumrân, but the developed *Testament of the Twelve Patriarchs* is probably a Christian writing which used such earlier testaments. *The Testament of the Twelve Patriarchs* is an important source for the picture of the double Messiahship of Davidic king and Aaronic/Levitical high priest together; we have already said something of the beginnings of this picture. In the present stage of study it is, however, difficult to use actual passages of the existing version of the Testaments as evidence for the pre-Christian period. But in view of the Qumrân evidence (see below) we may be fairly sure that an expectation of the two Messianic figures was current in the early circles to which the Testaments go back. We have seen that at least one of the 'anointed ones' of Dn 9 was a high priest, and *Jub* 31 promises princely dignity to both Levi and Judah, with the emphasis rather on Levi. It has been held that the importance of the Levitical Messiah arose from the power of the Hasmonaean house, who were themselves

priests and not of Judahite stock. It now seems more probable that, though the Hasmonaean dynasty may have had some influence, the idea has its origin in older tradition, in the co-ordination of king and priest, and that the importance of priestly influence in this period, and of the centrality of the Temple for atonement and liturgy, was the main influence working for the prominence of Levi.

From Rabbinic sources in the 2nd cent. A.D. and after we hear of a distinction of two Messiahs, the Messiah of Joseph or Ephraim, and the Messiah of David or Judah; the former was to fight in the final conflict with God's enemies and perish. The origin of this distinction is imperfectly understood. The absence of all mention of it from Qumrân strengthens the common opinion that it did not arise until post-Christian times.

Scriptural interpretation was also at work interpreting of the Messiah many passages from the OT. Unfortunately, apart from the Qumrân texts, most of our sources are in the Christian era. The Targum interpreted Is 53 of the Messiah, but did not understand the Messiah to suffer as the Servant in the original did. By the 3rd cent. the reference to the Messiah of the 'one like a son of man' in Daniel could be taken for granted by the Rabbis. Messianic force was given to many other passages. The more conservative and modest picture of the Messiah is that in *Ps Sol.* 17–18, which very largely follows the type of Ps 2.

It seems probable that the idea of a Messiah making atonement by suffering was not common or normal in this period. It is true that the Messiah could be thought of as one who would die, but this is because he shares in the lot of mortal humanity. He might be thought to suffer in the sense of being involved in the great conflicts or woes of the last time. But this would not be thought of as principally vicarious in purpose or atoning in result, although any suffering might have a certain meritorious and beneficial effect. We have already seen how the Targum to Is 53 understands the Servant there as the Messiah but removes the idea of vicarious and atoning suffering. It sees the Messiah as interceding for the forgiveness of the people; he is, like the ancient king, their powerful representative before God; but his work is more the overcoming of enemies than the removal of sin.

We also hear of other persons than the Messiah who are connected with the coming of the last days. The return of Elijah is mentioned in Mal 4^5, though no Messiah is mentioned there. Taken along with the expectation of the Messiah, he becomes a forerunner; Moses sometimes has the same function. Dt 18^{15} leads either to the expectation of Moses or of some other prophet as forerunner. Indeed the Prophet may become the main figure of expectation. The Messiah also may assume some prophetic characteristics, such as discernment and wisdom, and ability to pronounce on legal and interpretative questions.

With the periodization of world history in apocalyptic, it was possible to calculate the time of the end, and many chronological schemes were directed towards this. But there was also the school of thought which held that this could not be known, and that the coming of the Messiah was dependent on various other circumstances, such as the obedience of Israel or the culmination of wickedness. In spite of the woes and conflicts which were to surround the coming of the Messiah, he would be a man among men, and his Messiahship might be hidden even as he lived on earth until the moment of its manifestation. We thus find around the turn of the era numerous pretenders to Messianic dignity, of whom the most notable was Simon bar Cochba, military leader of the Second Jewish Revolt. Much of this popular Messianism during the Roman period had a distinct revolutionary and nationalistic air; Josephus (*BJ* VI. v. 4 [312 f]) mentions Messianic excitement as a main cause of the drift to war in A.D. 66.

The Samaritans also had Messianic expectations of a kind (Jn 4^{25}). Later we hear of a figure called the Taheb, the human agent of God in ushering in the time of Divine favour. According to J. Bowman, however (*JJS* vi [1955], p. 72), the Samaritans never really developed the Messianic idea and often continued to think of God alone as active in the end.

6. The Messiah at Qumrân.—'And they (*i.e.* the men of the sect) shall be judged by the first statutes, by which the men of the community began to be disciplined, until there come a Prophet and the Messiahs of Aaron and Israel' (1*QS* ix. 10–11). This may be taken as the basic text for the Messianism of Qumrân. There remains a certain amount of doubt about its relation to statements in *CDC* and other Qumrân texts; and upon this depends the question whether there was a quite uniform doctrine of the Messiah(s) throughout the life of the sect. It is interesting that in an early copy of this same Rule the paragraph of which the above sentence is part does not occur (Milik, *Ten Years of Discovery*, p. 123).

The passage refers to two persons, the priestly and the royal (or lay) Messiahs, as well as their forerunner the prophet. It thus follows the old tradition which envisages the restoration jointly of king and priest. Another interpretation, that 'Aaron and Israel' are to be taken together, giving the sense that the Messianic figure(s) will arise from within the sect which calls itself 'Aaron and Israel,' now seems less likely, although it is quite possible on other grounds that the anointed ones were expected to appear from the community.

Along with this we should take a text (1*QSa*) which, after other regulations, gives the order for a session and feast 'when God begets the Messiah' (the word 'begets' has been emended to 'brings' by a number of scholars, but in the writer's opinion this change of text is very precarious). First 'the priest' enters and sits, the other priests ranging themselves before him; after this the Messiah of Israel takes his seat, and the chiefs of the clans before him. No one is to touch the food before the priest; he must bless it and touch it; only then shall the Messiah of Israel touch it; afterwards the others also bless it.

In our first passage 'Aaron' came before 'Israel,' and in this we find the precedence of the priest over the (royal or Davidic) Messiah. Does this mean an absolute superiority in rank of the priestly Messiah? This has frequently been affirmed, but seems doubtful to the writer. The order 'Aaron and Israel' is used simply because of the general precedence of priests over laity, and is used apart from the Messianic reference, *e.g.* *CDC* vi. 2. The precedence at the sacral feast emphasizes the essential place of the priest in giving the benediction and beginning the meal; it is the guarding of a priestly function, rather than an assertion of an absolute superiority. Further, there are a number of passages where 'the Messiah' in the singular is used and is understood of the lay or Davidic ruler (*e.g.* the passage about his begetting quoted above). In other words, the term in the singular, 'the anointed one,' was still taken to refer to the Davidic ruler as in the Jewish tradition generally; but used in the plural, or with the word 'priest' (as 'the anointed priest') it would include the coming high priest whose functions accompanied those of the ruler and took precedence of them in some ways. Further, it has been widely held, and perhaps prematurely, that all meals of the community were representations or anticipations of this Messianic feast. The idea of the great eschatological banquet was no doubt developed from passages in the prophets like Is 25^{6-8} 55^{1-5}.

The fragmentary series of Blessings (1*QSb*) is in four sections, covering the people, the chief or anointed priest (this unfortunately much damaged), the priests in general, and the 'prince of the congregation'; the relation of priest and prince is like that in Ezk 40–48, and for the arrangement of that of Lv 4. The page of Testimonia from Cave 4 quotes from Dt 18 (the Prophet like Moses), from Nu 24 (the Star of Jacob and Sceptre of Israel), and from Dt 33 (Moses' blessing to Levi). These are taken as testimonies to the coming Prophet and either to the royal Messiah (the Star) and the priestly Messiah

(Levi) or to the priestly and royal Messiahs (Star and Sceptre respectively) and to the priesthood (Levi). The Star and Sceptre are interpreted separately in *CDC* vii. 18–20. We may notice in passing how Bar Cochba regarded himself as Messiah of Israel and associated with himself the priest Eleazar; in this case Bar Cochba seems to have held the primacy. Gn 49[10] was interpreted of the Davidic Messiah, and Is 10–11 probably of his victorious warfare against the enemies of God. The priestly and military leaders in the War scroll may with some probability be identified in the same way.

In general the distinction between the two Messianic figures may be seen mainly as a difference in function rather than an absolute difference of superiority and inferiority. The sect is itself strongly determined by priestly conceptions and by the superiority of priesthood to laity as a whole, and lays great emphasis on the work of the priests and the eschatological high priest. The work of the royal Messiah is primarily the overcoming of the enemies of God. It is an exaggeration born of modern concepts, however, to say that he is a purely worldly and political figure; as in the OT, the work of establishing the kingdom and defending it in righteousness is a sacral office.

In *CDC* a difficulty remains, in that the singular is used—'the Messiah of Aaron and Israel' (*CDC* xiv. 19, cf xix. 11, xx. 1). For a time it was thought that this singular was an error of mediaeval copyists but it has now been found on an early copy from Qumrân. On present knowledge this difference from other texts cannot yet be fully explained; it may go back to a uniting of the double Messianic concept by some sections of opinion in the community. In general, the relation of *CDC* to 1*QS* is still uncertain in many ways.

The Messianic expectation of Qumrân does not seem to be closely integrated with the cosmic eschatology of the end of the world, and in this respect is somewhat simple and conservative. While a new and final age is strongly expected, the relation of the Messiahs to its coming was mainly the re-establishment (and vindication in war) of a right religious constitution in obedience to the law as interpreted by the sect's teacher. Qumrân agrees with much of traditional Judaism in that the Messiahs, great as is their importance, are in some ways overshadowed by the Law and are hardly as central as seems natural to Christians with their conception of Messiahship formed from the NT. Thus the passages about the Messiahs in 1*QS* and *CDC* are often brought in incidentally, not in order to tell about the Messiahs but to indicate a time limit up to which certain statutory requirements are inescapable. Basically the Messiahs of Qumrân are the restored chief priest and king. Some passages (*e.g.* 4*Q* Florilegium) emphasize the exposition of the Law as the primary task of the one who appears along with the royal Messiah in the end.

Some further points remain to be mentioned. A passage in a thanksgiving hymn (1*QH* iii) mentions a birth in great travail; the child born of the woman is called 'wonderful counsellor' (from Is 9[6]); it is possible that this is the Messianic birth and that as in some other circles the humanity of the Messiah is combined with a highly-coloured and wondrous origin and birth (cf also the passage about the begetting of the Messiah in 1*QSa*). But it may be, and seems the opinion of a majority of scholars at present, that the passage has nothing to do with the Messiah. *CDC* xiv. 19, mentions the 'Messiah of Aaron and Israel' in the same line as a verb expressing 'making atonement for iniquity,' but the text is not yet certain. There are also places where 'anointed ones' is used of persons in the past, in fact of the prophets of classical Israel (*CDC* vi. 1; cf ii. 12). Similarly in the War Scroll xi. 7–8, we hear of 'thine anointed ones, seers of testimonies' by whom the ordering of God's battles has been made known. The usage here follows the style of Ps 105[15].

A more complicated problem is that of the relation of the two Messiahs to the Righteous Teacher or Teacher of Righteousness. The place of the Teacher is fixed in the beginning of the establishment of the sect by passages like *CDC* i. 11, xix. 34; the latter mentions his 'being gathered,' *i.e.* his death. As founder of the sect his position towards the Messiahs might be expressed as that of a forerunner—but he is probably different from the Prophet who is associated with the Messiahs, and is himself a priestly expositor rather than a prophet. On the basis of *CDC* vi. 10–11 it is possible but uncertain that the return of the same Righteous Teacher in the end time was expected. If he were to return, it might be taken that he would return as the priestly Messiah; but this seems to the writer unjustified on present knowledge.

The problem of suffering and its atoning value depends somewhat on the above question. We have good evidence of the suffering of the Teacher, his persecution by the Wicked Priest, the refusal of help to him by the House of Absalom, and, in the opinion of some scholars, of his martyr death. But unless we make the identification of Teacher and Messiah this does not mean Messianic suffering. And it seems doubtful whether a special connexion between suffering and atonement, or suffering and Messiahship, was made, beyond the commonly held beneficent and meritorious value of suffering. The priestly Messiah, as chief priest of the end time, would like existing priests naturally be in charge of rites of atonement, but this is rather different. The Hebrew term *kipper*, 'make conciliation, pardon,' is found used with God as subject in passages like *CDC* iii. 18, iv. 10, 1*QS* xi. 14, and with no relation either to Messianic persons or to suffering; rather it refers to the special Divine favour shown to the sect as those who repent and follow the law in truth. *CDC* xiv. 19 mentions the 'Messiah of Aaron and Israel' in the same line as the verbal phrase 'make atonement for iniquity' but since the text is much damaged it is not clear that the Messiah is the subject of the verb; elsewhere in *CDC* its subject is God.

7. The New Testament.—In the NT the Messianic theme becomes much more all-embracing, central and determinative than in the OT or other Jewish literature. The term *Christos* becomes a common title or indeed a proper name for Jesus of Nazareth in the post-resurrection church. That this Jesus who was crucified was indeed the Christ was the central article of the apostolic preaching. This interest was dominant or at least extremely important in the formation of the tradition which led to our written gospels. John (20[31]) explicitly states that his material has been presented with this intention, 'that you may believe that Jesus is the Christ.' It follows that there is an importance for the Messianism of the NT in many passages where the characteristic Messianic terms are not discussed or even mentioned. The comprehensiveness of Messianism in the NT thus means that we cannot hope to discuss the whole material here (rather see article JESUS CHRIST) but can only summarize the ways in which the lines already traced in the OT and Judaism are continued and adapted in the NT.

The term *Messias*, a Greek transliteration of the Hebrew Aramaic term, occurs only in Jn 1[41] 4[25], and both times with the Greek translation *Christos*. *Christos* itself is of course extremely frequent, but it is far from evenly distributed, the Gospels and in particular the Synoptics using it much more sparingly than Paul.

The starting point of a study of the Messiah in the NT must be the very noticeable fact that in the Synoptic Gospels Jesus refrains almost entirely from using the term 'Messiah' directly and unambiguously of Himself. The characteristic term used by Jesus in speaking of Himself is 'Son of man.' He is recognized, however, as the Christ or Messiah by the exorcized demons (*e.g.* Lk 4[41], Mk 1[34] some MSS), although the phrase actually spoken by the demons is often another (*e.g.* 'Son of God,' Lk 4[41]; 'Holy One of God,' Mk 1[24] etc.). In such cases Jesus commands the demons to be silent and not make Him known. A turning point in the Gospels is reached when Jesus challenges the disciples to say who He is in their judgment, and Peter pronounces Him to be the

Christ (Mk 8$^{27-29}$ and ||s); here again Jesus commands that this knowledge should not be communicated. At the trial of Jesus one of the accusations affirmed to have been made was that He called Himself the Christ or King Messiah (Lk 23^{2}); this before Pilate. The Jewish authorities likewise demanded an affirmation whether He was the Christ (Mk 14^{61}, Mt 26^{63}, Lk 22^{67}). In Matthew and Luke the answer is oblique, but the definite affirmation 'I am' is given in Mark (most MSS); this may perhaps be deemed the most accurate historically, as best explaining what follows. In all three traditions a statement about the Son of Man follows. The passion story includes challenges to the crucified Jesus to prove Himself Christ, Mk 15^{32} and ||s etc.

This avoidance by Jesus of direct use of the term 'Messiah' of Himself (and it can hardly be doubted that the picture presented by the Gospels is accurate historically in this respect) has often been interpreted as a desire to avoid the worldly, political and nationalistic associations of the popular Jewish Messianic concept of the time. To the writer this seems to be only one rather minor aspect of the truth. The procedure of Jesus in the use of the Messianic title is part of the wider method of His self-communication to men; this is intended to elicit trust in Him by challenging men with the enigma of His person and deeds; only by trusting in Him do men know who He is. This approach is inconsistent with a mere and plain laying down of Messianic claims in straightforward assertion. There is much uncertainty about the sense of the 'Son of Man' in the speech of Jesus. It is not probable that this was a recognized Messianic term and therefore just a kind of alternative to 'the Messiah'; nor is it very likely that Jesus, turning away from the popular Messianic concept, replaced it with a 'Son of Man' or 'Heavenly Saviour' concept, for it is not clear that in the 1st cent. the term 'Son of Man' had a rich content of its own of this kind. Though the term has contact with OT usage, and especially with Daniel, in Jesus' speech it seems to be used primarily as a designation of Himself in His humanity, as He is, as the human being from whom the problems start out. The interpretation of 'Son of Man' as a collective figure, representing the holy community as a whole, has been popular in recent years and is based on the interpretation of Dn 7, but is in the writer's judgment a wrong interpretation of that passage and still less likely to be true for the NT.

The Messianic presentation of Jesus, then, takes place not in particular sayings affirming that He is the Christ but in the total series of the events of the gospel. The Gospel writers apply the title 'Christ' occasionally to Jesus as an accepted designation for Him, *e.g.* Mt 1$^{16-17}$ 11^{2}, Mk 1^{1}. Also the avoidance of the term 'Christ' in the speech of Jesus and with some implication of a reference to Himself is not absolute, *e.g.* Mt 23^{10}, Mk 9^{41}. The discussion of the meaning of the Davidic descent of the Christ (Mk 12$^{35-37}$ and ||s) is probably not, as some have held, a repudiation of the idea of the Davidic Messiah, but a question pointing to the enigma of Jesus and the possibility of His being Messiah. Numerous incidents in the stories are designed to point to the Messiahship of Jesus. Such, for example, is the entry to Jerusalem, with explicit reference to the Davidic kingdom by the crowds (Mk 11$^{1-11}$ and ||s); the fact that the crowds will later prove to have misunderstood Jesus' Messiahship does not affect the witness of this incident.

In this incident and many others special importance must be attached to the fulfilment of prophecy involved, *e.g.* Mt 21$^{4-5}$. Jesus is fulfilling Zechariah's vision of the restoration and coronation of the Davidic king. There is no reason to doubt that in this and some other cases the original connexion with OT prophecy is in the mind of Jesus, who saw His life patterned before Him in the figures of the OT, and reintegrated and actualized these figures in His action. This method of interpreting the OT descended from Him, however, to His disciples, and certain of the fulfilments of prophecy discerned in the events of His life are to be traced to certain schools within the early Church. The question how far the passages appealed to are really Messianic depends on the definition of this term. Some passages like Zec 9^{9} (quoted Mt 21$^{4-5}$) are Messianic in the sense of heralding the restoration of the Davidic anointed house, and predictive in the sense of seeing this as an event of the future. In other cases like Is 7^{14} (quoted Mt 1^{23}) the passage is again Messianic in the sense of being intrinsically and specially related to the fate of the Davidic house, but goes back to a time before a long eschatological perspective into the future was opened up; so roughly also the passages quoted at Mt 2^{6} 4^{15}. But sometimes even where the passage is Messianic in this sense the fulfilment lays emphasis on something that was quite secondary in the original, so Is 7^{14} and Mt 1^{23}. Other passages again, such as those from Ps 22 quoted in the passion story (Mk 15$^{24, 29, 34}$ etc.) have been held by some to be from royal lamentations in the first place, and in this limited sense connected with the Messianic office; but there was no predictive element in the original sense. Still other passages are not at all concerned with the Messianic-Davidic theme in the OT, but are related to other themes of the OT history, *e.g.* the Exodus in Mt 2^{15}. It is indeed characteristic of the NT that though Messianism is the centre of its scriptural interpretation the Messianic theme is integrated in new ways with other themes and patterns of the OT.

In John there are some differences, in that Jesus' recognition as Messiah by some of His disciples occurs at the beginning (1^{41}); in 4^{25} Jesus claims Messiahship in His words with the Samaritan woman, and cf 17^{3}. But the use of 'Son of Man' continues as in the Synoptics, and causes uncertainty (12$^{23, 34}$). The miraculous deeds of Jesus suggest His Messiahship, 4^{29} 7^{31}. But the fact that Jesus' origin is known is a difficulty, for the origin of the Christ would be mysterious, 7^{26f}. The failure of Jesus to make a direct affirmation of His Messiahship irritates the Jews, 10^{24}. Thus there is considerable agreement between John and the Synoptics about the way in which the Messiahship of Jesus was presented.

This presentation has its culmination in the passion and resurrection; though the Cross seemed to many to be inconsistent with Messiahship, the Gospels mean that it is the fullness of Messianic dignity. With the completion of the drama of this ministry, the peculiar presentation of Jesus by Himself comes to an end, and in particular the secrecy about the Messiahship. The term 'Christ' is regular and frequent in the Apostolic period, and 'Son of Man' is hardly used (only Ac 7^{56}). In the epistles and later works of the NT the term 'Christ' becomes very frequently attached to Jesus' name in 'Christ Jesus' or 'Jesus Christ.' This does not mean that the original Messianic sense was altered or lost (for the contrary view, see *Theological Word Book of the Bible*, ed. Richardson, s.v. Christ), but rather that the OT history of preparation could be assumed and compressed.

It is clear in the NT, whatever be the case at Qumrân, that there is only one Messiah, the Judaean/Davidic; though it may be that the relatedness of Mary to the Aaronic Elizabeth is taken to indicate the uniting of the Davidic and Aaronic lines. Among other passages which may be uniting the royal and priestly Messianic themes we may note the royal or holy priesthood of 1 P 2$^{5-10}$ and the interpretation of Jesus' death as a sacrifice as in Eph 5^{2}. But the most important of all is the letter to the Hebrews, which concerns itself especially with showing how Jesus the Judaean-Davidic Messiah is in fact the fulfilment of the priesthood and its service, and this by belonging to a greater priesthood than the Aaronic.

The NT also concentrates a much greater amount of significance in this one Messianic figure Jesus. The NT is not legalistic like Qumrân, and makes salvation depend exclusively on man's relation to the Christ in a way impossible at Qumrân. The direct interpretation of the Messianic task as the resumption of the religio-political rule of the Davidic house (still a possibility in the minds of the disciples as late as Ac 1^{6}) is avoided, and this makes His claims on another plane all the deeper

and more comprehensive. Faith is essentially faith in the Christ and atonement is the work of the Christ. It has commonly been held that one of the main contributions of Jesus in this regard was to integrate with the concept of the Messiah that of the Suffering Servant from Deutero-Isaiah. The special importance of the Isaianic passages in the thought of Jesus and the NT has been questioned, however (cf Hooker, *Jesus and the Servant*, 1959). Whatever the truth about this may be, it seems clear that Jesus saw His suffering as part of His redemptive task (Mk 10[45] etc.) and that when the suffering comes it appears to the onlookers to contradict the Messiahship but to the eye of faith paradoxically to fulfil it.

The Gospels agree with other historical sources in depicting the time of Jesus as one of vivid Messianic expectation, although as one would expect there is no complete uniformity in it. Along with the Messiah or before him there was expected Elijah the forerunner, and also 'the Prophet,' *i.e.* the prophet like Moses of Dt 18. In Jn 1[20–23] John the Baptist says he is neither Christ nor Elijah nor Prophet; but by another tradition (Mt 11[14]) he is Elijah in some sense. According to Mk 8[27–29] and ‖s the people say that Jesus is the Baptist, or Elijah, or one of the ancient prophets *redivivus*; Peter recognizes Him as the Christ. In Jn 7[41] the crowd's opinion is divided between the Prophet and the Christ. In general it has been noticed how similar to the position of the Qumrân sect was the procedure of John as a radical teacher announcing the coming of the Messianic time and preparing for it a repentant people.

The provenance of the Christ was also much discussed. Could Messiahship be reconciled with Galilean origin (Jn 7[41]), or with the fact that Jesus' origin (Jn 7[27]) and even His family (Mk 6[3]) were familiar? From whence was the Christ the son of David? Was not the Christ to remain for ever (Jn 12[34], a passage which if reliable must be set against the other tradition of the mortality of the Messiah)? Detailed stories of the birth of Jesus are given in Matthew and Luke, and strongly emphasize the fulfilment of the Israelite heritage in His coming. The idea of the marking out of time down to the coming of the Christ is worked out in the genealogy of Matthew (1[17]). With the death and resurrection of Jesus the continuing triumphant life of the Christ becomes important.

So far we have mentioned only key passages in which for the most part the term 'Christ' is explicitly employed; but the number of incidents in which the Gospel writers would wish us to see some Messianic significance is much larger, and would include, for example, the Baptism of Jesus, the contest of Jesus with the Devil, some healing and other miracles, some aspects of His teaching (for example the presentation of the teaching as that of a new Moses), the Transfiguration (cf the appearance of Moses and Elijah there), and the Last Supper. Part of the genius of the Gospels is their richness in Messianic manifestation accompanied by the reserve of Jesus in making direct Messianic assertions. The question is often asked, how far was Jesus conscious of Messiahship? In view of what is now known of Messianic currents in His time, there is no reason to doubt that Jesus believed Himself to be the Christ whose coming was foreshadowed in the OT. But it should be emphasized that the NT documents are not interested in penetrating into the inner consciousness of Jesus and speak rather of what He said and did than of what He thought or felt.

For the significance of particular NT episodes see the relevant articles, *e.g.* BAPTISM, TRANSFIGURATION, etc.; and for the general questions of Christology, especially in the Epistles, see CHRISTOLOGY, JESUS CHRIST. J. Ba.

METE.—'To mete' is 'to measure,' and a 'mete-yard' (Lv 19[35] AV and RV; RSV 'measures') is a merchant's measuring stick.

METERUS, 1 Es 5[17] (AV).—See BAITERUS.

METHEG(H)-AMMAH.—A place mentioned in 2 S 8[1] (AV, RVm, RSV; RV 'the bridle of the mother city'). As a place name it is unknown. It has been thought that 'the bridle of the mother city' means the authority of the capital, *i.e.* the suzerainty exercized by the Philistines. In the parallel 2 Ch 18[1] the text has 'Gath and her daughters' (reading *mtg* as *gt*), and it is probable that the text here is corrupt.

METHUSAEL, Gn 4[18] (AV).—See METHUSHAEL.

METHUSELAH (? 'man of the dart' or 'man of Shelah').—A Sethite, the father of Lamech, Gn 5[21ff], 1 Ch 1[3], Lk 3[37] (AV **Mathusala**); called **Methushael** (q.v.) in Gn 4[18] (AV **Methusael**). He is said to have lived to the age of 969—a greater age than anyone else in the Bible.

METHUSHAEL ('man of El').—A Cainite, the father of Lamech, Gn 4[18] (AV **Methusael**); called **Methuselah** (q.v.) in Gn 21[5ff].

MEUNIM.—One of the Nethinim (q.v.) whose descendants returned with Zerubbabel, Ezr 2[50] (AV **Mehunim**), Neh 7[52]. In 1 Es 5[31] RSV has **Meunites** (AV **Meani,** RV **Maani**). See MAONITES and MINAEANS.

MEUNITES.—See MAANI and MAONITES.

MEUZAL, Ezk 27[19] (AVm).—See UZAL.

ME-ZAHAB ('waters of gold').—Father of Matred and grandfather of Mehetabel the wife of Hadar (Hadad), one of the kings of Edom, Gn 36[39], 1 Ch 1[50]. The name *Me-zahab* is much more like that of a place than of a person. Holzinger suggested that it is the same name as appears in a corrupted form in Dt 1[1] as **Dizahab** (q.v.).

MEZOBAITE.—One of David's heroes is called 'Jaasiel the Mezobaite' (AV **Mesobaite**) in 1 Ch 11[47]. The meaning is unknown, and the text is doubtful.

MIAMIN.—1. Ezr 10[25] (AV); see MIJAMIN, **1. 2.** Neh 12[5] (AV); see MIJAMIN, **2.**

MIBHAR.—In 1 Ch 11[38] one of David's heroes appears as 'Mibhar the son of Hagri.' The parallel passage 2 S 23[36] reads 'of Zobah, Bani the Gadite,' which is probably the correct text.

MIBSAM.—1. A son of Ishmael, Gn 25[13], 1 Ch 1[29]. **2.** A Simeonite, 1 Ch 4[25].

MIBZAR ('fortification').—A 'duke' of Edom, Gn 36[42], 1 Ch 1[53].

MICA.—1. Son of Merib-baal (Mephibosheth), 2 S 9[12] (AV **Micha**); called **Micah** in 1 Ch 8[34f] 9[40f]. See MICAH, **3. 2.** Son of Zichri, 1 Ch 9[15] (AV **Micah**), Neh 11[17, 22] (AV **Micha**); called **Micaiah** in Neh 12[35]. **3.** One of those who sealed the covenant, Neh 10[11] (AV **Micha**).

MICAH, MICAIAH ('Who is like Yahweh?').—This name, which occurs at least twelve times in the OT, and is a woman's name (the sole example, *Micaiah* in 2 Ch 13[2], is textually questionable; see MAACAH, **4**) as well as a man's, is spelt in different ways: the full form *Micayahu* is shortened to *Micajehu, Micaiah,* and *Micah. Mica* may be a variant spelling of *Micah* or an abbreviation of *Michael* ('Who is like God?'). The more important of those who bore this name are the following:

1. *Micah,* a dweller in the hill-country of Ephraim; he stole from his mother eleven hundred pieces of silver, which, however, he returned on hearing the curse which his mother pronounced against the thief. With part of the returned silver his mother causes an image to be made, which Micah sets up in his house; he then consecrates one of his sons a priest. But a Levite, named Jonathan, comes to the house of Micah while journeying; Micah induces him to be his priest instead of the son whom he had first consecrated. During this time the Danites send out five men to search for a suitable locality wherein to settle down; these five men come to the house of Micah, and while staying there they recognize the Levite. On their return they report that they have found a place for their tribe to dwell in. The whole 'family' of the Danites then set out, and come to take possession of the district they intend to make their home. On their coming into the neighbourhood of Micah's dwelling-place, the five men who had already been there come and persuade Micah's Levite to join

them, and to bring with him Micah's ephod, teraphim, and graven image. Micah follows after them; but protests in vain, for he is warned that if he attempts to regain his priest and lost treasures by force he will lose his goods and his life; he therefore returns home without them (Jg 17, 18). This very interesting narrative has undoubtedly a basis in fact: it records—though later editors have somewhat altered its original form—how the sanctuary in Dan first came to be established (see especially Jg 18^{29-31}).

2. *Micaiah, the son of Imlah*; a prophet of Yahweh who is called by Ahab, at the request of Jehoshaphat, king of Judah, to prophesy concerning the result of a projected expedition against the Syrians. In reply to Ahab's inquiry Micaiah first prophesies smoothly; but Ahab bids him speak nothing but the truth; thereupon he foretells the disaster that is to befall the allied armies of Israel and Judah if they go up to Ramoth-gilead to battle. The parable which the prophet then utters is a terrible indictment against the 'lying prophets' of Israel; the blow which one of them thereupon gives him is answered by a further prophecy, this time directed against the false prophet who gave the blow. Micaiah is then commanded to be imprisoned until the king returns in peace; but undaunted, the prophet replies, 'If you return in peace, the Lord has not spoken by me.' The sequel showed Micaiah to have prophesied truly (1 K 22).

3. *Micah*, the son of Meribbaal (1 Ch 8^{34} 9^{40} [2 S 9^{12} **Mica**]). **4.** *Micaiah*, one of the teachers sent by Jehoshaphat to teach the commandments of Yahweh in the cities of Judah (2 Ch 17^{7}). **5.** *Micaiah*, the son of Gemariah, and a contemporary of Jeremiah, who heard Baruch reading out the prophecies of Jeremiah, and then spoke of them to the princes who were assembled in the scribe's chamber (Jer 36^{9-13}), perhaps identical with the *Micaiah* of 2 K 22^{12} and the *Micah* of 2 Ch 34^{20}. **6.** One of the priests who took part in the dedication of the wall (Neh 12^{41}). Other less important bearers of the name are mentioned in 1 Ch 5^{5} 9^{15} (AV; see MICA, **2**) 23^{20} (cf 24^{24}); 2 Ch 13^{2} (see MAACAH, **4**), $12^{35, 41}$ (**Micaiah**; see MICA, **2**), Jth 6^{15} (AV **Mica**). For the prophet Micah see the following article.

W. O. E. O.—W. C. K.

MICAH.—The Morashtite, one of the four prophets of the 8th cent. whose words are preserved for us in the Bible. The book which bears his name stands in EV (and the Hebrew Bible) sixth in order of the so-called Minor Prophets. In the LXX, however, it stands third, being preceded only by Hosea and Amos.

1. The Man and His Times.—Of Micah's life we know no concrete details whatever. His name, a shortened form of *Micayahu*, means 'who is like Yahweh?' He was probably a native of Moresheth-gath (cf 1^{14}), a village of SW. Judah located in the Shephelah near the edge of the Philistine plain. His prophecies indicate profound concern for the plight of the peasant landholders, of whose number he presumably was, and at the same time awareness of conditions in the capital city, Jerusalem, which we may presume he visited frequently. Much of his preaching, indeed, seems to have been done in Jerusalem, his words on occasion (cf 3^{12}, Jer 26^{18f}) reaching the ear of the king. According to the superscription of the book (1^{1}) Micah was active during the reigns of Jotham (742–735), Ahaz (735–715) and Hezekiah (715–687). Though some would restrict his activity entirely to Hezekiah's reign, this seems hardly correct, since certain passages (*e.g.* 1^{6ff}) are best understood as having been uttered at least before the fall of Samaria in 721. That he was still alive in Hezekiah's reign is, however, certain both from Jer 26^{18f} and because some of his words (1^{10ff}) appear to reflect the invasion of Sennacherib in 701, or that of Sargon in 711.

Micah's career thus fell in the generation after that of Amos and ran in good part parallel to that of his more famous contemporary, Isaiah. These prophets lived in a time which found their nation in a continuing emergency. The decades following the death of Jeroboam II. (746) and of Uzziah (742) saw the end of the period of prosperity which Amos addressed and the beginning of the westward expansion of Assyria under Tiglath-pileser III. (745–727). In 735–732, when attacked by Israel and Damascus for his refusal to join them in a defensive alliance against Assyria, Ahaz made himself a vassal of Tiglath-pileser and appealed for his aid (2 K 16^{5-7}); the latter responded by crippling and reducing Israel and destroying Damascus. A few years later, because of further rebellion, Samaria was taken (by Sargon II. in 721) and the N. state ended altogether. Judah, meanwhile, survived as a dependency of Assyria. As a vassal of the Assyrian king, Ahaz was forced to recognize his overlord's gods, and a place was made for their cults within the Temple itself (2 K 16^{10-18}). Since Ahaz likewise permitted all sorts of pagan practices, including human sacrifice, to flourish (2 K 16^{3f}), his reign was remembered as one of unexampled apostasy. This was accompanied, as both Isaiah and Micah let us see, by a social and moral decay for which, moreover, the official religion had no effective rebuke. Hezekiah, to be sure, reversed his father's policy and both attempted to regain his independence and to institute sweeping reforms. In this last the preaching of Micah (and of Isaiah) was influential. Hezekiah was, however, betrayed into relying on Egyptian help in his bid for independence, and this (in 701) brought the Assyrian army down on his country, with disastrous consequences. Though Judah survived, independence was not regained, while Hezekiah's reforms were cancelled by his son Manasseh. How long Micah's activity continued we do not know—possibly as late as 701.

2. The Book of Micah.—Reconstruction of Micah's message is complicated by the critical problems attaching to his book, which are of a magnitude far out of proportion to its size. The book falls into certain clearly marked divisions: chs. 1–3, which contain (except for 2^{12f}) exclusively prophecies of judgment on the national sin; chs. 4–5, which consist almost entirely of words of promise for the future; and chs. 6–7 which (except for 7^{8-20}, a poem of hopeful tone composed on a liturgical pattern) again contain words in which the note of judgment predominates. Though the first of these sections (except for a few verses such as 2^{12f}) is generally conceded to consist of genuine utterances of Micah, there is little agreement among scholars concerning the rest. While some allow almost none of chs. 4–7 to Micah, others, equally competent, would retain the greater part. There is, indeed, scarcely a passage in chs. 4–7 which is not questioned by some and defended by others.

The problem arises chiefly because of the apparent irreconcilability between Micah's message of uncompromising doom as we see it in chs. 1–3 (cf Jer 26^{18}) and passages which offer the nation hope for the future, as well as from the commonly held opinion that much of the material in chs. 4–5, 6–7 reflects later circumstances than those of the 8th cent. Like the other pre-exilic prophetic books, that of Micah came into being through a complex process of transmission and collection; it contains the remembered words of Micah as these were treasured, handed down and collected in circles sympathetic to the prophetic preaching. Since the compilation of the Book of the Twelve Prophets, of which Micah is a part, was not completed until the 4th cent. (or later), the possibility, indeed the likelihood, that it contains later material is to be reckoned with. Nevertheless, caution is indicated. While the book apparently contains exilic or post-exilic touches, it is unlikely that such large portions of it come from a late period as more extreme critics have supposed. Indeed, the bulk of the material of chs. 4–5, 6–7, though one certainly cannot prove that it comes from Micah himself, could be held to represent a type of prophetic preaching current in the late 8th cent.

In 4^{1-5} we have a poem describing the future blessedness of Israel under Yahweh's rule which appears in somewhat shortened form in Is 2^{2-4}. Since the piece sits loosely in context in both books, it is difficult to say in which it is more original. The probability is that it was treasured by disciples of both prophets and so drawn

into the books of both. But reasons adduced for assigning it to a post-exilic date are scarcely convincing, while its presence in the collections of two 8th cent. prophets might indicate that it represents future hopes current in prophetic circles at about that time. The same can be said of the famous oracle concerning the future Davidic king in 5^{2ff}, which is remarkably similar to certain oracles in Isaiah (9^{2-7} 11^{1-9}) the genuineness of which there is no adequate reason to question. Whether Micah's or not, it fits well in the theology of the 8th cent. Indeed, it is not excluded—and many so believe—that it comes from Micah himself. In 4^{8ff} there are, to be sure, exilic touches, as the mention of Babylon in v.[10] indicates. But if this one line be regarded as a gloss (which many scholars believe it to be) adjusting an earlier prophecy to a later situation, nothing in the passage forbids relating it to the 8th cent. In short, with the possible exception (and this not certain) of 3^{12} 4^{6f} 5^{7f}, little in chs. 1–5 need be regarded as of exilic date.

As for chs. 6–7, with the possible exception of 7^{8-20} (and this again contested by some), the same can be said. The material in 6^{1}–7^{6} is certainly basically pre-exilic, and little objective reason exists for denying it to Micah himself. Some to be sure on the basis of the allusion to infant sacrifice in v.[7], place 6^{1-8} in the reign of Manasseh. This would not, of course, even if correct, *a priori* deny it to Micah, who could still have been living at the time. But the suggestion is entirely unnecessary. Infant sacrifice was practised by certain of Israel's neighbours at all periods and, during Ahaz's reign, had been known in Judah. Moreover, though the passage implies knowledge of the custom, it certainly does not require that it was actually being practised in Judah at the time the oracle was uttered. Further discussion of critical issues is impossible here; the commentaries should be consulted for details. The safest conclusion would seem to be that the book of Micah consists basically of the words of Micah himself, plus expressions of the theology of those prophetic circles of his day which transmitted them, together with some (but not as many as frequently supposed) later glosses, expansions and additions.

3. The Message of Micah.—The message of Micah, like that of Isaiah, must be understood against the background of the socio-economic deterioration and the religious laxity which was encouraged by the policy of Ahaz, and which presumably continued until somewhat checked by the reforms of Hezekiah. While there is evidence that neither the infiltration of paganism nor social decay had gone as far as it had in the northern Israel addressed by Amos and Hosea, it is clear that similar tendencies were at work. The aristocracy of Jerusalem was taking advantage of the economic plight of the small landholders and were dispossessing them, often enough by dishonest means ($2^{1f, 9}$). The judges being unscrupulous and venal, the poor had no redress ($3^{1-4, 9f}$). Meanwhile the official cult, being supported by the state and in no position to criticize the nobles who guided the national policy, offered no effective rebuke but, by its stress upon cultic externals (cf Is 1^{10-17}), fostered the notion that Yahweh's demands could be met by ritual and sacrifice alone. Indeed, the clergy as Micah depicts them ($3^{5, 11}$) were corrupt, the priests being concerned chiefly for their livings, the prophets ready to trim their oracles to the size of the fee. It is clear that the nature of the Mosaic covenant with its stringent moral demands had been forgotten in Judah, as it had been in Israel. In fact, the official theology of the state cult which affirmed Yahweh's eternal choice of Zion and of the Davidic dynasty (*e.g.* Ps 89, 132, 2 S 7) stressed a notion of covenant in which Yahweh's promises to the nation were unconditional (cf 3^{11}); it may be supposed that this notion of covenant had largely overlaid the Mosaic covenant in the popular mind.

Micah felt it as his call (3^{8}) to attack these abuses as sins against the covenant God, and this he did fully in the tradition of Amos some decades earlier. It seemed to him (6^{1-8}) that Yahweh had entered His case against His people because they had forgotten His gracious acts towards them in the past and had imagined that the stipulations of covenant could be satisfied by heightened religious activity alone. Going beyond Isaiah, he rejected the confidence implicit in the official theology utterly and declared that Jerusalem would for its sins be ploughed like a field and the Temple left a ruin (3^{12}). Though he met opposition (2^{6}), his words reached Hezekiah's ear (Jer 26^{18f}) and helped to spur that king in his efforts at reform. That Micah had no hope for his nation (especially since Hezekiah heeded his words) is unlikely. The oracle in 5^{2ff}, at least, fits well in the context of 8th-cent. theology, and could well be his. If so, he (or those disciples who preserved his words), though affirming the Divine judgment on Jerusalem and its corrupt rulers and cult, held fast to the hope that God would rescue a remnant of His people (4^{8ff}) and bring out of Bethlehem an ideal scion of David's line under whom the age of promise would be ushered in.

J. Br.

MICAIAH.—See MICAH, and MICA, **3.**

MICE.—See MOUSE, and MAGIC.

MICHA.—**1.** 2 S 9^{12} (AV); see MICA, **1.** **2.** Neh 10^{11} (AV); see MICA, **3.** **3.** Jth 6^{15} (AV); see MICAH, **6.** **4.** Neh $11^{17, 22}$ (AV); see MICA, **2.**

MICHAEL ('Who is like God?').—**1.** Father of the Asherite spy, Nu 13^{13}. **2. 3.** Two Gadites, 1 Ch 5^{13f}. **4.** A Levite, ancestor of Asaph, 1 Ch 6^{40}. **5.** Name of a family in Issachar, 1 Ch 7^{3} 27^{18}. **6.** A Benjamite, 1 Ch 8^{16}. **7.** A Manassite chief who joined David at Ziklag, 1 Ch 12^{20}. **8.** A son of king Jehoshaphat, 2 Ch 21^{2}. **9.** The father of Zebadiah, Ezr 8^{8} (cf 1 Es 8^{34}). **10.** The archangel. See next article.

MICHAEL ('the archangel').—Although reference to angels and their visitations is common in the OT, especially during transition periods (*e.g.* the period of the Judges and that of the Captivity are specially noticeable for angelic appearances), the name *Michael* is not found until the later period, when the angelic office was divided between functions, which were assigned to individual angels. In the Rabbinical traditions Michael figures considerably. He is connected with many incidents in the history of Moses, especially his burial (cf Dt 34^{6}), when he disputed with Satan, who claimed the body by reason of the murder of the Egyptian (Ex 2^{12}). In the OT he is alluded to several times in the book of Daniel ($10^{13, 21}$ 12^{1}) as 'one of the chief princes,' 'the prince,' and 'the prince who has charge of your people,' and he is opposed to the prince-angels of Persia and of Greece. He is here regarded as the guardian of the Israelites in their opposition to polytheism and foreign innovations.

In the NT Michael is found fighting in heaven (Rev 12^{7}) against the dragon 'who is called the Devil and Satan,' and is typical of the warfare which is the special work of the Church on earth. In the passage in Jude (v.[9]) a definite reference is made to the tradition already mentioned, 'When the archangel Michael, contending with the devil, disputed about the body of Moses, he did not presume to pronounce a reviling judgment upon him, but said "The Lord rebuke you"' (cf Zec 3^{1} for a similar incident).

T. A. M.

MICHAIAH.—AV spelling of **Micaiah, 4, 5, 6.** Cf MAACAH, **4.**

MICHAL ('Who is like El').—Younger daughter of Saul, offered to David, as a snare, on condition that he would slay one hundred Philistines. The popularity of David led Saul to seek his life. He had David's house surrounded, but Michal deceived the messengers, and contrived David's escape by the window (1 S 19^{11-17}). Saul then gave Michal to Paltiel. When Abner negotiated with David to deliver Israel to him, the king stipulated for Michal's return. This was accomplished, though the record does not make it clear whether directly from Ishbaal (Ishbosheth) at the instance of David, or through Abner (2 S 3^{14f}). Paltiel followed weeping, but was rudely dismissed by Abner. The closing scene between Michal and David is pathetic. David's dance before the

Ark was unseemly in the eyes of Michal, and she rebuked him. His answer was equally curt. The statement that Michal died childless may mean that she was divorced (2 S 6^{16f}). The estrangement was probably due to the numerous wives that now shared David's prosperity and Michal's authority. In 2 S 21^{8} 'Michal' (so AV, RV, following Heb.) is an error for 'Merab' (so RSV, with 2 Heb. MSS and LXX^{L}). See MERAB.

MICHEAS (2 Es 1^{39} AV) = the prophet Micah.

MICHMAS.—Ezr 2^{27}, Neh 7^{31}, 1 Es 5^{21} (AV, RV **Macalon**) = **Michmash** (q.v.).

MICHMASH.—A place (not enumerated as a town) in the territory of Benjamin, and in the mountains of Bethel, It comes into prominence in connexion with the daring raid of Jonathan and his armour-bearer on a garrison of the Philistines holding a position nearby (1 S 13, 14). It was one of the smaller places to which the returning exiles belonged, contributing only 122 men to the enumeration of Ezra (Ezr 2^{27}) and Nehemiah (Neh 7^{31}). Nehemiah further alludes to it as a border town of Benjamin (11^{31}). Indications of its position may be obtained from the Jonathan story and also from Isaiah's description of the Assyrian advance on Jerusalem (Is 10^{28}), which indicate its location at the modern village of *Mukhmâs* standing high above the E. bank of the *Wâdī Ṣuweinīṭ* at the head of the *Wâdī Qelt*, a wild stony region E. of the watershed of the hills of Palestine. It was occupied for a time by Jonathan the brother of Judas Maccabaeus to counteract the Seleucid garrison at Bethel (1 Mac 9^{73}). R. A. S. M.—**J. Gr.**

MICHMETHAH, Jos 16^{6} 17^{7} (AV).—See MICHMETHATH.

MICHMETHATH.—An Ephraimite town, on the boundary of Manasseh, Jos 16^{6} 17^{7} (AV **Michmethah**). It is possibly modern *Kh. Juleijil*, E. of *Nāblus*.

MICHRI.—Eponym of a Benjamite family, 1 Ch 9^{8}.

MICHTAM.—AV and RV form of **Miktam**; see PSALMS, **2.**

MIDDIN.—A town in the wilderness of Judah, Jos 15^{61}. It is perhaps modern *Kh. Abū Ṭabaq*.

MIDIAN, MIDIANITES.—A nomadic tribe or group of tribes, said by an early genealogy (Gn 25^{2}) to be descended from Abraham by Keturah, of which the Kenites were a part. They lived in ancient times in N. Arabia, E. of the Gulf of *ʿAqaba*. Hab 3^{7} mentions them beside Cushan, Gn 25^{4} and Is 60^{6} beside Ephah. Ptolemy (*Geogr.* VI. 7) and Arabic geographers know of a place called 'Madian' in NW. Arabia. First, they appear in the Bible as caravan leaders and traders, who sold Joseph into Egypt (Gn $37^{28, 36}$). Later, Moses came in contact with them in the Sinai peninsula and married the daughter of a Midianite priest (Ex 2^{15-21}). After the Exodus this priest met the Israelites at the mountain of God and partook with their leaders in a sacrificial meal (Ex 18^{1-12}). Seeing Moses' predicament he counselled him to appoint judges (Ex 18^{13-27}). As Jethro, Moses' father-in-law, is also said to be a Kenite (Jg 1^{16}), probably the Kenites were a part of the Midianites. They were afterwards absorbed by the tribe of Judah (Jg 1^{16}, 1 S 15^{6}).

Some Midianites seem to have been located also in the territory of Moab, since Gn 36^{35} contains the information that a King of Edom smote Midianites in the field of Moab. These northern Midianites were also partly responsible for the apostasy of Israel at Baal-Peor (Nu $25^{6, 15}$), and had hostile encounters with the invading Israelites (Nu 25^{16-18} 31^{1-12}).

In the period of the Judges, the camel-riding Midianites invaded the territory of central Palestine in hordes, and were put to rout by Gideon and his three hundred men (Jg 6–8). Gideon so completely ruined the power of the Midianites that his victory was long remembered as 'the day of Midian' (cf Is 9^{4} 10^{26}, Ps 83^{9}). From this blow the tribe never recovered, and disappears from history. G. A. B.—S. H. Hn.

MIDRASH.—See COMMENTARY.

MIDWIFE.—See MEDICINE.

MIGDAL-EDER.—See EDER, **1.**

MIGDAL-EL.—A town of Naphtali, between Yiron and Horem, Jos 19^{38}. The site is unknown.

MIGDAL-GAD.—A town in the lowland, in the territory of Judah, Jos 15^{37}. It is possibly modern *Kh. el-Mejdeleh*, SE. of *Tell ed-Duweir*.

MIGDOL ('tower,' a Semitic word borrowed by the Egyptians of the New Kingdom, and common as a word and in place-names).—**1.** A place on the border of Egypt near the spot where the Israelites crossed the Red Sea, Ex 14^{2}, Nu 33^{7}; probably a mere guardhouse on the road. **2.** A place mentioned in Ezk 29^{10} 30^{6} (AV, RV 'tower'). Here Migdol is in the NE. extremity of Egypt, as Syene is the S. It may be identical with *Magdolo* in a Roman itinerary, perhaps at the now deserted site of *Tell el-Ḥêr*, 12 miles S. of Pelusium. **3.** An Egyptian town mentioned with Tahpanhes and Memphis, Jer 44^{1} 46^{14}; probably the same as **2.** F. Ll. G.

MIGRON.—**1.** One of the places mentioned in Isaiah's description of the march of the Assyrians on Jerusalem, Is 10^{28}. It would appear to be N. of Michmash (q.v.) and of the *Wâdî eṣ-Ṣuweinīṭ*, which is the 'pass' of Is 10^{29}. The name perhaps survives in *Makrûn*, a ruined site situated a mile or two NW. of Michmash. **2.** In 1 S 14^{2} Saul, whose army was encamped S. of the *Wâdī eṣ-Ṣuweinīṭ*, is said to have dwelt 'under the pomegranate tree which is at Migron.' This is probably *Tell Miryam*, SW. of Michmash. Some would identify **1.** with this site, and regard Is 10^{28} as not giving an orderly geographical route. But this does not seem likely.

MIJAMIN.—**1.** One of those who had married a foreign wife, Ezr 10^{25} (AV **Miamin**), 1 Es 9^{26} (AV, RV **Maelus**). **2.** Eponym of the 6th of the priestly courses, 1 Ch 24^{9}. This family returned with Zerubbabel, Neh 12^{5} (AV **Miamin**); it was represented at the sealing of the covenant, 10^{7}. The name appears as **Miniamin** in 12^{17}.

MIKLOTH.—**1.** A son of Jeiel, 1 Ch 8^{32} 9^{37f}. **2.** An officer of David, 1 Ch 27^{4} (AV, RV, RSVm; RSV omits).

MIKNEIAH.—A gate-keeper for the Ark, 1 Ch $15^{18, 21}$.

MIKTAM.—See PSALMS, **2.**

MILALAI.—The eponym of a priestly family, Neh 12^{36}.

MILCAH.—**1.** Daughter of Haran and wife of Nahor, Gn 11^{29}. The names of her children are given in 22^{20ff}. Rebekah was her granddaughter, $24^{15, 24, 47}$. **2.** Daughter of Zelophehad, Nu 26^{33} 27^{1} 36^{11}, Jos 17^{3}.

MILCOM.—The national deity of Ammon. Solomon established a sanctuary for him on the Mount of Olives, which seems to have continued till it was destroyed by Josiah (1 K $11^{5, 33}$, 2 K 23^{13}). In 2 S 12^{30} (cf RVm), 1 Ch 20^{2} (cf RVm), Jer $49^{1, 3}$ (RV), Zeph 1^{5} (RV; AV **Malcham**) **Malcam** ('their king') is probably an incorrect vocalization of *Milcom* (so RSVm in 2 S 12^{30}, 1 Ch 20^{2}, RSV in Jer $49^{1, 3}$, Zeph 1^{5}). The name is from the common Semitic root *malk, melekh* ('king' or 'prince'), probably with an inflectional termination. The traditional identification of Milcom with **Molech** is based only upon 1 K 11^{7}, a verse which is probably corrupt. See MOLECH. W. M. M.

MILDEW (*yērāḳôn*), Dt 28^{22}, 1 K 8^{37}, 2 Ch 6^{28}, Am 4^{9}, Hag 2^{17}, is a disease of grain due to various fungi; it is produced by damp, and is in the above passages associated with *shiddāphôn*, '**blasting**' the opposite condition produced by excessive drought.

MILE.—See WEIGHTS AND MEASURES.

MILETUS.—The southernmost of the twelve colonies forming the Ionian confederacy of Asia Minor. It lay on the S. coast of the Latonian Gulf, which penetrated Caria S. of the peninsula of Mycale, and received the waters of the Maeander. See Map 16. The silt of this river filled up the gulf, and Miletus is now 5 miles from the sea, while the former island of Lade, which helped to make its harbour, is now a hill rising in the alluvial plain.

Two visits of St. Paul to Miletus are mentioned. The

first (Ac 20[15]) took place when he was returning to Jerusalem at the end of the Third Missionary Journey. He stayed long enough to send for the elders of Ephesus, and give them the farewell charge recorded in Ac 20. This probably needed two days. A second visit is mentioned in 2 Ti 4[20] 'Trophimus I left ill at Miletus.' This must have been between St. Paul's first and second imprisonment at Rome, *i.e.* if there were two imprisonments. In neither case are we told of any attempt to found a church at Miletus. Miletus was already unimportant by comparison with Ephesus, which now received the trade of the Maeander valley, and shared with Smyrna the trade that came along the great road through the centre of Asia Minor. Ephesus was recognized by the Romans as the southern capital of the province of Asia. Formerly Miletus had led Ionia. Its trade was mainly in wool, and it had founded numerous colonies on the Black Sea and Propontis (Sinope, Trapezus, Abydos, Cyzicus), besides Naucratis in Egypt. It had led the Ionian revolt, the fate of which was determined by the battle of Lade and the capture of Miletus, 494 B.C. It had defended itself on behalf of the Persian power against Alexander in 334 B.C. Its ruins are now called *Palatia*. They seem to include few Christian remains, but Miletus was a bishopric, and from the 5th cent. an archbishopric. A. E. H.—F. C. G.

MILK.—Milk was at all times an important article of diet among the Hebrews, and by ben Sira is rightly assigned a prominent place among the principal things necessary for man's life (Sir 39[26]). It was supplied by the 'herd' and the 'flock,' the latter term including both sheep and goats (Dt 32[14], where render 'sour milk or curds (RSV) [*ḥem'āḥ*] of the herd, and milk [*ḥālābh*] of the flock'), probably also by the milch camels (Gn 32[15]). At the present day goats' milk is preferred to every other.

In Bible times, as now, milk slightly soured or fermented was a favourite beverage. The modern Bedouin prepares this sour milk, or *leben*, as it is called, by pouring the fresh milk into a skin (cf Jg 4[19] 'she opened a skin [AV and RV 'bottle'] of milk and gave him a drink'), to the sides of which clots of sour milk from a previous milking still adhere. The skin is shaken for a little, when the process of fermentation speedily commences, and the milk is served 'with that now gathered sourness which they think the more refreshing' (Doughty, *Arabia Deserta*, i, 263). Such was the refreshment with which Jael supplied Sisera. 'He asked water, and she gave him milk; she brought him curds (*ḥem'āh*) in a lordly bowl' (Jg 5[25], where AV and RV have 'butter,' but one does not *drink* butter; cf 4[19] cited above).

In several OT passages, however, this word, *ḥem'āh*, does evidently signify **butter**, as in Pr 30[33] 'the churning (literally as RSV and RVm 'pressing') of milk bringeth forth butter.' So Ps 55[21] RV, 'his mouth was smooth as butter,' where 'sour milk' is clearly out of place. The former passage suggests the procedure of the Arab housewife whom Doughty describes (*op. cit.* ii, 67) as 'rocking her blown-up milk-skin upon her knees till the butter came; they find it in a clot at the mouth of the skin.' Butter cannot be kept sweet under the climatic conditions of Palestine, but must be boiled, producing the *samn* or clarified butter universally prized throughout the East.

Cheese is mentioned three times in our EV (1 S 17[18] 2 S 17[29], Job 10[10]); in each case the original has a different word. The clearest case is the last cited; the text of 2 S 17[29], on the other hand, is admittedly in disorder, and we should perhaps read, by a slight change of consonants, 'dried **curds**'; these, when rubbed down and mixed with water, yield a refreshing drink much esteemed at the present day. From the Mishnah we learn that rennet and the acid juices of various trees and plants were used to curdle (Job 10[10]) milk. After being drained of the whey—'the water of milk'—the curds were salted, shaped into round discs, and dried in the sun. The Tyropoeon valley in Jerusalem received its name, 'the valley of the cheesemakers,' from the industry there carried on.

There has been a good deal of discussion as to the origin of the popular expression '**flowing with milk and honey**,' so frequently used in OT to describe Palestine as an ideal land abounding in the necessaries and delicacies of life. Many scholars have demurred to the traditional view that this is expressed by the words 'milk and honey,' on the principle of the part for the whole, and favour a more recondite origin in a forgotten Palestinian mythology. This explanation would bring the phrase in question into line with the equally familiar 'nectar and ambrosia' of Greek mythology.

The thrice repeated command: 'You shall not boil a kid in its mother's milk' (Ex 23[19] 34[26], Dt 14[21]) has been established as reflecting a ritual practice. It occurs as a positive command in the Râs Shamra tablets, and is prohibited in OT 'to avoid its heathen associations' (J. W. Jack, *The Râs Shamra Tablets*, p. 32).

A. R. S. K.—B. J. R.

MILL, MILLSTONE.—1. Three methods of preparing **flour** were in use in Palestine in Bible times, associated with the **mortar** and **pestle** (see MORTAR AND PESTLE), the **rubbing-stone**, and the quern or **handmill.** The most primitive apparatus was the rubbing-stone or corn-rubber, which consisted really of two stones. The one on which the corn was ground was a substantial slab, often 2½ feet long, and about a foot wide, slightly concave and curving upwards, like a saddle, at both ends (illustrated in Macalister, *Bible Sidelights*, etc., fig. 28). The other, the rubbing-stone proper, was a narrow stone from 12 to 18 inches long, pointed at both ends and also slightly curved, one side being plain and the other convex. In manipulating the rubber, the woman grasped it by both ends and ground the grains of wheat or barley with the convex side. Cf Macalister's description in *PEFSt*, 1903, p. 118, with Schumacher's photograph reproduced by Benzinger, *Heb. Arch.*[3] (1927) 63, and the Egyptian statuette in Erman's *Ancient Egypt*, 190. Vincent in his *Canaan d'après l'exploration récente* (405, fig. 282) shows a corn-rubber of flint from the palaeolithic age!

2. The more familiar apparatus for the same purpose was the handmill or quern. As in so many instances (see, *e.g.* LAMP), excavations have now enabled us to trace two distinct stages in the evolution of the Palestinian handmill. The Gezer specimens described in detail in *PEFSt*, 1903, 119, belong to the earlier type, which is distinguished from the later form by the absence of a handle for rotating the upper stone. The quern-stones 'are always small, rarely being as much as a foot across.' The lower stone, the 'nether millstone' of Job 41[24], was always more massive than the 'upper millstone' (Dt 24[6]), and was apparently fitted with 'a narrow spindle' sunk into the stone. The upper stone was pierced right through, and by this hole the mill was fed. According to Macalister, 'the upper stone was grasped with both hands (the fingers clasping the edge, the thumbs being between the spindle and the stone), and worked through about one-third of a rotation, backward and forward.' For varieties of this type, see *PEFSt*, 1903, 119 f.

In the later and more effective type of handmill, which was that in use in NT times, the stones were larger, although the lower stone was still considerably wider than the upper (*Baba bathra*, ii. 1). As in the querns of the present day, the latter was fitted with a wooden handle (*yādh* in the Mishnah) in the shape of an upright peg inserted near the outer edge. The mill was fed, as before, through a funnel-shaped cavity pierced through the upper stone, which was rotated by the handle through a complete circle. Sometimes, as appears from Mt 24[41], two women worked the mill, seated opposite each other, and each turning the upper stone through half a revolution, as may still be seen in the East.

By the first century of our era a larger and different form of mill had been introduced, apparently, to judge by the names of the various parts in the Mishnah (see

article 'Mill' in *EBi* iii, 3093), under Graeco-Roman influence. In the larger specimens of this type, the upper millstone, in the shape of two hollow cones, as described in detail, *loc. cit.*, was turned by an ass, and is the 'great millstone' of Mt 18[6] RV, RSV (literally as RVm 'a millstone turned by an ass').

3. The work of the mill belonged at all times to the special province of the women of the household (Mt 24[41]). In large establishments, it fell to the slaves, male (Jg 16[21]) and female (Ex 11[5]), particularly the latter, hence the figure for the slavery of captivity in Is 47[2].

The finer varieties of meal, the 'fine flour' of OT, were got by repeated grinding, or by sifting with sieves, or by a combination of both processes.

How indispensable the handmill was considered for the daily life of the family may be seen from the provision of the Deuteronomic legislation forbidding the creditor to take in pledge the household mill (so rightly RV and RSV), or even the upper millstone, 'for he taketh a man's life to pledge' (Dt 24[6]).

Since Professor Kennedy's article was written the number of actual millstones recovered from archaeological sites has increased, as have also details about their size and the way they functioned. But a comprehensive survey of them has still to be undertaken. A useful source of information is Dalman, *Arbeit und Sitte in Palästina*, i–vi. 5, 1928–1939.

A. R. S. K.—B. J. R.

MILLENNIUM.—A period of a thousand years, during which, according to Rev 20[2–7], Satan (the Dragon, the old serpent) is to be confined in the abyss, while the martyrs, having been raised from the dead, are to reign with Christ as priests and judges. The locale is apparently earth (20[3, 8f]), though this is disputed. The period begins with this first resurrection, and at its end, Satan, prior to his destruction, is to be released for a time to deceive the nations and war against the saints in the beloved city (20[9]).

This reference in Revelation is unique in the NT, but behind it evidently lie older hopes, *e.g.* Dn 7[9ff], Ezk 38 f, Apoc. Bar 73[3], 2 En 32 f, 4 Ezr 7[27ff]. Enoch speaks of a millennial 'sabbath of rest,' and it is possible to trace this conception in Persian sources. Zoroastrian parallels, however, are hardly relevant for understanding John's vision. His Christian martyrs are singled out for special distinction as the reward for fidelity and suffering (cf Rev 2[11, 26f] 3[21]), because the situation at the time made it imperative to show that martyrdom would not be in vain. The glorious status of 1[6] 5[10] is reaffirmed, and with it responsible functions in the Divine economy, but no details are worked out (cf 1 Co 6[2f] for the thought). The second coming of Satan is perhaps a counterpart to the parousia of Christ. Good powers, and evil, spring up like geysers, and complacency is dangerous; yet there will be an End when Death and the Devil are finally conquered. This corresponds to 1 Co 15[24–26], Col 1[13], though Paul nowhere makes explicit a connexion of Christ's rule with a millennium.

In the history of the Christian Church the doctrine of the Millennium has played a considerable rôle, but CHILIASM (q.v.) has been opposed by most of the great theologians. In modern times the pre-millenarians hold that all Christians will be raised, not only martyrs, when Christ returns before the millennium begins. Such an interpretation distorts the texts and is over-literal, for apocalyptic vision has its own peculiar ideas about Time. On the other hand, the symbolism of Revelation is sometimes dismissed too readily, and thus also its positive message (cf Mt 19[28], Lk 22[30] for Jesus' teaching about the thrones; note Mk 13[32]). The fundamental difficulty in erecting the pre-millennial view into a doctrine of essential Christianity is that it presupposes conditions and expectations, carried over from Judaism, which the course of history has shown to be most unlikely. Nevertheless, the idea that the created order will be ultimately perfected through the absolute triumph of our God and his Christ remains part and parcel of the genuine Christian Hope.

S. M.—G. J.

MILLET.—Mentioned only in Ezk 4[9] as an ingredient in bread. It is probably *Sorghum vulgare*. See FOOD, **2.**

MILLO.—Properly **Beth-millo** (Jg 9[6, 20]), a place in the Shechem area, the inhabitants of which were closely associated with those of Shechem in the coronation of Abimelech. It is commonly identified with the 'Tower of Shechem' (Jg 9[46ff]), and probably was the fortified acropolis in the upper city of Shechem (cf B. W. Anderson, *BA*, xx [1957], 15). Another possibility is that it was a military outpost some distance from the city proper (cf J. Simons, *The Geographical and Topographical Texts of the Old Testament* [1959], p. 143). It was destroyed by Abimelech *c* 1100 B.C. Joash was slain at a 'Beth-millo on the way that goes down to Silla' (2 K 12[20]). An identification with the Shechem Millo is unlikely; neither the identification nor the location of either place mentioned here has been determined. On the 'Millo' of 2 S 5[9], 1 K 11[27] etc. see Jerusalem, II, **4.**

R. A. S. M.—D. N. F.

MINAEANS.—A S. Arabian people. It is doubtful whether they are mentioned in the OT. The Septuagint translators identified them with the **Meunites** mentioned in 1 Ch 4[41], 2 Ch 26[7] and also by correction of text 2 Ch 20[1]. Strabo lists the Minaeans as one of the four major peoples of Arabia in his day, and says the name of their capital was Karna (see SHEBA). The Minaean inscriptions give it as *Qrnw*, generally vocalized as *Qarnāwu*. The ruined site has been known only as *Ma'în* in more recent times. Halévy and Glaser collected numerous inscriptions there. It is in the area called the *Jauf*. For a long time scholars thought that the Minaean hegemony in Arabia antedated the Sabaean (see SHEBA). But recent explorations and studies have disproved that. Palaeographic criteria, made available through the publication of actual photographs of Minaean inscriptions, play an important rôle, Three main groups of kings of the Minaeans are known. The first, beginning with Ilyafi' Yithi' reigned 400–200 B.C.; the second group held control over **Dedan** (q.v.) and ruled from 200–75 B.C.; the third seems to have been vassal of Qataban, and under it the Minaean kingdom ended, between 50 and 25 B.C. Other cities of the Minaeans were *Yathil*, *Nashk*, *Neshan*, *Harim* and *Kamna*. The Minaean chief gods were *'Athtar*, *Wadd*, *Nakrah*, and *Shams*. Minaean inscriptions from Dedan speak of the dedication to the god Wadd of persons designated as *lawi'u* and *lawi'atu*. A connexion with the name of the priestly tribe of Levi in Israel seems possible. Cultic terms similar to Hebrew ones also occur in these texts.

E. G. K.

MIND.—See PSYCHOLOGY.

MINIAMIN.—**1.** A Levite in the days of Hezekiah, 2 Ch 31[15]. **2.** Neh 12[17]; see MIJAMIN, **2.** **3.** A priest who took part in the ceremony of the dedication of the walls, Neh 12[41].

MINING AND METALS.—Though Palestine proper is deficient in mineral resources, yet these were present to some extent on its borders, and were not only abundantly found, but even largely developed, in other parts of the ancient East. The Scripture references to mining, accordingly, though not very numerous, are sufficiently definite. Such a passage as Dt 8[9] (cf 33[25]) holds good for the eastern side of the Jordan Valley and the Arabah where remains of extensive iron and copper mines have been found. The ore removed from these mines was processed at Solomon's great port on the Red Sea, Ezion-Geber. For a description of the mines and the vast refinery at Ezion-Geber, see Nelson Glueck's *The Other Side of the Jordan* (1940), chs iii and iv. The passage may also refer to the Lebanon district, or the region of Sinai, especially at Serābīṭ el-Khâdim where the Egyptians operated important turquoise mines. These were worked by Semitic slaves who left some of the earliest alphabetic inscriptions known (from the 15th cent. B.C., in a West-Semitic dialect akin to Hebrew). The classical description of the miner's life in Job 28 is evidently based on observation. It depicts the adventurous and toilsome

character of the quest, the shafts sunk and the galleries tunnelled in the rock, the darkness, the waters that have to be drained away, the hidden treasures of precious stones and metals that reward the effort and the ingenuity of man.

The list of metals in Nu 31[22] includes all those that are mentioned in Scripture, viz. gold, silver, 'brass,' iron, tin, and lead. All these are again enumerated in Ezk 27[12f, 22] as articles of Tyrian commerce.

Brass.—This English word, as late as 1611, denoted **copper** or **bronze** (an alloy of copper and tin) rather than the modern brass (an alloy of copper and zinc). Hence, where 'brass' occurs in EV, copper or bronze is to be understood (see RVm on Gn 4[22], and article, BRASS).

Copper occurs once in AV (Ezr 8[27], RV 'bright brass,' RSV 'bright bronze'). But see on 'Brass' above and 'Steel' below.

Gold is a metal the use of which can be traced back to the earliest times of civilization. As a medium of currency it was reckoned by weight, in shekels and talents, coinage being unknown among the Jews before the Exile. While it figured in the history of Israel from the beginning (see the spoils of Egypt [Ex 12[35]], Midian [Nu 32[52], Jg 8[26]], and Jericho [Jos 7[21]]), it became specially plentiful in Palestine in the time of Solomon (1 K 10[14, 21]), the main sources of it being Ophir (1 K 9[28] 10[11]), Tarshish (1 K 10[22]), and Sheba (1 K 11[2], Ps 72[15]). Another gold-producing country was Havilah (Gn 2[11]). Of these localities Havilah and Sheba were Arabian. Ophir (q.v.) may have been the same, though its situation has also been sought in India and S. Africa. For **goldsmiths** see Neh 3[18, 21, 32], Is 40[19] 41[7] 46[6], also (RV, RSV) Jer 10[9, 14] 51[17]. The products of their art comprised beaten work (Ex 25[18] 37[17, 22], Nu 8[14] 37[7], 1 K 10[16f], 2 Ch 9[15f]), plating (Ex 25[11, 24] 26[29, 32] 30[3]), and wire or thread for embroidery (Ex 39[3]).

Iron appears to have come into use later than copper or bronze. Its ores are found in the Lebanon district, in the region of Sinai, and sparsely in Egypt. The most famous ancient seat of its manufacture was among the Chalybes in the Highlands of Assyria. Mining for the ore is mentioned in Job 28[2]; the 'iron furnace' in Dt 4[20], 1 K 8[51], Jer 11[4]; and the forge in Is 44[12]. In modern times iron is separated from its ores as cast iron, from which wrought iron and steel are subsequently prepared. But in ancient times the temperature necessary to melt iron was unavailable, and it must have been produced as wrought iron, which is still obtained by primitive smelting processes in various parts of the world. The uses of iron alluded to in Scripture are very varied, but call for no special comment. In Dt 3[11] and possibly in Am 1[3] 'iron' means black basalt.

Lead is mentioned in Jer 6[29], Ezk 22[18–22] in connexion with the smelting of silver (see 'Silver' below). Its weight is referred to in Ex 15[10]. The 'ephah' in Zec 5[7f] had a leaden covering. Rock-cut inscriptions were made more durable by having the chiselled letters filled up with lead (Job 19[24]).

Silver, like gold, was a very early medium of exchange (Gn 23[15f]). The Hebrew and Greek words for silver are often rendered 'money' in EV. There are frequent references in OT to the use of this metal for vessels and ornamental work. In NT there is special mention of the guild of **silversmiths** at Ephesus, and of the 'shrines' or models of the temple of Diana which were their most profitable article of trade (Ac 19[24]). Among the sources of the metal, Arabia (2 Ch 9[14]) and Tarshish (2 Ch 9[21], Jer 10[9], Ezk 27[12]) are named. The commonest ore of silver is argentiferous galena, which contains a large quantity of lead, and in which other metals may also be present. In the course of smelting the lead combines with the other impurities to form a heavy 'slag,' which separates by its weight from the molten silver, leaving the latter pure. This process is referred to, usually in a figurative moral sense, in Ps 66[10] (cf Is 48[10]), Pr 17[3] 25[4] 27[21], Zec 13[9], Mal 3[3], and especially in Jer 6[28–30] and Ezk 22[17–22]. In the last two passages lead is the most prominent impurity, the others being 'brass', iron, and tin. The mixture of these was the refuse or 'dross' of silver (see also Is 1[22, 25]).

Steel (2 S 22[35], Job 20[24], Ps 18[34], Jer 15[12]) is a mistaken translation in AV of the words elsewhere rendered 'brass.' RV has 'brass' in these passages, and RSV has 'bronze.' Only in Nah 2[3] is 'steel' a possibly correct rendering of *pᵉlādhôth*; but RSV renders 'flame.' Steel is a form of iron containing more carbon than wrought iron. It is capable not only of being welded but also cast, and tempered to various degrees of hardness and elasticity.

Tin derived its importance from its use as a constituent of bronze (an alloy of copper and tin). It is mentioned as an article of Tyrian commerce in Ezk 27[12], and as an impurity in silver in Ezk 22[18] (cf Is 1[25]; RVm, RSV '**alloy**'). Its earliest sources are uncertain, but it appears to have come to the East from the West. It is known that the Phoenicians obtained it from the Scilly Isles and Cornwall.

Flint is a form of silica, and occurs abundantly, in the form of nodules, in many of the limestone rocks of Palestine. It is exceedingly hard, and its property of sparking when struck on steel or on another flint provided a very ancient and common means of obtaining fire (2 Mac 10[3]). Flint has a sharp edge when broken or chipped, and was used for primitive weapons and instruments of many kinds—arrow-heads, knives, etc. For the latter see Ex 4[25] (RV, RSV), Jos 5[2f] (RV, RSV). In other Scripture references to flint its hardness is chiefly in view (Dt 32[13], Job 28[9] RV, Is 5[28] 50[7], Ezk 3[9]).

Marble is limestone (carbonate of lime), hard, and close-grained enough to be polished. The purest forms are white, but many coloured varieties are highly valued. Marble was among the materials prepared by David for the Temple (1 Ch 29[2]). Josephus (*Ant.* VIII. iii. 2 [64]) says that Solomon's Temple was built of white stone from Lebanon, but the stones exposed in the Jews' Wailing Place appear to be from the neighbourhood of Jerusalem, probably from the quarries under Bezetha. Marble supplies a simile in Ca 5[15], and is mentioned among the merchandise of 'Babylon' in Rev 18[12].

J. Pk.—D. N. F.

MINISH.—The modern form is 'diminish.' 'Minish' occurs in AF and RV in Ex 5[19] (RSV 'lessen'), Ps 107[39] (RSV 'diminish'), and in RV in Is 19[6] (RSV 'diminish'; AV 'be emptied'), Hos 8[10] (RSV 'for a little while'; cf AV).

MINISTER.—The word 'minister' comes from the Latin *minister* = '**servant,**' and generally it may be said that wherever it is found in the Bible, whether in OT or in NT, its original meaning is its primary one, service being the idea it is specially meant to convey.

1. In OT it is used (corresponding to the same Hebrew word in each case) of Joshua as the personal attendant of Moses (Ex 24[13], Jos 1[1]), of the servants in the court of Solomon (1 K 10[5]), of angels and the elemental forces of nature as the messengers and agents of the Divine will (Ps 103[21] 104[4]; cf He 1[7, 14]), but, above all, of the priests and Levites as the servants of Yahweh in Tabernacle and Temple (Ex 28[35], 1 K 8[11], Ezr 8[17], and constantly). At first an Abraham as *paterfamilias* might sacrifice to God (Gn 12[7f]); later, holy men like Samuel were set apart (1 S 9[13]). Scholars are sharply divided on the prophets' relation to the cult, but kings certainly were sacral personages (2 S 1[14], 1 K 8[12ff], Zec 6[13]; cf He 7[1]), for they were God's servants and 'sons' (Ps 2[7] 89[20]). The secular uses show that the Hebrew word was not in itself a priestly term. Ministry was not necessarily a priestly thing, though priesthood was one form of ministry.

2. In NT several Greek words are translated 'minister,' three of which call for notice. (1) *Hypēretēs,* frequently for officer or guardsman (Mt 5[25], Jn 18[3] etc.), is found in Lk 1[2] 4[20], Ac 13[5] 26[16], 1 Co 4[1]. At Lk 4[20] RSV has properly substituted '**attendant**' for 'minister' to avoid misconception. The servant of the synagogue at Nazareth to whom Jesus handed the roll was the *ḥazzān,*

a paid official, some of whose duties corresponded to those of an English verger or a Scots beadle. 'Minister' is used by RSV only in Lk 1[2], and in the other cases it has 'to assist,' 'to serve,' and 'servants.' In Lk 1[2], Ac 26[16], and 1 Co 4[1] *hypēretēs* describes the minister of Christ or of the word in a sense that is hardly distinguishable from that of *diakonos* (see below).

(2) *Leitourgos*, and its cognates, refer in classical Greek to one who renders special services to the commonwealth, without any suggestion of a priestly ministry. But in the LXX they are regularly applied to the ministry of priests and Levites in the sanctuary. No NT writer, however, by his usage ever suggests the discharge of special priestly functions on the part of an official Christian ministry. Either the reference is to the old Jewish ritual (Lk 1[23], He 9[21] 10[11]), or the word is employed in a transformed sense (Ro 15[16], Ph 2[17]; cf Col 1[28], He 9[9f]); or, again, it is applied to a service of Christian charity (2 Co 9[12], with *diakonia*; Ph 2[25, 30]) or of prayer (Ac 13[2f]) from which ideas of priestly ritual seem to be absent. At Ro 13[6] even political authorities are called 'ministers of God.'

(3) *Diakonos*.—It is significant that *diakonos* and *diakonia* are found instead of the *leitourgos* group when the ideas of minister and ministry are to be expressed. This corresponds with the fact that the priesthood of a selected class has been superseded by Christ's as High Priest (Hebrews, *passim*; cf Col 1[22], Eph 5[27]) and by the universal priesthood of the Church, his Body (1 P 2[9]). It corresponds also with the fact that a ministry of lowly and devoted service (which *diakonia* particularly implies, Lk 17[7ff]; cf 'slaves' applied by St. Paul to himself and his colleagues, Ph 1[1] etc.) has replaced the old ministry of exclusive privilege and ritual performance. *Diakonia* is the distinctive Christian word for 'ministry,' and *diakonos* for 'minister' (Ac 1[17, 25], Ro 12[7], Col 1[7], 1 Th 3[2]). These nouns and the related verb have a wide range of application in NT. The personal services rendered to Jesus by devout women (Lk 10[40], cf 8[3], Jn 12[2], Mt 27[55]), and to St. Paul by Timothy and others (Ac 19[22], Phn[13]) are described as forms of ministry. The true disciple of Jesus is his *diakonos* (Jn 12[26]), for Jesus is Master as well as Teacher (Jn 13[13] 15[15]). Nor will the minister of Christ fail to minister also to the brethren, since his gifts have been provided by the Spirit for the common good (1 Co 12[5, 7], 1 P 4[10]). The example of Jesus evoked obedience, inspiring His followers (Ro 15[8]; cf Jn 13[15], Ph 2[7]), and our Lord explicitly presented Himself as the minister of His Father (Mk 10[45], Lk 22[27], 'I am among you as one who serves,' Jn 4[34]). Again, His disciples are related to Him as He is to the Father (Mt 10[40], Lk 10[16], Jn 13[20] 20[21] 21[15–17], 1 P 2[25]), and before them is set the glory and the greatness of service (Mk 9[35], 'If any man would be first, he must be last of all and servant of all'). The Body of Christ, however, had special organs of Ministry from the first, made possible by endowments of the Spirit (Ro 12[6–11], 1 Co 12[4–11, 28–30]), and all united in the bond of love (1 Co 12[31]–14[1], Col 3[14]). There were differences of function, indeed, and, above all, the distinction between those who were ministers of the word (apostles, prophets, and teachers, Ac 6[4], 1 Co 12[28], 2 Co 3[6], Eph 3[6f] 4[11]) and those whose contribution lay in gracious acts of benevolence or in administration (Ac 6[1ff] 9[36], Ro 12[8], 1 Co 12[9f, 28]). Whatever might be the 'varieties of service' (and the variety is important), the word *diakonos* covered them all (1 Co 12[5]) because spiritual qualities outweighed formal status. At a later stage in Paul's lifetime the word *diakonos* is already appropriated to the deacon (q.v.) as distinguished from the presbyter-bishop (Ph 1[1]; cf 1 Ti 3[1–13]). Eph 4[11] marks a trend toward regarding ministries as offices, perhaps. But even in the later NT period *diakonos* still continues to be used in its wider sense, for the Paulinist author of the Pastorals exhorts 'Timothy,' an apostolic delegate with diocesan authority, to be 'a good minister (*diakonos*) of Christ Jesus' (1 Ti 4[6]).

MINISTRY.—The foregoing article has sufficiently dealt with the general idea of ministry, but more must be said about the official Christian ministry as it begins in the NT period.

1. Jesus called Twelve as colleagues, and they are described as 'apostles' (Mk 3[14] 6[7, 30] and ||s, Jn 6[67] 20[21–23]). In Ac 1[26] Judas' place is filled by Matthias and to the teaching and fellowship of the Apostles the converts adhere (Ac 2[42]). The primary apostolic vocation is to preach the word (Ac 6[2]) but Philip, one of the Seven, is such a preacher (Ac 6[5] 8[5] 21[8]); so were Barnabas and Saul (Ac 9[15, 20, 29] 11[26] where their teaching should not be limited to doctrinal instruction). Hence we find others than the Twelve called 'apostles' (Barnabas, Ac 14[14]; James the Lord's brother, Gal 1[19]; Andronicus and Junias, Ro 16[7]), though sometimes the term may be restricted, as in Ph 2[25] (Epaphroditus) and 2 Co 8[23]. There were also false apostles (2 Co 11[13] 12[11]; cf Rev 2[2]). Technically, an *Apostle* is one of the Twelve companions of Jesus, reinstated by the Easter appearances (1 Co 15[5–7]); or one divinely commissioned through a similar vision (1 Co 15[7–9] 9[1]); and one whose calling is attested by spiritual gifts in his converts (1 Co 9[2], 2 Co 12[11]). Such status conferred authority (2 Co 13[10]) which Paul exercised to purify congregations, to extirpate heresy, and to maintain genuine Christian traditions (2 Th 2[15], 1 Th 4–5, Gal 1[6–9], 1 Co 5, 11[23] 15[3]). Later the Church was regarded as being grounded on the apostolic witness (Eph 2[20] 3[5], 2 Ti 3[10f], He 2[3], 2 P 1[12ff] 3[2], Jude 17, Rev 21[14]) and its scriptural canon enshrined their legacy (cf Lk 1[2], 2 P 3[15f]). Clearly very few could qualify as companions of Jesus, but there had to be many to whom might be granted, through the Spirit, authority like Paul's. This apostolic succession appears in the 'Timothy' and 'Titus' of the Pastorals and in local ministries. Charismatic gifts were much emphasized, and there were *prophets*, *teachers*, and (rarely) *evangelists*, whose work could not have been confined to one congregation (1 Co 12[28f], Eph 4[11]; for prophets, see also Ac 11[27] 15[32] 21[10]; for evangelists, Ac 21[8], 2 Ti 4[5]; for teachers, Ac 13[1], 1 Ti 2[7], 2 Ti 1[11], Ja 3[1]). That the prophetic ministry in its various forms was a ministry rather of function than stated office may be shown by the fact that the same person might be at once apostle, prophet, and teacher (cf Ac 13[1] 14[14], 1 Co 14[18f], 1 Ti 2[7], 2 Ti 1[11]). Spiritual gifts, however, were not confined to those thus described: 1 Co 12 has both a local and a universal reference (cf Eph 4[12], 'to equip the saints for their ministerial work').

2. Jerusalem had *elders* as well as Apostles, doubtless on the Synagogue model, and the pattern is repeated in the great Gentile Mission (Ac 11[30] 14[23] 20[17, 28]). James may have become president of the Christian elders, but note the distinction of Peter (Mt 16[18]). Pauline evidence corroborates Acts: see 1 Th 5[12], 1 Co 16[15f], Col 1[7] 4[12, 17], Phn 1[1], Ph 1[1] (bishops and deacons) 2[25] 4[3]. '*Elder*' and '*bishop*' are synonyms (Ac 20[17, 28]). Thus, local churches were governed by a presbytery of bishops whose authority derived from the Spirit (Ro 12[6–8]) in conformity with apostolic tradition and to edify the faithful (1 Co 12[7], 2 Co 13[10]). Definite functions are stated only in Ac 20[28] (to be overseers and to feed the flock), with which compare the Qumrân overseers (*mᵉbhakkēr*, *pāḳîdh*, 1*QS* 6[12, 14, 20], *CD* 9[18] 13[7] 14[8]). Institutional and charismatic elements coexisted, but Paul demanded control of the latter by love (1 Co 14). The Seven (Ac 6) are variously regarded; for Luke they may have been prototypes of the deacons, but they may have been simply *ad hoc* servants.

3. Presbyter-bishops continued for some time (1 P 5[1–5], Ja 5[14]). The beginnings of monepiscopacy may be seen in 2, 3 Jn and the Pastorals. Their duties remained to feed the flock and help the weak, to visit and pray for the sick, to rule and teach, to discipline heretics. Professionalism appears in 1 P 5[2] and possibly 1 Ti 5[17] (cf also Gal 6[6], 1 Co 9[3–7]). The *deacons* seem to have been assistants (1 Ti 3[8–13]), though we must wait until Justin Martyr for more precise details. Little is said about the liturgical duties of ministers (see Ac 10[48], 1 Co 1[17], 1 Ti 2[1f, 8] 4[5, 13] 5[22]). The *deaconess* (possibly Ro

16[1], but not 1 Ti 3[11]) is a vague figure, and the order of widows (1 Ti 5[9ff]) was probably not ministerial. Tension between the charismatic prophet and the local ministry is attested by the *Didache* (10[7] 13[3]), a source of very dubious value. NT makes no real break between clergy and laity. See, further, APOSTLE, BISHOP, DEACON, EVANGELIST, LAYING ON OF HANDS, PROPHET IN NT.

J. C. L.—G. J.

MINNI.—A people named in Jer 51[27] along with the Armenians ('Ararat') and Scythians ('Ashkenaz') as coming assailants of Babylon. They are the *Mannai* of the Assyrian inscriptions, who dwelt between the lakes Van and Urmia. J. F. McC.

MINNITH marks the direction in which Jephthah pursued the defeated Ammonites from Aroer, Jg 11[33], *i.e.* Aroer, **1** (q.v.). The site has not been recovered. That indicated in the *Onomasticon*, 4 miles from Heshbon on the way to Philadelphia, seems too far to the S. Minnith appears to have been famous for the high quality of its wheat, Ezk 27[17] (AV, RV; RSV emends the text and renders 'wheat, olives'); cf 2 Ch 27[5].

MINT (Gr. *hēdyosmon*, Mt 23[23], Lk 11[42]).—One of the trifles which were tithed; primarily, perhaps, peppermint (*Mentha piperita*), but including also allied plants, such as the horse mint (*M. sylvestris*), which grows wild all over Palestine. E. W. G. M.

MIPHKAD, GATE OF, Neh 3[31] (AV).—See MUSTER GATE.

MIRACLES.—A miracle is any event regarded as an act of God.

1. Translations.—The word miracle as it occurs in the English Bible represents a variety of terms in the original languages. The most common Hebrew words are *'ōth, mōphēth, pele'*, and *niphlā'ōth*. Greek uses *sēmeion, teras, ergon, dynamis*. The Vulgate translates these words as *signum, ostentum, mirabilium, miraculum, portentum, virtus*, and *prodigium*. In its renderings of the different terms the AV makes frequent use of *sign* and *wonder*, as do most of the other English translations, but it has used *miracle* five times in the OT and thirty-two times in the NT, a total of thirty-seven times in the Bible. The ASV completely eliminated the word miracle from the OT, but used it eight times in the NT (Lk 23[8], Ac 4[16] 4[22] 8[13] 19[11], 1 Co 12[10] 12[28] and Gal 3[5]). The RSV reinstates *miracle* three times in the OT (Ex 4[21] 7[9], Ps 78[11]), but uses it only six times in the NT (Ac 8[13] 19[11], 1 Co 12[10] 12[28], Gal 3[5], He 2[4]), deleting it in Lk 23[8], Ac 4[16] and 4[22], but restoring it in He 2[4].

The five OT passages in which AV uses miracle are Ex 7[9], Nu 14[22], Dt 11[3] 29[3] and Jg 6[13]. The Hebrew words in these respective passages are *mōphēth, 'ōth, 'ōth, mōphēth*, and *niphlā'ōth*. ASV has translated these words as *wonder, sign, sign, wonder*, and *wondrous works*. RSV has *miracle, sign, sign, wonder*, and *wonderful deeds*, thus reinstating *miracle* in Ex 7[9]. But RSV has also introduced *miracle* in Ex 4[21] for *mōphēth*, which both AV and ASV give as *wonder*. The LXX translated it as *teras*, and the Vulgate as *ostentum*. In the five passages where AV uses *miracle* LXX has *sēmeion* or *teras* for Ex 7[9], and *sēmeion, sēmeion, teras*, and *thaumasion* for the others.

The Hebrew noun *pele'*, or the verb from which it is derived, occurs three times in Is 29[14], which AV translates, 'I will proceed to do a marvellous work among this people, even a marvellous work and a wonder.' The Vulgate says, 'Admirationem faciam populo huic miraculo grande et stupendo.' RSV renders it, 'I will again do marvellous things with this people, wonderful and marvellous.' In Ex 15[11] *pele'* is translated by LXX as *teras* and by Vulgate as *mirabilium*; by AV, ASV and RSV as *wonder*.

A wide vista of meaning for *niphlā'ōth* opens in Job 9[10], where it refers to all the wonderful phenomena of the natural world as acts of God. The LXX says here *mirabilia*; AV, *wonders*; ASV and RSV, *marvellous things*. In Ps 78[11], where it refers to wonders of the Exodus, RSV translates it *miracles*.

In twenty-three of the thirty-one times in the NT where AV uses *miracle* the Greek is *sēmeion*; in eight it is *dynamis*. ASV uses *miracle* for *sēmeion* three times in the NT; for *dynamis* five times. In the NT, RSV has consistently rendered *sēmeion* as *sign* and *dynamis* as *miracle*, with the exception of Ac 2[22], where it is *mighty work*.

None of the translations here considered has dealt adequately with *ergon* in such passages as Jn 5[20] 5[36] 6[28] 7[21]. Literally of course it means work. The Vulgate renders it as *opus*; AV, ASV, and RSV as *work*. But in 7[21] RSV translates it *deed*. The context makes it clear, however, that the work is a miracle.

Thus there is a tendency in recent English versions to avoid *miracle* and to differentiate the Hebrew and Greek words more frequently by resorting to *signs, wonders, wondrous works*, etc. But it is doubtful that this effort has been more successful than AV. For it is obvious that all of these terms as they occur in the Bible are intended to indicate Divine action. The words *sign, wonder*, and *wondrous work* have become so secularized in English that they no longer carry the full miraculous content of the originals. *Miracle*, on the other hand, denotes Divine activity with less ambiguity than any other word in English. With respect to miracles AV is superior to its successors.

2. Definition of Miracle.—The widely prevalent idea that a miracle is a historical event which violates the laws of nature is unsatisfactory in several respects. First, because many persons believe that nature itself is the work of God; and that it would be out of character for God to do exceptional things which violate the procedures which He ordinarily follows; for faith must hold a concept of God which is consistent with itself. Again, the view is superficial in assuming that there is an order of nature and that we know all of its laws, so that we can recognize a miracle when it occurs. Both this mechanistic view of nature and that extent of man's knowledge of it are unjustified at the present time.

The view that a miracle is an external sensible event inexplicable by laws known to us, but not a violation of laws of nature, while less objectionable, still leaves much to be desired. It is arbitrary in limiting miracles to external events, whereas faith is more concerned with the inner life than with external things. The view is unacceptable also in saying that a miracle is inexplicable by laws known to us. The fact is that we are learning new laws all the time. Therefore, as scientific research progresses faith might lose its support in miracles entirely.

Another view of miracle is that it is simply an expression of a law which is unknown to us, but which we might finally discover. This is a possibility, but the objection to this view, just as to that above, is that with the advance of science religion might be deprived of the miracles by which it lives. The view allows that all events of whatever kind might in time be restricted to a realm of nature which operates according to mechanistic laws. In such an order miracles could not exist, at any rate as they are popularly conceived.

St. Augustine (A.D. 354–430) was one of the first great Christian theologians to be concerned with the question of miracles. In his *City of God* he is sharply critical of the view expressed even in his time that nature is a closed mechanistic system. He points out numerous events which he thinks refute such a view. While some of the examples he cites would not be acceptable to us, his main point is still valid. For him the answer to the question of miracles is in God, who creates and controls the universe. Whatever happens is His will. This applies to miracles as well as to what are usually called natural phenomena. Since both types of events are expressions of the will of God, there can be no conflict between them. There is no problem of belief in miracle if you believe in God. All nature is therefore miraculous. In other words, everything in the universe is a miracle, although there are of course familiar and unfamiliar miracles.

The view of St. Thomas Aquinas (1225–1274) was that

there is an order of nature, and that miracles are outside of that order, but that they are not in violation of it. He differs from Augustine by giving more place to the emerging scientific idea with its concept of a rigid natural order, and by restricting miracles to events which God causes to take place outside of the order of nature. His position continues to our time to be the most popular concept of nature and miracle in theological thought. The weakness of this view, however, is that it tends to exile God from the natural world and to deprive faith of its support in the wonders of nature.

René Descartes (1596–1650) stated the question of miracle with original insight when he said : *Tria mirabilia fecit Dominus* : *res ex nihilo, liberum arbitrium et hominem Deum.* ' The Lord has performed three miracles : the universe out of nothing, the free will, and the Incarnation.' The strength of Descartes' view is that it affirms those miracles which are the essence of Christian faith. Whether other miraculous events have occurred, or may occur, is thus not of primary concern. If historical research should indicate that some of the miracle stories are legends, that would also be no threat to faith. Descartes thus made a profound clarification of the concept of miracle.

Baruch Spinoza (1632–1677) also made an important contribution to religious thought, although he actually denied that miracles occur. Nature was for him a closed system. He thought of everything in terms of universal law, outside of which nothing could happen. Therefore no miracle could conceivably take place. Spinoza either reduced all miracles to legends, or to events which occurred according to natural law. But he was a truly religious man. He had a reverent view of the world of nature and was moved by the marvels which he saw there. His faith was not based on miraculous events outside the world of nature. This position is unacceptable to us insofar as it views nature as a closed system ; nevertheless modern theological thought is indebted to him. He made it possible for many persons who had lost their faith, which was based on what they had come to regard as legends, to recover their belief in God through contemplating the wonders of the universe itself.

David Hume (1711–1776), who is widely known for his scepticism, also actually gave assistance to theology, but in a negative way. He demonstrated that the person who attempts to follow reason alone as his guide will probably end up as a sceptic. While he doubted that miracles have ever occurred, his position tends to confirm the Biblical teaching that man walks by faith, not by sight.

3. Miracles and science.—All through the centuries, whenever miracle has created a problem for faith, it has been as a result of scientific and philosophical theories about the nature of the world. Science by its very nature assumes that the world with which it deals is orderly. It describes the cosmos in terms of universal laws and of interlocking causal chains which traverse it, so that everything that happens can be interpreted in terms of cause and effect. This view is inevitable. Otherwise, its experiments have no validity, and scientific knowledge is not real. While such a position is necessary for science, it obviously undermines the basis of moral character and religious faith. It denies morality by reducing personality to the influence of forces of heredity and environment over which man has no control. Man is therefore a product of universal determinism. He could not be other than what he is. Therefore he is not responsible for his actions. This view yields a materialism of which man is a part, and from which there is no escape.

We do not need to deny that there is order in the universe, and that there are mechanistic elements in nature with which science can deal. Heredity affects personality ; so does environment ; but to recognize a measure of determinism in the world is not to say that the universe as a whole is deterministic. Studies of science itself seem to refute the view that nature is a completely deterministic system controlled by inexorable laws.

A notable example of this has resulted from the discoveries of atomic physics. The ancient belief that the atom is an indivisible particle of solid matter has been abandoned in favour of an electronic concept. It is now conceived of as an elemental quantum of vibrant energy, which is composed of still smaller electric particles that constitute its nucleus. The movements of these particles in the nucleus of the atom conform to no observable pattern. Here we stand before what appears to be an example of discontinuity in nature. This discovery has led to a new concept of the order of the natural world. In atomic nuclei, which are the basis of all physical objects, only disorder is to be seen. So we have the paradox in the physical world of order emerging out of disorder. The order is of a statistical kind. It is an order of averages, and it is in fact only approximate.

Biology presents a similar picture. Views of evolution are based on the theory of mutation. A new form appears which is different from anything which has preceded it. It possesses a new character, and is able to become the first example of a new species because it has the ability to reproduce this unique character. Such a form is called a ' mutant.' While the biologist can recognize one when it appears, he cannot explain why it appears. All that he knows is that it has appeared. He can see no necessity in laws of heredity that requires its appearance. Discontinuity seems therefore to be basic also in living matter.

A third and more important example of discontinuity is mind itself. The unique thing that differentiates man from all other creatures is his intelligence. By means of mind, man is not only able to study the world about him, and to use it for his own purposes, but he can also observe himself. He is conscious of himself as a person, and can analyse himself. By means of the freedom which he thus possesses he is able to a considerable extent to transcend the limitations both of the world about him and of himself. It is also this freedom which enables him to choose between good and evil and thus become a moral person. So man possesses the freedom necessary to become a scientist, a philosopher, an artist, as well as to hold a faith.

If we define the natural world as the mechanistic area of the universe with which science is concerned, and in which its experimental procedures can operate, then those areas in which mechanism is transcended, where freedom prevails, should be regarded as supernatural. Thus in the atomic nucleus, in biological mutation, which is the mystery of life, and in the transcendent power of mind, which is able to recognize and contemplate these wonders and to worship the Power which they manifest, science itself draws back the curtain from the continuing miracles of our world. It appears that there is no segment of the universe, not even a small one, over which absolute mechanism ultimately holds dominion.

4. Biblical Miracles.—The miracles of the Bible fall naturally into different categories. (1) *The resurrection of Jesus.*—This is the supreme miracle for Christians because of its uniqueness. The evidence for it is recorded in the Gospels and the Acts of the Apostles, but the earliest record of it is the account by Paul in 1 Co 15^{4-8}, which was probably written about fifteen years earlier than Mark, the oldest Gospel. Here Paul affirms that his message to the Corinthians had stated that ' he [Christ] was buried, that he was raised on the third day according to the scriptures, and that he appeared to Cephas, then to the twelve. Then he appeared to more than five hundred brethren at one time, most of whom are still alive, though some have fallen asleep. Then he appeared to James, then to all the apostles. Last of all, as to one untimely born, he appeared also to me.' For Paul, resurrection is understood in a spiritual sense. There is no reference to an empty grave or a physical body. Paul goes on to make it clear in 15^{50} that, according to his view, ' flesh and blood cannot inherit the kingdom of God.' His testimony is based on the testimony of eyewitnesses who are still alive when he writes. He is overwhelmingly convinced that Christ arose from the tomb.

There can be no doubt that this faith was the foundation and inspiration of the Christian Church. It is clear, however, that some statements in the Gospels present the resurrection of Jesus as a physical event. It was also understood in this way in some of the later traditions, and this view has continued in many sections of the Church through the centuries.

(2) *The miracle of faith.*—This is the primordial miracle of the individual spiritual life. It is the foundation of Biblical religion. In Gal 3[6] Paul traces it back to Abraham. The author of Hebrews in 11[4] carries it all the way to Abel. Their insight is correct. All of the devout people of the Bible were familiar with this miracle. In the OT one finds it at its best in the Psalms, but there is abundant evidence of it elsewhere also. It has led both Jews and Christians to feel that they are children of God. In Gal 4[5-6] and Ro 8[15] Paul describes this experience as the spirit of adoption, which causes one to cry out, 'Abba! Father!' while Jn 3[3-8] goes so far as to call it a new spiritual birth. This miracle of faith is the only miracle which a person knows at first hand. It makes it possible for him to believe in other miracles. It is the one irrefutable datum of religion. But it is not something which can be demonstrated by science or history; one can only bear testimony to it. Eph 2[8] calls it a gift of God.

(3) *Miracles in nature.*—We have already seen how science opens up some of the wonders of nature which it is unable to penetrate. But is this not similar to the admiration and awe and the apprehension of God which the authors of the creation stories of Genesis felt as they looked out upon the physical world? Does it not remind us of the Biblical writers who saw the glory of God in the heavens, in fire, wind, rainfall, lilies of the field, and the conception and birth of children? Paul was so impressed that he felt that atheism has been without excuse ever since the world was created (Ro 1[19-20]).

(4) *Miracles of history.*—It is assumed as a matter of course in the Bible that God is the sovereign of history. This view appears inescapable for mature monotheism. It is manifested first in the intense conviction of the Hebrews that God was in control of their destiny. They were convinced above all that it was God who delivered them from Egypt and led them into Canaan. But Amos affirmed (8[7]) that God had also led the Philistines and Syrians in the same way; and all of his great successors saw the judgments of God in the rise and fall of all the nations. This is the inevitable view of history as it is seen with eyes of faith.

(5) *Miracles of healing.*—Both OT and NT record miraculous cures of disease. In the OT these cures are associated mainly with Elijah and Elisha; in the NT they are attributed often to Jesus, but also to a considerable extent to His disciples. Miraculous cures have continued to be reported in various sectors of Christianity down to our own time. Pagan religions also have reported divine healing. Among the Greeks and Romans the temples of Aesculapius specialized in curing disease. Records of such cures have been found in the ruins of temples at Epidaurus and Rome. It seems evident that faith in God is a therapy which sometimes can cure disease; also that Biblical people had no monopoly of it. This is an area in which one must be on guard against legends. We have no way of controlling either the diagnosis or the cures of the ancient ailments.

There seems no doubt that Jesus was successful in curing various types of disease. Some of the cases, such as the healing of leprosy, or of blindness from birth, and the raising of the dead, are beyond our understanding and power to confirm, but we should not deny that God has power to do these things. Exorcism of demons falls more nearly within our ability to understand. The vocabulary and practice of exorcism were probably only the ancient way of dealing with neuroses and psychoses. Mk 9[14-29] shows epilepsy; Mk 1[23-28] and Ac 16[16-18] are probably the psychosis of hysteria; the demoniac in Mk 5[1-20] and King Saul in 1 S 16[14f] and 18[10f] are examples of the manic-depressive psychosis (cf my *By the Finger of God,* New York: Macmillan, 1951). Other examples of demon possession in the Bible are not described fully enough to allow diagnosis. That Jesus and the disciples were able to relieve such cases is supported by the achievements of contemporary psychiatrists. There is no good reason to doubt the essential authenticity of records of this type.

(6) *Signs and Wonders.*—While these two topics are treated more fully elsewhere, they are mentioned here for completeness. They are the type of phenomena found in the various ancient religions, where they are usually called omens, portents, or prodigies. They may be movements of heavenly bodies, earthquakes, storms, eclipses, strange births, signs observed in sacrificial victims, etc. Such things had little place in the lives of the great prophets of the OT, and Jesus Himself refused to give a sign to validate His mission (Mk 8[12], Mt 4[1-11]). But more popular traditions of the OT, such as those of the Exodus, and later elements in the Gospels and Acts, made a considerable use of phenomena of this type. We have no way of either proving or disproving that they occurred, but for that very reason they are an unsubstantial basis for faith.

(7) *Allegories.*—Biblical writers were gifted story-tellers. The allegory was one of their specialities. The problem of miracle in some cases will be resolved when we recognize that the story was written as an allegory. The saga of Samson is a good example, which portrays with humour and pathos the struggle between Hebrews and Philistines. The story of Jonah, with its lesson about the universality of God, is another. This is the most likely approach also to the cycle of stories in Daniel; and some of the miracles of Jesus, especially in the Gospel of John, carry an allegorical meaning. The truth presented by an allegory does not depend for its validity on whether the story itself actually occurred.

5. Miracles as evidence.—This is the question of how faith comes; and in turn one must ask, What is the nature of faith? Is it the same as historical information, or scientific data, or the result of philosophical thought? The answer is No. It is more than any or all of these together. History, science, and philosophy are expressions of reason. The truth which they discover is an achievement of reason. Faith does not turn its back upon reason, but it goes beyond. It has more of the nature of intuition. Even the rational disciplines of history, science, and philosophy are based on postulates which are themselves not discovered by reason, but are the intuitions of faith. How faith is related to miracle stories in the Bible, it is difficult to say. But once faith is achieved, one is immediately able to understand many statements in the Bible about God's acts in nature, history, and human personality. Experiences of Biblical people have been a strong support to the faith of later generations. Faith has often been acquired by reading the Bible. But it is more often acquired from other persons, especially in the family, among friends, and in the Church. The birth of faith in the heart is a mystery which we do not understand.

There is probably no definition of miracle which will be entirely satisfactory. What one person sees as a miracle will be regarded by another as merely a natural event. The concept of miracle rests on the presupposition of God. Unless one believes in God he will see no miracle. Once he has achieved faith in God, however, the problem of miracle vanishes. As an intelligent person he will, of course, recognize that some miracle stories are legends, but of the possibility of miracle, of the existence, power, and activity of God in the world he will have no doubt. God was the presupposition of Biblical people, just as nature is the presupposition of secular thought in our time. In order to understand the experience of miracle we must first break the shackles which secular philosophy has bound upon us. It is necessary for us to rediscover that the natural world, history, and human personality were originally and still are God's creation; and that the wonders which

we see in them all are His miracles. See SIGNS, WONDERS. S. V. McC.

MIRIAM.—1. The sister of Moses and Aaron, probably older than either. It was she who watched Moses in the ark of bulrushes, Ex 2^{4ff}. She is called 'the prophetess,' and led the women in the song of victory at the Red Sea, Ex 15^{20f}. In the course of the wilderness wanderings she combined with Aaron against Moses, and was punished by leprosy, which was healed in answer to the prayer of Moses, Nu 12^{1-15}. She died in Kadesh towards the end of the wilderness journey, Nu 20^{1}. Her story is referred to in Dt 24^{8-9} in connexion with the ceremonial law of leprosy, and in Mic 6^{4} she is spoken of along with Moses and Aaron as a leader of the people. The name Miriam is perhaps of Egyptian derivation (Gardiner suggests 'beloved of Amūn'); in Greek it became Mariam and Mariamme, whence Maria and Mary. **2.** A man (or woman) of the family of Caleb, 1 Ch 4^{17}.

MIRMA, 1 Ch 8^{10} (AV).—See MIRMAH.

MIRMAH.—Eponym of a Benjamite family, 1 Ch 8^{10} (AV **Mirma**).

MIRROR.—See GLASS.

MISAEL.—1. 1 Es 9^{44} (AV, RV); see MISHAEL, **2.** **2.** Ad. Dn 3^{66} (AV, RV); see MISHAEL, **3.**

MISGAB.—Mentioned in AV and RV along with Nebo and Kiriathaim in the oracle against Moab, Jer 48^{1}. Perhaps it is not intended as a proper name (RSV 'the fortress'; cf RVm). The same Hebrew term occurs in Is 25^{12}, where AV and RV render 'high fort' and RSV 'high fortifications.'

MISHAEL.—1. A Kohathite, Ex 6^{22}, Lv 10^{4}. **2.** One of Ezra's supporters, Neh 8^{4}, 1 Es 9^{44} (AV, RV **Misael**). **3.** See MESHACH.

MISHAL.—A town of Asher, Jos 19^{26} (AV **Misheal**); given to the Gershonite Levites, 21^{30} (in the parallel 1 Ch 6^{24} called **Mashal**). The site is unknown.

MISHAM.—Eponym of a Benjamite family, 1 Ch 8^{12}.

MISHEAL, Jos 19^{26} (AV).—See MISHAL.

MISHMA.—1. A son of Ishmael, Gn 25^{14}, 1 Ch 1^{30}. **2.** The eponym of a Simeonite family, 1 Ch 4^{25f}.

MISHMANNAH.—A Gadite chief, 1 Ch 12^{10}.

MISHNAH.—See TALMUD.

MISHRAITES.—A family of Kiriath-jearim, 1 Ch 2^{53}.

MISPAR.—One of the exiles who returned with Zerubbabel, Ezr 2^{2}, 1 Es 5^{8} (AV, RV **Aspharasus**); called **Mispereth** in Neh 7^{7}.

MISPERETH.—See MISPAR.

MISREPHOTH-MAIM.—From the waters of Merom the defeated Canaanites fled to Great Sidon, and unto Misrephoth-maim, Jos 11^{8}. It marks the S. boundary of the Sidonians, who had not been driven out by Joshua, 13^{6}. The ladder of Tyre formed a natural limit to the territory of the Sidonians. It is probably modern *Kh. el-Musheirefeh.*

MITE.—See MONEY, **7.**

MITHCAH, Nu 33^{28f} (AV).—See MITHKAH.

MITHKAH.—One of the stopping-places on the wanderings, Nu 33^{28f} (AV **Mithcah**). The site is unknown.

MITHNITE.—An else unknown gentilic applied to one of David's officer's in 1 Ch 11^{43}.

MITHRADATES, 1 Es $2^{11,16}$ (RV).—See MITHREDATH, **1, 2.**

MITHREDATH ('a gift of Mithra').—**1.** The Persian treasurer, whom Cyrus commanded to deliver to Sheshbazzar the sacred vessels, Ezr 1^{8}; **Mithridates** in 1 Es 2^{11} (RV **Mithradates**). **2.** Apparently a Persian officer stationed in Samaria. Together with his colleagues he wrote to Artaxerxes I to hinder the re-building of the walls of Jerusalem, Ezr 4^{7}; **Mithridates** in 1 Es 2^{16} (RV **Mithradates**).

MITHRIDATES.—See MITHREDATH, **1, 2.**

MITRE.—With the exception of Zec 3^{5} (AV, RV; RVm, RSV '**turban**' for which see DRESS, **5** (*a*) where it represents the Hebrew *ṣānîph*, and Ezk 21^{26} (RV, AV '**diadem**,' RSV 'turban'), on which see below, 'mitre' is used in AV and RV exclusively of the characteristic headdress of the Jewish high priest. It is always replaced by 'turban' in RSV. The mitre (Heb. *miṣnepheth*, from the same root as *ṣānîph*, signifying to 'wind round,') was an elaborate species of turban, composed of a long swathe of 'fine linen' (Ex 28^{39}) 16 cubits in length, according to the Talmud. Its precise form, however, is uncertain; the descriptions given by Josephus of the high-priestly mitre of his day, besides being obscure in themselves, agree neither with one another nor with the OT text.

On the common assumption that the Priests' Code originated in Babylonia, it is probable that the mitre was intended to have the conical form characteristic of the tiara of the Babylonian kings. For ornament it had a 'plate of gold' on which were engraved two Hebrew words signifying 'holy to the Lord,' Ex 28^{36}, Lv 8^{9} (cf Sir 45^{12}). The plate rested on the front of the mitre, and was kept in position by a blue-purple ribbon (Ex 28^{37} 39^{31}), which probably served as a fillet and was tied behind perhaps with the ends hanging down, as in the case of the jewelled diadem or fillet worn by the Assyrian kings. Hence the fillet could be described as 'the holy crown' (Lv 8^{9}), and by ben-Sira as 'a gold crown upon his turban' (AV, RV 'mitre'). The royal crown of Judah, according to Ezekiel (21^{26}), consisted of the same two parts. This passage is our warrant for saying that the headdress prescribed for the high priest in the Priests' Code, consisting of mitre and diadem, is intended to signify that the high priest shall unite in his person the highest office in both Church and State.

The headdress of the high priest is always distinguished from that of his subordinates, for which see BONNET.

A. R. S. K.

MITYLENE was the chief town of Lesbos on its E. coast, subsequently giving its name to the whole island. It was one of the early Aeolian colonies, and one of the earliest homes of Greek lyric poetry—the birthplace of Sappho and Alcaeus. It attained great naval power, and founded colonies such as Sigeum and Assos. It took a prominent part in the Ionian revolt, but helped Xerxes against Greece. It joined the Athenian alliance, but revolted in 428 B.C. and was nearly annihilated. After opposing Rome in the Mithridatic War, it was made a free city. It has belonged to the Turks since A.D. 1462. Its mention in Ac 20^{14} is merely incidental; St. Paul's ship spent a night there. A. E. H.

MIXED MULTITUDE.—A description given (1) to certain persons who joined Israel in the Exodus from Egypt (Ex 12^{38}), and who fell a lusting at Kibroth-hattaavah (Nu 11^{4} AV, RV; RSV 'rabble'); (2) to those who were separated from the Israelites after the return from the captivity, Neh 13^{3} (AV, RV; RSV 'those of foreign descent').

In Ex 12^{38} those referred to are probably strangers of non-Israelite or half-Israelite origin. The Hebrew consonants (differently pointed) mean either 'mixed' or 'Arabian,' and some have suggested that we ought here to translate 'Arabians.' The same Hebrew word is translated in RV (cf AV) 'mingled people' in Jer 25^{20} (RSV 'foreign folk') 50^{37} (RSV 'foreign troops'), Ezk 30^{5} (RSV 'Arabia'), where it has been thought to refer to foreign mercenaries. In Ezk 30^{5} 'Arabians' gives a better meaning. The Hebrew word in Nu 11^{4} is a different one, and is probably a contemptuous term, signifying the mob, the rabble.

The context in Neh 13^{3} leaves no doubt as to the meaning. The reference is to the strangers with whom the Israelites had intermarried and the children of such alliances. W. F. B.

MIZAR.—Apparently the name of a hill in Ps 42^{6}. If so it must be a peak of the Hermons, otherwise unknown. Alternatively, it may be an appellative, 'the

little.' Some read *har* (' O hill ') for *mēhar* (' from the hill ') and render ' O thou little hill,' *i.e.* Zion.

MIZMOR.—See PSALMS, 2.

MIZPAH, MIZPEH.—These words (from *ṣāphāh*, to 'look out,' especially as a watchman) mean ' outlook point.' They are the names of several places and towns located both E. and W. of the Jordan River, all presumably situated on elevated spots, and all probably ancient sacred places. The sites of several are, however, uncertain. Both names are usually preceded by the Hebrew article; the Hebrew consonants are the same and the final vowel alone differs. RSV regularly transliterates the name as Mizpah except in four instances (Jos 11^{8} 15^{38} 18^{26}, 1 S 22^{3}) where *Mizpeh* is used.

1. Mizpah in Gn 31^{49}, where Jacob and Laban made their covenant together, and where the name is explained by a popular etymology, from the words used by Laban in the so-called Mizpah benediction: ' The Lord *watch* between you and me, when we are absent one from the other ' (and interpose, it is implied, if either attempts to take advantage of the other). The name has not been preserved, and hence the site cannot be located with certainty. On the strength of v.^{48} where the ' heap of witness ' called Galeed (q.v.) may be another designation of Mizpah, it has been argued that the latter did not designate a town but a memorial cairn or pillar. However, since Jacob's itinerary from Haran must have taken him through the territory later designated as Gilead, some scholars have proposed that this Mizpah must be identical with the **Ramath-mizpeh** of Gad (Jos 13^{26}), and Mizpah of Gilead (Jg 10^{17}, 11^{29}). A location at *Khirbet Jel'ad*, S. of the Jabbok River has been suggested (see L. H. Grollenberg, *Atlas of the Bible* [1957],p. 157).

2. The ' land of Mizpah,' at the foot of Hermon, in Jos 11^{3}, probably the same as ' the valley of Mizpeh ' in v.^{8}. This ' Mizpah,' or ' Mizpeh,' has been identified with the Druse village of *Mutallah* (the ' climbed up to '), on a hill 200 feet high, at the S. end of the broad and fertile plain called the *Merj 'Ayūn* (the ' meadow of *'Ayūn*,' overlooking the basin of Lake Huleh, a little N. of *Abil*, and 8 miles WNW. of *Bāniyās* (Robinson iii, 372 f). This, however, is thought by some to be not far enough to the E. (notice ' under Hermon ' v.^{3} and ' eastward ' v.^{8}); and Buhl (*GAP*, 240) conjectured that it may have been the height on which are now the ruins of the Saracenic castle *Qal'at es-Subēbē*, 2 miles above *Bāniyās*, on the NE. In the former case the ' land ' of Moab would be the *Merj 'Ayūn* itself, between the rivers *Līṭânī* and *Ḥāṣbānī*; in the latter, it would be the plain stretching down from *Bāniyās* towards Lake Huleh.

3. Mizpeh in Jos 15^{38}, in the Shephelah, or ' lowland ' of Judah, mentioned in the same group of cities as Lachish (q.v., now identified with *Tell ed-Duweir*, about 25 miles SW. of Jerusalem). According to Eusebius (*Onom.* 279), there was a Mizpeh in the district of Eleutheropolis (*Beit-Jibrîn*, 23 miles SW. of Jerusalem), on the N., and another on the road from Eleutheropolis to Jerusalem. The former of these descriptions would suit *Tell eṣ-Ṣāfiyeh*, on a hill of white chalk 7½ miles NNW. of Beit-Jibrîn, with a commanding view that recalls the early meaning of the name ' Mizpah.'

4. The Mizpah of Jg 10^{17} $11^{11, 34}$, Jephthah's home—apparently, to judge from the narrative, not very far from the Ammonite territory, and (11^{33}) the Aroer in front of Rabbath-ammon (Jos 13^{25}, see RABBAH). The exact location is uncertain. Several scholars have proposed the *Jebel Osha'*, about 16 miles NW. of *'Ammân*, the highest point of the mountains (*c* 3600 ft.) S. of the Jabbok River, commanding a view of almost the whole Jordan Valley, as well as of much of the country opposite, on the W. of Jordan (Conder, *Heth and Moab*, 186f). If the ' Mizpeh of Gilead ' and ' Ramath-mizpeh ' (see above at **1**) are actually the same city, which was also the meeting place of Jacob and Laban, and the home of Jephthah, then *Khirbet Jal'ad*, as suggested above, may be the location. The Mizpah mentioned by Hosea (5^{1}) is usually understood as referring to a city E. of the Jordan River; the fact that he mentions it without identifying it more specifically may be an indication that there was only one Mizpah near the Jabbok River and that it was a city which, in Hosea's day, had reverted to paganism, although in earlier times it had sacred associations with the Hebrews.

5. Mizpeh of Moab (1 S 22^{3}—' Mizpeh ' is perhaps also to be read in v.^{5} for ' stronghold ' although a proper name here requires an unlikely emendation of the Hebrew and is not supported by the LXX), the residence of the king of Moab when David consigned his own parents to his care. It must have been situated on some elevated site in Moab, but its exact location is unknown.

6. The Mizpah, on the W. of Jordan, mentioned in Jg $20^{1, 3}$ $21^{1, 5, 8}$, 1 S 7^{5ff} 10^{7} as a meeting-place of Israelites on important occasions; in 1 K 15^{22} (2 Ch 16^{6}) as fortified by Asa; in 2 K $25^{23, 25}$, Jer $40^{6, 8}$, and several times besides in Jer 40, 41, as the residence of Gedaliah, the governor appointed by Nebuchadnezzar over Judah after the capture of Jerusalem in 586 B.C.; and in Neh $3^{7, 15, 19}$ which suggests that Mizpah served as a capital of a district in Judah after the Babylonian Exile. The same place appears to be intended by the ' Mizpah ' of 1 Mac 3^{46} (AV **Maspha**, RV **Mizpeh**; Gr. *Massēpha*, as often in LXX for ' Mizpah,' *e.g.* Jg $20^{1, 3}$), ' opposite Jerusalem,' and formerly a ' place of prayer ' (*i.e.* ' sanctuary ') for Israel; here the faithful Israelites assembled after Antiochus Epiphanes had desecrated the Temple and stopped all worship in it. The allusions to Mizpah discussed thus far indicate that one city of this name is involved and that it must have been located N. of Jerusalem in the region of Gibeah and Gibeon which are often mentioned with it as if they were not far away.

This Mizpah was identified by Robinson (i, 460) with *Nebi Samwîl*, a hill 4½ miles NW. of Jerusalem, 2935 feet above the Mediterranean, and some 500 feet above the surrounding plain (notice ' gone *or* came up ' in Jg 20^{3} $21^{5, 8}$), with a commanding view of the surrounding country (*ibid.* 457 f). Although other sites for Mizpah have been proposed, many scholars have followed Robinson in his identification. *Nebi Samwîl* is 3 miles WNW. of Gibeah (cf Jg $20^{1, 3ff}$), 2 miles S. of Gibeon (q.v., cf Neh 3^{7}), and a little W. of the present road from Jerusalem to Ramallah. It is the actual point from which travellers ascending by the ancient route through the pass of Beth-horon caught their first glimpse of the interior of the hills of Palestine. ' It is a very fair and delicious place, and it is called Mount Joy, because it gives joy to pilgrims' hearts; for from that place men first see Jerusalem ' (Maundeville, cited in *SP*, p. 214). Its present name, *Nebi Samwîl* (the ' Prophet Samuel '), is due to the Moslem tradition that it was Samuel's burial-place (cf 1 S $7^{6, 16}$, where Mizpah is mentioned as one of Samuel's residences); and the mosque there—once a Crusaders' church—contains a cenotaph revered by the Moslems as his tomb.

Many scholars, however, locate Mizpah at *Tell en-Naṣbeh*, an important mound about 5 miles NE. of *Nebi Samwîl*. During four seasons of excavations at *Tell en-Naṣbeh*, between 1926 and 1935, conducted by W. F. Badé, evidence was uncovered which demonstrated that the site had been occupied during the periods when OT Mizpah was occupied. The results of the excavations have been published in 2 vols., C. C. McCown (with contributions by J. Muilenburg, J. C. Wampler, D. von Bothmer and M. Harrison), *Tell en-Nasbeh, I, Archaeological Results*, and J. C. Wampler, *Tell en-Nasbeh, II, The Pottery*, Berkeley, California and New Haven, Connecticut (1947). According to these reports, *Tell en-Naṣbeh* was not extensively occupied prior to the settlement of the Hebrews there shortly after 1200 B.C. No traces of a sanctuary have been found that can be dated to the period of Samuel, although it is not impossible that the hill was used as a temporary place of worship. The absence of evident Philistine occupation would be in accord with the Biblical record to the effect that the Israelites occupied Mizpah during the time of their wars

with the Philistines. An impressive stone wall enclosing about 8 acres was found. Almost half a mile in length and more than 15 feet in thickness, this wall was buttressed with towers which added to its effectiveness as a city defence. There is some question as to the date of the city's defence, but there is a possibility that some of the building can be attributed to Asa (see above) who fortified Mizpah. *Tell en-Naṣbeh* continued to be occupied to the Maccabaean period although it apparently ceased to be an important city about 300 B.C. A seal of 'Jaazaniah, servant of the king,' is of considerable interest because of its possible naming of the officer associated with Gedaliah (2 K 25[23]; Jer 40[8]) who governed Mizpah and was slain there. For further discussion of the identification of Mizpah with *Tell en-Nasbeh*, see C. C. McCown, *op. cit.*, pp. 23–63. 'To put it briefly, there are no serious difficulties in applying all of the historically respectable biblical data (about Mizpah) to the site of Tell en-Nasbeh' (p. 58). Because no inscription was found naming the *tell* as Mizpah, any doubt that remains concerning this identification cannot be removed until excavations have been conducted at *Nebi Samwîl* and Ataroth-addar (q.v.) and other *tells* in this vicinity of *Tell en-Naṣbeh*. S. R. D.—W. L. R.

MIZRAIM.—The name of Egypt (q.v.), and especially of Lower Egypt. Mizraim (AV, RV; RSV Egypt) was son of Ham and father of Ludim, Anamim, Lehabim, Naphtuhim, Pathrusim (*i.e.* the inhabitants of Upper Egypt), Casluhim, and Caphtorim, Gn 10[6, 13f]. Cf also article, PATHROS.

MIZZAH.—A 'duke' of Edom, Gn 36[13, 17], 1 Ch 1[37].

MNASON.—A Cypriot Christian, one of the early disciples, with whom Paul and his companions lodged (Ac 21[16]), just conceivably in Jerusalem (so the Vulgate and Chrysostom), more likely on the way from Caesarea to Jerusalem. The text of the passage is muddled and the grammar difficult. The Western text, whether original or not, is probably a correct interpretation, making it explicit that the party halted at a village *en route*. The commoner route *via* Shechem-Neapolis was well over 100 miles. The coast road by way of Lydda and Diospolis is rather shorter but far longer than a single day's journey. Nothing further is known of Mnason. J. L.

MOAB, MOABITES.—Moab occupied the lofty tableland to the E. of the Dead Sea. It was bounded on the E. by the Arabian desert, on the S. by the river Zered (the northern boundary of Edom), on the W. by the Dead Sea and the Jordan Valley. Its N. boundary fluctuated at different periods between the Arnon and an indistinct line some distance N. of Heshbon. This tableland is elevated some 3000 feet above the level of the Mediterranean, and about 4300 feet above the Dead Sea. It is traversed by several valleys of which the middle one, the Arnon, frequently mentioned in the Bible, is the deepest. The northern portion of Moab consists of broad stretches of rolling country. Its reddish soil is fertile. In the southern portion more hills are found, and the deep wrinkles there interfere with agriculture. In the winter months the rainfall is adequate, and renders the country very desirable in comparison with the deserts on its border.

This area was originally occupied by a people known from the Bible as Rephaim, whom the Moabites are said to have called Emim (Dt 2[10f]). Another name of a people preceding the Moabites is found in the Balaam oracles as 'sons of Sheth' who stand parallel to Moab (Nu 24[17]). They occur in the Egyptian execration texts of the 19th cent. B.C. as *Šwt(w)*, and in cuneiform records as *Sūtū* (Albright, *BASOR*, 83 [1941], 34; *JBL*, lxiii, [1944], 220). The narrative of Gn 19 tells the story of the origin of the Moabites from Lot and their relationship with the Ammonites. It also explains the name in popular etymology from *mē'ābhî*, 'from my father' (Gn 19[37]), but its real meaning is disputed. That story, furthermore, shows that the Israelites recognized the Moabites as their kinsmen. That they really were such, their language, religion, and customs, so far as known to us, also testify.

Originally nomads, the Moabites became a settled people about 1300 B.C. At the time of the approach of the Hebrews to Palestine they were so strongly entrenched in their land that the invaders avoided all conflict with them (Dt 2[9], Jg 11[15], 2 Ch 20[10]), although they conquered the land of king Sihon, who had subdued all of Moab N. of the Arnon (Nu 21[21–31], Dt 2[24–35]). The Moabites viewed the coming of Israel with alarm, and desired to attack them, but did not dare (Nu 22–24, Dt 23[4], Jg 11[25]). The Israelites secured at this time the territory N. of the Arnon; but the narratives differ as to whether its cities were all assigned to Reuben (so Jos 13[15–21]), or whether some of the most southerly (Dibon, Ataroth, and Aroer) were assigned to Gad (Nu 32[34ff]). The Gadites apparently obtained some of the southern cities, and the Reubenites some of the northern. Probably the conquest was not complete.

Early in the period of the Judges, the Moabites not only regained control of all this territory, but extended their power into western Palestine so as to oppress the Hebrews (Jg 3[12–30]). This led to the assassination of Eglon, king of Moab, by Ehud. In course of time the Moabites absorbed the tribe of Reuben.

According to the Book of Ruth, friendly intercourse existed between Moab and Israel at some time during the period of the Judges. Saul fought with the Moabites (1 S 14[47]), and they aided David against Saul towards the end of his reign (1 S 22[3ff]). David subjugated Moab, and rendered the country tributary to Israel (2 S 8[2, 12]). This subjugation apparently continued during the reign of Solomon, who also took Moabitish women into his harem, and built a shrine for Chemosh, the god of Moab (1 K 11[1, 7]).

After the reign of Solomon, Moab apparently gained its independence. Our next information comes from the so-called **'Moabite Stone,'** an inscription of Mesha, king of Moab, found in 1868 at ancient Dibon, and now preserved in the Louvre. Mesha states that Omri, king of Israel, conquered Moab, and that it continued subject to Israel till the middle of the reign of his son. Then Chemosh enabled him (Mesha) to win victories over Israel and regain his country's independence. These affairs are described in detail. A narrative parallel only in parts is found in 2 K 3[4ff]. Jehoram, Ahab's successor, undertook, with the aid of Jehoshaphat of Judah and the king of Edom, to reconquer Moab. The campaign almost succeeded. The country was overrun, the capital besieged and reduced to great extremity, when the king of Moab sacrificed to Chemosh his firstborn son on the city wall in sight of both armies (2 K 3[27]). The courage which this aroused in the Moabites, and the superstitious dread which it excited in the besieging army apparently secured a victory for the former. It appears from 2 K 13[20] that after this Moabites occasionally invaded Israel.

Amos (2[1–3]) in the next century reproved Moab for barbarities to Edom. Tiglath-pileser III. of Assyria enumerates Salamanu, the king of Moab, among his tribute-payers (*ANET*, p. 282a). Sennacherib, about 700 B.C., received tribute from Kammusunadbi, king of Moab (*ANET*, p. 287b), and the country remained subject to Assyria during the following reigns of Esarhaddon and Ashurbanipal, who mention the Moabite kings Musuri (*ANET*, pp. 291a, 294a) and Kamashaltu (*ANET*, p. 298b) among their vassals.

Moabites aided Nebuchadnezzar against Jehoiakim at the end of the latter's reign (2 K 24[2]). Is 15, 16, Zeph 2[8–11], Jer 48, and Ezk 25[8ff] contain prophecies against Moab, but provide no historical information. Jer 48 indicates that a great calamity was impending over them. In Neh 4[7] Arabians rather than Moabites are allies of the Ammonites (cf also 1 Mac 9[32–42] and Jos. *Ant.* XIII. xiii. 5 [374], XIV. i. 4 [15]). We know that the Nabataeans were in possession of this country a little later, and it is probable that by the time of Nehemiah they had already brought the Moabite power to an end. Some infer from Jeremiah's prophecy that Moab

rebelled against Nebuchadnezzar as Israel and Ammon did, and that he carried enough of them captive to weaken them and render them an easy prey to the Nabataeans. This is possibly true, but no more than an attractive hypothesis.

The language of the Moabites was, as the Moabite Stone shows, identical with that of Israel. That peculiar construction known as *waw consecutive* is found, outside of Biblical Hebrew, only in the Moabite Stone and in a few Phoenician inscriptions.

The religion of the Moabites was somewhat similar to that of early Israel. The references to Chemosh in Mesha's inscription parallel those to Yahweh in Israelitish writings of the same period. The name Ashtar-Chemosh indicates that the worship of the feminine divinity known to the Babylonians as Ishtar, and to the Phoenicians as Astart, was also mingled with the worship of Chemosh. Traces of the repellant nature of this worship appear in the OT (Nu 25^5 31^{16}, Jos 22^7, Ps 106^{28}). No great ethical prophets, such as elevated the religion of Israel, rescued the religion of Moab from the level of its barbaric origin.

G. A. B.—S. H. Hn.

MOADIAH.—See Maadiah.

MOCHMUR.—A wady apparently SE. of Dothan (Jth 7^{18}).

MODIN.—In the Talmud *Môdhe'îm*. A village in the Shephelah, never mentioned in the OT, but of great importance as the home of the Maccabees. Here Mattathias, by slaying a Seleucid official and a Jew who conformed to the paganizing commands of Antiochus, struck the first blow for Jewish religious freedom (1 Mac 2^{1-28}). He was buried at Modin (2^{70}), as were his sons Judas (9^{19}) and Jonathan (13^{25}). Simon here built an elaborate monument with seven pyramids, commemorative of his father, mother, and four brethren, with great pillars around, and bas-reliefs of military and naval triumphs. This splendid monument could be seen at sea. It stood for about 500 years, after which it seems to have disappeared; and with it was lost all recollection of the site of Modin. Guérin rightly identified it with *el-Midyeh*, near *Lidd*. There are numerous rock-tombs about, some of them traditionally known as *Qubûr el-Yehûd*, or 'the Jews' tombs,' but nothing remains of the Maccabaean mausoleum. Hatred of the Maccabees or of the Jews as such will have led to its obliteration.

R. A. S. M.—E. G. K.

MOETH.—See Noadiah.

MOLADAH.—A city reckoned to Judah in Jos 15^{26}, and to Simeon in Jos 19^2, 1 Ch 4^{28}; it was resettled after the exile, Neh 11^{26}. It is possibly modern *Tell el Milḥ*.

MOLE.—**1.** Hebrew *tinshemeth*, Lv 11^{30} (AV; RV, RSV **chameleon**, q.v.); to be distinguished from the bird *tinshemeth*, mentioned in Lv 11^{18}, Dt 14^{16} (see Owl, **5**). **2.** Hebrew *ḥapharpārāh* (read *laḥapharpārôth* for MT *laḥpōr-pērôth*), Is 2^{20}. The true insectivorous mole does not occur in Palestine, but the rodent *Spalax typhlus*, the mole rat, is very common. It lives entirely underground, has most rudimentary eyes, and makes very long burrows. It is gregarious, and large areas are sometimes covered thick with its hillocks. It is possible that the word (which is derived from a root meaning 'dig') may apply to rats, mice, jerboas, etc.

E. W. G. M.

MOLECH, MOLOCH.—A term associated with the practice of child sacrifice. The term occurs eight times in the OT (Lv 18^{21} 20^{2-5}, 1 K 11^7, 2 K 23^{10}, Is 30^{33}, Jer 32^{35}). The special centre of this practice was just outside Jerusalem, at a place in the Valley of Hinnom called the Topheth (q.v.). Molech worship was introduced, according to 1 K 11^7, by Solomon. This can hardly be correct, however; the text of 1 K 11^7 should read *lemilkōm*, 'to Milkom' (the god of the Ammonites; see v.5 and v.23) rather than *lemōlekh*.

The term Molech has long been explained as the title of a foreign god, applied also to Yahweh. It has been assumed that the original vocalization was *melekh*, 'king,' altered to Molech by the use of the vowels of the Hebrew word *bōsheth*, 'shame.' Judgments have differed as to the original homeland of this god; the Tyrian god Melkart has been proposed most frequently, since it is known that child sacrifices were common in the Phoenician homeland and in Carthage. Attention has also been called to the name of a city of the Benlamites of Mari, *Ilum-Muluk*. References to deities by the term *melekh* are common in the Semitic literature.

It is more probable, however, that Molech is a technical term for child sacrifice. In the majority of its occurrences the word, on this view, originally would have been vocalized *lemōlekh*, 'for a Molech (child sacrifice),' rather than *lammōlekh*, 'to Molech' (the god Molech or Melek). A vivid picture of such a sacrifice is given by Isaiah (30^{33}) in his symbolic portrayal of Yahweh's preparations for the destruction of Assyria: 'For Topheth has long been prepared; yea, for a Molech (sacrifice) it is made ready, its pyre made deep and wide, with fire and wood in abundance; the breath of Yahweh, like a stream of brimstone, kindles it.'

The practice of child sacrifice was not unknown in early Israel (Gn 22^{1-19}, Ex 22^{29} (Heb. 28), Jg 11^{29-40}). Archaeological discoveries of the skeletons of infants, often in earthen jars, are not to be taken as evidence for the wholesale offering of children to the gods of the Canaanites. Most of these are probably instances of the burial of infants. The mortality rate of children was very high in the ancient world. Nevertheless, in Canaan as in early Israel, children were occasionally offered to the deity. Ex 22^{29} (Heb. 28) indicates clearly that the first-born son was considered to belong in a special sense to Yahweh. Some first-born sons were dedicated to the service of Yahweh, perhaps in fulfilment of this obligation (1 S $1^{11, 27f}$). The common practice was, from early days, the substitution of an animal for the child. The sacrifice of the first-born was resorted to only in extreme circumstances, as the final effort of a family or community to secure the favour of the deity. Mesha, king of Moab, is reported to have offered his first-born as a burnt offering upon the wall (2 K 3^{27}), bringing 'great wrath upon Israel.' Prophetic protests against this practice are not numerous, probably because the practice itself only became widespread under Ahaz and Manasseh (see Mic 6^7, 2 K 16^3 21^6). The reform of Josiah, under the influence of the tradition of Deuteronomy, brought the practice to a decisive end (2 K 23^{10}).

MOMDIS, 1 Es 9^{34} (AV, RV).—See Maadai.

MONEY.—**1.** *Antiquity of a metallic currency: weights and values.*—That the precious metals, gold and silver, and to a lesser extent copper, were the ordinary media of exchange in Palestine from a time long prior to the appearance there of the Hebrews, is amply attested by evidence from Egypt and Babylonia, and also from the soil of Palestine itself. The predominance of silver as the metal currency for everyday transactions among the Hebrews long before the introduction of coined money is perhaps further shown by the constant use of the word for 'silver' (*keseph*) in the sense of 'money,' as *e.g.* at Gn 42^{28} 'My money (*lit.* 'silver') has been put back; here it is in the mouth of my sack': and 1 K 21^2 'I will give you its value in money.'

Coined money begins in Palestine only in the Persian period. Mr. Raphael Loewe sees the earliest Biblical allusion to coined money in Hag 1^6 (*PEQ*, 1955, pp. 141 ff). For most of the OT period therefore the understanding of money depends upon the recognition, which is not always possible, of the various systems of weights adopted for the weighing of the precious metals. Originally money must be weighed; cf 2 K 12^{10f}: 'And whenever they saw that there was much money in the chest, the king's secretary and the high priest came up and they counted and tied up in bags the money that was found in

the house of the Lord. Then they would give the money that was weighed out into the hands of the workmen who had the oversight of the house of the Lord . . .' The introduction of coined money did not of course entirely supersede the counting of money by weight which is still in use in modern banks, but coins facilitated all day to day transactions. Before coins, money could be ' told ' or counted by being weighed. Hence the great emphasis on the just balance at Pr 16^{11} : ' A just balance and scales are the Lord's ; all the weights in the bag are his work ' ; Pr 20^{23} : ' Diverse weights are an abomination to the Lord, and false scales are not good ' ; cf Dt 25^{13-15}. Scales were an essential in day to day transactions, as at Jer 39^{9f} : ' And I bought the field at Anathoth from Hanamel my cousin, and weighed out the money to him, seventeen shekels of silver. I signed the deed, sealed it, got witnesses, and weighed the money on scales.'

All the weight-systems of W. Asia, and even of Europe, had their origin in Babylonia (for fuller details see WEIGHTS AND MEASURES). There, as required by the sexagesimal system of reckoning, the ancient unit of weight, the *manu* (Heb. *māneh* : in RSV **mina** as at Ezk 45^{12}, plural **minas** ; in AV, RV **pound,** except *maneh* at Ezk 45^{12}) or **mina** was divided into sixty **shekels,** while sixty minas went to the higher denomination, the **talent.** A weight of stone (British Museum 91005) of one *mina* (*i.e.* sixty shekels) on which is ' an inscription stating that it is an exact copy of a weight made by Nebuchadnezzar II. (605–562) after the standard fixed by Shulgi (king of the Third Dynasty of Ur, about 2000 B.C.) ' is illustrated in Pritchard, *ANEP*, 118 : it weighs 978.3 grammes. Another weight, of bronze, with cuneiform inscription ' Palace of Shalmaneser (v.) king of Asshur, two-thirds mina of the king ' and Aramaic inscription ' Two-thirds [mina] of the land ' (British Museum 91230), described in Pritchard, *ib.* 119, weighs 665.795 grammes. Heavy and light Babylonian standards may be recognized. As the weight system spread westward with the march of Babylonian civilization and commerce, it came into conflict with the decimal system of calculation, and a compromise was effected, which resulted in the mina being reduced to fifty shekels, while the talent remained at sixty minas, although reduced in weight to three thousand shekels. That the Hebrew talent by which the precious metals were weighed contained three thousand, and not three thousand six hundred shekels may be seen by a simple calculation from Ex 38^{25ff}. That the heavy Babylonian shekel of 16.329 grammes in theory remained in use among the Hebrews for the weighing of gold until NT times, we have the express testimony of Josephus *Ant.* XIV, vii. 1 (105), who equates the Hebrew *mina* with 21 Roman pounds giving a shekel of 16.37 grammes the exact weight of the heavy Babylonian shekel of the common or trade standard. Elsewhere (*Ant.* II. iii. 3 [33]), however, Josephus loosely equates the *mina* with the Hebrew shekel, and the value of his witness is accordingly uncertain.

For the weighing of silver, however, this shekel was discarded for practical reasons. Throughout the ancient E. the ratio of gold to silver was $13\frac{1}{3}$ to 1, so that a shekel of gold could buy $13\frac{1}{3}$ times the same weight of silver. In ordinary commerce, however, this ratio of exchange was extremely inconvenient. To obviate this inconvenience the weight of the shekel for weighing silver was altered so that a gold shekel might be exchanged for a whole number of silver shekels. This alteration was effected in two ways. On the one hand, along the Babylonian trade routes into Asia Minor the light Babylonian silver shekel of 8.16 grammes was raised to 10.88 grammes so that ten such silver shekels now represented a single gold shekel. On the other hand, the great commercial cities of Phoenicia introduced a silver shekel of 14.51 grammes, fifteen of which were equivalent to one heavy Babylonian shekel of 16.32 grammes. This 14.51 grammes silver shekel is accordingly known as the Phoenician standard. It was on this standard that the sacred dues of the Hebrews were calculated (below **3**). In Ex 30^{13} and elsewhere this shekel is said to consist of 20 **gerahs** which the Greek translators identified with the small silver obol of Greek coinage, 20 of which yield a shekel of 14.51 grammes. Sixty **shekels** go to the **mina** (Ezk 45^{12}), three thousand shekels to the **talent** (Ezk 38^{25f}).

No self authenticating equivalents with modern money in purchasing power can be proposed. The reader can only meditate on Gn 23^{15f} (a ' field ' bought for 400 silver shekels), Ex 21^{22} (thirty silver shekels for damages by a goring ox), 1 K 10^{29} (six hundred shekels of silver for a chariot, a hundred and fifty for a horse) etc.

It must be regarded as certain that other standards also were in use in Palestine for weighing the precious metals, in historic times (see WEIGHTS AND MEASURES).

2. *Money in the pre-exilic period.*—Throughout the whole of this period, as has already been emphasized, in every transaction involving the payment of considerable sums, the money was paid by weight. Accordingly when Abraham bought the field and cave of Machpelah he ' weighed out for Ephron the silver which he had named in the hearing of the Hittites, four hundred shekels of silver, according to the weights current among the merchants ' (so RSV justly renders Gn 23^{16}). In view of what has been noted about the variety of standards in use in Palestine in early times, it would be unwise in the present state of knowledge to pronounce on the value of the price paid in this transaction. Similarly the price paid by David for the threshing-floor of Araunah (2 S 24^{24}) is fifty shekels of silver. But by whose standard shekel? Tribute however paid by Hebrew kings in gold (*e.g.* 2 K 18^{24}) will have been on an international standard common to Palestine and Assyria and represented very considerable sums. It is interesting to note that Solomon paid his large debts to Hiram of Tyre not in money but in territory (1 K 9^{10-14}). A noteworthy feature also of the pre-exilic literature is the disappearance of the *mina* from calculations, sums being stated in terms of shekels and talents exclusively.

In this period the precious metals circulated in three forms. The shekel and its subdivisions (the half-shekel : Ex 38^{26} ' a beka a head [that is, half a shekel, by the shekel of the sanctuary] ' ; note, 3 below, that an actual coin labelled ' **beka** ' is now known from the Persian period ; the quarter-shekel : 1 S 9^{8} ' I have with me the fourth part of a shekel of silver ' ; and smaller multiples) had the form of ingots of metal, without any stamp or other mark, so far as our evidence goes, as a guarantee of their purity and weight. Larger values were made up in bars, such as Schliemann discovered at Troy and Macalister found in Gezer. The **bar** (literally ' tongue ' : AV, RV **wedge**) **of gold** which Achan appropriated from the loot of Jericho (Jos 7^{21}) was probably such a thin bar of gold. Further Rebekah's nose-ring of half a shekel of gold and her bracelets of ten shekels (Gn 24^{22}) represent a third form which the early period metal currency might assume. The bowls and other vessels of gold and silver so often mentioned in ancient tribute lists also probably represented definite weights and values.

The shekel was so exclusively the unit in all ordinary transactions that Hebrew writers frequently omit it from statements of price.

The discovery of Hebrew weights inscribed with the word **pim** has improved the possibilities of translating 1 S 13^{21} where RSV should be followed (see PIM).

3. *Money in the Persian period* : *introduction of coins.*—In this period the money of the small Jewish community of *Yehud* was still, as before the Exile, mainly ingots and bars of the precious metals, without official mark of any kind. The addition of such a mark by the issuing authority serves as a public guarantee, still verifiable of course by the use of scales, of the purity of the metal and the weight of the ingot, and so transforms the ingot into a coin. Coined money, whether a Greek, or as Herodotus states (Herodotus i. 94 ; for the Greek ' competitors ' for this distinction see Pollux, *Onom.* ix. 83) a Lydian, invention has already a considerable history before the western expansion of Persian power brought the Biblical lands into momen-

tously closer contact with more western communities. It is not probable that any coins reached Palestine, except perhaps as travellers' curiosities, before the Persian period. Under the Persians we see the beginnings of the transition from uncoined to coined currency which was only completed in the Biblical lands under the successors of Alexander. The two systems existed, during the centuries of transition, side by side. After the conquest of the Lydian King Croesus, the Persians appear to have continued to strike Lydian 'sigloi' in the early years of their rule. Later, certainly from the time of Darius I., they issued their own gold '*daric*' (average weight 8.354 grammes), and silver '*siglos*' or 'siklos'='shekel' (average weight 5.6 grammes). In the time of Darius I. twenty sigloi went to the daric on the old ratio of gold to silver of 13.3 to 1. Later modifications in this ratio may be detected. The Persian darics and sigloi, for use principally in Persian Asia Minor rather than in the old Biblical lands, continued in series until the Persian power was broken by Alexander the Great (see G. F. Hill, *Catalogue of the Greek Coins of Arabia, Mesopotamia, and Persia, in the British Museum*, 1922, pp. cxx–cxl, and 148–175; and the very important study by Sydney P. Noe: *Two Hoards of Persian Sigloi*, American Numismatic Society, Numismatic Notes and Monographs, No. 136, 1956). In addition there were notable issues of coins by the satraps in Asia Minor, some for occasional causes, some, especially *e.g.* in Cilicia, in long series (see especially G. F. Hill, *Catalogue of the Greek Coins of Lycaonia, Isauria, and Cilicia in the British Museum*, 1900). The engravers of the dies for these satrapal coinages were Greek. The legends were in Greek, except in Cilicia where there are some bilingual legends, and some in Aramaic only, especially from the mint of Tarsus. Attention may be drawn to issues of silver coins (Hill, *Lycaonia*, etc., p. 170, No. 48) at Tarsus by the satrap Mazaeus, who lived to fight and later to serve Alexander, while he was satrap of 'Over-the-river' (the trans-Euphratesian satrapy in which lay the Jewish community of *Yehud*) and of Cilicia. The reverse legend reads, in Aramaic, 'Mazdai who is over "over the river" and Cilicia.' The title of the satrapy 'over-the-river' coincides, with one minor spelling variation, with the Biblical 'province Beyond the River' at Ezr 4^{10} etc. (Ezr 4^{10} is in Aramaic).

The Persians do not seem to have interrupted the older system of weight currency in Mesopotamia and Egypt by the introduction of coins. However, Greek money was flowing E. in large quantities, especially to Egypt where it was used to foster revolt. It is, *e.g.*, instructive to note that a deed of sale which dates itself 402 or 401 B.C. in Aramaic on an Elephantine papyrus quotes the price of a house as 'one karsh, three shekels' and adds the Greek equivalent 'and in the money of Yawan six staters, one shekel' (E. G. Kraeling, *The Brooklyn Museum Aramaic Papyri*, 1953, Papyrus 12). Athenian coin dies have been found in Egypt (J. H. Jongkees in *Numismatic Chronicle*, 1950, pp. 298–301) from which no doubt revolting Pharaohs struck pay for their mercenary soldiers. Some coins were even struck, no doubt for the same purpose, with Egyptian types and legends (in hieroglyphs), in the 4th cent. B.C. The discovery of a coin with a demotic inscription suggests an Egyptian coinage for Egyptians (G. K. Jenkins in *Numismatic Chronicle*, 1955, pp. 144 ff). But nearer home, in the modest district of *Yehud*, the Jews in the Persian period were within the circulation range of noteworthy series of silver coins issued from the Phoenician maritime cities (Aradus, Gebal, Sidon, Tyre) either by the satraps or sometimes, as it seems, by the local subject ruler. The issue of coins in the precious metals in antiquity may always be assumed to be an indication of privilege, even of autonomy, or of a claim to autonomy. What degree of privilege or autonomy these 'native' Phoenician silver issues indicates is not clear (for examples see G. F. Hill, *Catalogue of the Greek Coins of Phoenicia in the British Museum*, 1910, under the cities concerned). The types used on these coins testify to a lively and self-conscious Phoenician culture, and provide us with some of the few remarkable and attractive coin types of the ancient world of which the inspiration and workmanship is not Greek. Further S., there is a 'Philisto-Arabian' and 'an Egypto-Arabian' series of coins in silver awaiting elucidation. They are obviously much under the influence of far away Athens and perhaps their story belongs to that of persistent Athenian pressure to revolt against Persia. But it has become evident, since the first edition of this Dictionary was published, that some small silver coins were, at some time in the Persian period (or at latest during the transition to Ptolemaic rule), struck for the Jewish authorities in *Yehud*, either in the Holy Land itself, or elsewhere for the same authorities. This conclusion is irresistible from the four coins listed as 1a, 1, 2, and 3 in A. Reifenberg, *Ancient Jewish Coins*[2], 1947. Their legends are in Hebrew (1a) *beqa'* (one-half) Reifenberg dates in mid-5th cent.: (1) has '*Yehud*'; (2) has two legends of which one is '*Hezekiah*,' probably the name of a high priest (was he the high priest who knew Ptolemy I.?); (3) has again the name of the district '*Yehud*.' Another specimen (G. F. Hill, *Catalogue of the Greek Coins of Palestine in the British Museum*, 1914, p. 181, No. 29) of this last coin has been known for many years, and after long controversy it was generally agreed that the legend should be read as 'Yahu' and was in fact the name of the Hebrew God. The type which goes with the legend is of a bearded male deity, a solar Zeus. The question arose was there here an identification of the Hebrew God with Zeus, perhaps made by Jewish or non-Jewish syncretists, anticipating the position of the 'Hellenisers' in the time of Antiochus IV.? This is possible. The problem of the deity on the coin remains. But in spite of at least one eminent authority the older reading of the legend must be abandoned, and the reading 'Yehud' must be recognized as right. It may be added that there is nothing distinctively Jewish in any of the types shown on these coins. The types and weights have Athenian affinities. It is the legends which point to the Jews as the issuing authority wherever the coins may have been minted for them. In conjunction with other evidences scholars now rightly argue from these coins that the Persian authorities allowed the high priests considerable local autonomy from time to time. That is the direction in which the coins point. But there are problems about them (they do not necessarily all belong together) which will not be solved until more archaeological discoveries have shed light on that obscure period. Was there a time, however short, even then, when the Jew could pay his Temple tax in Jewish money? We do not know. The rabbinic tradition is that for payments 'according to the value of the shekel of the sanctuary' (cf Lv 27^{25}: 'Every valuation shall be according to the shekel of the sanctuary . . .') Tyrian money should be used (Mishnah, *Bekhoroth*, viii. 7). If this ruling be valid as far back as the Persian period, the silver coins of Tyre (Hill, *Phoenicia*, pp. 227 ff) alluded to above are the numismatic representatives of 'the shekel of the sanctuary' in the Persian period. They were struck on a 'native' Phoenician standard giving a normal shekel of about 14.5 grammes. It is on this same standard that the Jewish skekels of the First Revolt (see below **5**) were struck. It is idle to speculate on equivalents in modern money in terms of purchasing power.

In several passages in Chronicles, Ezra, and Nehemiah, the RSV and RV have substituted '*darics*' for AV 'drams' (1 Ch 29^{7}, Ezr 2^{69}, Neh 7^{70-72}). In the second and third of these passages the Hebrew form certainly suggests 'drams' or 'drachms,' but presumably Persian money is meant. Perhaps a weight system was in mind. The problem may be merely that the writers wrote in the Greek period. The 'forty shekels of silver' at Neh 5^{15} may be either sigloi or Phoenician shekels.

4. *Money in the Greek period.*—The transition to coined money was completed in the Bible lands by

MONEY

Alexander and his successors. Alexander himself issued coins in gold, silver, and 'brass.' An impressive survey of his coinage which seemed to be aimed at the introduction of 'a world currency' will be found in Charles Seltman, *Greek Coins*[2], 1955, pp. 203–217. His coins were struck, with Greek types and Greek legends, at many mints, among them, *e.g.* Tarsus of Cilicia, Myriandros, Aradus, Byblos (Gebal), Berytus, Ake (the Biblical *Acco* of Jg 1[31], later *Ptolemais*), Sidon, Alexandria (his new creation in Egypt), Damascus, and Babylon. The 'successors' continued according to this beginning, and (with the exceptions in small change noted below, 5), from Alexander until the Hellenistic East was absorbed by Rome the Greek coinages of the Ptolemies in Egypt or of the Seleucid kings of Syria, or of the cities which achieved political independence in the decline of Seleucid power (notably Tyre), would be the coins of the Jews (To 5[14], 2 Mac 4[19] 12[43]) whether in Judaea or in dispersion in Egypt or Mesopotamia. When the Parthians absorbed Babylonia and incidentally the Jewish communities there they too issued coins of Greek type, according to the practice of their Seleucid predecessors. The Athenian standard of the Alexander coins was continued by the successors, but a slightly reduced Syrian and Phoenician standard later emerges, as perhaps a reversal to the preferences of an earlier period. A Jew who paid his half-shekel **Temple tax** in Tyrian money (cf above, 3) could pay it with a **didrachm** (q.v.), or two could join, as Jesus and His disciple did at Mt 17[24–27], to pay one 'shekel.' The 'didrachm' is the regular Septuagint equivalent of the Biblical half-shekel of the tax. If two paid together they would use a silver 'stater' (or tetradrachm), (translated 'shekel' at Mt 17[27] in RSV). 'The didrachm' comes to mean in Jewish Greek the holy didrachm of the annual payment, as is evident from Mt 17[24] (RSV 'does not your teacher pay the *tax*': Greek '*ta didrachma*') and various passages in Philo who speaks of 'the holy didrachm.' From Alexander until the end of the 3rd cent. B.C.—when the Seleucids wrested the Phoenician cities and Palestine from the Ptolemies—Ptolemaic silver from the mint of Tyre was available. Thereafter Tyre continues as a Seleucid mint. From the time of its autonomy in 126–125 B.C. until at least A.D. 69 there was a continuation in the name of the city itself. It is presumably this autonomous Tyrian coinage that was acceptable for the Temple payment in the time of Christ. The 'stater' of Mt 17[24–27] is thus a Tyrian 'shekel' (for Tyrian 'shekels' see Hill, *Phoenicia*, pp. 233 ff, and for half-shekels' *ib.* pp. 250 ff). The types were: obverse, head of 'Herakles' or 'Baal' and reverse, Eagle on prow and the legend, 'of Tyre, the holy and inviolate,' was in Greek. (On the Alexander coinage see Seltman, *op cit.* and the works cited there, especially those of E. T. Newell; no copious and satisfactory account of the Ptolemaic coinage is available in English but the reader may commence the study from Seltman, *op. cit.* and two small works by E. T. Newell, namely *Royal Greek Portrait Coins*, 1937, and *Standard Ptolemaic Silver*, 1941. E. T. Newell has also written the standard works on the Seleucid coinage; see especially his *The Coinage of the Eastern Seleucid Mints*, 1938, and *The Coinage of the Western Selucid Mints*, 1941, which takes the subject down to Antiochus III., the Great, and occasionally beyond his reign. See also Newell's 'Seleucid Mint of Antioch' reprinted from *The American Journal of Numismatics*, li, 1918, which includes the coins of Antiochus IV. minted at Antioch, which are important for the study of the books of Maccabees.)

5. *The coinage of the Maccabaean rulers.*—According to 1 Mac 15[6] the Seleucid King Antiochus VII. (Sidetes) granted Simon 'the priest and ethnarch of the Jews' an important concession (which he subsequently rescinded, v.[27]): 'I permit you to mint your own coinage as money for your country . . .'—'The thorniest question of all Jewish numismatics' as it has been called, is the question whether, and if so to what extent Simon availed himself of this privilege while it lasted. A well-known series of silver shekels, half-shekels, and quarter-shekels, on the Phoenician standard, bearing dates from 'year 1' to 'year 5' has from time to time been attributed to Simon Maccabaeus. They show on the obverse and reverse respectively a cup or chalice, and 'a spike of a lily with three flowers.' The legends in old Hebrew letters on the shekels are: obverse: 'Shekel of Israel,' reverse: 'Jerusalem the holy' (see details and illustrations in Hill, *Palestine*, pp. 269ff and Plate xxx: or in Reifenberg, *op. cit.* pp. 57, 58 and Plate x). It was argued by A. R. S. Kennedy in the first edition of this Dictionary—and other well-known numismatists were already on his side of the question—that these coins belong not to Simon Maccabaeus but to the *First Revolt*. That conclusion, already then irresistible, has since been established by definitive new evidence from coin hoards. The reader should refer to the survey of the whole problem by the distinguished Hebrew numismatist, Leo Kadman, 'The Coins of the First Revolt' (the article is in English) in *Congrès International de Numismatique*, 1957, ii, pp. 239–248, which settles the matter decisively, with full evidence and references. The controversy is over. These silver coins belong to the first revolt. To the first revolt also belong some 'brass' coins hitherto associated with them.

With the mysterious exception therefore of the four 'Jewish' silver coins of the Persian period (see above, 3), the first 'native' Jewish coins are the coins of the Maccabaean rulers. There are brass coins of various sizes, usually very small, of John Hyrcanus I. (135–104 B.C.), Judas Aristobulus (104–103 B.C.), Alexander Jannaeus (103–76 B.C.), Jonathan Hyrcanus II. (67 and 63–40 B.C.) and Antigonus Mattathias (40–37 B.C.). For these see Hill, *op. cit.* pp. 188 ff, or Reifenberg, *op. cit.* pp. 40 ff. There are no known silver coins of any of these rulers. In general it may be observed (1) that the characteristic types are, with one exception, not distinctively Jewish. They represent a continuation of Seleucid small change, and the only distinctively Jewish feature is that the representation of pagan deities or animals, alike repulsive to Judaism, is very naturally avoided. The exception, the one positively Jewish type, is a representation of the seven branched lampstand on coins of Antigonus Mattathias (Hill, *Palestine*, p. 219, No. 56: Reifenberg, p. 42, Nos. 23 and 24). (2) The legends are in Hebrew in the older writing, and in Greek. Some of the coins have only Hebrew legends, some only Greek, some are bilingual. (3) The legends provide valuable information about the titles adopted by these rulers. This information contains no surprises, except that it seems that it is from coins alone that we know that the Hebrew name of Antigonus II. whom the Parthians made King in Jerusalem in 40 B.C. was Mattahias. John Hyrcanus I.'s coins bear in Hebrew the legend '*John, the high-priest and the commonwealth of the Jews*' (the precise meaning of the word here translated *commonwealth* is uncertain). The title of *King* first appears on the coins of Alexander Jannaeus—'*Jonathan the King*'—who also first introduced a Greek, in addition to a Hebrew, legend.

6. *Money in Palestine under the Romans.*—From a numismatic point of view Judaea may be said to have formed part of the Roman dominions from 63 B.C. when Pompey entered Jerusalem. Besides the local coinages of the autonomous cities which were suffered to continue the Roman coinage became certainly 'legal tender' in Syria and Palestine. The silver **denarius** was almost equal in weight to the Syrian Attic drachm (the silver unit of Seleucid times) and henceforward the two coins were regarded as of equal value, and four *denarii* were regarded in ordinary business as the equivalent of a tetradrachm of Antioch.

The Roman answer to the Parthian action in making Antigonus Mattathias King in Jerusalem in 40 B.C. was to declare **Herod** King of the Jews. In 37 B.C., with the help of a Roman army under Sosius he entered Jerusalem his royal city. This king, Herod the Great (37–4 B.C.), continued the 'brass' coinage of the Maccabaean rulers with some new types (not distinctively Jewish, but avoiding, on the whole, positive affront to Jewish feelings

except for some issues showing an eagle) and they are described in Hill, *Palestine*, pp. 220 ff, and Reifenberg, *op. cit.* pp. 42 ff. All the legends are in Greek. For larger coins the Roman gold and silver of the empire as a whole, and the silver from the Roman mint of Antioch (which was not plentiful), and above all the good silver of the still 'autonomous' city of Tyre could be used in Palestine. After the death of Herod there are local 'brass' coinages of his successors. After the new settlement of A.D. 6 the Roman procurators issued a local small 'brass' coinage, with trifling variations, except for the brief reign of Agrippa I. (A.D. 37–44) continuously until the beginning of the First Revolt in A.D. 66. It may be said in general that the Procurators wisely avoided offending Jewish feelings in their choice of types, with the single exception of Pontius Pilate (A.D. 26–36) who placed a *simpulum* on some and a *lituus* on others of his Palestinian issues. It has been pointed out by Miss E. M. Smallwood (*Latomus*, xix, p. 328), and less soberly by other writers, that these symbols of pagan worship would probably give offence (for the coins of the Procurators see Hill, *Palestine*, pp. 248 ff, Reifenberg, *op. cit.* pp. 54 ff). Agrippa I. issued 'brass' coins (Hill, *Palestine*, pp. 236 ff: Reifenberg, *op. cit.* pp. 46 ff) of which the Greek legends emphasize his loyalty to his imperial masters (he is 'philokaisar,' Caesar's friend; why he was also 'Great King' has not been satisfactorily explained). The fact that some of his coins bear what can only be his own portrait (*e.g.* Reifenberg, *op. cit.* p. 46, No. 58) reminds us that his subjects included many non-Jews, and that there are other indications that this notable and engaging adventurer thought of himself as playing two parts, that of a King of the Jews in Jerusalem, and that of a Hellenistic god-king among his non-Jewish subjects (see M. P. Charlesworth, *Five Men*, 1936, pp. 23–35). The coin portraits would be consistent with this. Other members of this remarkable family showed portraits of themselves on their coins (A. Reifenberg, *Portrait Coins of the Herodian Kings*, 1935).

7. *The money of the NT.*—Here we may add a few notes on the various denominations mentioned in the NT. The currency was in three metals: 'Take no gold, nor silver, nor copper in your belts' (Mt 10^{9} RSV). Following this description we have (*a*) the Roman gold *aureus*, here referred to only indirectly, representing twenty-five denarii, and varying in weight in NT times from approximately 8.16 to 7.77 grammes. (*b*) The silver coin most frequently mentioned is the **denarius** (AV and RV '**penny**,' RV, more correctly, 'shilling,' RSV sometimes even better '**denarius**' and plural '**denarii**'). It was the day's wage of a Jewish labourer (Mt 20^{2}). A typical denarius of our Lord's day, with which Roman dues were paid (22^{19}), would have on its obverse the head of the reigning Emperor, Tiberius, and '**superscription**' or '**inscription**' (RSV) the following legend in Latin 'Tiberius Caesar, the son of the deified Augustus, (himself) Augustus' and on the reverse Livia seated as *Pax* and in continuation of the Emperor's entitlements the legend in Latin 'High Priest,' and would be minted in far away Lugdunum in Gaul (see H. Mattingly, *Coins of the Roman Empire in the British Museum*, i, 1923, p. 125, No. 34, and *ib.* Plate 22, No. 22). (*c*) The silver **drachm** is named only at Lk 15^{8} 'Or what woman, having ten silver coins, if she loses one coin' (so RSV, adding the note 'The drachma, rendered here by *silver coin*, was about sixteen cents: AV, RV have '**pieces of silver**'). In ordinary usage (above **6**) it was the equivalent of the denarius. The 50,000 'pieces of silver' (literally '**silverlings**') of Ac 19^{19} were denarius-drachms. (*d*) The silver **didrachm** is mentioned only once, Mt 17^{24} (AV 'tribute money,' RV and RSV 'the half-shekel'). This was a two-drachm piece on the Phoenician standard and minted at Tyre (above **3** and **4**). (*e*) The **shekel** (RSV), or 'piece of money,' in the original text **stater**, was a silver *tetradrachm* or four-drachm piece also of the mint of Tyre (and so acceptable for payment of Temple tax, above **3** and **4**). The 'thirty pieces of silver' (Mt 26^{15}) for which Judas betrayed his Lord were probably also Tyrian tetradrachms.

Passing to the copper coins of the Gospels, we find three denominations in the original, the *lepton*, the *kodrantes*, and the *assarion*. There are great difficulties in identifying these among the copper coins which have come down to us. (*f*) The *lepton*, the widow's **mite** of Mk 12^{42} (RSV '*two copper coins*') and Lk 21^{2}, was the smallest coin in circulation and is to be looked for amongst the small 'brass' of Pontius Pilate the procurator (above **6**). (*g*) The *kodrantes* (Latin, *quadrans*) was worth two *lepta* (Mk 12^{42}) and was the '*uttermost farthing*' (or, in RSV, 'the last penny') of Mt 5^{26}, was either the actual Roman *quadrans* or its equivalent among the local 'brass' coins. (*h*) The *assarion* is the **farthing** (RSV *penny*) associated with the price of sparrows (Mt 10^{29}, Lk 12^{6}) and was a small 'brass' coin on the Greek system, probably the *dichalkus*, of which in ordinary business twenty-four went to the denarius-drachm. The relative value of the three coins may be expressed as $\frac{1}{16}$, $\frac{1}{8}$, and $\frac{1}{4}$ of a unit respectively.

There remain the two larger denominations, the talent and the 'pound' or mina, neither of which was any longer, as in the earlier period, a specific weight of bullion, but a definite sum of money. (i) The *talent* now contained 6000 denarius-drachms, which made 240 aurei (Mt 18^{24} to which RSV adds the note 'this talent was probably worth about a thousand dollars'). It is not always realized, perhaps, how vast was the difference in the amounts owing in this parable (18^{23ff}). The one servant owed 100 denarii, the other 10,000 talents or sixty million denarii. The one debt, occupying little more space than 100 English sixpences, could be carried in the pocket; for the payment of the other, an army of nearly 8600 carriers, each with a sack 60 lb. in weight, would be required. If these were placed in single file, a yard apart, the train would be almost 5 miles in length. (*j*) The **mina** finally of another parable (Lk 19^{13ff}) was the sixtieth part of a talent, or 100 denarius-drachms, and is translated in RSV and in AV and RV by **pound.**

In addition to the fundamental work of Hill, *Palestine*, and to Reifenberg's *Coins of the Jews*, to which reference has been made, for the later Jewish coins (which were confined to the two periods of revolt against Rome in A.D. 66–70 and 132–135, and included silver as well as brass) see, especially for discussion of the distinctively Jewish types adopted, Paul Romanoff, *Jewish Symbols on Ancient Jewish Coins*, 1944, and Erwin R. Goodenough, *Jewish Symbols in the Greco-Roman Period*, 1953, i, pp. 268–279. See also *The Dating and Meaning of Ancient Jewish Coins and Symbols*, Numismatic Studies and Researches, ii, 1958. A writer in the *Journal of Theological Studies*, 1952, pp. 172–198 (with six plates) has assembled illustrations of important coins with types and legends alluding to the Jews, struck by the Romans. For the coins struck at Jerusalem after Hadrian's new dispensation had turned it into a pagan city with the new name of Aelia Capitolina see Hill, *Palestine*, and Leo Kadman, *The Coins of Aelia capitolina*, 1956. A. R. S. K.—**H. St. J. H.**

MONEY-CHANGERS.—How indispensable were the services of the '**money-changers**' (Mt 21^{12}, Mk 11^{15}, Jn 2^{14}) and '**bankers**' (Mt 25^{27}) in the first century of our era in Palestine may be seen from the varied currencies of the period alluded to in the preceding article (**6, 7**). The Jewish money-changer, like his modern counterpart the *ṣarrāf* (see *PEFSt*, 1904, pp. 49 ff for a well known and graphic account of the complexity of exchange in modern times) changed the larger denominations into the smaller, giving denarii, for example, for tetradrachms, silver for gold, and so forth. An important department of his business was the exchange of foreign money and even money of the country on any non-Phoenician standard for shekels and half-shekels on this standard, the latter alone being acceptable in payment of the Temple dues (cf MONEY, **4, 6**). It was no doubt

mainly for the benefit of the Jews of the Dispersion that the changers were allowed to set up their tables (in Greek they are 'table-men') in the outer court of the Temple (Mt 21^{12ff}). Some members of the profession, the bankers of Mt 25^{27} (cf Lk 19^{23}) received money on deposit for purposes of investment, on which usury was paid (see USURY).

The money-changers had constantly to be on their guard against false money (to which there are many references in ancient literature, especially *e.g.* by Philo). This gives weight to the often quoted unwritten saying (*agraphon*) of our Lord to his disciples 'show yourselves expert money-changers'—be skilful in distinguishing true doctrine from false. A. R. S. K.—H. St. J. H.

MONTH.—See TIME.

MONUMENT.—In Is 65^{4} AV, 'which remain among the graves and lodge in the monuments' (RV, RSV 'secret places'; literally 'in the guarded places') means 'among the tombs.' In the Rhemish Version 'monument' is the usual word for tomb or sepulchre, after Vulgate *monumentum*. The reference in Isaiah is to the custom of obtaining oracles by incubation, that is, spending the night in subterranean sacred places.

MOOLI, 1 Es 8^{47} (RV).—See MAHLI.

MOON.—The moon is 'the lesser light to rule the night' of the cosmogony of Genesis (1^{16}). Its importance was in part due to the recurrence of its phases, which formed a measure for time. Each **new moon,** as it appeared, marked the commencement of a new period, and so in Hebrew the word for 'moon' and 'month' is the same. Sun and moon occur side by side in passages of Scripture, and to the moon as well as to the sun is ascribed a fertilizing power over and above the gift of light which comes from them to the earth. Just as we have in Dt 33^{14} 'the choicest fruits of the sun,' so we have there 'the rich yield of the moons' (RSV 'months'). As a consequence of this, the re-appearance of the new moon was eagerly looked for, and trumpets were blown and sacrifices offered on the day of the new moon. The coupling of the new moon with 'sabbath' in Is 1^{13} *et al.* as the occasion for religious festivals makes it probable that the 'sabbath' in these passages was a moon-festival, and not the Jewish sabbath. In Ps 81^{3} a 'full moon' festival is mentioned, but the word used is of uncertain derivation and only occurs elsewhere in Pr 7^{20}. The Assyrian word *kusē'u*, 'head-dress,' or 'cap' is also used for 'full moon,' perhaps as tiara of the moon-god. The moon took its part with the sun in one of Joseph's dreams when it 'made obeisance' to him (Gn 37^{9}); and it stood still, 'in the valley of Aijalon,' at the command of Joshua, at the battle of Gibeon (Jos 10^{12f}; cf Hab 3^{11}). Language which must have been derived from the appearances of the moon during **eclipses** is used by the prophets. The moon is to be darkened or turned into blood (Jl 2$^{10, 31}$) before 'the day of the Lord'; and similar language is used by our Lord (*e.g.* Mk 13^{24}). We are told of the redeemed Zion that the light of the moon is to be as the light of the sun (Is 30^{26}), and that there is to be no need of the moon, because the glory of God is to be the light of His people (Is 60^{19}; cf Rev 21^{23}). Cautions against the worship of the moon, and punishment by death for the convicted worshippers, are to be found in Dt 4^{19} 17^{3}; whilst a superstitious salutation of the moon by kissing the hand, not quite unheard of even in our own day, is mentioned in Job 31^{26f}. Moon-worship by the burning of incense was offered in Jerusalem, and put down by Josiah (2 K 23^{5}).

In the OT we meet more than once with crescent-shaped ornaments (Jg 8^{21}, Is 3^{18}); whether these are an indication of the worship of the moon is uncertain.

It has been always considered baneful in the bright clear atmosphere of the warmer regions of the earth to sleep exposed to the rays of the moon (Ps 121^{6}). The influence of the earth's satellite has long been considered hurtful. Our word **'lunatic'** reproduces the idea of the Western world of our Lord's time, that lunacy was due to the influence of the moon: the Greek word used in Mt 4^{24} 17^{15} shows this. In the RV the word is translated 'epileptic.' There are many still to be found who believe that the violence and recurrence of epileptic fits vary with the phases of the moon.

MOOSIAS, 1 Es 9^{31} (AV).—See MAASEIAH, **4.**

MOOSSIAS.—See MAASEIAH, **4.**

MOPH.—See MEMPHIS.

MORALITY.—See ETHICS.

MORASHTITE.—A gentilic used in RV to designate the prophet Micah, Mic 1^{1}, Jer 26^{18} (AV **Morasthite**; RSV 'of Moresheth'); probably derived from Mor-sheth-gath (q.v.). Cf MICAH.

MORASTHITE, Mic 1^{1}, Jer 26^{18} (AV).—See MORASHTITE.

MORDECAI.—1. A cousin (?) of queen Esther, who thwarted Haman's plot against the Jews, Est 2^{5} etc. In Ad. Est 10^{4} etc. he is called **Mardocheus** in AV and RV. **2.** One of those who returned with Zerubbabel, Ezr 2^{2}, Neh 7^{7}, 1 Es 5^{8} (AV, RV **Mardocheus**).

MOREH, the Hiph'il participle from *yārāh*, means 'teacher' or 'one who gives direction' (2 K 17^{28}, Is 30^{20} etc.), and so is applied to a prophet (Is 9^{15}). Sitting in the shelter of a sacred tree, the priest or seer delivered his direction or 'oracles.' **1. The oak** (AV, wrongly, 'plain') **of Moreh** (Gn 12^{6}) may have been so named from the theophany vouchsafed to Abraham there. The same spot may be indicated by the oak of Moreh in Dt 11^{30}, mentioned as indicating the position of Ebal and Gerizim. From their conjunction with Gilgal it has been suggested that the *gilgāl* ('stone circle') and the terebinths were parts of the same sanctuary. There may be a reference to this place in Gn 35^{4}, in Jos 24^{26}, possibly also in Jg 9^{6}. Gilgal (Dt 11^{30}) may be *Kh. Jiljūliyeh*, fully 1½ miles E. of Jacob's Well. But this would not fix with certainty the position of the sanctuary of the terebinth. **2. The hill of Moreh** (Jg 7^{1}) seems to have lain to the N. of the position occupied by Gideon, in the direction of the camp of the Midianites. Taking the narrative as it stands, the Midianites 'encamped in the Valley of Jezreel' (6^{33}), while Gideon held the lower spurs of Gilboa towards Jezreel. The 'spring of Harod' is with some probability identified with *'Ain Jālūd*. The conspicuous hill on the other side of the vale, *Jebel ed-Daḥi*, popularly now called Little Hermon, round the W. flanks of which, and northward in the plain, the Midianites would spread, may be almost certainly identified with the Hill of Moreh. The article with Moreh suggests the presence of a sanctuary on the hill. This may be represented by the modern shrine of *Nebī Daḥī*. Questions have been raised by the condition of the Hebrew text, but no more probable identification has been suggested. Cf MORIAH. W. E.

MORESHETH-GATH.—A place mentioned in Mic 1^{14}. It was probably the birthplace of the prophet Micah, Mic 1^{1}, Jer 26^{18}. The *Onomasticon* locates it E. of, and near to, Eleutheropolis. It is possibly modern *Tell el-Judeideh*.

MORIAH.—1. The name.—in Gn 22^{2} Abraham was commanded to go 'to *the land of the Moriah*,' and to sacrifice Isaac upon 'one of the mountains' of which God would tell him. The derivation of the name is uncertain. The Peshitta (Syriac) reads 'the Amorites' in place of 'the Moriah.' This may be correct, although it does not help to locate definitely the region involved. It is probable that the Syriac and the Greek ('the high country') were deliberately indefinite because of uncertainty about the rival claims of the Samaritans and the Jews concerning the location of this sacred mountain. The narrator (E), in v.^{14} engages in a play on words in which 'the Moriah' is derived from a verb. Which verb is involved is uncertain as indicated by the fact that it has been rendered variously as 'to provide' (cf RSV), 'to see' (with some of the early translators in their rendering of the name in v.^{2}), and 'to fear' (with the

Targumists who emphasized the *worship* of Abraham at the spot).

2. The place.—The Chronicler (2 Ch 3[1]) leaves no doubt concerning the Jewish tradition that Mount Moriah was the Temple hill where Solomon built the house of the Lord in Jerusalem and the place of David's theophany. Efforts to identify the source of this tradition have been unsuccessful, although it persists among Jews, Christians, and Moslems, who now locate Mount Moriah at the Dome of the Rock where the Temple once stood. There is some similarity between the names of Moriah and 'Moreh,' the latter located near Shechem (Gn 12[6], Dt 11[30]) and Mount Gerizim. And it may have been owing to this that the Samaritans have claimed Gerizim as Abraham's mountain (cf Jn 4[20]). Gn 22[4] has been often cited to suggest that Gerizim, a mountain visible for some distance, must be the Moriah of Abraham because he 'lifted up his eyes and saw the place afar off.' However, on the strength of the reference in the same verse to Abraham's arrival at the place on the third day of his journey, presumably from Beer-sheba (21[33]), some scholars have proposed a location for Moriah on a mountain near Hebron. Because the place of origin of the journey is not stated in Genesis, it is best to conclude that evidence is not available for locating Moriah of Abraham's time and that by the time of the Chronicler (see CHRONICLES) tradition identified it with the Temple hill in Jerusalem. A. H. McN.—W. L. R.

MORNING.—See TIME.

MORROW AFTER THE SABBATH (Lv 23[11, 15]).—See PASSOVER.

MORTAR (AV 'morter').—See HOUSE, **1, 4**, and cf BITUMEN.

MORTAR AND PESTLE.—The use, from the earliest times, of the mortar and pestle for crushing the grains of the cultivated cereals, for the preparation of spices, and probably, as at the present day, for pounding meal and vegetables (see commentaries on Pr 27[22]) is attested by the constant occurrence of these articles in the remains of places excavated in Palestine. The mortars found at Gezer, as elsewhere, 'are simply heavy stones, a foot or two across, in whose upper surface a hemispherical hollow is cut. The pestles are cylindrical, with convex bases, which not infrequently display marks of rough treatment' (*PEFSt*, 1903, 118).

The manna is expressly said to have been beaten in mortars as well as ground in mills (Nu 11[8]). Their use is implied for pounding certain spices (Ex 30[36]) and for the 'crushed new grain' for the meal-offering of the first-fruits (Lv 2[14] RSV). Copper mortars are also mentioned in later literature, and in Herod's Temple the incense was pounded in mortars of gold. From the Mishnah (*Baba bathra*, iv. 3) we learn that it was customary to have larger mortars fixed into the floor of the house.

In Babylon, when a house was built, the seller handed the pestle of the house-mortar to the purchaser, in token of the conveyance of the house to its new owner. Hence the frequent occurrence, in deeds of sale, of the words 'the pestle has been handed over.' Cf article SHOE.

A. R. S. K.

MORTAR, THE.—See MAKTESH.

MORTGAGE.—The word 'mortgage,' used of the pledging of real estate in return for a loan, is found only in Neh 5[3]. See DEBT.

MORTIFY.—'To mortify' is in AV metaphorically 'to put to death.' Early writers could use it literally also, as Erasmus, *Commune Crede*, 81, 'Christ was mortified and killed in dede, as touchynge to his fleshe: but was quickened in spirite.'

MOSAIC.—Hebrew *riṣpāh* is rendered 'mosaic pavement' by RSV in Est 1[6], since the context indicates a variety of stones used for it. There is no necessary idea of 'mosaic' in the word itself, and elsewhere it is rendered simply 'pavement' (2 Ch 7[3], Ezk 40[17f] 42[3]).

MOSERAH, MOSEROTH.—Moserah is named in Dt 10[6] as the place where Aaron died and was buried; Moseroth in Nu 33[30f] as a stopping-place on the route to Mount Horeb. Its location is quite uncertain.

MOSES.—1. Name.—The Hebrew narrator regards *Mōsheh* as a participle from the verb *māshāh*, 'to draw' (Ex 2[10]). Josephus and Philo derive it from the Coptic *mo* 'water,' and *ushe* 'saved'; this is implied in their spelling *Mousēs*, also found in LXX and NT. It is more plausible to connect the name with the Egyptian *mes*, *mesu*, 'son.' Perhaps it was originally coupled with the name of an Egyptian deity—cf *Ra-mesu*, *Thoth-mes*, and others—which was omitted under the influence of Israelite monotheism.

2. History.—(i) *The narrative of J.*—Moses killed an Egyptian, and rebuked one of two Israelites who were striving together, and then he fled to Midian. There he helped seven daughters of the priest of Midian to water their flocks, dwelt with him, married his daughter Zipporah, and had one son by her, named Gershom (Ex 2[11–22]). The king of Egypt died (2[23a]), and at Y″'s bidding Moses returned. On the way, Y″ smote him because he had not been circumcised before marriage; but Zipporah saved him by circumcising the child, and thus circumcising Moses by proxy (4[19, 24–26]; these verses must be put back to this point). Y″ appeared in the burning bush and spoke to Moses. Moses was to gather the elders, give them Y″'s message, and demand permission from Pharaoh to sacrifice in the wilderness. Moses was given two signs to persuade the Israelites, and yet a third if the two were insufficient (3[2–4a, 5, 7, 8a, 16–18] 4[1–9]). Y″ was angry at his continued diffidence. Moses spoke to the elders and they believed; and then they made their demand to Pharaoh, which led to his increased severity (4[10–12, 29–31] 5[3, 5, 23] 6[1]). Plagues were sent, the death of the fish in the river (7[14, 16, 17a, 18, 21a, 24f]), frogs (8[1–4, 8–15a]), flies (8[20–32]), murrain (9[1–7]), hail (9[13, 17f, 23b, 24b, 25b–34]), locusts (10[1a, 3–11, 13b, 14b, 15a, c, 16–19]). See PLAGUES OF EGYPT. Pharaoh bade Israel go with their families, but refused to allow them animals for sacrifice; so Moses announced the death of the firstborn (10[24–26, 28f] 11[4–8]). At a later time Israelite thought connected with the Exodus certain existing institutions. The ordinances relating to them were preserved by J, but their present position is due to redaction, and the result is a tangled combination in chs. 12, 13 of ordinance and narrative: the ritual of the Passover (12[21–23, 27b]), the death of the firstborn and the hurried flight of the Israelites (12[29–34, 37–39]), commands concerning the Feast of Unleavened Cakes (13[3a, 4, 6f, 10]), and the offering of firstlings (13[11–13]), Y″ went before the people in a pillar of cloud and fire (13[21f]), the water was crossed (14[5f, 7b, 10a, 11–14, 19b, 21b, 24, 25b, 27b, 28b, 30]), and Moses sang praise (15[1]). Moses made the water at Marah fresh (15[22–25a]), and thence they moved to Elim (v.[27]). Fragments of J's story of Massah are preserved (17[3, 2c, 7a, c]), and parts of the account of the visit of Moses' father-in-law, which it is difficult to separate from E (18[7–11]). The narratives attached to the delivery of the laws at Sinai are in an extraordinarily confused state, but with a few exceptions the parts which are due to J can be recognized with some confidence. The theophany occurred (19[18]), and Moses was bidden to ascend the mountain, where Y″ gave him directions respecting precautions to be taken (19[20–22, 24, 11b–13, 25]) [v.[23] is a redactional addition of a remarkable character; due to [11b–13] having been misplaced]. Moses stayed 40 days and nights on the mountain (34[28a]); Y″ descended, and Moses 'invoked the name of Y″' (v.[5]). The laws given to him are fragmentarily preserved (vv.[10–26]). Y″ commanded him to write them down (v.[27]), and he obeyed (v.[28b]).

The reason for the insertion of the laws so late in the book was that the compiler of JE, finding laws in both J and E, and noticing the strong similarity between them, considered the J laws to be the *renewal* of the covenant broken by the people's apostasy. Hence the editorial

additions in 34[1] (from 'like the first') and in v.[4] ('like the first').

A solemn ceremony sealed the covenant (24[1f, 9-11]). Something then occurred which roused the wrath of Y″; it is doubtful if the original narrative has been preserved; but J has inserted a narrative which apparently explains the reason for the choice of Levites for Divine service (32[25-29]). Moses interceded for the people (the verses to be read in the following order, 33[1-4a, 17, 12f, 18-23] 34[6-9] 33[14-16]). Y″ having been propitiated, Israel left the mountain, and Moses asked Hobab to accompany them (Nu 10[29-36]). Being weary of manna, they were given quails, which caused a plague (11[4-15, 18-24a, 31-35]). Dathan and Abiram rebelled (ascribed by different commentators to J and to E, 16[1b, 2a, 12-15, 25f, 27b-32a, 33f]). Fragments of the Meribah narrative at Kadesh appear to belong to J (20[3a, 5, 8b]). Moses sent spies through the S. of Palestine as far as Hebron. Caleb alone encouraged the people, and he alone was allowed to enter Canaan (13[17b, 18b, 19, 22, 27a, 28, 30, 31] 14[1b, 8f, 11-24, 31]). Moses promised that Hebron should be Caleb's possession (Jos 14[6-14]). The Canaanites were defeated at Hormah (perhaps a later stratum of J, Nu 21[1-3]). Israel marched by Edom to Moab, and conquered Heshbon and other cities (21[16-20, 24b, 25, 31f]). The story of Balaam (parts of 22–24). Israel sinned with the Moabite women, and Moses hanged the chiefs (25[1f, 3b, 4]). Moses viewed the land from the top of Pisgah, and was buried in Moab (parts of Dt 34[1-6]).

(ii) *The narrative of E.*—The midwives rescued Israelite infants (Ex 1[15-20a, 21]). Moses' birth; his discovery and adoption by Pharaoh's daughter (2[1-10]). Moses was feeding Jethro's sheep in Midian, when God called to him from a bush at Horeb, and told him to deliver Israel. He revealed His name 'Ehyeh,' and promised that Israel should triumphantly leave Egypt (3[1, 4b, 6, 9-12, 13f, 21f]). Moses returned to Egypt, meeting Aaron on the way; they made their demand to Pharaoh, and were refused (4[17f, 20b, 27f] 5[1f, 4]). Moses, by means of his Divinely given staff, brought plagues—the turning of the river to blood (7[15, 17b, 20b, 23]), the hail (9[22, 23a, 24a, 25a, 35]), the locusts (10[12, 13a, 14a, 15b, 20]), the darkness (21–23, 27). Moses was bidden to advise the Israelites to obtain gold, etc., from the Egyptians (11[1-3]), which they did (12[35f]). They departed, taking with them Joseph's mummy (13[17-19]). They crossed the water (fragments are preserved from E's account, 13[7a, c, 10b, 15a, 16a, 19a, 25a]), and Miriam sang praise (15[20, 21]). On emerging into the desert, they were given manna; it is possible that E originally connected this event with the name *massah*, 'proving' (15[25b] 16[4, 15]). Then follows E's Meribah narrative combined with J's Massah narrative (17[1b, 2a, 4-6, 7b]). Israel fought with Amalek under Joshua's leadership, while Aaron and Hur held up Moses' hands with the sacred staff (17[8-16]). Jethro visited the Israelites with Moses' wife and two sons; he arranged sacrifices, and a sacrificial feast, in which the elders of Israel took part (18[1a, 5f, 12]). Seeing Moses overburdened with the duty of giving decisions, he advised him to delegate smaller matters to inferior officers; and Moses followed his advice. Jethro departed to his own home (18[12-27]). Preparations were made for the theophany (19[2b, 3a, 9a, 10, 11a, 14f]), which then took place (16[f, 19] 20[18-21]). Laws preserved by E and later members of his school of thought are grouped together in chs. 20–23 (see EXODUS, LAW). In the narratives in which the laws are set, two strata, E and E[2], are perceptible, the latter supplying the narrative portions connected with the Ten Words of 20[1-17]. E relates the ceremony which sealed the covenant (24[3-8]); the usual practice of Moses with regard to the 'Tent of Tryst,' where God used to meet with any one who wished to inquire of Him (33[7-11]); and the people's act of repentance for some sin which E has not preserved (33[6]). E[2] relates as follows: Moses told the people the Ten Words, and they promised obedience (19[7f]; this must follow 20[1-17]). Moses ascended the mountain to receive the written Words, leaving the people in the charge of Aaron and Hur (24[13-15a] 31[18b]). During his absence Aaron made the golden bull, and Moses, when he saw it, broke the tablets of stone and destroyed the image; Aaron offered a feeble excuse, and Y″ smote the people (32[1-6, 15a, 16-24, 35]). Moses' intercession has not been preserved in E, but it is supplied by a late hand in 32[30-34]. We here resume the narrative of E. After the departure from Horeb a fire from Y″ punished the people for murmuring (Nu 11[1-3]). At the 'Tent of Tryst' Y″ took of Moses' spirit and put it upon 70 elders who prophesied, including Eldad and Medad, who did not leave the camp; Joshua objected to the two being thus favoured, but was rebuked by Moses (11[16f, 24-30]). Miriam and Aaron spoke against Moses for having married a foreign woman and then for claiming to have received Divine revelations; Miriam became leprous, but was healed at Moses' intercession (12). On Dathan and Abiram (16) see above, under J. Miriam died at Kadesh (20[1]). Twelve spies were sent, who brought back a large cluster of grapes, but said that the natives were numerous and powerful (13[18a, c, 20, 23f, 26b, 27b, 29, 33]). The people determined to return to Egypt under another captain (14[1b, 3f]). [Here occurs a lacuna, which is partially supplied by Dt 1[19-46], probably based on E.] Against Moses' wish the people advanced towards Canaan, but were routed by the Amalekites and other natives (14[39-45]). Edom refused passage through their territory (20[14-21]). Aaron died at Moserah, and was succeeded by Eleazar (Dt 10[6]). Serpents plagued the people for their murmuring, and Moses made the serpent of bronze (Nu 21[4b-9]). Israel marched by Edom to Moab, and vanquished Sihon (21[11b-15, 21-24a, 27-30]); the story of Balaam (part 22–24). Israel worshipped Baal-peor, and Moses bade the judges hang the offenders (25[1a, 3a, 5]). Y″ warned Moses that he was about to die, and Moses appointed Joshua to succeed him (Dt 31[14f, 23]). Moses died in Moab, and his tomb was unknown. He was the greatest prophet in Israel (Dt 34[5, 6b, 10]).

(iii) *The narrative of D* is based upon the earlier sources, which it treats in a hortatory manner, dwelling upon the religious meaning of history, and its bearing upon life and morals, and Israel's attitude to God. There are a few additional details, such as are suitable to a retrospect (*e.g.* 1[6-8, 16f, 20f, 29-31] 32[1f, 23-28]), and there are certain points on which the tradition differs more or less widely from those of JE. But D supplies nothing of importance to our knowledge of Moses' life and character.

(iv) *The narrative of P.*—Israel was made to serve the Egyptians 'with rigour' (Ex 1[7, 13, 14b]). When the king died, Y″ heard their sighing, and remembered His covenant (2[23-25]). He revealed to Moses His name Yahweh, and bade him tell the Israelites that they were to be delivered (6[2-9]). Moses being diffident, Aaron his brother was given to be his 'prophet' (6[10-12] 7[1-7]). [The genealogy of Moses and Aaron is given in a later stratum of P, 6[14-25].] Aaron turned his staff into a 'reptile' before Pharaoh (7[8-13]). By Aaron's instrumentality with Moses plagues were sent—all the water in Egypt turned into blood (7[19, 20a, 21b, 22]); frogs (8[5-7, 15b]); gnats or mosquitoes (vv.[16-19]); boils (9[8-12]). [As in J, commands respecting religious institutions are inserted in connexion with the Exodus: Passover (12[1-13, 24, 28, 43-50]). Unleavened cakes (vv.[14-20]), Dedication of firstborn (13[1f]).] The Israelites went to Etham (13[20]) and thence to the Red Sea. The marvel of the crossing is heightened, the waters standing up in a double wall (14[1-4, 8f, 15b, 16b-18, 21a, c, 22f, 26, 27a, 28a]). In the wilderness of Sin the people murmured, and manna was sent; embedded in the narrative are fragments of P's story of the quails (16, except vv.[4, 15]). They moved to Rephidim (17[1a]), and thence to Sinai (19[1, 2a]). After seven days Y″ called Moses into the cloud (24[15b-18a]) and gave him instructions with regard to the Tabernacle and its worship (25–31[17]), and also gave him the Tablets of the Testimony (31[18a]). [Other laws ascribed to Divine communication with Moses are collected in Leviticus and parts of

Numbers.] When Moses descended, his face shone, so that he veiled it when he was not alone in Y″'s presence (34$^{29-35}$). A census was taken of the fighting men preparatory to the march, and the writer takes occasion to enlarge upon the organization of the priestly and Levitical families (Nu 1–4). The cloud which descended upon the Tabernacle was the signal for marching and camping (9$^{15-23}$), and the journey began (10$^{11-28}$). With the story of Dathan and Abiram (see above) there are entwined two versions of a priestly story of rebellion—(1) *Korah* and 250 princes, all of them laymen, spoke against Moses and Aaron for claiming, in their capacity of Levites, a sanctity superior to that of the rest of the congregation. (2) *Korah* and the princes were Levites, and they attacked Aaron for exalting priests above Levites (parts of 16). The former version has its sequel in 17; Moses and Aaron were vindicated by the budding of the staff for the tribe of Levi. In the wilderness of Zin Moses struck the rock, with an angry exclamation to the murmuring people, and water flowed; Moses and Aaron were rebuked for *lack of faith* [the fragments of the story do not make it clear wherein this consisted], and they were forbidden to enter Canaan (parts of 20$^{1a, 2-13}$). Joshua, Caleb, and ten other spies were sent from the wilderness of Paran; the two former alone brought a good account of the land, and they alone were permitted to enter Canaan; the other ten died by a plague (parts of 13, 14; see above under J and E). Aaron died at Mount Hor (20^{22b-29}). Israel marched by Edom to Moab (20^{22} 21$^{4a, 10, 11a}$). Phinehas was promised 'an everlasting priesthood' for his zeal in punishing an Israelite who had brought a Midianite woman into the camp (25$^{6-15}$). All the last generation having died except Joshua and Caleb, a second census was taken by Moses and Eleazar (26). Moses appointed Joshua to succeed him (27). The Midianites were defeated and Balaam was slain (31). Moses died on Mount Nebo, aged 120 (Dt 34$^{1a, 7-9}$).

3. Historicity.—In the OT, there are presented to us the varying fortunes of a Semitic people who found their way into Palestine, and were strong enough to settle in the country in defiance of the native population. Although the invaders were greatly in the minority as regards numbers, they were knit together by an *esprit de corps* which made them formidable. And this was the outcome of a strong religious belief which was common to all the branches of the tribe—the belief that every member of the tribe was under the protection of the same God, Yahweh. And when it is asked from what source they gained this united belief, the analogy of other religions suggests that it probably resulted from the influence of some strong personality. *The existence and character of the Hebrew race require such a person as Moses to account for them.* But while the denial that Moses was a real person is scarcely within the bounds of sober criticism, it does not follow that all the *details* related of him are literally true to history. What S. R. Driver says of the patriarchs in Genesis is equally true of Moses in Exodus, Numbers: 'The basis of the narratives in Genesis is in fact *popular oral tradition*; and that being so, we may expect them to display the characteristics which popular oral tradition does in other cases. They may well include a substantial historical nucleus; but details may be due to the involuntary action of popular invention or imagination, operating during a long period of time; characteristic anecdotes, reflecting the feelings, and explaining the relations, of a later age may thus have become attached to the patriarchs; phraseology and expression will nearly always be ascribed rightly to the narrators who cast these traditions into their present literary shape' (article 'Jacob' in *DB* ii, 534^{b}).

Moses is portrayed under three chief aspects—as (i) a Leader, (ii) the Promoter of the religion of Y″, (iii) Lawgiver, and 'Prophet' or moral teacher.

(i) *Moses as Leader.*—Some writers think that there is evidence which shows that the Israelites, who went to Egypt at the time of the famine, did not comprise the whole nation. Whether this be so or not, however, there is no sufficient reason for doubting the Hebrew tradition of an emigration to Egypt. Again, if Israelites obtained permission—as foreign tribes are known to have done—to occupy pasture land within the Egyptian frontier, there could be nothing surprising if some of them were pressed into compulsory building labour; for it was a common practice to employ foreigners and prisoners in this manner. But in order to rouse them, and knit them together, and persuade them to escape, a leader was necessary. If, therefore, it is an historical fact that they were in Egypt, and partially enslaved, it is more likely than not that the account of their deliverance by Moses also has an historical basis. It is impossible, in a short article, to discuss the evidence in detail. It is in the last degree unsafe to dogmatize on the extent to which the narratives of Moses' life are historically accurate. In each particular the decision resolves itself into a balance of probabilities. But that Moses was not an individual, but stands for a tribe or group of tribes, and that the narratives which centre round him are entirely legendary, are to the present writer pure assumptions, unscientific and uncritical. The minuteness of personal details, the picturesqueness of the scenes described, the true touches of character, and the necessity of accounting for the emergence of Israel from a state of scattered nomads into that of an organized tribal community, are all on the side of those who maintain that *in its broad outlines* the account of Moses' leadership is based upon fact.

(ii) *Moses as the Promoter of the religion of Yahweh.*—Throughout the ΘT, with the exception of Ezk 40–48, the forms and ceremonies of Y″ worship observed in every age are attributed to the teaching of Moses. It is to be noticed that the earliest writer (J) uses the name 'Yahweh' from his very first sentence (Gn 2^{4b}) and onwards, and assumes that Y″ was known and worshipped by the ancestors of the race; and in Exodus he frequently employs the expression 'Y″ the God of the Hebrews' (3^{18} 5^{3} 7^{16} 9$^{1, 13}$ 10^{3}). But, in agreement with E and P, he ascribes to Moses a new departure in Y″ worship inaugurated at Sinai. E and P relate that the Name was a new revelation to Moses when he was exiled in Midian, and that he taught it to the Israelites in Egypt. And yet in 3^{6} E represents Y″ as saying to Moses, 'I am the God of thy father' [the God of Abraham, the God of Isaac, and the God of Jacob (unless this clause is a later insertion, as in 15$^{ff, 45}$)]. And in 6^{3} P states categorically that God appeared unto Abraham, Isaac, and Jacob, but He was not known to them by His name 'Yahweh.' All the sources, therefore, imply that Moses did not teach a totally new religion; but he put before the Israelites a new aspect of their religion; he defined more clearly the relation in which they were to stand to God: they were to think of Him in a peculiar sense as *their* God. When we go further and inquire whence Moses derived the name **'Yahweh,'** we are landed in the region of conjectures. Two points, however, are clear: (1) that the God whose name was 'Yahweh' had, before Moses' time, been conceived of as dwelling on the sacred mountain Horeb or Sinai (3$^{1-5, 12}$ 19^{4}); (2) that He was worshipped by a branch of the Midianites named Kenites (Jg 1^{16} 4^{11}), of whom Jethro was a priest (Ex 3^{1} 18^{1}). From these facts two conjectures have been made. Some have supposed that Moses learned the name 'Yahweh' from the Midianites; that He was therefore a foreign God as far as the Israelites were concerned; and that, after hearing His name for the first time from Moses in Egypt, they journeyed to the sacred mountain and were there admitted by Jethro into the Kenite worship by a sacrificial feast at which Jethro officiated. But it is hardly likely that the Israelites, enslaved in Egypt, could have been so rapidly roused and convinced by Moses' proclamation of an entirely new and foreign deity. The action taken by Jethro in organizing the sacrifice might easily arise from the fact that he was in his own territory, and naturally acted as host towards the strangers. The other

conjecture, which can claim a certain plausibility, is that Y″ was a God recognized by Moses' own tribe of Levi. From Ex 4[24, 27] it is possible to suppose that Aaron was not in Egypt, but in the vicinity of Horeb, which he already knew as the 'mountain of God.' If Moses' family, or the tribe of Levi, and perhaps (as some conjecture) the Rachel tribes, together with the Midianite branch of Semites, were already worshippers of Y″, Moses' work would consist in proclaiming as the God of the whole body of Israelites Him whose help and guidance a small portion of them had already experienced. If either of these conjectures is valid, it only puts back a stage the question as to the ultimate origin of the name 'Yahweh.' But whatever the origin may have been, it is difficult to deny to Moses the glory of having united the whole body of Israelites in the single cult which excluded all other deities.

(iii) *Moses as Prophet and Lawgiver.*—If Moses taught the Israelites to worship Y″, it may safely be assumed that he laid down some rules as to the method and ritual of His worship. But there is abundant justification for the belief that he also gave them injunctions which were not merely ritual. It is quite arbitrary to assume that the prophets of the 8th cent. and onwards, who preached an ethical standard of religion, preached something entirely new, though it is probable enough that their own ethical feeling was purer and deeper than any to which the nation had hitherto attained. The prophets always held up a lofty ideal as something which the nation had *failed to reach*, and proclaimed that for this failure the sinful people were answerable to a holy God. And since human nature is alike in all ages, there must have been at least isolated individuals, more high-souled than the masses around them, who strove to live up to the light they possessed. And as the national history of Israel postulates a leader, and their religion postulates a great personality who drew them, as a body, into the acceptance of it, so the ethical morality which appears in the laws of Exodus, and in a deeper and intenser form in the prophets, postulates a teacher who instilled into the nucleus of the nation the germs of social justice, purity, and honour. Moses would have been below the standard of an ordinary sheikh if he had not given decisions on social matters, and Ex 18 pictures him as so doing, and 33[7-11] shows that it was usual for the people to go to him for oracular answers from God. It is in itself probable that the man who founded the nation and taught them their religion, would plant in them the seeds of social morality. But the question whether any of the codified laws, as we have them, were directly due to Moses is quite another matter. In the life of a nomad tribe the controlling factor is not a *corpus* of specific prescriptions, but the power of custom. An immoral act is condemned because 'it is not wont so to be done' (Gn 34[7], 2 S 13[12]). The stereotyping of custom in written codes is the product of a comparatively late stage in national life. And a study of the history and development of the Hebrew laws leads unavoidably to the conclusion that while some few elements in them are very ancient, it is impossible to say of any particular detail that it is certainly derived from Moses himself; and it is further clear that many are certainly later than his time.

4. Moses in the NT.—(i) All Jews and Christians in Apostolic times (including our Lord Himself) held that Moses was the *author* of the Pentateuch. Besides such expressions as 'The law of Moses' (Lk 2[22]), 'Moses enjoined' (Mt 8[4]), 'Moses commanded' (Mt 19[7]), 'Moses wrote' (Mk 12[19]), 'Moses said' (Mk 7[10]), and so on, his name could be used alone as synonymous with that which he wrote (Lk 16[20, 31] 24[27]).

(ii) But because Moses was the representative of the Old Dispensation, Jesus and the NT writers thought of him as something more. He was a historical personage of such unique prominence in Israel's history, that his whole career appeared to them to afford parallels to spiritual factors in the New Covenant. The following form an interesting study, as illustrating points which cover a wide range of Christian truth: The 'glory' on Moses' face (2 Co 3[7-18]), the brazen serpent (Jn 3[14]), the Passover (Jn 19[36], He 11[28], 1 Co 5[7f]), the covenant sacrifice at Horeb (Mt 26[28], Mk 14[24], Lk 22[20], 1 Co 11[25]; see also He 9[18-20], 1 P 1[2] with Hort's note), the terrors of the Sinai covenant (He 12[18-24]), the crossing of the sea (1 Co 10[2]), the manna (Jn 6[30-35, 41-58]), the water from the rock (1 Co 10[3, 4]), Moses as a prophet (Ac 3[22] 7[37], Jn 1[21-23]; and see Jn 6[14] 7[40] [Lk 7[39]]), the magicians of Egypt (2 Ti 3[8]), the plagues (Rev 8[5, 7, 8] 9[2-4] 15[6-8] 16[2-4, 10, 13, 18, 21]), and 'the song of Moses the servant of God' (Rev 15[3]).

MOST HIGH (*'Elyôn*) occurs as an epithet of *'El* 'God' (Gn 14[18-20, 22], Ps 78[35]) or *Yahweh* (Ps 7[17]); or it stands by itself as a title of God (Nu 24[16], Dt 32[8], Ps 21[7], etc.). We find it first in Gn 14, where **Melchizedek** is described as 'priest to the Most High God' (*'El 'Elyôn*), and since in later times the Salem where he lived was generally identified with Jerusalem, the double function of priest and king ascribed to him caused him to be regarded by the Jews as a type of the ideal king, and by the Christians as the type of Christ. Hence the name of the God whom he worshipped (*'El 'Elyôn*), which may possibly, in the first instance, have had reference merely to the lofty situation of Jerusalem, became in later generations a mysterious and exalted title of Yahweh. According to Philo of Byblos the Phoenicians worshipped a deity of this name (cf Eusebius, *Praep. Evang.* I. x. 14), and he is probably to be identified with the *Aleyin* of the Râs Shamra texts. The corresponding Greek word, *Hypsistos*, is frequent in inscriptions of the Graeco-Roman period, and was applied especially to Zeus. It is therefore clear that *'Elyôn* was originally a deity distinct from Yahweh (cf O. Eissfeldt, *JSS* i, 1956, 25 ff), whose title was transferred to Yahweh. Whatever the origin of the title *'Elyôn*, it never occurs in strictly prose passages of the OT, though we find it in the Songs of Balaam (Nu 24[16]), Moses (Dt 32[8]), and David (2 S 22[14]). The Aramaic equivalents are fairly frequent in Daniel (3[26] 4[34], etc.).

The uses of the Greek rendering in the NT are instructive. In the story of the Annunciation it is ordained that the child whom Mary is to bear shall be called Son of the Most High (Lk 1[32]); and a little later on (v.[76]) John the Baptist is spoken of as prophet of the Most High. The contrast is completed in the Epistle to the Hebrews, where Melchizedek is brought forward as priest of the Most High (cf 7[1] with v.[28]). It is worth noting, too, that the title is twice found in the mouth of demoniacs (Mk 5[7]=Lk 8[28], Ac 16[17]). The word, then, does not belong to the language of everyday life: it is reserved for poetry and elevated style, and it seems by its origin to have suggested something archaic and mysterious, whether it referred to the lofty dwelling-place or to the majestic nature and attributes of God.

H. C. O. L.—H. H. R.

MOTE.—The word chosen by Wycliffe and Tyndale, and accepted by subsequent versions as the translation of Gr. *karphos* in Mt 7[3f], Lk 6[41f] (RSV '**speck**'). The root of *karphos* is *karphō* 'to dry up,' and it signifies a bit of dried stick, straw, or wool, such as, in the illustration, might be flying about and enter the eye. In its minuteness it is contrasted by our Lord with *dokos*, the **beam** that supports (*dechomai*) the roof of a building.

MOTH.—Hebrew *'āsh*, Job 4[19] 13[28], Ps 39[11], Is 50[9] 51[8], Hos 5[12]; Greek *sēs*, Mt 6[19f], Lk 12[33], Ja 5[2]. All these references are to the clothes-moth, which is ubiquitous and extremely plentiful in Palestine. It is almost impossible to guard against its destructiveness, except by constantly using clothes, shawls, carpets, etc. Such goods, when stored for long, are found to be reduced

almost to powder on being removed (cf Job 4^{19} etc.). In Job 27^{18} AV and RV have 'moth,' but RSV emends to 'spider' (cf RSVm). E. W. G. M.

MOTHER.—See FAMILY, 3.

MOTHER-OF-PEARL.—See JEWELS AND PRECIOUS STONES, PEARL.

MOUNT.—An earthwork in connexion with siegecraft (Jer 6^{6} AV, RV; RSV 'siege mound'; so also elsewhere), also rendered **bank** (2 S 20^{15} RV; AV 'mount,' RSV 'mound'). In 1 Mac 12^{36} RV has 'mound' (AV 'mount'; RSV 'high barrier'). See, further, FORTIFICATION AND SIEGECRAFT.

MOUNT, MOUNTAIN.—Although on the whole a mountainous country, Palestine has few striking or commanding peaks to show; consequently, though we find frequent mention of mountains in the Bible, there are comparatively few names of individual summits. 'Mountain,' as well as its cognate 'mount,' is used both of isolated elevations and of extensive districts of lofty ground—such as Sinai, Horeb, Carmel on the one hand, Mount Seir or the Mountain of Gilead on the other.

Mountains served various functions to the ancient inhabitants of the land. (1) They were *dwelling-places*, for which the numerous caves, natural and artificial, excavated in their soft limestone sides, well fitted them: thus Esau dwelt in Mount Seir (Gn 36^{8}). (2) They served the purpose of *landmarks*: thus Mount Hor was indicated (Nu 34^{7}) as a boundary of the Promised Land. (3) They were used as *platforms*, for addressing large crowds of people, as in the famous ceremony at Ebal and Gerizim (Jos 8^{30ff}), in the address of Jotham to the Shechemites (Jg 9^{7}), and that of Abijah to the Ephraimites (2 Ch 13^{4}). (4) They were *burial-places* ('the tombs there on the mount,' 2 K 23^{16}). (5) They served as *refuges* (Gn 14^{10}, Mt 24^{16}); (6) as *military camps* (1 S 17^{3}); (7) as *sources of stone, wood and plants* (2 Ch 2^{18}, Neh 8^{15}, Hag 1^{8}); (8) as *watch-towers and look-out stations* (Ezk 40^{2}, Mt 4^{8}); (9) as *pasturage* (Ps 50^{10}, Lk 8^{32}); (10) as *fortresses* (Ps 125^{2}). Their obvious fitness for typifying strength and endurance gives rise to metaphors and comparisons to be found in almost every book of both Testaments.

But it is in their aspect as *holy places* that mountains are of the deepest interest to the student of the Scriptures or of Palestine. In modern Palestine almost every hill a little loftier or more striking than its fellows is crowned by a domed shrine, *now* regarded as the tomb of a Moslem saint, but no doubt the representative of a sacred precinct that goes back to the earliest Semitic inhabitants of the land. Sinai, Horeb, Carmel occur to the memory at once as mountains consecrated by a theophany. The worship at **'high places'** was so deeply engrained in the Hebrews that no amount of legislation could eradicate it; the severe discipline of the Exile was needed for its destruction. R. A. S. M.

MOUNT OF THE ASSEMBLY.—See CONGREGATION.

MOUNTAIN SHEEP.—See CHAMOIS.

MOURNING CUSTOMS.—The oriental expression of grief has a twofold relationship. Towards God it is marked by silent and reverent submission symbolized by placing the hand on the mouth. 'The Lord gave, and the Lord has taken away' (Job 1^{21}); 'I am dumb . . . for it is thou who hast done it' (Ps 39^{9}). But towards the relatives and neighbours the case is altogether different. It is now an event that has to be announced as quickly and publicly as possible, and a loss which love has to deplore with passionate abandonment and an accumulation of conventional ceremony. At the moment of death a loud shrill **wail** is raised by those present. Its meaning is understood only too well. As the piercing, tremulous shrieks are repeated, a few inquiries are made as to the locality and circumstances, and the rapidly increasing cry is accepted as an invitation and claim to proceed to the house of mourning. Immediately after death the body is washed and robed for the **burial**, which usually takes place within twenty-four hours. In addition to the successive outbursts of grief by members of the family, who have to be comforted and pleaded with and led away from the prostrate figure of the dead, the sustained ceremony of mourning is attended to by the neighbours. These, usually assisted by **hired mourners**, arrange themselves around the **bier**, or on opposite sides of the room, and keep up the lamentation without intermission. In this way they afford the preoccupation of a recognized routine, and give the relief of physical outlet to feelings that either are, or are considered to be, beyond control. At times one of the chief mourners leans over the body, wringing her hands or wiping away the fast falling tears, and asking why he has left them, and who will discharge the duties that belonged to him alone, pleading for love's sake to hear only once more the music of the voice now silent, or begging forgiveness on account of selfishness and imperfect service in the days that will never return. Meanwhile the band of mourners redouble their wailing, with beating of the breast and frantic clutching at their hair and clothes. As such paroxysms cannot last, the skilled mourners, usually women, endeavour to moderate and sustain the feeling of desolation by a plaintively descending chant. Among the singers there are usually one or two who are specially skilful in leading off with metrical phrases and rhymes of sympathetic appeal, which the others take up and repeat in concert. The invariable subject is the good qualities of the departed, and the extent of the loss which the family has been called upon to bear. In addition to the above allusions, new springs of tenderness are opened by referring to other members of the same family recently departed, and the loved one whose death they are lamenting is asked to bear messages of greeting to them. As the intimation of the bereavement reaches more distant parts of the town, or is carried to the neighbouring villages, companies of sympathizing friends come to show their regard for the dead. They announce their arrival by loud weeping and exclamations of grief; and as they enter the house the lamentation of the mourners in the room breaks out afresh. To the Western visitor unacquainted with the temperament and traditions of Oriental people, the whole scene is deeply distressing, and he has to check the feeling of repugnance by reminding himself that they would be equally shocked by the apparent callousness and ordered formality of our procedure on similar occasions. With cruel yet merciful swiftness the hour arrives for interment. The lamentation that was passionate before now becomes tumultuously defiant. Relatives lose all self-control, and, refusing to let the bearers discharge their sad office, have to be forcibly removed. The procession is then formed, and on the way to the cemetery is increased by those who join it to show their respect towards the family, and also to share the merit which the Lord attaches to service performed for those who can no longer reward it. Among the Jews, during the prescribed days of separation following upon a death in the family, the mourners are daily visited by the Rabbi, who reads the portions of Scripture and the prayers appointed by the synagogue. Over the door of the cemetery is inscribed in Hebrew 'The House of Eternity' or 'The House of the Living.' The explanation given in regard to the latter term is either that the life beyond the grave is the real life, or, according to others, that the grave is the place of habitation to which all the living must come.

The references to mourning in the Bible show that the custom of to-day in Palestine is the same as in ancient times with regard to the house of mourning, although special features of liturgical form now belong to the Synagogue, the Church, and the Mosque. There is the same announcement by wailing (Mic 1^{8}, Mk 5^{38}). Friends come to condole (Job 2^{11-13}), and there is the same language of commendation and affectionate regret (2 S 1^{17-27} $3^{33, 34}$). The exclamations of to-day were then used (1 K 13^{30}, Jer 22^{18}). Hired mourners are alluded to (Jer $9^{17, 18}$, Am 5^{16}); and such manifestations as the **beating of the breast** (Is 32^{12}), **tearing of the**

garments (2 S 3^{31}), fasting (1 S 31^{13}, 2 S 3^{35}), the putting of ashes on the head and the wearing of sackcloth (Gn 37^{34}). Remarkable indeed is the forbearance of David who discarded all signs of mourning after the death of his son (2 S 12^{20}), out of quiet resignation to the irrevocable will of God. Ezekiel devoutly refrained from formal mouring after the death of his wife (Ezk 24$^{15-24}$).

The form of lamentation for the individual is applied to afflicted Israel (Jer 9^{1}, La 1^{16} 3^{48f}), and to the historical extinction of Tyre (Ezk 27$^{28-36}$). It was also applied to the supposed death of vegetation gods at the beginning of the dry season in the spring of the year: **Tammuz** (Ezk 8^{14}), **Hadad-rimmon** (Zec 12^{11}), **Baal** (Hos 7^{14}). Resurrection of the god in the autumn brought the return of rain and of fresh vegetation. A long drought indicated the failure of the god to return from the netherworld (1 K 18^{27}).

Dramatic display of sorrow carried with it the peril of insincerity and self-righteousness, hence Christ's note of warning (Mt 6$^{16-18}$). The Apostle Paul commends as a Christian duty the showing of sympathy towards those in affliction (Ro 12^{15}), but intimates that in Christ the familiar phrase of greeting to the afflicted, 'Hope is cut off!' has been made obsolete by the resurrection of the Lord Jesus (1 Th 4^{13}). One of the features to which the New Jerusalem owes its title is the absence of mourning and tears (Rev 7^{17}). G. M. M.—W. H. Br.

MOUSE.—Hebrew *'akhbār*. Probably a generic term including field-mice, hamsters, dormice, and even jerboas. The male of the last named is called *'akbâr* by the Arabs. All these small rodents are exceedingly plentiful in Palestine. The hamster (*Cricetus phoeus*) and the jerboa, of which three varieties have been found in the land, are eaten by the Arabs (cf Is 66^{17}). Metal mice as amulets have been found in the Palestine plain (cf 1 S 6^{4f}). The mouse was forbidden food to the Israelites (Lv 11^{26}). E. W. G. M.

MOUTH.—Several Hebrew words are so translated. **1.** *gārôn* (literally 'throat'), Ps 149^{6} (AV, RV; RSV 'throat'). **2.** *hēkh* (literally 'palate'), Job 12^{11} (AV; RV, RSV 'palate'). **3.** *'ᵉdhî* (literally 'ornaments'), Ps 32^{9} (AV; RV 'trappings,' cf RSV), Ps 103^{5} (AV, RV; RSV emends to yield 'as long as you live'). **4.** *peh*, the most usual word for 'mouth,' meaning also 'edge,' *e.g.* of the sword (Ex 17^{13} etc.), or 'border,' *e.g.* of a garment (Ps 133^{2}, AV, RV 'skirt'; RSV 'collar'). **5.** *pûm*, Aramaic=Hebrew *peh*, Dn 7^{5} etc. **6.** *pānîm* (literally 'face'), Pr 15^{14}. **7.** *tᵉra'*, Aramaic (literally 'door'), Dn 3^{26} (RSV 'door'). **8.** Greek *stoma*, in NT. Frequently in Scripture 'mouth' is used figuratively for 'speech,' of which it is the organ. W. E.

MOZA.—**1.** Son of Caleb, 1 Ch 2^{46}. **2.** A descendant of Saul, 1 S 8^{36f} 9^{42f}.

MOZAH.—A town of Benjamin, Jos 18^{26}; possibly modern *Kh. Beit Mizzeh*, close to *Qalôniyeh*, W. of Jerusalem.

MUFFLER, Is 3^{19} (AV, RV).—See SCARF.

MULBERRY TREES.—**1.** 2 S 5^{23f}, 1 Ch 14^{14f}; see BALSAM TREES. **2.** Ps 84^{6} (AVm); see BACA, VALLEY OF.

MULE.—**1.** *peredh* (m) and *pirdāh* (f), in all passages except the following. **2.** *rekhesh*, Est 8$^{10, 14}$ (AV; RV 'swift steeds,' RSV 'swift horses'), 1 K 4^{28} (AVm; AV 'dromedaries'; RV, RSV 'swift steeds'). In Mic 1^{13} for the same word AV has 'swift beast,' RV 'swift steed' and RSV 'steeds.' There is no reason to think mules were intended. **3.** *yēmîm*, Gn 36^{24} (AV; RV, RSV 'hot springs'). 'Mules' is certainly a wrong translation.

The breeding of mules was forbidden to the Israelites (Lv 19^{19}), but from David's time (2 S 13^{20} 18^{9}) onwards (1 K 1^{33} 10^{25} 18^{5}) they appear to have been increasingly used. The returning Israelites brought 245 mules with them (Ezr 2^{66}). Mules are preferred in Palestine to-day as pack animals (cf 1 Ch 12^{40}, 2 K 5^{17}); they are hardier, subsist on less food, and travel better on rough roads. A well-trained mule is a favourite riding animal with the highest officials in the land. E. W. G. M.

MUNITION occurs in a few passages of AV in the sense of a fortified place, *e.g.* Is 29^{7}, where RV and RSV have 'stronghold.' In Is 33^{16} AV and RV have 'munitions,' but RSV 'fortresses.' Similarly in Nah 2^{1} AV and RV have 'munition,' while ARV has 'fortress' and RSV has 'ramparts.' In 1 Mac 14^{10} for AV and RV 'all manner of munitions,' RSV has 'the means of defence' (cf 10^{11} AV and RSV 'fortifications,' RV 'defence,' for the same Greek word).

MUPPIM.—A son of Benjamin, Gn 46^{21}; called **Shuppim** in 1 Ch 7$^{12, 15}$, and **Shephupham** in Nu 26^{39} (AV **Shupham**), and **Shephuphan** in 1 Ch 8^{5}.

MURDER.—See CRIMES, 7; REFUGE [CITIES OF].

MURRAIN.—See PLAGUES OF EGYPT.

MUSHI.—A son of Merari, Ex 6^{19}, Nu 3^{30}, 1 Ch 6$^{19, 47}$ 23$^{21, 23}$ 24$^{26, 30}$. The patronymic **Mushites** occurs in Nu 3^{33} 26^{58}. See MERARI, **1.**

MUSIC AND MUSICAL INSTRUMENTS.—1. Probable character of early Hebrew music.—Since the Dispersion, the music of the Jews has always borne the impress of the peoples among whom they have settled. Synagogue ritual thus affords us no clue to the music of early times, and we must accordingly fall back on Scripture and tradition. From these we gather that Hebrew music was of a loud and piercing nature, far removed from the sweetness which modern taste demands. There is no real evidence that the players ever advanced beyond unison in their combinations of notes, apparently reproducing the air on successively rising or falling octaves of the scale. We may suppose, however, that they would hardly fail to discover that certain combinations were pleasing to the ear, and would thus learn to strike them either simultaneously or successively (*arpeggio*). How far, however, they grasped the nature of a chord or of harmony must remain obscure, in spite of the attempts to solve this question, some of them altogether baseless guesses. For example, even the Hebrew accents, though of comparatively late origin, and always confined in Jewish use to acting as guides in the proper recitation of the text, have been pressed into the service, as though employed for the purpose of a kind of 'figured bass,' and thus indicating an acquaintance with musical harmony. Unfortunately, even those who have maintained this theory differ considerably as to the details of its application.

2. Rendering of Hebrew music.—It seems clear at any rate that an antiphonal setting was in use for many of the Psalms (*e.g.* 13, 20, 38, 68, 89); but the chanting must not be taken as resembling what we now understand by that term. The account we have in 1 Ch 15^{16ff} of the elaborate arrangements for conducting the musical services of the Temple, appears to indicate a somewhat complicated system, and to suggest that there entered a considerable element of flexibility into the composition. It is, for instance, quite possible that the long reciting note which with us may do duty on occasion for as many as twenty, thirty, or even more syllables, played no such monotonous part, but was broken up and varied to an extent suggested by the length of the verse as well as by the character of the sentiment to be conveyed.

3. Occasions on which music was used.—Hebrew religious melody had a popular origin, and was thus closely connected with the religious life of the nation. Apart from such references to song as those in Gn 31^{27} and Job 21^{12}, we find in the headings of certain Psalms (*e.g.* 22, *'Ayyeleth hash-Shaḥar*, 'the hind of the morning') traces of what are in all probability in some, if not in all, cases secular songs. So *'Al Tashḥēth*, 'Destroy not,' prefixed to Pss 57, 58, 59, 75, may well be the first words of a vintage song (cf Is 65^{8}). A parallel may be found in directions prefixed to Ibn Gabirol's hymns and those of other celebrated Jewish poets, when these compositions were adapted to music in the Spanish

(Sephardic) ritual (see D. J. Sola, *Ancient Melodies, etc.*, 1857, Pref. p. 13). Amos (6^5) speaks of music performed at feasts, and in 1 S 18^6 we read of its use in Saul's time in connexion with processions. As in this last case, so in general it may be supposed that music and dancing were closely connected and had a parallel development. David's careful elaboration of the Levitical music, vocal and instrumental, was employed, according to 2 Ch 5^{12}, with impressive effect at the dedication of Solomon's Temple. The reformations under both Hezekiah and Josiah included the restoring of the musical ritual belonging to David's time (2 Ch 29^{25ff} 35^{15}). Later the descendants of Heman and other Levitical leaders of music were among the exiles of the Return from Babylon, and under them the services were reconstituted as of old (Neh $12^{27, 45ff}$).

4. Hebrew musical instruments.—Here our information is somewhat fuller, though involving a good deal of uncertainty in details. We may for clearness' sake divide under three heads, viz. stringed, wind, and percussion instruments.

(1) *Stringed instruments.*—Chief among these are the *kinnôr* and the *nēbhel*, '**lyre**' and '**harp**' (RV '**harp**' and '**psaltery**'), which were evidently favourites among the Jews. It is plain, in spite of doubts which have been expressed upon the point, that the two names were not used indifferently for the same instrument. The LXX in nearly all cases is careful to distinguish them (*kithara* or *kinyra*, and *psaltērion*, *nablē*, or *nabla* respectively). Both, however, were used in the main, and perhaps exclusively, to accompany songs, and those of a joyous nature. Both occur in the Dead Sea Hymn Scroll along with *ḥālîl* (see below) in this aspect. (They were unsuitable for times of mourning; see Ps 137^2, a passage which further shows that the instrument must have been, unlike a modern harp, easily portable). They were doubtless the chief, if not the sole, instruments employed in the Temple services. In Solomon's time they were made from almug (algum) trees, doubtfully identified with sandal wood. The strings, originally of twisted grass or fibres of plants, were afterwards formed of gut, and subsequently from silk or metal.

(*a*) The *kinnôr* (an onomatopoetic word, derived from the sound of the strings) is the only stringed instrument mentioned in the Hexateuch, where (Gn 4^{21}) its invention is attributed to Jubal, son of Lamech. The *nēbhel* is first mentioned in 1 S 10^5, as used by the prophets who went to meet Saul. The *kinnôr* (*kithara* or **lyre** [in 1 Mac 4^{54} the AV renders '**cithern**,' RV and RSV '**harp**']) consisted of a sound-box at the base, with wooden side-arms and a crossbar connected by the strings with the box below. The early and widespread use of this type of instrument in the Middle East is well attested from Assyrian reliefs, while the wooden harp, decorated with a copper cow's head, discovered at Ur testifies to the actual structure. Egyptian tombs also provide evidence, *e.g.* one shown on a tomb in Egypt, dating from about the 30th cent. B.C. (12th Dynasty). A tomb at Thebes in the same country (dating between the 12th and 18th Dynasties) exhibits a similar form, which was sometimes modified later in the direction of more artistic construction and sloping of the crossbar downwards, so as to vary the pitch of the strings. Jewish coins of Maccabaean date furnish us with a close resemblance to the Greek *kithara*. Josephus (*Ant.* VII. xii. 3 [306]) distinguishes the *kinnōr* as a ten-stringed instrument struck by a plectrum; the *nabla*, on the other hand, being, he says, played with the fingers. This need not necessarily conflict, as has been thought by some, with the statement (1 S 16^{23}) that David played the *kinnôr* 'with his hand'; and Josephus's evidence in such a matter should carry much weight.

(*b*) The *nēbhel.*—It has been sought to identify this with various instruments; among them, the **lute** (so RV in Is 5^{12} [AV **viol**; RSV '**harp**']; 'lute' is also RV and RSV translation of Greek *kinyra* in 1 Mac 4^{54}), guitar, and **dulcimer**. In support of the last it is urged that the Arabic name for that instrument, *sanṭîr*, is a corruption of the Greek *psaltērion*, by which, as has been said, the LXX sometimes render *nēbhel*. Having regard, however, to the testimony of Josephus (see above) that the *nēbhel* had twelve strings, and was played by the hand without a plectrum, we are safe in taking it to be a kind of **harp**, an instrument of larger size than the *kinnôr*, and used (Am 6^5, Is 5^{12} 14^{11}) at the feasts of the rich. The Dead Sea 'War' scroll mentions a *nēbhel* of ten(?) strings. So also Ps 33^2 144^9 (RV 'psaltery of ten strings'; RSV 'harp of ten strings' or 'ten-stringed harp'; AV adds 'and,' rendering 'psaltery and an instrument of ten strings'). We find, on the other hand, that it was not too large to be played by one who was walking (see 1 S 10^5, 2 S 6^5). The above argument from *sanṭîr* = *psaltērion* is weakened by the fact that the Greek word was used *generically* for stringed instruments played with one or both hands without a plectrum. We may note further that the *nabla* (see above for this as a LXX rendering of *nēbhel*), known to the Greeks as of Sidonian origin, was played according to Ovid (*Ars Amat.* iii. 327) with both hands.

Egyptian monuments show us portable harps, varying in form, bow-shaped, rectangular, or triangular, though all constructed on the same general principle, and having the sound-box above, not, as the *kinnôr*, below. Seven of these harps, of a triangular shape, and used by a Semitic people in Assyria, are to be seen on a bas-relief found at Kuyunjik. We may add that several early Church writers (Augustine on Ps 42; Jerome on Ps 149^3; Isidore, *Etym.* iii. 22, 2) support the above identification of *nēbhel* with a harp.

(*c*) There is little that can be asserted with confidence as to the nature of other instruments of this class mentioned in the Bible. In Dn 3^{5ff}, besides the *psantērîn* (Greek *psaltērion*) and *kitharis* (Greek *kithara*) with which we have already dealt, we have the *śabbᵉkhā* (AV, RV **sackbut**); RSV has '**trigon**,' 'a triangular instrument with four strings and bright tone' (*KB*). This is evidently the Greek *sambykē*, but the latter has been variously described as a large harp of many strings and rich tone, similar to the grand Egyptian harp, and as a very small one of high pitch. After all, both descriptions may be true, if referring to different periods of its existence.

Nᵉghînôth has sometimes been taken as the name of an instrument, but is much more probably a general term for stringed music. So in Ps 68^{25} (Heb ^{26}), we have a contrast between the singers (*shārîm*) and the players on strings (*nōghᵉnîm*), which the Dead Sea Hymns scroll confirms.

Gittîth, the heading of Pss 8, 81, 84, has also, but somewhat doubtfully, been referred to instruments named after Gath: so the early Jewish paraphrase (Targum), 'the harp which David brought from Gath.'

(2) *Wind instruments.*—(*a*) The *ḥālîl*, 'flute' (AV, RV **pipe**; RSV 'pipe' or '**flute**') seems to have been the instrument of this class in most common use. It was played in coming from and going to the high place (1 S 10^5, 1 K 1^{40} 'pipes'). It accompanied festal processions of pilgrims (Is 30^{29}). It was used in mourning (Jer 48^{36}, cf Mt 9^{23}), and in the ritual of twelve solemn annual occasions. According to Is 5^{12}, the feasts of the drunkards were enlivened by it. It may have been a simple **flute**, *i.e.* a mere tube with holes, played by blowing either into one end or into a hole in the side. It is possible, on the other hand, that it may have been a reed instrument, either, as the modern oboe, with a double and vibrating tongue, or, as the clarinet, with a single tongue. Neighbouring nations were, we know, familiar with **reed pipes**, as they also were with double flutes, which, for anything we know to the contrary, the *ḥālîl* may have been. On the other hand, the keyed flute is of decidedly later origin, and in the times with which we are dealing the fingers must have done all the work.

(*b*) The '*ûghābh*, 'pipe,' rendered uniformly in the AV as '**organ**,' an instrument which was not known even in rudimentary form in OT days, seems to have become an obsolete word even in LXX times, as shown by the variety of renderings which it has there received. The instrument known as 'Pan's pipes' (Gr. *syrinx*, Lat.

fistula) is perhaps the best conjecture that can be offered. RSV renders by ' pipe ' in Gn 4^{21}, Job 21^{12} 30^{31}. (*c*) The *mashrôḳîthā*, ' pipe ' (RSV ; AV and RV **flute**) may have been similar ; while (*d*) the *sumpônyâ* (cf the Italian *zampugna* or *sampogna* for ' bagpipes ') may well have corresponded to the modern **bagpipes**, as developed from the double flute ; a good example of a double instrument is in a relief from Karatepe (Hittite), where also a ' bagpipe ' appears. (*e*) The *shôphār*, ' **horn**,' ' trumpet ' is mentioned seventy-two times in the OT. It is not a musical instrument as such, but is used to give a loud sound (1 Ch 15^{28}, 2 Ch 15^{14}, Ps 98^{6}, Hos 5^{8} ; AV and RV **cornet**, RSV ' horn '). It was a curved horn of a cow or ram, used mainly, and till later OT times exclusively, for secular purposes, such as to give signals in war (*e.g.* Jg 3^{27} or to announce important events (*e.g.* 1 K $1^{34, 39}$). It is still employed by the Jews at solemn festivals. For 2 S 6^{5}, AV ' cornets,' see (3) (*c*) below.

The *ḥ^{a}ṣōṣ^{e}rāh*, on the other hand—the one instrument of which we have an undoubtedly authentic representation, viz. on the Arch of Titus at Rome in front of the table of the showbread—was a long, straight, metal **trumpet**, used mainly for religious purposes, especially in later times (2 K 12^{13}, 1 Ch 13^{8} ; LXX renders by *salpinx*, see BUGLE). *Ḥ^{a}ṣōṣ^{e}rôth* are prominent in the Dead Sea ' War ' scroll.

(3) *Percussion instruments.*—(*a*) The *tōph*, ' **tabret** ' or **timbrel** (2 S 6^{5}, plural ' *tuppîm*,' **tambourines**), was a small hand-drum, represented on Egyptian and Assyrian monuments. In these instruments, unlike the modern drum, the parchment was probably rigidly fixed, and thus incapable of being tightened or loosened so as to regulate the pitch. In the ancient Sumerian ritual for the New Year festival a sacred bronze drum with drumsticks of hard wood was used and revered. (*b*) *m^{e}ṣiltaim* and *ṣels^{e}lîm* were **cymbals**. Two shapes are found in Egypt and Assyria, the one consisting of two flat plates, played by being clashed together sideways, the other of two cones with handles at the peak, one cone being brought down on top of the other. (*c*) *m^{e}naʿanʿîm*, ' **castanets** ' (so RV and RSV ; AV wrongly ' cornets ' ; RVm *sistra*, 2 S 6^{5}) were formed of two thin metal plates with holes, through which were passed rods with loose metallic rings at their ends. (*d*) *shālîshîm* in 1 S 18^{6} ' instruments of music ' (RSVm ' triangles, or three-stringed instruments,' so also RVm) has been thought, from the apparent connexion of the word with the third Hebrew numeral, to be a triangle, but this is quite uncertain. It is more probable that it was a particular kind of *sistrum*. It may, however, be *groups of three* playing and singing as they dance, v.^{7}.

A. W. S.—R. A. B.

MUSICIAN, THE CHIEF.—See PSALMS, **2.**

MUSTARD (Gr. *sinapi*).—The seed of this plant is used proverbially for anything exceedingly small. In this sense it occurs in the Gospels (Mt 17^{20} etc.) and the Talmud. Jesus compares the Kingdom of heaven to the mustard seed (Mt 13^{31} etc.), thus contrasting the tiny beginnings and the great result of the proclamation of the Gospel of the Kingdom. The plant intended is the *Sinapis nigra* (Arab. *khardal*), which grows wild in Palestine, and is a familiar sight on the shores of Gennesaret. It is also found under cultivation, and in the gardens it reaches a great size, being often from 10 to 12 feet in height. An annual, growing from seed, it is naturally compared with other garden herbs, which, although it springs from the smallest seed, it quite outgrows. It bears a profusion of minute seeds, of which the birds are very fond, sitting (' lodging ') on the branches as they eat. Although it is not properly ' a tree ' (Lk 13^{19}), it quite accords with Oriental use to describe as such a great plant like this. And Plutarch even described a heather ' tree ' (*Isis and Osiris*, 357a).

E. W.—F. C. G.

MUSTER GATE.—A gate on the NE. side of Jerusalem, Neh 3^{31} (AV **gate of Miphkad**, RV **gate of Hammiphkad**). Many attempts have been made to locate it, but as the course of this part of Nehemiah's wall has not been revealed by excavation, they are conjectural. Vincent believes it is the same as the **Gate of the Guard** (q.v.), Neh 12^{39}

MUTH-LABBEN.—See PSALMS, **2.**

MUTILATION.—See CRIMES AND PUNISHMENTS, **9.**

MYNDOS (AV **Myndus**) was a city in Caria at the extremity of the peninsula on the S. side of which lay the city of Halicarnassus. It was strong enough to resist an assault of Alexander, but played no great part in history. It is mentioned separately in 1 Mac 15^{23} as one of the places to which, in 139 B.C., the Romans sent messages on behalf of the Jews. Hence it is assumed that it was independent of the Carian confederacy ; and its native population seems to have descended from the race of the Leleges, and to have always maintained its independence against the Carians.

A. E. H.

MYRA was a city of Lycia (q.v.) situated 2½ miles from the coast, but the same name is often applied to its harbour of Andriaca. In Greek times **Patara** (q.v.), 40 miles to the W., surpassed it, but in Roman times Myra became the chief seaport of Lycia, and was recognized by Theodosius as the capital. It grew especially through the Alexandrian grain-trade with Italy. The Alexandrian ships did not coast round the Levant, but took advantage of the steady west winds to cross direct between Lycia and Egypt. These winds made it easier for a ship sailing from Egypt to make for Myra, after which it could make its way across the Aegean, N. of Crete, and then the Ionian Sea, with the help of the N. wind, and up the W. coast of Italy with a westerly or southerly. A ship sailing to Egypt would be sailing more before the wind by taking a line from Patara. Doubtless this was the usual custom. In Ac 27^{6} we read that the centurion in charge of St. Paul found at Myra ' a ship of Alexandria sailing for Italy ' ; whereas in Ac 21^{1} Paul took ship direct from Patara to Tyre (though the Bezan text makes this ship touch at Myra). Myra retained its importance into the Middle Ages. Its bishop in the time of Constantine was St. Nicolas, and he became the patron saint of sailors in the E. Mediterranean, doubtless taking the place of a Lycian god to whom the sailors paid their vows on landing at Myra. There are splendid ruins on the site of Myra.

A. E. H.—F. C. G.

MYRRH.—1. *mōr* (Arab. *murr*), the dried gum of a species of balsam (*Balsamodendron myrrha*) growing in Arabia and India. It has a pleasant, though faint, smell, Ps 45^{8}, Est 2^{12}, Pr 7^{17}, Ca 1^{13} 3^{6}. It is used still in medicine (cf Mk 15^{23}). It was used in embalming (Jn 19^{39}), and was a valuable gift (Mt 2^{11}). According to Schweinfurth, the myrrh of the OT was a liquid product of the *Balsamodendron opobalsamum*, known as balsam of Mecca. Ex 30^{23} and Ca $5^{5, 13}$, where the ' myrrh ' appears to have been liquid, support this view. See also OINTMENT.

2. *lōṭ*, translated ' myrrh ' in Gn 37^{25} 43^{11}, is a fragrant resin from the *Cistus* or ' rock rose,' a common Palestine shrub. In Arabic this is called *lâdan* (Lat. **ladanum**. so RVm). As a product of Palestine it was a likely substance to send to Egypt.

E. W. G. M.

MYRTLE.—Hebrew *h^{a}dhas*, Is 41^{19} 55^{13}, Zec $1^{8, 10f}$, Neh 8^{15} ; also as a name *Hadassah*=Esther (Est 2^{7}). *Myrtus communis* is an evergreen shrub much prized in Palestine. It grows wild in the mountains, especially on Carmel and in Gilead, but is also widely cultivated. It sometimes reaches a height of ten feet, but is usually much less. Its dark green leaves, pretty white flowers, and dark berries, which are eaten, are all much admired. It is still regularly used by the Jews in the Feast of Tabernacles (cf Neh 8^{15}).

E. W. G. M.

MYSIA was a district in the NW. of Asia Minor, S. of the Propontis and Hellespont. It derived its name from the Mysi, a Thracian tribe who probably entered Asia with the Phrygians. At no period were its boundaries strictly defined. It formed part of the dominions of the Persians and of Alexander. From 280 B.C. it was

part of the kingdom of Pergamum, and therefore fell to the Romans in 133 B.C., becoming part of the province of Asia. The only mention of it in the Bible is Ac 16^{7f}, where St. Paul passed through it on his second missionary journey. A tradition assigned the evangelization of part of Mysia to a certain Onesiphorus, who was martyred at Parium when Adrian was proconsul of Asia, A.D. 109–114. See Assos, Troas, Adramyttium, all of which places were assigned to Mysia. A. E. H.

MYSTERY.—Several passages in the NT speak of (*e.g.*) 'the mystery of the gospel' (Eph 6^{19}), and the question has been raised whether this use of the term 'mystery' is explicable from the Semitic background of the NT or if it reflects the influence of the Hellenistic mystery-religions. The mysteries are a group of ancient cults with a fairly wide following in the Hellenistic age. In the Greek world the mysteries of Demeter at Eleusis ranked as the oldest and most eminent, while in the second place stood the cult of the Cabiri of Samothrace, concerning which not much is known. Mystery-cults of non-Greek origin came in later: Mithras from Persia, Isis and Osiris from Egypt, Attis and Cybele from Phrygia, Adonis from Syria. The characteristic of all these cults was to regard their rites as a secret only revealed to initiates, who were forbidden to disclose the ceremonies and solemn formulas to the uninitiated. The ceremony of initiation was normally unrepeatable. Moral demands varied, but in some cases at least were fairly high (see Origen, *c. Celsum*, iii. 59). The initiate shared in the god's grief and joy, and was assured of immortality.

The mystery-religions present certain analogies, both in general and in particular, with the theology and practices of early Gentile Christianity. These analogies may have been overworked as an explanation of the latter, but they are not to be set aside as wholly irrelevant; they only need to be treated with restraint and caution. Paul's doctrine of the sacraments, for example, owes more to OT typology (cf 1 Co 10^{1ff}) than to the mysteries, and there is a remarkable, probably conscious, avoidance of characteristic mystery-vocabulary in the NT. Nevertheless, there was probably some degree of influence, as is to be expected if the missionaries were using ideas and language intelligible to their audience. Heterodox forms of Christianity undoubtedly fell under the direct power of the mysteries; the language of Col 2^{18} provides evidence for the heretics combated by Paul at Colossae. The second-century Ophites freely plagiarized the Mithraic routine for the soul's passwords, to be recited when ascending through the seven planetary spheres after death. The Naassenes manifest similar syncretistic phenomena. The Gnostic, for whom all was myth and symbol, for whom the particularity of the Word made flesh in time and space was incomprehensible, was more generous in his welcome to pagan myth and religion than the orthodox defender of an exclusive faith. Even so, Justin Martyr remains largely unembarrassed by the Mithraic use of bread and wine for a sacramental meal; and Clement of Alexandria delights to present Christianity as the supreme mystery-religion, God's esoteric secret that has at long last been revealed, Christ being the hierophant.

In the Septuagint the word 'mystery' is used in late writings (*e.g.* Wis 12^{5} $14^{15, 23}$) in a manner that is broadly allusive to the pagan cults, but such passages are rare. In Dn $2^{28f, 47}$, the word means a veiled hint of future events planned by God. It is understood that God reveals His hidden plans by His servants the prophets (cf Amos 3^{7}), who possess insight into the counsels of the heavenly assembly (1 K 22^{19ff}). This secret plan is unknown to false prophets (Jer $23^{18, 21-22}$). The apocalyptic writings naturally develop this notion, with their love of obscurity and claim to disclose the providential plan underlying terrible and meaningless events. The 'mystery' is the eschatological secret. This kind of language is reflected in the Qumrân *Manual of Discipline* (iii. 20–23, iv. 18), and in the book of *Hymns*, with special reference to the mystery of Divine providence in allowing evil. This background of apocalyptic usage is of pre-eminent importance for that of the NT, and is apparent, *e.g.* in 2 Th 2^{7} 'the mystery of lawlessness,' and Rev 10^{7}. In Mark 'the mystery of the kingdom of God' becomes a leading theme (cf Mk 4^{11f}), being linked to the author's thesis of the messiahship of Jesus being a carefully guarded 'secret' and of the incarnation as a Divine incognito that can only be penetrated by those to whom it is granted so to do.

Similarly Paul can use the word 'mystery' of esoteric insight into the 'mystery of Christ,' only granted to the spiritual man, not to the psychic man or even to the cosmic powers which failed to comprehend the significance of the cross (1 Co 2^{6-16}). In Col 1^{25-27} and Eph 3^{2f} it is explained that the 'mystery' of God, the secret at long last revealed through Paul as apostle of the Gentiles (cf Ro 16^{25} which may be non-Pauline), is the extension of the gospel to the Gentile world. Paul also uses the word in referring to anything specially esoteric, like the resurrection of the saints (1 Co 15^{51f}) or the symbolism of the marriage of Adam and Eve (Eph 5^{32}). (The fact that the Latin *sacramentum* can mean either an esoteric symbol or a soldier's oath, and was used in the Vulgate to render *mystērion* in this last passage, among others, became important in post-Reformation debates about the sacramental status of marriage.) But in the NT esotericism is not cultivated for its own sake. In Christ God's secret stands revealed; the mystery of the gospel is that message which is now to be proclaimed. See Rome, **8.** H. C.

MYTH AND RITUAL.—The use of the expression 'Myth and Ritual' is intended to draw attention to one particular aspect of myth, namely, its relation to ritual and its function in ritual. The late Jane Harrison, in her studies in early Greek religion, especially in her book *Themis* (1912), was the first to bring into prominence the fact that the *mythos* (the spoken part), and the *drōmenon* (the done part), were the essential constituents of a valid ritual. At that time, however, little was known of the nature of early Semitic ritual, and she was not able to show that much of early Greek myth and ritual had its roots in a still earlier myth and ritual pattern discovered in Mesopotamia. The Scandinavian scholar S. Mowinckel, in his *Psalmenstudien* (especially ii: *Das Thronbesteigungsfest Jahwäs*, 1922), was the first to apply the knowledge of Babylonian rituals to Hebrew religion. In England, the publication of the symposium *Myth and Ritual* (1933) drew the attention of English OT scholars to this element in the religion of Israel. Since then this line of research has been most actively pursued by Scandinavian scholars. It has long been recognized that a relation of some kind existed between the origin stories in the first eleven chapters of Genesis and the Sumerian and Babylonian myths of Creation and the Flood. It is also admitted that various references in the OT to the victory of Yahweh over a dragon (Ps 74^{13f}, Is 51^{9}) must be related to the Babylonian myth of the conquest of the chaos dragon Tiamat by the god Marduk. But since the latter myth formed an important part of the ritual of the New Year Festival in Babylon, the question arose whether a similar New Year Festival formed part of the pattern of the religion of Israel at any time during its history, and whether, if such a festival existed, it owed anything to the Babylonian festival. Into this controversy a fresh feature has entered, namely, the part played by the king in the Jerusalem cultus. Attention was first drawn to this aspect of the problem by an article contributed to the volume entitled *The Labyrinth* (1935) by Professor A. R. Johnson, and since followed up by him in his book *Sacral Kingship in Ancient Israel* (1955). In this book the view is advocated, based mainly on a detailed study of the royal and kingship psalms in the Hebrew Psalter, that, during the Davidic monarchy at Jerusalem there was a New Year Festival celebrated in the month Tishri, in which the king played an important part. The ritual consisted of a dramatic representation of the victory

of Yahweh over hostile forces attacking Jerusalem. The 'myth,' or spoken part of this ritual was embodied in the kingship psalms which described the actions of the various participants in the ritual.

The question of the relation between myth and ritual has been extended to the field of NT studies. This aspect of the subject was first discussed by Professor E. O. James in his book *Christian Myth and Ritual* (1933), and has been followed up by other studies, such as Riesenfeld's *Jésus Transfiguré* (1947). Professor James suggests that the outlines of the myth and ritual pattern can be traced in the drama of redemption that is re-enacted annually at the Easter Festival and daily in the Liturgy at the Altar. S. H. He.

N

NAAM.—A Calebite family, 1 Ch 4^{15}.

NAAMAH.—**1.** Sister of Tubal-cain, Gn 4^{22}. **2.** Mother of Rehoboam, 1 K 14$^{21, 31}$, 2 Ch 12^{13}. **3.** A town of Judah in the lowland, Jos 15^{41}. There is no notice of it elsewhere. Zophar the **Naamathite**, Job 2^{11} etc.; there is nothing, however, to connect him with this town. It is possibly modern *Kh. Fered.*

NAAMAN (the word means 'pleasantness,' or, as an epithet, as is probable, of Adonis or Tammuz, 'darling'; cf the Adonis plantations referred to in Is 17^{10} [cf RVm]. The Arabs of the present day still call the red anemone, which blooms in the spring, at the time at which one of the Adonis festivals used to be held, the 'wounds of the darling, or Naaman'; the name of the flower probably comes from 'Naaman'; see W. R. Smith in the *English Historical Review*, April 1887). As a proper name, it is a good Syrian name, and is to be found in one of the Ugaritic genealogical tablets.—**1.** A name given to three different persons, who are described as the descendants of Benjamin; in Gn 46^{21} the name of one of the sons of Benjamin, in Nu 26^{40}, 1 Ch 8^{4} son of Bela, son of Benjamin, and in 1 Ch 8^{7} son of Ehud (or Abihud), grandson of Benjamin. It is difficult to assess the trustworthiness of these lists, but it may be assumed that it was a popular name among the Benjamites. Nu 26^{40} refers to the 'family of **Naamites** (*i.e.* Naamanites), and therefore they probably formed a clan belonging to the tribe of Benjamin.

2. A Syrian general who came to **Elisha** to be healed of leprosy. The story is told in 2 K 5, and belongs to the cycle of stories connected with Elisha. The incident must have taken place during a period of cessation of hostilities between Damascus and Israel, and has been described as 'brilliant in its representation of the international manners of the age.' Through an Israelite slave-girl Naaman hears of the man of God who works miracles, and in the hope of being cured, he is sent by the Syrian king to the king of Israel. When Elisha learns of the king's confusion, he requests that Naaman be sent to him, in order that he may learn that 'there is a prophet in Israel.' On his arrival Naaman receives a message to the effect that he is to wash in the river Jordan seven times; his objection that the prophet ought to work the miracle 'in the name of the Lord his God' seems very justifiable; upon the advice, however, of his servants he dips himself seven times in the Jordan, and is healed. His first words to the prophet, thereupon, are, 'Behold, I know that there is no God in all the earth, but in Israel.' On Elisha's refusing the gift offered to him, Naaman asks for two mules' burden of Israelitish soil upon which to worship the God of Israel; this is in entire accordance with the ideas of the time that a god of a country cannot be worshipped properly excepting upon his own soil (cf 1 S 26$^{19, 20}$). Quite natural, too, according to the beliefs of the time, is his wish to bow down in the house of Rimmon; for apart from the necessity of this on account of his attendance on the king, there is the fact that religious syncretism was considered not only permissible, but, under various circumstances, commendable. (For the unworthy conduct of the prophet's servant **Gehazi**, and the punishment inflicted on him see GEHAZI.) W. O. E. O.—E. R. R.

NAAMATHITE.—See NAAMAN, **1.**

NAAMITES.—See NAAMAN, **1.**

NAARAH ('girl').—**1.** One of the wives of Ashhur the 'father' of Tekoa, 1 Ch 4$^{5f.}$. **2.** A town of Ephraim, Jos 16^{7} (AV **Naarath**); called **Naaran** in 1 Ch 7^{28}. It is possibly *Tell el-Jisr*, near *'Ain Dûq.*

NAARAI.—One of David's heroes, 1 Ch 11^{37}; called **Paarai** 'the Arbite' in 2 S 23^{35}.

NAARAN.—See NAARAH, **2.**

NAARATH, Jos 16^{7} (AV).—See NAARAH, **2.**

NAASHON, Ex 6^{23} (AV).—See NAHSHON.

NAASSON, Mt 1^{4}, Lk 3^{32} (AV).—See NAHSHON.

NAATHUS.—One who married a foreign wife, 1 Es 9^{31}; apparently corresponding to **Adna** in Ezr 10^{30}.

NABAL.—A wealthy but churlish sheep-owner 'in Maon, whose business was in Carmel,' 1 S 25^{2}. David, while living as an outlaw and freebooter, demanded at Nabal's sheep-shearing his reward for defending his flocks, 1 S 25$^{5ff.}$. Nabal, inflamed with wine, returned an insolent answer, and David was prevented from wreaking terrible venegeance only by the timely arrival of Abigail, Nabal's wife, with large gifts and abundant flattery. The word *Nabal* means 'fool,' and Abigail, with wifely candour, says to David, 'Fool is his name and fool is he.' The next day Nabal was informed of all that had happened, and the shock of discovery brought on an apoplectic seizure, which caused his death. Abigail then became David's wife. W. F. B.

NABARIAH.—1 Es 9^{44} (AV, RV **Nabarias**) = **Hashbaddanah** (q.v.), Neh 8^{4}.

NABARIAS, 1 Es 9^{44} (AV, RV).—See NABARIAH.

NABATAEANS (1 Mac 5^{25} 9^{35}).—See ARABIA, ARETAS, EDOM, NEBAIOTH.

NABATHAEANS.—RV form of **Nabataeans** (q.v.).

NABATHITES.—AV form of **Nabataeans** (q.v.).

NABOTH.—A man of Jezreel, owner of a vineyard adjoining the palace of Ahab (1 K 21^{1}). The king, desiring to add the vineyard to his lands, offered to buy it or exchange it for another. Naboth, however, refused to give up 'the inheritance of his fathers.' Jezebel, Ahab's wife, by using the royal authority with the elders of the city, had Naboth accused of treason and blasphemy, and stoned to death. As Ahab went to take possession of the vineyard, he was met by Elijah, the prophet, who pronounced doom on him and his house. The murder of Naboth seems to have deeply impressed the popular mind, and the deaths of Joram and Jezebel near the spot were regarded as Divine retribution on the act, 2 K 9$^{25f.}$. W. F. B.

NABUCHODONOSOR, the Greek form of the name Nebuchadnezzar (q.v.) retained in AV and RV in 1 Es 1$^{40ff.}$, Ad. Est 11^{4}, Bar 1$^{9ff.}$ (RSV **Nebuchadnezzar**).

NACHON, 2 S 6^{6} (AV).—See NACON.

NACON.—The name of the threshing floor where Uzzah died, 2 S 6^{6} (AV **Nachon**); called **Chidon** in 1 Ch 13^{9}.

NADAB.—1. The eldest son of Aaron, Ex 6^{23}, Nu 3^{2}, 26^{60}, 1 Ch 6^{3} 24^{1}; he accompanied Moses to Sinai, Ex $24^{1, 9f}$, and was admitted to the priestly office, Ex 28^{1}; on the day of his consecration (cf Lev 10^{12ff} with v.^{9}) he and Abihu perished for offering 'unholy fire,' Lv 10^{1f}, Nu 3^{4} 26^{61}, 1 Ch 24^{2}. Wherein the transgression of Nadab and Abihu consisted is not clear. It is often suggested that 'unholy' fire means fire taken from a common source instead of from the altar (cf Lv 16^{12}, Nu 16^{46}). **2.** A Jerahmeelite, 1 Ch $2^{28, 30}$. **3.** A Benjamite, 1 Ch 8^{30} 9^{36}. **4.** The ungrateful foster-son of Ahikar, To 14^{10} (AV, RV **Aman**); in the Aramaic, Syriac, and Arabic forms of the **Ahikar** (q.v.) story, his name appears as **Nadan.** **5.** Apparently the nephew of Achiacharus (AV, RV; RSV **Ahikar**), who was the nephew of Tobit (To 11^{18}; AV **Nasbas**). He came with Achiacharus to the wedding of Tobias. About his identity there is some little uncertainty. The Vulgate speaks of him as brother of Achiacharus, while others have regarded the two as identical. It has been suggested also that he is the same as Aman or Nadan, the ward of Achiacharus (To 14^{19}), in which case the uncle adopted the nephew and brought him up as his son. **6.** Son and successor of Jeroboam I. as king of Israel, 1 K 14^{20}; he reigned two years and was assassinated by Baasha, one of his generals, who became king, 1 K 15^{25ff}. T. A. M.

NADABATH.—An unidentified town (?), east of the Jordan, in the neighbourhood of which a wedding party of the sons of Jambri was attacked, and many of them slain, by Jonathan and Simon, 1 Mac 9^{37ff} (AV **Nadabatha**).

NADABATHA, 1 Mac 9^{37} (AV).—See NADABATH.

NADAN.—See NADAB, **4.**

NAGGAI.—An ancestor of Jesus, Lk 3^{25} (AV **Nagge**); cf the Hebrew name **Nogah.**

NAGGE, Lk 3^{25} (AV).—See NAGGAI.

NAHALAL.—A town of Zebulun, Jos 19^{15} (AV **Nahallal**); given to the Levites, 21^{35}. Its inhabitants were not expelled by the Zebulunites, but were made tributary, Jg 1^{30} (here called **Nahalol**). Alt has suggested the identification with *Tell en-Naḥl*; an alternative suggestion is with *Ma'lûl.*

NAHALIEL.—A stopping-place in the journey from the Arnon to Jericho, Nu 21^{19}. The location is unknown.

NAHALLAL, Jos 19^{15} (AV).—See NAHALAL.

NAHALOL.—See NAHALAL.

NAHAM.—The brother of Hodiah's wife, 1 Ch 4^{19}.

NAHAMANI.—One of the twelve heads of the Jewish community, Neh 7^{7}; omitted in Ezr 2^{2}. In 1 Es 5^{8} **Eneneus** replaces him in RV (AV **Enenius**), for which RSV substitutes **Bigvai,** who stands further down in Neh 7^{7}.

NAHARAI.—The armourbearer of Joab, 2 S 23^{37} (AV **Nahari**), 1 Ch 11^{39}. In the latter he is called a Berothite (AV, RV), for which we should read Beerothite (RSV 'of Beeroth'), as in the former.

NAHARI, 2 S 23^{37} (AV).—See NAHARAI.

NAHASH.—1. A king of Ammon, who demanded the surrender of the men of Jabesh-gilead, with the loss of the right eye of each, 1 S 11^{1f}. So sure was he of their helplessness that he allowed them seven days' respite in which to appeal for help. Saul, newly designated as Israel's future king, was ploughing in the fields when the news was brought to him. He sacrificed the oxen, sent parts of the sacrifice to his fellow-countrymen with a command to muster, and promptly destroyed the Ammonites. Probably this is the Nahash who was kind to Saul's enemy David (2 S 10^{2}, 1 Ch 19^{1f}), and whose son Shobi (2 S 17^{27}) brought supplies to David at Mahanaim. **2.** The father of Abigail, and Zeruiah, if the text of 2 S 17^{25} is correct, which is doubtful. According to Buchanan Gray, 'daughter of Nahash' may have crept into the text from 'son of Nahash' in v.^{27}; cf 1 Ch 2^{16}. J. H. St.

NAHATH.—1. A 'duke' of Edom, Gn $36^{13, 17}$, 1 Ch 1^{37}. **2.** A Kohathite Levite, 1 Ch 6^{26}; perhaps called **Toah** in v.^{34}, and **Tohu** in 1 S 1^{1}. **3.** A Levite in the time of Hezekiah, 2 Ch 31^{13}.

NAHBI.—The Naphtalite spy, Nu 13^{14}.

NAHOR.—1. Father of Terah and grandfather of Abraham Gn 11^{22-25}, 1 Ch 1^{26}, Lk 3^{24}. **2.** Grandson of the preceding and brother of Abraham and Haran, Gn 11^{26f}; cf Jos 24^{2}. He is said to have married Milcah, daughter of Haran (Gn 11^{29}), and twelve sons are enumerated, eight by Milcah and four by Reumah his concubine (Gn 22^{20-24}). In Gn 24^{10} we read of the 'city of Nahor,' *i.e.* Haran, where Rebekah was found. Laban, in making a covenant with Jacob, swears by the 'God of Abraham and the God of Nahor' (Gn 31^{53}). The sons ascribed to Nahor (Buz, Uz, Aram, etc.) are for the most part names of tribes. It has been questioned if Nahor is a historical character at all. Some think we have, instead, the name of a lost tribe once resident in the neighbourhood of Haran, from which the Aramaean tribes were descended. While Abraham appears as the common ancestor of the Israelites and Edomites, Nahor is represented as the father of the Aramaeans. W. F. B.

NAHSHON.—Brother-in-law of Aaron, Ex 6^{23} (AV **Naashon**); a descendant in the fifth generation from Judah, 1 Ch 2^{10f}, and prince of the tribe of Judah, Nu 1^{7} 2^{3} 7^{12-17} 10^{14}. He is mentioned as one of the ancestors of David, Ru 4^{20}, 1 Ch 2^{10f}; and hence of Christ, Mt 1^{4}, Lk 3^{32} (AV **Naasson**).

NAHUM.—I. THE MAN.—The word *Nahum* means 'full of comfort' and is probably a contraction of a longer Hebrew term meaning 'God (or Yahweh) is a comforter.' Of the man so named nothing is certainly known. He is called 'the **Elkoshite,**' but the exact meaning of the term cannot at present be determined. It is made in the Targum a kind of patronymic, recording the assumed descent of the prophet from an unknown ancestor *Koshi.* It is more likely to preserve the name of the prophet's birthplace or place of residence, of which the identification is still lacking. Three or four conjectures have been made.

(1) The prophet's tomb is shown at *Elkosh,* 24 miles to the N. of Nineveh; and accordingly he is said to have lived there, a descendant of a member of the ten tribes who was deported in 721 B.C. But the tradition that buries Nahum there is not met with before the 16th cent., and is sufficiently accounted for by the interest in Nineveh shown by the prophet.

(2) *Capernaum* is really a transliteration of Hebrew words which mean 'village of Nahum.' But a Galilaean origin for our prophet is unlikely (Jn 7^{52}), and is not supported by any allusions in the prophecy.

(3) The same objection applies to Jerome's identification of *Elkosh* with a village *Elkozeh* in North Galilee, which on other grounds is precarious.

(4) The most probable tradition associates Nahum with *Elkosh* 'of the tribe of Simeon,' and locates the hamlet near *Beth-Gabre,* the modern *Beit-Jibrîn,* about half-way between Jerusalem and Gaza. The tradition occurs in a Syriac version of the biographies of the prophets, ascribed to Epiphanius, bishop of Salamis in Cyprus towards the close of the 4th cent., but probably of much later date.

II. THE BOOK.—**1. Analysis of contents.**—In the analysis of the book, a line of division can best be drawn at the close of 2^{2}. The latter section is the actual prophecy or oracle. It is preceded by a psalm or proem of two parts, of which the one is general in its assertion of God's universal judgment, the other particular in its specific messages to Judah and to Assyria. Yahweh as the jealous Avenger is the opening theme. This fact holds good of His administration (1^{3}); and as He passes on to the overthrow of the wicked, physical proofs of His power become evident everywhere (1^{4-6}). Tenderness towards those who take refuge in Him, but an overwhelming flood upon His enemies (1^{7-10}), are the two

great characteristics of His rule. 'What do you plot against the Lord?' (1[9]) is the point of passage to the section dealing with His particular acts, in which section either there are editorial additions, or the two messages, of deliverance to Judah (1[12f. 15] 2[2]) and of vengeance upon some nation (1[11, 14] 2[1]), were meant to be involved in repeated antitheses. Already the bearer of the good news is speeding over the hills (1[15]; cf Is 52[7], Ro 10[15]).

The oracle proper consists also of two sections, corresponding with the division into chapters. The second chapter is a swift and vivid description of the siege of Nineveh, its capture and sack, with the complete desolation that followed.

A second oracle is contained in the third chapter, of which the unity in theme and sequence of thought is conspicuous. The mention of the bloody city, full of lies and booty, is followed by one of the most vivid battle-pictures in Hebrew literature (3[2f.]). The cause of destruction is to be found in the diplomatic harlotry, whereby nations and races had been lured and sold; and so richly merited will be the woe, that none will be left or disposed to pity or bemoan Nineveh (3[7]). The analogy of No-amon (Thebes) makes it certain that a similar fate is awaiting the Assyrian city (3[8ff.]). Her outposts and defences are already falling before the invader, just as the first-ripe figs fall at the mere shaking of a fig-tree; and her troops have become women (3[12f.]). The time to prepare for the siege is past, adds the prophet, with his sarcastic appeal, 'Tread the mortar, take hold of the brick mould!' The swarming merchants, the princes, and the scribes or marshals, are like locusts or grasshoppers, that camp in the hedges and walls, but vanish with the sunrise. Finally, the prophet addresses the king of Assyria himself, and on the eve of the destruction of the city proclaims her disappearance from history amidst the joy of all who had suffered under her tyranny: 'There is no assuaging your hurt . . . all who hear the news of you clap their hands over you.'

2. Authenticity of the first chapter.—Nahum's authorship of the two oracles is hardly open to question, but doubt has been thrown on the authenticity of the prologue, since Gunkel published an article on it in *ZAW*, 1893. The first ten verses of chapter 1 constitute an alphabetic acrostic poem (like La 1, 2, 3, 4, Pr 31[10–31], Ps 9–10, 25, 34 etc.) which is far more artificial and mechanical than the poetry of the second and third chapters; also, it is more abstract and theological in tone than the concrete and vivid descriptions of those chapters. The mention of Bashan, Carmel, and Lebanon in 1[4] is not suitable to an ode on the downfall of Nineveh. This acrostic poem makes use of the first fifteen letters of the Hebrew alphabet, but they are not all in correct order: the N verse is in 2*b*; the beginning of 4*b* seems to be lost; and the L and M verses in 9 are transposed. According to the opinion of many critical scholars, this acrostic poem was found by an editor of the work of Nahum who prefixed it to the prophet's poetry. This editor did not know, or did not copy, the poem correctly or fully; or it has been imperfectly transmitted by copyists. While not the work of the prophet Nahum, its thought is not inconsistent with his. In chapter one, verses 11 and 14 may well be from the prophet; they are apparently addressed to the Assyrian king. 1[12f., 15] and 2[2] have as their common theme comfort and hope for Judah, which is promised that it will not have to suffer again at the hands of wicked Assyria. These are probably interpolations by an editor, possibly the one who prefixed the acrostic poem. 1[15] seems to be dependent upon Is 40[9] 52[7].

Thus, we may conclude that the work of Nahum the prophet is 1[11, 14] 2[1, 3–13] 3[1–19].

3. Date.—Nahum the prophet composed a prophecy which is exclusively concerned with the downfall of Nineveh. He must therefore have lived near the time of the fall of that city in 612 B.C. The Babylonian Chronicle records the capture of Nineveh in the late summer of that year under the combined attack of the Babylonians and Medes. They turned the city into ruins and heaps of debris and captured many prisoners, but the king of Assyria and his army escaped (see *ANET*, pp. 304 f).

Did Nahum prophesy before, during, or after the fall of Nineveh? Did he predict its fall, or only describe it after the event? Scholars are divided on the answers to these questions. Some of the verses use the Hebrew imperfect, and seem to point to the future, such as 2[13] 3[5–7, 11, 15]. Other verses are so vivid and realistic in their description of the attack on the city and its downfall that they appear to have been written after Nineveh's capture, such as 2[1, 3–10] 3[1–4, 12f., 18f.]. Under the principles of Hebrew syntax, the imperfect verbs may be translated by the English present tense. It is to be considered as possible that Nahum began to write, or to proclaim his message orally, before or during the siege of Nineveh and completed it after the successful capture. The last two verses (which are considered secondary by some scholars) appear to look backward rather than forward.

According to A. Haldar, the book of Nahum originated in an association of cult prophets who employed ancient mythical and ritualistic themes for the purpose of propagandizing against Assyria and holding out hope of national restoration for Judah. The poems were composed shortly before 612 B.C.; though they made use of ritualistic themes, they were not intended for use in the Temple liturgy (Haldar, *Studies in the Book of Nahum*, 1947). According to P. Humbert, the book was a prophetic liturgy which was composed after the fall of Nineveh to be used at the Jewish New Year Festival in the autumn of 612 ('Le problème du livre de Nahoum,' *RHPR* xii, 1932, 1–15). P. Haupt even proposed the theory that the book is a liturgy composed for the celebration of Nicanor's Day in 161 B.C., incorporating two poems which had been written by an eyewitness of Nineveh's fall ('The Book of Nahum,' *JBL* xxvi, 1907, 1–53). This last theory is extreme and has no evidence to support it. Nahum could have been a Temple prophet; he was at any rate an ardent nationalist who did not criticize his fellow Hebrews and their institutions.

4. Literary character and religious value.—Picturesqueness and force have been described as the most prominent characteristics of Nahum's poetry. Compact thought, vivid description (2[3–5] 3[2f.]), and effective imagery (2[11f.] 3[17f.]) separate him sufficiently from the prophets of the Chaldaean period, and give him a position not far behind that of Isaiah. His poetry is indeed among the best to be found in the OT.

If Nahum is not a religious teacher like Micah or Isaiah, he focuses upon the truth of God's moral government of the world, concentrating the light upon a single typical instance. Where he differs chiefly from the other prophets is in the complete outwardness of his gaze. He has no eye for the shortcoming or sin of Judah, and no revelation to make of the inner history or moral character of his own generation. In this respect he contrasts especially with his contemporary Zephaniah, who also looked for the collapse of the Assyrian kingdom, but saw clearly a similar fate about to overtake the sinners of Israel. For Nahum, Nineveh fills up the whole canvas. The prophecy is a stern song of war, a shout of triumph over the conquered and slain. It stands in contrast with the temper and spirit of the NT, in which no citation from the book occurs. The Assyrians were known in antiquity as one of the most cruel and ruthless of all nations. The prophecy of Nahum is a rebuke of militarism and illustrates the NT principle, 'They that take the sword shall perish with the sword' (Mt 26[52]).

R. W. M.—J. P. H.

NAHUM.—An ancestor of Jesus, Lk 3[25] (AV **Naum**).

NAIDUS.—One who married a foreign wife, 1 Es 9[31]; possibly corresponding to **Benaiah** in Ezr 10[30].

NAIL.—**1.** Among the ancient Arabs it was the custom for a widow to allow her nails to grow during her term of mourning. To pare them was a formal indication that this period was at an end. From Dt 21[12] and 2 S 19[24] (LXX) it may be inferred that such was the

custom among the Hebrews. The former passage, however, refers only to the case of a foreign captive whom a Hebrew might take to wife after a month's seclusion, during which the care of the person was neglected in token of mourning for the captive's condition. The latter passage in its Greek form (see *Cent. Bible, in loc.*) tells us that Mephibosheth showed his sympathy with David by, *inter alia*, omitting to trim his 'toe-nails and his finger-nails' during the latter's absence from Jerusalem.

2. The Hebrew word most frequently rendered 'nail' is properly a tent-peg, or, as in Jg 4^{21} RV **tent-pin** (AV 'nail'; RSV 'tent-peg'). This is also the better rendering in Zec 10^{4} (AV, RV 'nail'; RSV 'tent-peg'), where it is synonymous with 'corner-stone,' both terms signifying the princes or leading men of the State as its supports. The figure of Is $22^{23, 25}$, on the other hand, is derived from the custom of driving a nail (RSV 'peg') into the house-wall upon which to hang (v.^{24}) domestic utensils or the like. A. R. S. K.

NAIN.—From Hebrew *Na'ĭm*. The town where Jesus raised the widow's son to life (Lk 7^{11}). The name is found in the modern *Nēn*, a village six miles SE. of Nazareth on the N. slope of the so-called 'Little Hermon.' The summit of the hill is 1690 feet high, with a white-domed sanctuary, the tomb of the saint from whom the mountain takes its modern name, *Jebel ed-Dahi*. The village is 744 feet above the sea. Ruins stretch to the N., showing that the place was once of some importance; but they are comparatively modern. The rock-cut tombs to the E., however, bespeak a much higher antiquity. The small sanctuary, *Maqām Sīdna 'Isa*, 'Place of our Lord Jesus,' on the north, doubtless commemorates the visit of the Saviour. The spring lies on the W. side of the town. In this quarter sherds of both Israelite and Roman times are said to have been found. The site commands an interesting view. Across a narrow bay of Esdraelon rises Mount Tabor, over the eastern shoulder of which the white summit of Hermon is visible; while to the NW. and W. the eye ranges over the hills of Lower Galilee, and the rolling breadths of the great plain, to Mount Carmel by the sea. W. E.—E. G. K.

NAIOTH.—A place 'in Ramah,' where there was a 'company of the prophets.' Here David fled to Samuel after Saul had attacked him with a javelin; hither Saul pursued him, and was seized with an ecstatic fit of some kind, 1 S 19^{18-24}. Nothing is known of the situation of the place. It is not even absolutely certain that *Naioth* is a proper name; but opinions differ respecting its possible meaning. R. A. S. M.

NAME, NAMES.—1. The names of God.—See GOD.

2. Personal names.—From the earliest times the name given to a child was supposed to indicate some characteristic of the person; of the circumstances, trivial or momentous, connected with his or her birth; of the hopes, beliefs, or feelings of the parents. This is evident from the etymologies (Gn $21^{3, 6}$ 27^{36}, Ex 2^{10}, 1 S 4^{21} 25^{25} etc.), not always reliable, but testifying to the impression that name and facts should correspond. There are many indications of the persistence of this idea. For instance, there is the frequency of names denoting personal qualities, *Adin*, *Amasai*, *Jaddua*, *Korah*, *Solomon*, etc.; or pointing to occupations, *Asa Sophereth*, etc. Again, an Isaiah (7^{3} 8^{3}) or a Hosea ($2^{4, 6, 9}$) is quite ready to bestow symbolical names on his children; a Jeremiah (20^{3}) predicts the change from *Pashhur* to *Magor-missabib*, because the latter will more accurately correspond to the surroundings; and the same prophet sums up all his hopes for the future in the title which he bestows on the Messianic King and the holy city (23^{4} 33^{16}; cf Rev 19^{13}). The new name promised to the faithful (Rev 2^{17}) corresponds to the fresh glory bestowed on him, which differs in each recipient and is known only to himself (Rev 14^{1}).

Analogous convictions prevailed among other Eastern nations. *Nomen et omen* was an influential conception. When a man was wanted to milk a camel, Mohammed disqualified one applicant after another till a man came whose name meant 'Long Life'; if one of his converts was called 'Rough,' he called him 'Smooth'; he was even guided in his strategy by the names of the places *en route* (Margoliouth, *Mohammed*, pp. 61 f).

Generally the name was fixed immediately after birth, as it still is with the Arabs. The mother usually exercised this privilege (Gn 4^{25} 19^{37t} 29^{32n} $30^{6n, 18n}$ 35^{18}, 1 S 1^{20} 4^{21}, Is 7^{14}), sometimes the father (Gn 4^{26} 16^{15} 17^{19} 21^{3}, Ex 2^{22}, 2 S 12^{24}, Hos 1^{4n}), occasionally other interested persons (Ru 4^{17}, Lk 1^{57-63}). Some names were bestowed indifferently on men and women: *Abiah* (1 K 14^{31}, 1 Ch 2^{24}); *Abihail* (Nu 3^{25}, 1 Ch 2^{29}); *Zibiah* (2 K 12^{2}, 1 Ch 8^{9}).

Beginning at a fairly early date, there are a moderate number of names derived from the vegetable world: *Elah* ('terebinth'), *Zuph* ('sedge'), *Tamar* ('palm-tree'), etc. The majority, however, belong to more recent documents: *Asnah* ('bramble'), *Coz* ('thorn'), *Hadassah* ('myrtle'), *Susannah* ('lily'), *Shamir* ('thorn'), etc. Other natural objects are also drawn upon: *Geshem* ('rain'), *Barak* ('lightning'), etc.; curiously enough, *Jorah* ('autumn-rain,' Ezr 2^{18}) is identical with *Hariph* ('autumn,' Neh 7^{24}). A few, of peculiarly difficult interpretation, point to family relationships: *Ahab*='father's brother,' but the question is whether it signifies 'uncle' or whether it is an indication that the child closely resembles his father or is to be as a brother to him. *Ahban*='brother is son,' *Ahiam*='a maternal uncle,' belong to this class. But *Moses*, if, as is most probable, of Egyptian origin and signifying 'son,' is a shortened form of a theophorous name; cf Moses, *ad init.*

Names which have a religious import are more characteristic of the Semite races than of ours, and this is especially true of the Israelites all through their national life. A certain number of those found in the OT have heathen associations: *Anath* (transferred to a man from a well-known goddess worshipped in Syria, etc.), *Ahi-shahar* ('Shahar [*i.e.* 'Dawn'] is brother'), *Baal* (1 Ch 5^{5} 8^{30}), *Bildad* (Job 2^{11}), *Balaam*, *Obed-edom* ('servant of [the god] Edom'), *Reu* and *Reuel* (Gn 11^{18}, Ex 2^{18}). Among the earliest clan names are those of animals: *Rachel* ('ewe'), *Hamor* ('ass'), *Caleb* ('dog'), etc. This may well be a survival from a pre-historic age of totemism. In David's day we find individuals, possibly members of such clans, called *Eglah* ('calf'). *Laish* ('lion'), *Bichri* (from *becher*, 'a young camel'). And the curious recrudescence of words of this class in and about the reign of Josiah (*Huldah*, 'weasel,' *Shaphan*, 'rock-badger,' etc.), might be accounted for on the supposition that animal-worship had considerable vogue during that age of religious syncretism (cf Ezk 8^{10-12}). Names like *Hezir* ('swine'), *Achbor* ('mouse'), *Parosh* ('flea') favour this explanation. At the same time, it must be admitted that animal-names were in many instances bestowed as terms of endearment, or as expressions of a wish that the child might have swiftness, strength, gracefulness, or whatever might be the creature's peculiar quality.

There is an important class of compounds in which relationship—originally conceived as physical—with the god of the nation or clan is asserted: *Ammiel* ('kinsman is El'), *Abijah* ('father is Jah'), *Ahijah* ('brother is Jah'). These compounds ceased to be formed long before the Exile, owing, no doubt, to the sense that they infringed on the Divine dignity. Others now appear, containing an element which referred to the Divine sovereignty: *Adonijah* ('Jah is lord,' like the Phoen. *Adoneshmun*, 'Eshmun is lord'), *Malchiah* ('Jah is king'), *Baaliah* ('Jah is *baal*' [or 'lord']). Turning now to the two great groups in which *El* or *Yahweh* forms part of the name, it is to be noted that the former had the first run of popularity. From David until after the Exile, *Jah*, *Je*, or *Jeho* is more common. From the 7th cent. B.C. onwards *El* is seen to be recovering its ground. Altogether there are 135 names in *El*, and

according to Gray (*HPN*, p. 163), 157 in one of the abbreviations of *Yahweh* [Jastrow (*ZAW* xvi, p. 2) has sought to reduce the latter number to about 80]. Abbreviations of both these classes are fairly common: *Abi*, for *Abijah*; *Palti*, for *Paltiel*; *Nathan*, for *Jonathan* or *Nathanael*, etc. The nations which were related to the Hebrews acknowledged or invoked their gods in the same fashion: Babylonian and Assyrian proper names containing the elements, *Bel*, *Ashur*, *Nebo*, *Merodach*, etc.; Phoenician having *Ashtoreth*, *Bel*, *Eshmun*, *Melech*, etc.; Aramaic, *Hadad*, *Rimmon*, etc.; Palmyrene Sabaean, and Nabataean exhibit the same features.

Special mention ought perhaps to be made of the curious words found in the Books of Chronicles. Ewald observes that they remind us of the nomenclature affected by the English Puritans of the 17th cent. They were meant to express the religious sentiments of the Chronicler and those like-minded. Thus we have *Jushab-hesed* ('kindness is required'). *Tob-adonijah* ('good is the Lord Yahweh'), *Elioenai* ('to Yahweh are mine eyes'), *Hazzelelponi* ('Give shade, Thou who turnest to me'; cf the Assyr. *Pān-Bēl-adagal* ['I look to Bel'] and *Pān-Aššūr-lāmur* ['I will look to Ashur']). But the climax is reached in 1 Ch 25[4], where, with very slight alteration, the list which begins with *Hananiah* reads, 'Be gracious unto me, Yahweh! Be gracious unto me! Thou art my God! Thou hast given great and exalted help to him who sat in hardship. Thou hast given judgments in multitudes and abundance.' These phenomena differ from the *Shear-jashub* and *Maher-shalal-hash-baz* of Isaiah, in that the latter were formed for the express purpose of symbolical prediction. We have, however, something resembling them in other late documents. P gives us *Bezalel* ('in the shadow of God'; cf Bab. *Ina-ṣilli-Bēl*, 'under the protection of Bel'), Ex 31[2], and *Lael* ('to God'; cf Bab. *Sha-Bēl-at-ta*, 'thou belongest to Bel'), Nu 3[24]. And Neh 3[6] has *Besodeiah* ('in the counsel of God').

From about the close of the 4th cent. B.C. it was a common practice to call children after their relatives (Lk 1[59-61]). When we read such a list as this: *Hillel*, *Simon*, *Gamaliel*, *Simon*, *Gamaliel*, *Simon*, *Judah*, *Gamaliel*, *Judah*, we get the impression that the grandfather's name was more often adopted than the father's (cf To 1[9], Lk 1[59]; Jos. *Ant.* XIV. i. 3 [10]). To the same period belong the Aramaic names *Martha*, *Tabitha*, *Meshezabel* (Bab. *Mushizib-ilu*), and those with the prefix *bar*, of which we have many examples in the NT. Foreign names abound in Josephus, the Apocrypha, and the NT. In some instances a person has two separate designations: *Alcimus*, *Jacimus*; *John*, *Gaddis*; *Diodotus*, *Tryphon*, etc. 'Saul, who is called Paul' (Ac 13[9]), is a typical case. In some of the examples the reason for the second choice is obscure; in others there is an obvious similarity of sound or meaning. Double names were now frequent: *Judas Maccabaeus*, *Simon Zelotes*, etc. Non-Jewish names were substituted for Jewish: *Jason* for *Jesus*; *Simon* for *Simeon* (Deissmann, *Bible Studies*, p. 315, note).

After the birth of a son an Arab father will adopt an honorific name (*kunya*). If he had been called *Abdallah*, he is henceforth *Abu Omar*, or the like. There is no trace of this custom in Hebrew family life, but the idea of a distinguishing and honourable **surname** is not altogether wanting; see Is 44[5] 45[4], Job 32[21], and some of the familiar double names. It is also possible that the Hebrew original of Sir 44[23] signified 'I gave him the surname Birthright.' And the sense of Sir 47[6] is 'They gave him the surname The Ten Thousand.'

3. Place Names.—The majority of these were no doubt fixed by the tribes whom the Hebrews dispossessed. From their great antiquity and the alterations to which they have been subjected, it is sometimes impossible to determine the meaning. Many places, however, got their designation from a salient natural feature, a well (*beer*), a fountain (*en*, in *En-gedi*), a meadow (*abel*), a vineyard (*karmel*), woods (*jearim*, in *Kirath-jearim*), a hill (*Gibeah*, *Gibeon*, *Ramah*), trees (*Bethphage*, *Beth-tappuah*, *Anab*, *Abel-hasshittim*, *Elah*, *Allon-bacuth*); from some circumstance belonging to the history or legends of the locality, an encampment (*Mahanaim*), a watch-tower (*Migdal*, *Megiddo*, *Mizpah*), a village (*Hazer*), a temporary abode of shepherds (*Succoth*), a place of refuge (*Adullam*), a vision (*Beer-lahai-roi*); from the clan which dwelt there (*Samaria*). Of the fifty-three names of animals in Gray's list (pp. 88–96), twenty-four are applied to towns or districts. On the totem-theory this would mean that the clan bestowed the name of its totem-animal on the place of its abode. Other names evidently imply the existence of local sanctuaries, some of which must have been pre-Israelite: *Beth-anath*, *Anathoth*, *Bethel*, *Gilgal*, *Kedesh-naphtali*, *Migdal-el*, *Migdal-gad*, *Neiel*, *Penuel*, *Beth-shemesh*. Almost all the compounds with *Baal* belong to this class: *Baal-beer*, *Bamoth-baal*, *B.-dagon*, *B.-hamon*, *B.-hazor*, *B.-meon*, *B.-perazim*, *B.-shalisha*, *B.-tamar*. One, *Baal-judah* (the correct reading of 2 S 6[2]; cf 1 Ch 13[6]), is clearly of Hebrew origin, *Baal* here being a name for Yahweh. Special interest attaches to the names of two clans in the S. and centre of Palestine, *Jacob-el* and *Joseph-el*, mentioned by Thothmes III. (*c* 1500 B.C.) in his inscription at Thebes. Corresponding with these forms are *Israel*, *Ishmael*, *Jezreel*, *Jabneel*, *Jiphtah-el*, *Jekabzeel*, *Joktheel*, in the OT. The *el* of the termination was the local deity, invoked (Gray, pp. 214 ff), or declared to have conferred some boon on his worshippers (Meyer, *ZAW*, 1886, p. 5). J. T.

NANAEA (2 Mac 1[13, 15]; Gr. *Nanaia*).—The present consensus is that a remote divine ancestress of the Maccabaean Nanaea was the very ancient Sumerian goddess Nana, 'lady of the temple E-anna' and special protectress of the city of Uruk (Erech), who was recurrently invoked by name in Babylonian litanies. Records and remains of Nana-Nanaea cults have been recognized in Phoenicia, Syria, Mesopotamia, Iran, Bactria, Armenia, and in other parts of Asia Minor.

By the Greeks this goddess was identified sometimes with Artemis, sometimes with Aphrodite. She seems to have represented the productive powers of nature. In 2 Mac 1[10-17] we have a legendary account of the death of Antiochus IV. Epiphanes, who is said to have attempted to plunder a temple of Nanaea in Persia, and to have been treacherously killed in the temple by the priests. According to 1 Mac 6[1-4], it was the wealthy Persian city of Elymais, its temple filled with treasure left there by Alexander the Great, which Antiochus attempted to plunder. H. R. W.

NAOMI.—The wife of Elimelech the Ephrathite, of Beth-lehem-Judah, who was driven by famine into the land of Judah. After the death of her husband and her two sons, she returned, accompanied by Ruth, to her own land. Her return was a matter of surprise to the people of Bethlehem, and they said, 'Is this Naomi?' Her answer included a play of words on her own name, 'Call me not Naomi ('pleasant'), call me Mara ('bitter'): for the Almighty has dealt very bitterly with me' (Ru 1[20]).

NAPHATH-DOR.—See DOR.

NAPHOTH-DOR.—See DOR.

NAPHISH.—A son of Ishmael, Gn 25[15], 1 Ch 1[31]. In all probability it is his descendants who are mentioned in Ezr 2[50] as 'the children of **Nephisim**' (RV and RSV) or **Nephusim** (AV and RVm). In the parallel passage (Neh 7[52]) the reading is **Nephushesim** (RV and RSV) or **Nephishesim** (AV and RVm). In 1 Es 5[31] RSV has **Nephisim** (AV and RV **Naphisi**).

NAPHISI, 1 Es 5[31] (AV, RV).—See NEPHISIM.

NAPHTALI.—The second son of Bilhah, Rachel's handmaid, and the sixth son of Jacob (Gn 30[7ff] J). The tradition connects the story in a vague way with the word 'twist, wrestle': *naphtûle 'ĕlōhîm niphtaltî*—'With great wrestlings have I wrestled (and have prevailed),' Rachel exclaimed when Naphtali was born, 'and she called his name Naphtali.'

P ascribes to Naphtali four sons when Jacob and his family entered Egypt (Gn 46[24]), and these are said to have developed into families at the time of the Exodus, their number being given as 53,400 in the Sinai census (Nu 1[42]), and 45,000 in that in Moab (26[48]). None of these clan-names given here, except Guni, appears again outside of the genealogy repeated in 1 Ch 7[13]. In the march through the desert Naphtali is associated traditionally with Dan and Asher in 'the Camp of Dan' with a total of 157,000 men of war. Apart from Scriptural genealogies, the fact that Dan chose to migrate to the vicinity of Naphtali suggests a bond of kinship. Their descent from the concubine Bilhah indicates that they were tribes of minor significance in the national development.

Naphtali was the sixth to receive its lot (Jos 19[32-39]). Its territory is somewhat more precisely defined than the others, though few of the places can be certainly identified. Nineteen towns are mentioned in its territory, most of which are not found again in the OT, partly due to the fact that much of the highland of Naphtali was off the main thoroughfares of history and partly to the fact that the national history was enacted mainly in the regions further south. The district reached on the N. to the Anti-Lebanon and almost to the Lebanon. Southward it extended along the Jordan until it reached the confluence of the *Wâdī Bireh* and Jordan S. of the Sea of Galilee. The greater part lay NW. of the Sea of Galilee. The soil and climate of the district are both favourable, with abundant rainfall. Upland plains and pockets of earth, both in Upper and Lower Galilee yield corn, and the hillside vines, olives, and other fruits, while the lakeside, if somewhat enervating, is prolific in semi-tropical growth. The couplet on Naphtali in the 'Blessing of Jacob' (Gn 49[21]) seems to allude to this fertility (reading *'elāh sh^{e}lûḥāh*, 'a spreading oak,' after LXX, for *'ayyālāh sh^{e}lûḥāh*, EV 'a hind let loose,' and *nōth^{e}nāh '^{a}mīre shāpher*, 'which puts forth beautiful branches,' for *hannōthēn 'imrê shāpher*, RV 'who gives goodly words'). Though much of Naphtali lay off the beaten track, trade-routes ran through the district from Bethshan northwards, from the E. end of the Plain of Jezreel northwards by *Tūr^{ʿ}ân* and *Lûbiyeh*, and from the W. through the Plain of the *Baṭṭûf* and so to the Plain of Chinnereth and northwards by Hazor and onwards to Damascus over Jordan or northwards to the *Biqā^{ʿ}* and so to *Ḥamā*.

Though the 'Blessing of Jacob' and the 'Blessing of Moses' (Dt 33[23]) note only the productivity of Naphtali, its heroism and warlike daring was sung in the Song of Deborah (Jg 5), and in the prose version recording the conflict against Sisera the leader Barak is derived from Kedesh-Naphtali. Hiram, the worker in metal, whom Solomon brought from Tyre to work on the Temple, was a man of Naphtali (1 K 7[14]; cf 2 Ch 2[14], which states that he was from Dan). Otherwise few names of prominence from Naphtali appear in connexion with the national life. After the rise of the kingdom of Damascus after the death of Solomon, Naphtali must have suffered much through her exposure in the far north, and the strength of her chief fortress, Hazor, bears witness to the strategic significance of this district. Under the Syrian king Benhadad especially, Naphtali seems to have suffered (1 K 15[20]). On the collapse of Damascus Naphtali bore the brunt of Assyrian assault and her strongholds were captured by Tiglath-pileser III. in 734 B.C., when there was wholesale depopulation (2 K 15[29]), the district being organized as an Assyrian province, called Megiddo after its administrative centre.

J. A. C.—J. Gr.

NAPHTHA.—See NEPHTHAR.

NAPHTUHIM.—Fourth son of Mizraim, Gn 10[13], 1 Ch 1[11]. It stands for the people of Lower Egypt (see *KB*). The name appears to be in Ashurbanipal's *Annals* in the form *Nathu*, probably in Lower Egypt.

NAPKIN (*soudarion*).—The cloth in which the unprofitable servant wrapped the money of his lord (Lk 19[20]); used to cover the face of the dead (Jn 20[7], but 11[44] 'a cloth'); carried, possibly as indicated by the name (Lat. *sudarium*), to wipe off perspiration (Ac 19[12]). The Arabic renders *mandîl*, which may be either 'towel,' 'napkin,' 'veil,' or 'head-band.' See also DRESS, 5 (*a*), 8.

W. E.

NARCISSUS.—St. Paul, in Ro 16[11], salutes among others 'those in the Lord who belong to the family of Narcissus,' *i.e.* the Christian members of the slave household of Narcissus. The name is common among slaves and freedmen in the imperial age, but the expression seems to point to a well-known person, and if so the most probable identification is with a rich and powerful freedman named Narcissus in the service of the Emperor Claudius, referred to by several contemporary authors, who was put to death in the first year of Nero's reign, shortly before this Epistle was written. The normal custom would have been for his household to pass into the hands of the Emperor, retaining the name of the former owner.

NASBAS, To 11[18] (AV, RV).—See NADAB, 5.

NASI, 1 Es 5[32] (RV).—See NEZIAH.

NASITH, 1 Es 5[32] (AV).—See NEZIAH.

NATHAN.—1. Third son of David by Bath-sheba (2 S 5[14], but note 2 S 12[24]). In Zec 12[12] the Nathan who is recognized as head of a house is probably David's son. In Lk 3[31] the genealogy of Jesus is traced through Nathan to David. **2.** The prophet, a confidential adviser of David. The king desired to build the Temple, and Nathan at first agreed, but later received a revelation forbidding the enterprise (2 S 7). The next appearance of Nathan is in connexion with the parable of the ewe lamb, by which David was self-convicted of his sin with Bath-sheba (2 S 12[1-15]). Later, in token that an atonement has been made, he adds to Solomon's name the significant title *Jedidiah* ('beloved of Jah').—The third service was rendered alike to David and to Solomon. Adonijah had planned a *coup* by which to grasp the sceptre, now falling from the hands of his aged father. It was Nathan's watchfulness that discovered the plot, and his ingenuity that saved the kingdom for Solomon (1 K 1). His service to Solomon was recognized by the king, who appointed his sons, Azariah and Zabud, to important offices (1 K 4[5]). **3.** Father of Igal, one of David's heroes (2 S 23[36]). The text of 1 Ch 11[38] reads, 'Joel brother of Nathan.' **4.** One of the chief men who returned with Ezra (Ezr 8[16], 1 Es 8[44]). **5.** One of the Bani family, who had taken strange wives (Ezr 10[39]); called in 1 Es 9[34] **Nethaniah** (AV, RV **Nathanias**). **6.** A Judahite (1 Ch 2[36]).

J. H. St.

NATHANAEL.—1. A Greek form subsequently used in the Septuagint for the Hebrew name Nathanel. There it refers to a variety of minor figures (Nu 1[8] 2[5] 7[18, 23] 10[15], 1 Ch 2[14] 15[24] 24[6] 26[4], 2 Ch 17[7] 35[9], 1 Es 1[9] (AV, RV; RSV **Nethanel** [q.v.]) 9[22] (see NETHANEL, 8), 2 Es 10[22] 22[21], Jth 8[1]). **2.** A disciple of Jesus mentioned only in the Gospel of John. There he appears twice, once in a dramatic account of his call to discipleship (Jn 1[45-49]) and again after the resurrection in a scene by the Sea of Tiberias (Jn 21[2]). In the latter passage he is said to be 'of Cana in Galilee.' Many fruitless attempts have been made to link him with one of the twelve disciples listed in the Synoptic Gospels (especially Bartholomew) and even with other personages.

W. R. S.

NATHANIAS, 1 Es 9[34] (AV, RV).—See NATHAN, 5.

NATHAN-MELECH.—An official in the reign of Josiah, whose name is used to designate one of the halls or chambers of the Temple, 2 K 23[11].

NATIONS.—In many places where in the AV we have '**Gentiles**' and '**heathen,**' RV and RSV have rightly substituted 'nations,' and might with advantage have carried out the change consistently.

The Hebrew (*gôy*) and Greek (*ethnos*) words denote invariably a nation or a people, never a person. Where in the AV (only NT) we find 'Gentile' in the singular (Ro 2[9f]) the RV, RSV have 'Greek,' following the

original. In nearly every example the singular 'nation' stands for 'Israel,' though we have a few exceptions, as in Ex 9^{24} (of Egypt), Pr 14^{34} (general), and Mt 21^{43}. It is often applied to Israel and Judah when there is an implication of disobedience to God, sinfulness, and the like: see Dt 32^{28}, Is 1^{4} etc. This shade of meaning became very common in the later writings of the OT. Quite early in Israelitish history the singular as a term for Israel was discarded for the word translated **'people'** (*'am*), so that *'am* ('people') and *gôy* ('nation') came to be almost antithetic terms='Israelites' and 'non-Israelites,' as in Rabbinical Hebrew. For the reason of the change in the use of *gôy* ('nation'), see below.

In the AV **'Gentiles'** often corresponds to 'Greeks' in the original, as in Jn 7^{35}, Ro 3^{9} etc. In the RV, RSV the word 'Greeks' is rightly substituted, though the sense is the same, for to the Jews of the time Greek culture and religion stood for the culture and religion of the non-Jewish world.

The two words (Hebrew and Greek) translated 'nation' have their original and literal sense in many parts of the OT and NT, as in Gn $10^{5,20}$ etc., Is 2^{4} (=Mic 4^{2f}), Job 12^{23}, Ac 17^{26}, Gal 3^{14}. In other passages this general meaning is narrowed so as to embrace the descendants of Abraham, *e.g.* in Gn 12^{2} 18^{18} $17^{4ff,16}$. But it is the plural that occurs by far the most frequently, standing almost invariably for non-Israelitish nations, generally with the added notion of their being idolatrous and immoral: see, *e.g.* Ex 9^{24} 34^{10}, Lv 25^{44ff}, Nu 14^{15}, Dt 15^{6}, 1 K 4^{31}, Is $11^{10,12}$. These are contrasted with Israel 'the people of Yahweh' in 2 S 7^{23}, 1 Ch 17^{21} etc.

This contrast between Israel (united or divided into the kingdoms of Israel and Judah) as Yahweh's people, and all the rest of the human race designated 'nations,' runs right through the OT. Such a conception could have arisen only after the Israelites had developed the consciousness of national unity and of being a special people under the covenant. At first, even among the Israelites, it seems that there was current the belief that other gods existed besides Yahweh and that each nation was justified in worshipping its own deity. Under the covenant, however, Israel was not permitted to worship any god but Yahweh (see Ex 20^{3}, Dt 32^{4} 10^{17}, 1 S 26^{19}, 1 K 8^{23}, Is 19^{1} etc.). As long as this idea prevailed there could be no necessary antagonism between Israelites and **foreign nations**, except that which was national, for the nation's god was identified with the national interests. But when the belief in Yahweh's absolute and exclusive claims possessed the mind of Israel, as it began to do in the time of the earliest literary prophets (see Am 9^{7}, Mic 7^{18}, Is 2^{2-5}), the nations came to be regarded as worshippers of idols (Lv 18^{21}), and in Ps $9^{5,15,17}$ (cf Ezk 7^{21}) 'nations' and 'wicked people' are, as being identical, put in parallelism. It will be gathered from what has been said, that the hostile feelings with which Israelites regarded other peoples varied at different times. At all periods it would be modified by the laws of hospitality (see article STRANGER), by political alliances (cf Is 7^{1ff}, and 2 K 16^{5ff}, Ahaz and Assyria against Israel and Syria), and by the needs of commerce (see Ezk 27^{11} [Tyre], 1 K 9^{28} 10^{11}, 2 K 16^{5-7}).

The reforms instituted by king Josiah in the Southern Kingdom (2 K 22^{1ff}), based upon the Deuteronomic law newly found in the Temple, aimed at stamping out all syncretism in religion and establishing the pure religion of Yahweh. This reformation, as also the Rechabite movement (Jer 35), had a profound influence upon the thoughts and feelings of Israel, as the people of God, widening the gulf between them and **alien** nations. The teaching of the oldest prophets also had looked in the same direction (see Am 2^{11} 3^{15} $5^{11,25}$ 6^{8} 8^{5}, Hos 2^{19} 8^{14} 9^{10} 10^{13} 12^{7ff} 14^{4}, Is 2^{6} 10^{4} 17^{10}, Zeph $1^{8,11}$, Jer 35^{1ff} 37^{6f} etc.).

But the Deuteronomic law (the basis of Josiah's reform, 621 B.C.) made legally obligatory what earlier teachers had inculcated. Israelites were not to marry non-Israelites (Dt 7^{3}), or to have any except unavoidable dealings with them.

The feeling of national exclusiveness and antipathy was intensified by the captivity in Babylon, when the prophetic and priestly instructors of the exiled Jews taught them that their calamities came upon them on account of their disloyalty to Yahweh and the ordinances of His religion, and because they compromised with idolatrous practices and heathen nations. It was in Babylon that Ezekiel drew up the programme of worship and organization for the nation after the Return, laying stress on the doctrine that Israel was to be a holy people, separated from other nations (see Ezk 40–48). Some time after the Return, Ezra and Nehemiah had to contend with the laxity to which Jews who had remained in the homeland and others had yielded; but they were uncompromising, and won the battle for nationalism in religion, thereby protecting themselves against pagan influences.

Judaism was in even greater danger of being lost in the world-currents of speculation and religion soon after the time of Alexander the Great. Indeed, but for the brave Maccabaean rising in the earlier half of the 2nd cent. B.C., both the religion and the language of the Jew might, humanly speaking, have perished.

The Apocrypha speaks of the 'nations' just as do the later writings of the OT. They are 'uncircumcised,' 'having sold themselves to do evil' (1 Mac 1^{15}); they break the Sabbath, offer no sacrifice to Yahweh, eat unclean food and such as has been offered to idols (1 Mac 1^{43} $2^{15f,23,44}$ 6^{21}, 2 Mac 5^{18} 15^{1f}).

The NT reveals the same attitude towards foreign nations on the part of the Jews (see Ac 10^{45} *et passim*). In Rabbinical writings Jewish exclusiveness manifested itself even more decisively (see *SB*, iv, 353–414). But, as in the OT a broader spirit shows itself constantly, culminating in the universalism of Christianity, so enlightened and broadminded Jews in all ages have deprecated the fanatical race-hatred which many of their compatriots have displayed. T. W. D.—H. S. G.

NATURAL.—The contrast between 'natural' (Gr. *psychikos*; RSV 'physical') and 'spiritual' (*pneumatikos*) is drawn out by St. Paul in 1 Co 15^{44-46}. The natural body is derived from the first Adam, and is our body in so far as it is accommodated to, and limited by, the needs of the animal side of the human nature. In such a sense it is especially true that 'the unspiritual man does not receive the gifts of the Spirit of God' (1 Co 2^{14}). Man derives his spiritual life from union with Christ ('the last Adam'), but his present body is not adapted to the needs of this spiritual existence; hence the distinction made by St. Paul between the natural body (called the 'body of death,' Ro 7^{24}) and the spiritual body of the resurrection. The transference from the one to the other begins in this life, and the two beings are identical in so far as continuity creates an identity, but otherwise, owing to the operation of the union with Christ, distinct.

For the non-theological use of 'natural' see Ja 1^{23}.

T. A. M.—F. C. G.

NATURE.—The term 'nature' is not used in the OT, nor was the conception current in Hebrew thought, as God alone is seen in all, through all, and over all. The idea came with the word *physis* from Hellenism. Swine's flesh is commended for food as a gift of *nature* in 4 Mac 5^{7}. In the NT the term is used in various senses: (1) the forces, laws, and order of the world, including man (Ro 1^{26} $11^{21,24}$, Gal 4^{8}); (2) the inborn sense of propriety or morality (1 Co 11^{14}, Ro 2^{14}); (3) birth or physical origin (Gal 2^{15}, Ro 2^{27}); (4) the sum of characteristics of a species or person, human (Ja 3^{7}), or Divine (2 P 1^{4}); (5) a condition acquired or inherited (Eph 2^{3} 'by nature children of wrath'). What is contrary to nature is condemned. While the term is not found or the conception made explicit in the OT, Schultz (*OT Theol.* ii, 74) finds in the Law 'the general rule that nothing is to be permitted contrary to the delicate sense of the inviolable proprieties of nature,' and gives a number of instances (Ex 23^{19} 34^{26}, Lv 22^{28} 19^{19}, Dt 22^{9-11}, Lv 10^{9} 19^{28} 21^{5} 22^{24}, Dt 14^{1} 23^{2}). The beauty and the

order of the world are recognized as evidence of Divine wisdom and power (Ps 8[1] 19[1] 33[6f] 90[2] 104, 136[6a] 147, Pr 8[22-30], Job 38, 39)); but the sum of created things is not hypostatized and personified apart from God, as in much current modern thinking. God is Creator, Preserver, and Ruler. He makes all (Is 44[24], Am 4[13]), and is in all (Ps 139). His immanence is by His Spirit (Gn 1[2]). Jesus recognizes God's bounty and care in the flowers of the field and the birds of the air (Mt 6[26, 28]); He uses natural processes to illustrate spiritual, in salt (5[13]), seed and soil (13[3-9]), and leaven (13[33]). The growth of the seed is also used as an illustration by Paul (1 Co 15[37, 38]). There is in the Bible no interest in nature apart from God, and the problem of the relation of God to nature has not yet risen on the horizon of the thought of the writers. Nor is there anything like the ethical maxim of the Stoics, 'Follow Nature,' to be found in the NT. Instead, 'the creation was subjected to futility' (Ro 8[20]), and the natural order is subject to the will of God only in a limited way: viz. it reflects the Divine power more clearly than it does the Divine purpose (Ro 1[20], 1 Co 15[20-28]). A. E. G.—F. C. G.

NAUGHT.—'Naught' is 'nothing' (from A.S. *na* 'not' and *wiht* 'a whit *or* a thing'). Sometimes the spelling became 'nought' (perhaps under the influence of 'ought'). In the earliest editions of AV there is no difference between 'naught' and 'nought'; but in the edition of 1638 a difference was introduced, naught being used in 2 K 2[19], Pr 20[14] (so RSV), because there the meaning is 'bad'; 'nought' everywhere else, but with the meaning 'worthlessness.' This distinction was preserved by Scrivener in his *Cambr. Par. Bible*, and is found in most modern English Bibles. RSV has the spelling 'naught' at Ezk 12[22] and Hab 2[13], but elsewhere 'nought,' apparently without distinction (cf 'comes to naught,' Ezk 12[22], and 'comes to nought,' Ps 112[10], Pr 10[28] 11[7]; and 'for naught,' Hab 2[13], and 'for nought,' Jer 51[55]).

'**Naughty,**' however, is simply 'worthless,' as Jer 24[2] 'very naughty figs' (RV, RSV 'bad'). But '**naughtiness**' always means 'wickedness,' as Pr 11[6] 'transgressors shall be taken in their own naughtiness' (RV 'mischief,' RSV 'lust'), and 1 S 17[28] 'the naughtiness of thine heart' (so RV; RSV 'evil').

NAUM, Lk 3[25] (AV).—See NAHUM.

NAVE.—The form in which (possibly by a primitive error in transcription of the Greek) the Hebrew name **Nun** appears in AV of Sir 46[1].

NAVY.—See SHIPS AND BOATS.

NAZARENE, NAZORAEAN.—So Jesus is called in the Greek text (Mk 1[24] 10[47] 14[67] 16[6], Lk 4[34] 24[19]), for *Nazarēnos* is evidently intended to mean 'the one from Nazareth,' as *Magdalēnē* (Jn 20[18]) is 'the one from Magdala.' It is questionable, however, whether the form *Nazōraios* (used of Jesus in Mt 2[23] in connexion with the settlement of his parents at Nazareth, and in Mt 26[71], Lk 18[37], Jn 18[5, 7] 19[19], Ac 2[22] 3[6] 4[10] 6[14] 22[8] 26[9] and in the plural of Christians, Ac 24[5]) is a variant of *Nazarēnos*. Mt 2[23] vaguely alludes to prophecy; the Evangelist may have in mind the passage about the 'branch' (Is 11[1], Heb. *nēṣer*). However, this is merely a reflection on the name. The possibility that *Nazōraios* was a sectarian name (a formation like *Pharisaios*= Pharisee) cannot be discounted. In the translations 'Nazarene' or 'of Nazareth' is used. E. G. K.

NAZARETH.—The place from which Jesus came (Mk 1[9]), where He was reared (Lk 4[16]), where his parents lived (Lk 1[26] 2[4]) or settled (Mt 2[23]), and with which His name was associated (see NAZARENE). It is described as 'in Galilee' (Mt 2[23]). The name-form is variously written in the Greek MSS: Nazerath, Nazaret, and Nazara also occurring. The correct form philologically must have been *Nāṣerāth*—a formation similar to that of Daberath (Jos 19[12]). The place is not mentioned in the OT or the Talmud or Josephus; the oldest allusions to it are those in the Gospels. Its insignificance is reflected in Nathanael's remark (Jn 1[46]). The tenacious survival of the name in *en-Nāṣira* is noteworthy. That the Christians of Palestine should have lost sight of a town so prominently mentioned in the Gospels seems incredible, and so the tradition seeking it at *en-Nāṣira* is doubtless correct. The town seems to have been exclusively non-Christian until Constantine's time. Byzantine and Crusader structures here were later obliterated. The present Christian identification of holy places at Nazareth is mainly due to the Franciscan monks, who endured much persecution here at the hands of Islam. Christian interest has centred particularly on the Well of Mary as a point certain to have been frequented by Jesus' mother. However, it seems very probable that this spring was too remote from the ancient settlement, which probably lay farther south. The location of the synagogue in which Jesus preached (Lk 4[16]) invites interest owing to the local description attending His ejection from the city (v.[29]). However, it cannot be said that traditional identifications of the site of the synagogue or of the 'brow of the hill' are satisfactory. The archaeology of Nazareth in the time of Christ awaits probing by the spade at various points where soundings are desirable and feasible. The place is so built up that this is difficult. It is now under Israeli control. Population: 20,000. E. G. K.

NAZARITE.—The AV form of Nazirite (q.v.).

NAZIRITE (AV **Nazarite**).—The primary meaning of the Hebrew verb *nāzar* is to separate. Hence the *nāzîr* is 'the separated,' 'consecrated,' 'devoted.' Joseph is 'the Nazirite,' *i.e.* the consecrated prince, among his brethren (Gn 49[26]); the nobles of Jerusalem bear the same title (La 4[7]); the untrimmed vine, whose branches recall the long hair of the Nazirite proper, is called 'thy Nazirite' (Lv 25[5, 11]). But, above all, the name belongs to a class of persons devoted by a special vow to Yahweh (Am 2[11f], Jg 13[5, 7] 16[17], Nu 6, Sir 46[13], 1 Mac 3[49-53]). According to Jg 13 and Nu 6, the details of outward observance covered by the vow were: (1) abstinence from the fruit of the vine, (2) leaving the hair uncut, (3) avoidance of contact with the dead, and (4) of all unclean food.

Opinions differ as to whether the abstinence from wine or the untrimmed hair was the more important. Am 2[11f] mentions only the former. 1 S 1[11], on the other hand, refers only to the latter (the LXX 'and he shall drink no wine or strong drink' being an interpolation). If we look outside the OT, we see that among the ancients generally the hair was regarded as so important an outcome of the physical life as to be a fit offering to the deity, and a means of initiating or restoring communion with Him. There is evidence for this from Syria, Arabia, Egypt, Greece, Rome, and, in recent times, even among the Maoris. This, then, seems to have been the original observance. If Am 2[11f] does not mention it, the reason is that the most attractive temptation was found in the wine. Jg 13[7] states that Samson's mother was bidden to abstain, but the same is not affirmed of Samson himself; all the stress, in his case, is laid on the hair being untouched (Jg 16[17]). Nu 6[3f] puts the abstinence first, but even here the significance of the other point appears in the directions for the ceremonial shaving and oblation of the hair (Nu 6[18]). The vine stood for the culture and civilization of Canaan, and was specially associated with the worship of the nature-gods. Hence it was a point of honour with the zealots of Yahweh to turn away from it utterly. The luxury and immorality connected with a more advanced civilization threatened the simplicity of Israel's life and faith. Martial devotion coalesced with the ascetic spirit to produce such men as Jonadab, son of Rechab, who resembled the Nazirites very closely (2 K 10[15], Jer 35[6f]).

It may be remarked that the regulations concerning what von Rad has called 'the Holy War' are closely related to the institution of the Naziriteship. Those who dedicated themselves to the Holy War allowed their hair to grow (Jg 5[2], where most authorities agree that the

Hebrew *pᵉrōaʿ pᵉrāʿôth* should be rendered 'for the loosing of locks,' *i.e.* allowing the hair to remain unshorn), and refrained from sexual intercourse (cf 1 S 21[4f]) during the campaign.

The Nazirite vow was originally a life-long obligation. Young and enthusiastic men were moved by the Spirit of God to take it up, as others were inspired to be prophets, and it was an offence against Him to tempt them to break it (Am 2[11f]). Women were divinely bidden to devote their promised offspring (Jg 13[7]). Others prayed for children and promised that they should then be consecrated to this service (1 S 1[11]; it is noteworthy that in the Hebrew and Syriac of Sir 46[13], Samuel is expressly called a Nazirite). In course of time, however, a great change came over the purpose and spirit of the institution. The vow was now taken to gain some personal end—protection on a journey, deliverance from sickness, etc. Women, too, became Nazirites. And the restrictions were only for a certain period. Nu 6 represents this stage, but the information which it gives needs supplementing. For instance, it fails to prescribe the manner in which the vow should be entered on. The Talmud asserts that this was done in private, and was binding if one simply said, 'Behold, I am a Nazirite,' or repeated after another, 'I also become one' (*Nazir*, i. 3, iii. 1, iv. 1). Nu 6 does not determine the length of these temporary vows. Here, again, a rule had to be made, and it was decided that the person himself might fix the period; otherwise, it should be thirty days (*Nazir*, i. 3, iii. 1; Jos *BJ* II. xv. 1 [313]). In case of accidental defilement, the Nazirite had to undergo seven days' purification, cut off his hair on the seventh day and have it buried (*Temurah*, vi. 4), on the eighth day bring two turtle-doves or two young pigeons, one for a sin-offering, one for a burnt-offering, as well as a lamb for a guilt-offering, and thus begin the course of his vow afresh (cf *Nazir*, iii. 6). At the expiration of the time he was brought to the door of the sanctuary, with a he-lamb for a burnt-offering, a ewe-lamb for a sin-offering, a ram for a peace-offering, ten unleavened cakes and ten unleavened wafers anointed with oil, a meat-offering, and a drink-offering. When the sacrifices had been offered his hair was shaved and he put it in the fire which was under the peace-offering, or under the cauldron in which the latter was boiled (*Nazir*, vi. 8). Then a wave-offering was made, consisting of the sodden shoulder of the ram, a cake, and a wafer. The fat was then salted and burned on the altar, and the breast and the foreleg were eaten by the priests, who also ate the waved cake and the boiled shoulder: the rest of the bread and meat belonged to the offerer (Maimonides, *Hilchoth, Maase ha-Corbanoth*, ix. 9–11). A free-will offering followed (Nu 6[21]). In the second Temple there was a chamber in the SE. corner of the women's court, where the Nazirites boiled their peace-offerings, cut off their hair and cast it into the cauldron.

The following historical notices are of some interest: (1) 1 Mac 3[49–53] enables us to realize the importance which came to be attached to the punctilious performance of every one of the ceremonies. Just before the battle of Emmaus, the Nazirites, being shut out of Jerusalem, could not offer the concluding sacrifices there. Evidently this was regarded as a serious public calamity. (2) The important tractate of the Talmud entitled *Berakhoth* tells a story of slightly later date than the above, which illustrates the ingenuity which the Rabbis displayed in finding reasons for releasing from their vows persons who had rashly undertaken them (vii. 2). (3) John the Baptist has been claimed as a Nazirite, but this is doubtful; we read nothing about his hair being untouched. (4) A custom grew up for wealthy people to provide the requisite sacrifices for their poorer brethren. Thus, when Agrippa came from Rome to Jerusalem to enter on his kingdom, 'he offered many sacrifices of thanksgiving; wherefore also he ordered that many of the Nazirites should have their heads shaven' (Jos. *Ant.* XIX. vi. 1 [294]). This throws light on Ac 21[23–26]. (5) Eusebius (*HE* ii. 23) appears to represent James the Just as a lifelong Nazirite: 'He was holy from his mother's womb. Wine and strong drink he drank not, neither did he eat flesh. A razor passed not over his head.' But the further statement that he alone was permitted to enter the Holy of Holies is so improbable as to lessen our confidence in the narrator.

J. T.—S. H. He.

NEAH.—A place in Zebulun, Jos 19[13]. It is possibly modern *Tell el-Wâwiyât*.

NEAPOLIS.—The harbour of Philippi, at which St. Paul landed (Ac 16[11]) after sailing from Troas. It lay on the coast of Macedonia opposite Thasos, being situated on a promontory with a harbour on each side. It was about ten miles from Philippi. The Via Egnatia from Dyrrhachium, after passing through Thessalonica, Amphipolis, and Philippi, reached the coast again at Neapolis, and the regular course of travellers to Asia was not to continue farther by land, but to cross by ship to Troas. The modern name of Neapolis is *Kavalla*. A. E. H.

NEARIAH.—**1.** A descendant of David, 1 Ch 3[22f]. **2.** A Simeonite, 1 Ch 4[42].

NEBAI.—One of those who sealed the covenant, Neh 10[19] (RV **Nobai**). See NEBO, 3.

NEBAIOTH.—An important tribe of North Arabians. In Gn 25[13] (AV **Nebajoth**), 1 Ch 1[29] Nebaioth is the eldest son of **Ishmael**; also the representative of the Ishmaelite tribes in Gn 28[9] 36[3] (AV **Nebajoth**). The people of Nebaioth have an important place among the Arabian tribes subdued by Ashurbanipal of Assyria, named by him along with the people of **Kedar** (q.v.), just as in the genealogy of Genesis. It is about this date (650 B.C.) that they come into prominence among the competing tribes of the peninsula—a position which they retained for centuries. Their exact location cannot be definitely determined, but the inscriptions tell us that they were very remote from Assyria, and their place at the head of the tribes of Ishmael, as well as their affiliation with the **Edomites** (Gn 28 and 36) makes it probable that they were well known to the Hebrews. Hence they are to be sought for not far from the south-eastern borders of Palestine. The time when they flourished agrees with the fact that in the Bible they are mentioned only in the late Priestly Code and by the 'Third Isaiah' (Is 60[7]). They are usually, but wrongly, identified with the **Nabataeans** (q.v.). J. F. McC.

NEBAJOTH, Gn 25[13] 28[9] 36[3] (AV).—See NEBAIOTH.

NEBALLAT.—A town inhabited by Benjamites, Neh 11[34]; probably the modern *Beit Nebâlā*, 3½ miles NE. of Lydda.

NEBAT.—Father of Jeroboam I. (1 K 11[26] and onwards). The constant designation of Jeroboam I. as 'ben-Nebat' is probably the usage of a writer later than Jeroboam ben-Joash. It is intended, doubtless, to distinguish the two kings.

NEBO (Assyr. *Nabû*, 'Announcer').—A Babylonian deity who presided over literature and science. The cuneiform system of writing was credited to his invention. He was the son and messenger of Bel-Marduk; whose will to mortals he interpreted. The planet Mercury was sacred to Nebo. The chief centre of his worship was the temple of E-zida in Borsippa, between which and, the temple of Marduk in Babylon took place the great annual processions of which we find a reminiscence in Is 46[1f]. The name Nebo appears as an element in many Babylonian names—Nebuchadrezzar, Nebuzar-adan, Abed-nego (properly Abed-nebo), etc. W. M. N.

NEBO.—The name of a mountain in Moab, a Moabite town, and possibly a town in Judah. The etymology of the name is uncertain. According to one view, these places were named after the Babylonian deity Nebo (see preceding article), an indication of the influence of this Babylonian cult at a remote period both E. and W. of the Jordan. Other scholars, pointing out that there is no proof that the Hebrews and Moabites used the name of a foreign deity in this way (cf Nu 32[38]), suggest that the name corresponds to the Arabic *naba'a*, denoting

a high place or elevation. If the latter is correct, the Moabite town may have received its name from the mountain which had served in primitive times as a place of worship for various deities.

1. Mount Nebo is the traditional site of Moses' view of Canaan (Dt 34^{1f}) and of his death (Dt 32^{50}). It is described as being in the land of Moab, opposite Jericho, in the mountains of Abarim (Nu 33^{47}, Dt 32^{49}). Although the Hebrew of Dt 34^{1} is not clear, the phrase 'from the plains of Moab to Mount Nebo, to the top of Pisgah' may indicate that Nebo was the summit of Pisgah (q.v.), or another name for Pisgah (cf Dt 3^{27}). There can be no question that this description implies some point on the edge of the great plateau of Moab, which drops steeply some 4000 feet to the Jordan Valley or the Dead Sea. From several peaks in the region an admirable view can be had of ancient Gilead, the Jordan valley and the mountains of Canaan, but from none of them is there a view of the Mediterranean Sea, as Dt 34^{2} suggests was visible from Mount Nebo. If this verse is not interpreted literally, there appears to be good reason for identifying Mount Nebo with the peak now called *Jebel en-Nebā*, the Arab name of an elevation of about 2700 feet. This identification might be regarded as certain if we could feel sure that *Nebā* is really an ancient name, and not merely, as it may be, the name attached to the summit after tradition had claimed it as the Nebo of the Bible. *Nebā* lies about 12 miles almost due E. of the Jordan at the point where the river enters the Dead Sea, and is one of the summits that can be ascended from the steppes of Moab. Although it is not the highest peak in the region, it fits the geographical description of Mount Nebo in Dt 32^{49} 34^{1f} as well as any other. The presence of Iron Age sherds (*c* 1200 B.C.) on the slopes near *Nebā* is archaeological evidence of occupation during OT times (cf Nelson Glueck, *The Other Side of the Jordan* [1940], pp. 143–145). Surface exploration has added greatly to our knowledge of this Moabite region (cf *AASOR*, xv [1935], 109–111), but the exact burial place of Moses remains unknown. An early Christian tradition identified Mount Nebo with *Râs Siyâghah*, an elevation joined by a 'saddle' to the summit of *Nebā*. Extensive excavations were carried out on *Râs Siyâghah* from 1933 to 1937 by the Franciscans of Jerusalem (see S. Saller, *The Memorial of Moses on Mount Nebo*, Part I, The Text; Part II, The Plates [1941]). Several buildings, including the remains of Byzantine churches, were uncovered, indicating that Christian worship was conducted at the place from late Roman times to the early Arabic period. However, no remains from OT times were discovered that would identify *Siyâghah* with Mount Nebo. The most that can be claimed is that early Christian tradition attempted to preserve the memory of Moses at *Siyâghah* (cf *Quart. of the Dept. of Antiq. in Palestine*, vi [1938], 220 f), that Mount Nebo must have been in this region, *Jebel en-Nebā* being the most probable site.

2. The Moabite town called Nebo was located near or on Mount Nebo, and is listed among other Moabite towns where grazing of cattle was possible and in which the people of the tribes of Gad and Reuben hoped to settle (Nu 32^{1-5}). The Reubenites built (or rebuilt) the town of Nebo (Nu 32^{37f}); it was the scene of a Hebrew encampment (Nu 33^{47}), and later tradition associated it with the descendants of Reuben (1 Ch 5^{8}). According to the Moabite Stone (see MOAB), Mesha king of Moab (*c* 850 B.C.) conquered the town: 'And Chemosh said to me, "Go, take Nebo from Israel!"' (l. 14), and following the attack, put to death all its inhabitants. Nebo is also mentioned among other Moabite towns in oracles against Moab (Is 15^{2}, Jer $48^{1,22}$). Uncertainty concerning the date and historical allusions of these oracles makes it impossible to determine whether Nebo was reconquered by the Hebrews or destroyed by other enemies of the Moabites such as the Babylonians. The site which best fits the description of the town is *Khirbet el-Mekhayyet*. It is located less than two miles SE. of traditional Mount Nebo. The presence of the ruins of an ancient fortress and early Moabite sherds are evidence for its identification with the town of Nebo (see *AASOR*, xv [1935], 110–111).

3. The possible existence also of a town in Judah called Nebo depends on the interpretation of Ezra 2^{29} 10^{43} (cf 1 Es 9^{35}, Gr. **Nooma**, and so RV; AV **Ethma**), and Neh 7^{33}. In these passages which list the names and numbers of the Jews who returned to Judah following the Babylonian exile, the word Nebo could be the name of a person (see also Hebrew of Neh 10^{19} where **Nebai** [RV **Nobai**] is listed as a signatory to the covenant), the name of the Moabite town where the ancestors of the repatriated Jews had lived, or the name of a village in Judah. On the strength of the latter possibility and the similarity of the modern and ancient names, some scholars have located this Nebo at *Beit Nûbā*, about 12 miles NW. of Jerusalem (cf L. H. Grollenberg, *Atlas of the Bible* [1957], p. 158). G. B. G.—W. L. R.

NEBUCHADNEZZAR.—See next article.

NEBUCHADREZZAR.—The *Nabû-kudur-uṣur* of the Babylonians, for which 'Nebuchad*nezzar*' (the familiar form often retained in the pr sent work) is an error, was son and successor of Nabopolassar, founder of the Neo-Babylonian empire (604–561 B.C.). The fall of Nineveh gave Egypt a chance to reclaim Syria, and Pharaoh Neco made an attempt to regain it. Josiah fell in a vain effort to repel him (2 K 23^{29}), but Nebuchadrezzar defeated him at Carchemish (605 B.C.). He then recovered the whole of the West and seems to have been threatening Egypt when recalled to Babylon by news of his father's death. In 601 B.C. he led an unsuccessful expedition against Egypt. In a subsequent campaign in 597 B.C. he first captured Jerusalem (Dn 1^{1f}). We know little of his wars from his own inscriptions, which deal almost entirely with his buildings and pious acts at home. According to classical historians, he made Babylon one of the wonders of the world. He fortified it with a triple line of walls and a moat; he restored temples and cities throughout his kingdom. A fragment of his annals records that in his thirty-seventh year he fought against Amasis in Egypt (cf Jer 46^{13-26}, Ezk 29^{2-20}). For his relations with Judah see JEHOIAKIM, JEHOIACHIN, ZEDEKIAH, GEDALIAH. He certainly was the greatest king of Babylon since Hammurabi. For his madness, see MEDICINE. C. H. W. J.—C. J. M. W.

NEBUSHASBAN, Jer 39^{13} (AV).—See NEBUSHAZBAN.

NEBUSHAZBAN.—Rab-saris (q.v.) at the capture of Jerusalem, Jer 39^{13} (AV **Nebushasban**); Babylonian *Nabû-shezib-anni* means 'Nabu save me.' C. H. W. J.

NEBUZARADAN.—Captain of Nebuchadrezzar's bodyguard, 2 K 25^{8-20}, Jer 39^{9ff} 40^{10} 52^{30}: he was charged with the pacification of Judah after the fall of Jerusalem. Babylonian *Nabû-zēr-iddin* means 'Nabu has given seed.' C. H. W. J.

NECHO.—AV spelling of **Neco** (so RV, RSV) in 2 Ch $35^{20,22}$ 36^{4}, Jer 46^{2}.

NECHOH.—AV spelling of **Neco** (so RSV) in 2 K $23^{29,33ff}$.

NECK.—The most usual words are *'ōreph* and *ṣawwār* in Hebrew, and *trachēlos* in Greek. Chains upon the neck were a common ornament Pr 1^{9} etc., Ezk 16^{11}). To fall upon one another's neck has from old time been an affectionate form of greeting in the East (Gn 33^{4} etc.). The neck under yoke meant subjection and servitude (Dt 28^{48} etc.); breaking of the yoke meant deliverance (Gn 27^{40}, Jer 30^{8}). Stiff or hard of neck (Dt 31^{27} etc.) signified one difficult to guide, like a hard-necked bullock in the furrow. To put the foot upon the neck of a foe, meant his utter overthrow (Jos 10^{24} etc.). To put the neck to work (Neh 3^{5}) was a phrase equivalent to our own 'put a hand to.' W. E.

NECKLACE.—See ORNAMENTS, 3.

NECO.—The second king of the 26th Dynasty of Egypt, in modern works spelt *Necho* (but RSV uniformly Neco) after the Greek form of his name. He was the son of Psammetichus I. and reigned 609–594 B.C.

He tried to restore Egypt's empire in Asia and he continued his father's policy of supporting Assyria against the rising power of Babylon. The year after his accession he marched into Palestine to assist Ashur-uballiṭ, and not to attack him, as 2 K 23[29] has been thought to imply. He defeated Josiah of Judah, who had allied himself with Babylon, at **Megiddo**. Josiah was killed in the battle and the people made Jehoahaz, his son, king in his stead. On his return from Megiddo, Neco deposed Jehoahaz and made his elder brother Eliakim king, changing Eliakim's name to Jehoiakim (2 K 23[33f]). Heavy tribute was exacted from the new king at the expense of the people (2 K 23[35]). Neco soon overran Syria and penetrated as far as the Euphrates. Nabopolassar, king of Babylon, sent his son Nebuchadrezzar against him and a severe defeat was inflicted on the Egyptian army at **Carchemish** in 605 B.C. (Jer 46[2]). Neco lost all his gains in Asia. In 601 B.C. Nebuchadrezzar met Neco in another engagement in which there were heavy losses on both sides, but after which Nebuchadrezzar was forced to withdraw (see D. J. Wiseman, *Chronicles of Chaldaean Kings*, 1956).

T. W. T.

NECODAN, 1 Es 5[37] (AV).—See NEKODA, **2.**

NECOH.—RV spelling of **Neco** (so RSV) in 2 K 23[29, 33ff].

NECROMANCY.—See MAGIC, DIVINATION AND SORCERY.

NECTAR.—In Ca 4[11] RSV renders 'your lips distil nectar.' Elsewhere it renders Hebrew *nōpheth* by 'honey' (cf Pr 5[3] 'the lips of a loose woman drip honey,' where the Hebrew is the same) or 'drippings from the honeycomb' (Pr 24[13]).

NEDABIAH.—A descendant of David, 1 Ch 3[18].

NEEDLE'S EYE.—See CAMEL.

NEEDLEWORK.—See EMBROIDERY.

NEESING.—The verb 'to neese' (modern 'sneeze') occurs in the 1611 edition of AV at 2 K 4[35], 'the child neesed seven times.' But the 'neesing,' Job 41[18] (AV, RV; RSV 'sneezings') of leviathan (the crocodile) means hard breathing, snorting, and does not come from the same A.S. verb as 'neese' meaning 'to sneeze.'

NEGEB, originally meaning 'the dry land,' is in most passages in the OT the name of a definite geographical area (Dt 1[7] 34[3], Jos 10[40] 12[8] etc.); the word is, however, also used in the sense of '**South**' (Gn 13[14]). The Negeb was often the scene of Abraham's wanderings (Gn 12[9] 13[1, 3] 20[1]); here Hagar was succoured by an angel (Gn 16[7, 14]); Isaac (24[62]) and Jacob (37[1] 46[5]) both dwelt there; through this district passed the spies (Nu 13[17, 22]). In Nu 13[29] the Negeb is described as belonging to the Amalekites. Later it was allotted to Simeon, and its cities are enumerated (Jos 19[1-9]), some of which they shared with Judah (Jos 15[21-32]). David was stationed by Achish at Ziklag just NW. of Beersheba on the borders of the Negeb (1 S 27[6]). At this time the Negeb is described as of several parts, the Negeb of Judah, of the Jerahmeelites, and of the Kenites (1 S 27[10]); while in 1 S 30[14] we read of the Negeb of the Cherethites and of Caleb. Jeremiah prophesied trouble as coming on the cities of this region, but on return from captivity they too were to participate in the blessings (32[44] 33[13]).

The district in question was an ill-defined tract of country lying S. of Hebron, and extending some seventy miles to the *Tih* or desert. It was bounded on the E. by the Dead Sea and the Arabah, while W. it faded into the maritime plain. It was a pastoral region, wedged between the cultivated lands on the N. and the wilderness, and formed a most efficient barrier to the land of Israel on the S. Attacks of large armed forces could not come from this direction, but only by the Arabah from the SE. (*e.g.* Gn 14), via Gaza on the SW. or by the E. of the Jordan. The country consists of a series of mountainous ridges running in a general direction E. and W., with open wadis in which a certain amount of water collects even now. The OT, in the stories of Saul's and David's captures from the Amalekites (1 S 15[9] 27[9]), witnesses to a great wealth of cattle. Recent archaeological survey work by Glueck has, in fact, established that the region was much more settled in the 2nd millennium B.C. and in the Hebrew Monarchy than was previously thought, though it must be emphasized that settlement in the Israelite period was mainly confined to the lines of communication with the copper-mines of the Arabah and the open cultivable wadis extending about seventy miles S. of Beersheba. The area was settled in the early Christian period by the Nabataeans, and again in Byzantine times, when it was a frontier area, it reached its maximum development in antiquity. In this period several considerable towns flourished, such as Elusa (*Khalsa*), Mampsis (*Kurnub*), Eboda (*'Abda*), and Subaita (*Sbeiṭa*), where excavations have revealed the remains of three large churches and a monastery. There are many traces of channelling of hillsides and cisterns for collection and storage of water, damming of wadis and terracing of slopes against erosion of soil, while regular small piles of stones once served as vine-props. After the Arab invasion the region lost its significance as a frontier area and experienced a rapid decline. In the state of Israel, however, the chemical industry at the S. end of the Dead Sea, the strategic significance of Elath on the Gulf of 'Aqaba, water piped in for irrigation, and above all a greatly swollen population, are rapidly developing the the Negeb to capacity.

E. W. G. M.—**J. Gr.**

NEGINAH, NEGINOTH.—See PSALMS, **2.**

NEHELAM.—See NEHELAMITE.

NEHELAMITE.—An epithet applied to Shemaiah, a false prophet who opposed Jeremiah, Jer 29[24, 31f] (AV, RV). According to analogy the word should mean '**of Nehelam**' (so RSV), but there is no place of that name mentioned in the Bible.

NEHEMIAH.—1. One of the twelve heads of the Jewish community, Ezr 2[2], Neh 7[7], 1 Es 5[8] (AV, RV **Nehemias**). **2.** One of those who helped to repair the wall of Jerusalem, Neh 3[16]. **3.** See the following article.

NEHEMIAH.—Son of Hacaliah and cupbearer to Artaxerxes. Our sole source of information regarding this great Jewish patriot is the book that bears his name. According to this, in the twentieth year of Artaxerxes (*i.e.* Artaxerxes I. Longimanus 465–424 B.C., q.v.), December 446 B.C., Nehemiah is at Susa, the chief city of Elam and the winter residence of the Persian court. In consequence of a report brought to him by his brother Hanani and certain men from Judah concerning the ignominious situation of the people in Jerusalem, the wall of the city broken down and its gates burned, Nehemiah, after prayer and fully conscious of Divine guidance in the matter, is able some months later (2[1], *i.e.* March-April 445) to obtain permission of the king to go to Judah, appointed as governor (*peḥāh*—though this is mentioned first in 5[14]). A limited leave of absence is granted to him by the king, letters sent to the governors of the province 'Beyond the River' and to Asaph the keeper of the king's forest ordering the supply of timber for the Temple gates, for the city walls, and for a house for Nehemiah himself. He was also provided with an escort. On his arrival, he inspected the walls secretly by night, and then, revealing his intentions and the ways in which God had blessed his undertaking, he encouraged the people to build with him. By energetic measures and sharing of the work with the aid of men from surrounding villages, he completed the walls in fifty-two days. This was not achieved without opposition, from Sanballat and others (2[10]), who accused Nehemiah of rebellious intentions, and subsequently attempted by various means to frustrate the enterprise (Neh 1–4, 6). He had also to deal with depression among the workers (4[10ff]). The work was completed on the twenty-fifth day of the sixth month (6[15]—presumably September-October, 445). The dedication of the walls is described in 12[27-43], and this was followed by certain reforms—reorganization of Temple stores, tithes, etc. and the

making of provision for the Levites. As a result of a reading of the law (13[31]) a separation was made from Israel of those of foreign descent.

This narrative is interrupted by various other sections. 1) Chapter 5 describes Nehemiah's measures to relieve economic distress. Many of the people were forced through poverty to mortgage their property and to sell their children as slaves. Nehemiah persuaded those who were lending money and grain to follow his example and charge no interest, and to restore land, money, and produce. It is also stated that Nehemiah himself, unlike former governors, not only took no allowances for himself and his associates, but in fact provided food daily for a large number of men out of his own resources. The date of this section can hardly be ascertained. (2) 7[1-4] contains provisions for guarding the city and may be linked with 11[1-2] where this matter is continued by showing how extra population was obtained for the sparsely inhabited city. (3) 7[5-73a] contains a list also recorded in Ezr 2. (4) 7[73b]–10 contains the narrative of Ezra's reading of the law and of the making of a new covenant. In this narrative Nehemiah is mentioned only in 8[9] and 10[1], and the lack of real inter-relationship between the work of Nehemiah and Ezra—presented in the Biblical narrative as contemporaries—has led many scholars to believe that Ezra came later, either at the end of the reign of Artaxerxes I. or in the reign of Artaxerxes II. (see EZRA). At all events, the position of the reading of the law here can hardly be correct, since it allows a lapse of thirteen years between Ezra's coming to Jerusalem and his carrying out the main task for which, according to the narrative (Ezr 7[25f]), he was sent.

The exact sequence of events is thus uncertain and similarly there is some difficulty concerning the chronology of the whole period of Nehemiah's first stay in Jerusalem. The only clues are provided by 5[14] and 13[6]; the former records twelve years as the period of Nehemiah's governorship, the latter, referring to certain events, states that Nehemiah was not present in Jerusalem at the time, and it thus appears that the 'on that day' of 12[44] 13[1] and the 'now before this' of 13[4] provide no coherent chronological sequence. Nehemiah had apparently returned to Susa in the thirty-second year of Artaxerxes, *i.e.* 434 B.C. Some time later (13[6b]), he obtained permission to return and found various abuses and internal disorders rampant in the community. Eliashib 'the priest' had provided Tobiah with quarters in one of the Temple-chambers (13[4f]), the Levites had not received their dues, the Sabbath was openly desecrated in and around Jerusalem (13[15f]). Various measures were adopted: Tobiah was turned out and the room he had occupied restored to its proper use. The tithes were reorganized and sabbath trading prevented. Moreover, the problem of foreign marriages (cf 13[1-3]) was again acute, with children unable to speak 'the language of Judah.' By somewhat violent measures (13[25]) Nehemiah exhorted the people to abandon the evil practice. One of the priestly family, who had married the daughter of Sanballat, was chased out, and the final statement is of the cleansing of the people, proper ordering of priests and Levites, and provision of the wood offering and first fruits (13[30f]).

The Book of Nehemiah (see next article) is composite in character, and the narrative, as has been indicated, is in part fragmentary, its chronology uncertain. Some scholars have suggested that Nehemiah was active in the period of Artaxerxes II. Mnemon (404–358 B.C.), but the references in the Elephantine papyri to the sons of Sanballat in 407 B.C. indicate that he is likely to have been Nehemiah's opponent in the middle of the 5th cent. Josephus (*Ant.* XI. v. 6 [159]) places Nehemiah in the time of Xerxes.

The personality of Nehemiah, as revealed in his memoirs, is in many respects attractive. He appears as a gifted and accomplished man of action, well versed in the ways of the world, and well equipped to meet difficult situations. He is also deeply religious, as is to be seen in the prayer of ch. 1 and the measures adopted in chs. 12 and 13. The combination of strength, generosity, fervent patriotism and religious zeal contributed to form a personality of striking forcefulness. He rendered services of incalculable value to the cause of Judaism, and his work, together with that of Ezra, was one of the important factors in the preservation of the values of the ancient faith in the later Hellenistic period, when the temptation to religious compromise was particularly strong.

Like all great men, he has become the subject of legend. The recovery of the sacred fire from the altar, hidden during the captivity in Persia (*sic*), is attributed to him (2 Mac 1[18ff]), and also that he 'founded a library and collected the books about the kings and prophets, and the writings of David, and letters of kings about votive offerings' (2 Mac 2[13]). He is praised by ben Sira (Sir 49[13]), who does not, however, mention Ezra; and by Josephus (*Ant.* XI. v. 8 [183]): 'He was a man of good and religious character, and very ambitious to make his own nation happy; and he hath left the walls of Jerusalem as an eternal monument of himself.'

G. H. B.—P. R. A.

NEHEMIAH, BOOK OF.—The two books, separated in our Bible and appearing as *Ezra* and *Nehemiah*, originally formed a single book (as appears from the Talmud, the LXX and from internal evidence), and constituted the last section of the work of the Chronicler. The book of Ezra in fact begins with words which overlap the ending of 2 Chronicles (2 Ch 36[22f]=Ezr 1[1-3a]). The whole work—1 and 2 Chronicles, Ezra, and Nehemiah—presents the history of the people from Adam to Nehemiah's second visit to Jerusalem. It is usual to refer to the author as the Chronicler, though the probability is that more than one hand may be discerned in the work. That part of this great work which now bears the title *Nehemiah* is so called because it deals largely with the career of the Jewish patriot whose name it carries, and embodies excerpts of considerable extent from his personal memoirs.

1. Extracts from the memoirs embodied in Nehemiah.—(*a*) 1[1]–7[4(5)]. At the outset we meet with a long section where the first person singular is used throughout. These chapters are authentic extracts from Nehemiah's personal memoirs (cf below on the nature of these). They are distinguished by individual characteristics which help us to form a distinct idea of his personality (see NEHEMIAH). From 5[14] it is clear that the narrative cannot have been put into its present form until some years after the events recounted. Doubts have been raised as to the authenticity of 6[15] (the walls finished in fifty-two days): Josephus (*Ant.* XI. v. 8 [179]) gives two years and four months, but it is probable that this rests upon an error in the Greek text he used. 6[16] makes it plain that to Nehemiah and his contemporaries the speed of the building was a cause for wonder, and could only be ascribed to Divine assistance. 3[1-32], the list of builders, may well be an addition to the original narrative. 7[5] now provides an introduction to a list which also appears in Ezr 2 (see below).

(*b*) 11[1-2] provides the continuation of 7[1-4] and indicates briefly the measures undertaken to increase the population of the city. It is followed by another list (11[3-36]) which appears also in part in 1 Ch 9[3-17], probably not an original part of the memoirs, but possibly representing a contemporary record.

(*c*) 12[27-43]. The account of the dedication of the walls continues the narrative in the first person singular (vv.[31, 38, 40]) and should presumably be linked to 6[15f].

(*d*) 13[4-31]. Another extract from the memoirs, giving details of a time some twelve or more years later than that referred to in the earlier extracts. It deals with Nehemiah's second visit.

2. Passages in Nehemiah not derived from the memoirs.—(*a*) 7[6-73a]. This list of returned exiles appears also in Ezr 2 with slight differences. Opinion differs as to whether it is original to the one place or the other. 7[5b] provides an easy link which makes it seem not impossible that it was placed here at an early stage, and subsequently

included in Ezr 2 because its contents refer to the earlier period.

(*b*) 7^{73b}–10^{39}. This long section breaks the connexion between the main parts of the Nehemiah memoirs, and clearly belongs with Ezr 7–10. Since part of the Ezra material is in the first person singular (so Ezr 7^{27}–9) and part in the third person singular (so Ezr 7$^{1-11}$ 10), there seems good reason to believe that the section in Nehemiah is also part of the same corpus. The prayer of 9$^{6-37}$ is ascribed to Ezra (so RSV, following LXX) and 9^{38} 10$^{30-39}$ contains a covenant which appropriately concludes the reading and exegesis of the law. These last verses have sometimes been regarded as part of the Nehemiah memoirs, but there seems no entirely appropriate place for them in that narrative. Included in the section is a list (10$^{1-27}$) of those adhering to the covenant.

(*c*) 11$^{3-36}$ and 12$^{1-26}$, two lists, of which the former (see above) may well be a record contemporary with Nehemiah, and the latter is a list of priests and Levites who returned with Zerubbabel. The priestly genealogy, however, is carried down to Jaddua in the reign of Darius the Persian (12$^{11, 22}$), possibly Darius III. Codomannus (336–330 B.C.). According to Josephus (*Ant.* XI. viii. [304 ff]), Jaddua was a contemporary of Alexander the Great.

(*d*) 12^{44}–13^{3} contains firstly an account of various religious ordinances in the time of Nehemiah (and Zerubbabel 12^{47}), and secondly an account of a reading from the law which resulted in the exclusion of foreigners. The chronology of these two sections, and their origin, are uncertain.

3. Historical value of the Book.—It is clear that the question of historicity can only be resolved after careful analysis of the material, and the recognition of its chronological problems. The separation of the Ezra material (for which see above and EZRA) and of certain other passages, leaves the Nehemiah memoirs as a document of primary importance. It is, however, necessary to recognize the kind of material this is. Mowinckel's view that the memoirs are a memorial, written to preserve the memory of a great man and to denounce the wickedness of his opponents, has much to commend it. Their style is reminiscent of ancient royal inscriptions, and the repeated prayers for remembrance (*e.g.* 5^{19} 13$^{14, 22, 31}$) emphasize the purpose of the work. Possibly it was designed to be placed in the sanctuary to keep before God the remembrance of this great national leader. Such a work might be produced by the hero himself or more probably by a scribe on his behalf. Though order and chronology are not always clear—in such a memorial the desire for emphasis may dictate the arrangement—yet the whole work sheds much light upon the period. The dating of Nehemiah in the reign of Artaxerxes I. may now be accepted as established (see previous article).

The literary problems are, however, difficult, and in many ways the most satisfactory suggestion appears to be that the Nehemiah material did not form an original part of the Chronicler's work. Later insertion would make the chronological confusion more intelligible, and unlike other parts of the work, the marks of the Chronicler's style are very little in evidence here. To some extent the traditions concerning Ezra and Nehemiah are parallel (cf the action in foreign marriages, and the later traditions concerning the OT scriptures, 2 Mac 2^{13} and 2 Es 14). Such parallelism is not in itself surprising (cf Elijah and Elisha), and it may be that their actual work was somewhat less similar than it now appears.

G. H. B.—P. R. A.

NEHEMIAS.—**1.** 1 Es 5^{8} (AV, RV); see NEHEMIAH, **1. 2.** 1 Es 5^{40} (AV, RV); see NEHEMIAH, **3.**

NEHILOTH.—See PSALMS, **2.**

NEHUM.—One of the twelve heads of the Jewish community, Neh 7^{7}; perhaps a copyist's error for **Rehum** (see REHUM, **1**).

NEHUSHTA.—Wife of king Jehoiakim and mother of Jehoiachin, 2 K 24^{8}. She was taken a prisoner to Babylon with her son in 597, 2 K 24^{12}.

NEHUSHTAN.—See SERPENT (BRAZEN).

NEIEL.—A town in Asher, Jos 19^{27}; possibly modern *Kh. Ya'nîn.*

NEIGHBOUR.—In Hebrew there is a paucity of pronouns, and hence in a number of passages in the OT 'neighbour' is employed in a periphrasis for a reciprocal pronoun (Jer 22^{8} 23^{27} 31^{34}). Elsewhere it stands for a fellow-Israelite (Ex 20^{17}, Lv 19^{18}), though the command to love one's neighbour as oneself is extended to include the resident alien (Lv 19^{33f}). In the NT this command is extended by Jesus in the Parable of the **Good Samaritan** (Lk 10$^{29-37}$) to include Samaritans, who were regarded by Jews as outside the pale (Jn 4^{9}). It is in this universalizing of the concept of 'neighbour' that Jesus brought a new meaning to the ancient command.

NEKODA.—**1.** Eponym of a family of Nethinim, Ezr 2^{48}, Neh 7^{50}, 1 Es 5^{31} (AV, RV **Noeba**). **2.** Name of a family which returned from the Exile, but were unable to prove their Israelitish descent, Ezr 2^{60}, Neh 7^{62}, 1 Es 5^{37} (AV **Necodan**, RV **Nekodan**).

NEKODAN, 1 Es 5^{37} (RV).—See NEKODA, **2.**

NEMUEL.—**1.** A son of Simeon, Nu 26^{12}, 1 Ch 4^{24}; called **Jemuel** in Gn 46^{10}, Ex 6^{15}. The patronymic **Nemuelites** occurs in Nu 26^{12}. **2.** A Reubenite, Nu 26^{9}.

NEPHEG.—**1.** Son of Izhar and brother of Korah, Ex 6^{21}. **2.** One of David's sons, 2 S 5^{15}, 1 Ch 3^{7} 14^{6}.

NEPHEW.—In AV 'nephew' means 'grandson.' It occurs in Jg 12^{14}, Job 18^{19}, Is 14^{22}, 1 Ti 5^{4} (cf RV and RSV).

NEPHILIM.—A Hebrew word of uncertain etymology, retained by RV in the only two places where it occurs in OT (AV '**giants**'). In Gn 6^{4} we read: 'The Nephilim were on the earth in those days, and also afterward, when the sons of God came in to the daughters of men, and they bore children to them. These were the mighty men that were of old, the men of renown.' The verse has the appearance of an explanatory gloss to the obscure mythological fragment which precedes, and is very difficult to understand. But we can hardly be wrong in supposing that it bears witness to a current belief (to which there are many heathen parallels) in a race of heroes or demigods, produced by the union of divine beings ('sons of God') with mortal women. The other notice is Nu 13^{33}, where the name is applied to men of gigantic stature seen by the spies among the natives of Canaan. That those giants were popularly identified with the demigods of Gn 6^{4}, there is no reason to doubt. See also article GIANT. J. S.

NEPHIS, 1 Es 5^{21} (AV).—See MAGBISH.

NEPHISHESIM, Neh 7^{52} (AV).—See NEPHISIM.

NEPHISIM.—A family of Nethinim (q.v.) who returned from exile, Ezr 2^{50} (AV, RVm **Nephusim**), 1 Es 5^{31} (AV, RV **Naphisi**); called **Nephushesim** in Neh 7^{52} (AV, RVm **Nephishesim**).

NEPHTHAI.—See NEPHTHAR.

NEPHTHAR.—The name given by Nehemiah to a 'thick liquid' which was found in a dry pit after the return from Babylon (2 Mac 1$^{18-36}$). The legend relates how certain priests, before the Captivity, took the sacred fire and hid it. On the Return, when a search was made, there was found in its place this highly inflammable substance, which seems not to have differed much from the naphtha (v.^{36}) of commerce. Some of it was poured over the sacrifice, and was ignited by the great heat of the sun and burned with a bright flame. The name *nephthar* or **nephthai** (v.^{36}, RSV '**naphtha**') has not been satisfactorily explained, although it is said by the writer to mean 'purification.' T. A. M.—F. C. G.

NEPHTOAH.—A town on the boundary between Judah and Benjamin, Jos 15^{9} 18^{15}; generally identified with *'Ain Liftâ.*

NEPHUSHESIM.—See NEPHISIM.

NEPHUSIM, Ezr 2[50] (AV).—See NEPHISIM.

NER.—The father of Abner, 1 S 14[50] 26[5, 14] etc.

NEREUS.—A Roman Christian, to whom, along with his sister, St. Paul sends greeting in Ro 16[15]. The expression 'and all the saints who are with them' seems to point to some community of Christians accustomed to meet together.

NERGAL.—The god of the city of Cuthah in Babylonia, hence worshipped by the captive Cuthaeans who were transplanted to Samaria by Sargon, 2 K 17[30]. In the Babylonian-Assyrian pantheon he was a god of war and pestilence, and of hunting, and the planet Mars was sacred to him. The name Nergal is probably of Sumerian origin, namely, *Ner-gal*='great warrior.'

W. M. N.

NERGAL-SHAREZER.—The Rab-mag (q.v.) who, with Nebuzaradan and Nebushazban, released Jeremiah from prison, Jer 39[3, 13]. Babylonian *Nērgal-shar-uṣur* means 'Nergal preserve the king.' It is tempting to think that he was the *Nērgal-shar-uṣur* who married a daughter of Nebuchadrezzar, and later came to the throne of Babylon, and is known from classical writers as Neriglissar (559–556 B.C.). C. H. W. J.

NERI.—An ancestor of Jesus (Lk 3[27]).

NERIAH.—The father of Baruch, Jer 32[12, 16] 36[4, 8] etc., Bar 1[1] (AV, RV **Nerias**).

NERIAS, Bar 1[1] (AV, RV).—See NERIAH.

NERO is not mentioned by name in the NT, but his connexion with St. Paul's trial (Ac 25–28, where 'Caesar' is Nero), the mention of his household (Ph 4[22]), and the general opinion that the 'number of the beast' (Rev 13[18]) is a cypher referring to him in some way, are sufficient reasons for including him here. Lucius Domitius Ahenobarbus was born on December 15, A.D. 37, son of Gnaeus Domitius Ahenobarbus (consul in A.D. 32, † A.D. 40) and Agrippina, daughter of Germanicus (nephew of the Emperor Tiberius), who married her uncle the Emperor Claudius in A.D. 48. On adoption by his stepfather in A.D. 50 he received new names, by one of which, Nero, he has since been known. His reign began on the murder of Claudius in A.D. 54, and during it he was officially known as Imperator Nero Claudius Caesar Augustus Germanicus. His death took place on June 9, A.D. 68.

Nero inherited evil qualities from his father and mother, which for the first five years of his rule were kept in check by his tutors, Burrus an experienced soldier, and the philosopher Seneca. When of age to throw off all restraints, he plunged into follies and excesses which suggest that madness had unhinged his mind. His defects, however, seem to have done little more than scandalize and amuse Rome; the prosperity of the provinces continued, thanks to the excellence of the bureaucratic machine. The constant problem of the eastern frontier demanded settlement in Nero's time, especially with reference to the strategic importance of Armenia, which the Romans could neither annex nor abandon to the Parthians. After ten years of fighting, mainly under the able general Cn.Domitius Corbulo, the Parthian Tiridates was recognized in Armenia as a Roman vassal. The long peace which followed is to the credit of Corbulo's generalship and Nero's diplomacy. The Roman hold on Britain, obtained by Claudius, was extended under Nero; the justly aroused rebellion of Boudicca (better known by the incorrect form Boadicea) was crushed by the governor Suetonius Paulinus (A.D. 60). The German and Danubian frontiers also received attention in Nero's time.

Nero was fond of the arts, especially music and poetry, but never attained more than a respectable standard in either. At Rome he exercised a wise care for the grain and water supplies. But on July 19, A.D. 64, a fire broke out and raged for nine days, leaving large parts of the city in ashes. On the evidence Nero must be acquitted of all connexion with the fire, which was due to chance. The populace, however, suspected the emperor, and were anxious to bring retribution on the originators of the fire. Nero selected the Christians as scapegoats, and he may have believed them guilty, as some were understood to have confessed. They were subjected to every variety of cruel death—not so much, says the historian Tacitus, on the original charge as for 'hatred of the human race," which probably means general disaffection to the imperial system and rejection of the state cults. This persecution was probably brief and local, but the precedent remained that determined profession of Christianity was punishable, the situation reflected for instance in 1 Peter.

A conspiracy against the emperor's life failed in A.D. 65; the effect on Nero's mind led to a reign of terror against the Roman aristocracy and its intellectual leaders. Misgovernment in Judaea led to the Jewish revolt in A.D. 66, the bloody suppression of which by Vespasian (q.v.) and Titus (q.v.) extinguished the Jewish commonwealth. In A.D. 68 the revolt of Vindex in Gaul was the prelude to Nero's overthrow and suicide; his life of ease and luxury had weakened a nature never inured to hardship. Not long after his death the rumour arose in the East, which had generally seen only his best side, that he had come to life, or had not really died, and would return. Several 'false Neros' arose to disturb the public peace. His eastern wars, and this *Nero redivivus* story, may provide some of the imagery of Revelation (cf Rev 13[12] 16[12]).

Tradition reports, probably correctly, that Peter and Paul suffered martyrdom at Rome under Nero (though probably not in the persecution of A.D. 64). Of the earlier trial of St. Paul we know nothing certain. His 'appeal to Caesar' was probably heard either before a committee of the emperor's privy council, or before his deputy, the prefect of the city. A. So.—E. R. H.

NEST (*qēn*).—Used literally of birds' nests (Dt 22[6] 32[11], Job 39[27], Ps 84[3] 104[17], Pr 27[8], Is 16[2]); metaphorically for a lofty fortress (Nu 24[21], Jer 49[16], Ob [4], Hab 2[9]); Job refers to his lost home as a nest (29[18]); in Gn 6[14] the '**rooms**' of the Ark are (see RVm) literally 'nests' (*qinnîm*). In Mt 8[20], Lk 9[58] our Lord contrasts His wandering, homeless life with that of the birds which have their 'nests' (*kataskēnōseis*, RVm 'lodging-places'). E. W. G. M.

NETAIM.—A place situated probably in the lowland of Judah, 1 Ch 4[23] (RV, RSV). The site is unknown. See GEDERAH.

NETHANEEL.—The AV spelling of Nethanel in all OT passages.

NETHANEL.—**1.** The leader of Issachar, Nu 1[8] 2[5] 7[18, 23] 10[15]. **2.** One of David's brothers, 1 Ch 2[14]. **3.** A priest in the time of David, 1 Ch 15[24]. **4.** A Levite, 1 Ch 24[6]. **5.** One of Obed-edom's sons, 1 Ch 26[4]. **6.** A 'prince' sent by Jehoshaphat to teach in the cities of Judah, 2 Ch 17[7]. **7.** A chief of the Levites under Josiah, 2 Ch 35[9], 1 Es 1[9] (AV, RV **Nathanael**). **8.** A priest who had married a foreign wife, Ezr 10[22]; called **Nathanael** in 1 Es 9[22]. **9.** A priest in the time of Joiakim, Neh 12[21]. **10.** A Levite musician, Neh 12[36].

NETHANIAH.—**1.** The father of Ishmael the murderer of Gedaliah, 2 K 25[23, 25], Jer 40[8, 14] etc. **2.** An Asaphite, 1 Ch 25[2, 12]. **3.** A Levite, 2 Ch 17[8]. **4.** The father of Jehudi, Jer 36[14]. **5.** One who had married a foreign wife, 1 Es 9[34] (AV, RV **Nathanias**); corresponding to **Nathan, 5,** in Ezr 10[39].

NETHINIM.—The word is a late form of a passive participle *nᵉthûnîm*, and denotes 'men who are *given*.' In early days, when sacrifices were offered in the open air, there was little difficulty occasioned by the odour and dirt arising from the blood, fat, and ashes. But when they were offered within the walls of a temple, and offered with great frequency and with large numbers of victims, some very disagreeable drudgery was always necessary. The chopping of wood, lighting of fires, sharpening of knives, drawing of water, the cleansing not only of the altar and its surroundings and utensils,

but of the whole of the Temple precincts, and the performance of many menial offices for the priests, required a large staff of servants. The analogy of other lands suggests that these offices would be performed by slaves, procured either by purchase or capture. The Greeks had *hierodouloi*, 'temple slaves,' and the Mohammedans at Mecca similarly. It is not known at what date the practice arose in Israel; but there seem to have been three stages in the history of Temple servants. (1) They were slaves in the strict sense; (2) they were admitted to Israelite privileges, being circumcised, and treated as free men holding an official position in the Church; (3) they rose in standing and prestige so as to become practically equivalent to the Levites.

1. The name *Nethinim* is not used before the Exile. Ezr 8^{20} speaks of the Nethinim as those 'whom David and the princes had *given* for the service of the Levites, which shows, at least, that common belief traced their origin back to David. A very similar class of persons, 'the children of **Solomon's servants,**' is mentioned in Ezr $2^{55, 58}$, Neh $7^{57, 60}$ 11^{3}; their descent was evidently traced to the non-Israelite slaves employed by Solomon in connexion with his buildings, some of whom must have laboured in the new royal sanctuary (cf 1 K 9^{19-21}). This employment of foreign slaves in the Temple continued till the beginning of the Exile (Ezk 44^{6f}).

2. A change in the status of these men was brought about by the Exile. When the people were far from their land, every one who had held any sort of position in the Temple must have gained a certain prestige. The former Temple-slaves seemed to have formed themselves into a guild. By the very fact of their exile, they were freed from their slavery to the Temple, and thus when they and their sons returned to Jerusalem, they returned as free men, who were recognized as part of the nation. As a guild, they acquired for themselves the title Nethinim, owing to their traditional origin. In Ezr $2^{43-58, 70}$ = Neh $7^{46-56, 73}$ are given the names of the Nethinim who are reported to have returned with Zerubbabel; and they are mentioned together with priests, Levites, singers, and porters. Some of the names in the list are undoubtedly of foreign origin. Again, Ezra relates (8^{20}) that on his return, 220 Nethinim from Casiphia accompanied him. After a time we find them so completely established as a sacred official class that privileges are accorded to them. They shared with priests, Levites, singers, and porters, immunity from taxation (Ezr 7^{24}). They lived in a special quarter of the city, named Ophel, *i.e.* the southern and eastern slope of the Temple hill, or more particularly that part of it which reached to the **Water-gate** on the east and to the tower projecting from the royal palace (Neh 3^{26}). They were thus near the Temple, and Bishop Ryle (*Ezra*, etc., p. lviii) points out the appropriateness of assigning to 'drawers of water' the position by the Water-gate, which communicated with the Virgin's Spring. And v.^{31} mentions 'the house of the Nethinim,' which must have been an official building used by them during their periods of duty. They were under the command of two chiefs—of whom one, at least, was a member of their own body—Ziba and Gishpa (Neh 11^{21}); the former is the first in the list, in Ezr 2^{73} = Neh 7^{46}, and Gishpa may possibly be the same as Hasupha, the second name. Further, only a portion of them, like the priests, Levites, singers, and porters, dwelt in Jerusalem; the others 'dwelt in their cities' (Ezr 2^{70} = Neh 7^{73}, 1 Ch 9^{2}). And so far were they from being regarded as foreign slaves, that they joined, as full members of the community, in the oath that they would not (among other things) allow their sons and daughters to marry any but Israelites (Neh 10^{28-30}).

3. From this point the Nethinim gradually rose in official position, until they were indistinguishable from the Levites. In 1 Ch 23^{28} the Levites are spoken of in such a way as to suggest that the term included all Temple-servants. And conversely, since singers and doorkeepers (who are quite distinct from Levites in Ezra–Nehemiah) were explicitly reckoned by the Chronicler as Levites (1 Ch 15^{16} 26^{1-19}), it is probable that the same was the case with the Nethinim. Finally, in 1 Es 1^{3} the Levites, and in $8^{22, 48}$ the Nethinim, are described by the same term, *hierodouloi*. A. H. McN.

NETOPHAH.—A town, the name of which first occurs in the list of the exiles who returned under Zerubbabel, Ezr 2^{22}, Neh 7^{26}, 1 Es 5^{18} (RV **Netophas**). It is possibly modern *Kh. Bedd Fālûḥ*, near *ʿAin en-Nāṭûf*, which preserves the old name. The gentilic **Netophathite** occurs in 2 K 25^{23}, 1 Ch 9^{16}, Jer 40^{8}.

NETOPHAS, 1 Es 5^{18} (RV).—See NETOPHAH.

NETS were used in taking wild animals (see HUNTING), and birds (see SNARES); but their main use has always been in **fishing.** Fish were taken along the Mediterranean coast with 'line and hook' (Job 41^{1}, Is 19^{8}, Am 4^{2}), and the 'fish-spear' or 'harpoon' (Job 41^{7}). But sufficient quantities for commercial purposes could be obtained only by means of nets. (*a*) Heb. *mikhmār* (Is 51^{20}) and *makhmōr* (Ps 141^{10}) and the feminine forms *mikhmōreth* (Is 19^{8}) and *mikhmereth* (Hab 1^{15f}) is probably = Greek *sagēnē* (Mt 13^{47}), the Arabic *jarf*, '**drawnet.**' It is as much as 400 metres long, 20 feet deep, and of fine mesh, so that it sweeps everything before it. From the stern of a boat it is paid out in a great semicircle, the lower edge carried down by lead sinkers, the upper sustained by cork floats. It is then drawn ashore, with its contents, by ropes attached to the ends. Fishermen swim behind, diving to ease it over stones and other obstructions. This would account for Peter's being stripped (Jn 21^{7}). (*b*) Hebrew *ḥērem* (Ezk 26^{5}, Hab 1^{15} etc.), Greek *amphiblēstron* (Mt 4^{18}, Mk 1^{16} *v.l.*), the modern *shabakeh*, '**cast-net.**' It is circular, of close mesh, with a cord attached to the centre. The fisherman gathers it together, arranges it on his arm and shoulder, and moves or wades stealthily along the shore until he sees signs of fish within reach; then, with a skilful cast, the net flies out and drops full circle on the water; lead beads round the circumference carry it to the bottom, enclosing the fish, which are then secured at leisure. (*c*) A fishing-net which is used to-day consists of three nets strung on a single rope, the two outer being of wide, the inner of close, mesh. It is let down in fairly deep water, parallel with the shore. The fish pass through the outer net, pushing the inner before them through the wide meshes on the other side, thus being entangled. The net is pulled up and emptied into the boats. (*d*) Greek *diktyon* (Mt 4^{20} etc.) is a term used for nets in general. In the LXX *amphiblēstron* and *sagēnē* are used indiscriminately as translated alike of *ḥērem* and *mikhmār*, etc.

Fishing, which is being developed by the Israeli Government, is still an important industry on the Sea of Galilee, En Gev on the east shore of the lake being a noted centre. W. E.—E. T. R.

NETTLE.—1. Hebrew *ḥārûl*, Job 30^{7}, Pr 24^{31}, Zeph 2^{9}. Probably a generic name for thorn bushes growing in the wilderness, such as the *Zizyphus* and varieties of acacia. **2.** Hebrew *ḳimmoś*, Is 34^{13}, Hos 9^{6}, and *ḳimmᵉśônîm*, Pr 24^{31} (EV **thorns**). These words all refer probably to nettles, which are abundant in deserted places in Palestine. E. W. G. M.

NETWORK.—1. Hebrew *maʿᵃśeh resheth* in Ex 27^{4} 38^{4} describes the bronze grating of the altar in the Tabernacle. **2.** Hebrew *śᵉbhākhāh* describes the ornamentation of parts of the pillars which Solomon set up in the Temple (1 K $7^{18, 20, 41f}$, Jer 52^{22f}). **3.** Hebrew *ḥôray* is rendered 'networks' in AV in Is 19^{9}. The root meaning of the word is 'to be white,' however, and RSV renders 'white cotton' (cf AVm 'white works,' RV 'white cloth'); LXX has *byssos*.

NEW BIRTH.—See REGENERATION.

NEW ENGLISH BIBLE.—See ENGLISH VERSIONS, **38.**

NEW GATE.—See JERUSALEM, GATES OF.

NEW MOON.—See FEASTS, **2,** and MOON.

NEW TESTAMENT.—See BIBLE, CANON OF NT; TEXT OF NT.

NEZIAH.—The name of a family of Nethinim, Ezr 2[54], Neh 7[56], 1 Es 5[32] (AV Nasith, RV Nasi).

NEZIB.—A town in the lowland of Judah, Jos 15[43]. It is probably modern *Kh. Beit Naṣîb*.

NIBHAZ.—An idol of the Avvites, 2 K 17[31]. But the text is perhaps corrupt.

NIBSHAN.—A city in the desert of Judah, Jos 15[62]. The site is unknown.

NICANOR.—**1.** Son of Patroclus, a Syrian general who was engaged in the Jewish wars (1 Mac 3[38]). He was sent by Lysias in 166 B.C. against Judas Maccabaeus, but was defeated. Five years later he was sent on the same errand by Demetrius; this time he endeavoured to win by strategy what he had failed to gain by force. Again he was compelled to fight, and was twice defeated, once at Capharsalama (1 Mac 7[26–32]), and again at Adasa, where he lost his life (vv.[39–50]). The day of his death was ordained to be kept as a festival as '**Nicanor's Day.**' The account in 2 Mac (especially 14[12–30]) differs in several details. **2.** One of the 'Seven' (Ac 6[5]).

T. A. M.

NICODEMUS.—Nicodemus is mentioned only in the Gospel of John. There he appears as a Pharisee and a member of the Sanhedrin (Jn 3[1] 7[40]) and is addressed by Jesus as 'the teacher of Israel' (Jn 3[10]). He was perhaps an old man (Jn 3[4]) and evidently rich (Jn 19[39]). He figures three times in the Gospel: once in a discussion with Jesus about baptism (Jn 3[1–21]), a second time in a discussion with other Pharisees in which he attempts to soften their hostility towards Jesus (Jn 7[45–52]), and finally in the burial scene after the crucifixion (Jn 19[38–42]).

The name Nicodemus was frequently used by both Jews and Gentiles. The connexion which has sometimes been found between the Nicodemus of John and the Nicodemus of the Talmud is very tenuous.

The location of his place of origin, if Arimathea (Jn 19[38]), is unknown. W. R. S.

NICOLAITANS.—See next article.

NICOLAS.—AV and RV for **Nicolaus** (q.v.).

NICOLAUS.—Among the 'Seven' (Ac 6[1ff]) was 'a proselyte of Antioch,' Nicolaus; probably the other six were of Jewish birth. Nicolaus was circumcised; uncircumcised Gentiles first became members of a Christian community later on at Antioch. In Rev 2[6, 15] the members of a sect seem to be called 'Nicolaitans.' Irenaeus and Hippolytus assert that Nicolas (or Nicolaus) had founded it. But that was only a guess. Possibly the sect claimed to have been founded by him. E. H.

NICOPOLIS, or the 'city of victory,' was founded by Augustus in 31 B.C., on the spot where he had had his camp before the battle of Actium. It was made a Roman colony, and was peopled by citizens drawn from various places in Acarnania and Aetolia.

In Tit 3[12] St. Paul writes, 'Do your best to come to me at Nicopolis, for I have decided to spend the winter there.' It may be taken as certain that this means Nicopolis in Epirus, from which doubtless Paul hoped to begin the evangelization of that province. No other city of the name was in such a position, or so important as to claim six months of the Apostle's time.

The importance of Nicopolis depended partly on the 'Actian games,' partly on some commerce and fisheries. It was destroyed by the Goths, and, though restored by Justinian, it was supplanted in the Middle Ages by Prevesa, which grew up a little farther south. There are extensive ruins on its site. A. E. H.

NIGER.—The second name of **Symeon,** one of the prophets and teachers of the Church of Antioch (Ac 13[1]). His name Symeon shows his Jewish origin, and Niger was probably the Gentile name which he assumed. Nothing further is known of him. M. St.

NIGHT.—See TIME.

NIGHT HAG, Is 34[14] (RSV).—See OWL and LILITH.

NIGHT HAWK.—Lv 11[16], Dt 14[15] (EV); see OWL.

NIGHT MONSTER, Is 34[14] (RV).—See OWL and LILITH.

NILE.—The Greek name of the river, of uncertain derivation. The Egyptian name was *Ḥapi*, later *i(t)rw-ʿ*[3] (Copt. *yero*), 'Great River,' but the Hebrew generally designates the Nile by the term *yᵉʾōr*, derived from the ordinary Egyptian word for 'river,' *i(t)rw* (Copt. *yoor*). The word *shîḥôr* (Is 23[3], Jer 2[18]) is also employed, a derivative of Egyptian (*pȝ*) *š-Ḥr*, 'the lake of Horus,' which designates an eastern arm of the Nile.

Rich in fish, it was the home of the crocodile and hippopotamus. It bore most of the internal traffic of Egypt; but it was pre-eminently the one source of water, and so of life and fertility, in a land which, without it, would have been desert. The White Nile sends down from the Central African lakes a steady stream, which is greatly increased in summer and autumn, when the half-dry beds of the *Baḥr el-Azraq* and the *ʿAtbarah* are filled by the torrential rains annually poured on the mountains of Abyssinia. The waters of these tributaries are charged with organic matter washed down by the floods, and this is spread over the fields of Egypt by the inundation.

The height of the Nile rise was measured and recorded by the Egyptians from the earliest times: on it depended almost wholly the harvest of the year, and a great excess might be as harmful as a deficiency. The rise begins about June 19, and after increasing slowly for a month the river gains rapidly until September; at the end of September it becomes stationary, but rises again, reaching its highest level about the middle of October. This annual inundation is referred to in Am 8[8] 9[5]. The crops were sown as the water retreated, and on the lower ground a second crop was obtained by artificial irrigation. Canals and embankments regulated the waters in ancient times. The water was raised for the irrigation of the fields by *shadûfs*, i.e. buckets hung from the end of dipping poles, and handscoops, and carried by small channels which could be opened or stopped with a little mud and cut herbage: by this means the flow was directed to particular fields or parts of fields as might be required. Water-wheels were probably introduced in Greek times.

The Nile had seven mouths, of which the western (the Canopic) and the eastern (the Pelusiac) were the most important. The former secured most of the traffic with Greece and the islands, the latter with the Phoenicians. The Pelusiac arm, on which Tahpanhes and Pi-beseth lay, would be best known to the inhabitants of Palestine. Now the ancient mouths are silted up: only a western (Rosetta branch) and a central one (Damietta branch) survive. The worship of the Nile-god must have been prominent in popular festivals, but has not left much monumental trace.

The Egyptians, knowing nothing of the sources of the Nile, regarded it as gushing out from two springs at the First Cataract, fed by the subterranean waters. They also thought of rain as the result of a Nile in heaven pouring its waters down upon earth. The 'seven lean years' in Gn 41 are paralleled by an Egyptian tradition from the Ptolemaic period of a much earlier seven years' famine under the 3rd Dynasty, and years of famine due to insufficient rise of the Nile are referred to in more than one hieroglyphic text. F. Ll. G.—R. J. W.

NIMRAH.—See BETH-NIMRAH.

NIMRIM, THE WATERS OF.—These are mentioned in Is 15[6], Jer 48[34], along with Zoar and Horonaim. They must therefore be sought in the S. of Moab. The *Onomasticon* places it ('Nemerim') to the N. of Zoar. It is probably modern *Wâdī Numeirah*, near the S. end of the Dead Sea.

NIMROD (Gn 10[8–12], 1 Ch 1[10], Mic 5[6]).—A legendary personage, described in Gn 10[8ff] as the first of the 'mighty men,' 'a mighty hunter before the Lord,' the

ruler of four ancient Babylonian cities, and the founder of the Assyrian Empire. In the statement that he was begotten by Cush we have probably a reference to the *Kasshu* who conquered Babylonia about the 17th cent. B.C., and set up a dynasty that lasted about 600 years; the rise of Assyria dated from the decline of Babylonia under the later Kassite kings. The name Nimrod is almost certainly a corruption of Ninurta. Probably Tukulti-Ninurta I. (the Greek *Ninos*), king of Assyria, is meant. Much less likely is Nazimaruttash, king of Babylonia. The combination in Assyrian kings of warlike prowess with a passion for the chase is illustrated by the numerous war and hunting scenes sculptured on the monuments; and it may well be imagined that to the Hebrew mind Nimrod became an ideal personation of the proud monarchs who ruled the mighty empires on the Euphrates and the Tigris. J. S.—C. J. M. W.

NIMSHI.—Grandfather of king Jehu, 1 K 9[16], 2 K 9[2, 14, 20], 2 Ch 22[7].

NINEVEH (Assyr. *Ninā*, *Ninūa*) is said in Gn 10[11] to have been founded by Nimrod in Assyria. There was a village here in the 5th millennium B.C. At the close of the 3rd millennium kings of Ur dominated Urbilum (*i.e.* Arbela) and probably Nineveh. Nineveh was included in the dominions of Hammurabi, who restored the temple of Ishtar there. It was early an important city, and is frequently referred to in the royal inscriptions, but Sennacherib first raised it to the position of capital of Assyria. It lay on the E. of the Tigris, opposite the modern Mosul. Its chief remains are buried beneath the mounds of Kuyunjik and Nebī Yūnus, but the outline of the old walls can be traced. They enclosed some 1800 acres, with a circumference of about 8 miles. The mound of Kuyunjik is separated from the mound of Nebī Yūnus by the Khoser, and overlies the palaces of Sennacherib to the N., and Ashurbanipal to the S. The southern mound, Nebī Yūnus, covers palaces of Sennacherib and Esarhaddon. The Nineveh of Sennacherib's day lay largely outside this area, and included the *Rebit Ninūa*, or Rehoboth-ir, which extended as far as Khorsabad, where Sargon built a great city, Dur-Sharrukin. The traditions of its great size may be due to a reminiscence of this outer girdle of inhabited country. The fall of Nineveh (612 B.C.) is referred to by Nahum and Zephaniah (2[13–15]). 2 K 19[36] and Is 37[37] know it as the city of Sennacherib. For Jonah's mission, see JONAH. Later, Tobit (1[10, 17] etc.) and Judith (1[1]) refer to it, and the **Ninevites** are named in Mt 12[41], Lk 11[30, 32]. C. H. W. J.—T. F.

NIPHIS, 1 Es 5[21] (RV).—See MAGBISH.

NISAN.—See TIME.

NISROCH.—An Assyrian deity in whose temple Sennacherib was worshipping when assassinated, 2 K 19[37], Is 37[38]. It is difficult to identify this god, and various suggestions have been made. Gesenius compared the name with the Arabic *nisr* ('eagle'), and conjectured that it referred to one of the eagle-headed divinities that appear in the bas-reliefs. Others have thought of Marduk, the god of Babylon, and Montgomery (see *ICC*, *ad loc.*) thinks this is the most probable. Against the objection that this is incongruous, since Sennacherib was the enemy of Babylon, Montgomery cites the Nabonidus inscription which says that the Assyrian king 'took the hand of Marduk, and brought him to Assyria,' and notes that Esarhaddon styles himself 'worshipper of Nabu and Marduk.' The most favoured identification is with Nusku, the god of light and fire, associated particularly with the moon god, and Sin, who was worshipped at Harran. Here the objection that Nusku did not occupy a sufficiently prominent place in the Assyrian pantheon is beside the point. Assyrian kings doubtless went to the temples of many gods, and the assassins would not be concerned with the importance of the deity in whose temple they carried out the murder.

NITRE, in its modern usage, denotes *saltpetre*, nitrate of potash, but the *nitron* or *nitrum* of the ancients was a different substance, *natron*, carbonate of soda. 'Nitre' occurs twice in AV. In Pr 25[20] the effect of songs on a heavy heart is compared to the action of vinegar upon 'nitre' (AV, RV; RVm 'soda'; RSV 'a wound,' on the basis of Greek). Vinegar has no effect upon saltpetre, but with carbonate of soda it produces effervescence. In Jer 2[22] 'nitre' (RV, RSV lye) is referred to as a cleansing agent. Here, again, natron rather than the modern nitre suits the connexion.

NO (Jer 46[25], Ezk 30[14–16]).—The name of **Thebes** (Diospolis Magna), Egyptian *niw.t*, 'city,' *i.e.* the city *par excellence*; also **No-Amon** (Nah 3[8]), 'the city of Amon.' Nahum seems to imagine Thebes as resembling the cities of the less remote Delta surrounded by canals, which were their chief protection. In reality it lay on both banks of the Nile, with desert bounding it on either side, and water probably played little part in its defence. Thebes was of no importance until the Middle Kingdom Dynasties 11–12), during which the royal families were much connected with it. It was the capital of the local 17th Dynasty, struggling against the Hyksos (q.v.) in the name of its god Amon. The great warriors of the succeeding 18th Dynasty enriched Thebes with the spoils of conquest, built temples there that surpassed all others in size and magnificence, and made it the greatest city of the Empire. Under the 19th and 20th Dynasties Amon was still the national god, and Thebes the capital of Egypt. Later, Memphis again took the first place, but Thebes was at least the religious centre of the widespread Amon worship, and the temples retained much of their wealth until the sack of the city by king Ashurbanipal (*c* 664 B.C.), referred to in Nah 3[8].

The temples of Thebes continued to be added to until insurrections under the Ptolemies led to its destruction and final abandonment as a city. In Jer 46[25] (RSV) 'I am bringing punishment upon Amon of Thebes (No), and Pharaoh, and Egypt and her gods and her kings,' Amon is probably not taken as the representative god of Egypt, a position which he no longer held in the 6th cent. B.C.: the passage rather indicates the completeness of Egypt's fall by the punishment of the remote Thebes, which could not be accomplished till Lower Egypt was prostrate. The Theban Amon was often entitled 'Amon-Rē, king of the gods,' being identified with the sun-god Rē. His figure is that of a man, generally coloured green. The ram was his sacred animal. In Ethiopia he was adopted as the national god, and his worship was established in the Oases, especially in the Oasis of Amon (Siwa), where his oracle was visited by Alexander. See Sir A. H. Gardiner, *Ancient Egyptian Onomastica* (1947), ii. 24*–26*.

F. Ll. G.—R. J. W.

NOADIAH.—1. A Levite in the time of Ezra, Ezr 8[33]; called **Moeth** in 1 Es 8[63]. **2.** A prophetess who opposed Nehemiah, Neh 6[14].

NOAH.—1. *Nōaḥ*, 'rest.' The name is explained in Gn 5[29] by a play on *niḥam*, 'to comfort'; but perhaps the reading supported by the LXX should be adopted, 'This same shall *give us rest*.' In one tradition Noah is the hero of the Flood, and answers to **Ut-napishtim** in the Babylon legend. See DELUGE. Ut-napishtim was translated to immortality; and this is perhaps referred to in 6[9b] (cf 5[24] and see ENOCH). In another tradition he is the discoverer of the art of making wine (9[20–27]). Elsewhere in the Bible, besides the references to the Flood, Noah is mentioned in 1 Ch 1[4], Ezk 14[14, 20], Lk 3[36]. **2.** *Nō'āh* (Nu 26[33] 27[1] 36[11], Jos 17[3]). One of the daughters of Zelophehad, of the tribe of Manasseh. They claimed their father's inheritance because he had died leaving no sons. It was given to them, on condition that they were not married into another tribe.

A. H. McN.

NO-AMON.—See No.

NOB.—A place of this name is mentioned in three passages—1 S 21, 22, Neh 11[33], Is 10[32] (text not quite certain). The context in the two latter passages points

to a place near Jerusalem. In 1 Samuel, David passes Nob, which has become 'the city of priests' after the destruction of Shiloh, on his way from Saul (in Gibeah, q.v.) to Gath: this would suit a site near Jerusalem, though it does not demand such a position, unless, indeed, we infer (cf 1 S 20[6]) that David went to Nob with the intention of proceeding to Bethlehem (5 miles S. of Jerusalem). There is no strong reason against assuming that in all three passages the same place is referred to. In Neh 11[33] and Is 10[32] Nob is closely connected with Anathoth, 2½ miles N. of Jerusalem. Since in Is 10[32] Nob is the last point reached by the Assyrian army and the place from which it threatens Jerusalem, the site is best sought for on an eminence a little N. of the city, perhaps in particular (with S. R. Driver) on 'the Râs el-Meshârif, about 1½ miles SW. of Anathoth, the ridge from the brow of which the pilgrim along the north road still catches his first view of the holy city.' Specifically we may locate Nob at *Râs Umm eṭ-Ṭala'*, on the E. slopes of Mount Scopus N. of the Mount of Olives (*Jebel eṭ-Ṭûr*). The name has not survived; and the identification suggested stands or falls with the correctness of the Hebrew text of Is 10[32].

G. B. G.—D. N. F.

NOBAH.—1. The clan name of the Israelites who conquered the city of Kenath (q.v.), Nu 32[42]. **2.** A place named with Jogbehah in the account of Gideon's pursuit of Zebah and Zalmunna, Jg 8[11]. It was near Jogbehah (q.v.), but its exact location is unknown.

NOBAI, Neh 10[19] (RV).—See NEBAI, NEBO, **3.**

NOD.—According to Gn 4[16], the country in which Cain the fratricide took up his abode after his sentence of banishment. The place is unknown. It is probably connected in some way etymologically with the epithet *nādh* of v.[14] ('wanderer'). The addition 'eastward of Eden' is of little help for its location. J. F. McC.

NODAB.—The name of a tribe mentioned in 1 Ch 5[19], along with Naphish and Jetur, as among the foes encountered and subdued by the Reubenites. A comparison with the various readings of LXX shows that the vowels of the word are uncertain. An identification with the Nabataeans is excluded both on phonological grounds and by the fact that the latter, whose position was in any case too remote from Reuben, did not appear in history till long after the tribal period of the Hebrews had come to an end. The location of the tribe is unknown. J. F. McC.

NOE.—AV form of **Noah, 1** (q.v.) in Mt 24[37], Lk 3[36] 17[26f].

NOEBA, 1 Es 5[31] (AV, RV).—See NEKODA, **1.**

NOGAH.—One of David's sons, born at Jerusalem, 1 Ch 3[7] 14[6].

NOHAH.—1. A place mentioned in Jg 20[43] (AVm **Menuchah,** RVm **Menuhah**); possibly the same as **Manahath, 1** (q.v.), or possibly connected with **2. 2.** A Benjamite clan, 1 Ch 8[2].

NOISOME.—'Noisome' is literally 'annoy-some.' The adjective means 'offensive,' 'injurious' in AV and RV (Ps 91[3], Ezk 14[15, 21], Rev 16[2]); the word is now rather rarely used, but when it is used it means 'loathsome' rather than 'hurtful.' RSV substitutes 'deadly,' 'wild,' 'evil,' and 'foul' in the passages noted.

NON, 1 Ch 7[27] (AV) = **Nun** (q.v.).

NOOMA, 1 Es 9[35] (RV).—See NEBO, **3.**

NOPH.—See MEMPHIS.

NOPHAH.—An unknown place mentioned in MT in Nu 21[30] (so AV, RV). The text is very uncertain, and for 'Nophah which' RSV has 'fire spread.'

NORTH COUNTRY, LAND OF THE NORTH.—A phrase of somewhat vague application, but denoting in a general fashion—**1.** The source or region from which dangerous foes were to come upon Palestine (so in Jer 6[22] 10[22], Zec 6[6, 8]). **2.** The regions to which the people of Israel or Judah had been exiled, and whence they were to be restored (so in Jer 3[18] 16[15] 23[8] 31[8], Zec 2[6]). **3.** Northern Syria (so Jer 46[10]). The last-named instance explains itself. The other applications of the term may be further illustrated by the usage of the word 'north' generally in OT. Here it is sufficient to recall the general fact that, while in the early history of Israel the land was invaded by many small peoples from the east and south, after the rise of the Assyrian and Chaldaean powers the attacks were made by larger armies which came in the course of their march down through Syria or the Mediterranean coast-land, the eastern desert route being impossible. Deportations of captives were naturally effected by the same routes, and by the same routes they would return. Thus, though Babylonia was in the same latitude as Palestine, it was included among the countries of the 'north.'

J. F. McC.

NORTHEASTER.—See EURAQUILO.

NOSE, NOSTRILS.—Hebrew *'aph*, dual *'appayim*, is the usual word; *nᵉḥîrayim* dual, only in Job 41[20]; *naḥar* only in Job 39[20] AV (RV, RSV correctly 'snorting').—To have a flat (AV), or more probably slit (RV), nose (Lv 21[18]; the word 'nose' is not here expressed in the text, and RV renders 'a mutilated face'), disqualified a man for the making of offerings. The nose is the organ of the breath by which men live (Gn 2[7] etc.). The breath is easily stopped or expelled, hence the fact signifies the transiency of human life (Is 2[22]). Excited breathing, with distention of the nostrils when moved by indignation, led to the nose being used figuratively for anger (Gn 27[45], and very often). Ezk 8[17] refers to the custom of putting a twig to the nose, apparently in idolatrous worship, the significance of which is now obscure. For 'nose-ring,' see ORNAMENTS, **2.** W. E.

NOUGHT.—See NAUGHT: and notice, further, the phrase 'set at nought,' Ps 1[25] (AV, RV; RSV 'ignore'), Mk 9[12] (AV, RV; RSV 'treat with contempt'). 'To set' is 'to value' and 'nought' is 'nothing,' so the phrase means to reckon of no value.

NOVICE.—In 1 Ti 3[6] it is enjoined that the bishop must not be a 'recent convert' (AV 'novice'). The Greek word (*neophytos*, literally 'newly planted') was afterwards used in the technical sense of one who has not yet taken religious vows. Here it is general—one newly introduced into the Christian community.

NUMBER.—1. Notation.—The decimal scale of notation was used by the Israelites, Assyrians, Babylonians, Egyptians, Greeks, Romans, and, so far as we know, by the other nations mentioned in the Bible, *i.e.* they reckoned by units, tens, hundreds, etc.

2. Variety and range of numerical terminology.—The Hebrew language expressed the integers from one to any amount by words denoting units, tens, a hundred, two hundred, a thousand, two thousand, ten thousand, twenty thousand, and by combinations of these words. Thus the highest number expressed by a single word is twenty thousand, the word used meaning double ten thousand. The word 'millions' in AV of Gn 24[60] is a mistranslation; it should be 'ten thousands' as in RV and RSV. The number referred to in this verse, 'thousands of ten thousands,' for the descendants hoped for from Rebekah, and the number of the angels in Dn 7[10], a 'thousand thousands served him, and ten thousand times ten thousand stood before him' (cf Rev 5[11]), if taken literally, would be the largest numbers mentioned in the Bible, but they are merely rhetorical phrases for countless, indefinitely large numbers. In Rev 7[9] the redeemed are 'a great multitude which no man could number' (cf Gn 13[16])—the nearest approach which the Bible makes to the mathematical idea of infinity.

The largest literal number in the Bible is the number of Israelites fit for warlike service, ascertained by David's census as 1,100,000, in addition to the men of Judah 470,000 (1 Ch 21[5]). In 2 S 24[9], however, the numbers are 800,000 and 500,000 respectively. Close to this comes the army of Zerah (2 Ch 14[9]), 'a thousand thousand,' *i.e.* 1,000,000; and in 2 Ch 17[12n], Jehoshaphat

has an army in five divisions, of 300,000, 280,000, 200,000, 200,000, 180,000 respectively. The number of fighting men amongst the Israelites is given in Nu 2^{32} as 603,550; and later on in Nu 26^{51} as 601,730.

Hebrew also possessed a few special forms for the ordinals, first, second, etc., and to denote 'seven times,' etc.; in other cases, especially for the higher numbers, the cardinals are used. There are also a few words for fractions, 'a third,' 'a quarter.'

The Biblical Greek calls for no special comment; the writers had at their disposal the ordinary resources of Hellenistic Greek. We may, however, call attention to the disputed rendering in Mt 18^{22}, where RV and RSV have 'seventy times seven,' RVm 'seventy times and seven,' RSVm 'seventy-seven times.'

3. Symbols.—In the Hebrew text of the OT, and also for the most part in the Greek text of the NT, numbers are denoted by words. This method is also the only one used in the two ancient Hebrew inscriptions—the Moabite Stone (rather later than Ahab), and the Siloam inscription (usually ascribed to the time of Hezekiah). As the Assyrians, Egyptians, and Phoenicians used figures as well as words to denote numbers, it is possible that the Israelites also had arithmetical figures; but at present there is no positive evidence of such a usage. In the Elephantine papyri units are denoted by vertical strokes and tens by horizontal.

In later times the Jews used consonants as numerical signs; the units from one to nine were denoted by the first nine letters, the tens from ten to ninety by the next nine, and the hundreds from one hundred to four hundred by the remaining four letters. Other numbers were denoted by combinations of letters. A curious feature of this system is that the natural combination for 15, viz. *Yôdh*=10, *Hê*=5, was not used because '*Yodh, He*,' or *Yah* was a form of the sacred name *Yahweh*, which might not be pronounced; accordingly *Teth*=9 and *Waw*=6 were substituted. This system is still commonly used to number the chapters and verses in Hebrew Bibles. A similar system was also used by the Greeks, and is occasionally found in the NT; thus the Number of the Beast, 666, in Rev 13^{18}, is written by means of three letters.

4. Arithmetic.—There is no evidence of proficiency in arithmetic beyond the simplest operations, but we have examples of addition in connexion with the census in the wilderness, the numbers of the separate tribes being given first and then the total (Nu $1^{22ff.}$ $26^{7ff.}$); subtraction is referred to in Lv 27^{18}; an instance of multiplication is Lv 25^{8}, $7\times7=49$; and Lv 25^{50} implies a kind of rule of three sum.

5. Round Numbers.—As in other languages, 'round numbers,' exact tens, hundreds, thousands, etc., must often have been used by the Israelites, on the understanding that they were only approximately accurate; and in the same way smaller numbers were sometimes used indefinitely for 'a few'; cf our 'half a dozen.' For instance, the exact ten thousands of Jehoshaphat's armies given above are doubtless round numbers. Again, in Lv 26^{8}, 'five of you shall chase a hundred,' merely means, 'a handful of you shall put to flight many times your own number.' This indefinite use of a small number is specially common where two consecutive units are given as alternatives, *e.g.* Is 17^{6}, 'two or three,' 'four or five.' A variety of this idiom is the use of two consecutive units to introduce emphatically the higher of the two; *e.g.* Pr 30^{21} 'Under three things the earth trembles; under four it cannot bear up'; then four things are enumerated. In addition to hundreds and thousands and ten thousands, the most common number used in this approximate way is 'forty': people constantly live or reign for 'forty years' or multiples of forty years. It is a matter of opinion how far the numerous 'sevens,' 'tens,' and 'twelves' were originally intended as exact numbers. Probably, however, in many cases what were originally round numbers were taken afterwards to be exact. For instance, David's reign is given as 40 years, 2 S 5^{4}; in the next verse this period is explained as made up of 7½ years at Hebron and 33 at Jerusalem—an explanation which implies that, apart from some odd months, the 40 years were the actual length of the reign. There are some indications, too, that the various 40's and 80's were added in with other numbers to obtain a continuous chronology. Again, in Nu 3^{39} the census gives 22,000 Levites, which one would naturally understand as a round number; but in vv.$^{43-51}$ it is taken as an exact number, inasmuch as it is ordained that because the 22,273 firstborn exceed the Levites by 273, redemption-money shall be paid for the surplus.

In view of the references to captains of thousands, hundreds, fifties, and tens in Dt 1^{15}, it has been suggested that these terms are sometimes not numerals, but names corresponding to our regiment, company, squad, etc., and denoting bodies of men whose numbers varied. '**Thousand**' especially has been held to be a term denoting 'tribe' or 'clan' (see Jg 6^{15} [cf RVm]; 1 S 10^{19}); so that 'a thousand' might contain comparatively few men. This view has been applied to make the census in the Book of Numbers more credible by reducing the total amounts; but it is clear that the narrative as it stands intends 'thousand' to be a numeral, and does not use the word for a 'clan.'

6. Accuracy of numbers.—Without attempting an exhaustive consideration of the accuracy of numbers as given by the original authors, we may point out that we should not expect a large measure of mathematical accuracy even in original numbers. Often as we have seen, they are apparently given as round numbers. However, in the case of large numbers they would seldom be ascertained by careful enumeration. The numbers of armies—especially hostile armies—of slain, and so forth, would usually be given on a rough estimate; and such estimates are seldom accurate, but for the most part exaggerated. Moreover, primitive historical criticism revelled in constructing hypothetical statistics on the slightest data, or, to put the matter less prosaically, the Oriental imagination loved to play with figures, the larger the better.

But apart from any question as to the accuracy of the original figures, the transmission of the text by repeated copying for hundreds of years introduces a large element of uncertainty. If we assume that numbers were denoted by figures in early times, figures are far more easily altered, omitted, or added than words; but, as we have seen, we have at present no strong ground for such an assumption. But even when words are used, the words denoting numbers in Hebrew are easily confused with each other, as in English. Just as 'eight' and 'eighty' differ only by a single letter; so in Hebrew, especially in the older style of writing, the addition of a single letter would make 'three' into 'thirty,' etc. And, again, in copying numerals the scribe is not kept right by the context as he is with other words. It was quite possible, too, for a scribe to have views of his own as to what was probable in the way of numbers, and to correct what he considered erroneous.

A comparison of the various manuscripts, versions, etc., in which our books have been preserved, shows that numbers are specially subject to alteration, and that in very many cases we are quite uncertain as to what numbers were given in the original text, notably where the numbers are large. Even where the number of a body of men, the length of a period, etc., are given twice over or oftener in different passages of the Bible itself, the numbers are often different; those in Chronicles, for instance, sometimes differ from those in Samuel and Kings, as in the case of David's census mentioned above. Then, as regards manuscripts, etc., we may take one or two striking instances. The chief authorities for the text of the Pentateuch are the Hebrew text in Jewish MSS, the Hebrew text in Samaritan MSS, and the Greek translation, the Septuagint. Now the numbers connected with the ages of the patriarchs are largely different in these three authorities; *e.g.* in the Jewish text Methuselah lives to the age of 969, and is the longest

lived of the patriarchs; in the Samaritan he lives only to be 720, and is surpassed by many of the other patriarchs; and the interval from the Creation to the Flood is 2262 years in the Septuagint, 1656 in the Jewish text, 1307 in the Samaritan text. Again the number of persons on board the ship on which St. Paul was shipwrecked is given in some MSS as 276, and in others as 76 (Ac 27^{37}; cf RSV and RSVm); and similarly the number of the Beast is variously given as 666 and as 616 (Rev 13^{18}; cf RSV and RSVm).

The probability that many mistakes in numbers have been introduced into the Bible by copyists in the course of the transmission of the text has long been admitted. For instance, in the fifth edition of Horne's *Introduction to the Critical Study of Knowledge of the Holy Scriptures*, published in 1825, a thoroughly old-fashioned apologetic work, we are told that 'Chronological differences,' *i.e.* discrepancies, 'do undoubtedly exist in the Scriptures.... Differences in chronology do not imply that the sacred historians were mistaken, but they arise from the mistakes of transcribers or expositors'; and again, 'It is reasonable to make abatements, and not always to insist rigorously on precise numbers, in adjusting the accounts of scriptural chronology' (i, 550 f).

7. Favourite numbers and their symbolism.—Naturally the units, and after them some of the even tens, hundreds, and thousands, were most frequently in use, and came to have special associations and significance, and a fraction would in some measure share the importance of its corresponding unit, *e.g.* where 'four' occurred often we should also expect to meet with a 'fourth.'

One, suggesting the idea of uniqueness, self-sufficiency, and indivisibility, is specially emphasized in relation to the Divine Unity: 'Yahweh our God, Yahweh is one' (Dt 6^{4}); and similarly Eph 4^{5f} 'one Lord, one faith, one baptism, one God and Father'; and other like passages.

Two.—There were two great lights; men frequently had two wives (Lamech, Jacob, Elkanah); two sons (Abraham, Isaac, Joseph); two daughters (Lot, Laban, Saul). Or again, where a man had one wife, there was a natural couple; and so with animals; in one account of the Flood they go in 'two by two.' Two men often went together, *e.g.* Joshua's spies (Jos 2^{1}); and the Twelve and the Seventy went out by twos. The fact that men have two eyes, hands, etc., also gave a special currency to the number. Two objects or animals are often required for ritual purposes (*e.g.* Lv 14^{22}). There were two tables of stone. Similarly, a half would be a familiar fraction; it is most common in 'the half tribe of Manasseh.'

As sets of two were common in nature and in human society, so in a somewhat less degree were sets of three, and in a continuously lessening degree sets of four, five, etc. In each case we shall refer only to striking examples.

Three.—Three is common in periods; *e.g.* David is offered a choice between three days' pestilence, three months' defeat, and three years' famine (1 Ch 21^{12}; 2 S 24^{13} has seven years, cf RSVm); Christ is 'three days and three nights' in the tomb (Mt 12^{40}, cf Jn 2^{19}).

Deities often occur in groups of three, sometimes father, mother, and child: *e.g.* the Egyptian Osiris, Isis, and Horus. There are also the Babylonian triads, *e.g.* Bel, Anu, and Ea. Division into three is common; an attacking army is often divided into three parts, *e.g.* Gideon's (Jg 7^{16}; cf also Rev $8^{10, 12}$).

Four.—The square, as the simplest plane figure, suggests four, and is a common shape for altars, rooms, etc.: hence four corners, pillars, the four winds, the four quarters of the earth, N., S., E., W. Irenaeus argues that there must be four canonical Gospels because there are four cherubim, four winds, and four quarters of the earth.

Five, Ten, and multiples obtain their currency through the habit of reckoning in tens, which again is probably derived from counting on the ten fingers. The fraction tenth is conspicuous as the tithe; and fifth and tenth parts of measures occur in the ritual.

Six, Twelve, and multiples are specially frequent in reference to time: 12 months, and its half, six months, 12 hours, sixth hour, etc., partly in connexion with the 12 signs of the Zodiac, and the approximate division of the solar year into 12 lunar months. It has been suggested that the number 12 for the tribes of Israel was fixed by the Zodiac; in the lists the number 12 is obtained only by omitting Levi or Dan, or by substituting Joseph for Ephraim and Manasseh. When the number 12 was established for the tribes, its currency and that of its multiples were thus further extended; *e.g.* the 12 Apostles, the 144,000 of the Apocalypse, etc.

Seven and multiples.—A specially sacred character is popularly ascribed to the number seven; and although the Bible does not expressly endorse this idea, yet it is supported by the frequent occurrence of the number in the ritual, the sacred seventh day, the Sabbath; the sacred seventh year, the Sabbatical year; the Jubilee year, the year following seven times seven years; the seven-branched candlestick; sevenfold sprinkling (Lv 4^{6} etc.); seven lambs offered (Nu 28^{11ff}); forgiveness till 70 times 7 (Mt 18^{22}); the seven churches of Asia; seven angels; seven stars, etc.; fourteen generations (Mt 1^{17}); 70 descendants of Jacob (Ex 1^{5}); 70 years captivity, etc. (Jer 25^{11}, Dn 9^{2}, Zec 7^{5}); 70 missioners (Lk 10^{1}). A similar use of 'seven' is found in the Egyptian, Assyrian, and Persian religions, and is often derived from astral worship of the seven heavenly bodies, the sun, moon, and the five planets known to the ancients. It is also connected with the seven-day week as roughly a quarter of the lunar month, seven being the nearest integer to the quarter of $29\frac{1}{2}$. The Pleiades also were thought of as seven (cf Am 5^{8}).

Eight.—There were eight persons in the ark; a boy was circumcised on the eighth day. Ezekiel's ritual has a certain predilection for the number eight.

Forty.—This number apparently owes its vogue to the view that 40 was the approximate or perhaps average length of a generation; at least this is a common view. It is a little difficult to reconcile with the well-known Oriental custom of early marriage. The number might perhaps be obtained by taking the average of the years of a man's age at which his children were born, though such an explanation does not appear very probable. Or the use of 40 for a generation might be a relic of the period when the youngest born succeeded to the family tent and *sacra*. At any rate 40 is well established as a moderate round number between 'a few' and 'a very great many.' Thus, in addition to the numerous reigns, oppressions, and deliverances of 40, 80 years etc., Isaac and Esau marry at the age of 40; there are 40 years of the wandering; Ezekiel's 40 years' captivity (29^{11}); 40 days was the period Moses spent in the Mount, Elijah and Christ fasted in the wilderness, etc.

A certain mystical value is attached to numbers in later Jewish and Christian philosophy and superstition, perhaps due partly to the ideas suggested by the relations of numbers to each other, and to the practical power of arithmetic; the symbols which aided men so effectually seemed to have some inherent force of their own. Or, again, if 'seven' is sacred, to pronounce a formula seven times must be more effective than to pronounce it six or eight times.

Great importance is attached to numbers in the mediaeval Jewish mystical system, the *Kabbala*. There are ten *s*ephîrôth* or primary emanations from God, one original *s*ephîrâh*, and three derivative triads; there are twelve channels of Divine grace; 613 commandments, etc.

8. Gematria, a Hebraized form of the Greek *geometria*, used to mean 'reckoning by numbers,' was a late development of which there are traces in the OT. It consisted in indicating a word by means of the number which would be obtained by adding together the numerical values of the consonants of the word. Thus in Gn 14^{14} Abraham has 318 'trained servants,' 318 is the sum of the consonants of the name of Abraham's steward Eliezer in its original Hebrew form. The number is apparently constructed from the name.

The Apocalyptic **number of the Beast** is often explained by Gematria, and 666 has been discovered to be the sum of the numerical values of the letters of some form or other of a large number of names written either in Hebrew, or Greek, or Latin. Thus the Beast has been identified with hundreds of persons, *e.g.* Mohammed, Luther, the Pope, Napoleon I., Napoleon III., etc., each of whom was specially obnoxious to the ingenious identifier. Probably by a little careful manipulation, any name in some form or other, in Hebrew, Greek, or Latin, could be made by *Gematria* to yield 666. The two favourite explanations are *Lateinos*=*Latinus* (the Roman Empire or Emperor), and *Nero Caesar*. The latter has the special advantage that it accounts not only for 666, but also for the variant reading 616 mentioned above; as *Neron Caesar* it gives 666, and as *Nero Caesar*, 616. W. H. Be.

NUMBERS, BOOK OF.—The fourth book of the *Torah*, the first division of the Hebrew Canon. It continues the history of the Israelites from the stay at Sinai till the arrival at the plains of Moab. The name 'Numbers' is due to the repeated numberings in chs. 1, 3, 4, 26. The book is a conflation of two major documents. The older of these is the JE narrative of the journey from Sinai/Horeb to the E. of the Jordan, a continuation of the JE material in Exodus. The other is the post-exilic document known as the priestly code, consisting of laws from various sources fitted into a narrative framework, the continuation of Leviticus. The only deuteronomic material in the book is 21^{33-35} (=Dt 3^{1-3}). Although the narrative of the book begins at Sinai and ends in Moab, the period of the traditional forty years wandering in the desert (14^{33f}) is a blank, the events recorded occurring either in the second (1^{1} 10^{11}), or in the fortieth year (35^{38}) after the exodus. The book consists of three parts: 1^{1}–10^{10}, 10^{11}–21^{9}, 21^{10}–36^{13}.

A. 1^{1}–10^{10}, from P. Ch. 1 records the first census. The reference to this by anticipation in Ex 36^{26} (cf Ex 30^{12}) suggests that it belongs to a stratum of the narrative framework of the post-exilic code older than the supplementary material standing in Ex 35–40 (see LEVITICUS). In the list of the tribes Gad comes third (v.^{24}), the position held by Levi in the tradition preserved in Gn 29^{31}–30^{24}. Levi however had long since ceased to be reckoned as one of the secular tribes when this list was drawn up (cf vv.^{47ff}). The choice of Gad to fill his place may be due to the influence of the tradition of the pre-monarchical twelve-tribe federation. The numbers given, 603,550 adult males in all (v.^{47}; cf Ex 12^{37}), are of course quite artificial; they represent the device used by the post-exilic writer to stress the historical importance of Israel. Vv.$^{47-54}$, explaining the exclusion of the Levites from the census, point ahead to chs. 3 f. Ch. 2 tells how the tribes were arranged in relation to the tent of meeting, both in camp and on the march. The arrangement is based upon the same principle as that in Ezk 48, and reflects the idealistic thinking of the Babylonian Jewish community for whom Israel was more of a theological than an historical entity. 3^{1-13} records the setting apart of the Levites as the servants of the priests, the sons of Aaron. This completely ignores the conception of Deuteronomy in which Levite and priest are synonymous terms, and the representation of Ezk 44 (cf also the comment on ch. 16 below) that the Levites had once been priests, but, with the exception of the family of Zadok, had been degraded to the rank of assistants to the priests because they had lapsed into idolatry. According to Nu 4 they never were priests, and their position as assistants was due not to their having been deposed from the higher office but to the fact that Yahweh had claimed them in lieu of the first-born of Israel which had been consecrated to him on the day he 'slew all the first-born in the land of Egypt' (vv.$^{11-13}$). Vv.$^{14-39}$ record the numbering of the Levites and the positions of the three families, Kohath, Gershom, and Merari, in the camp, to the west, south, and north of the Tabernacle, respectively, Moses, Aaron, and his sons being on the east. The designation of the sanctuary as the Tabernacle in vv.$^{7f, 23-26}$ etc., suggests that this section, unlike Lv 1 and 3 (see LEVITICUS) depends directly upon Ex 25–29, 35–40. Vv.$^{40-51}$ record that a census disclosed that the number of the firstborn males in Israel exceeded that of the Levites by 273, for each of whom a payment of five shekels was required as redemption money. It is impossible to say whether this reflects a claim made by the priesthood at some time subsequent to the composition of vv.$^{14-37}$, or whether it represents an attempt at a quasi-historical realism. Ch. 4 details the transport duties of the three Levitical families to be performed by those between the ages of thirty and fifty (vv.$^{3, 23, 30}$ etc.; contrast 8^{23-26} where the period of service is from twenty-five to fifty). Again, the numbers in chs. 3 f are quite artificial and would seem to be based on nothing more than the writer's imagination. 5^{1-4} commands the exclusion from the camp of three classes of unclean persons (cf Lv 14 f, Nu 19). Vv.$^{5-8}$, requiring restitution for wrong done to another and dealing with cases in which the injured party is dead, would seem to be derived from the same code as Lv 6^{1-9}, to which the summary regarding priestly dues (vv.^{9f}) also belongs. Vv.$^{11-31}$ describe the ordeal of jealousy—obviously an ancient practice—by which a woman suspected by her husband of adultery is compelled to prove her innocence or her guilt. Of importance for an analysis of the post-exilic code are the facts that in this chapter (*a*) the sanctuary is referred to only once and is called the Tabernacle (v.^{17}), not the tent of meeting, and (*b*) there is no mention of Aaron and his sons. In the law of the Nazirite (6^{1-21}), however, also ancient, the reference is to the tent of meeting (vv.$^{10, 13, 18}$; cf Lv 1^{3}), though here again there is no mention of Aaron. But the priest's formula of blessing (vv.$^{22-27}$) is connected with Aaron. This would seem to belong to the narrative framework; it may once have come before Lv 9^{22}. 7^{1-88}, describing the offerings, identical in each case, of the twelve tribal princes, is probably a supplement to this framework. V.^{89} implicitly refers back to Ex 25^{21f}; at the same time it disregards both the distinction in Ex 26^{33} between the holy place and the most holy and the implication of Lv 16 that the most holy was to be entered only by Aaron once a year, on the Day of Atonement—points of importance for the tracing of the development of the P tradition. 8^{1-4}, describing the lamp stand, appears to be a supplement to Lv 24^{1-4}. 8^{5-26}, telling of the purification of the Levites at the beginning of their ministry, scarcely presupposes, and so seems to be earlier than, the account of their numbering in 3^{14}–4^{49}; and vv.$^{16-19}$ repeat the substance of 3^{11-13}. 9^{1-14} records an apparent modification of passover customs in that it permits people who were precluded from keeping the feast on its appointed day because they were ritually unclean through contact with a dead body, or because they were absent from home, to keep it on the fourteenth day of the second month. 9^{15-23} is an anticipatory summary of the way in which the movements of the Israelites were determined by the cloud which hovered over the Tabernacle. It should be noted, however, that the section is not without a certain ambiguity: vv.^{18a} and ^{23} state that the people of Israel would set out and encamp 'at the command of the Lord.' Furthermore, if 10^{1-10}, commanding the making of two silver trumpets, had known anything of the cloud it would presumably have said that the signal to break camp would be sounded when the cloud moved; and vv.$^{11-28}$, recording the first movement of the camp, after mentioning the cloud states that 'they set out for the first time at the command of the Lord by Moses' (v.^{13}); finally there is no further reference to the cloud in the narrative following. It would thus appear that 9^{15-23} belongs to one of the latest strata of the book—an adaptation of an earlier command of which vv.^{18a} and ^{23} alone survive.

B. 10^{11}–21^{9}. 10^{11-36} recounts the departure from Sinai; vv.$^{11-28, 34}$ are derived from the post-exilic

narrative from which the preceding material was taken; to this 11^{35} and 12^{16} also belong. $10^{29-33, 35f}$ come from the older (JE) tradition. Hobab's reply to Moses' request in 10^{31f} has been omitted, doubtless because of the representation of vv.$^{33, 35f}$, derived from another strand of the tradition, that the Ark miraculously guided the Israelites on their journey; it is probable, however, in view of Jg 1^{16}, that Hobab consented to accompany them. Chs. 11 and 12, recording incidents which occurred on the way from Sinai to Kadesh, are also from the older account of Israel's life in the desert. 11^{1-3} is an aetiological fragment accounting for the place-name, Taberah. 11^{4-34} is a fusion of four originally independent traditions: the provision of manna (vv.$^{7-9}$; cf Ex 16); the giving of the quails (vv.$^{4-6, 10-15, 18-23, 31f}$); Kibroth-hattaavah (vv.^{33f}); and the inspiration of the seventy elders (vv.$^{16f, 24-30}$). The first three of these are purely legendary; the fourth was to support the claim of the elders that they were the inheritors of the authority of Moses; it thus reflects a controversy in historical times between the elders and the priesthood. Ch. 12, stressing the unique position of Moses and telling of the rebellion of Aaron and Miriam against him, also appears to have a controversial background.

Chs. 13 f are a fusion of two accounts of Moses' sending out spies to find out conditions in Canaan, in preparation for an invasion of the land. The earlier account told only of the reconnaisance of the Negeb as far as Hebron; in the post-exilic narrative the whole country was covered. In both narratives the spies in their report stressed the strength of the Canaanites, with the result that the people, despite the insistence of Caleb and Joshua that they could conquer the land, refused to advance, and prepared to return to Egypt. Yahweh in anger condemned them to forty years' wandering, until all the then adults except Caleb and Joshua were dead. According to the earlier narrative (vv.$^{39-45}$) the people then regretted their folly and, ignoring Moses' protest against this fresh manifestation of disobedience, decided to move on the land at once, which they did, only to be defeated. This JE story, of which the post-exilic narrative is obviously a revision, itself represents an attempt to reconcile two independent traditions, one of which told of an entry into the land from the south, and the other of an entry from the east, across the Jordan. Both these traditions had an historical basis, but they preserved the memory of the movements of two different groups of tribes. To reconcile them the story was told that all the tribes on one occasion did attempt an invasion from the south, and when this was unsuccessful they moved round Edom to the east side of the Jordan, and entered the country in the vicinity of Jericho. One effect of this 'reconciliation' was the omission from the record of the actual entry from the south, which however is still reflected, though obscurely, in Jg 1^{1-20}.

15^{1-16}, derived from the post-exilic code, lays down the amount of flour, wine, and oil required with various animal sacrifices; it is a later and more carefully graduated system than that in Ezk $46^{5-7, 11, 14}$. 15^{17-21} commands that a cake made of the first meal from the newly harvested grain shall be offered to the Lord (cf Ex 34^{26a}, Lv 23^{14}). 15^{22-29} prescribes the offerings to be made for sins committed unwittingly; it is thus a parallel to Lv $4^{13-21, 27-31}$. It should be noted, however, that in Leviticus an unwitting sin on the part of the whole congregation requires a young bull for a sin-offering, and the tent of meeting is referred to; here a burnt offering of a young bull is required, together with a male goat for a sin-offering, and no mention is made of the tent of meeting. Vv.$^{22-26}$ would thus seem to be from another code than Lv 4^{13-21}. The compiler of the post-exilic code included both laws, reconciling them by implying that that in Numbers was to come into force after the settlement (Nu $15^{2, 17}$). The story of the man who was executed for breaking the sabbath (15^{32-36}) is similar in style to Lv $24^{10f, 23}$, and like the latter may have been part of the narrative framework. 15^{37-41} requires tassels to be worn on garments (cf Dt 22^{12}). The law refers explicity to (ritual) holiness (v.^{40}) and ends with the formula 'I am the Lord your God'; it may, accordingly, have been derived from the code upon which Lv $18-23$, 25 depends. In view of the fact that in Deuteronomy the command follows upon the prohibition of the mingling of diverse kinds (Dt 22^{9-11}) this version of it may once have followed upon Lv 19^{19}; if so, it will have been torn from its context by the compiler of the post-exilic code and placed after the account of the sabbath-breaking incident (vv.$^{32-36}$). It is probable that in the post-exilic narrative the material in ch. 15 came before the account of the sending out of the spies (13^{1ff}), the present arrangement being due to the compiler of the book who favoured the order of events in JE where the spies story followed immediately upon those in chs. 11 and 12.

Ch. 16 is a fusion of two stories: the first, derived from the earlier history, that of a revolt of some Reubenites against the authority of Moses; it is likely that in its original context the incident was located in the territory of Reuben east of the Jordan and that the story reflects some political or religious tension between the Reubenites and the west Jordan tribes. The second story is from the narrative framework of the post-exilic code. In its primary form it told of a revolt of Korah and two hundred and fifty princes, representing all the secular tribes, against the special sanctity claimed for the Levites. Challenged by Moses, they offered incense at the entrance of the tent of meeting, and fire came forth from the Lord and consumed them. The next day the people assembled and charged Moses and Aaron with the death of the rebels. A plague broke out, which was checked by Aaron who put incense in his censer and made atonement, standing between the living and the dead. Into this story later passages have been interpolated ($16^{8-11, 16f}$) which represent Korah's company as Levites in revolt against the superior sanctity claimed for Aaron. This development of the story is further evidence that underlying the present narrative framework is an earlier schematization in which the Levites were still recognized as priests (cf Ezk 44). The sole priesthood of Aaron and his family is thus a secondary element in the post-exilic schematization. The same development appears in 17^{1-11}. Originally it was the rod of Levi that budded—to indicate the Divine choice of that tribe to be the ministers of the sanctuary; in its present form the tale authenticates the unique position of Aaron. Even in its primary form the tale appears to have been an addition to the main narrative of which 17^{12f} is obviously the conclusion. 18^{1-7} clarifies the relation of the Levites to the priests and belongs to the Aaron stratum of the framework. 18^{8-20} lists the dues to which Aaron was entitled, summarizing the provisions of Lv 26^{f}, Dt 18^{4} and clarifying Ex 22^{29} 23^{19} 34^{26}. The statement that Aaron has no inheritance or portion in Israel (v.^{20}) is elsewhere made of Levi (v.^{24} Dt 10^{9} 12^{12} $14^{27, 29}$; cf Dt 18^{1}, Jos 13^{33}, Ezk 44^{28}), and this raises the question whether in its original context this list did not refer to the Levites. 18^{21-24} assigns the tithe to the Levites (cf Lv 27^{30}), who, in the supplementary vv.$^{25-32}$, are required to give a tithe of the tithe to the priests. Ch. 19 lays down the procedure to be followed in the purification of anyone who is unclean through contact with the dead. Although the references to Eleazar (vv.^{3f}) and to the Tabernacle (v.^{13}) indicate that the regulations in their present form belong to the latest stratum of the post-exilic material, they obviously reflect ancient practice, and the fact that they come here, at the end of the ritual laws, may suggest that they were taken over from another sanctuary than Jerusalem at a relatively late date.

20^{1} records the arrival of the Israelites at Kadesh 'in the first month.' The style indicates that it comes from the post-exilic framework. The year is not given, but from the fact that Aaron who was eighty-three at the time of the exodus (Ex 7^{7}) died on the first day of

NUMBERS, BOOK OF

the fifth month at the age of one hundred and twenty-three (33[39]), it must be the fortieth year after the exodus. It has been omitted here in the interest of the narrative in 20[14]–21[4], which in its original context followed immediately upon ch. 14 (21[1-3] being a variant to 14[40-45]). That is to say, whereas in the post-exilic framework the forty years had elapsed before the Israelites arrived at Kadesh, in the present narrative the traditional forty years in the wilderness are tacitly represented as having elapsed between 20[13] and 20[14]. 20[2-13], telling of water brought from the rock, is an adaptation of the story in Ex 17[1-7], used here to account for the fact that neither Moses nor Aaron reached the promised land. It is part of the post-exilic framework, the continuation of the Korah story in ch. 16. 20[14-21], describing the unsuccessful negotiations with the king of Edom for passage through his country, resume, as already noted, the older narrative broken off at 14[45]. Vv.[22-29], recording Aaron's death on Mount Hor, are from the post-exilic framework; according to the older tradition, Aaron died at Moserah (Dt 10[6]). 21[1-3] is another version of the tradition embodied in 14[40-45]; in its original context it may have been followed by the account of the conquest of the Negeb underlying Jg 1[1-21] (see comment on chs. 13 f above). The story of the bronze serpent (21[4-9]) may have been told to explain the existence of the bronze serpent in the Temple, later destroyed by Hezekiah (2 K 18[4]).

C. 21[10]–36[13]. 21[10]–22[1] records the progress of the people round Edom to the plains of Moab; it is a conflation of the itinerary of JE, part of which is preserved in Dt 10[6f], and that of the post-exilic framework, vv.[33-35] being an addition from Deuteronomy. 22[2]–24[25], the story of Balaam, is from the older history, and is doubtless an adaptation and elaboration of legends current east of the Jordan about a local seer with whom certain Israelite tribes had on some occasion come into contact. In the post-exilic narrative he appears to have been associated with Midian (cf 25[6ff] 31[8]); hence the mention of 'the elders of Midian' in 22[4, 7]. 25[1-5], also from the older history, tells of the seduction of Israelites by Moabite women, leading to idolatry; it was probably followed by an account of a plague (cf vv.[8f] 26[1]), which has been displaced by the post-exilic material in 25[6-18], which tells how perpetual priesthood was promised to the family of Phinehas for his zeal in slaying an Israelite and the Midianite woman whom he had brought into the camp. This is a re-writing of the Peor story in 25[1-5]. Its original continuation is now found in ch. 31, the account of the war with Midian, from which it is clear that in this tradition Balaam was represented not as the seer who had blessed Israel but as the evil instigator of the people's apostasy. In their original context the events recorded in 25[6-18] and ch. 31 must have been located in Midian, presumably in the course of the journey from Kadesh to the plains of Moab. The present arrangement of the material is due to the compiler of the book, who, to unify the two forms of the Balaam tradition, severed 25[6-18] from its continuation, making it an episode in the apostasy of Peor. He continued this with the events recorded in chs. 26–30, which the post-exilic narrative had represented as occurring in Moab, and then reverted to the conclusion of the Midian story in ch. 31. In 25[6-18] the promise to Phinehas tacitly ignores the fact that, being a descendant of Aaron, he was already a priest. It is not unlikely that we have here an echo of the fiction by which the family of Phinehas—apparently a Palestinian figure (cf Jos 24[33])—came to be reckoned as descendants of Aaron; if so, the story throws further light upon the development of the post-exilic tradition.

Ch. 26 records the taking of a second census in which it was found that every man of those numbered at Sinai was now dead. The names of the various clans of the several tribes are given—possibly derived from an official record; and the total was 601,730 as against 603,550 in the earlier census (1[46]); the Levites were 23,000 as against 22,273 (3[43]). 27[1-11] records the circumstances under which it was decreed that the daughters of a man dying without a son should inherit his property. In 27[12-23] Moses is commanded to prepare for death by having Joshua commissioned as his successor by Eleazar the priest. 28[1-8] prescribes the offering of a lamb, with a cereal offering and a drink offering, every morning and evening; it repeats Ex 29[38-42]. Vv.[9f] prescribe an additional sacrifice of two lambs every sabbath, and vv.[11-15] the sacrifices for the beginning of each month. 28[16]–29[39] specifies the sacrifices for each of the appointed feasts; it is in the nature of a supplement to Lv 23[4-37]. 30[1f] affirms the binding character of a vow made by a man; vv.[3-16] lay down the conditions upon which a woman's vow is binding.

The basic material in ch. 31 was, as has been suggested above, originally the continuation of 25[6-18]. In its present form the story provides a concrete instance of the application of the rules for the removal of uncleanness through contact with the dead (vv.[19-24]) and for the distribution of the spoils of war (vv.[25-54]). Ch. 32, derived from the earlier history, accounts for the fact that Reuben, Gad, and the half-tribe of Manasseh were settled east of the Jordan, and at the same time insists that the tribes are nevertheless true members of Israel. 33[1-49] recapitulates in the form of an itinerary the present narrative of Ex 12[37]–Nu 22[1]. 33[50]–36[13] contains instructions relative to the settlement in Canaan. The inhabitants are to be driven out and their cult objects destroyed (33[50-56]). The land, the boundaries of which are delineated, is then to be divided among the several tribes by lot under the supervision of leaders named by Yahweh (ch. 34). It is then laid down that the Levites are to have their own cities, already referred to in Lv 25[32-34], forty-eight in number, together with the pasture lands surrounding them (35[1-8]), a provision impossible to reconcile with the oft repeated statement that the Levites have no inheritance or portion in Israel (Dt 10[9] etc.). Six of these cities will be cities of refuge, to which a man who kills another may flee to be safe from the avenger until it is determined whether or not the killing was intentional. If it was intentional, the avenger shall put the murderer to death; if it was not intentional, the slayer will be protected from him so long as he remains in the city of refuge. Only at the death of the reigning high priest may he return to his home (35[9-34]). The earlier laws of asylum are given in Ex 21[12-14], Dt 19[1-13]. Ch. 36 requires heiresses to marry within their own tribe so that land may not pass from one tribe to another; it is a supplement to 27[1-11].

The material derived from the older JE tradition is marked by its spontaneity and its portrayal of character. The personality of Moses is artlessly delineated: *e.g.* his humble piety (12[3]), his trust in Yahweh (10[29-32]), his faithfulness and intimacy with Him (12[6-8]), his affection for his people (11[2, 10-15] 21[7]), his generosity (11[25-29] 12). And the character of the people is portrayed with equal vividness—their dislike of restraint, their selfish murmurings, their vehement repentance followed by wilful self-assertion. In these narratives there is, despite their legendary character, a strong sense of history. Events were under Divine control and so revealed the Divine purpose. But the control was exercised not arbitrarily and artificially from without the process but from within, through men inspired to see the meaning of events and to make adequate and selfless response thereto. The portrayal of character was thus not an incidental but a primary element in the work of those responsible for the ordering of the diverse traditions of which the narrative was composed. The post-exilic narrative is far more artificial and selfconscious. Though cast in the form of history, it is rather a distillation of what had been revealed and apprehended through events in the past. For these writers, Israel was less an historical than a theological concept, less a nation than a worshipping community. And their concern was with the cult, that it should remind the people constantly of the mystery of the Divine holiness and should be an adequate means of approach to God. Thus, in its origin

this concern was not ecclesiasticism in the pejorative sense of the word. It was an expression of a necessary phase in the development of the idea of Israel. But if self-centred ecclesiasticism was to be avoided it was essential that those to whom it fell to administer the code should be as sensitive to changing conditions and changing needs as its compilers had been in their day. It was, in part, to meet such changing conditions that the code was ultimately conflated with the older tradition, to form the Pentateuch; and in the years that followed Jerusalem was the centre from which the light shone forth to lighten the Gentiles. Nevertheless, the NT provides abundant evidence that by the 1st cent. the vision had faded, to be recovered only when the universal approach to God was thrown open by one 'who has become a priest, not according to a legal requirement concerning bodily descent but by the power of an indestructible life' (He 7^{16}). A. H. McN.—C. A. Si.

NUMENIUS.—One of an embassy sent (*c* 144 B.C.) by the Jews to Rome and Sparta (1 Mac 12^{1-18}). He visited Rome on a similar errand a few years later (1 Mac 14^{24} 15^{15-24}).

NUN.—The father of Joshua, Ex 33^{11}, Nu 11^{28}, Jos 1^{1} etc.

NUN.—Fourteenth letter of Hebrew alphabet, and so used to introduce the fourteenth part of Ps 119, every verse of which begins with this letter.

NURSE.—Healthy women among the Hebrews in ancient times were accustomed to suckle their own children, Gn 21^{7}. As in Palestine to-day, the child was suckled for a long time, sometimes for as much as three years, 1 S 1^{23f}, 2 Mac 7^{37}. Weaning was the occasion of a joyful feast, Gn 21^{8}, 1 S 1^{24}. But the nurse was also found in olden times in Israel, and was often held in great affection and honour, Gn 24^{59} 35^{8}, Ex 2^{7}, 2 K 11^{2}, Is 49^{23}, 1 Th 2^{7}. The nurse, *mêneḳeth*, must be distinguished from the *'ōmeneth*, translated 'nurse' in Ru 4^{16}, 2 S 4^{4}, which means the attendant in charge of the child. W. E.

NUTS.—**1.** Hebrew *'eghôz*, Ca 6^{11}. This is without doubt the fruit of the walnut-tree (*Juglans regia*) called to-day in Arabic *jauz*. **2.** Hebrew *boṭnîm*, Gn 43^{11}. This means **pistachio nuts** (so RVm, RSV), the fruit of *pistacia vera*, a tree widely cultivated in Palestine. The nuts, known in Arabic as *fistuq*, are very great favourites; they are eaten raw, and also made into various sweets and confectionery. E. W. G. M.

NYMPHA(S).—An influential Colossian Christian (Col 4^{15}), whose house was used as a meeting-place for Christians. The question of the correct reading is a difficult one, and it is uncertain whether it should be Nymphas (so AV, RV) or **Nympha**, a man or a woman. Nothing further is known of the person named. RSV reads 'Nympha and the church in her house.'

O

OABDIUS, 1 Es 9^{27} (RV).—See ABDI.

OAK.—1. Hebrew *'ēlāh*, Gn 35^{4}, Jg $6^{11, 19}$, 2 S $18^{9f, 14}$, 1 K 13^{14}, 1 Ch 10^{12}, Is 1^{30}, Ezk 6^{13}, Hos 4^{13}; 'Valley of Elah' (RVm 'terebinth'), Is 6^{13} (AV **teil tree**); Hebrew *'allāh*, a slight variant, Jos 24^{26}.

2. Hebrew *'ēlîm*, perhaps plural of *'ēlāh*, Is 1^{29} (RVm 'terebinth') 57^{5} (AV 'idols'; AVm, RV, RSV 'oaks') 61^{3} (AV, RV 'trees'; RSV 'oaks'). These words, *'ēlāh*, *'allāh*, and *'elîm*, all apparently refer to the **terebinth** (q.v.).

3. *'allôn*, cannot be the same as *'ēlāh*, because it occurs with it in Is 6^{13}, Hos 4^{13}; it is found also in Gn 35^{8}, Is 44^{14}, Am 2^{9}. In Is 2^{13}, Ezk 27^{6}, Zec 11^{2} the *'allônîm* ('oaks') of Bashan are mentioned. In Jos 19^{33} (AV) *'allōn* is treated as a proper name.

4. *'ēlôn*, probably merely a variation of *'allōn*, is in Gn 12^{6} 13^{18} 14^{13} 18^{1}, Dt 11^{30}, Jg 4^{11} $9^{6, 37}$, 1 S 10^{3}, translated 'plain' in AV, but 'oak' in RV and RSV, with RVm 'terebinth.' *'allôn* and *'ēlōn* apparently refer to the oak.

Oaks have always been relatively plentiful in Palestine. Even to-day, in spite of the most reckless destruction, groves of oaks survive on Carmel, Tabor, around Banias, and in ancient Bashan; while whole miles of country are covered with shrub-like oaks produced from the roots of trees destroyed every few years for fuel. Among the nine recognized varieties of oak in Syria, the evergreen *Quercus coccifera* or 'holm oak' is the finest—it is often 30 to 35 feet high. Its preservation is usually due to its being situated at some sacred *wely*. **'Abraham's oak'** at Hebron is of this kind. Other common oaks are the Valonia oak (*Q. Aegilops*), which has large acorns with prickly cups, much valued for dyeing; and the oriental gall oak (*Q. cerris*), a comparatively insignificant tree, especially noticeable for the variety of galls which grow on it. Both these latter are deciduous, the leaves falling from late autumn to early spring. Oak wood is used for tanning skin bottles and also as fuel, while the acorn cups of the Valonia oak and the galls of the various oak trees are both important articles of commerce in N. Syria. E. W. G. M.

OAR.—See SHIPS AND BOATS.

OATHS.—How the need of oaths must first have arisen can be seen in such a passage as Ex 22^{10f}: 'If a man delivers to his neighbour an ass or an ox or a sheep or any beast to keep, and it dies or is hurt or is driven away, without anyone seeing it, an oath by the Lord shall be between them both to see whether he [the custodian] has not put his hand to his neighbour's property; and the owner shall accept the oath, and he [the custodian] shall not make restitution.' As there is no witness to substantiate the innocence or prove the guilt of the suspected person, God is called to witness.

An oath is really a conditional curse, which a man calls down upon himself from God, in case he should not speak the truth or keep a promise. The use of oaths was not restricted to judicial procedure, but was also connected with a variety of everyday matters. To swear by Yahweh was regarded as a sign of loyalty to Him (cf Dt 6^{13}, Is 48^{1}, Jer 12^{16}).

There are two words in Hebrew for an oath: (1) *shᵉbhūʿāh*, which apparently comes from the same root as the word for 'seven' (*shebhaʿ*); the Hebrew verb meaning 'to swear' represents the same root, and may mean something like 'to do a thing seven times' or 'to come under the influence of seven things.' Seven was the most sacred number among the Hebrews (cf *shābhūaʿ*, 'week' of seven days), and among the Semites generally; likewise to a considerable extent among the Persians and Greeks. Among the Babylonians the seven planets each represented a god. Hence there is good reason for supposing a connexion between the sacred number and the oath. (2) *'ālāh*, which, strictly speaking, means a 'curse' and was a stronger form of oath. The combination of both words ('the oath of the curse') was used on especially solemn occasions, *e.g.* Nu 5^{21} (cf Peter's denial by curse and oath, Mt 26^{74}).

There were various forms used in taking an oath, *e.g.* 'God do so to me and more also if . . .' (1 K 2^{23}); the punishment called down in case the oath is not observed is left indeterminate in this form. This is to be explained from the fact that there was a fear lest the mere mention

of the curse should *ipso facto* bring it to pass—a remnant of animistic conceptions (*i.e.* there was the fear that a demon might think his services were required).

In later times, however, the nature of the curse is sometimes mentioned, *e.g.* 'The Lord make you like Zedekiah and Ahab, whom the king of Babylon roasted in the fire' (Jer 29^{22}; cf Is 65^{15}, Zec 8^{13}). Another form was: 'God is witness between you and me' (Gn 31^{50}), or, 'May the Lord be a true and faithful witness against us if . . .' (Jer 42^{5}). A more common form is: 'As the Lord lives' (Jg 8^{19}), sometimes varied by the addition of a reference to the person to whom the oath was made: 'As the Lord lives and as your soul lives' (1 S 20^{3}, cf 2 S 15^{21}). Still another form was: 'God . . . judge between us' (Gn 31^{53}). God Himself is conceived of as taking oaths: 'By myself I have sworn' (Gn 22^{16}).

The usual gesture in taking an oath was to raise the arm towards heaven (Dt 32^{40}, Dn 12^{7}), the motive being to point to the dwelling-place of God; to 'raise the hand' became a synonym for 'to swear' (Ex 6^{8}, Nu 14^{30}, not apparent in EV). Another gesture is referred to in Gn 24^{2} 47^{29}, *viz.*, putting the hand under the thigh; the organ of generation was regarded as peculiarly holy by the Hebrews.

With regard to the breaking of an oath, see Lv 6^{1-7}; and for the use of oaths in ratifying a covenant, see Gn 21^{27-31} 26^{28} 31^{53}, Jos 9^{15}, 2 K 11^{4}.

W. O. E. O.—W. F. S.

OBADIAH ('servant of Y" ').—A name of a type common among the Semitic peoples; it occurs frequently in the OT, for the most part as the name of persons of whom little or nothing is known. It has also been found on an ancient Hebrew seal. **1.** The author of the Vision of Obadiah: see following article. **2.** Ahab's steward, the protector of Yahweh's prophets against Jezebel, 1 K 18^{3-16}. This person lived in the 9th cent. B.C. **3.** A descendant of Saul, 1 Ch 8^{38}; he lived, to judge from his position in the genealogy, about 700 B.C. On the probable genuineness of the genealogy see G. B. Gray, *Studies in Hebrew Proper Names*, pp. 241 f. **4.** An Issacharite, 1 Ch 7^{3}. **5.** A descendant of David in the 5th cent. B.C., if the Hebrew text (1 Ch 3^{21}) correctly makes him a grandson of Zerubbabel, but in the 4th if the LXX is right and he belonged to the sixth generation after Zerubbabel. **6.** The head of a family who returned with Ezra, Ezr 8^{9}, 1 Es 8^{35} (AV, RV **Abadias**). **7.** A priestly contemporary of Nehemiah, Neh 10^{5}. **8.** A doorkeeper, Neh 12^{25}. **9, 10, 11, 12, 13.** Various persons in the genealogies or stories of the Chronicler, 1 Ch 9^{16} (called **Abda** in Neh 11^{17}) 12^{9} 27^{19}, 2 Ch 17^{7} 34^{12}. On the Chronicler's use of such names, see G. B. Gray, *op. cit.*, pp. 170–190. G. B. G.

OBADIAH.—This short prophetic book is fourth in the Book of the Twelve, or the Minor Prophets. Its position suggests that the editors of the prophetic books held it to be the work of a pre-exilic prophet. Since no clue as to identity or time of Obadiah was preserved in the superscription they may have been as much at a loss as we are. Since there is an affinity between Obadiah and a chapter of Jeremiah (Ob $^{1-4}$=Jer 49^{14-16}; Ob ^{5f}=Jer $49^{9, 10a}$) they may have reasoned that Jeremiah was dependent on Obadiah. However, the material in Jer 49 is hardly authentic. Even so the pre-exilic origin of at least a part of Obadiah's prophecy has still found defenders in recent decades. Most scholars, however, favour post-exilic origin and doubt that the book is the work of one writer.

The work is composed of two sections. The concluding couplet of the first has been misplaced and put after the opening line of the second. The division thus is vv.$^{1-14, 15b}$ and $^{15a, 16-21}$. The first section is concerned with the fall of Edom and the question is whether it is genuinely predictive or mirrors the actual happening. In the former case the poem must have been written while the Jews were still mindful of the rôle played by the Edomites at the time of the fall of Judah in 586 B.C. (cf La 4^{21} etc.). In the latter case it could be considerably younger. According to Glueck's archaeological exploration of Edom that region was without sedentary occupation in the Persian period. The downfall of Edom was certainly complete by about 450 B.C. Malachi looks back on the event (1^{2-5}). Arab invasions seem to have brought it about. The second poem, vv.$^{15a, 16-21}$, is predictive of the Day of Yahweh that is to bring judgment on the nations, especially on Esau-Edom. The question here is whether vv.$^{19-21}$ are not a younger elaboration of the preceding ones. The fact that they are prose rather than poetry lends support to such a view. The region south of Judah is now 'Mount Esau,' not the old homeland NE. of the Gulf of 'Aqaba E. of *el-'Arabah*. There is an interesting allusion to the Jewish dispersion in Sepharad, which according to the inscriptions is Sardis in Lydia, but perhaps here stands broadly for Asia Minor. This is clearly the group transplanted from Babylonia to Lydia and Phrygia by Antiochus III., *c* 205 B.C. (Jos. *Ant.* XII. iii. 4 [147]). Who the 'saviours' are that are to go up to Mount Zion remains obscure; the versions suggest the possibility of reading 'those who have been saved' instead of 'saviours.' The book of Obadiah is nationalistic prophecy and hence of very minor importance.

E. G. K.

OBAL.—Son of Joktan, Gn 10^{28}; called **Ebal** (q.v.) in 1 Ch 1^{22}.

OBDIA, 1 Es 5^{38} (AV, RV).—See HABAIAH.

OBED.—1. The son of Boaz and Ruth, the father of Jesse and grandfather of David (Ru 4^{17}), and an ancestor of our Lord (Mt 1^{5}, Lk 3^{32}). **2.** A descendant of Sheshan, 1 Ch 2^{37ff}. **3.** One of David's heroes, 1 Ch 11^{47}. **4.** A son of Shemaiah, 1 Ch 26^{7}. **5.** The father of Azariah, 2 Ch 23^{1}. **6.** One who returned with Ezra, 1 Es 8^{32} (AV, RV **Obeth**); called **Ebed** in Ezr 8^{6}.

OBED-EDOM.—1. A Philistine, a native of Gath, who lived in or near Jerusalem. In his house David deposited the Ark after the death of Uzzah, and here it remained three months, bringing a blessing by its presence, 2 S 6^{10f}, 1 Ch 13^{14}. **2.** The eponym of a family of doorkeepers and singers in the Temple, 1 Ch $15^{18, 21, 24}$ $16^{5, 38}$ $26^{4, 8, 15}$. **3.** The son of Jeduthun and a doorkeeper in the Temple, 1 Ch 16^{38}. **4.** One who had charge of the vessels in the Temple in the days of Amaziah, 2 Ch 25^{24}.

OBEDIENCE.—Used in the EV to translate the Hebrew *shāma'* meaning literally 'hear,' 'listen' (hence the title Shema' for the Jewish confession of faith, Dt 6^{4}). For the Hebrew, to hear is to hearken, to be persuaded (hence the Greek term *peithomai* is used commonly to render the Hebrew 'hear' in the LXX and NT). The term is used of man's relationship to his fellows, children to parents (Dt 21^{18}, Eph 6^{1}), wives to husbands (1 P 3^{16}), slaves to masters (Eph 6^{5}), subjects to rulers (Gn 49^{10}, cf Ro 13), and in the NT Christians to their leaders (2 Th 3^{14}, Ph 2^{12} etc.). More often it refers to man's relationship to God (Dt 4^{30}, Jos 24^{24} etc.). Indeed the OT prophets encourage rebellion from a king who has himself disobeyed God (and see Ac 5^{29}). Obedience is superior to sacrifice (1 S 15^{22}). It is connected with the covenant (Ex 19^{5}, Dt 4^{30f}, Jer 11^{1ff}), and by obedience to God's accompanying commands the nation will prosper (Dt 11^{13}, 1 K 6^{12}, Is 1^{19} etc.). Yet the history of Israel is a persistent reiteration of disobedience and rebellion (*e.g.* Dt 8^{20}, Jer 7^{24}, Ac 7^{39}). With the perfect obedience of Jesus (Ro 5^{19}, Ph 2^{8}, He 5^{8}) the old pattern has been broken. Man through faith and love can now in Christ obey God and be saved (Jn 14^{15}, Ro 6^{17}, 1 Jn 5^{2}). Since Christ's obedience is primary, man's obedience takes the form of believing in His saving work; hence we have the expression, 'obedience to the faith' (Ro 1^{5} 16^{26}, Ac 6^{7}; cf He 11^{8}). Accordingly the NT, in contrast to the OT, stresses belief rather than obedience as such. C. C. Ro.

OBEISANCE.—A word derived from the French word for obedience, and used in the OT only as an occasional translation of the Hebrew *shāḥāh* 'bow down,' 'prostrate.' It is the gesture of homage or reverence

before a king or superior; the act of worship before a god. C. C. Ro.

OBELISK.—See PILLAR, 2 (*c*).

OBETH, 1 Es 8^{32} (AV, RV).—See EBED, 2.

OBIL.—The overseer of David's camels, 1 Ch 27^{30}.

OBLATION.—See SACRIFICE AND OFFERING.

OBOTH.—A stopping-place on the wanderings, Nu 21^{10f} 33^{43f}. It is possibly modern '*Ain el-Weiba*, S. of the Dead Sea.

OBSERVE.—Mk 6^{20} 'Herod feared John, knowing that he was a righteous and holy man, and kept him safe' (AV 'observed him'). The meaning of the English word 'observed' is 'reverenced.' Tyndale's translation is 'gave him reverence.' Cf Shakespeare's 2 *Henry IV.* IV. iv. 30, 'he is gracious, if he be observed.' But the more probable meaning of the Greek is 'protected him,' or, as RV and RSV, 'kept him safe.'

OCCUPY.—The 'occupier' of Ezk 27^{27} (AV, RV; RSV 'dealer') is a 'trader,' and 'to occupy' in Ezk 27^{9} (AV, RV; RSV 'barter'), Lk 19^{13} (AV; RV, RSV 'trade') is 'to trade.' The original meaning of the English word is to be engaged in anything.

OCHIEL.—See JEIEL, 5.

OCIDELUS, 1 Es 9^{22} (AV, RV).—See GEDALIAH, 4.

OCHRAN.—Father of Pagiel, Nu 1^{13} 2^{27} $7^{72, 77}$ 10^{29} (AV **Ocran**).

OCIDELUS, 1 Es 9^{22} (AV, RV).—See JOZABAD, 6.

OCINA.—Taking the towns mentioned in order as fearing the advance of Holofernes (Jth 2^{28}), Sidon and Tyre are well known. With some certainty Sur may be identified with *Umm el-'Amūd*, S. of *Iskanderūna*, which seems to have been formerly called *Turān*. The next step takes us naturally to Acre, in later times known as *Accon*, in which we may find an echo of the earlier Ocina. W. E.

OCRAN.—AV form of **Ochran** (q.v.).

ODED.—**1.** The father of the prophet Azariah, 2 Ch 15^{1}. In v.^{8} 'Oded' of MT is a mistake, perhaps through the omission of 'Azariah the son of' (cf RSV). **2.** A prophet who successfully protested against the proposal to enslave Judahites, 2 Ch 28^{9ff}.

ODOMERA.—A chief, slain by Jonathan (1 Mac 9^{66}).

OF.—As already noted, under BY, the preposition 'of' is generally used in AV for the agent, as Mt 2^{16} 'He was mocked of the wise men.' But there are other obsolete or archaic uses of 'of,' which should be carefully observed. Thus (1) it sometimes means *from* (the proper meaning of the A.S. 'of'), as Mk 11^{8} 'Others cut down branches of the trees,' Jn 15^{15} 'All things that I have heard of my Father,' Jn 16^{13} 'He shall not speak of himself'; (2) *concerning*, as Ac 5^{24} 'They doubted of them, whereunto this would grow,' Mt 18^{13} 'He rejoiceth more of that sheep than of the ninety and nine,' Jn 2^{17} 'The zeal of thine house'; (3) *with*, Ca 2^{5} 'I am sick of love.'

OFFENCE.—The Greek word *skandalon* properly means a 'trap.' The word is used in the Gospels (Mt 18^{7}, Lk 17^{1}) of offences (so AV; RSV 'temptations to sin') in the form of hindrances to the faith of believers, especially of Christ's little ones. The context makes it clear what kind of **stumbling-blocks** are referred to. In the corresponding passage in the Sermon on the Mount (Mt 5^{29f}; cf Mk $9^{45, 47}$) the right eye and right hand are given as instances of the kind of offences that may arise. The members here cited are not only in themselves good and serviceable, but necessary, though they are capable, in certain circumstances, of becoming the occasion of sin to us. In the same way the Christian may find pursuits and pleasures, which in themselves are innocent, bringing unexpected temptations and involving him in sin. The possible applications of this are numerous, whether the warning be referred to artistic gifts (the 'hand' and 'eye'), or abuses of certain kinds of food and drink, or any other circumstances which may lead a man from the higher life or divert him from his aims. All these may be compared to the stumbling-blocks which cause a man to fall. Such things must be dispensed with, for the sake of entering the 'eternal life,' which is the Christian man's goal. The RSV uses 'offence' only as a translation of Greek *skandalizō* in the sense 'take' or 'give offence,' *e.g.* Mt 11^{6} 17^{27}. T. A. M.—F. W. G.

OFFERING.—See SACRIFICE AND OFFERING.

OFFICER.—By this somewhat indefinite expression are rendered some eight or ten different Hebrew and Greek words, several of which seem to have had an equally wide application. Of the Hebrew words the commonest is *shōṭēr*, from a root which in Assyrian means 'to write.' The *shōṭēr*, accordingly, was originally, it would seem, a subordinate official attached to the higher military, civil, and judicial officers of the State for secretarial purposes (see Driver's summary of their duties in his commentary [*ICC*], on Dt 1^{15}). In the narrative of the oppression of the Hebrews in Egypt, the 'officers' are the Hebrew subordinates of the Egyptian taskmasters (see Ex 5^{14}); one of their duties, it may be assumed, was to keep account of the tale of bricks made by each of their compatriots.

In Gn 37^{36} and elsewhere 'officer' is the translation of the usual word for '**eunuch**' (q.v.), but, as 39^{1} shows, the original (*sārîs*) must here signify, more generally, a court official. Still another word, rendered 'officer' in 1 K $4^{5, 7}$ etc., denotes the heads of the twelve administrative districts into which Solomon divided his kingdom.

In NT 'officer' is, with one exception (Lk 12^{58}), the translation of a Greek word of equally wide application. In the account of our Lord's betrayal and capture the 'officers' are members of the Temple police (Jn 7^{32} etc.), as also in the account of the imprisonment of Peter and John (Ac $5^{22, 26}$; cf 4^{1}). The same word is elsewhere rendered 'minister,' either in the more general sense of 'attendant' (so Ac 13^{5} RV), or in the special sense of the 'minister' (RV and RSV 'attendant') or officer of the Jewish synagogue (Lk 4^{20}), for whom see SYNAGOGUE. A. R. S. K.

OG.—The king of Bashan, who, with his children and people, was defeated and destroyed by the Israelites at Edrei, directly after the defeat of Sihon. His rule extended over sixty cities, of which the two chief were Ashtaroth and Edrei (Jos 12^{4}). The whole of his kingdom was assigned to the tribes of Reuben, Gad, and half-Manasseh (Dt 3^{1-13}, Nu 32^{33}; see also Dt 1^{4} 4^{47} 3^{14}, Jos 2^{10} 9^{10} $13^{12, 30}$). The conquest of this powerful giant king lingered long in the imagination of the Israelites as one of the chief exploits of the conquest (Ps 135^{11} 136^{20}). The impression of the gigantic stature of Og is corroborated by the writer of Dt 3^{11}, who speaks of the huge 'iron bedstead' (or sarcophagus) belonging to him. According to the measurements there given, this sarcophagus was nine cubits long and four cubits broad. It is, however, impossible to estimate his stature from these dimensions, owing to the tendency to build tombs unnecessarily large in order to leave an impression of superhuman stature. The 'iron' of which the sarcophagus was made, probably means black basalt. Many basaltic sarcophagi have been found on the east of the Jordan. T. A. M.

OHAD.—A son of Simeon, Gn 46^{10}, Ex 6^{15}.

OHEL.—A son of Zerubbabel, 1 Ch 3^{20}; but the text is doubtful.

OHOLAH AND OHOLIBAH (AV **Aholah, Aholibah**). —Two sisters who were harlots (Ezk 23). The words appear to mean 'tent' and 'tent in her,' the allusion being to the tents used for idolatrous purposes. The passage is figurative, the two harlots representing, the one Samaria and the other Jerusalem. Though both were wedded to Yahweh, they were seduced by the gallant officers of the East, Samaria being led astray by Assyria and Jerusalem by Babylon. The whole of the allegory is a continuation of ideas already expounded in chs. 16 and 20, and is intended as a rebuke against

Israel for her fondness for alliances with the great Oriental empires, which was the occasion of new forms and developments of idolatry. The main idea of the allegory seems to have been borrowed from Jer 3^{6-13}.

T. A. M.

OHOLIAB.—The chief assistant of Bezalel, Ex 31^{6} 35^{34} 36^{1f} 38^{23} (AV **Aholiab**).

OHOLIBAH.—See OHOLAH.

OHOLIBAMAH (AV **Aholibamah**).—**1.** One of Esau's wives, Gn $36^{2,5,14,18,25}$. **2.** An Edomite 'duke,' Gn 36^{41}, 1 Ch 1^{52}.

OIL.—With one exception (Est 2^{12} 'oil of myrrh') all the Scripture references to oil are to **'olive oil,'** as it is expressly termed in Ex 27^{20} 30^{24} etc., according to the more correct rendering of RV and RSV. Considering how very numerous these references are—some two hundred in all—it is surprising that there should be so few that throw light on the methods adopted in the preparation of this indispensable product of the olive tree.

1. *Preparation of oil.*—By combining these meagre references with the fuller data of the Mishnah, as illustrated by the actual remains of oil-presses, either still above ground or recently recovered from the soil of Palestine, it is possible to follow with some minuteness the principal methods adopted. The **olives** were either shaken from the tree or beaten down by striking the branches with a light pole, as illustrated on Greek vases (illustrated in Vigouroux, *Dict. de la Bible*, article 'Huile'). The latter method supplies Isaiah with a pathetic figure of Israel (17^{6} RVm, RSV).

The finest quality of oil was got by selecting the best berries before they were fully ripe. These were pounded in a mortar, after which the pulp was poured into a basket of rushes or wickerwork. From this, as a strainer, the liquid was allowed to run off into a receiving vessel. After the oil had floated and been purified, it formed **'beaten oil,'** such as had to be provided for the lighting of the Tabernacle (1 K 5^{11} RSV; cf Ex 27^{20}, Lv 24^{2}).

In the preparation of the oil required for ordinary domestic use, however, the methods adopted closely resembled those for the making of **wine**. Indeed, it is evident that the same apparatus served for the making both of wine and of oil (see WINE for the names of the parts, and note the phrase, Jl 2^{24}, 'the vats shall overflow with wine and oil'). From evidence, literary and archaeological, it is clear that there were various kinds of oil-presses in use in different periods. A very common, if not quite the simplest, type consisted of a shallow trough hewn in the native rock, from which, as in the similar, if not identical, wine-press, a conducting channel carried the expressed liquid to a slightly lower trough or oil-vat. In early times it appears as if a preliminary pressing was made with the feet alone (Mic 6^{15}).

In the absence of a suitable rock-surface, as would naturally be the case within a city of any antiquity, a solid block of limestone—circular, four-sided, and eight-sided (Megiddo) are the shapes recovered by recent explorers—was hollowed to the depth of a few inches, a rim being left all round save at one corner. Such presses were found at Taanach (illustrated, Sellin, *Tell Ta'annek*, 61, reproduced in Benzinger's *Heb. Arch.*^{3} [1927] 148), and elsewhere. In these the olives were crushed by means of a large round stone. The liquid was either allowed to collect in a large cup-hollow in the surface of the trough, from which it was baled out by hand (*PEFSt*, 1903, p. 112), or it was run off into a vessel placed at the corner above mentioned (see Sellin's illustration, and *op cit.* 60 f, 93). At a later period, as we learn from the Mishnah, a stone in the shape of the modern millstone was used. Through the centre a pole was inserted, by which it was made to revolve on its narrow side round the circular trough—a method still in use in Syria (illustrated, Galling, *Biblisches Reallexikon* [1937] 402).

From the oil-mill, as this apparatus may be termed, the product of which naturally, after purification, produced the finer sort of oil, the pulp was transferred to the **oil-press** properly so called. Here it was placed in baskets piled one above the other. Pressure was then applied for the extraction of a second quality of oil, by means of a heavy wooden beam worked as a lever by ropes and heavy weights, or by a windlass. Details of the fittings of these 'press-houses,' as they are named in the Mishnah, and of another type of press formed of two upright monoliths with a third laid across, the whole resembling the Greek letter π, have been collected by the present writer in the article 'Oil' in *EBi* iii, 3467, and may now be controlled by the account of the elaborate underground 'press-house' described and illustrated by Bliss and Macalister in *Excavations in Palestine*, pp. 208 f and plate 92 (cf *ib.* 196 f and Index).

The expressed liquid, both from the oil-mill and from the oil-press, was collected either in a rock-cut vat or in separate jars. In these it was allowed to settle, when the oil rose to the top, leaving a bitter, watery liquid, the *amurca* of the Romans, and other refuse behind. Oil in this fresh state is distinguished in OT from the refined and purified product; the former is *yiṣhār*, so frequently named along with 'new wine' or must (*tîrôsh*, see WINE, **1**) and corn as one of the chief products of Canaan; the latter is always *shemen*, but the distinction is not observed in our versions. The fresh oil or *yiṣhār* was refined in the same manner as wine, by being poured from vessel to vessel, and was afterwards stored in jars and in skins. A smaller quantity for immediate use was kept in a small earthenware pot—the vial of 1 S 10^{1} and of 2 K $9^{1,3}$ RV (RSV 'flask'; AV 'box')—or in a horn (1 S $16^{1,13}$, 1 K 1^{39}).

2. *Uses of oil.*—Foremost among what may be called the secular uses of oil may be placed its daily employment as a **cosmetic**, already dealt with under ANOINTING (see also OINTMENT). This was the oil that made the face to shine (Ps 104^{15}). As in all Eastern lands, oil was largely used in the **preparation of food**; familiarity with this use of it is presupposed in the comparison of the taste of the strange manna to that of the familiar 'cakes baked with oil' (Nu 11^{8} RSV; see, further, MEALS, **1**, end). Oil was also indispensable for the **lighting** of the house after nightfall. In addition to the universal olive oil, the Mishnah (*Shabbath*, ii. 1 f.) names a variety of other oils then in use, among them oil of sesame, fish oil, castor oil, and naphtha. That used in the Temple (1 Ch 9^{29}) was no doubt of the finest quality, like the 'beaten oil' for the Tabernacle above described. The **medicinal** properties of oil were early recognized (Is 1^{6} RSV); the Good Samaritan mixed his with wine (Lk 10^{34}), producing an antiseptic mentioned also in post-Biblical Jewish writings.

Oil has a prominent place in the **ritual** of the Priests' Code, particularly in the preparation of the 'cereal offering' (Lv $2^{1.4}$ etc.). It also appears in connexion with the leprosy-offering (14^{10ff}) and in other connexions, but is absent from the sin-offering (5^{11}) and the jealousy-offering (Nu 5^{11ff}). For the special case of the 'sacred' anointing oil' (Ex 30^{23-25}), see OINTMENT.

As might have been expected from the extensive cultivation of the olive by the Hebrews, oil not only formed an important article of inland **commerce**, but was exported in large quantities both to the West, by way of Tyre (Ezk 27^{17}), and to Egypt (Hos 12^{1}).

This abundance of oil furnished the Hebrew poets with a figure for material prosperity in general, as in Dt 33^{24} 'and let him dip his foot in oil.' From its being in daily use to anoint the heads of one's guests at a festive meal (Ps 23^{5} etc.), oil became by association a symbol of joy and gladness (Ps 45^{7}=He 1^{9}, Is 61^{3}).

A. R. S. K.—W. D. McH.

OIL TREE (*'ēṣ-shemen*, 1 K $6^{23,31-33}$ plural *'aṣê-shemen*), AV 'olive tree,' margin 'oily,' Hebrew 'trees of oil,' RSV 'olivewood'; Neh 8^{15} AV 'pine,' RSV 'wild olive'; Is 41^{19} AV and RV 'oil tree,' RVm 'oleaster,' RSV 'olive'). The precise nature of the 'tree of oil' is difficult to determine. Some kind of pine has been suggested (cf Neh 8^{15} AV), the resin of the

tree being regarded as its oil or the heartwood being regarded as fat enough to entitle it to the name. The oleaster (*Eleagnus angustifolia*), a beautiful and common shrub, would suit, except that it is difficult to see how it could ever have furnished a block of wood sufficient for the two cherubim 'each ten cubits high' (1 K 6^{23}). The Oxford *Hebrew and English Lexicon* has '*oil tree*, usually explained as wild olive, *oleaster*' (1032a). The name Oleaster was formerly used of the wild variety of *Olea europea*, with which has been identified the *agrielaios* ('wild olive' RSV) of Ro $11^{17, 24}$. That the 'oil tree' is the 'olive' is unlikely from Neh 8^{15} where the olive tree is mentioned just before, but that it may be the 'wild olive' is not ruled out by the argument that the leaves of the cultivated and wild varieties are so alike that the one would hardly be specified after the mention of the other. E. W. G. M.—W. D. McH.

OINTMENT.—With two exceptions, 'ointment' in our EV is the rendering in OT, of the ordinary word for 'oil,' and in some passages the ointment may have consisted of oil only. In most of the references, however, **perfumed oil** is undoubtedly meant. The two are distinguished in Lk 7^{46} 'You did not anoint my head with oil, but she has anointed my feet with ointment (*myron*).' The extensive use of *myron* in NT in the sense of 'ointment' shows that **myrrh** was then the favourite perfume. The dead body, as well as the living subject, was anointed with this ointment (Lk 23^{56}). Another 'very costly' unguent is described as 'ointment of pure nard' (Mk 14^{3}, Jn 12^{3} RSV; 'spikenard' RV); see SPIKENARD. These much-prized unguents were kept in pots of alabaster, as in Egypt, where they are said to retain their fragrance for 'several hundred years' (Wilkinson, *Anc. Egyp.* i, 426, with illustration).

In the Priests' Code there is repeated reference to a specially rich unguent, **'the holy anointing oil,'** the composition of which is minutely laid down in Ex 30^{23-25}. The ingredients, in addition to a basis of olive oil, are rendered in RSV as 'liquid myrrh,' sweet cinnamon, sweet calamus, and cassia. The penalty for the unauthorized manufacture and sacrilegious use of this sacred chrism was excommunication.

OLAMUS, 1 Es 9^{30} (AV, RV).—See MESHULLAM, **12.**

OLD GATE.—See JERUSALEM, GATES OF.

OLD LATIN VERSION.—See TEXT (OT and NT).

OLD TESTAMENT.—See BIBLE, CANON OF OT, TEXT OF OT.

OLIVE (*zayith*, cf Arabic *zeit* 'oil,' and *zeitūn* 'olive tree').—This tree (*Olea europea*) is the first-named 'king of the trees' (Jg 9^{8f}), and is, in Palestine at any rate, by far the most important. The scantily covered terraced hillsides, the long rainless summer of blazing sunshine, and the heavy night moisture of late summer afford climatic conditions which appear in a very special degree favourable to the olive. This has been so in all history; the children of Israel were to inherit 'olive-yards' which they planted not (Jos 24^{13}, Dt 6^{11}), and the wide-spread remains of ruined terraces and olive-presses in every part of the land witness to the extent of olive culture that existed in the past. A large proportion of the fuel consumed to-day consists of the roots of ancient olive trees. The peculiar grey-green foliage with its silver sheen, and the wonderful twisted and often hollow trunks of the trees, are very characteristic of Palestine scenery. The OT writers admired the beauty of the olive (see Hos 14^{6}, Ps 52^{8} 128^{3}, Jer 11^{16}). The cultivation of the olive requires patience, and presupposes a certain degree of settlement and peace: perhaps for this reason it was the emblem of peace. Destruction of a harvest of cereals is a temporary loss, but when the vines and, still more, the olives are destroyed, the loss takes many years to make good (Rev 6^{5f}).

The olive tree, grown from a slip taken from below the grafted branches of a selected fruitful olive, has to be **grafted** when three years old, but it does not bear fruit for some three or four years more, and not plentifully until it is about seventeen or eighteen years old; it may then, when well cared for, continue bearing for many years. The soil, however, must be carefully ploughed and manured every spring, and on the hill-sides the water of the early rains must be conducted to the very roots by carefully arranged channels. When after some years, the stem becomes too hollow from rotting of the wood, and the crop fails, it is sometimes cut sharp off at the root, and new shoots are allowed to spring up, which, after re-grafting, become a fruitful tree. Cf article GRAFTING.

The **wild olive** is a kind of reversion to the primitive plant—such as occurs also with the fig and the almond—and it takes place whenever the growth of the olive is neglected. Thus the little shoots which grow around the main trunk (perhaps the origin of Ps 128^{3}) are of the wild variety, and also those growing from the self-sown drupe.

In most neglected olive groves numerous little bushes of the 'wild olive' may be seen, which, though very unlike the cultivated tree—having a shorter, smaller, and greener leaf and a stiffer, more prickly stem—are nevertheless derived from it. As a rule the wild olive is but a shrub, but it may grow into a tree and have small but useless 'berries.' Where groves of wild olives are found in Palestine, they are probably always the descendants of cultivated trees long ago destroyed.

The young wild olive trees, scattered over the mountains in Galilee, are gathered by the *fellahîn* and sold for olive plantations. Such plants are grafted three years after transplantation, and always in the late spring or early summer.

The **'olive berries'** (Ja 3^{12} AV) ripen in the autumn, and are harvested in November or December. They are beaten from the trees with a long pole (Dt 24^{20}), and collected in baskets. Olives are eaten pickled in brine, either when green and unripe or when soft and black. They are universally eaten by the *fellahîn* with bread—sometimes the oil is eaten instead, much as butter is used in our home lands. The oil is also used extensively for making soup, for frying meat, and for illumination. See OIL. E. W. G. M.—W. D. McH.

OLIVES, MOUNT OF.—The heights E. of Jerusalem, separated from the Temple mountain by the Kidron Valley. It is rarely mentioned in the OT. David crossed it when fleeing from Absalom (2 S 15^{30}). Here branches were cut to make booths for the Feast of Tabernacles (Neh 8^{15}). Ezekiel (11^{23}) and Zechariah (14^{4}) make it the scene of ideal theophanies: the literal interpretation of the latter prophecy has given rise to many curious and unprofitable speculations.

The chief interest of the mountain, however, is its connexion with the closing years of our Lord's life. Over this He rode on His triumphal entry to Jerusalem; and wept over the city as it came into view (Lk 19^{41}); and during the days when He lodged in Bethany and visited Jerusalem He must necessarily have passed over it daily (Lk 21^{37}). The fig-tree which He cursed (Mt 21^{19}) was most probably on the mountain slopes; and here He is said to have delivered to His disciples the great eschatological discourse (Mk 13, Mt 24, 25). On the side of the mountain was Gethsemane (q.v.), where took place the first scene of the final tragedy.

The ridge, of which the mount is a part, is formed of hard cretaceous limestone, surmounted by softer deposits of the same material. It is divided, by gentle undulations and one comparatively deep cleft, into a series of summits. The name **Olivet** (Ac 1^{12} [RSV], 2 S 15^{30} [AV]) from Latin *Olivetum* 'olive grove,' probably applied only to the one opposite the Temple, still called *et-Ṭūr* 'the mount,' by the Arabs.

Ecclesiastical tradition, as might be expected, has been busy with the whole ridge opposite the city. The places pointed out have by no means remained unaltered through the Christian centuries, as becomes evident from a study of the writings of the pilgrims. To-day are shown the tomb of the Virgin; the grotto of the Agony; the Garden of Gethsemane; the chapel of the Ascension

(a mosque, with a mark in the floor said to be the 'footprint of Christ'); the site of Christ's weeping over the city; the place where He taught the Lord's Prayer; the place where the Apostles' Creed was composed, etc. The Ascension chapel is on the site of the *Inbomon*, an unroofed octagonal structure built about A.D. 380 for celebration of the Ascension. Remains of the Basilica built by Constantine's mother have been found in the court of the Carmelite Convent; it marked the scene of Christ's eschatological discourse (Mk 13[3], Mt 24[3]).

R. A. S. M.—E. G. K.

OLIVET.—See preceding article.

OLYMPAS.—The name of a mid-first cent. Christian of Rome [or Ephesus] greeted by St. Paul in Ro 16[15]. This is all that is known about him. Originally his short name was an abbreviation from some longer compound name such as 'Olympiodorus'—to cite a very familiar Hellenistic example. H. R. W.

OLYMPIAN.—An epithet of Zeus derived from Mount Olympus in Thessaly, the legendary home of the Greek gods. Antiochus IV. Epiphanes caused the Temple at Jerusalem to be dedicated to Zeus Olympius in 168 B.C. (2 Mac 6[2]), and the setting up of his altar there was the 'abomination of desolation' (Dn 9[27] 11[31] 12[11]).

At this very time Antiochus was contributing lavishly to the restoration of the stupendous Olympieion in its vast precinct just north-east of the Acropolis in Athens. Eventually this gigantic temple of Zeus Olympius became one of the greatest and richest sanctuaries of Olympian religion in the Graeco-Roman world.

A. E. H.—H. R. W.

OLYMPIUS.—See OLYMPIAN.

OMAERUS, 1 Es 9[34] (AV).—See AMRAM, 2.

OMAR (? 'eloquent').—A grandson of Esau, Gn 36[11, 15], 1 Ch 1[36].

OMEGA.—See ALPHA AND OMEGA.

OMENS.—See MAGIC, DIVINATION AND SORCERY.

OMER.—See WEIGHTS AND MEASURES.

OMRI.—**1.** See following article. **2.** A descendant of Benjamin, 1 Ch 7[8]. **3.** A Judahite, 1 Ch 9[4]. **4.** A prince of Issachar, 1 Ch 27[18].

OMRI was one of the most important kings of Israel, and the founder of a dynasty. He was one of the generals of the army under Elah, son of Baasha. This king was assassinated by Zimri, another of the officers. Omri was at the siege of Gibbethon at the time, and his troops acclaimed him king instead of his rival. A civil war of some duration followed, in which (apparently after the death of Zimri) one Tibni took part, himself aspiring to the throne. Omri finally prevailed, and for a time occupied the old capital Tirzah (1 K 16[16ff]). But he had the intelligence to perceive the advantages of the central and commanding position of Samaria as a site for his capital, which he founded and raised to great political importance.

Omri's political measures included an alliance with the Phoenicians, in which he had the example of David and Solomon, though subsequent generations condemned him for it. The alliance was cemented by the marriage of Ahab and Jezebel, so important for the later history. Omri seems to have been an able soldier, and he subdued Moab to Israel. This is acknowledged by the Moabite king Mesha in his inscription on what is known as the Moabite Stone (see MOAB). The wars with Damascus were not so successful. The Assyrians first became acquainted with Israel in the time of Omri, and they called the country 'the house of Omri' even after the extinction of his dynasty. The length of this king's reign is given as twelve years, but his rule was more important than we should infer from the brief record we have of his achievements in the OT.

H. P. S.—H. S. G.

ON.—A Reubenite associated with Dathan and Abiram, Nu 16[1]. But the text is doubtful.

ON (Gn 41[45, 50] 46[20]).—The Egyptian city of **Heliopolis**, situated on the E. border of the Delta, 7 miles NE. of Cairo. The Hebrew name is an accurate reproduction of the Egyptian *iwnw* (Copt. *ōn*), but has been intentionally misvocalized as **Aven,** 'idolatry,' in Ezk 30[17]. In Jer 43[13] it is called **Beth-shemesh,** 'House of the Sun,' like its Greek name *Hēliopolis,* 'City of the Sun.' The reference in Is 19[18] to the 'city of destruction' (AV, RV) or 'city of the Sun' (RSV) may refer to Heliopolis (see IR-HA-HERES).

As the centre of the worship of the sun-god in Egypt, its temple was of the highest importance: it was favoured by the kings and served by the most learned priesthood in the land. Tradition makes Plato and other Greek philosophers study in Heliopolis; later, the foundation of the Alexandrian library, on the one hand, deprived Heliopolis of the glory of learning and, on the other, the old traditions of royal descent from the sun-god had little weight with the Ptolemies. Early in the Roman period Heliopolis is described by Strabo as almost deserted. Besides enclosure walls of crude brick and mounds of rubbish, the site of the temple is now marked by one conspicuous monument, an obelisk set up by Senwosret I. *c* 1950 B.C. See Sir A. H. Gardiner, *Ancient Egyptian Onomastica* (1947), ii, 144*–146*.

F. Ll. G.—R. J. W.

ONAM.—**1.** The eponym of a Horite clan, Gn 36[23], 1 Ch 1[40]. **2.** A son of Jerahmeel, 1 Ch 2[26, 28].

ONAN.—A son of Judah, Gn 38[4] 46[12], Nu 26[19], 1 Ch 2[3]. After the decease of his elder brother, Er, he was instructed by his father to contract a levirate marriage with Tamar. The device by which he evaded the object of this marriage 'was displeasing in the sight of the Lord, and he slew him,' Gn 38[8ff].

ONESIMUS.—The slave from Colossae who, having become associated with Paul during one of the latter's imprisonments, became a Christian under the Apostle's influence. We do not know how Onesimus happened to be with Paul. It is usually surmised that he was a runaway slave who either happened to meet Paul or sought him out for help. Paul sent him back to his owner with what we know as the Epistle to Philemon. In this letter Paul explains that Onesimus has become not only very dear to him but also very useful, and he virtually asks the owner of the slave to release him for Paul's service. Since the letter was preserved, it may be supposed that this request was granted. If so, it is not surprising that the Bishop of Ephesus, when Ignatius wrote his Epistle to the Ephesians a generation or so later, was named Onesimus and that there are grounds for identifying the two men. See PHILEMON, EPISTLE TO. J. K.

ONESIPHORUS.—The name of a Christian mentioned twice in Second Timothy (2 Ti 1[16–18] and 4[19]). From the first reference we learn that he showed special kindness to Paul during his imprisonment at Rome, when others, from whom he might have expected sympathy and help, held aloof from him; from the second we infer that he and his family lived at Ephesus. From the expression 'the household of Onesiphorus,' it has been inferred that Onesiphorus himself was dead, and this text has been urged in proof of the lawfulness of prayers for the dead. M. St.

ONIAS.—Four high priests bore this name. **Onias I.** was son of Jaddua and father of Simon the Just (Sir 50[1], where, however, the Hebrew reads *John* in place of *Onias*). In his time a letter was said to have come from the Spartan king Areus I. claiming kinship and suggesting alliance (1 Mac 12[7f] [RV, RSV **Arius**]; cf Jos. *Ant.* XII. iv. 10 [225]).—**Onias II.** was the son of Simon the Just. His reluctance to pay the tribute of twenty talents to Egypt would have led to great trouble if his shrewd and self-seeking nephew Joseph had not conciliated Ptolemy (*Ant.* XII. iv. 2 [160 ff]).—**Onias III.** was son of Simon II., and entered on his office about 198 B.C. According to 2 Mac 3[1–4][38], he ruled the city well. A dispute arose between him and a man named Simon. The latter persuaded king Seleucus to send **Heliodorus** (4 Mac 4[1–14] substitutes **Apollonius**) to seize the Temple treasury. Heliodorus being supernaturally repulsed, Onias went to

Antioch to defend himself. He was deposed from his office. In 171 B.C. he was murdered (Dn 9[26]). The esteem in which his memory was held appears from 2 Mac 15[12-14].—His son **Onias IV.** fled to Egypt and was welcomed by Ptolemy Philometor, who gave him a disused temple in Leontopolis, which he rebuilt after the model of the one in Jerusalem, to serve as a centre of unity for the Hellenistic Jews (*Ant.* XIII. iii. 1, 3 [62 ff, 72 ff], *BJ* I. i. 1 [33], VII. x. 2 [421]). J. T.

ONIONS.—Hebrew *bᵉṣālîm*, Nu 11[5]. The onion (*Allium cepa*, Arab. *baṣal*) is and always has been a prime favourite in Palestine and Egypt.

ONO.—A Benjamite city, 1 Ch 8[12]; named with Lod and Hadid (Ezr 2[33] etc.), to which his enemies invited Nehemiah to conference (Neh 6[2]). It was reoccupied after the Exile, Neh 7[37] 11[35], 1 Es 5[22] (AV, RV **Onus**). It is identified with *Kefr ʿAnā*, to the N. of Lydda.

ONUS, 1 Es 5[22] (AV, RV).—See ONO.

ONYCHA.—Hebrew *shᵉḥēleth*, Ex 30[34]. One of the ingredients of the sacred composition which gave a sweet smell when burned; mentioned also in Sir 24[15] (AV, RV **onyx**). Onycha was obtained from the claw-like (hence the name from Greek *onyx* 'nail') operculum of some mollusc of the genus *strombus*. A similar product is still used in Upper Egypt for fumigations.
E. W. G. M.

ONYX.—See JEWELS AND PRECIOUS STONES, ONYCHA.

OPHEL.—See JERUSALEM, I, 1.

OPHIR.—A region famed for its gold (Job 28[16]), which was brought to Solomon by his Red Sea navy (1 K 9[28]). Jehoshaphat made an abortive attempt to revive this trade (1 K 22[48]).

The location of Ophir is uncertain. It is located in Gn 10[29] between Sheba and Havilah, hence in South Arabia. The mention of apes and baboons (EV 'peacocks') among Solomon's cargoes from Ophir, however, suggests remoter regions, which have been sought in Africa and India. Since such a trading voyage lasted three years (1 K 10[22]), it is suggested that Ophir must have been further away than South Arabia or Somaliland (Punt), which is known in Egyptian inscriptions as a source of gold. In favour of East Africa is the known Phoenician contact with the region between the Zambesi and the Limpopo. The Sanskrit origin of the word for apes, however, suggests contacts with India. In view of the Biblical tradition that Ophir was in Arabia (known to the Phoenicians as auriferous, Ezk 27[22]), it is safest to regard Ophir as in South Arabia, and as an important entrepot for merchandise from further East and also from East Africa. Doubtless the three-year duration of Solomon's trading ventures is to be explained by incidental coasting trade, and the fact that sailing, both from Ezion-geber to South Arabia and from more distant regions to South Arabia, was confined to a part of the year.

The LXX version of Ophir with an initial Σ has suggested *Sofala*, some 200 miles from the famous ruins of Zimbabwe in East Africa and *Supara* in Goa on the Malabar Coast. This probably reflects the sea-borne trade with India in Ptolemaic times.
R. A. S. M.—J. Gr.

OPHNI.—A town of Benjamin, Jos 18[34]; possibly modern *Jifnā*.

OPHRAH.—**1.** A town in Benjamin, Jos 18[23]; it was near Michmash, and is only once elsewhere referred to, as an indication of the direction of a Philistine raid. 1 S 13[7]. Jerome states that it was 5 Roman miles E. from Bethel. It is perhaps modern *eṭ-Ṭaiyibeh*. **2.** Ophrah 'which belonged to Joash the Abiezrite'—*i.e.* to a member of a sept of the tribe of Manasseh (Jos 17[2]), was the native village of Gideon. It is not mentioned except in connexion with the history of him and of his son Abimelech (Jg 6–9). No satisfactory identification has been proposed. **3.** A name in the genealogy of the tribe of Judah, 1 Ch 4[14].

ORACLE.—See MAGIC, etc., TEMPLE.

ORAL TRADITION.—**1. Old Testament.** The phrase may have two references, (*a*) the Cabbala (Heb. *ḳabbālāh*, 'received'), originally the detailed application and elaboration of the written Torah (cf Neh 8[7f]) which also, it was claimed, went back to Moses, and which in effect attained a superior authority (cf Mt 15[1-6]). This Cabbala eventually crystallized into written form as Massorah and Talmud. (The name Cabbala also attaches to a mediaeval esoteric mystico-magical system of philosophy.) (*b*) More commonly the phrase refers to a theory of the mode of transmission of the words of Scripture from their first publication until finally written down in their definitive form.

No one would deny that some sections of the OT subsisted orally for at least a short period; but it has recently been maintained that 'the written OT is a creation of the post-exilic Jewish community; what existed before was certainly only in small part fixed in writing' (H. S. Nyberg, *St. z. Hoseabuche*, 1935). This would fit in with the tradition that Ezra's amanuenses wrote out the whole OT at his dictation (2 Es 14[19-48]); but the more 'official' view of Josephus (*c. Ap.* i. 7 [38-42]) and the Talmud (*Baba Bathra*, 14b–15a) does not describe him as custodian of an *oral* tradition, and Esdras attributes Ezra's knowledge to an *ad hoc* Divine revelation, not to a retentive memory. At the same time critical scholarship has until recently hardly given sufficient prominence to the probable rôle of oral transmission in Israel: a rôle illuminated by comparison with other ancient cultures (see Nyberg, *op. cit.*; H. Birkeland, *Z. hebr. Traditionswesen*, 1938; I. Engnell, *Gamla Testamentet. En traditionshistorisk inledning*, i, 1945; but also the more cautious attitude in S. Mowinckel, *Prophecy and Tradition*, 1946, and A. Bentzen, *Intro. to the OT*, i, 1948, pp. 102 ff. Strong counter-arguments are put forth in G. Widengren, *Literary and Psychological Aspects of the Hebrew Prophets*, 1948. E. Nielsen, *Oral Tradition*, 1954, accepts very largely Engnell's position).

There is as yet no generally agreed solution to the Oral *v.* Written Transmission controversy, but the following points must be given their due weight: (1) Comparative studies (Arabian, Celtic, Norse, Polynesian, etc.) show the amazing powers of memorization possessed by the professional memorizer (Arab. *qaṣṣ*, Irish *shanachie* and *fili*; there is no Hebrew term whose equation has yet been proved), whose repertoire might last for weeks or even months of oration. (2) Writing, like reading, was the province mainly of the specialist, who for obvious reasons was likely to be attached to the palace or the temple—no doubt like the official memorizer (might this have been the function of the Hebrew *mazkîr*?). (3) The OT as we have it is entirely a written work; literary criticism is therefore indispensable, though some features may be more easily explicable on the theory of a preceding oral transmission, than on principles of strictly literary criticism. (4) In the pre-exilic period it is not necessary that either form should have been exclusively used; oral transmission might easily have proved the more customary for one type of material, written transmission for another. Nielsen (*op. cit.*, p. 32) envisages the possibility of an alternation. (5) On the score of reliability there does not seem to be much to choose in the given circumstances between the two methods: each has its advantages and disadvantages.

There seem to be grounds for naming the 7th cent. as the period when the main emphasis shifted from oral to written literature; nevertheless, in a largely illiterate society, books are of limited use, and the nation as a whole must have depended on well stocked memories not only for entertainment, but for more serious guidance from the past. If, as might well be possible, the sack of Jerusalem in 586 B.C. destroyed many of the books represented in our OT, there were probably those who could reproduce verbatim from the storehouse of memory all that had been burnt. The question of the

reliability of Scripture is not really affected one way or the other by this problem.

2. New Testament. Here there is comparatively a very limited field for oral tradition. Written transmission was by now the norm; 'Oral Literature' in the NT must be confined to possible catechetical instruction (partly of Judaic origin?) incorporated in the Epistles, to the sources of the Gospels and Acts, with perhaps some of the imagery of Revelation: apart from the last, therefore, the period covers scarcely more than a generation, which must also have been one of constant reiteration, thus avoiding the great foe of oral transmission, lack of an audience. [See further, V. Taylor, *The Formation of the Gospel Tradition*, 1933; E. B. Redlich, *Form Criticism*, 1939; P. Carrington, *The Primitive Christian Catechism*, 1940; E. G. Selwyn, *The First Epistle of Peter*[2], 1947.] See CRITICISM, **4**. D. R. Ap-T.

ORATOR.—The term (Gr. *rhētōr*, RSV 'spokesman') applied in Ac 24[1] to Tertullus, who was the advocate for the high priest and elders against St. Paul. Men of this class were to be found in most of the provincial towns of the Roman Empire, ready to plead or defend any cause, and generally possessed of a certain amount of glib eloquence, with a due admixture of flattery. M. St.

ORCHARD.—Hebrew *pardēs*, a Persian loan-word, Ec 2[5] (AV; RV, RSV 'park'), Ca 4[13] (AV, RV, RSV; RVm 'paradise'). The same word is found in Neh 2[8] (AV, RV, RSV 'forest'; RVm 'park'). See PARADISE.

ORDEAL.—See MAGIC, **B**, **2** (*b*).

ORDER.—See PRIEST (in NT).

ORDINANCE.—See DECREE.

ORDINATION.—See LAYING ON OF HANDS.

OREB AND ZEEB.—Two princes of Midian in the invasion of Israel, mentioned in Jg 7[25] 8[3], Ps 83[11] (cf Is 10[26]). The meaning of the names is 'raven' and 'wolf.' Associated with the invasion put down by Gideon these two princes were killed by the men of Ephraim, who rose at Gideon's suggestion and intercepted the princes and their followers at the river Jordan. That their death, so briefly narrated in Judges, was accompanied by great slaughter may be inferred from the incidental references by the writers of Ps 83 and Is 10. Isaiah compares the destruction to that of the Egyptians in the Red Sea, while the Psalmist compares the flying Midianites to the whirling dust or chaff driven before the wind. The rock Oreb and the winepress Zeeb took their names from this incident. T. A. M.

OREN.—A son of Jerahmeel, 1 Ch 2[25].

ORGAN.—See MUSIC, etc. **4** (2) (*b*).

ORION.—See STARS.

ORNAMENTS.—**1.** The custom of wearing ornaments either as personal adornment or as amulets, or for both purposes combined, is almost coeval with the appearance of man himself. In historical times in Palestine, as elsewhere, these ornaments were chiefly of gold, silver, bronze, and paste, but the excavations have shown that in the neolithic age a favourite ornament was a string of sea-shells. The Hebrews, especially the Hebrew women, shared to the full the Oriental love of ornaments, which are denoted in OT by two comprehensive terms, *kᵉlî*, generally rendered 'jewels' (Gn 24[53], Ex 3[22] and often), and *ʿᵃdhî*, rendered 'ornaments' (Ex 33[4, 6], Ezk 16[11] etc.). Lists of individual ornaments are found in such passages as Ex 35[22], Nu 31[50], Is 3[18ff], Ezk 16[11f], Jth 10[4], although the identification of each article is not always certain.

2. Ear-rings, always of gold or silver where the material is stated, are frequently named, from Gn 35[4] onwards. In this passage their character as amulets is clearly implied. Among the Hebrews ear-rings were apparently confined to women, and to children of both sexes (Ex 32[2]), for the **'rings'** of Job 42[11] RV and RSV are not necessarily ear-rings as AV. The only men expressly mentioned as wearing them are Midianites (Jg 8[24ff]). For illustrations of gold ear-rings found at Gezer see Macalister, *Bible Sidelights from Gezer*, Fig. 32, reproduced in Benzinger, *Heb. Arch.*[3] (1927) 91. The 'ear-rings' of Is 3[20] AV rightly appear in RV and RSV as **'amulets'** (see AMULET). The **pendants** of Jg 8[26] RV and RSV (AV **'collars'**) and Is 3[19] RV and RSV (AV **'chains'**), to judge from the etymology of the original term, had the form of drops or beads, although it is unknown whether they were worn in the ears or as a necklace.

The custom still observed by the Beduin women of wearing a ring through the right nostril (Doughty, *Arab. Deserta*, i, 340; ii, 220, 297) was also in vogue among the Hebrew women. Such was the **nose-ring** presented to Rebekah, wrongly given in AV as an ear-ring (Gn 24[22], note v.[47]), as also the **'nose jewels'** worn by the ladies of Jerusalem (Is 3[21]). Although Ezk 16[21], as correctly rendered by RV and RSV, cannot be cited in support of wearing ornaments on the forehead as AV suggests ('a jewel on thy forehead'), this practice is attested by the figure in Ex 13[16], Dt 6[8] 11[18], where the word rendered **'frontlets'** (between the eyes) really denotes a jewel or amulet (see Hastings' *DB* iii, 872, confirmed by Smend's reading of the Hebrew text of Sir 36[3]). For a real frontlet, see **6** below.

3. Several varieties of neck ornament occur, but here again the precise nature of each escapes us. The **'chains'** (RV) of Pr 1[9], Ca 4[9] are clearly **necklaces**; the same word is used of the chains hung as amulets about the necks of the Midianite camels (Jg 8[26]). The 'strings of jewels' of Ca 1[10] RV and RSV were probably a necklace of beads. A special form of necklace or breast ornament was composed of **crescents** of gold (Jg 8[26], Is 3[18], RV and RSV). Cf AMULET, and illustration in *PEFSt*, 1905, 314, Pl. IV. The wide-spread custom of wearing a gold chain of office on neck and breast is met with in Egypt (Gn 41[42]) and Babylon (Dn 5[7, 16, 29]).

4. Like other Eastern peoples, the Hebrews were fond of decking the arms and hands with ornaments. The term most frequently used for the **finger-ring** (*ṭabbaʿath*) properly denotes a signet-ring, as in Gn 41[42] RV, RSV, Est 3[12], for which see SEAL. From the use of an engraved **cylinder** for this purpose was developed a form of ring found in the excavations, consisting of a small cylinder of stone or paste, or of more than one, fitted into a ring of silver or gold (see illustration in *PEFSt*, 1905, Pl. IV., and Benzinger, *op. cit.* 90, from Sellin's work cited in **6**). Ordinarily, however, *ṭabbaʿath* denotes a plain finger-ring (Ex 35[22], Nu 31[50], Is 3[21], Lk 15[22]) such as those found at Taanach (**6**).

Of the various terms rendered **bracelet** in AV, the most common is *ṣāmîdh*; Rebekah's weighed 10 shekels, and was of gold (Gn 24[22, 30, 47]; cf Nu 31[50], Ezk 16[11] 23[42]). The bracelets of Is 3[19] seem to have been made of twisted strands of gold wire. The word 'bracelet' in 2 S 1[10] more probably denotes an **armlet** or arm-band, worn on the upper arm. It is rendered **'ankle-chains'** in Nu 31[50] RV, while a cognate word of the same meaning occurs in Is 3[20] (AV 'ornaments of the legs'), and in the emended text of 2 K 11[12], where the crown and the arm-band (EV **'testimony'**) are named as insignia of royalty. Similarly, the bracelet worn 'upon the right arm' (Sir 21[21] EV) is an armlet, as is seen from the list of Judith's ornaments, who 'decked herself bravely' with her anklets (AV, RV 'chains'), 'and her bracelets, and her rings, and her ear-rings, and all her ornaments' (Jth 10[4]). The nature of the ornament given in AV as **tablets** and in RV and RSV as 'armlets' (Ex 35[22], Nu 31[50]), is quite uncertain. RV and RSV rightly find **anklets** in Is 3[18]; these the ladies of Jerusalem rattled as they walked (v.[16] *end*).

5. In a separate category may be placed such articles as, in addition to being ornamental, served some useful purpose in connexion with dress. Among these may be reckoned the gold **brooches** of Ex 35[22] RV and RSV (AV 'bracelets,' literally 'hooks'), and the **'buckle** of gold' of 1 Mac 10[89] etc. There seems to be no reference in OT to the ornamental pins in gold, silver, and bronze which

are found in considerable numbers at Gezer and elsewhere. For illustrations of typical pins and brooches found at Gezer, see Macalister, *op. cit.* Fig. 34.

6. This article would be incomplete without a fuller reference to the countless specimens of ancient jewellery, recovered from the sands of Egypt and the soil of Palestine, which serve to illustrate the ornaments above mentioned. The jewellery of the early Egyptian goldsmiths (Ex 3^{22}), as is well known, has never been surpassed in variety and delicacy of workmanship. The excavations at Gezer, Taanach, and Megiddo have revealed an unexpected wealth of gold and silver ornaments. One of the most remarkable of these finds is that described by its fortunate discoverer, Dr. Sellin, in his *Nachlese auf dem Tell Ta'annek*, 1906, 12 ff (cf *PEFSt*, 1905, 176). Beneath the debris of a Canaanite house were found the remains of a mother and her five children, and beside the former the following ornaments: a gold band for the forehead, 8 gold rings, of which 7 were simple bands of gold wire, while the eighth was of several strands of wire, 2 silver rings, 2 larger bronze rings, perhaps bracelets, 2 small cylinders of crystal, 5 pearls, a scarab of amethyst and another of crystal, and finally a silver fastener (all illustrated *op. cit.* Pl. IV. and Fig. 16).

The ornaments found in still greater variety in the mounds of Gezer are described and illustrated in the *PEFSt* from 1902 onwards. A special interest attaches to certain graves, probably of Philistine origin and of a date *c* 1000 B.C., in which a profusion of jewellery has been found similar in character and workmanship to the ornaments of the Mycenaean age found in Cyprus and Crete. For a description of the armlets, bracelets, anklets, rings, etc., found in these graves, see *PEFSt*, 1905, 318 ff and Pl. VI.; 1907, 199 ff and Pl. I., 240 ff.

A. R. S. K.

ORNAN.—See ARAUNAH.

ORPAH.—A Moabitess, sister of Ruth and daughter-in-law of Naomi. When the latter was returning to her own country, Orpah, following Naomi's advice, elected to go back to her own people and to her god (or gods), while her sister went with her mother-in-law, Ru 4^{14}.

ORPHAN.—The orphan is frequently linked with the widow in appeals to the charity of men (*e.g.* Dt 14^{29}, Is 9^{17}), in demands for justice (Dt 24^{17}, Is 1^{11}), or in denunciations of the oppression of those who took advantage of these defenceless persons (Is 10^{2}, Job 22^{9} 24^{3}). It is nowhere clear that the word means one who has lost both parents, and EV render 'fatherless' in most of its occurrences.

ORTHOSIA (1 Mac 15^{37}).—Placed by the Peutinger Tables 12 Roman miles N. of Tripoli, and 30 S. of Antaradus. The name has not been recovered.

OSAIAS, 1 Es 8^{48} (AV, RV).—See JESHAIAH, 5.

OSEA, 2 Es 13^{40} (AV, RV)=king **Hoshea** (q.v.).

OSEAS, 2 Es 1^{39} (AV, RV)=**Hosea** (q.v.).

OSEE, Ro 9^{25} (AV)=**Hosea** (q.v.).

OSNAPPAR (so RSV and RV Ezr 4^{10}, following some MSS; **Asnapper** of AV, or **Asenapper** represents a better transliteration). A distorted form of **Ashurbanipal**—possibly accidentally shortened—last great king of Assyria (669–*c* 632 B.C.), son of Esarhaddon, grandson of Sennacherib. A man of great ability and wide range of interests, claiming for himself ability to read Sumerian and Akkadian literature as well as being proficient in the handling of weapons and horses. He gathered a rich collection of Sumerian and Akkadian literature in his library at Nineveh, aiming at preserving this literature by having careful copies made. Their recovery in modern times has provided valuable material for study. His palace was also richly ornamented with reliefs. His choice as heir, rather than his elder brother Shamash-shum-ukin, is indicative of his greater energies and gifts. But his reign nevertheless marked a decline of Assyrian power. Egypt was lost by 656 B.C., and an attempt at reconquest failed. In 652 B.C. his brother Shamash-shum-ukin, ruler in Babylon, rebelled in alliance with Elamites and others; but Ashurbanipal was able to deal with the rebels piecemeal. Babylon fell in 648 B.C. after a two-year siege, and Elam was only conquered after a long struggle in 639 B.C., and it must have been after this event that Elamites from Susa, the capital, were deported to Samaria and its vicinity (Ezr 4^{9f}). According to 2 Ch 33^{11}, Manasseh, king of Judah, was brought in fetters to Babylon, and this event, if historical, must presumably have fallen within the reign of Ashurbanipal. On this see MANASSEH.

J. F. McC.—P. R. A.

OSPRAY (AV).—See OSPREY.

OSPREY (*'ozniyyāh*, Lv 11^{13}, Dt 14^{12}).—The Hebrew *'ozniyyāh* is traditionally identified with the 'fish-eating eagle' (LXX, Vulgate), osprey or ossifrage (*pandion haliaetus*); but this does not suit its position in the list of unclean birds, and it is probably otherwise called (see OSSIFRAGE). If the name is derived *per metathesim* from the √ *'NZ* (hence Akk. *enzu*=Heb. *'ēz*=Arab. *'anzu*, 'goat'), it may be the 'bearded vulture' (*gypaetus barbatus*), which has a goat-like beard. This etymology is quite uncertain (see OSSIFRAGE), and very possibly the 'short-toed eagle' (*circaetus gallicus*), which comes between vultures and hawks in size, is meant. This is far the commonest eagle in Palestine which it visits in the summer; it is a magnificent, large and heavy, bird which sits on a tree or rock all day watching (hence perhaps translated *'ār*, 'watcher,' in the Targum) for lizards or serpents, which constitute its sole diet. Cf also GIER EAGLE.

G. R. D.

OSSIFRAGE.—Lv 11^{13} (AV, RSV), Dt 14^{12} (AV; RSV 'vulture'). The Hebrew *peres*, 'smasher,' is probably not the 'gier-eagle' (RV, with LXX and Vulgate), but the 'bearded vulture' (*gypaetus barbatus*) or perhaps the black or 'Arrian's vulture.' Both the bearded vulture and the true ossifrage (of which 'ospray' or 'osprey' is a corruption) drop their victims repeatedly from a great height on to a rock or stone until their bones are thoroughly smashed when they extract the marrow, which they consume as well as the flesh.

G. R. D.

OSTRICH.—Three Hebrew words are commonly taken as designating the ostrich. The first is *bath ya'ănāh* (found in Lv 11^{16}, Dt 14^{15}, Job 30^{29}, Is 13^{21} 34^{13} 43^{20}, Jer 50^{39}, Mic 1^{8}), which, however, is most probably an owl (AV; see OWL), not the ostrich (RV, RSV). The second is *yᵉ'ēnîm*, which properly means 'greedy ones' (cf Syr. *ya'în*, 'greedy') and certainly connotes 'ostriches' (LXX, Symmachus, Vulgate), so called in consequence of their swallowing anything and everything whether edible or inedible (*e.g.* stones, nails, bullets), a habit engendered by their hard life in the sterile wilderness. They are mentioned *eo nomine* only once in the OT as a symbol of maternal cruelty (La 4^{3}). The third is *rᵉnānîm*, a name which means 'shouts of joy; rattlings' or the like (cf Heb *rānan*, 'shouted with joy,' and Arabic *ranna*, 'twanged; rattled') and seems to have been given to the ostrich (Vulgate; so RV, RSV; AV 'peacocks') either on the principle of *lucus a non lucendo* because of its hard and dreary desert life (like the Arab. *na'âmatu*, 'delight; wilderness; ostrich') or as echoing the loud dolorous and stridulous cries which it emits at night. In the OT this word occurs only once, where it refers to the hen-ostrich, which is depicted as unable with her atrophied wings and deficient plumage to give proper care to her eggs and chicks and so brainless as to go careering across the wilderness like her mate when she ought to be caring for her brood (Job 39^{13-18}). The myth of her lack of maternal instinct is based on a misunderstanding of the bird's habits. The ostrich is polygamous, and a group of three or four hens, jealously guarded by a cock, lay ten or twelve eggs each in a common nest, covering them carefully with sand; by day the sun's heat suffices as an incubator, and the birds leave them to go in search of food, but at night they take turns in keeping the eggs warm. A few scattered eggs are also laid round the nest,

whether by accident or design, and these are left to be used as food by the chicks when hatched. The neglect of these eggs and the abandonment of the nest by day, as well as the parents' habit of deserting the poults when closely pursued by an enemy (which is necessary for self-preservation in country where no cover is available), are between them responsible for the fiction that the ostrich is deficient in natural affection. The ostrich (*Struthio camelus*) still maintains a precarious existence in diminishing numbers in the Syrian wilderness. (In Job 39^{13b} AV 'ostrich' is a mistranslation. See STORK.)

E. W. G. M.—G. R. D.

OTHNI.—A son of Shemaiah, 1 Ch 26^{7}.

OTHNIEL.—According to Jos 15^{17} and Jg 1^{13} the son of Kenaz, Caleb's younger brother. As a reward for taking Kiriath-sepher, he receives Achsah, the daughter of Caleb, for his wife. Othniel is the first mentioned among the 'Judges' of Israel; Cushan-rishathaim (q.v.), king of Mesopotamia, had oppressed the Israelites for eight years when Yahweh 'raised up a deliverer' in the person of Othniel, who fought against the oppressor and overcame him, thus bringing rest to the land. W. O. E. O.

OTHONIAH, 1 Es 9^{28}.—See MATTANIAH, 5.

OTHONIAS, 1 Es 9^{28} (AV, RV).—See MATTANIAH, 5.

OUCH.—The word 'ouch' is used in AV and RV (Ex 28$^{11, 13t}$ etc.) for the setting (so RSV) of a jewel, but it is also used in Old English for the jewel itself. See BREASTPIECE (of the High Priest).

OVEN.—See BREAD.

OWL.—Six Hebrew words are rendered 'owl' in the English Bible: (1) *bath ya'anāh* (AV; but **'ostrich'** (q.v.) in RV, RSV); (2) *yanshûph*, 'owl' or 'great owl' (AV and RV; but **'bittern'** in RVm in Is 34^{11}; RSV **'ibis'** in Lv 11^{17}): (3) *kôs*, 'owl' or 'little owl'; (4) *kippōz*, 'great owl,' Is 34^{15} (AV; 'owl' in RSV; but **'arrowsnake'** (q.v.) in RV); (5) *tinshemeth*, 'horned owl' (RV; but **'swan'** in AV and **'water hen'** in RSV); (6) *lîlîth*, **'screech owl'** (AV; but **'night monster'** in RV and **'night hag'** in RSV). Owls are extremely common in Palestine, and the exact identification of several of those mentioned in the Bible must remain in doubt for lack of information; indeed, some of the words may be alternative or local names for the same bird. There appear in fact to be eight terms designating owls, arranged in descending order by their sizes, in the list of unclean birds (Lv 11$^{13-19}$, Dt 14$^{11-20}$), in which as *raptores* they are naturally included; for they consume the blood with the flesh of their victims. (i) The *bath ya'anāh* 'daughter of the wilderness,' usually but wrongly translated **'ostrich'**; for this does not require water (Is 43^{20}; cf 34^{13}), does not haunt ruins (Is 13^{21}, Jer 50^{39}) and does not wail (Mic 1^{8}); such are habits of owls. This owl, the first and therefore the largest in the list, is probably the **'eagle-owl,'** a large owl numerous in Palestine in semi-desert districts covered with scrub and feeding on partridges, hares, and rodents; in Egypt it haunts precipitous cliffs and temples whether intact or ruined. (ii) The *taḥmās* (Lv 11^{16}, Dt 14^{15}; EV **'night hawk'**), whose name means 'robber' (cf Aram. *ḥ'mas* 'robbed') is translated 'owl' by the earliest versions (LXX, Vulgate); it may be the 'short-eared owl,' a middling one which takes small rodents and birds alive, though rare (perhaps only a visitor in winter) in Palestine. (iii) The *shaḥaph* (Lv 11^{16}, Dt 14^{15}), wrongly translated **'sea gull'** (LXX, Vulgate; so RSV; AV **'cuckow,'** RV **'seamew'**), is likely from its position to be another owl, possibly the 'long-eared owl,' described as a very thin owl with a body very attenuated when at rest (cf Arab. *saḥufa* 'was thin, lean, emaciated'). (iv) The *kôs*, Lv 11^{17} (EV 'little owl'), Dt 14^{16} (AV, RV 'little owl,' RSV 'owl'), Ps 102^{6} (EV 'owl'), is by general consent an owl (LXX, Peshitta, Vulgate), being so called from its cry of 'chu-chu-chu'; its measurements and position in the list suggest the 'tawny owl' (cf German *Kauz*, 'tawny owl'), which is seldom seen but whose unmistakeable hoot is often heard at night. The *kôs* is mentioned only once as an 'owl of desolate places' (Ps 102^{6}); so the tawny owl haunts lonely woods and forests. (v) The *shālākh*, Lv 11^{17}, Dt 14^{17}, whose name comes from a root denoting plunging or the like (cf Arab. *salaka* 'went forward, entered'), has been taken for some plunging or diving bird (LXX, Vulgate), usually the **'cormorant'** (EV), which is impossible in view of its position amongst the owls; it is described as drawing up fish from the sea (Peshitta, Targum) and may therefore be the 'fisher owl,' although this bird is not common in Palestine. (vi) The *yanshûph*, or *yanshōph*, translated **'ibis'** in the earliest versions (LXX, Vulgate; so RSV in Lv 11^{17}, but 'great owl' in Dt 14^{16}, and 'owl' in Is 34^{11}), though not found in Palestine, is probably another owl (Peshitta, Targum; AV, RV 'great owl' in Lv 11^{17}, Dt 14^{16}, and 'owl' in Is 34^{11}); for its name means 'hisser' (cf Heb. *nāshaph* 'blew, hissed'), which agrees with the owls' well-known habit of breathing heavily or panting. It may be the 'screech-owl,' a very nocturnal bird which though seldom seen by day is abundant in Palestine; it emits a long-drawn but not very loud hissing, puffing, or snoring, sound and a raucous shriek or snaps its bill and hisses; it breeds in hollow trees, buildings, and ruins, but always in darkness, and the young birds snore in the nest. (vii) The *tinshemeth* (Lv 11^{18}, Dt 14^{16}, AV **'swan,'** RV **'horned owl,'** RSV **'water hen'**), whose name similarly means 'panter' (cf Heb. *nāsham* 'panted'), may perhaps be the 'little owl,' whose low wailing note is very often heard at sunset; it is the most widely distributed owl in Palestine, haunting thickets by the water-side and wells, tombs, and desolate mounds of ruined cities, whence it is called *'umm al-khirāb* 'the mother of ruins' by the Arabs. (viii) The *ḳā'āth* is almost certainly the **'scops-owl,'** though long wrongly taken to be the **'pelican'** (q.v.). The *lîlîth*, formerly translated 'screech-owl' (AV) or 'night-monster' (RV; RSV 'night hag'; cf Milton's 'night-hag') is probably the **'night-jar'** or **'goat-sucker'**; for it is mentioned beside he-goats as a symbol of desolation (Is 34^{14}) and so seems in time to have come to be regarded as a demon haunting ruins. Several species of goat-sucker are found in the desolate parts of Egypt and the desert fringe of Palestine; the Egyptian goat-sucker (*caprimulgus aegyptius*) lives exclusively in desert sandy land, skulking in the day but coming out in search of food at twilight, and the Palestinian goat-sucker (*caprimulgus tamaricis*) frequents tamarisk-bushes and other desert shrubs in the most desolate regions at either end of the Dead Sea. The name may come from its nocturnal habits (cf Heb. *laylāh* 'night') or from its weaving circular flight (cf Heb. *liwyāh* 'chaplet,' Arab. *lawā* 'twisted'; Eth. *lēlaya* 'twined oneself about' and *lōlawa* 'flicked and twisted'). That it is named next to the goat in the prophet's description of the desolation of Edom is due to the legend that it sucks the milk of she-goats, although the story reported by both Aristotle and Aelian is quite untrue. G. R. D.

OX.—An ancestor of Judith (Jth 8^{1}).

OX, OXEN, HERD, CATTLE.—The essential difference between sheep and cattle-keeping in the Bible is seen in the way terms relating to the former distinguish clearly between male and female, young and old (see SHEEP), whereas the dozen or so words for cattle are, in general, almost interchangeable. They include *miḳneh*, which corresponds to our 'stock,' *b'hēmāh*, 'domestic animals'; *bāḳār*, 'oxen' in general which may be subdivided to *'eleph* and *shôr*, the male working ox, *par*, 'the bull' and *pārāh* 'cow,' and *'ēghel*, 'heifer.' Oxen were used for sacrificial purposes, and their cultic significance may be seen also in the twelve brazen oxen beneath the Sea in Solomon's Temple (1 K 7$^{25, 44}$). In everyday affairs they were the beasts of draught and burden, and consequently they were not allowed to roam about in search of pasture. They did the heavy

work on the land. They ploughed in pairs, not, however, by decree, yoked to an ass though this is a common sight in Jordan to-day, and, apparently, always has been. In Israel, oxen are still occasionally to be seen ploughing, but normally they have been replaced by the tractor. They threshed the corn, unmuzzled, either by treading out the corn on the threshing-floor, or by dragging a threshing sledge. Apart from the Israeli stock, which compares favourably with that of any land, the Palestinian cattle are still very degenerate. They are rarely milked or slaughtered for meat. They are small, light brown in colour: they normally drop their calves in March–April, but breed at most only in two out of three years. Because of their traditional cultic use, bones of cattle have been recovered from ancient shrines everywhere, *e.g.* the Gezer excavations have produced them at all levels, and they all show the beasts to have been better nourished than they are to-day. B. J. R.

OX-GOAD.—See AGRICULTURE, **1.**

OZEM.—1. An elder brother of David, 1 Ch 2^{15}. **2.** A son of Jerahmeel, 1 Ch 2^{25}.

OZIAS.—1. 1 Es 8^{2} (RV); see UZZI, **1.** **2.** 2 Es 1^{2} (AV, RV); see UZZI, **6.** **3.** 1 Es 5^{31} (RV); see UZZA, **2.** **4.** Jth 6^{15} 7^{23} $8^{10, 25, 35}$ 10^{6} (AV, RV); see UZZIAH.

OZIEL.—An ancestor of Judith (Jth 8^{1}).

OZNI.—Eponym of a Gadite family, Nu 26^{16}; called Ezbon in Gn 46^{16}. The patronymic Oznites is found in Nu 26^{16}.

OZORA, 1 Es 9^{34} (AV).—See EZORA.

P

PAARAI.—See NAARAI.

PACE.—See WEIGHTS AND MEASURES.

PACHON (month).—See TIME.

PADDAN, PADDAN-ARAM (the former in Gn 48^{7} only).—The name used by P for the region (or part of it) designated by J **Aram-naharaim** (see ARAM): see Gn $28^{2, 5, 7}$ 31^{18} $35^{9, 26}$ 46^{15}. *Padanu* in Assyrian denotes a measure of land.

PADDLE occurs only in Dt 23^{13}, where it is used of a wooden tool for digging, a spade (RSV 'stick'). In earlier English a small spade used for cleaning the ploughshare was called 'a paddle' which explains the choice of this word in the Geneva Bible, whence it reached AV and RV.

PADON.—A family of Nethinim (q.v.) who returned with Zerubbabel, Ezr 2^{44}, Neh 7^{47}, 1 Es 5^{29} (AV, RV **Phaleas**).

PAGIEL.—Chief of the tribe of Asher, Nu 1^{13} 2^{27} $7^{72, 77}$ 10^{26}.

PAHATH-MOAB.—The name of a Jewish clan which consisted of two branches, Jeshua and Joab. Part of it returned with Zerubbabel, part with Ezra and part remained in Babylon, Ezr 2^{6} 8^{4}, Neh 7^{11}, 1 Es 5^{11} (AV, RV **Phaath Moab**) 8^{31} (RV **Phaath Moab**). The word has been read to mean 'governor of Moab,' and referred to a dominion once exercised over Moab. It is, however, more probable that we have a corrupted text.

PAI.—The capital city of Hadad (1 Ch) or Hadar (Gn), 1 Ch 1^{36}, Gn 36^{39} (in the latter called **Pau**). The site is unknown.

PAINFULNESS.—In Ps 73^{16} AV 'When I thought to know this, it was too painful (so RV; RSV 'a wearisome task') for me,' as well as in 2 Es 7^{12} AV (RV 'charged with great toils,' RV 'involved in great hardship') and 2 Mac 2^{26} AV (so RV; RSV 'toil' for 'painful labour'), 'painful' means 'laborious.' So in 2 Cor 11^{27} AV 'painfulness' (RV 'travail,' RSV 'hardship') means 'laboriousness.' Hooker says 'The search of knowledge is a thing painful, and the painfulness of knowledge is that which maketh the will so hardly inclinable thereto.'

PAINT.—In Jer 22^{14} occurs the only reference to house painting in the Bible. Here the colour vermilion was used. In Ezk 23^{14} the same colour is mentioned for portrayal of images of the Chaldaeans. See also ART. For **eye-paint** see EYE.

PALACE.—Primarily 'palace' denotes a large house (cf Jer 22^{14}), and especially a grouping of a number of rooms around a central courtyard. The distinction between a large house and a 'palace' (even now not easy to define) was only gradually made so that the ordinary OT term for 'palace' in its strict sense of 'royal residence' is 'the king's house' or simply 'his house' (1 K 7^{1} 9^{10}). This included not only the royal residence, but also the buildings required by court officials. The only royal residence of which we have any details in the Bible is Solomon's palace (1 K 7^{1-12}), which took thirteen years to build. The description is adapted to its literary setting and is therefore technically incomplete. This included 'the house of the forest of Lebanon,' a great hall 100 cubits long, 50 broad, 30 high, with four rows of pillars; a 'porch of pillars' 50 cubits by 30; the 'porch of the throne' for a court of justice; a dwelling-house for Solomon himself, and another for Pharaoh's daughter. Round about the whole was a great court of hewn stones and cedar beams. It somewhat overshadowed the house of Yahweh which adjoined it. Ezekiel (43^{8}) protested against this contiguity. There is now no trace of the houses built by David and Solomon.

Archaeologists have been able to investigate:

(a) Two large houses of the courtyard type in the ruins of Bethel and Bethshemesh. It is believed that these belong to the period of the Judges.

(b) The palace-fortress built by Saul in his home town of Gibeah. This was two storeys high, the family living on the second floor. It was built of roughly shaped stones. The corners of the surrounding wall were protected by towers. The whole area was at least 169 by 114 feet.

(c) The palaces of Samaria, and especially that of Omri and Ahab, which was part of a later, much larger complex of buildings. These conform, in general, to the oriental pattern familiar in the Assyrian royal palaces.

Belonging to the Persian period, there is the palace of *Tell ed-Duweir*; and to the Roman period, the palace of the Herods in Jerusalem.

In AV the word is sometimes used of the fortified part of the palace, or keep. See CITADEL. D. R. J.

PALAL.—The son of Uzai, Neh 3^{25}.

PALANQUIN.—This word is found only in RV and RSV in Ca 3^{9} (AV 'chariot'). It renders Hebrew *'appiryôn*, a word of non-Semitic derivation, whose origin is uncertain.

PALESTINA.—See next article, **1.**

PALESTINE.—1. Situation and name.—The land of Palestine is the territory which lies between the Mediterranean Sea and the Arabian Desert as E. and W. boundaries, and whose N. and S. boundaries are approximately at 31° and 33° 20′, N. Lat. respectively. These boundaries have not always been clearly fixed; but the convention is generally agreed upon that Palestine is separated from Egypt by the *Wâdī el-ʿArîsh* or 'River of Egypt,' and from Syria by the *Qasmîyeh* or Līṭânī River, the classical

Leontes. Biblical writers fixed the limits of the territory by the towns Dan and Beersheba, which are constantly coupled when the author desires to express in a picturesque manner that a certain event affected the whole of the Israelite country (*e.g.* Jg 20[1]). The name 'Palestine' (AV in Jl 3[4]; in Ex 15[14], Is 14[29, 31] **Palestina**; RV, RSV **Philistia**), being derived from that of the *Philistines*, properly belongs only to the strip of coastland, S. of Carmel, which was the ancient territory of that people. There is no ancient geographical term covering the whole region now known as Palestine: the different provinces—Canaan, Judah, Israel, Moab, Edom, etc.—are enumerated separately when necessary. The extension of the word to include the entire Holy Land, both W. and E. of the Jordan, is subsequent to the introduction of Christianity.

2. Geology and geography.—The greater part of the country is of a chalky limestone formation, which overlies a layer of red sandstone that appears on the E. shore of the Dead Sea and elsewhere. Under the red sandstone are the archaean granitic rocks which form a large part of the Sinai Peninsula. Above the chalk is a layer of nummulitic limestone, which appears on some mountains. Volcanic rock, the result of ancient eruptions, appears in the Ḥaurân, Galilee (especially in the neighbourhood of *Ṣafed*), and elsewhere. For fuller information on the geology of the country, see article GEOLOGY. With respect to the surface, Palestine divides naturally into a series of narrow strips of country running from north to south, and differing materially from one another in character. (*a*) The first of these is the *Maritime Plain* running along the coast of the Mediterranean from the neighbourhood of Sidon and Tyre southward, and disappearing only at the promontory of Carmel. This plain widens southward from Carmel to a maximum breadth of about 20 miles, while to the N. of that promontory it develops into the great plain of Esdraelon, which intersects the mountain region and affords the most easy passage into the heart of the country. This plain is covered with a most fertile alluvial soil. (*b*) The second strip is the mountainous ridge of Judaea and Samaria, on the summit of which are Hebron, Jerusalem, and other important towns and villages; and which, with the single interruption of the plain of Esdraelon, runs continuously from the S. border of the country to join the system of the Lebanon. (*c*) The third strip is the deep depression known as the *Ghôr*, down which runs the Jordan with its lakes. (*d*) The fourth strip is the great plateau of Bashan, Moab, and Edom, with a lofty and precipitous face towards the W., and running eastward till it is lost in the desert.

3. Water supply, climate, natural products.—There is no conspicuous river in Palestine except the Jordan and its eastern tributaries, and these, being for the greater part of their course in a deep hollow, are of little or no service for irrigation. In consequence, Palestine is dependent as a whole for its water supply on springs, or on artificial means of storage of its winter rains. Countless examples of both exist, the former especially in Galilee, parts of which are abundantly fertile by nature, and would probably repay beyond all expectation a judicious expenditure of capital. The case of Judaea is a little different, for here there are extensive tracts which are nearly or quite waterless, and are more or less desert in consequence.

The climate of Palestine is, on the whole, that of the sub-tropical zone, though, owing to the extraordinary variation of altitudes, there is probably a greater range of average local temperature than in any other region of its size on the world's surface. On the one hand, the summits of Hermon and of certain peaks of the Lebanon are covered with snow for the greater part of the year; on the other hand, the tremendous depression, in the bottom of which lies the Dead Sea, is practically tropical, both in climate and in vegetation. The mean local temperature is said to range from about 62° F. in the upland district to almost 100° F. in the region of Jericho.

Rainfall is confined to the winter months of the year. Usually in the end of October or November the rainy season is ushered in with a heavy thunderstorm, which softens the hard-baked surface of the land. This part of the rainy season is the 'former rain' of the Bible (as in Jl 2[23]). Ploughing commences immediately after the rains have thus begun. The following months have heavy showers, alternating with days of beautiful sunshine, till March or April, when the 'latter rain' falls and gives the crops their final fertilization before the commencement of the dry season. During this part of the year, except by the rarest exception, no rain falls; its place is supplied by night dews, which in some years are extraordinarily heavy. Scantiness of the rainfall, however, is invariably succeeded by poverty or even destruction of the crops, and the rain is watched for as anxiously now as it was in the time of Ahab.

Soon after the cessation of the rains, the wild flowers, which in early spring decorate Palestine like a carpet, become rapidly burnt up, and the country assumes an appearance of barrenness that gives no true idea of its actual fertility. The dry summer is rendered further unpleasant by hot east winds, blowing from over the Arabian Desert, which have a depressing and enervating effect. The south wind is also dry, and the west wind damp (cf 1 K 18[45], Lk 12[54]). The north wind, which blows from over the Lebanon snows, is always cold, often piercingly so.

As already hinted, the *flora* displays an extraordinary range and richness, owing to the great varieties of the climate at different points. The plants of the south and of the Jordan Valley resemble those found in Abyssinia or in Nubia; those of the upper levels of Lebanon are of the kinds peculiar to snow-clad regions. Wheat, barley, millet, maize, peas, beans, lentils, olives, figs, mulberries, vines, and other fruit; cotton, nuts of various species; the ordinary vegetables, and some (such as *solanum* or 'egg-plant') that do not, as a rule, find their way to western markets; sesame and tobacco—which is grown in some districts—are the most characteristic crops produced by the country. The prickly pear and the orange, though of comparatively recent introduction, are now among its staple products. The *fauna* includes (among wild animals) the bat, hyaena, wolf, jackal, wild cat, ibex, gazelle, wild boar, hare, and other smaller animals. The bear, cheetah, lion, and hippopotamus are now extinct. Among wild birds, the eagle, vulture, and partridge are still found, and there is a great variety of smaller birds. Storks are seen in great numbers during the migration periods. Among the domestic animals, cows, sheep, and goats are herded, and the horse, donkey, mule, and camel are used as draught animals.

4. History, races, and antiquities.—Remains dating from the Palaeolithic period have been found fairly widely over Palestine, mainly in caves and shelters. In caves on the western slope of Mount Carmel have been found deposits which cover the greater part of the Middle and Upper Palaeolithic. The skeletal remains suggest that the inhabitants of Palestine were allied to Neanderthal man of Europe, and the connexions between Western Asia and Europe seem to have been fairly close. With the end of the Ice Age, and the accompanying pluvials of the Mediterranean, the connexions with Europe seem to have become less close, though there are broad similarities between the Palestinian and European Mesolithic.

Palestine is one of the few places in which a development can be traced from the hunting and food-gathering Mesolithic stage to the firmly settled Neolithic stage, with agricultural communities. This succession is seen at Jericho (q.v.). Side by side with the settled communities at Jericho and comparable sites which are to be presumed but are not yet known, other groups, using the same types of flint implements, still continued to live a simple life, largely based on hunting, in caves and in open sites. This stage covers the period from the eighth to the 6th millennium B.C.

In the 5th millennium groups allied to the village

communities which had been growing up in N. Syria, seem to have established themselves in Palestine. For this and most of the subsequent millennium, there is evidence of a number of village groups.

It was during the 3rd millennium that town life seems to have spread over Palestine. It is presaged by the entry into Palestine of a number of groups at the end of the 4th millennium, and the coalescing of these groups in the 3rd millennium produced the population which founded many of the towns known in the Biblical period. It is usually presumed that this population was Semitic, though there is little direct evidence to that effect. This is the period of the Old Empire of Egypt, and it is probable that some Egyptian control was exercised over at least the coastal towns.

This civilization of the Early Bronze Age was completely blotted out, probably *c* 2300 B.C. by an invasion of nomads, who occupied the whole land during the Intermediate Early—Middle Bronze period (sometimes called Middle Bronze I). The newcomers can be identified with great probability as the Amorites. In Jos 10[6], the Amorites are recorded as being in the hill country and the Canaanites on the coast and the plains. The Amorites are therefore probably pastoralists. Archaeological evidence shows them to have been loose federations of tribes, with no interest in town life.

About 1900 B.C., a fresh wave of immigrants brought a renewed civilization in the Middle Bronze Age. The links of the newcomers are with the Phoenicians of the Syrian coast, and they are probably to be identified with the Canaanites of the Biblical record. The civilization they established, based on numerous well-defended and closely built-up towns, lasted without a break until *c* 1200 B.C.

But though the basic culture remained the same, Palestine was affected by a number of political events. The sway of the Middle Empire of Egypt certainly extended to at least part of the country, and widespread finds of Egyptian scarabs and of furniture, alabaster, and other objects imitating Egyptian originals, show that Egyptian cultures had a considerable influence. About 1730 B.C. the Middle Empire of Egypt fell before the attacks or infiltration of the Hyksos. The Hyksos are probably best to be identified as warrior bands partly of Semitic origin and partly Ḫurrian. These bands must have passed through Palestine, and probably established a warrior aristocracy, of which evidence is found in the Ḫurrian names of rulers of towns in the 14th cent. Archaeological evidence is probably to be found in a new type of fortification, consisting of a great bank crowned by a wall. About 1580 B.C. the alien rulers were expelled from Egypt, and some towns were apparently destroyed when the Egyptians chased them back into Palestine.

The recoil of the Hyksos from Egypt may have introduced some new foreign elements into Palestine, and some of the destroyed towns, for instance Jericho and *Tell Beit Mirsim*, were not immediately reoccupied, but there was no major cultural break with the beginning of the Late Bronze Age. Egypt's suzerainty was probably only gradually re-established, and was not effective until the campaigns of Thothmes III. in the early 15th cent. During the next century, contacts with Egypt were close, and the stability introduced by the New Empire of Egypt stimulated trade in the Eastern Mediterranean, of which imports from Cyprus and the Aegean are evidence.

The weakening of Egyptian power under the heretic king Akhenaten early in the 14th cent. coincided with raids from the Ḫabiru which are the cause of appeals for help from rulers loyal to Egypt in the correspondence found at Tell el-Amarna. The philological identity of Hebrew with Ḫabiru is probable, but the relationship of the Biblical Hebrews to the Ḫabiru is not yet entirely clear. It is probable that some of the components of the later Israelite tribes were drawn from the groups which entered the country at this time. Archaeological evidence of the tribes that took part in the Exodus, and of the events of the conquest of the country as described in the Book of Joshua, is inconclusive. A destruction and subsequent abandonment of Jericho in the second half of the 14th cent., and a destruction of Hazor somewhat later, is probable. It is however clear that there was no major cultural break, though a deterioration in culture may reflect disturbed conditions. There was certainly no immediate conquest of the whole country under one leader, but more probably a gradual infiltration as suggested in Jg 1.

A major break is however suggested by archaeological evidence about 1200 B.C. One cause of this was the invasion and settlement of the Peoples of the Sea, groups probably derived from Anatolia and the Aegean, which established the Philistine towns on the coast, and cut off the interior from contacts with the Mediterranean. No Philistine town has been thoroughly excavated, but their characteristic pottery is found over the coastal plain and the Shephelah.

In the hill-country a general cultural amalgamation of the descendants of the Ḫabiru invaders and the indigenous Canaanites under the followers of Yahweh, with their tradition of the Exodus, was gradually taking place. By the end of the 11th cent., the Israelites were strong enough to defeat the Philistines, and the capture of Jerusalem, *c* 1000 B.C., at last enabled the north and the south to be united under David.

The history of the short-lived United Monarchy and of the subsequent kingdoms of Judah and Israel need not be traced in detail. Archaeological finds provide evidence of a simple way of life in most of the towns, and in the finds of fertility figurines and other heathen cult objects, shows that the fulminations of the prophets against the back-slidings of the people had ample justification. Of Jerusalem during the time it was capital of the United Monarchy and subsequently of Judah, there is little evidence. Excavations at Samaria and Megiddo, however, have given evidence of the grandiose lay-out of royal cities in the Northern Kingdom; in each case the whole summit of the hill was laid out as a royal quarter, and building styles and ivory carvings show the employment of Phoenician masons and craftsmen.

In 722–720 B.C., the Northern Kingdom fell before the attack of the Assyrians. Samaria and Tirzah (*Tell el-Fâr'ah* near *Nâblus*) have provided evidence of the destruction of the towns, and the appearance of Assyrian types of pottery there and elsewhere is evidence of the introduction of foreign settlers. At Jerusalem the Assyrian threat, *c* 700 B.C., is reflected by the construction of the Siloam Tunnel by King Hezekiah, to bring the water of the Virgin's Fountain within the city wall. The Assyrian attack on Lachish (*Tell Duweir*) is portrayed in reliefs in the palace of Sargon.

The Southern Kingdom however survived the Assyrian threat, and did not succumb till the attack of the Babylonians, successors of the Assyrians in the Mesopotamian empire, in 597 and 586 B.C. The Babylonian attacks are vividly illustrated in the destruction of Lachish, and the last hours of the town are described in the Lachish ostraca in language reminiscent of the Book of Jeremiah.

The Second Exile marks the effective end of the old Jewish culture. Only the poorest in the land were allowed to remain; and even after the return of the descendants of the captives carried off into Babylonia, permitted by Cyrus in 538 B.C., archaeological evidence suggests a poor and struggling existence. In the area of the Northern Kingdom, there was much racial admixture with the settlers planted by the Assyrians, and the resettled Jews in Jerusalem would not admit the northerners as pure Jews; from the northerners the modern sect of the Samaritans is descended. The rebuilding of Jerusalem and the Temple by the returned captives is recorded in the Books of Ezra and Nehemiah, but no archaeological evidence of this survives.

In 333 B.C. Syria fell to Alexander the Great after the battle of Issus. After his death followed a distracting and complicated period of conflict between his successors,

which, so far as Palestine was concerned, had the effect of opening the country for the first time to the influence of Greek culture, art, and religion. From this time onward we find evidence of the foundations of such buildings as theatres, previously quite unknown and other novelties of western origin. Although many of the Jews adopted the Greek tongue, there was a staunch puritan party who rigidly set their faces against all such Gentile contaminations. In this they found themselves opposed to the Seleucid princes of Syria, among whom Antiochus Epiphanes especially set himself deliberately to destroy the religion of Judaism. This led to the great revolt headed by Mattathias the priest and his sons, which secured for the Jews a brief period of independence that lasted during the second half of the 2nd cent. B.C., under John Hyrcanus (grandson of Mattathias) and his successors. The kingdom was weakened by family disputes; in the end Rome stepped in, Pompey captured Jerusalem in 63 B.C., and henceforth Palestine lay under Roman suzerainty. Several important tombs near Jerusalem, and elsewhere, and a large number of remains of cities and fortresses, survive from the age of the family of Mattathias. The conquest of Joppa, under the auspices of Simon Maccabaeus, son of Mattathias (1 Mac 13^{11}), was the first capture of a seaport in South Palestine throughout the whole of Israelite history.

The Hasmonaean dynasty gave place to the Idumaean dynasty of the Herods in the middle of the 1st cent. B.C., Herod the Great becoming sole governor of Judaea (under Roman suzerainty) in 40 B.C. It was into this political situation that Christ was born in 4 B.C. Remains of the building activities of Herod are still to be seen in the sub-structures of the Temple, the Herodian towers of Jerusalem, and (possibly) a magnificent tomb near Jerusalem traditionally called the Tomb of Mariamme. Many public buildings were also constructed at Samaria, renamed Sebaste in honour of Augustus. Herod died shortly after Christ's birth, and his dominions were sub-divided into tetrarchies, each under a separate ruler: but the native rulers rapidly declined in power, and the Roman governors as rapidly advanced. The Jews became more and more embittered against the Roman yoke, and at last a violent rebellion broke out, which was quelled by Titus in A.D. 70, when Jerusalem was destroyed and a large part of the Jews slain or dispersed. A remnant remained, which about sixty years later again essayed to revolt under their leader Bar Cochba: the suppression of this rebellion was the final deathblow to Jewish nationality. After the destruction of Jerusalem many settled in Tiberias, and formed the nucleus of the important Galilaean Rabbinic schools, remains of which are still to be seen in the shape of the synagogues of Galilee. These interesting buildings appear to date from the 2nd cent. A.D.

After the partition of the Roman Empire, Palestine formed part of the Empire of the East, and with it was Christianized. Many ancient settlements, with tombs and small churches—some of them with beautiful mosaic pavements—survive in various parts of the country: these are relics of the Byzantine Christians of the 5th and 6th cent. The native Christians of Syria, whose families were never absorbed into Islam, are their representatives. These, though Aramaean by race, now habitually speak Arabic, except in Ma'lūl and one or two other places in North Lebanon where a Syriac dialect survives.

This early Christianity received a severe blow in 611, when the country was ravaged by Chosroës II., king of Persia. Monastic settlements were plundered, their inmates massacred, and the country reduced to such a state of weakness that without much resistance it fell to Omar, the second Caliph of Islam. He became master of Syria and Palestine in the second quarter of the 7th cent. Palestine thus became a Moslem country and its population received the Arab element which is still dominant within it. It may be mentioned in passing that coins of Chosroës are occasionally found in Palestine; and that of the early Arab domination many noteworthy buildings survive, chief of which is the glorious dome that occupies the site of the Hebrew Temple at Jerusalem.

The Moslem rule was at first by no means tyrannical; but, as the spirit of intolerance developed, the Christian inhabitants were compelled to undergo many sufferings and indignities. This, and the desire to wrest the holy places of Christendom from the hands of the infidel, were the ostensible reasons for the invasions of the Crusaders, who established in Jerusalem a kingdom on a feudal basis that lasted throughout the 12th cent. An institution so exotic, supported by men morally and physically unfit for life in a sub-tropical climate, could not outlast the first enthusiasm which called it into being. Worn out by immorality, by leprosy and other diseases, and by mutual dissensions, the unworthy champions of the Cross disappeared before Saladin, leaving as their legacy to the country a score or so of place names; a quantity of worthless ecclesiastical traditions; a number of castles and churches, many of which have been converted into mosques. In 1516, Palestine was conquered by the Turks, and formed part of the Turkish provinces of Syria, until the Ottoman Empire disintegrated during the 1914–18 war. At the end of the war, Palestine was placed under the British Mandate by the League of Nations, with its eastern boundary formed by the river Jordan; east of the river the Emirate of Transjordan was established under the Emir Abdullah of the Hashemite house.

Some Jewish groups had continued to live in Palestine probably right through the Moslem domination, and in the later years of Turkish rule new settlers had entered the country. During the Mandate, as a result of the Balfour Declaration, new Jewish colonies were established, mainly in the coastal plain. The persecution of the Jews in Germany by the Nazis led to greatly increased immigration, and growing friction between Arabs and Jews started outbreaks of violence by the Arabs in 1936. During the European war, an uneasy truce existed, but at the end of the war illegal Jewish immigration led to a renewed outbreak of violence. Great Britain resigned the Mandate in 1948, and there was open warfare between the Jews and Arabs. When a truce was ultimately established in 1949, a purely artificial boundary was created running from 'Aqaba up the 'Arabah and part of the W. side of the Dead Sea, swinging between Beersheba and Hebron, with a re-entrant to touch the walls of the Old City of Jerusalem, then W. again to run along the western edge of the hill country, and E. once more a little S. of the Plain of Esdraelon to the Sea of Galilee. To the W. of this line was established the state of Israel. The enclave of the old Palestine to the E. of this line was incorporated with Transjordan, to form the Hashemite Kingdom of the Jordan. In Jordan, the greater part of the 800,000 Arab refugees from Israel are now housed in camps or new villages. R. A. S. M.—K. M. K.

PALLET.—Found only in RVm and RSV for AV and RV 'bed' in the stories of the paralytic in Mk 2 and of the cripple in Jn 5, and in Mk 6^{55}, Ac 5^{15}.

PALLU.—One of the sons of Reuben, Gn 46^{9} (AV **Phallu**), Ex 6^{14}, Nu $26^{5, 8}$, 1 Ch 5^{3}. The patronymic **Palluites** occurs in Nu 26^{5}. We should probably read *Pallu* for **Peleth** in Nu 16^{1}.

PALM TREE (Heb. *tāmār*, Gr. *phoinix*).—The date palm (*phoenix dactylifera*) is identified in the Midrash *Bereshith Rabba* 15 as the 'tree of life' (Gn 2^{9}); the prophetess Deborah 'sat' under a noted palm tree (Jg 4^{5}); at the feast of Tabernacles *Lūlābhîm* made of palm, myrtle and willow branches were carried and waved (Lv 23^{40}, *Sukkah* iv, 5; cf 1 Mac 13^{51}, Jn 12^{13}, Rev. 7^{9}); it was a decorative and probably symbolic feature of sacred architecture (1 K 6^{29}, Ezk 40^{16} 41^{18})—a use also attested in Egypt and Mesopotamia (see *ANEP* Index s.v.) as well as on Jewish coins and synagogues (*e.g. Tell Ḥūm*=Capernaum). The palm was also a metaphor of stateliness (Ps 92^{12}, Ca 7^{7}), and a girl's name (2 S 13^{3}). These references indicate the important

rôle of the date palm in the ancient as in the modern Near East.

Although not yet restored to its former abundance in Palestine itself—Jericho was known as the 'city of palms' (Dt 34[3], Josephus *BJ* IV. viii. 2–3 [451 ff])—the palm is still one of the most useful trees of Egypt, Mesopotamia and the desert oases (Ex 15[27], Nu 33[9]), its fruit being a staple diet and providing a substitute for sugar in the form of *dibs* or date honey, while its plaited leaves furnish mats and baskets, the bark is made into rope, and the kernels into fodder. Its cultivation goes back well into the third millennium, and there is a relief from *Tell Ḥalâf* (Gozan), which shows a man pollinating the female date-bearing flowers by hand to increase its prolificity.

E. W. G. M.—D. R. Ap-T.

PALMA CHRISTI.—See JONAH, 2.

PALMER-WORM.—Old English for 'caterpillar,' see LOCUST.

PALON.—See AHIJAH, 7, HELEZ, 1, 2, and PELONITE.

PALSY.—The modern form of this word is 'paralysis.' See MEDICINE.

PALTI.—**1.** The Benjamite spy, Nu 13[9]. **2.** The man to whom Michal, David's wife, was given by Saul, 1 S 25[44] (AV **Phalti**); called **Paltiel** in 2 S 3[15] (AV **Phaltiel**).

PALTIEL.—**1.** The prince of Issachar, Nu 34[26]. **2.** See PALTI, 2.

PALTITE.—A native of **Beth-pelet** (q.v.). To this town belonged Helez, one of David's thirty heroes, 2 S 23[26]. In 1 Ch 11[27] he is called a **Pelonite.**

PAMPHYLIA.—The name of a district on the S. coast of Asia Minor, lying between Lycia and Cilicia. Strictly speaking, it consisted of a plain 80 miles long and (at its widest part) 20 miles broad, lying between Mt. Taurus and the sea. After A.D. 74 the name was applied to a Roman province which included the mountainous country to the N., more properly called Pisidia, but until that time it was used only in the narrower sense. The plain was shut in from all N. winds, but was well watered by springs from the Taurus ranges. Through lack of cultivation in modern times it has become very malarious, and in ancient times, though better cultivated, the district was never favourable to the development of a vigorous population. Moreover, it was very isolated except by sea, for the mountains to the N. had no good roads, and were infested by brigands. Even Alexander had to fight his way through them.

The name is probably derived from the *Pamphyli*, one of the three Dorian tribes, and it is likely that Dorian settlers entered Pamphylia at the time of the other Dorian migrations. But the Greek element never prevailed, and though Side and Aspendos were half-Greek cities in the 5th cent. B.C., the Greek that they spoke was very corrupt and was written in a corrupt alphabet. Side is said to have earned its prosperity as the market of Cilician pirates. The town of Attalia was founded in the 2nd century. But more important was the native town of **Perga**, situated inland and apparently having a port of its own on the river Cestrus at a distance of 5 miles. It was a religious centre, where a goddess 'Artemis of Perga' was worshipped, her rites corresponding to those associated with Artemis of the Ephesians, and being therefore more Asiatic than Greek. The ruins of the city date from the period of the Seleucid kings of Syria. Pamphylia was in turn subject to Persia, Macedonia, Syria, Pergamum, and Rome. Archaeological excavations are being conducted at Perga and Side by the Turks.

Paul and Barnabas on their first missionary journey crossed from Cyprus to Perga, but seem to have gone straight on to Antioch without preaching. It was at Perga that John Mark left them (Ac 13[13]). On the return journey, before taking ship at Attalia, they preached at Perga (Ac 14[25]), but by this time they had definitely determined to 'turn to the Gentiles' (cf 13[46]). Christianity was slow in taking root in Pamphylia, and this was probably due partly to the backwardness of the district. In Ac 2[10] Pamphylian Jews hear the Pentecostal 'speaking with tongues.' The presence of Jewish communities in Pamphylia is presupposed in 1 Mac 15[23] for *c* 137 B.C. A. E. H.—E. G. K.

PAN.—See HOUSE, 9.

PANELLED, PANELLING.—See CEILED, CEILING.

PANNAG.—A word of doubtful genuineness occurring only in Ezk 27[17], in a list of articles which had a place in the commerce of Judah and Israel with Tyre. RV simply transliterates the word, and RVm observes 'perhaps a kind of confection.' AV had understood the word as a place name, 'wheat of Minnith and Pannag.' Three MSS have the reading 'paggag,' 'early figs' and RSV so renders.

PAPER.—See WRITING, 6.

PAPER REEDS.—See MEADOW, REED.

PAPHOS was the name of two cities in the W. of Cyprus, Old Paphos about a mile from the sea, New Paphos (now Baffo) about seven miles NW. of this (Strabo, XIV. vi. 3). The Phoenician origin of the former need not be doubted; the latter was by tradition a Greek settlement, but in both the chief object of worship was the 'Paphian goddess,' undoubtedly of Syrian origin, and worshipped under the form of a conical stone, though identified by the Greeks with Aphrodite. Old Paphos was desolate in the time of Jerome. New Paphos was the centre of the Roman administration in Cyprus. It was here that St. Paul encountered the Roman proconsul Sergius Paulus in his first missionary journey—the first presentation of Christianity before Roman authorities (Ac 13[6–12]). A. E. H.

PAPYRI AND OSTRACA.—1. Modern discoveries.—Until almost the end of the 19th cent., the most important records of antiquity, apart from the authors, that had been preserved for literary reasons, were the inscriptions on stone and metal. Published in great collections, and utilized by scholars of all civilized countries, they have given new life to all branches of the study of antiquity, to history in the widest sense of the word, and in particular to the history of states, law, economics, language, and religion. The age of modern epigraphy has been extraordinarily productive of knowledge that never could have been discovered from the authors alone. And the end has not yet come. The researches and excavations of European and American archaeological institutes and of special archaeological expeditions in which the governments of almost all civilized countries and many wealthy individuals have taken part, bring to light innumerable inscribed stones every year. Then there are the engineering enterprises for opening up the countries of the Levant to traffic and commerce. In the construction of railways particularly, but also in other similar undertakings, a quantity of epigraphical material is discovered and made accessible to scholars.

These epigraphical records were reinforced in the last quarter of the 19th cent. by two quite new groups of records, both of which have ushered in a new epoch in the science of antiquity, viz. the *Papyri* and the *Ostraca*. Both have led to the development of entirely new branches of study. In comparison with the inscriptions they not only constitute an enormous quantitative increase of our materials, but also qualitatively they are of quite special importance: they allow us to see into the private life of the men of antiquity—their most private life, in fact—much deeper than we could ever have done by aid of the authors and the inscriptions.

Suppose for a moment that chance excavations in an absolutely dry mound of rubbish were to lead to the discovery of whole bundles of original private letters, contracts, wills, judicial reports, etc., relating to our own ancestors of the 10th cent. A.D.—what a wave of excitement would run through the whole of the learned world! How few are the documents that we do possess of the private life of those times! History preserves the old inscribed stones, the archives of kings, the chanceries of the great churches and municipalities, but suffers the

PAPYRI AND OSTRACA

written memorials of peasants, soldiers, women, artisans, to disappear after a few years without a trace. It was exactly the same in antiquity. The tradition that had come down to us was on the whole the tradition preserved in the history of what was great—the history of nations, potentates, the intellectual leaders in art, science, and religion ; and that is true in great measure of the inscriptions, which for the most part owe their origin to princes, cities, and wealthy individuals.

Only those rare inscriptions that originated in the middle and lower classes of ancient society had to some extent counterbalanced the one-sidedness of the materials available as sources. The papyri and ostraca, however, have remedied the defect in a most unexpected manner. Rubbish mounds such as that which we just now assumed hypothetically to be discoverable in our own country, but which in reality, owing to the dampness of our climate, probably do not exist anywhere in the West, occur in large numbers in Egypt. In ancient times the dumping grounds for rubbish and refuse were on the outskirts of the cities, towns, and villages. Whole bundles of documents that were too old to be worth preserving were thrown on these rubbish heaps by the authorities, instead of being burned ; and private persons did the same when they wished to get rid of written matter that had accumulated and was considered valueless. The centuries have covered these ancient rubbish-dumps with layers of dust and sand, and this covering has united with the great dryness of the climate to preserve most excellently the old sheets of papyrus and the inscribed fragments of pottery. Of course, these texts, when rediscovered in our own day, throw a flood of light upon the upper cultivated class, but for the most part they are documents of the middle and lower classes.

It had long been known that papyrus was in antiquity a very popular writing material. The pith of the papyrus plant, which thrives excellently in the damp levels of the Nile, was cut into strips, and from these strips, laid cross-wise, horizontally and vertically, upon each other, the sheets of papyrus were manufactured by pressing these strips together. Perishable as the material seems, it is in reality excellent. We possess Egyptian papyri of the time of king Assa (*c* 2600 B.C., according to Eduard Meyer's chronology) ; and most of the papyri now in our museums have lain more than 1500 years in the soil of Egypt.

The first discoverers of written papyri must have been Egyptian *fellahîn*, digging in the old rubbish mounds for good earth and treasure. In the year 1778 a European noticed a number of papyrus documents in the hands of some of these peasants ; he bought one, and watched them burn some fifty others in order that they might enjoy the aromatic smoke. The one document came to Europe ; it is the Charta Borgiana, the decipherment of which marks the first beginning of papyrology. Though a good number of papyri reached the European museums in the course of the 19th cent., only a few scholars took any trouble to cultivate papyrology further, until in 1877, a hundred years after the acquisition of the Charta Borgiana, many thousands of papyri came to light from the rubbish mounds near the ' City of Crocodiles ' or ' City of the Arsenoites,' the old capital of the province of el-Fayyum in Middle Egypt.

This was the beginning of a new epoch that has led to a gigantic development of the science of papyri. The period of chance discoveries, the harvest of which used from merely financial considerations to be scattered hither and thither, has been succeeded by a period of systematic excavations carried out by highly trained specialists, who keep together the documents they discover and publish them in collected form. British scholars particularly have performed signal services by discovering and publishing papyri. Flinders Petrie obtained magnificent specimens from mummy-wrappings which had been made by sticking papyri together. Grenfell and Hunt carried out splendid excavations at Oxyrhynchus and other places, and published their treasures with a rapidity and accuracy that placed them in the front rank of editors, as the world of scholarship acknowledges. Besides these there are many other editors, and every year adds to the army of workers on the texts ; philologists and historians, lawyers, and theologians, all have found and are finding abundant work. This science found a centre in the *Archiv für Papyrusforschung*, a journal published from 1900 to 1920.

2. Literary texts.—The papyri fall into two great classes according to the nature of their contents, viz. literary texts and non-literary texts.

Literary texts have come to light in large numbers, though generally only in fragments. They comprise not only very ancient MSS of well-known authors, but also a large number of lost authors ; and lost writings by known authors have been partially recovered. These finds would suffice to show the extreme importance of the papyrus discoveries. And many scholars have considered these literary finds to be the most valuable.

But for scholarship as a whole the second group, the non-literary texts, is no doubt the more important. As regards their contents, they are as varied as life itself. Legal documents of the most various kinds, *e.g.* leases, accounts and receipts, contracts of marriage and divorce, wills, denunciations, notes of trials, and tax-papers, are there in innumerable examples ; moreover, there are letters and notes, schoolboys' exercise-books, horoscopes, diaries, petitions, etc. Their value lies in the inimitable fidelity with which they reflect the actual life of ancient society, especially in its middle and lower strata.

The oldest papyri date from *c* 2600 B.C., and are among the most precious Egyptological records. To the 5th cent. B.C. belong the Aramaic papyri from Elephantine, published by Sayce and Cowley in 1906, by Sachau in 1911, and by Kraeling in 1953 (see ELEPHANTINE PAPYRI)—documents that have furnished astonishing information relative to the history of Judaism. In the 4th cent. B.C. the main stream, as it were, begins, consisting of Greek papyri, and extending from the time of the Ptolemies till the first centuries of the Arab occupation, *i.e.* over a period of more than 1000 years. Associated with them there are Latin, Coptic, Arabic, Hebrew, Persian, and other papyri—so that, taken all together, they confer an immense benefit, and at the same time impose an immense obligation, upon the science of antiquity.

What is the importance of the papyri to Biblical science ? It is twofold. In the first place, they increase our stock of Biblical MSS in a most gratifying manner ; and secondly, they place new sources at the disposal of the philological student of the Greek Bible.

Beginning then with Biblical MSS, and first of all MSS of the Hebrew Bible, we have in the Nash Papyrus a very ancient copy of the Ten Commandments. As regards the Greek OT, the first decades of exploration turned up numerous fragments (*e.g.* the Leipzig fragments of the Psalms, the Heidelberg fragments of the Minor Prophets), together with isolated remains of other translations. More recent discoveries include the Rylands Papyrus 458—fifteen verses of Deuteronomy 23–24 from the middle of the 2nd cent. B.C. ; the Chester Beatty Papyri—parts of nine OT books of the 3rd to 4th cent. A.D. ; the Berlin Genesis and the Freer Minor Prophets of the 3rd cent. A.D. There are also papyrus MSS among the Dead Sea Scrolls (q.v.).

For the NT, we now possess over 70 items from the middle of the 2nd cent. A.D. on. The earliest is a small fragment of the Gospel of John in the Rylands library, but much the most significant are the Beatty Papyrus of Paul (P^{46}), and the Bodmer Papyri : John (P^{66}), Luke and John (P^{75}), Jude and 1 and 2 Peter (P^{72}), an early Bohairic John and important patristic material. But besides these we have acquired quite new material, in particular the various remains of lost Gospels and two papyrus fragments and one vellum fragment with sayings of Jesus, some of which are not to be found in the NT. Of course, with such finds as these it is always a question how far they contain ancient and genuine material ; and the opinions of specialists, *e.g.* with regard to these

sayings of Jesus, are at variance. But in any case, even if, as is not at all likely, they should prove to be of quite secondary importance as regards the history of Jesus, they would be valuable documents in the history of Christianity.

Quite a number of the papyri throw fresh light on early Christianity as a whole. Fragments of the Fathers, Apocryphal and Gnostic writings—including the great collection of Coptic Gnostic MSS found at Nag Hammadi in 1947—liturgical texts, homiletic fragments, remains of early Christian poetry, have been recovered in large numbers, both in Greek and Coptic. But to these must be added the large number of non-literary documents, both Jewish and early Christian, which are to be reckoned among the oldest relics of our religion. From the time of the persecution of the Christians under the Emperor Decius we possess, for example, scores of *libelli* issued to *libellatici*, *i.e.* official certificates by the authorities responsible for the pagan sacrifices, that the holder of the papyrus had performed the prescribed sacrifices. To the time of the Diocletian persecution belongs probably the letter of Psenosiris, a Christian presbyter in the Great Oasis, relating to a banished Christian woman named Politike. Then comes a long series of other early Christian original letters in Greek and Coptic, from the 3rd cent. until late in the Byzantine period. Centuries that had long been supposed to be knowable only from the folios of Fathers of the Church are made to live again by these original documents—documents of whose complete *naïveté* and singleness of purpose, there can be no doubt.

3. Non-literary texts.—The direct value of the papyri to Bible scholarship and ecclesiastical history is thus very considerable. Less obvious, however, but none the less great, is the indirect value of the papyri, and chiefly the non-literary documents of private life.

This value is discoverable in two directions. The papyri, as sources of popular, non-literary Late Greek, have placed the linguistic investigation of the Greek Bible on new foundations; and, as autograph memorials of men of the ancient world from the age of the great religious revolution, they enable us better to understand these men—the public to whom the great world-mission of Primitive Christianity was addressed.

As regards the first, the philological value of the papyri, these new texts have caused more and more the rejection of the old prejudice that the Greek Bible (OT and NT) represents a linguistic entity clearly determinable by scholarship. On the contrary, the habit has arisen more and more of bringing 'Biblical' or 'New Testament' Greek into relation with popular Late Greek, and it has come to be realized that the Greek Bible is itself the grandest monument of the popular (*koinē*) language.

The clearest distinctive features of a living language fall within the province of phonology and accidence. And in the phonology and accidence we see most readily that the assumption of a 'Biblical' Greek, capable of being isolated from other Greek for purposes of study, was wrong. The hundreds of morphological details that strike the philologist accustomed only to classical Attic, when he begins to read the Greek Bible, are found also in the contemporary records of the 'profane' popular language, especially in the papyri and ostraca. The *Grammars of the NT*, by James Hope Moulton, Ludwig Radermacher, and Debrunner's revision of Blass have furnished an extremely copious collection of parallel phenomena. Helbing's *Grammar of the Greek Old Testament* (Septuagint) does the same. The Septuagint was produced in Egypt, and naturally employed the language of its surroundings; the Egyptian papyri are therefore magnificent as parallel texts, especially as we possess a great abundance of texts from the Ptolemaic period, *i.e.* the time when the Septuagint itself originated. The correspondence between them goes so far that Mayser's *Grammar of the Greek Papyri of the Ptolemaic Period* might in many particulars be used as a Septuagint Grammar.

PAPYRI AND OSTRACA

Questions of Biblical orthography, which seem unimportant to the layman, but cause much worry to an editor of the Biblical text, are of course illumined by the contemporary papyri. The matter is not unimportant to the scientific scholar, who must work with the fidelity of the wise steward.

In the same way problems of syntax and of style are considerably advanced by the papyri. It is possible, for example, to place the whole theory of the prepositions on a new basis. The use of the prepositions in Late Greek is very interesting. To mention but one small point, we are now able to make much more exact statements with regard to those prepositions in the NT which denote a vicarious relation (*e.g.* *hyper* and *peri*). The syntactical peculiarities of the NT, which used often to be traced back to Semitic influence, can also as a rule be paralleled from the papyri. The treatment of Semiticisms has been revolutionized. Formerly, when the NT used to be 'isolated' far too much, the question was generally answered in such a way that the influence of the so-called 'genius' of the Hebrew or Aramaic language, especially on the Primitive Christians, was greatly exaggerated. Linguistic phenomena that could not be found recorded in the ordinary Greek grammars were described summarily as Semiticisms. It was forgotten that the NT and the Septuagint are for the most part documents of the popular language, and that the popular language in Greek and in Semitic has much in common. For example, the so-called 'paratactic' style of St. John's Gospel and St. John's Epistles, which used generally to be pronounced strongly Semitic, is in fact simply popular style, and has its parallels in inscriptions and papyri which certainly are not under Semitic influence. The existence of Semiticisms in the Greek Bible is of course not denied by recent Biblical investigators—in the books translated from Semitic originals they are really numerous—but the number of Semiticisms has been considerably reduced, and in proportion as the Semitic character of the NT recedes, its popular character is made to advance. The emphasis upon the popular character of NT Greek was itself at first exaggerated. Then reaction produced a new recognition of Semitic influence, as in W. F. Howard's study 'Semitisms in the NT' in Part Two of J. H. Moulton's *Grammar*, and in Matthew Black's *An Aramaic Approach to the Gospels and Acts*. Again E. C. Colwell's *The Greek of the Fourth Gospel* checked extreme claims for translations of that Gospel from a Semitic original.

It is lexicography, perhaps, that derives most benefit from the new documents. Late Greek is rich in new words and new meanings of old words: the virgin soil of the life of the people is inexhaustible. Grammarians of a later age—the so-called Atticists—lured by Attic Greek of the classical period as by a phantom, fought against these new words and meanings, branded them as 'bad,' and tried to root them out. A number of *littérateurs* suffered themselves to be bound by the rules of the Atticists, as if they had been living in the 5th cent. B.C. This unhistorical, pedantic, and dogmatic tendency left the men of the NT practically untouched. Men of the people themselves, they spoke as the people spoke, and in the Gospels, for example, they for the first time introduced the language of the people with vigour into literature. By reason of its popular character, the language of the first Apostles is pre-eminently a missionary language, and this language it was that really enabled Christianity to rise to a world-religion. All this is confirmed most amply by the new discoveries. Words that we used formerly to regard as specifically 'Biblical' or 'New Testament,' we find now in the mouth of the people. Besides the papyri, the inscriptions also are rich sources. Illustrative quotations from the papyri are for us particularly lifelike, because we can generally date them even to the day. Turn over, for example, the pages of the second volume of *Oxyrhynchus Papyri* published by Grenfell and Hunt, and you find that the non-literary examples are almost exclusively documents

of the 1st cent. A.D., *i.e.* the exact time in which the NT grew up. These and scores of other volumes of papyri and inscriptions have led to the remaking of the lexicons of the NT. J. H. Moulton and G. Milligan's *The Vocabulary of the Greek Testament* was the pioneer in this field in English, as Deissmann's publications were in German. Walter Bauer's *Wörterbuch zu den Schriften des Neuen Testaments und der übrigen urchristlichen Literatur* (4th ed., 1952) was the first lexicon to incorporate fully this new knowledge, and the work by W. F. Arndt and F. W. Gingrich, *A Greek English Lexicon* of the NT (1957), when added to R. W. Frank's translation of Blass-Debrunner, *A Greek Grammar* of the NT and other early Christian Literature (1961), at long last makes the lore from the non-literary sources available to those who do not know German.

Thus we see the justification of the statement that the new texts of popular Late Greek have placed the linguistic investigation of the Greek Bible on new foundations. In yet another direction they yield an important harvest to theology. The more we realize the missionary character of Primitive Christianity, and the more clearly we grasp the greatness of the Apostle Paul working among the proletariat of the great centres of the world's commerce—Ephesus, Corinth, etc.—the more we shall feel the necessity of studying the men to whom the gospel was preached, *i.e.* of obtaining, where possible, insight into their life, not only into their economic position and their family life, but into their very soul. As regards Egypt, we now possess wonderful documents among the papyri, especially in the numerous private letters, which were not intended for publicity but reflect quite naïvely the mood of the moment. As they have made clearer to us the nature of the non-literary letters of St. Paul—and this alone constitutes a large part of the value of the papyri to NT study—so they make live again for us the men of the middle and lower classes of the age of the Primitive Christian mission to the world, especially for him who has ears to hear the softer notes between the lines. But we may assume that the civilization of the Imperial age was tolerably uniform throughout the whole range of the Mediterranean lands and that if we know the Egyptians of the time of St. Paul, we are not far from knowing the Corinthians and the men of Asia Minor of the same period. And thus we possess in the papyri, as also in the inscriptions, excellent materials for the reconstruction of the historical background of Primitive Christianity.

4. Ostraca.—In conclusion, reference may be made once more to the fact that recently, in addition to the papyri, a great number of similar ancient texts, written on fragments of pottery, have been discovered in Egypt, *viz.* the *Ostraca*. As the potsherd cost nothing (anybody could fetch one from the nearest rubbish heap) it was the writing material of the poor man, and revenue officials were fond of using it in transactions with the poor. The ostraca, which are also numbered by thousands, are on the whole even more 'vulgar' than the papyri, but for that very reason valuable to us in all respects already specified with regard to the papyri. The real founder of the study of ostraca on the great scale was Ulrich Wilcken, who collected, deciphered, and historically elucidated the Greek ostraca. Next to him W. E. Crum rendered similar services to the Coptic ostraca. To show that the ostraca, besides their indirect importance, have also a direct value for the history of Christianity, we may refer to the potsherds inscribed with texts from the Gospels, or the early Christian legal documents discovered at the town of Menas, but chiefly to the Coptic potsherds containing numerous Christian letters and illustrating particularly the inner history of Egyptian Christianity.

The whole study of papyri and ostraca is now mature, but the flood of publications continues, and secondary studies of great value are still to be expected. The layman also who loves his Bible may still expect much light from the wonderful texts from the period of the origin of the Septuagint and the NT, and there is no need to fear that the Light of the world (Jn 8^{12}) will pale before the new lights kindled for us by research. The more we set the NT in its own contemporary world, the more we shall realize, on the one hand, the contact between it and the world, and the more we shall feel, on the other hand, the contrast in which it stands with the world, and for the sake of which it went out to contend with and to conquer that world. A. D.—E. C. C.

PAPYRUS.—A plant which grew plentifully by the Nile. See RUSH. From it were made light boats (see REED, 5) and also writing material (see WRITING, 6). The name was also given to texts written on papyrus; see PAPYRI AND OSTRACA.

PARABLE (IN OT).—The word is a translation of the Hebrew *māshāl* normally translated *parabolē* in LXX, but given a variety of translations in EV, *e.g.* parable, proverb, byword, allegory, taunt (song), and even (Nu 21^{27} RSV) **ballad.** The verbal form means 'to be like,' and this meaning is supported by cognate words in other Semitic languages. A verb with the same spelling means 'to rule' (cf Gn 3^{16}) and this has suggested the original meaning as being 'an acted spell.' This is possible, although few of the occurrences in the OT would naturally fit this derivation.

Since the verb means 'to be like' and the noun is normally translated into Greek as '*parabolē*' (juxtaposition, comparison), we may take this as a starting point. We may note that the translation '*allēgoria*' is never used, although RSV translates **allegory** at Ezk 17^2 20^{49} (21^5) 24^3. In many instances the sense of comparison is obvious, but it is comparison with a purpose, viz. to quicken the mind of the hearer so that he makes a true assessment of the situation, or his own actions. The prophet Ezekiel is seeking to awaken his people to the realities of the situation; what has befallen them is not merely a political disaster but the work of their God. The result of this understanding would be penitence and the dawn of a new hope. Other parables in Ezekiel are those of the foundling girl (Ezk 16) and Oholah and Oholibah (Ezk 23). Parables (though not specifically described as such) occur in other parts of the OT; cf 2 S 12^{1-6} the Ewe Lamb, 2 S 14^{5-11} the Reprieved Murderer, 2 K 14^9 the Thistle and the Cedar, Is 5^{1-7} the Vineyard.

The parable is equated with the riddle in Ps 49^4(5) 78^2, and is not a mode of instruction appropriate to fools Pr $26^{7, 9}$. It requires mental alertness and stimulates to right judgment, cf Pr 1^6. This may indicate the significance of its use as a title for Proverbs (*mᵉshālîm*), much of whose contents is not 'proverbial' in character, but short pithy sentences designed to quicken right understanding of the issues of life, cf Lk 4^{23}. Of a similar character are the passages 1 S 10^{12} $24^{13(14)}$, Ezk 12^{22} 18^{2f}, not all of which are proverbial in character but are intended to arouse insight. The use of the word in Dt 28^{37}, 1 K 9^7, Ps $44^{14(15)}$ $69^{11(12)}$, Ezk 14^8, is instructive. The fate of Israel, the people of God, at the hand of God is intended to move the Gentiles to reflect on their own state and to say 'If it was so with them, how shall it be with us?' The use of the word in taunt songs may well indicate that the utterance was accompanied by some mimetic actions, and the implied words would be, 'So shall it be with you' (cf Is 14^4, Mic 2^4, Hab 2^6). There are many examples of acted parables in the OT, *e.g.* 1 K 11^{29ff}, Is 8^{1ff} 20^2, Jer 27^{2f} 32^{6ff} 28^{1ff}, Ezk 4^{1-5}. Whether the parable be spoken or acted, it is full of an energy of fulfilment; it is intended to stimulate the mind of the hearer or observer to recognize that 'So it is!' or 'So shall it be!' and to lead to an acceptance of the Divine judgment. Only the insensitive would remain unaffected by the parable. Finally we may note that this mode of teaching continued in post-biblical Jewish teaching, and was brought to its finest expression in the teaching of Jesus. See also RIDDLE. A. S. H.

PARABLE (IN NT).—**1.** *Meaning and form.*—The English word, parable, is derived from the Greek, *parabolē*, which is the LXX translation of the Hebrew

māshāl meaning comparison. In Hebrew usage the term was applicable to a wide variety of picturesque forms of expression including simile, proverb, metaphor, illustrative story, similitude, allegory, and riddle. By such means it was sought to illuminate unfamiliar ideas by reference to something analogous in the experience of those addressed. Disinclined as he was to discursive exposition, the Semite practised the art of persuasion by thus skilfully appealing to the imagination. All the forms of Hebrew parable except the riddle are found in the NT, chiefly in the Synoptic Gospels. In the Gospel of John and in the epistles of Paul, apart from simple metaphors, the parables which occur are in the form of *allegories* (*e.g.* Jn 10^{1-5}, the Shepherd and the Sheep; 15^{1-5}, the Vine and the Branches; Gal 3^{15-18}, the Promises to Abraham; 4^{21-31}, Abraham's Two Sons). In the allegory each item of the story has a hidden meaning, so that all have to be decoded. Without the key supplied either by the historical context (see below on Mk 12^{1-12}) or verbally, as in the above examples, the reader could not arrive at the meaning intended. The allegory is therefore an artificial method of instruction by contrast with the other forms of parable in which the meaning is apparent in the terms of the parable itself. It may well be that the Johannine and Pauline examples had an influence on the practice of the Church, which for centuries treated all the parables as allegories. In effect, this resulted in Jesus' parabolic teaching being transmuted into Christian theology. By exercising his ingenuity, the allegorizer completely ignored the obvious meaning of such a parable as the Good Samaritan and found support in it, instead, for his own theological position, as St. Augustine did.

It was not until Adolf Jülicher wrote his famous *Die Gleichnisreden Jesu* (1888-1899) that the fallacy of such a method of interpretation was generally accepted by scholarly opinion. Jülicher did not rule out all allegorical explanations but argued that they were legitimate only to a very limited extent, and that, where Mark and Matthew added allegorical explanations to certain parables of the kingdom, they were among the first to fall into this error. It is now recognized that, in addition to metaphors and short picturesque comparisons or similes, there are three kinds of parabolic utterance in the Synoptic Gospels, in none of which is the meaning recondite. These are the similitude, the parable proper, and the illustrative story. In the similitude the comparison is of a detailed kind, as in the Seed Growing of Itself (Mk 4^{26-29}); in the parable proper the point is to be found in the immediate context, as in the Importunate Householder (Lk 11^{5-10}); the illustrative story conveys its own meaning directly, the lesson being brought out in the story as a whole, as in the Good Samaritan (Lk 10^{29-37}).

2. *Problems of Interpretation.*—Awareness of the fallacy of allegorizing was an important advance, but many problems of interpretation still remained for the following reasons:

(1) There is a tendency, especially observable in Luke, to add to the parable in such a way as to shift the emphasis. The result is confusing, for the intention of the embellishment is plainly different from that of the parable itself. Two examples are the Lucan version of the New Cloth on the Old Garment (Lk 5^{36}) and the illustrative story of the Unjust Steward (Lk 16^{1-9}). In the former case the emphasis should be on the worsening of the rent in the garment, as in Mark's version. The meaning, derived from the context, is that any attempt to reconcile the new (Christian) order with the old (Judaism) is fruitless and only results in further evidence of the decay of the old order. In Luke this forthright denunciation is watered down to the statement that the new does not match the old and that the attempt to bring them together will result in the spoiling of the new—a thought which is not in the Marcan rendering at all. There is no parallel to the Unjust Steward, for comparison, but in v.^{8} the thought appears to be that in a time of crisis the worldly man often exhibits more common sense than religious people (sons of light) are manifesting in the impending crisis of the kingdom of God. V.^{9} must be regarded as a commentary involving a rather questionable diversion of thought.

(2) Another tendency, again appearing mostly in Luke, is the addition of sayings suggested by the parables but embodying other meanings. These confuse the reader, unless he is aware of this literary characteristic. Examples are the New Wine in the Old Wineskins (Lk 5^{37-39}) and the comments following the Unjust Steward (Lk 16^{10-13}). In the former case v.^{39}, 'And no one, after drinking old wine, desires new; for he says: "The old is good,"' contradicts the point of the parable. If it is a genuine saying of Jesus its meaning is lost for lack of the proper context. Apparently Luke added it here because of the accidental similarity to the parable in the use of the figure of wine. The series of comments in the second example deal with the question of faithfulness in positions of trust, intended perhaps to counteract any false conclusions which might be drawn from the commendation of the rascal in the parable. These verses are derived from various sources (v.^{13} is parallel to Mt 6^{24}), and have nothing to do with the parable to which they are appended.

(3) While the early Church cherished the teachings of Jesus which had been handed down, it shifted emphases to a degree, and here and there added Christian expositions to fit the later interests and conditions of the Church. Form Criticism has performed a valuable service in demonstrating the inevitability of adapting the primitive traditional teaching, almost from the first, to the pragmatic needs of the Christian community. There was no sense of disloyalty to Jesus' teaching in making such applications. The Church was confronted with the problems of missionary work, and sayings of Jesus were strained to give authority to what the leaders believed to be the course of action which accorded with His spirit. By the time the Gospels were written there was some dismay at the delay of the Parousia. Could Jesus' eschatological teaching, therefore, have been as simple as it had seemed? The problem of unworthy members in the Church loomed large. Could help be found in solving this problem in any of Jesus' parables of the kingdom? In short, the message which in the ministry of Jesus had been directed to individuals, whether opponents or friends, was now transferred to the community, confronted with the prosaic problems which always arise in the long pull of practical endeavour. The parables, which constituted so large a part of Jesus' teaching, did not escape such reconstruction.

Examples: (*a*) The interpretation of the parable of The Sower in Mk 4^{13-20} changes the point from the assurance of the triumph of God's rule to the different kinds of responses that were being made to the gospel. The parable was allegorized in order to yield that meaning. Such an exposition is recognizable as the product of the Church's early missionary endeavours. (*b*) The allegorical interpretation of The Parable of the Weeds in Mt 13^{36-43} is likewise an example of the application of a parable to the situation in the early Church. It alters the point from the certainty of the consummation, when all evil will be overthrown, to a warning addressed to all evil doers in view of the approaching end. (*c*) The parable of The Wicked Tenants in Mk 12^{1-12} probably owes its allegorical form to the same tendency, in this case the purpose being to castigate Israel for the killing of the Messiah. The growing animosity between the Church and Judaism supplies the clue to the allegory. It is difficult to recover the parable as spoken by Jesus. The kernel of it could be the persistent refusal of God's chosen people to heed His revelation in the past, down to Jesus' own time. In its present form it is quite certainly an elaboration of the original. (*d*) The parable of The Thief in the Night (Mt 24^{42ff} || Lk 12^{39f}), which carries the point of the unexpectedness of the great crisis approaching, is altered into a parable of The Watchful Householder. The emphasis is shifted to what may have seemed the more important point brought out in

Matthew's introductory verse, 'Watch therefore, for you do not know on what day your Lord is coming.'

(4) There follows from the last point the problem of determining the actual life situations which prompted the telling of the various parables. More definitely than is apparent on the surface, the Jewish leaders are attacked for their lack of spiritual perception. However, all the known circumstances under which Jesus carried on His work must be taken into account in determining the context of any particular parable.

(5) The Secret of the Kingdom of God, Mk 4^{10ff} and parallels. This celebrated saying has caused great difficulty because it seems to mean that only the Twelve had true perception, and that the parables were uttered in order to mystify the public. This would lend support to the allegorical interpretation, which has been prevalent in the Church until recent times. With the modern awareness of the true significance of the parables, various attempts have been made to explain the passage along other lines. Wellhausen regarded it as a later insertion. Many have followed him in the belief that there were two factors at work in the Church giving rise to this inauthentic pronouncement: (*a*) The fact that the Jewish people as a whole had not accepted the Gospel; (*b*) The prevalence of the idea of mystery (translated 'secret' in RSV) in the gentile world so that it was natural to apply the term to the gospel. J. Jeremias renders vv. 11 f as follows; 'To you has God given the secret of the Kingdom of God; but to those who are without everything is obscure, in order that they (as it is written) may "see and yet not see, may hear and yet not understand, *unless* they turn and God will forgive them"' (*The Parables of Jesus*, p. 15). He concludes that the saying refers not to the parables specifically but to the teaching in general, which the great majority did not accept; and yet, if they repented, God would still mercifully forgive them. V. Taylor, in his commentary on Mark, believes that the passage is a modification of the original saying. He conjectures that Jesus was impressed by the similarity of his own experience to that of Isaiah and so made use of the prophet's ironic words. Like Jeremias, he holds that the word 'parables' should read, 'riddles' (*i.e.* obscure sayings), a possible translation; it therefore does not refer to the parables which Jesus spoke. However, he does not accept Jeremias' substitution of the word 'unless' for 'lest.' In conclusion, it must be stated that there is no unanimity of opinion in regard to this perplexing saying. It is agreed, however, that, whatever it means, the parables stand in their own inherent right as a means of clarifying the message of Jesus.

(6) The theme of the Kingdom of God, *passim*. What did it mean? Many of the parables are introduced with the words, 'The Kingdom of God is like . . .' Frequently these words are inept if taken literally. For example, in Mt 13^{45f} the kingdom is clearly not like the merchant, as stated, but is like the pearl. Account must be taken of the Semitic use of the dative so that the meaning would be, 'It is the case with the Kingdom as with . . .' The Kingdom being so central to Jesus' teaching, parabolic and otherwise, it is necessary to inquire what the conception meant to Jesus. (See KINGDOM OF GOD.) Here, for the explanation of the parables, it is necessary to note only a few important points. (*a*) The thought of the Kingdom was the focal point of Jesus' faith and teaching. (*b*) He divested it of all traces of Jewish national aspirations which were commonly an integral part of the idea. (*c*) He laid the stress on individual repentance as a necessity for belonging to the Kingdom; merit was not enough, for all fall short. (*d*) God is loving and merciful but also stern in His condemnation of unrepentant men. (*e*) Pride and avarice or over-concern with material possessions were especially singled out as obstacles to man's acceptance of his true position in the sight of God. (*f*) A note of urgency is prevalent in the record; at the least the premonitory signs of the Kingdom were present for those who had eyes to see; the power of Satan was already broken in heaven and was being destroyed on earth. (*g*) The Kingdom of God had brought Jesus with it; He had not come to establish the Kingdom, but to be its herald and, if need be, to die for its sake.

3. *The Message of the Parables.* In a thorough study of the parables, they must be considered one by one, taking into account the context and the possibility of accretions and changes. Here only a broad classification of the principal parables is made, with brief notations of the point of each, as a directive for such a study.

(1) Parables of assurance regarding the Kingdom. (*a*) The Sower, Mk 4^{3-8}: The certainty of the Kingdom's establishment in spite of some partial failures. (*b*) The Seed Growing Secretly, Mk 4^{26-29}: Man's part is to proclaim the message; God insures the outcome. (*c*) The Mustard Seed, Mk 4^{30f}: Small beginnings must not deceive one in regard to the final great consummation. (*d*) The Leaven, Mt 13^{33} || Lk 13^{20f}: Not a progressive advance, which is an Occidental idea, but the miraculous character of the results of so small a beginning. Perhaps also a hint of the hidden manner of God's operation.

(2) God in His relation to sinful men. (*a*) The Lost Sheep, Lk 15^{4-7} || Mt 18^{12-14}, and The Lost Coin, Lk 15^{8ff}. God is not only merciful toward the repentant sinner, as in rabbinic Judaism, but He actively seeks to win the sinner to Himself. The contrast is like that between transcendence and immanence in modern theistic beliefs. (*b*) The Prodigal Son, Lk 15^{11-32}. A contrast between the puritanical rectitude of the older son and the love of God which casts a mantle of charity over all defects of human character. (*c*) Labourers in the Vineyard, Mt 20^{1-6}. What God confers is not a reward for something earned but is given of His free grace to all who will accept it, regardless of the amount of service rendered Him.

(3) Forgiven men in their relation to God. (*a*) The Two Debtors, Lk 7^{41ff}. It is possible that the greater the sin, the more grateful the sinner will be when he experiences forgiveness. (*b*) The Unjust Judge, Lk 18^{1-8}, and The Friend at Midnight, Lk 11^{5-8}. To maintain a relationship to God through prayer, the individual must be earnest and persistent. It need scarcely be added that the end-result will be the elimination of petty ambitions and desires and the acceptance of God's will as in Jesus' prayer in Gethsemane. (*c*) The Pharisee and the Publican Lk 18^{9-14}. The first requisite in establishing a relationship with God is a recognition of one's unworthiness.

(4) The Challenge of the Kingdom. (*a*) The Hidden Treasure, Mt 13^{44}, and The Pearl, Mt 13^{45f}. This pair have the point that the Kingdom is of supreme worth and that every other concern is insignificant by comparison. The unexpected discovery in the first and the discovery after a long search in the latter are secondary differences between the parables. (*b*) The Faithful and Unfaithful Stewards, Lk 12^{42-46} || Mt 24^{45-51}; The Pounds and the Talents, Lk 19^{12-27} || Mt 25^{14-30}; The Doorkeeper, Mk 13^{33-37} || Lk 12^{35-38}. These parables denounce the religious leaders for their failure to fulfil the trust committed to them. Their seeking of selfish advantage, their inertia, their obtuseness in failing to recognize the coming of the Kingdom, are excoriated. (*c*) The Marriage Feast, Mt 22^{1-10} and The Great Supper, Lk 14^{16-24}. Undoubtedly the first readers of the Gospels would understand these similar parables as referring to the failure of the Jews to accept the gospel whereas the Gentiles had done so. As Jesus used the analogy, He would be thinking of the religious leaders in contrast to the simple people who paid heed to His teaching.

(5) Discipleship—the way of life in the kingdom. (*a*) On Defilement, Mk 7^{14f}. A categorical statement that what defiles a man is wrong moral and spiritual attitudes, not the failure to fulfill the outward requirements of religion. (*b*) The Mote and the Beam, Lk 6^{41f}. A charitable attitude toward others in view of our own weaknesses of character is inculcated. (*c*) The Tree and the Fruit, Lk 6^{43ff} || Mt 7^{16-20}. Good deeds are genuine only when the inner disposition is right, *i.e.* dedicated to God. (*d*) The Unmerciful Steward, Mt 18^{23ff}. God's forgiveness will produce a willingness to forgive; else we are

not really forgiven but condemned. (*e*) The Two Sons, Mt 21$^{28-31}$. The superficial confession by contrast with genuine conversion after initial refusal. (*f*) The Good Samaritan, Lk 10$^{29-37}$. Love knows no limitations of class or race; it is boundless. (*g*) The Rich Fool, Lk 12$^{16-21}$, and Dives and Lazarus, Lk 16$^{19-31}$. The danger of being engrossed in material possessions. The former emphasizes their ephemeral character, the latter the result in the drying up of human sympathy. (*h*) The Difficulty of the Way, Lk 13$^{24-30}$ || Mt 7^{13f}. Great effort is required and many fail. W. S.

PARACLETE.—See Advocate, Paul, John.

PARADISE.—A Persian word (*pairi-daēza*) for an enclosing wall, and then the space enclosed, a park, a garden, a pleasure ground (see Orchard). Used in later Jewish and Christian thought (*pardēs*, *paradeisos*, *paradisus*), it appears in religious language as God's garden, where man was placed at first by his Creator. Lost or hidden since the Fall, it will be regained at the end, whilst it may already mean, in the intermediate era, the abode of the blessed dead.

1. In the OT.—While the word *pardēs* occurs only three times in the Hebrew Bible (Ca 4^{12}, Ec 2^{5}, Neh 2^{8}) and then in the usual sense, with no reference to the *Garden of Eden*, it is unquestionable that Eden serves as the basis for the later conception. The transition from the usage of Genesis to one less literal is to be seen in Ezk 28^{13ff} and 31^{8ff}, which reflect the influence of Babylonian conceptions. These, undoubtedly, are also to be seen in the Genesis picture of Eden. The significance of Ezekiel's standpoint is that it shows the anticipation of eschatological and apocalyptic conceptions, both Jewish and Christian.

The shift from the secular to the religious sense appears more largely in the *Greek Bible* (LXX). *Paradeisos* is used there more than thirty times, especially in Genesis, where it means God's garden or Eden. The tendency to idealize grows in the apocryphal and pseudepigraphical writings (Sir 24$^{25-30}$, Ps. of Solom. 14^{2}).

2. In later Judaism.—In the apocalypses, there are elaborate descriptions (particularly 1 Enoch 23–28, Apoc. Bar 4, 2 Es 8^{52}, Test. Levi 18^{10f}) of Paradise as the opposite of *Gehenna*. (See P. Volz, *Eschatologie der jüdischen Gemeinde*, §49, 4.) In the Rabbinical conception of the universe, Paradise is the abode of the blessed dead. Here is the tree of life, and here also the righteous feast for ever. Gehenna and Paradise are, according to the rabbis, close together, being separated only by a handbreadth. This view, however, is difficult to harmonize with other conceptions, and an adjustment has been proposed by assuming the view of a twofold Paradise, one in Sheol and the other in Heaven. Such a view would harmonize with the conception that the righteous are to rise from the nether Paradise to the heavenly. But it looks hopeless to seek for much logic or harmony in the medley of rabbinic ideas and dreams. Although contrasting violently with the reserve and sobriety of Scripture, they have often crossed the Christian border.

3. In the NT.—The term *paradeisos* occurs only three times in the NT (Lk 23^{43}, 2 Co 12^{4}, Rev 2^{7}). The first instance is a word from the Cross, in Jesus' promise to the robber. Does it mean there the *lower* Paradise of Jewish conceptions, the Paradise of an 'intermediate state,' as some theologians have argued? Would it be identical with the 'Abraham's bosom' of Lk 16^{22f}, in a parable where Jesus obviously uses, in a symbolical and perhaps ironical way, the crude imagery of popular eschatology? Anyhow, the reference of Paul (2 Co 12^{3}) is undoubtedly to the *upper* Paradise—that is the third heaven. Here again, however, it is not safe to derive dogma from what may be a merely conventional expression, or a relic of archaic cosmology.

Paradise is often used in modern language, as the symbol less of a place than of a state and life of blessedness. H. Cl.

PARAH.—A city in Benjamin, Jos 18^{23}. It is now *Kh. el-Fârah*, near the head of the valley of Michmash.

PARALYSIS, PARALYTIC.—See Medicine.

PARAN.—A desert region settled by Ishmael (Gn 21^{21}) and traversed by Israel after the Exodus (Nu 10^{12} 12^{16} 13$^{3-26}$). It is associated with the '**wilderness of Zin**,' from which the spies went up to Palestine (Nu 13, 26), and in which Kadesh was located (Nu 20^{1} 27^{14}). Generally, the region of Paran apparently corresponds to the inland part of the North Sinai desert, of which Kadesh was the centre. The association of the mountain(s) of Paran with Seir in Dt 33^{2} and with Teman in Hab 3^{3} perhaps indicates specifically the E. edge of the plateau of *et-Tîh*, though Teman may mean the south generally. 1 K 11^{18} also indicates that Paran was contiguous with Edom and Midian. The district Paran, where David fled after the death of Samuel (1 S 25^{1}, where LXX reads *Maan* [Heb. *Maon*]), supports this location, though the action is located somewhat further north. Hence the particular location of 'Mount Paran' at *Jebel Maqrâh*, *c* 29 miles S. of *'Ain Qedeis*, has little to recommend it. El Paran, which Gn 14^{6} visualizes on the southern limit of Mount Seir, has been identified by some with Elath, just N. of *'Aqaba*, but this depends on the LXX reading 'the terebinth (*'êlôn*) of Paran.' The Hebrew El Paran indicates a sanctuary. J. Gr.

PARAPET.—See House, **5.**

PARBAR.—In 2 Ch 26^{18} AV and RV treat this as a proper name, while RSV renders 'the parbar' with marginal note that its meaning is unknown. In a slightly different form, *parwârîm*, the same word is probably to be found in 2 K 23^{11} (AV '**suburbs**'; RV, RSV '**precincts**'). It is possible that the original text read *parwādhîm* (so 6 MSS), and *parbādh*, and that these are two forms of a word of Persian origin, meaning **forecourt.** H. H. R.

PARCHED CORN.—Hebrew *ḳālî*, Lv 23^{14}, Ru 2^{14}, 1 S 17^{17} 25^{18}, 2 S 17^{28}; *ḳālûy*, Jos 5^{11}; or more fully *'ābhîbh ḳālûy bā'ēsh*, Lv 2^{14}. This is often made on the harvest field by holding a bundle of ears in a blazing fire or by roasting them over a piece of metal. Cf Food, **2.**

PARCHED GRAIN.—See Food, **2,** Parched Corn.

PARCHMENT.—See Pergamum, Writing.

PARDON.—See Forgiveness.

PARENTS.—See Family.

PARK.—See Orchard.

PARLOUR.—See House, **5.**

PARMASHTA.—Seventh son of Haman, put to death by the Jews, Est 9^{9}.

PARMENAS.—One of the 'Seven' (Ac 6^{5}). Otherwise unknown.

PARNACH.—The father of Elizaphan, Nu 34^{25}.

PAROSH.—The name of a post-exilic family, Ezr 2^{3}, Neh 3^{25} 7^{8} 8^{3} 10$^{14, 25}$, 1 Es 5^{9} (AV, RV **Phoros**) 8^{30} (AV **Pharez,** RV **Phoros**) 9^{26} (AV, RV **Phoros**).

PAROUSIA.—1. Meaning of the term.—The Greek word parousia is used in Christian teaching for Jesus Christ's coming or appearance at the end of the world, *i.e.* His return in glory and power. In the NT, as in general Greek usage, it means primarily 'presence' or 'arrival.' Paul uses the word in telling the Corinthians of his joy over the 'coming' of Stephanus (1 Co 16^{17}); and he voices the hope (Ph 1^{26}) to 'visit' the community in Philippi, following his release from prison (see also 2 Co 7^{6f} 10^{10}, Ph 2^{12}). Elsewhere in the NT the word bears the special meaning of Christ's 'coming' in the series of eschatological events. Thus it is always identified by the addition 'of the Son of Man' (Mt 24$^{27, 37, 39}$) or 'of [our or the] Lord Jesus Christ' (1 Th 2^{19} 3^{13} 4^{15} 5^{23}, 2 Th 2$^{1, 8}$, Ja 5^{7f}, 2 P 1^{16} 3^{4}) or simply 'of Christ' (1 Co 15^{23}). In the English translations the term is uniformly rendered by 'the coming.'

2. Eschatological connotations.—The content of the term *parousia* may readily be gathered from the passages just cited. In the synoptic apocalypse (Mk 13 and parallels), the Parousia of the Son of Man refers to the

figure in Dan 7[13] who 'comes' on the clouds of heaven (Mk 13[26]; see also 14[62]). In 1 Th 4[16] Paul speaks similarly of the 'descent' of the Lord from heaven. According to 1 Th 3[13] his 'revelation' is accompanied by the appearance of the heavenly court (the angels). The 'sign' of this event will be given by God Himself through a word of command and the sounding of the trumpet (1 Th 4[16], 1 Co 15[52]). The date of this event is not given in the NT (cf Mk 13[21]). Paul was convinced that it would take place during his lifetime (1 Th 4[15]). This view was shared by most early Christians; in consequence the death of some of their number created a serious problem, which required an answer (1 Th 4[13–17]). For the later writings of the NT (Luke-Acts and 2 Peter) the Parousia of Jesus has been postponed to the remote future, and Paul himself appears (in Ph 1[23] and probably in 2 Co 5[1ff]) to have given up the expectation of an immediate coming. The temptation to calculate 'the time of the end' was generally resisted by the early church. The question of the exact day and hour was sharply cut short: 'As were the days of Noah, so will be the coming of the Son of Man'—Jesus' Parousia will be equally sudden and unexpected, for the whole world (Mt 24[36f], Mk 13[32]). The same idea is found in the comparison of His coming with that of a thief in the night (1 Th 5[2ff], Mt 24[43]). The point of these two comparisons is not exhausted in criticism of speculations and calculations of the date of the Last Day, such as were current in the neighbourhood of the early church, *viz.* in the apocalyptic type of Judaism, which began with the Book of Daniel (see also Lk 17[20]). Their rich and positive significance, for the church itself, lay in the exhortation to be ready and watching for the Lord to appear (Mk 13[33]). Every day must be lived as if it were the last!

3. Consequences.—The early church looked forward to the Parousia as the full and final realization of the hope of salvation. Hence it is no accident that 1 Co 15[23] views the resurrection of Christians as accompanying the Parousia of Christ. His victory over Death, 'the last enemy' (1 Co 15[26]), which is now hidden and visible only to faith, will then be open and obvious to all the world. Paul testifies to the same belief in 1 Th 4[13–17], where he also speaks of the 'catching up' of those still living 'to meet the Lord in the air'—*i.e.* the descending Christ. Clearly this states the goal toward which the primitive community faced: final reunion with the transfigured, glorified Christ. And it gives the meaning for personal salvation which was seen in the event (cf also 2 Th 2[1]). When, on the other hand, 2 Th 2[8f] speaks of the destruction of Satan by Christ, it is clear that the hope of the Parousia included the idea of the Judgment (see also Mt 25[31ff], Ro 2, 2 Co 5[10]). This is vividly expressed in Mt 24[40ff], while in the Johannine admonition (1 Jn 2[28]) it naturally remains more in the background: 'Abide in him [Christ], so that when he appears we may have confidence and not shrink from him in shame at his coming.' Closely connected with this is the frequent (*e.g.* 1 Th 3[12]) reference to the Parousia in strong exhortations to Christian duty.

This is about the order in which the meaning of the Greek word *parousia* is unfolded in the NT. The primitive Christian hope of the coming End of the Age is most clearly attached to it, though not originally so connected. For this eschatological hope really had its roots in the OT and in contemporary Judaism, where the term *parousia* (with reference to the coming of God and—or—the revelation of the Messiah) is never used. Instead, the terminology is: 'the day of the Lord' (1 Th 5[2]), 'the day of Christ' (Ph 1[6, 10] 2[16]), 'that day' (Mt 7[22]). The Revelation of John pictures the approaching End without once using the term *parousia*; and it may be assumed that Jesus Himself never used it, though He referred to the future coming or appearance of 'the Son of Man' (*e.g.* Mk 8[38]). The passages referred to above (Mt 24[27, 37, 39] and parallels) can scarcely be attributed to Jesus, according to historical criticism. Since the development of Messianic expectation in the primitive community was independent of the use of the term *parousia*, the question of its origin therefore becomes inescapable.

4. Origin of the term.—For this we must turn to the world of Hellenistic culture. Here, in addition to the well-attested primary significance of the word, a special use had grown up which possessed a two-fold significance. (1) For Hellenism, *parousia* meant chiefly the epiphany of a god or goddess, either as a special miracle or in the setting of a cultic celebration—his or her glorious self-manifestation following a period of absence or invisibility. This use of the term is also found in the Jewish historian Josephus who describes the Divine manifestations of the OT with the word *parousia*. (2) The second important usage found in Hellenism belonged to the language of court etiquette or ceremonial. The official visit of an emperor or a king to a province was a *parousia*. It is hard to say which of these two meanings led the earliest Christians to apply the term to Christ's future 'coming,' especially since the sacral and the regal were not sharply distinguished. The example of Josephus shows how close at hand it lay for the earliest Christian community to use the term with reference to Christ's future 'appearing' in power and glory. Clear also is the reason why at first the incarnation—or the appearance of Jesus in history—was not understood as a *parousia*: Jesus' power and glory were still hidden and their final disclosure before all the world was—according to early Christian belief—still to take place at the End of the Age. It was for this latter event that the technical Hellenistic term *parousia* seemed specially appropriate. In adopting this term, the primitive church declared its essentially eschatological outlook, its belief that the decisive event in the process of salvation, its final fulfilment, still lay in the future.

5. Later usage.—In the period following the NT, the meaning of *parousia* received a clear and characteristic revision. The hope that Christ would soon appear in power and glory had not been realized. This experience led to a new emphasis upon and interpretation of what had taken place already in the appearance of Jesus upon earth, His earthly life and ministry. As early as the Gospel of John, the life of Jesus is described as a revelation of His glory, as the epiphany of the Son of God (1[14] cf 2[11]). Hence it is not surprising that Ignatius of Antioch, who in other respects shares the point of view of the Fourth Evangelist, characterizes the Incarnation as the 'Parousia' of Christ (*Philad.* 9[2]). Clement of Alexandria (*c* 200 A.D.) uses the word in a similar way. Justin (*c* 150) combines the two lines of development, the eschatological and the historical, and distinguishes between the 'first' and the 'second' *parousia* of the Saviour (*Dial.* 14[8] 40[4] 118[2], *Apol.* 52[3]). Irenaeus (*c* 180) also shares this view. But Justin also refers (*Dial.* 118[2]) to the 'second' *parousia* as the 'coming again.' This is the terminology which was destined to prevail in the end—a usage which must be clearly dissociated from that of the NT, with which it fails to correspond and for which the NT provides no basis. G. I.

PARSHANDATHA.—The eldest son of Haman, put to death by the Jews, Est 9[7].

PARSIN.—See MENE.

PARTHIANS.—The founders of a powerful dynasty in Persia which threw off the yoke of the Seleucids in 248 B.C. and maintained itself against all external powers till A.D. 226, defying even the Romans. At the beginning of the reign of Herod the Great (40 B.C.) the Parthians overran Syria and Asia Minor, including Palestine, spreading havoc and terror during their brief depredation. Originally the 'Parni,' nomads living N. of Hyrcania, to the E. of the Caspian Sea, and in Alexander's time found farther S., on the borders of the Salt Desert, they eventually spread out from the Euphrates to the Indus, thus occupying much of the eastern part of the Seleucid empire. Their religion was the current Iranian Mazdaism, but they were tolerant of other religions. They absorbed Greek culture readily, though their main

interests were not intellectual or artistic; they formed a military aristocracy of land-owners, whose chief diversions were horsemanship and hunting. In battle their cavalry, both light and heavy, were irresistible. In A.D. 10 a new regime replaced the Arsacids, and the nation repudiated its former friendship with the West, re-emphasized the Mazdaean religion, and undertook to control to its own advantage the growing trade between Roman Syria and China. The Jews referred to in Ac 2[9] presumably lived E. of the Euphrates.

J. F. McC.—F. C. G.

PARTIALITY.—See CRIMES, 5, JUSTICE, 1 (*c*).

PARTRIDGE.—**1.** Only the Hebrew *ḳôrē'* is translated 'partridge' in the English Bible. This is the 'chukar' or 'rock-partridge' (*caccabis chukar*), whose call being given as 'girrah' or 'cok-cok-cokrr' explains its name, which has been assimilated to a well-known Semitic verb (Heb. *ḳāra'* 'called'). Its cry may be heard all over Palestine, and large coveys may be met in the autumn. This is the bird meant when the prophet describes it as gathering young which it has not brought forth (Jer 17[11]); he alludes to a curious belief, which also the Arab writer al-Damîr mentions, that the hen visits a neighbour's nest and taking the eggs incubates them but that the chicks, so soon as they fly, return to their own mother. The story seems to have arisen from the fact that the chukar lays two clutches of eggs, one for herself and another for the cock. This bird is still used by Arabs, as by the ancient Hebrews, as a decoy-bird (Sir 11[30]). The same Hebrew word is loosely used in comparison of Saul pursuing David to Engedi to hunting a partridge in the mountains (1 S 26[20]); but the bird here meant is the '**sand-partridge**' or 'Hey's partridge' (*ammoperdix heyi*); for this, though not distinguished by a distinct name, is the only partridge found round the Dead Sea, where it is very numerous. **2.** The *ḳippōz*, whose name is derived from a verb meaning 'hopped, leapt' (Syr. *qᵉphaz*=Arab. *qafaza* 'leapt, sprang') cannot be the '**hedgehog**' or '**porcupine**' (LXX, Vulgate) which cannot leap, nor the **arrow-snake** which does not incubate although it frequents desert sites (Is 34[15]); it may therefore be a variety of the sand-partridge (*caccabis sinaica*), which lives in small parties in dry and unattractive places in the valley of the Jordan and round the Dead Sea, spending the day under the shadow of a boulder and, when disturbed, making away at great speed, hopping with great agility from rock to rock. **3.** The patriarch Jacob has an animal totem-name, as the Arabic *yaʿqûbu* 'black partridge, francolin' shows; this, a bird widely spread in Palestine, is so called from the strong but blunt spurs on its heels (Heb. *ʿēḳebh*= Aram. *ʿiqbâ*=Arab. *ʿaqibu* 'heel'). The meaning of the root has obviously inspired the stories woven round the name. **4.** Another word for the partridge is *ḥoghlāh* 'female partridge' as the Syriac *ḥaglâ*=Arabic *ḥajalu* 'partridge' from *ḥajala* 'hopped' shows; but the Hebrew word occurs only as the name of a woman and of a place on the borders of Benjamin and Judah (Jos 15[6] 18[19, 21]). As only three species of partridge are found (nowadays, at any rate) in Palestine, the word may imply the settlement of a clan or tribe of Arab origin in southern Palestine, where other place-names (*e.g.* Eltekeh, Eltekon, Eshtaol, Eshtemoa) reflect Arabic-speaking settlements.

G. R. D.

PARUAH.—Father or clan of Jehoshaphat, Solomon's prefect in Issachar, 1 K 4[17].

PARVAIM.—A region whence, according to 2 Ch 3[6], the gold was obtained which was used for ornamenting the Temple of Solomon. It cannot be certainly identified. The name is most plausibly identified with *Farwa* in Yemen, or SW. Arabia. It was possibly from this place that the 'gold of Sheba' (Ps 72[15]; cf Is 60[6]) was in part derived.

PASACH.—An Asherite, 1 Ch 7[33].

PASCHAL LAMB.—See PASSOVER.

PAS-DAMMIM.—See EPHES-DAMMIM.

PASEAH.—**1.** A descendant of Judah, 1 Ch 4[12]. **2.** The father of Joiada, Neh 3[6]. **3.** The eponym of a family of Nethinim (q.v.) who returned with Zerubbabel, Ezr 2[49] Neh 7[51] (AV **Phaseah**), 1 Est 5[31] (AV **Phinees**, RV **Phinoe**).

PASHHUR (AV **Pashur**).—**1.** A son of Malchiah, a prince of Judaea in the time of Jeremiah (Jer 38[1-13]). He is probably identical with the Pashhur mentioned in 1 Ch 9[12], Neh 11[12] as the ancestor of Adaiah. **2.** The son of Immer, a Temple official and priest, who caused Jeremiah to be beaten and put in the stocks after he had predicted the fall of Jerusalem. The prophet told him his name was not Pashhur but **Magor-missabib** (q.v.), and added that he would die in Babylon, Jer 20[1-6]. **3.** The father of Gedaliah mentioned in Jer 38[1]. He may be either **1** or **2**, or neither. **4.** The head of a priestly family, 'the sons of Pashhur' mentioned in Ezr 2[38], Neh 7[11], Ezr 10[22], 1 Es 5[25] (AV **Phassaron**, RV **Phassurus**), 9[22] (AV, RV **Phaisur**). **5.** A priest who signed the covenant with Nehemiah, probably identical with **4**, or used of the clan as a whole (Neh 10[3]).

W. F. B.

PASHUR.—See PASHHUR.

PASSENGERS, Ezk 39[11] (AV).—See ABARIM.

PASSION.—In Ac 14[15] 'We also are men, of like nature (AV 'passions') with you,' 'passion' means 'feeling *or* emotion.' But in Ac 1[3] 'He presented himself alive after his passion,' the word means 'suffering,' as in Wycliffe's translation of He 2[9] 'Ihesus for the passioun of deeth, crowned with glorie and honour.'

PASSOVER AND FEAST OF UNLEAVENED BREAD.—These two feasts were originally two separate ceremonies whose time of celebration came to coincide and they were welded, together with the ceremony of the waving of the barley sheaf, into a single composite festival.

1. OT references.—(1) *Law and Ezekiel.*—The first certain reference to the feast is in Ex 12[21-27] (J). These verses have become an integral part of the whole chapter, which may be regarded as the legend of the Passover festival. They are, however, probably the earliest part of the account and record two features: (*a*) a lamb is to be slain and its blood sprinkled on the lintel and door posts of the houses; (*b*) it is to celebrate the deliverance of the Israelites when the firstborn of the Egyptians were slain. There are two brief references in Ex 23[18] and 34[25] which prohibit using leavened bread with the Passover, or leaving anything over till the morning. The festival takes place during the night.

In Dt 16[1-8] the Passover is directed to be observed in the month Abib (April), in commemoration of the Exodus from Egypt. The sacrifice is not to be offered in private dwellings, but 'in the place which Yahweh shall choose to place his name there.' With the Passover meal, and during seven days, no leavened bread was to be eaten. None of the flesh was to be left till morning. After the meal the worshippers were to go to their homes; the seventh day was to be a solemn assembly, and this period (v.[9]) was treated as opening the seven weeks' 'joy of harvest,' commencing from Abib, when the corn would be coming into ear. We may notice here: (*a*) the Passover is regarded as part of the Feast of Unleavened Bread (**Mazzoth**), the two being apparently blended into one; (*b*) the sacrifice, though composed of individual sacrifices, is to be offered only at the central sanctuary; (*c*) the offering may be taken from flock or herd.

In Ezk 45[21-24] the date is precisely assigned as 14th Abib. The feast lasts seven days, and unleavened bread only is to be eaten. The prince is to offer a bullock as a sin-offering for himself and the people, and a he-goat on each of the seven days, as well as seven bullocks and seven rams daily, with other offerings of meal and oil. All takes place at the central sanctuary; there is no mention of a lamb, and the Passover is part of the Unleavened Bread festival.

Lv 23[5-14] ordains the Passover for the evening of

14th Abib. The Feast of Unleavened Bread is treated separately; it lasts seven days, a holy convocation is to be held on the first and seventh days; and 'on the morrow after the sabbath' a sheaf of new corn is to be waved before the Lord, a he-lamb is to be offered as a burnt-offering with other offerings; and till this is done, no bread or parched corn or green ears may be eaten. This is a harvest rite. It is not clear what is meant by the 'morrow after the sabbath'; later tradition associated it with the sabbath of Passover and Unleavened Bread.

According to Ex 12^{1-13}, the current month of the Exodus is to be regarded as the first month of the year. On the tenth day a lamb or a kid is to be taken for each family or combination of families, according to their size. It is to be slain at even on the fourteenth, and the door posts and lintel are to be stained with its blood. It is to be roasted intact, and eaten with unleavened bread and **bitter herbs**. Nothing of it is to remain till morning. It is to be eaten in haste, the partakers prepared as for a journey; it is a sign of the Lord's 'pass-over.' This account is clearly meant to draw out the commemorative element in the celebration and is probably to be ascribed to the priestly editing of the tradition.

Ex 12^{43-49} forbids any foreigner or hired servant or sojourner to eat the Passover unless he first submits to circumcision.

Nu 9^{1-14} records that some men were unable to keep the Passover on the first anniversary of the Exodus because of ritual uncleanness. Arising from this it was laid down that in such cases the men should keep the Passover on the fourteenth day of the next (the second) month.

In Nu 28^{16-25} the Passover is distinguished from the Feast of Unleavened Bread. The first and seventh days of the latter are to be days of holy convocation. On each of the seven days two bullocks, a ram, and seven lambs (with special offerings of meal and oil) are to be sacrificed, and a goat for a sin-offering.

(2) *Historical and Prophetical books.*—No certain reference is found previous to the date of the discovery of Deuteronomy. In the prophets there are a few references to festivals (Hos 2^{11} 9^{5} 12^{9}, Am 5^{21} 8^{10}) but nothing specific about Passover or Unleavened Bread. The observance in 2 K 23^{21-23} is stated to have conformed to the regulations of 'this book of the covenant' (doubtless Dt 16^{1-8} is meant) and to have been novel in character. 2 Ch 30 records a celebration in the reign of Hezekiah. It was a month late owing to ritual hindrances. 2 Ch 35^{1-19} records the celebration in Josiah's day. Both these accounts reflect usages of the Chronicler's own time. In Ezr 6^{19-22} the priests and Levites play the prominent part in the sacrifice, and the Feast of Unleavened Bread is distinguished from the Passover.

Many of the Passover rites are undoubtedly very ancient; but Deuteronomy tends to emphasize the historical connexion of the festival with the Exodus. The various regulations and allusions in the OT are not consistent with each other, and different ideas were probably associated with the feast at different periods of the national history. Thus Ezekiel lays most stress on its aim as a collective expiatory sacrifice. It is likely that the feast was observed during the Exile, and that its commemorative significance was then made more emphatic. This would explain the underlying conception of the account in the Priestly Code. But the Chronicler shows preference for the Deuteronomic version, perhaps owing to the growing centralization of worship at one sanctuary in his time.

2. Origin and primitive significance.—If we set aside the waving of the barley sheaf, which is mentioned in only one record in the OT (Lev 23^{10-12}), there are two basic rites in this combined festival. They represent two separate ceremonies, each with its distinctive purpose. The one is the sacrifice and eating of the lamb; an integral part of this is the smearing of the blood on the door posts and lintels. The other is the eating of unleavened bread for seven days. The first is a pastoral practice: it was timed to take place on the night of the full moon nearest to the spring equinox. In the original, and probably pre-Yahwistic, ceremony the lamb was sacrificed to ensure that the god of flocks (or of fertility in general) would receive his share and would be prevailed upon to guarantee the continued fertility of the flock. The lamb was eaten as an act of communion between the worshippers and their god. The smearing of the blood was an apotropaic act to protect the shepherds, their homes, and their flocks, from every kind of unseen evil.

The second is an agricultural practice: it reflects the belief that when the new crop began to be used there must be no risk of contamination from the old leaven, especially where it was the practice to mix a lump of old dough with each fresh mixture. To ensure this there was a complete break in the use of leaven for seven days. It so happened that the rites came to be observed at the same time of the year, and the Hebrews, with their genius for taking up the old in the service of Yahweh and weaving it into their worship of Him, combined the two rites into a single festival and transformed these ancient practices into solemn ceremonies commemorating Yahweh's sparing of the Israelites in Egypt when the Egyptian firstborn were killed and His rescuing them from bondage in Egypt at the Exodus.

The association of the festivals with the Exodus is seen to be very natural when we remember that the Israelites asked leave of Pharaoh to sacrifice to their God (Ex 3^{18} 7^{16}). This may well have been a request to celebrate the ancient festival which was subsequently reshaped into Passover. It is conceivable that at one time the slaughtered lamb was the first lamb of the season and if this were so it would be easy to think of it both as a thank-offering for the sparing of the Israelite firstborn and also as a substitutionary sacrifice for them. Unleavened bread was associated with the Exodus events through the story of the taking of unleavened bread by the people in their haste to leave Egypt (Ex $12^{34, 39}$).
